**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA**

In the Matter of the Application of San Diego
Gas & Electric Company (U 902-E) for a
Certificate of Public Convenience and Necessity
for the Sunrise Powerlink Transmission Project

Application No. 06-08-010
(Filed August 4, 2006)

**NINTH QUARTERLY PROJECT STATUS REPORT
OF SAN DIEGO GAS & ELECTRIC COMPANY
Q1 2011**

Pursuant to D.08-12-058¹, San Diego Gas & Electric Company (“SDG&E”) hereby files² and serves the following quarterly project status report on the progress of the Sunrise Powerlink Transmission Project (“Sunrise”) in accordance with ordering paragraph #13.³

I. THE DECISION DIRECTS SDG&E TO PROVIDE THE FOLLOWING INFORMATION

Ordering paragraph #13, as well as discussion in the body of the Decision,⁴ directs SDG&E to provide project status updates, answering eight questions regarding the progress of the project.

The most significant development of the past quarter was the beginning of overhead construction on the Sunrise transmission line. In addition to activities previously reported, such

¹ Referred to herein as the “Decision.”

² D.09-12-004 (finding of fact 1, ordering paragraph 1) clarified that these quarterly status reports should be filed.

³ While the ordering paragraph does not specifically identify a date for the quarterly reports, as described on p. 1 of its first quarterly project status report submitted herein, SDG&E is planning to serve the quarterly reports on the 15th day of the month following each natural end of the calendar quarter, *i.e.*, April 15, July 15, October 15 and January 15. This allows the reports to capture the quarter-ending financial data that is not available on the final day of the quarter, but is available in the early part of each following month. SDG&E believes that this schedule will provide the Commission with the most current and accurate information available.

⁴ Decision at 276-277.

as construction on the transmission underground portion in November and the Suncrest substation in December, 2010, SDG&E began construction on the transmission overhead portion in January 2011. As described in greater detail in response to question 2 below, SDG&E is working closely with the resource agencies to resolve a mitigation measure that is presenting construction delays and has placed the 2012 in-service date at risk.

1. Comprehensive project development schedule, including estimated project in-service date;

SDG&E's current project development schedule is attached to this report as Appendix A.

The estimated project in-service date remains approximately June 2012.

2. Any changes in project scope and schedule, including the reasons for such changes;

There have been no changes to the project scope. Construction began on the underground section on November 30, 2010, the Suncrest substation on December 17, 2010, and the non-federal land portion of the overhead section on January 20, 2011. The construction start date change from the June 2010 date reported originally is due to delays in acquiring environmental permits. The permits to begin construction on the remaining overhead sections, that is, the Bureau of Land Management ("BLM") and United States Forest Service ("USFS") jurisdictional areas, are expected to issue in the second quarter of 2011.

Even after Notices to Proceed ("NTPs") were issued for the sections mentioned above, construction delays have been experienced in the underground and overhead sections due primarily to mitigation measure B-8a. The mitigation measure states that no vegetation clearing will occur during the bird nesting season. The nesting season begins in the middle of January and ends in the middle of August. Construction can currently occur in areas with no vegetation, but there are limited numbers of those sites. The project team has been working on a protocol for several months with the responsible agencies to allow for construction to proceed while still meeting the intent of the mitigation measure. Until such time the protocol can be worked out,

the project will be stalled for almost all overhead construction activities, except for a handful of sites where there are no vegetation impacts. SDG&E is working closely with the CPUC, BLM, USFS, US Fish & Wildlife Service and California Department of Fish & Game on a process that may allow for some additional construction activities during the bird breeding season, however this process has not been agreed upon to date and continues to pose delays to the project.

3. Specifically address the need for the Encina transformer, the cost of undergrounding in Alpine Boulevard, and the amount of undergrounding contemplated;

The California Independent System Operator (“CAISO”) confirmed the need for the Encina transformer in a letter to ALJ Vieth and the Sunrise service list on April 28, 2009. The transformer is scheduled to be in-service on or before June 2012.

