Jun 30, 2005	The Commission adopted D.05-06-060	This decision grants, in part, a petition to modify D.04-12-014, the Commission's previous order adopting a "permanent" methodology for the allocation of DWR's contract costs, replacing it with the methodology in the instant order. The adopted methodology is considered effective as of Jan 1, 2004. Under the adopted method, the "variable" costs of each DWR contract will be directly assigned to the IOU that physically manages that contract. The "fixed" costs of the DWR revenue requirement are allocated to each IOU as follows: PG&E (42.2%), SCE (47.5%) and SDG&E (10.3%).

Energy Roadmap: February 2007 Update

Apr 7, 2005	The Commission adopted D.05-04-025.	Adopts DWR's revised revenue requirement, a \$166 million reduction. IOUs filed implementing advice letters by April 21 st , with rate changes effective no later than June 1, 2005.

C. SoCalGas Native Gas Access

Proceeding No.	Commissioner	Admin. Law Judge (ALJ)	Counsel	Energy Division Staff
A.04-08-018	Peevey	Wong	None	Effross

What it Does

- In A.04-08-018 SoCalGas requests that the Commission establish and approve standardized terms and conditions under which gas produced by California gas producers will be granted access to SoCalGas' natural gas operating system. To that end, SoCalGas wants CPUC to approve a standard access Interconnect and Operational Balancing Agreement (IOBA) tariff.
- SoCalGas filed this application in order to comply with a Joint Stipulation in its A.04-01-034 native gas proceeding. The Joint Stipulation was entered into on July 13, 2004 among SoCalGas and the Joint Parties. (The Joint Parties are comprised of the Indicated Producers, California Independent Petroleum Association and the Western States Petroleum Association.) In the Joint Stipulation, SoCalGas agreed that it would file an application "to address gas quality monitoring protocols and off-shore and on-shore California producer access terms and conditions."
- The other parties are concerned about ensuring nondiscriminatory access to SoCalGas's system.

Next Steps

- Potential settlement agreement forthcoming.

E. SoCalGas Long-Term Gas Transportation Agreement Application

Proceeding No.	Commissioner	Admin. Law Judge (ALJ)	Counsel	Energy Division Staff
A.05-10-010	Peevey	Barnett		Effross

What it Does

SoCalGas applies for approval of a long-term gas transportation agreement entered into by Guardian Industries Corp, and SoCalGas on 8/12/05. Guardian produces glass in Kingsburg, CA. It has historically used oil as fuel, and is considering switching to gas. Guardian has also stated that it will relocate its facility, and the attendant jobs, out of state, unless it receives favorable rate treatment to lower its costs of operation. SoCalGas and Guardian propose an agreement whereby SoCalGas will deliver gas on a firm basis, subject to an escalating ceiling and floor rate, and offer a five year discount to the Public Purpose Program Surcharge. This would effectively provide a discount to Guardian.

Next Steps

- Hearings.

Bohn, in San Francisco, outside the Commission offices. Zafar urged the Commission to adopt SoCalGas' proposal to create a separate customer class which would consist of a lower public purpose program surcharge. Zafar explained that creating a separate customer class does not run afoul of Section 890, but rather is clearly within the Commission's discretion under that statutory provision.
Oct 19, 2006	Ex parte filed by DRA/RASHID/PUC	Dana Appling, Director of the Division of Ratepayer Advocates (DRA), met with Cmmr. Peevey in San Francisco. Written materials (attached to the notice) were used. The parties expressed their concern over discounting the PPP surcharge and stated that the Commission does not have legal authority to discount the Public Purpose Program (PPP) Surcharge. The parties warned that if the Commission discounts or creates a separate discounted class for companies that threaten to leave the state, it would set precedent to provide discounts to other consumers that threaten to leave the state, which would lead to substantial decreases in PPP funding.
Oct 18, 2006	Ex parte filed by DRA/RASHID/PUC	LATE FILED. On October 12, 2006, Dana Appling, Director of the Division of Ratepayer Advocates (DRA), met with Belinda Gatti, advisor to Cmmr. Rashid, attorneys for DRA, and Nina Suetake, attorney for The Utility Reform Network (TURN). Copies of TURN and DRA's comments were used. DRA and TURN explained that the Commission does not have legal authority to discount the Public Purpose Program (PPP) Surcharge. DRA and TURN warned that if the Commission discounts Guardian's PPP surcharge based on its threat to leave the state, it would set precedent for the Commission to provide discounts to other industrial gas consumers that threaten to leave the state, which would lead to substantial decreases in PPP funding.

