

Attachment A

Summary of Alternatives

Alternative 1 - Geographic split

- 14 rate centers in western portion
- 70 rate centers in eastern & northern portion
- Cities and communities intact
- 22 year projected life for western portion, Area B
- 14 year projected life for eastern portion, Area A
- Adopted by CPUC in 1999

Alternative 2 - Geographic split - western border adjusted easterly slightly in the southwest portion

- 22 rate centers in western portion
- 62 rate centers in eastern & northern portion
- Northern San Diego County & Imperial Valley in same area code
- Cities and communities on both sides of the split lines intact
- Western portion, Area B has projected years of 16 years
- North and eastern portion, Area A has projected life of 19 years

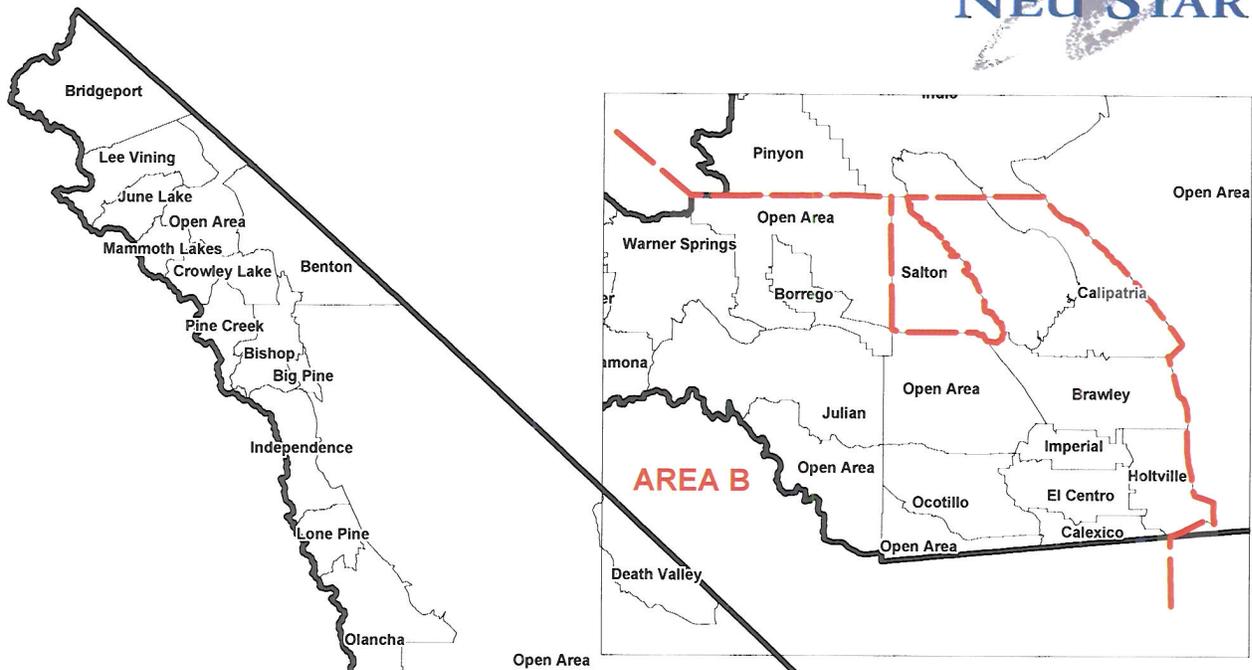

Alternative 3 - all Services Overlay

- Projected life of 17 years.

Alternative 4 - Geographic split

- 21 rate centers in western portion, Area B
- 63 rate centers in eastern and northern portion, Area A
- LATA 732 rate centers in same code
- Northern San Diego County and Imperial Valley in same code
- Cities and Communities intact
- Projected life of western area, Area B 16 years
- Projected life of northern and eastern area, Area A 18 years

Attachment B**Summary of Comments Submitted to the CPUC and from the NANPA Public Participation and Local Jurisdiction Meetings**

- Summary of customer opinions including those expressed at the public participation meetings (1300 total)
 - 601 – favoring Alt #1 – split
 - 163 – favoring Alt #4 – split
 - 261 – favoring overlay. Application, p. 7
- 43% favor split alternative #1, 13% favored split alternative #4 and 20% expressed preference for overlay. (3/14/07 Final Meeting Minutes, p. 83-84)

Summary of verbatim comments and points made in support of a specific alternative:

