WORKSHOP INFORMATION:

The CPUC is required to submit a cost-benefit evaluation of the NEM program to the Legislature by January 1, 2010. In addition, the CPUC has established a methodology for assessing the costs and benefits of distributed generation programs like the CSI. Since the two evaluations are closely related, the CPUC has selected a single contractor, E3 Inc., to carry out both studies and they will be describing their approach and analysis. The main focus will be on the NEM analysis, as that is due to be complete first, but will also provide stakeholders a preview of the analysis planned for CSI cost-effectiveness. This workshop will give stakeholders the opportunity to examine the details of our evaluation approach before the reports are finalized.

Agenda and presentations will be announced.