The undergrounding in Alpine Boulevard from Peutz Valley to the entrance to the Star Valley Option is approximately 5.85 miles in length under the current design. The Forest Service ROD selected the revised Star Valley Option for the eastern terminus of the underground line, which comprises an additional .35 miles of underground. The total estimated cost of undergrounding in Alpine Blvd is \$244M for the Peutz Valley to the revised Star Valley Option. These costs do not include AFUDC, support costs or mitigation costs.

4. Any engineering difficulties encountered in constructing the project;

The terrain for much of the alignment is challenging. The inability to design access roads in certain areas due to environmental concerns has increased the need to access towers via helicopter. However, the engineering difficulties have not currently caused any change in cost, scope, or schedule.

5. Total estimated project costs;

The total estimated cost of the project remains unchanged at \$1.883 billion.

6. Actual spending to date;

The actual project spending through the end of the first quarter 2011 (3/31/11) is \$766.8 million.

7. Any and all filings submitted to FERC for ultimate cost recovery through transmission rates; and

No such filings have been submitted to date.

8. Any additional information SDG&E believes relevant and necessary to accurately convey the status of the Sunrise project.

a. SDG&E-Citizens Energy agreement

SDG&E and Citizens Energy (“Citizens”) reached a development and coordination agreement on May 11, 2009. This agreement is the result of discussions that follow from an earlier memorandum of agreement (“MOA”) regarding joint participation in the project, which was executed in 2006.⁵ Under the agreement, Citizens would lease 50% of the transfer capability of the Sunrise Powerlink from the Imperial Valley substation to the Imperial County/San Diego County line for a term of 30 years. Citizens will prepay a lease amount for the 30 year term. Citizens agrees to request the CAISO to (1) treat Citizens as a Participating Transmission Owner, (2) turn over operational control of that capacity to the CAISO, and (3) seek acceptance by the Federal Energy Regulatory Commission (“FERC”) of transmission rates substantially similar to the rate SDG&E could recover if SDG&E constructed Sunrise without Citizens’ participation. Citizens’ transfer capability will revert back to SDG&E at the end of the 30 year lease.

⁵ The original MOA was executed March 16, 2006 between SDG&E, Imperial Irrigation District (“IID”), and Citizens Energy. IID subsequently withdrew from this agreement in November 2007. The MOA, and IID’s withdrawal, was described in SDG&E’s prepared testimony admitted into the record of this proceeding. *See* Ex. SD-4 at 8-9; Ex. SD-5 at I-22 to I-24; Ex. SD-6 at IV-10 to IV-11 (describing MOA); Ex. SD-5 at Appendix I-2 (executed MOA and supplement); Ex. SD-5, Appendix II at II-36; Ex. SD-35 at 1.31-34 (addressing effects of IID’s withdrawal). *See also*, Ex. ID-3 at 8-9 (describing IID’s withdrawal).

The agreement does not change SDG&E's renewable energy commitments, Citizens has agreed to use a rate substantially similar to the rate that would be charged by SDG&E, and Citizens agrees to invest at least 50% of its profits from the agreement in low-income programs in the Imperial Valley.

SDG&E filed an application (also signed and verified by Citizens Energy) on October 9, 2009 with the Commission under Section 851 of the Public Utilities Code for approval of the development and coordination agreement with Citizens (A.09-10-010). Also on October 9, SDG&E and Citizens Energy each filed petitions for a declaratory order with the FERC for approval of certain ratemaking and accounting treatment for the lease under this agreement (Docket Nos. EL10-2-000 and EL10-3-000). On December 17, 2009, FERC issued an order approving the ratemaking principles requested by Citizens (129 FERC ¶ 61,242), and a separate order acceptable to SDG&E approving an accounting treatment for the lease applicable to SDG&E's transmission rates (129 FERC ¶ 61,233). A final decision on SDG&E's Section 851 application is expected in the second quarter 2011.

b. Import limitation at Miguel Substation

Currently, imports into Miguel substation can be limited by the amount of generation produced by the TDM and Intergen generators in Mexico. Low levels of generation restrict the amount of power that can be imported into Miguel substation because there is less generation that can be tripped—via a Special Protection Scheme (“SPS”)—in the Imperial Valley to mitigate an overload of one 500/230 kV transformer at Miguel substation for the loss of the other transformer.