Brown, Robert Lane, advisor to Cmmr. Bohn, and Richard Myers of the Energy Division. During her conversation with Belinda Gatti, Zafar stated that the Division of Ratepayer Advocates' assertion that the Commission has never discounted the Public Purpose Program surcharge is incorrect. Zafar urged the Commission to adopt ALJ Barnett's proposed decision as drafted.
Mar. 30, 2006	Ex parte filed by DRA/RASHID/PUC	On March 27, 2006, Dana Appling, Director of the Division of Ratepayer Advocates (DRA), met with Theresa Cho, advisor to Cmmr. Parties urged the Commission to expedite this proceeding in order for Guardian Glass to make its decision whether to stay in California or to relocate to another state. Guardian Glass representatives explained that although the SoCalGas transportation rate is competitive with other States, the surcharge levied on that rate is not competitive. Zafar explained that the legislature enacted the Public Purpose Program surcharge and left the allocation of it to the Commission, and that a discount is appropriate in order to keep this customer and its three hundred jobs in California.

PG&E seeks approval of seven long-term agreements from last year's March 18, 2005 long-term RFO for the construction of 2250 MW of new generation facilities in northern California: 5 Power Purchase Agreements (PPAs) for 1430 MW, 1 Purchase Sale Agreement (PSA) (turn-key project) for 657 MW, and 1 Engineering Procurement and Construction (EPC) contract for repairs and upgrades to the Humboldt plant) for 163 MW. PG&E also requests Commission approval of ratemaking mechanisms to recover the costs of these generation resources from all of those customers who benefit from these resource commitments. PG&E requests approval via Commission decision by November 9, 2006. However, if a decision is not issued by 11/9, the contracts will remain intact, but the contract start dates can be extended on a day-for-day basis until Commission approval is granted. The 'drop-dead date' for approval (when bids can be re-priced or terminated) is April 11, 2007, one year from the date the application was filed with the Commission.

Aug 30, 2006	Scoping memo issued.	Issues to be considered in the proceeding are: 1) ratepayer benefits of hedging; 2) appropriate proportion of core gas demand to hedge; 3) should hedging be done within PG&E's incentive mechanism; 4) types of suitable financial hedging instruments.
Aug 15 2006	PHC held.	
June 5-9, 2006	Protests filed.	DRA requests that the Commission delay processing the application until the Commission addresses PG&E's pending hedging request for the 2006-07 winter. Coral recommends that the Commission open an OIR to investigate the use of fixed price contracts and other physical products for hedging.
May 5, 2006	PG&E files application.	PG&E seeks approval to hedge winter core gas demand outside of its core procurement incentive mechanism (CPIM). The utility argues that its CPIM is not appropriate for a large scale hedging program because of its short term focus. Hedging would be done on a multi-year basis. DRA and TURN would consult with PG&E annually on the specifics of the hedging plan which would be submitted via an advice letter. The hedging program would begin with the 2007-08 winter.

