**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA**

In the Matter of the Application of San Diego
Gas & Electric Company (U 902-E) for a
Certificate of Public Convenience and Necessity
for the Sunrise Powerlink Transmission Project

Application No. 06-08-010
(Filed August 4, 2006)

**FIFTH QUARTERLY PROJECT STATUS REPORT
OF SAN DIEGO GAS & ELECTRIC COMPANY
Q1 2010**

Pursuant to D.08-12-058¹, San Diego Gas & Electric Company (“SDG&E”) hereby files² and serves the following quarterly project status report on the progress of the Sunrise Powerlink Transmission Project (“Sunrise”) in accordance with ordering paragraph #13.³

I. THE DECISION DIRECTS SDG&E TO PROVIDE THE FOLLOWING INFORMATION

Ordering paragraph #13, as well as in discussions in the body of the Decision,⁴ directs SDG&E to provide project status updates, answering eight questions regarding the progress of the project.

¹ Referred to herein as the “Decision”.

² D.09-12-004 (finding of fact 1, ordering paragraph 1) clarified that these quarterly status reports should be filed.

³ While the ordering paragraph does not specifically identify a date for the quarterly reports, as described on p. 1 of its first quarterly project status report submitted herein, SDG&E is planning to serve the quarterly reports on the 15th day of the month following each natural end of the calendar quarter, *i.e.*, April 15, July 15, October 15 and January 15. This allows the reports to capture the quarter-ending financial data that is not available on the final day of the quarter, but is available in the early part of each following month. SDG&E believes that this schedule will provide the Commission with the most current and accurate information available.

⁴ Decision at 276-277.

1. Comprehensive project development schedule, including estimated project in-service date;

SDG&E's Q1 2010 project development schedule is attached to this report as

Appendix A. The estimated project in-service date remains approximately June 2012.

2. Any changes in project scope and schedule, including the reasons for such changes;

There are no changes to the project scope or schedule at this time.

3. Specifically address the need for the Encina transformer, the cost of undergrounding in Alpine Boulevard, and the amount of undergrounding contemplated;

The California Independent System Operator ("CAISO") confirmed the need for the Encina transformer in a letter to ALJ Vieth and the Sunrise service list on April 28, 2009. The transformer is scheduled to be in-service on or before June 2012.

The status of the undergrounding in Alpine Boulevard has not changed; the portion of the route from Peutz Valley to the entrance to the Star Valley Option is approximately 5.85 miles in length under the current design. There are still two alternatives under consideration for the eastern terminus of the underground line, the east Alpine Boulevard alternative (an additional 2.05 miles of underground) and the Revised Star Valley Option (an additional .35 miles of underground).

The total estimated cost of undergrounding in Alpine Blvd remains unchanged at \$335M for the Peutz Valley to Alpine Blvd Alternative and \$244M for the Peutz Valley to the revised Star Valley Option. These costs do not include AFUDC, support costs or mitigation costs.

4. Any engineering difficulties encountered in constructing the project;

The terrain for much of the alignment is challenging. The inability to design access roads in certain areas due to environmental concerns has increased the need to access towers via helicopter. However, the engineering difficulties have not currently caused any change in cost, scope, or schedule.

5. Total estimated project costs;

The total estimated cost of the project remains unchanged at \$1.883 billion.

6. Actual spending to date;

The actual project spending through the end of the first quarter 2010 (3/31/10) is \$289 million.

7. Any and all filings submitted to FERC for ultimate cost recovery through transmission rates; and

No such filings have been submitted to date.