In coordination with the CAISO, IID, CFE, and APS, SDG&E has modified the existing SPS to eliminate the need to limit imports into Miguel substation when the output of the TDM and Intergen plants is low. With the modified SPS, the maximum level of imports into Miguel

substation is 1800 MW, regardless of how much power the TDM and Intergen plants are producing.

The SPS modifications were placed in service on August 3, 2009.

c. Procurement activities

As detailed in previous quarterly reports, pre-construction activities such as procuring long-lead equipment, land right acquisition, environmental surveys, and detailed engineering design have been moving forward in order to meet the construction start dates and needs.

Equipment such as lattice towers, underground cable and transformers for the new substation have been ordered and 65% of the towers and all of the underground cable have been delivered. Other materials such as conductor, insulators, fiber optic cable, miscellaneous hardware, and steel poles have been ordered and approximately 70% have been delivered. The construction contractors, PAR Electrical Contractors for the overhead and underground sections and Beta Engineering for the Suncrest substation, have begun construction. Order of possession has been obtained for all but one property, which will be obtained by the end of May. A small number of properties will be going through the condemnation process but order of possession has been obtained for these properties.

Notices to proceed have been issued by the Commission for construction activities in SDG&E's main construction yards, in existing substations, the underground section, all but the USFS lands and MCAS Miramar on the overhead sections, and Suncrest substation.

Construction of field offices at the two main yards and the material yard preparation in Alpine have been completed.

The activities in the existing substations are related to upgrades required to accommodate the new Sunrise transmission line.

d. Efforts to fulfill Sunrise renewables requirement

In June 2009, SDG&E issued a Request for Offers (“RFO”) seeking bids for renewable projects. As part of the RFO, SDG&E conducted targeted outreach for projects located in and surrounding the Imperial Valley. The results were robust, with SDG&E receiving more offers from the Imperial Valley and areas surrounding the Sunrise Powerlink than in any previous renewable solicitation. In total, the offers far exceeded the carrying capacity of the Sunrise Powerlink. The 2009 shortlist includes projects that require Sunrise to access the market and SDG&E is currently negotiating with those shortlisted bidders. Although the solicitation has closed, SDG&E continues to receive inquiries from Imperial Valley developers who did not participate in the 2009 RFO.

In Q1 2011, SDG&E executed the following renewals power purchase agreements (PPA):

1. On February 11, 2011 a 20 year PPA with Ocotillo Express, LLC a renewable energy company managed by Pattern Energy. This PPA will provide up to 315MW of wind energy from a facility located on 15,000 acre site in approximately 25 miles west of El Centro in the Imperial Valley. This substantial project will produce enough renewable wind energy to serve more than 130,000 households a year. This project is scheduled to begin deliveries as early as December 2012.
2. On March 8, 2011 another 25 year PPA with CSolar Development, LLC , a renewable energy company managed by Tenaska Solar Ventures. This PPA will provide up to 150MW of solar energy from a facility located on an approximately 1,000 acre site in the western part of Imperial Valley. When operating at peak times, the ground mounted photovoltaic solar power generation system will produce enough

electricity to meet the needs of approximately 55,000 California homes. This project is scheduled to begin deliveries in 2015.

SDG&E is poised to issue another RPS solicitation seeking additional bids for renewable energy pending Commission approval. For the solicitation, SDG&E will place special emphasis on projects that will flow over the Sunrise Powerlink by (1) hosting a special Pre-Bid Conference in El Centro to lend support to developers in and around the Imperial Valley; (2) extending the solicitation's closing date by two weeks for projects that will flow over the Sunrise Powerlink; (3) waiving the required bid fee for shortlisted projects; and, (4) while shortlisting, applying locational preferences (as permitted by the Commission-approved least cost best fit evaluation methodology) for such a project if it scores high in the viability test and scores competitively relative to other non-Sunrise Powerlink projects. Market participants, including those who are planning projects in areas served by the Sunrise Powerlink appear eager for the RFO to be issued, as SDG&E continues to field calls inquiring about timing of RFO issuance.

e. Community outreach

SDG&E remains committed to proactively and accurately disseminating information about Sunrise Powerlink activities on a timely and regular basis. With construction well underway, we have shifted outreach priorities, placing a greater emphasis on construction-related activities and notifications. SDG&E continues to implement MM L-1a, the company's Construction Notification Plan.