III. MAJOR RULEMAKING PROCEEDINGS

A. Long-Term Procurement Plan (LTPP) Rulemaking

Proceeding No.	Commissioner	Admin. Law Judges (ALJ)	Counsel	Energy Division Staff
R.06-02-013	Peevey	Brown	Stoddard/Levine	Sterkel, Deal

What it Does

1. Reviews the need for additional policies to support new generation and long-term contracts in California, including consideration of transitional and/or permanent mechanisms (e.g., cost allocation and benefit sharing, or some other alternative) which can ensure construction of and investment in new generation in a timely fashion.
2. Serves as the forum for the Commission's biennial procurement review process, established pursuant to AB57, D.04-01-050 and D.04-12-048, which requires that IOUs submit long-term procurement plans that serve as the basis for utility procurement and comprehensively integrate all Commission decisions from all procurement related proceedings.
3. Functions as the umbrella rulemaking to all other procurement related proceedings.
4. Scoping Memo identified 2 Tracks for the LTPP proceeding, Phase 2
 - o Track 1: Energy Auction and Other Implementation Issues Related to the Cost Allocation Mechanism Adopted in D.06-07-029, which directed the IOUs to conduct periodic auctions for the energy rights to all resources acquired pursuant to the new mechanism, and to file with the Commission the details of this auction process.
 - o Track 2: The IOUs are directed to file their 2006 Long-Term Procurement Plans (LTPPs), covering 2007 through 2016, for Commission review and approval, in accordance with the requirements of Pub. Util. Code § 454.5. ESPs are not required to file LTPPs at this time, but ESPs should continue to provide their procurement data to the CEC on a forecast basis as part of the CEC's IEPR proceeding.
 - LTPP filings should consist of two volumes: (1) a stand-alone 2006 long-term procurement plan covering procurement practices and the resource plan for the next 10 years based on existing Commission policies; and (2) a discussion of the IOU's comments on selected policies and procedures for implementing procurement plans that the Commission has identified are going to be reviewed during the 2006 proceeding cycle. The IOUs were directed to prepare and file their 2006 LTPPs in accordance with the Outline and Guidelines detailed in Attachment A, provided with the Scoping Memo.
5. Other Issues in Scope (50/50 Cost-Sharing Allocation) - The Commission will revisit in this proceeding an issue remaining from the R.04-04-003: the issue of allocation of cost savings, between the projected costs and the actual costs, from the construction of new power plants. In D.04-12-048 the Commission found that a 50/50 cost sharing provision between ratepayers and shareholders was reasonable. However in response to an application for rehearing filed by SCE, in D.05-12-022, the Commission granted limited rehearing on this cost sharing issue only.

Next Steps

- Upcoming Schedule for Phase 2 identified below.
- Track 1: Ongoing review and consideration of Track 1 Energy Auction Proposals.
- Track 2: Filing and review of 2006 LTPPs, including IOU-hosted workshops to review LTPP plans.
- SCE 50/50 Issue: SCE is working on report due in January on 50/50 issue.

E. Direct Access (DA) and Departing Load (DL) Cost Responsibility Surcharge (CRS)

Proceeding No.	Commissioner	Admin. Law Judge (ALJ)	Counsel	Energy Division Staff
R.02-01-011	Peevey	Pulsifer		Roscow

What it Does

1. This proceeding sets and implements a Cost Responsibility Surcharge (CRS) that is the obligation of applicable Direct Access (DA) and Departing Load (DL) customers. The CRS is necessary in order to make the utilities' bundled customers financially indifferent to load migration from bundled to DA and municipal DL service (including customer self-generation) that occurred after DWR long term contracts were signed.
2. A capped 2.7 cent/KWh CRS needs to be paid by applicable DA and DL customers. The CGDL CRS is capped at 2.7 cents/kWh. The CRS includes the DWR bond charge, the utilities' tail CTC, Edison's Historical Procurement Charge (HPC) and PG&E's Regulatory Asset Charge (RAC) applicable only in Edison's and PG&E's respective service territories, and the DWR power charge. The accrued undercollection associated with the capped CRS is to be tracked in balancing accounts and paid off by DA and DL customers, with interest, over time.
3. This proceeding also sets policy governing the suspension of DA service, DA load growth under existing contracts, and rules for customer movement to and from bundled and DA service. Additionally, this proceeding addresses the Municipal customers' DL CRS exemption applicability.
4. The Energy Division, along with DWR, the IOUs, and interested DA/DL parties, are calculating the CRS paydown estimates as part of a cooperative Working Group.