8. Any additional information SDG&E believes relevant and necessary to accurately convey the status of the Sunrise project.

a. SDG&E-Citizens Energy agreement

SDG&E and Citizens Energy (“Citizens”) reached a development and coordination agreement on May 11, 2009. This agreement is the result of discussions that follow from an earlier memorandum of agreement (“MOA”) regarding joint participation in the project, which was executed in 2006.⁵ Under the agreement, Citizens would lease 50% of the transfer capability of the Sunrise Powerlink from the Imperial Valley substation to the Imperial/San Diego County line for a term of 30 years. Citizens will prepay a lease amount for the 30 year term. Citizens agrees to request the CAISO to treat Citizens as a Participating Transmission Owner (“PTO”), turn over operational control of that capacity to the CAISO, and to seek acceptance by the Federal Energy Regulatory Commission (“FERC”) of transmission rates substantially similar to the rate SDG&E could recover if SDG&E constructed Sunrise without

⁵ The original MOA was executed March 16, 2006 between SDG&E, Imperial Irrigation District (“IID”), and Citizens Energy. IID subsequently withdrew from this agreement in November 2007. The MOA, and IID’s withdrawal, was described in SDG&E’s prepared testimony admitted into the record of this proceeding. *See* Ex. SD-4 at 8-9; Ex. SD-5 at I-22 to I-24; Ex. SD-6 at IV-10 to IV-11 (describing MOA); Ex. SD-5 at Appendix I-2 (executed MOA and supplement); Ex. SD-5, Appendix II at II-36; Ex. SD-35 at 1.31-34 (addressing effects of IID’s withdrawal). *See also*, Ex. ID-3 at 8-9 (describing IID’s withdrawal).

Citizens' participation. Citizens' transfer capability will revert back to SDG&E at the end of the 30 year lease.

The agreement does not change SDG&E's renewable energy commitments, Citizens has agreed to use a rate substantially similar to the rate that would be charged by SDG&E, and Citizens agrees to invest at least 50% of its profits from the agreement in low-income programs in the Imperial Valley.

SDG&E filed an application (also signed and verified by Citizens Energy) on October 9, 2009 with the Commission under Section 851 of the Public Utilities Code for approval of the development and coordination agreement with Citizens (A.09-10-010) . Also on October 9, SDG&E and Citizens Energy each filed petitions for a declaratory order with the FERC for approval of certain ratemaking and accounting treatment for the lease under this agreement (Docket Nos. EL10-2-000 and EL10-3-000). On December 17, 2009, FERC issued an order approving the ratemaking principles requested by Citizens (129 FERC ¶ 61,242), and a separate order acceptable to SDG&E approving an accounting treatment for the lease applicable to SDG&E's transmission rates (129 FERC ¶ 61,233).

b. Import limitation at Miguel Substation

Currently, imports into Miguel substation can be limited by the amount of generation that is being produced by the TDM and Intergen generators in Mexico. Low levels of generation restrict the amount of power that can be imported into Miguel substation because there is less generation that can be tripped—via a Special Protection Scheme (“SPS”)—in the Imperial Valley to mitigate an overload of one 500/230 kV transformer at Miguel substation for the loss of the other transformer.

In coordination with the CAISO, IID, CFE, and APS, SDG&E has modified the existing SPS to eliminate the need to limit imports into Miguel substation when the output of the TDM

and Intergen plants is low. With the modified SPS, the maximum level of imports into Miguel substation is 1800 MW, regardless of how much power the TDM and Intergen plants are producing.

The SPS modifications were placed in service on August 3, 2009.

c. Procurement activities

As detailed in previous quarterly reports, pre-construction activities such as procuring long-lead equipment, land right acquisition, environmental surveys, and detailed engineering design are moving forward in order to meet the construction start date. Equipment such as lattice towers, underground cable and transformers for the new substation have been ordered and deliveries of the towers and cable have begun in the second quarter of 2010. A Request for Proposals (“RFP”) for construction was issued and evaluation of the bidders’ responses was completed. Contract negotiations are underway with one of the selected finalists. Land acquisitions are continuing and offers have been presented to 60% of the affected property owners for acquisition of right-of-way. All such initial offers are estimated to be completed by June 2010.

