**NOTICE OF EX PARTY COMMUNICATION BY THE DIRECT ACCESS
CUSTOMER COALITION, THE ALLIANCE FOR RETAIL ENERGY
MARKETS AND THE MARIN ENERGY AUTHORITY**

Pursuant to Rule 8.3 of the Commission's Rules of Practice and Procedure, the Direct Access Customer Coalition (DACC), the Alliance for Retail Energy Markets (AReM) and the Marin Energy Authority (MEA) respectfully file this notice of ex parte communications. This notice reports on an ex parte meeting held on Wednesday, December 15, 2010, at 1:00 p.m. with Karl Meeusen, advisor to Commissioner Peevey, at the CPUC's offices at 505 Van Ness Avenue, in San Francisco, CA. The meetings lasted approximately thirty minutes, involved oral communications and a subsequent email communication (included as Attachment A) and were scheduled at the request of the parties who attended. The meeting was attended by Mary Lynch, of Constellation Energy for AReM, Elizabeth Rasmussen and Dawn Weisz, for MEA, Len Pettis of the California State University for DACC, Mark Fulmer of MRW & Associates for AReM, Chris Hendrix of WalMart for DACC and Dan Douglass, counsel for AReM, DACC and MEA.

In this meeting, the attendees explained the progress being made with regards to a review of the exit fee methodologies including the Power Charge Indifference Adjustment (PCIA). The parties also expressed concern regarding the implementation of the current methodology in 2011,

and noted the significant increases in the PCIA in the Pacific Gas & Electric Company, Southern California Edison and San Diego Gas & Electric service territories as noted in each utility's individual Energy Resource Recovery Account (ERRA) proceeding.¹

The participants requested procedural assistance in determining how the current PCIA could be stayed at its current level, with the 2011 PCIA implementation delayed until the methodology for calculating the exit fees is revised, in order to avoid significant fluctuations being imposed on electricity customers. Dan Douglass delivered a subsequent email to Mr. Meeusen setting forth various procedural options that could be considered to achieve that goal.

Respectfully submitted,

Daniel W. Douglass

¹ A copy of this ex parte notice is also being filed in R.07-05-025 and in each of the other utilities' respective ERRA proceedings.

Attachment A
December 15, 2010 Email from Dan Douglass to Karl Meusen

Karl,

Thanks very much for getting together today with representatives of AReM, MEA and DACC to discuss the looming PCIA problem. There are various procedural options that could be considered to address this issue. Your thoughts as to an effective and efficient approach would be very much appreciated. For example:

- petitions for modification could be filed of the recent PG&E ERRA decision and the soon to be issued SCE ERRA decision (this, however, may not particularly effective as a solution due to the time it would take for consideration and resolution of the requests);
- a motion for stay could be filed in each of the ERRA dockets explaining the issue and asking that any PCIA increases be stayed until the conclusion of the PCIA examination in R.07-05-025;
- the Commission could issue a ruling in R.07-05-025 noting that any revision to the PCIA will be made retroactive to the most recent change date for each utility for which a new PCIA went into effect in 2011;
- a ruling could be issued in the SDG&E proceeding noting that the significant PCIA increases may cause customer rate volatility issues and directing PG&E and SCE to participate in a limited phase of the SDG&E ERRA that would address, on a statewide basis, the issue of whether the PCIA should be frozen for all three IOUs until the conclusion of the PCIA examination in R.07-05-025. The same ruling would specify that, for the interim, the PCIA will be frozen at current levels for all three IOUs.

Or, there could be some sort of combination of these options. Your thoughts and feedback will be very much appreciated, Karl. Thanks again for meeting with us today and have a great time back east and a happy holiday season!

Best regards,

Dan