Energy Roadmap: February 2007 Update

Next Steps

- **D.06-07-030 closes this Rulemaking.** Calculations for 2007 and onward will be prepared in the DWR Revenue Requirement Rulemaking and the IOU ERRA proceedings.

Jan 25, 2007	Commissioner initiates a new OIR to develop a cost-effectiveness methodology for demand response programs.	The OIR will address four issues: develop a DR load impact protocol, develop a cost-effectiveness DR methodology, determine new DR goals, and consider modifications to DR programs in coordination with the CAISO's wholesale market structure.
Nov 30, 2006	Commission approves augmentation of DR programs in preparation for Summer '07.	New programs and changes to existing programs were approved for the purpose of increasing DR resources by summer '07. The IOUs anticipate an increase of 270 MWs.
Oct 19, 2006	Commission approves \$18 m. for expansion of SCE's AC cycling program as well as new Capacity Bidding Program for all three IOUs	SCE's AC Cycling program is anticipated to expand to 600 MWs by summer '07 with the additional funding. The Capacity Bidding Program replaces the Demand Reserves Partnership which will expire in May '07.
Aug 14, 2006	ACR issued in the Procurement/RAR proceeding directs SCE to target 300 MWs of AC Cycling by Summer '07 and for PG&E and SDG&E to submit reports regarding the need to take similar action	SCE will provide funding details for its AC cycling plans in the process outlined in the August 9 ACR.
Aug 9, 2006	ACR directs IOUs to submit proposals to expand DR by summer '07	ACR cites the July heat wave and unprecedented demand as reasons for the need to start expansion of DR in advance of summer '07. Proposals due by August 30, and a workshop is scheduled for September 6.
May 25, 2006	Commission directs IOUs to incorporate default CPP tariffs for all large customers in their next GRC	The Commission rejected a settlement that would have kept default CPP as a voluntary tariff.
April 3, 2006	Energy Division distributes a proposed DR load impact protocol for comment.	Comments were provided by several parties; ED believes the completion of the protocol requires a formal Commission proceeding
Mar 21, 2006	Energy Division conducts a scoping workshop on DR cost-effectiveness	Comments from the workshop indicate highly technical issues, and a complex undertaking.
Mar 15, 2006	Commission approves IOUs' 3-year ('06-'08) Budgets for DR Programs	\$225 m. in funding for DR programs for next three years.
Jan 30, 2006	Multi-party settlement is filed with the Commission regarding the IOUs' 3-year demand response program budgets ('06-'08)	Parties defer issues of cost-effectiveness and DR programs goals. Seek approval of \$225 m. in funding for DR programs for next three years.
Nov. 21, 2005	Decision closes the original OIR (R.02-06-001)	The decision directs agency staff to complete several remaining tasks which could lead to new OIRs: develop a measurement protocol for DR programs, develop a cost-

		effectiveness evaluation protocol for DR, explore possible improvements to customer billing formats to better convey their energy usage.
Nov. 14, 2005	Two settlements (one for PG&E/SCE, the other for SDG&E) were proposed in the default CPP proceeding.	The PG&E/SCE settlement proposes a CPP tariff that is voluntary (both IOUs argue that a default tariff is counterproductive.) The SDG&E settlement proposes a default CPP tariff on the condition that SDG&E conduct intensive customer outreach and education about the new rates.
Oct. 19, 2005	Draft decision issued for public comment. Closes the original OIR (R.02-06-001)	The decision directs agency staff to complete several remaining tasks which could lead to new OIRs: develop a measurement protocol for DR programs, develop a cost-effectiveness evaluation protocol for DR, explore possible improvements to customer billing formats to better convey their energy usage.

K. Reliable Long-Term Natural Gas Supplies (Gas Market OIR)

Proceeding No.	Commissioners	Admin. Law Judges (ALJ)	Counsel	Energy Division Staff
R.04-01-025	Peevey	Weissman, Malcom	Morris	Loewen, Effross, Cadenasso, Alfton

What it Does

Rulemaking to establish policies to ensure reliable, low cost supplies of natural gas for California.

