4/30/02 R01-10-024 Order Instituting Rulemaking to Establish Policies and Cost Recovery Mechanisms for Generation Procurement and Renewable Resource Development

Summary: On April 25, 2002, Bill Reed, Senior Vice President of Sempra Energy Utilities (Sempra), met with Cmmr. Peevey in San Francisco. Also present were Leslie Katz, Regional Vice President, and Robert Resley, Vice President, of Sempra Energy Utilities. Reed stated that there needs to be a state planning, acquisition, procurement and dispatch model instead of returning the utilities to procurement, and that Department of Water Resources (DWR) should continue to engage in procurement until a model is established that will be for the long-term procurement. Reed further stated that if the utilities are to return to procurement, San Diego Gas & Electric Company should not be the only utility procuring and that, instead, the steps necessary to return the other utilities to creditworthiness must have been implemented and the others must also begin procurement at that time. Resley stated that reasonableness reviews should be avoided. Katz noted that there should be a mechanism for contemporaneous recovery of purchased power costs. Reed also stated that in order to return to procurement, there

is a need to determine the DWR allocation.

Summary: On April 25, 2002, Bill Reed, Senior Vice President of Sempra Energy Utilities (Sempra), met with Cmmr. Brown in San Francisco. Also present were David Gamson and Belinda Gatti, advisors to Cmmr. Brown, and Leslie Katz, Regional Vice President, and Robert Resley, Vice President, of Sempra Energy Utilities. Reed stated that there is a customer benefit from a statewide planning, acquisition, procurement and dispatch model that should be given serious consideration as an alternative to returning the utilities to procurement. Reed proposed that any return of utilities to procurement be delayed so that a process can be established to ensure that it is done properly. Katz noted that there should be a process to bring together the utilities and other necessary parties to develop long-term procurement processes and policies. Resley explained that California Department of Water Resources' procurement role for the three utilities' net short should be extended through 2003. Reed also stated that there would be a need for procedures to be in place to avoid after-the-fact reasonableness reviews. Reed also emphasized that all three utilities must be creditworthy before the utilities return to procurement.

4/30/02 A00-06-023 Southern California Gas Company, regarding Year Six (1999-2000) under its experimental Gas Cost Incentive Mechanism and related gas supply matters

Summary: On April 25, 2002, Bill Reed, Senior Vice President of Southern California Gas Company (SoCalGas), met with Cmmr. Peevey in San Francisco. Also present were Mark Pocta of the Office of Ratepayer Advocates, Leslie Katz, Regional Vice President of SoCalGas, Jim Harrigan, Vice President of Sempra Energy Utilities, and Marcel Hawiger of The Utility Reform Network. Written material (attached to the notice) was used. Reed recommended that the proposed decision (PD) be adopted without modification. Reed emphasized that incentive mechanisms that align customers and shareholders' interests lead to better results. Reed also explained that Edison's opposition to the settlement agreement was correctly dismissed by the PD. Harrigan noted that the hub loans were voluntary and done at the request of customers. Harrigan added that SoCalGas had nominated 98% of its interstate capacity to bring gas to California. Katz noted that the market power allegations had been the subject of extensive testimony. Harrigan stated that GCIM authorizes SoCalGas' Gas Acquisition Department to utilize rights assigned to and paid for by SoCalGas' core customers and that the core uses only those rights.

Summary: On April 25, 2002, Mark Pocta, the Office of Ratepayer Advocates (ORA) Manager, met with Trina Horner, advisor to Cmmr. Lynch, in San Francisco. Also present were Laura Krannawitter and Lynne McGhee, advisors to Cmmr. Duque, Julie Fitch, advisor to Cmmr. Peevey, Belinda Gatti, advisor to Cmmr. Brown, Brian Prusnek of the Energy Division, and Paul Carpenter, Doug Porter and John Hughes of Southern California Edison Company (SCE). Pocta clarified that Southern California Gas Company (SoCalGas) had physical gas of about 59 BCF in its storage facility on November 1, 2000, which is equal to 85% of the total core inventory and that the addition of hub loans put core storage close to 100% full with about 68.5 BCF of core storage. Pocta stated that the noncore had about 3 BCF of physical storage gas in inventory. Pocta stated that SoCalGas was making hub loans during the same time

period that certain portions of the state were experiencing electric blackouts. Pocta stated that these hub loans may have provided the gas necessary by the market to avoid more widespread electricity storages. Pocta stated SoCalGas' actions were rational given the demand and other factors such as gas price backwardation that existed in the gas market at the time.

4/29/02 A00-06-023 Southern California Gas Company, regarding Year Six (1999-2000) under its experimental Gas Cost Incentive Mechanism and related gas supply matters

Summary: On April 26, 2002, Mark Pocta, the Office of Ratepayer Advocates (ORA) Manager, attended an all-party meeting with Cmmr. Lynch in San Francisco. Also present were other attendees listed on the attachment to the notice. Pocta noted that the current Gas Cost Incentive Mechanism was intended to replace reasonableness review that gave the utilities an improper incentive to avoid disallowances as opposed to reducing gas costs. Pocta also explained how the Settlement results in ratepayers retaining a greater share of the savings. Pocta noted that the Settlement addresses market volatility by capping the shareholder reward at 1.5% of total gas costs. Pocta stated further that the settlement incorporates appropriate firm storage targets for Southern California Gas Company. Pocta explained that Southern California Edison Company's recommendation that the benchmark be limited to only gas costs would hinder the utility's ability to hedge gas costs and utilize all available gas methods to reduce core gas costs, and would result in a return to reasonableness reviews.

Summary: On April 24, 2001, Brian Cherry, Chief of Regulatory Relations of Pacific Gas and Electric Company (PG&E), met with Julie Fitch, advisor to Cmmr. Peevey, in San Francisco. WorldCom explained that this was caused by calculation errors. WorldCom indicated that the loop price reduction was reasonably cost-based, though the record supports a greater interim reduction. WorldCom stressed the need to apply any percentage loop reduction on a geographically deaveraged basis.

A01-02-035 AT&T Communications of California, Inc. and WorldCom, Inc., for the Commission to reexamine the recurring costs and prices of unbundled loops in its first annual review of unbundled network element costs pursuant to Ordering Paragraph 11 of D99-11-050

Summary: On April 26, 2002, Glenn Stover, attorney for TRI-M Communications, Inc. dba TMC Communications and Anew Telecommunications Corporation dba Call America met with Robert Wullenjohn, advisor to Cmmr. Brown, in San Francisco. Cmmr. Brown joined the discussion later. Written material (attached to the notice) was provided to Robert Wullenjohn after the meeting. Stover urged the Commission to clarify, in the final decision, that any reduction in the rate for switch ports and usage apply to Centrex and that the proposed decision's determination that the interim rate for switching features shall be zero apply equally to switching features used to provide Centrex services. Stover suggested that the Commission specify that the interim loop

and switching rates, including rates for switch features, apply to UNEs used to provide competing Centrex service. When Cmmr. Brown was present, Glover discussed the competitive effect of various rate levels that the Commission could adopt for loops and ports. Stover indicated that the unbundled network element (UNE) rates levels under discussion would create a price squeeze for any carrier that attempted to provide residential service through the exclusive use of UNEs.