The Sunrise Public Affairs team continues to advocate for SDG&E's "Buy Local" campaign in support of businesses in communities affected by Sunrise construction activities. Additionally, public affairs created a survey to gauge employee spending and dining habits for communities along the route. Results indicate that on average an SDG&E employee working on Sunrise spends approximately \$55 and patronize approximately 3.5 local businesses weekly.

The East County Community Relations office in Alpine now staffs two full-time employees and regularly rotates other public affairs staff as needed. The office will remain open 40-hours per week for the duration of construction. SDG&E will continue to provide informative presentations, construction updates and project briefings to elected officials, key stakeholders and interested residents for the duration of the project.

f. Environmental mitigation

SDG&E continues to implement the construction and environmental mitigation measures identified in the Final Environmental Impact Report/ Environmental Impact Statement (“FEIR/EIS”). These measures cover a multitude of issue areas including biological, cultural, water, air, noise, land use, wilderness, recreational, and agricultural resources. As stated in Section I.2 above, some of these mitigation measures are very onerous to implement in construction as they significantly restrict activities throughout major portions of the year making it extremely difficult to meet scheduled in-service dates.

As a first level of mitigation, SDG&E has attempted to avoid and minimize impacts to these issue areas through final design refinements which have reduced impacts by approximately 45% from what was approved in the EIR/EIS as described in SDG&E’s Project Modification Report (“PMR”). SDG&E will continue to avoid and minimize impacts throughout construction activities.

One of the significant mitigation measures requires that, after minimizing impacts to biological resources and prior to incurring any project impacts, a Habitat Acquisition Plan (“HAP”) and a Habitat Management Plan (“HMP”) must be prepared. A HAP/HMP was prepared and approved for project impacts to lands outside of the US Forest Service (“USFS”). A separate HAP/HMP was prepared and approved for those impacts on USFS lands in the first quarter of 2011. These plans have been coordinated with all appropriate agencies including the

CPUC, BLM, USFS, U.S. Fish & Wildlife Service, and CA Dept. of Fish & Game. Final negotiations for acquiring all properties are expected to be completed in the second quarter of 2011. Establishment of the agreements for funding and managing the mitigation lands is expected to be completed by the end of 2011.

A second set of significant mitigation measures address cultural and paleontological resources along the project alignment. To date, field surveys of the alignment have been completed and the final survey report has been finalized and approved by the appropriate agencies and Native American Tribal representatives. A second report, the Historic Properties Management Plan, which details how resources will be managed if impacted by the project construction, has been reviewed and approved by the appropriate agencies and Native American Tribal representatives. A third report, the Historic Properties Treatment Plan (HPTP), is being prepared to detail the few locations which will be impacted by the project construction and how those resources will be treated. This report is expected to be completed and approved by the appropriate agencies and Native American Tribal representatives by the end of the second quarter of 2011. The HPTP approval has taken more time than anticipated partially due to the number of tribes involved in the process. The delay in completing this plan has impacted the ability to move forward with construction activities on approximately 30 sites which are being addressed by this plan.

g. Project permitting

The USFS issued its Special Use Permit (“SUP”) to SDG&E on December 3, 2010. SDG&E has been working with the USFS on final plans to complete the SUP Exhibits and expects a Notice to Proceed with construction activities on USFS lands in the second quarter of 2011.

Significant efforts are continuing to obtain all other permits and approvals from jurisdictional agencies. The remaining outstanding permits and approvals are focused on water resource impacts and biological resource impacts.

Respectfully submitted,