Next Steps

- Ruling on requests for rehearing of D.06-09-039.

Proceeding Overview

Date	Actions Taken	Comments
Jan 24, 2007	SCAQMD sues CPUC over Decision.	In itsiling, the South Coast Air Quality Management District said that the CPUC “acted arbitrarily and capriciously and abused its discretion” in setting new guidelines for natural gas quality, “bypassing the California Environmental Quality Act.”
January 22, 2007	SCAQMD files petition for writ of review with both CA Supreme Court and Court of Appeal 2 nd District.	It is undecided as yet which will ultimately win jurisdiction. RACE and the City of San Diego have until March 22 to join the suit, and probably will. The same issue is at stake: CEQA review.
Nov 13, 2006	Responses to requests for rehearing by PG&E, SDG&E, SoCalGas, and Sempra LNG	Parties argue that the Commission was correct in determining that no project was authorized and that CEQA is not triggered.
Oct 27, 2006	Request for rehearing by SCAQMD, City of San Diego, Affordable Clean Energy, California Attorney General	Parties argue that the decision erred in determining that CEQA does not apply here. D.06-09-039 determined that no project was being authorized and hence CEQA review was not triggered.
Sept 21, 2006	Commission adopts Peevey Phase II Alternate Decision by 5-0 vote. D.06-09-039.	Adopts natural gas quality standards for all three gas IOUs, finds backbone and storage systems adequate, establishes policy for local transmission expansion, and approves Interconnection Agreements and Operational Balancing Agreements for LNG other new sources, and approves a settlement agreement between PG&E and independent storage providers. Closes Phase 2 of the proceeding.
Sept 19, 2006	Oral argument on gas quality issues.	Parties reprised their positions.
Aug 24, 2006	Commission adopts Peevey Alternate Decision (D.06-08-027) on gas hedging plans.	
Aug 8, 2006	Alternate of Commissioner Peevey	Modifies proposed adequacy standards. Rejects utility proposals for long term contracts for local transmission expansions. Adopts certain gas quality standards.

Energy Roadmap: February 2007 Update

Aug 8, 2006	Proposed decision of ALJ Weissman	Rejects utility-proposed adequacy standards and calls for new proceeding. Rejects utility proposals for long term contracts for local transmission expansions. Rejects proposed gas quality standards and calls for new proceeding.
July 18, 2006	Alternate of Commissioner Peevey, approving confidential hedging plans proposed by PG&E, SoCalGas, and SDG&E.	Comments are due no later than 08/07/06; Reply Comments are due 5 days thereafter.
July 18, 2006	Proposed decision of ALJ Malcolm, declining to approve confidential hedging plans proposed by PG&E, SoCalGas, and SDG&E.	Comments are due no later than 08/07/06; Reply Comments are due 5 days thereafter.
May 17 and 18, 2006	SDG&E and SoCal file petitions for modification of D.02-06-023, D.03-07-037, and D.05-10-043.	SDG&E seeks expedited consideration of request for greater latitude to enter into long-term gas hedging.
May 11, 2006	D.06-05-017 denies RACE motion of April 1, 2005.	Determines that CEQA does not apply to the Phase 1 issues.
May 5, 2006	PG&E files petition for modification of D.04-01-047 and D.05-10-015.	PG&E seeks greater latitude to enter into long-term hedging arrangements for its gas portfolio, and expedited treatment.
March 13, 2006	ALJ rejects motion for expedited decision on transmission.	ALJ cites lack of factual basis for request.
March 8, 2006	SoCal and SDG&E file motion for expedited decision on local transmission expansion policy.	They cite need to relieve congestion on "Rainbow Corridor" via open season, and need guidance on how to do this.
Dec 12-18, 2005	Hearings held on gas quality issues.	The most contentious issue is what range to allow for "Wobbe Index (WI)", which indicates how much fuel energy can be delivered to an appliance or motor. SoCalGas and LNG argue for allowing high WI gas, while environmental advocates argue for lower WI.
Nov 22, 2005	SoCal revises its OBA proposal to reflect new engineering findings calling for less flexible delivery requirements at Otay Mesa.	Parties will file responses to SoCal's new OBA on December 2. It is possible that some parties may ask for evidentiary hearings related to the new tighter proposed requirements at Otay Mesa.
Nov 4, 2005	Parties files responses to the ED report on EG gas supplies.	Parties generally support ED recommendation for long-term firm capacity contracts for based-loaded generating plants.
Oct 6, 2005	Energy Division files report on gas supply arrangements made by electric utilities for generating plants.	ED report recommends that utilities consider entering into long-term capacity contracts for gas supplies for base-loaded generating plants.
Sept and Oct, 2005	Opening and reply briefs filed.	General consensus on current adequacy of in-state infrastructure. Divergence of opinions on generic tests for resource adequacy; on methodology for determining when receipt point-related upgrades are necessary and how to pay for them; on the terms of capacity contracts related to local transmission upgrades.
Aug 2005	Hearings on infrastructure adequacy	
Aug 16, 2005	SoCal files proposed OBA (Operational Balancing Agreement) and IA (Interconnection Agreement) standardized contracts, based on negotiations. Comments by other parties.	Issues are substantially narrowed.
Aug 12, 2005	PG&E, SDG&E, and SoCalGas file testimony.	The three utilities declare that they have worked collaboratively towards the adoption of more unified tariff specifications, although several key differences remain. These are said to be due to the historic differences in natural gas supply quality between northern and southern California.