d. Efforts to fulfill Sunrise renewables requirement

In June 2009, SDG&E issued a Request for Offers (“RFO”) seeking bids for renewable projects. As part of the RFO, SDG&E conducted targeted outreach for projects located in and surrounding the Imperial Valley. SDG&E hosted an August 2009 pre-bid conference in El Centro to provide support to local developers. The results were impressive. SDG&E received more offers from the Imperial Valley and Sunrise Powerlink surrounding areas than in any previous renewable solicitation. In total, the offers far exceeded the carrying capacity of the Sunrise Powerlink. The 2009 shortlist includes projects that would flow on Sunrise and SDG&E is currently negotiating with those shortlisted bidders. Although the solicitation has closed,

SDG&E continues to receive inquiries from Imperial Valley developers who did not participate in the 2009 RFO. On March 24, 2010, SDG&E and Stirling signed an amendment to the Stirling contract, which was subsequently filed with the Commission on April 7, 2010. The amendment makes adjustments required to bring the 300mw project to a successful conclusion.

In February, 2010, the Bureau of Indian Affairs (BIA) approved a land access permit negotiated between SDG&E and Manzanita to allow early development work on the anticipated wind farm. Beginning in April, 2010, SDG&E plans to install roughly four met towers on the Manzanita reservation to collect wind data for the designated wind farm site. SDG&E plans to jointly develop the 57 MW wind farm project with Manzanita in eastern San Diego County with a projected in-service date of 2012.

e. Community outreach

SDG&E continues to proactively interact with the communities impacted by the Sunrise Powerlink through its Community Council process. The next round of Council meetings is scheduled to take place in the April/May timeframe. SDG&E has also initiated a targeted education and outreach effort to the Alpine business community. This door-to-door effort will allow SDG&E to interact one-on-one with impacted business owners to provide a clear understanding of the scope of the underground portion of the project including the construction process and schedule.

f. Environmental mitigation

SDG&E continues to implement the construction and environmental mitigation measures identified in the Final Environmental Impact Report/ Environmental Impact Statement (“FEIR/EIS”). These measures cover a multitude of issue areas including biological, cultural, water, air, noise, land use, wilderness and recreational and agricultural resources. As a first level

of mitigation, SDG&E is attempting to avoid and minimize impacts to these issue areas as directed by the mitigation measures through further design refinements.

One of the significant mitigation measures requires that after minimizing impacts to biological resources and prior to incurring any project impacts a Habitat Acquisition Plan (“HAP”) must be prepared. The HAP details how the remaining impacts must be mitigated by the purchase of off-site habitat—often at an increased ratio of two or three to one. This plan identifies properties to be preserved and/or restored in areas along the project alignment. These properties are being coordinated with the governing wildlife and jurisdictional agencies. A Habitat Management Plan has been prepared, and an appropriate managing entity will be identified for long term management of the property. A second draft of this plan was issued in February 2010, for review and comment by the relevant agencies, including the CPUC, BLM, U.S. Forest Service, U.S. Fish & Wildlife Service, and CA Dept. of Fish & Game. SDG&E is currently working with each of the responsible agencies to accumulate any remaining comments to be addressed prior to finalizing this document, which is expected by the end of the second quarter of 2010.

A second set of significant mitigation measures address cultural and paleontological resources along the project alignment. To date field surveys of the alignment have been completed and the final survey report is being reviewed and finalized by the appropriate agencies and Native American Tribal representatives. A second report detailing how resources will be managed if impacted by the project construction has been drafted and is also being reviewed for finalizing by the appropriate agencies and Native American Tribal representatives. It is expected that these reports will be finalized by the end of the second quarter of 2010.

g. Project permitting

Significant efforts are continuing to obtain all permits and approvals from jurisdictional agencies. These include required permits for issues such as water resource impacts, biological resource impacts, and clean air requirements. In addition, the U.S. Forest Service is still in the process of evaluating final routing and environmental considerations in conjunction with its Record of Decision (“ROD”), Plan Amendment and Special Use Permit. The issuance of the ROD as well as the Plan Amendment and Special Use Permit are necessary to commence construction on Forest Service lands in accordance with their land use specifications and mitigation requirements. The Forest Service’s completion of these in the near future will allow the project to maintain its current schedule.

Respectfully submitted,
