	Page
I. Executive Summary	1
II. Responses to Questions	
A. Responses to Questions Concerning Prices	4
1. How can we at the state level reassure ourselves and our constituents that the extraordinary prices we are experiencing today are free of such manipulation?	
2. How can we reassure ourselves and our constituents that the indexes driving the extremely high retail rates are free of such manipulation, and in fact represent robust, realistic market prices?	5
3. How much gas is actually being bought and sold at the reported prices?	7
4. Who establishes the prices?	8
5. What are the mechanics of price disclosure and discovery?	8
6. How robust are the indices and other price reporting mechanisms?	9
B. Responses to Questions Concerning Market Concentration	
1. What is the extent of vertical integration in the producing and processing functions?	11
2. What is the extent of vertical integration among producers, processors, and pipelines?	11
3. What are the relationships between marketers and brokers, on the one hand, and owners of the physical elements of the gas system (production, processing, transmission)?	11
4. What is the relationship between marketers and brokers and financing entities such as investment banks?	11

TABLE OF CONTENTS (con'td)

	Page
5. How concentrated are each of the markets for physical production and delivery services?	16
6. How concentrated are each of the markets for financing, Marketing, and trading natural gas for delivery and use in California?	16
C. Responses to Questions about the Identity of Market Participants	
1. Who are the producers in the producing basins that serve California?	23
2. Who are the royalty owners in the producing basins that service California?	25
3. Who performs the gas gathering and processing functions in each of the producing basins?	26
4. Who are the pipelines that transport gas out of the producing basins to California? To other parts of America?	28
5. Who are the California wholesale buyers of gas transported by pipeline?	30
6. Who are the California retail buyers of gas transported by pipeline (noncore utility customers)?	31
7. Who are the gas marketers and brokers?	33
8. How are the physical elements of gas infrastructure (production, processing, transmission) financed?	35
9. Who are the financing entities?	35

Appendices

- I. Background Information on the Structures and Functioning of the Natural Gas Production and Delivery Systems that Serve California and the U.S.**
- II. Natural Gas Producers and Production**
- III. Market Concentration Tables – Profiles of Companies Involved in California Natural Gas Market**
