PROPOSED OUTCOME:

® Conditionally approves the proposed Tracy Transaction and the proposed Los Esteros Transaction. These two transactions would together procure 588 megawatts (MW) of fossil capacity, including 254 MW of new capacity. Pacific Gas and Electric Company (PG&E) is required to resubmit these transactions for Commission approval via a Tier 1 advice letter if future events create an unfilled need for new capacity authorized by the Commission.

® PG&E is directed to work with the California Department of Water Resources (DWR) to novate to PG&E, as soon as practical, DWR's existing power purchase agreements (PPAs) with the Tracy Facility and the Los Esteros Facility.

® Approves the proposed Peakers Transaction, which includes a long-term PPA to procure 502 MW of capacity, energy, and ancillary services from 10 existing facilities. PG&E is authorized to recover the costs of the Peakers Transaction via the Energy Resources Recovery Account. PG&E is also authorized to recover future stranded costs, if any. Qualifying Facilities Contracts

Res E-4242, Advice Letter (AL) PG&E AL 3197-E, SDG&E AL 1958-E and SCE AL 2200-E, filed on January 14, 2008, Supplemental AL PG&E AL 3197-E-A, SDG&E AL 1958-E-A and SCE AL 2200-E-A, filed on July 11, 2008, and Supplemental AL PG&E AL 3197-E-B, et al. - Related matters.

PROPOSED OUTCOME:

® Adopts, with modifications, the Qualifying Facility (QF) Standard Offer Contracts proposed by Pacific Gas and Electric Company (PG&E), Southern California Edison Company (SCE) and San Diego Gas & Electric Company (SDG&E). Upon adoption, there will be one QF Standard Offer Contract across all three electric Investor Owned Utilities (IOUs).

® The new contract may be signed by new and existing QFs with expired contracts in addition to QFs pursuing other contracting methods such as participating in an IOU's Request for Offer process or negotiating a bilateral contract.

ESTIMATED COST:

® Adoption of this resolution does not imply any specific cost. However, upon adoption, the utilities may enter into contracts with new or existing QFs.

® These contracts will form part of the utilities' procurement costs for electricity.

® It is impossible to know in advance the total cost of those contracts but, in the past, QF power has represented no more than 20% of the utilities' portfolio.

® Contracts executed with existing QFs should not result in any additional costs as the utilities were already purchasing power from these QFs in the past.

® Contracts signed with new QFs will represent new incremental expenditures, but this spending will be offset by the reduced need for new generation as a result of contracting with the new QF.
