The California Air Resources Board, California Energy Commission, and the California Public Utilities Commission formed this panel to develop carbon capture and storage/sequestration (CCS) policy and recommendations to help guide potential legislation and regulations regarding CCS in California. This third CCS Review Panel meeting will focus on beginning the formulation of legislative, regulatory, and policy recommendations. The panel will consider the presentations and comments given in the first two panel meetings on the technical, regulatory, statutory, and policy issues confronting CCS in California from the perspectives of experts, stakeholders, and members of the general public. The panel may discuss additional presentations on the federal perspective, impacts on electric utility rates, and impact on other resources (e.g. water). The panel will also review and discuss staff white papers that have been prepared upon the panel's request. The information gathered and the panel's deliberations from this series of public meetings will be the basis for a final report to identify the regulatory and legal barriers to CCS, give recommendations on methods to address them, and provide policy rationales for

the recommendations.

This public meeting will be conducted in person and via WebEx. For additional information, please contact Rebecca Tsai-Wei Lee at (415) 703-2140 or email: WTR@cpuc.ca.gov.
