

Decision 03-05-007 May 8, 2003

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

Application of United States Telesis, Inc. d/b/a
US Telesis for a Certificate of Public Convenience
and Necessity to Provide Resold Local Exchange
Telecommunications Service within the State of
California.

Application 02-10-016
(Filed October 16, 2002)

O P I N I O N

I. Summary

United States Telesis, Inc. (Applicant) seeks a certificate of public convenience and necessity (CPCN) under Pub. Util. Code § 1001 for authority to provide resold local exchange telecommunications services. By this decision, we grant the requested authority subject to the terms and conditions set forth below.

II. Background

In prior decisions, we authorized the provision of competitive local exchange service, by carriers meeting specified criteria, within the service territories of SBC Telephone Company, formerly Pacific Bell Telephone Company, (SBC), Verizon California Inc. (Verizon), Roseville Telephone Company (RTC), and Citizens Telecommunications Company of California, Inc. (CTC).

Applicant, a California corporation, seeks authority to provide resold local exchange services as a competitive local carrier (CLC) throughout the SBC and Verizon service territories.

Applicant's principal place of business is located at 200 N. Westlake Boulevard, Suite 104, Westlake Village, CA 91362.

III. Financial Qualifications

To be granted a CPCN, an applicant for authority to provide non-facilities-based and resold local exchange services must demonstrate that it has a minimum of \$25,000 of cash or cash equivalent to meet the firm's start-up expenses.¹ An applicant must also demonstrate that it has sufficient additional resources to cover all deposits required by local exchange carriers (LECs) and/or interexchange carriers (IECs) in order to provide the proposed service.²

Applicant represented that it may be required to provide \$10,000 in deposits to other telecommunications carriers in order to provide the proposed service.

Applicant provided bank statements that demonstrate that it has sufficient cash to satisfy the financial requirement, including any required deposits.

IV. Technical Qualifications

Applicants for CLC authority are required to make a reasonable showing of technical expertise in telecommunications or a related business. Applicant submitted biographical information on its officers that demonstrates that it possesses sufficient experience and knowledge to operate as a telecommunications provider.

¹ The financial requirement for CLCs is contained in Decision (D.) 95-12-056, Appendix C.

² The requirement for CLC applicants to demonstrate that they have additional financial resources to meet any deposits required by underlying LECs and/or IECs is set forth in D.95-12-056, Appendix C.

Applicant represents that no one associated with or employed by Applicant as an affiliate, officer, director, partner, or owner of more than 10% of Applicant was previously associated with any telecommunications carrier that filed for bankruptcy or went out of business, or was sanctioned by the Federal Communications Commission or any state regulatory agency for failure to comply with any regulatory statute, rule, or order.

V. Tariffs

Commission staff reviewed Applicant's draft tariffs for compliance with Commission rules and regulations. The deficiencies are noted in Attachment A to this decision. Applicant shall correct these deficiencies in its tariff compliance filing as a condition of our approval of its tariffs.

VI. California Environmental Quality Act (CEQA)

CEQA requires the Commission as the designated lead agency to assess the potential environmental impact of a project in order that adverse effects are avoided, alternatives are investigated, and environmental quality is restored or enhanced to the fullest extent possible. Applicant represents that it will not be constructing any facilities other than equipment to be installed in existing buildings or structures, for the purpose of providing interexchange or local exchange services. Therefore, it can be seen with certainty that there is no possibility that granting this application will have an adverse effect upon the environment. Applicant must file for additional authority, and submit to any required CEQA review, before it can construct facilities other than equipment to be installed in existing buildings or structures.

VII. Categorization and Need for Hearings

In Resolution ALJ 176-3098 dated October 24, 2002, the Commission preliminarily categorized this application as ratesetting, and preliminarily

determined that hearings were not necessary. No protests have been received. There is no apparent reason why the application should not be granted. Given these developments, a public hearing is not necessary, and it is not necessary to disturb the preliminary determinations.

VIII. Comments on Draft Decision

This is an uncontested matter in which the decision grants the relief requested. Accordingly, pursuant to Pub. Util. Code § 311(g)(2) the otherwise applicable 30-day period for public review and comment is being waived.

IX. Conclusion

We conclude that the application conforms to our rules for authority to provide competitive local exchange telecommunications services. Accordingly, we shall approve the application subject to the terms and conditions set forth herein.
