California Public Utilities Commission
 505 Van Ness Avenue, Hearing Room A
 (Corner of Van Ness Avenue and McAllister Street)
 San Francisco

The Telecommunications Division is hosting a workshop to discuss the Proposed Rules for Carriers' Short Term Inventory Levels addressed in the "Assigned Commissioner's Ruling Implementing Carrier Inventory Rules and Workshop" dated September 24, 2004.

Carriers' and other parties' technical experts should come prepared to discuss such issues as: how inventory rules based on historical use will affect carrier supply needs; whether another basis should be used for setting inventory rules; which numbering categories should be used to define historical use; how many NRUF periods should be considered in defining rules, and whether - and, if so, how - growth rate should be incorporated into inventory rules. Parties should also discuss the role marketing strategy should play in projecting six-month inventory rules. Carriers should be prepared to factually support their positions on historical use as well as future projections, especially as to marketing projections. Parties should provide any additional information they deem to be relevant in the shaping of any future inventory rules. In general, parties should provide supporting data to demonstrate their positions and arguments concerning need for numbers. Parties who wish to present alternate proposals for inventory rules should submit them in advance via email to Cherrie Conner (chr@cpuc.ca.gov) no later than Wednesday, September 29, 2004 at 5pm. Parties making presentations should plan to take no more than ten minutes to present their proposal, and they should come prepared to substantively support their proposal.

WORKSHOP AGENDA:

10:00 - 11:00 am: Presentation of CPUC proposal on carrier 6-month inventory rules
 11:00 am: Presentation of alternate proposal #1 and discussion

Summary: On September 22, 2004, Brian Cherry, Director, Regulatory Relations, Pacific Gas & Electric Company (PG&E), met with Cmmr. Wood in San Francisco. Also present were Manuel Ramirez, advisor to Cmmr. Wood, Natalie Walsh and Steve Ross on behalf of the Office of Ratepayer Advocates, Erik Jacobson, Chief, Regulatory Relations, PG&E, and Bruce Foster, Vice President, Michael Hoover, Director, and Colin Cushnie, Director, for Southern California Edison Company (SCE). Written materials (copy attached to the notice) were used. Cherry and Jacobson stated that the Settlement between PG&E, SCE and The Utility Reform Network results in a fair allocation of the above market costs of Department of Water Resources' contracts to San Diego Gas & Electric Company (SDG&E). Cherry and Jacobson described the inequity of the interim allocation method under which SDG&E pays none on these above-market costs and explained that the 'costs-follow-contracts' framework adopted in Cmmr. Brown's alternate decision would result in significant contract administration benefits.

Order Instituting Rulemaking to promote policy and program coordination and integration in electric utility resource planning.

Summary: On September 24, 2004, Erik Jacobson, Chief, Regulatory Relations, Pacific Gas and Electric Company (PG&E), met with Trina Horner, advisor to Cmmr. Lynch, in San Francisco. Also present were Julie Fitch, advisor to Cmmr. Peevey, and Antonio Alvarez, Manager, Gas and Electric Supply, and Joe Lawlor, Energy Trading Consultant, Gas and Electric Supply Strategic Consulting, PG&E. Jacobson stated that the proposed decision should be modified to provide the utilities with authority to procure resources for terms up to five years. Alvarez explained PG&E’s recommendation that minimum monthly energy requirements should be satisfied on a portfolio basis rather than an individual unit basis. Alvarez noted that the draft decision’s 0.89 percent cap on demand response limited PG&E to about 150 MW of demand response and contradicted previous demand response targets provided by the Commission. Lawlor stated that system contracts with liquidated damage provisions should be eligible to count as qualified capacity, as long as they are limited to no more than 25 percent of a LSE’s total MW need. Lawlor also said that the Department of Water Resources contracts that are not unit specific should not be subject to a deliverability test.
