WORKSHOP INFORMATION:

The CPUC is required to submit a cost-benefit evaluation of the NEM program to the Legislature by January 1, 2010. In addition, the CPUC has established a methodology for assessing the costs and benefits of distributed generation programs like the CSI. Since the two evaluations are closely related, the CPUC has selected a single contractor, E3 Inc., to carry out both studies and they will be describing their approach and analysis. The main focus will be on the NEM analysis, as that is due to be complete first, but will also provide stakeholders a preview of the analysis planned for CSI cost-effectiveness. This workshop will give stakeholders the opportunity to examine the details of our evaluation approach before the reports are finalized.

Agenda and presentations will be announced.

The Communications Division has prepared **Resolution T-17235** for the October 29, 2009, Commission Agenda. This Resolution denies the request of TracFone Wireless, Inc. (U-4231-C) (TracFone) to be designated as an Eligible Telecommunication Carrier (ETC) for the purpose of receiving federal Lifeline support. The Commission finds that it is not in the public interest to designate as an ETC a telephone carrier that: (a) has failed to pay - and refuses to pay - public purpose program surcharges and user fees on its non-subsidized California intrastate revenue; and (b) argues that it does not have to pay such fees because it is not a public utility. The Commission also directs Communications Division (CD) to prepare an Order Instituting Investigation and Order to Show Cause why TracFone should not be ordered to pay all outstanding user fees and surcharges, and penalized for its violation of the statutes, rules, and orders requiring such payment.
