Item Petition to Modify Decision 07-12-052

2

[8474]

R06-02-013

Order Instituting Rulemaking to integrate procurement policies and consider long-term procurement plans.

PROPOSED OUTCOME:

- ® Declines to modify D07-12-052 defining the inclusion of qualified facilities in the Long Term Procurement Planning process as only a “planning assumption.”
- ® The Commission believes planning is a preliminary step before actual procurement of energy.
- ® No one energy source is only included as a planning assumption.
- ® There is a presumption that including qualified facilities in the planning process will result in procuring energy and capacity from qualified facilities.
- ® Closes the proceeding.

ESTIMATED COST:

- ® None.

Item Southern California Edison Company's Petition to Modify 35 Decision 07-01-039

[9521]

R06-04-009

Order Instituting Rulemaking to Implement the Commission's Procurement Incentive Framework and to Examine the Integration of Greenhouse Gas Emissions Standards into Procurement Policies.

PROPOSED OUTCOME:

® Grants, in part, the petition to modify Decision 07-01-039 and authorizes, subject to reasonableness review, a partial exemption from the Adopted Interim Emissions Performance Standard Rules for Four Corners Units 4 and 5 (Four Corners), limited to costs authorized under the co-tenancy agreements prior to January 1, 2012.

® Reasonableness review will occur in Southern California Edison Company's (SCE) test year 2012 general rate case, to be filed in 2010.

® For capital projects of \$5 million or more, SCE's reasonableness showing must identify whether, based on industry standards, the project likely will extend the life of Four Corners beyond five years or some additional five-year increment and if so, why the project cost is warranted nonetheless.

® Capital costs planned for Four Corners in 2012 and beyond that will increase the life of the powerplant by five years or more are not exempt.

® SCE must conduct a study on the feasibility of continuing to maintain its interest in Four Corners after the end of 2011 and, in the test year 2012 general rate case, report on its study and propose a course of action.

® SCE may not extend any of its existing co-tenancy agreements or enter into any new agreements concerning its ownership in Four Corners without first obtaining Commission approval.

® SCE must report its test year 2012 general rate case on its remedial activities to ensure that its pleadings are complete, accurate, and fully explain the bases for its positions.

® Closes the proceeding.

ESTIMATED COST:

® Subject to a finding of reasonableness in SCE's test year 2012 general rate case, some or all of capital projects estimated at \$178,593,000 will be recoverable in rates.

® Other costs associated with SCE's continued ownership of Four Corners may be determined in SCE's test year 2012 general rate case.

Qualifying Facilities Contracts

Res E-4242, Advice Letter (AL) PG&E AL 3197-E, SDG&E AL 1958-E and SCE AL 2200-E, filed on January 14, 2008, Supplemental AL PG&E AL 3197-E-A, SDG&E AL 1958-E-A and SCE AL 2200-E-A, filed on July 11, 2008, and Supplemental AL PG&E AL 3197-E-B, et al. - Related matters.

PROPOSED OUTCOME:

® Adopts, with modifications, the Qualifying Facility (QF) Standard Offer Contracts proposed by Pacific Gas and Electric Company (PG&E), Southern California Edison Company (SCE) and San Diego Gas & Electric Company (SDG&E). Upon adoption, there will be one QF Standard Offer Contract across all three electric Investor Owned Utilities (IOUs).

® The new contract may be signed by new and existing QFs with expired contracts in addition to QFs pursuing other contracting methods such as participating in an IOU's Request for Offer process or negotiating a bilateral contract.

ESTIMATED COST:

® Adoption of this resolution does not imply any specific cost. However, upon adoption, the utilities may enter into contracts with new or existing QFs.

® These contracts will form part of the utilities' procurement costs for electricity.

® It is impossible to know in advance the total cost of those contracts but, in the past, QF power has represented no more than 20% of the utilities' portfolio.

® Contracts executed with existing QFs should not result in any additional costs as the utilities were already purchasing power from these QFs in the past.

® Contracts signed with new QFs will represent new incremental expenditures, but this spending will be offset by the reduced need for new generation as a result of contracting with the new QF.

FERC Docket No. RM 10-23

On June 17, 2010 the Federal Energy Regulatory Commission (FERC) issued a Notice of Proposed Rulemaking proposing to amend the transmission planning and cost allocation requirements established in Order No. 890 to ensure that FERC-jurisdictional services are provided on a basis that is just, reasonable and not unduly discriminatory or preferential. With respect to transmission planning, the proposed rule would (1) provide that local and regional transmission planning processes account for transmission needs driven by state or federal public policy requirements; (2) improve coordination between neighboring transmission planning regions with respect to interregional facilities; and (3) remove from Commission-approved tariffs or agreements a right of first refusal created by those documents that provides an incumbent transmission provider with an undue advantage over a nonincumbent developer. Staff seeks authorization to file comments in response to the proposed rulemaking.
