**BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA**

Order Instituting Rulemaking Regarding Policies, Procedures and Rules for the California Solar Initiative, the Self-Generation Incentive Program and Other Distributed Generation Issues.

Rulemaking 10-05-004  
(Filed May 6, 2010)

**ADMINISTRATIVE LAW JUDGE'S RULING EXTENDING IMPLEMENTATION OF PERFORMANCE MONITORING AND REPORTING SERVICE REQUIREMENTS ADOPTED IN DECISION 11-07-031**

This ruling confirms an e-mail ruling that I sent to the parties in this rulemaking on October 5, 2011. As noted in my e-mail to the parties, Energy Division has informed me that the California Solar Initiative (CSI) Program Administrators (PAs)<sup>1</sup> need additional time to implement a change to the CSI Program which was adopted in the recent Phase One modification order, Decision (D.) 11-07-031.

Specifically, the PAs request time to implement the new Performance Monitoring and Reporting Service (PMRS) requirements in Section 5.4 of the decision, which require all Expected Performance Based Buydown systems over 10 kilowatts (kW) to take PMRS service. According to Energy Division, this

---

<sup>1</sup> The CSI PAs are Pacific Gas and Electric Company, Southern California Edison Company, and the California Center for Sustainable Energy.

additional time is needed so the CSI PAs can notify industry participants and CSI applicants of the new PMRS requirement.

Ordering Paragraph 18 of D.11-07-031 allows the Administrative Law Judge to modify the compliance dates in the decision as needed to ensure effective program implementation. Therefore, I will grant the CSI PAs more time to comply with the new PMRS requirements in Section 5.4, to give them more time to communicate these changes to affected stakeholders.

It is my understanding that Energy Division is currently reviewing California Center for Sustainable Energy Advice Letter 20-A, Pacific Gas and Electric Company Advice Letter 3899-E-A, and Southern California Edison Company Advice Letter 2624-E-A involving changes to the CSI Handbook to incorporate requirements in D.11-07-031.

Therefore, **IT IS RULED** that the new Performance Monitoring and Reporting Service requirements in Section 5.4 of Decision 11-07-031 shall be effective upon issuance of the revised California Solar Initiative Handbook, which shall be issued no later than three weeks after Commission approval of the California Center for Sustainable Energy Advice Letter 20-A, Pacific Gas and Electric Company Advice Letter 3899-E-A, and Southern California Edison Company Advice Letter 2624-E-A.

Dated October 18, 2011, at San Francisco, California.
