AGENDA

This will be the second meeting of the Vehicle-Grid Integration (VGI) Communication Protocol working group, which is designed to inform the Commission's rulemaking under R.13-11-007 and related proceedings.

The California Public Utilities Commission, California Energy Commission, and other State agencies convened this working group to assess how and whether the adoption of a communications protocol is necessary to enable Plug-In Electric Vehicle-Grid Integration (VGI) resources to more economically participate in electricity markets at scale.

Participants of the working group will identify and assess opportunities in which VGI can create value from multiple market participants' perspectives, communication protocols needed to deliver that value, and concepts for how utilities, automakers, electric vehicle service providers, aggregators, and others can develop pathways to market for a VGI resource.

The working group will allow participants to review, understand, and discuss the technical details of existing communication protocols. The recommendations of the working group will be considered and incorporated in CPUC's Rulemaking 13-11-007 (and/or the SB 350 Transportation Electrification applications A.17-01-020, A.17-01-021 and A.17-01-022) and the Energy Commission's Integrated Energy Policy Report (IEPR) proceeding for future policy decisions. Public Workshop Notice: A.17-01-020 et al. - Standard Review Project Proposals Included in the Investor-Owned Utility Transportation Electrification Applications Pursuant to SB 350 and D.16-11-005

July 11, 2017 9am-4:30pm	California Public Utilities Commission 505 Van Ness Avenue - Auditorium San Francisco, CA 94102 Webex will be available for remote participation Details to be provided closer to the event.
------------------------------------	--

AGENDA

California Public Utilities Commission staff will host a public workshop to discuss the standard review transportation electrification proposals included in the investor owned utilities' (IOUs) applications filed pursuant to requirements established in Senate Bill 350 to accelerate widespread transportation electrification.

On January 20, 2017, Pacific Gas and Electric Company, San Diego Gas & Electric Company, and Southern California Edison Company submitted applications proposing programs designed to reduce dependence on petroleum, meet air quality standards, lower greenhouse gas emissions, achieve the goals set forth in the Charge Ahead California Initiative, and be in the interest of ratepayers, as required under D.16-11-005. The utilities' applications can be found at www.cpuc.ca.gov/sb350te. The focus of this workshop will be the utilities' proposals for standard review projects, which would install nearly \$1 billion in infrastructure aimed at accelerating transportation electrification across the three IOUs' service territories. A more detailed agenda for the workshop will be made available closer to the event. Though a quorum of commissioners may be present, no decisions will be made.
