**AGENDA**

What information is essential to administer an effective, customer centered program for Distributed Energy Resource (DER) and Energy Management Providers? Customer-specific energy and program related data!

California State Law and Commission Privacy Rules require third-party (non-utility) providers to obtain customer authorization before the Utility can release this data. In Demand Response, the Commission ordered the Utilities to create an electronic “click-through” process that allows a customer to authorize the Utility to share the customer’s data. The data available is specific to Demand Response applications through the Utility Green Button infrastructure.

Resolution E-4868 established rules and parameters for the click-through solutions. In order to “future-proof” the click-through solutions, the Commission ordered the Utilities to ensure that the different data sets available to each different DER can be included as an option when a provider registers to use the click-through process.
This meeting is the beginning of the process to ensure that the data sets that DERs and Energy Management Providers need are included in the architecture of the solutions. “Future-proofing” the solutions will ensure an efficient use of ratepayer funds by preventing expensive re-architecture of systems. For questions about this workshop please contact Katherine Stockton at katherine.stockton@cpuc.ca.gov.
