BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA

Application of PACIFIC GAS AND ELECTRIC COMPANY to issue, sell, and deliver one or more series of Debt Securities and to guarantee the obligations of others in respect of the issuance of Debt Securities, the total aggregate principal amount of such long-term indebtedness and guarantees not to exceed $2 billion; to execute and deliver one or more indentures; to sell, lease, assign, mortgage, or otherwise dispose of or encumber utility property; to issue, sell and deliver in one or more series, an aggregate amount not to exceed $200 million par or stated value of First Preferred Stock -- $25 Par Value; to issue an aggregate $2.0 billion of short-term debt obligations; to utilize various debt enhancement features; enter into interest rate hedges; and for an exemption from the Commission's Competitive Bidding Rule. (U 39 E)	Application 04-05-041 (Filed May 27, 2004)

NOTIFICATION UNDER ORDERING PARAGRAPH 5
OF DECISION 06-11-006

Pursuant to Ordering Paragraph 5 (OP5) of Decision (D.) 06-11-006, Pacific Gas and Electric Company (PG&E) submits this notice that margin calls not offset by other hedges exceeded $300 million on January 16, 2007. OP 5 states

> PG&E shall file and service notice when margin calls that are not offset by other hedges reach $300 million, $600 million, $900 million, and each $300 million increment thereafter. The notice shall include (i) the potential per-customer impact of the margin calls, (ii) an estimate of the likelihood of higher margin calls, and (iii) a description of the steps that PG&E has taken or will take to mitigate the ratepayer impact of the margin calls. PG&E shall file and serve the notice within five business days of the margin calls reaching the previously specified levels. The notice shall be served on the service lists for (i) the consolidated proceedings in which D.06-08-027 was issued, (ii) Application No. 06-05-007,

and (iii) PG&E Advice Letter 2685-E, which was approved in Resolution E-3951.

On January 16, 2007, margin calls subject to OP5 notification exceeded $300 million. For a number of days prior to that day, they were less than $300 million. The total amount of collateral posting for margin calls on January 16, 2007 was approximately $305 million. The posting of collateral for margin calls, by itself, has no significant impact on the customer, other than the incremental financing costs associated with posting cash or letters of credit.[1] These costs depend on how long the collateral is outstanding before being reduced or returned to PG&E. Letter of credit fees on $300 million of letters of credit presently are approximately $3,600 per day. These fees, by themselves, would have a negligible per-customer impact.

Over a given time horizon, energy prices will increase or decrease; each of these two possibilities has substantial probability. The size of the price change depends on a number of factors impacting the energy market. Therefore, there is a reasonable likelihood of further margin calls.

///

///

///

///

///

///

///

[1] The ultimate impact of the hedges underlying the margin calls will depend on conditions when the hedges are settled. If the hedges in PG&E's electric portfolio settle at their current mark-to-market value, any loss on the hedges would be offset by a corresponding gain on a comparable amount of the underlying physical commodity that they are hedging.

Since the impact on customers of collateral posting for the margin calls, by themselves, is limited to the financing cost of short-term debt and letter of credit fees, no mitigation plan is necessary.
