The California Public Utilities Commission, California Energy Commission, and other State agencies convened this working group to assess how and whether the adoption of a communications protocol is necessary to enable Plug-In Electric Vehicle-Grid Integration (VGI) resources to more economically participate in electricity markets at scale.

Participants of the working group will identify and assess opportunities in which VGI can create value from multiple market participants' perspectives, communication protocols needed to deliver that value, and concepts for how utilities, automakers, electric vehicle service providers, aggregators, and others can develop pathways to market for a VGI resource.

The working group will allow participants to review, understand, and discuss the technical details of existing communication protocols. The recommendations of the working group will be considered and incorporated in CPUC's Rulemaking 13-11-

007 (and/or the SB 350 Transportation Electrification applications A.17-01-020, A.17-01-021 and A.17-01-022) and the Energy Commission's Integrated Energy Policy Report (IEPR) proceeding for future policy decisions. AGENDA

The Vehicle-Grid Integration (VGI) Communication Protocol working group, which is designed to inform the Commission's rulemaking under R.13-11-007 and related proceedings, will meet according to the above schedule.

Any changes to the schedule will be noticed on the Daily Calendar, including updates on locations for the all-day meetings. A current schedule will also be available at www.cpuc.ca.gov/vgi.

Background

The California Public Utilities Commission, California Energy Commission, and other State agencies convened this working group to assess how and whether the adoption of a communications protocol is necessary to enable Plug-In Electric Vehicle-Grid Integration (VGI) resources to more economically participate in electricity markets at scale.

Participants of the working group will identify and assess opportunities in which VGI can create value from multiple market participants' perspectives, communication protocols needed to deliver that value, and concepts for how utilities, automakers, electric vehicle service providers, aggregators, and others can develop pathways to market for a VGI resource.

The working group will allow participants to review, understand, and discuss the technical details of existing communication protocols. The recommendations of the working group will be considered and incorporated in CPUC's Rulemaking 13-11-007 (and/or the SB 350 Transportation Electrification applications A.17-01-020, A.17-01-021 and A.17-01-022) and the Energy Commission's Integrated Energy Policy Report (IEPR) proceeding for future policy decisions. Anyone interested in participating in the VGI Working Group should contact Amy Mesrobian (amy.mesrobian@cpuc.ca.gov or 415-703-3175) or Carrie Sisto (cs8@cpuc.ca.gov or 415-703-2872).