- Many expressed a preference for a split and their own area retaining the 760. In addition to these comments, consumers expressed the following concerns and opinions regarding whether or not a geographic split or an overlay should be implemented.
- There were more than a few expressions of interested in a technology specific code.
- There were several expressions of frustration with the shortsightedness of the whole process.
- Objections were raised to the locations of the meetings – too long a drive from the far reaches of the area, 1/25/07, Ridgecrest, p. 208; 1/26/07, Mammoth Lakes, p. 212.
- There were several expressions of frustration that which area was to retain the 760 was not designated and accusations of government incompetence. “The PUC should remember who they are working for (the people, not the utilities) and not approve his change or any other area code changes.” 1/23/07, Vista, p. 194.

Customers also advanced a number of arguments, most in favor of a split, apart from the assumption that they should retain their existing area code:

Arguments in Support of a Split

- **760 is too large for the same area code overall**
12/27/06, San Marcos, p. 103 “I prefer either of the split alternatives. The overlay saves some confusion during the first year, but leaves a mess forever. In this case the problem is particularly bad since this area code is so large geographically. In addition the north county San Diego portion is so different from the eastern CA section. The split would solve the problem today of Carlsbad and Lee Vining having the same area code.”
Twenty-one commenters agreed with this point of view.
- **Split provides geographical identification with telephone number**
2/11/07, Carlsbad, p. 228, “. . . geographical location [is] . . . one of the benefits of having spatially distinct area codes. . .” Four commenters echoed this view.
- **Dislike requirement of more digits, too confusing**
12/30/06, Palm Desert, p. 104 “I strongly object to the idea of an overlay where consumers would be required to dial the area code for all calls, even calls nearby. As a parent of young children, it is harder for them to learn and remember the number for dialing with the extra digits required. It makes more sense to go with split #1 or #4.”
1/6/2007, Oceanside, “. . . Nobody wants to have to dial 10 numbers for every call! . . .”
1/12/07, Palm Springs, p. 103, “. . . [Overlay] would be much to [sic] to tourists coming into the area.”
1/14/07, Vista, p. 125, “. . . Either way one is likely to have to print new business cards, etc.” Thirty-one comments echoed this point of view.
- **Will cost more to call**
1/12/07, Carlsbad, p. 113, “. . . charged (sometimes) a long distance fee. . .”
Five comments expressed this concern.
- **Split alternative has the most lasting effect**
1/12/07, San Marcos, p. 113, “I would elect Split Alternative #1 in the hopes that it would increase the length of time before the next split/overlay is required. . . .”

1/13/07, Carlsbad, p. 114, “. . . create new ones so that they are good for 25 years or more.”

1/22/07, Lee Vining, p. 183, “Mono and Inyo Counties should be given their own area code – this alternative must be considered. Draw the split at the southern boundary of Inyo County. The population is so small here (and growth potential limited) that it would never need to change again. Instead we get lumped into these fast-growing areas to the south and we end up changing our area code every few years. It is ridiculous. Give us one number now and never worry us again.” There were at least twenty-four opinions that also expressed this concern.

- **Used to splitting codes**

1/8/07, Oceanside, p.111, “an overlay would be inconvenient and confusing. Split the area code, as has been the pattern throughout California in the past.”

12/31/06, Escondido, p. 106, “. . .I’m not in business where it would cost a lot to change the area code on documents. Let’s go to Area Code 442 as proposed about 10 years ago.”

- **Customers unhappy with other overlays**

1/26/07, Encinitas, p. 212, “. . . My parents now have an overlay and they HATE it! So do my friends who live in the same area. “Five comments echoed this point of view.

- Frontier/Cox supporting split with San Diego retaining 760. Application, p. 9, 10.
- If a split is decided, industry recommends alternative # 4. This alternative has 21 rate centers in western area, 63 rate centers in northern and eastern areas. Application, p. 8.

Argument in Support of an Overlay

- **Wants to keep the same number**

12/29/06, San Marcos, p.104, “I’ve had the same number for over 20 years. The overlay seems to be the only way to guarantee no change.” Fifteen commenters specifically agreed with this.

- Industry chose overlay option because

- Quickest to implement
- Least disruptive to customers. Application p. 5.
- “The industry still recommends the overlay. Therefore NANPA will submit a petition for authority to implement an overlay.” (3/14/07 Final Meeting Minutes, p. 84)