Energy Roadmap: February 2007 Update

June 8, 2005	Energy Division issues IOBA workshop report.	Energy Division makes some recommendations to the Commission for disposition of IOBA-related issues, and recommends further negotiations.
May 11, 2005	Workshop held on Interconnection and Operational Balancing Account (IOBA) issues.	Discussed a variety of “threshold” issues as well as contract specifics. Consensus reached on some issues.
May 2, 2005	Pre-workshop comments filed.	
April 25, 2005	Comments on Gas Quality Workshop Report.	
April 21, 2005	Assigned Commissioners and ALJ issue Revised Schedule for Phase 2	Emergency reserves and backstop are shelved for the moment. Evidentiary hearings will be held on guidelines for slack capacity. The existing State-agency Natural Gas Working Group will make a recommendation re its expansion/modifications. Parties encouraged to negotiate on PG&E’s competitive storage issue. At-risk ratemaking will be addressed in other proceedings.
April 5, 2005	SoCal hosted gas quality stakeholders’ meeting.	Decided that the Air Emissions Advisory Committee should be expanded to include technical representatives from all groups.
April 4, 2005	Energy Division issued Gas Quality Workshop Report.	Comprehensive overview of issues. Tentative recommendation to incorporate Wobbe number in specifications. Calls for further negotiations.
Mar 23, 2005	Prehearing Conference for Phase 2 was held.	
Mar 14, 2005	Parties filed pre-PHC comments	Near-unanimous call to reject emergency reserve and backstop, while general acceptance of infrastructure review working group. Mixed views on throughput risk.
Feb 17 - 18, 2005	Joint CPUC/CEC workshop was held, on issues related to natural gas quality.	Many participants over two day forum.
Sep 2, 2004	The Commission issued D.04-09-022 on Phase I issues.	D.04-02-025 authorizes utilities to give notice to El Paso and TransWestern to relinquish interstate capacity, establishes procedures for obtaining new interstate capacity contracts, allows for designation of receipt points, rejects blanket rolled-in ratemaking treatment for LNG-associated system upgrades, and orders new applications to be filed for SoCal’s firm transportation rights proposal, for proposed SoCal-SDG&E system integration, and for review of PG&E’s storage operations and interstate firm capacity levels. Establishes Otay Mesa as a “dual receipt point” for SoCalGas and SDG&E.
Jan 22, 2004	The Commission opened this OIR to consider and rule upon proposals the Commission is requiring California natural gas utilities to submit, which must be aimed at ensuring reliable, long-term supplies of natural gas to California.	The Commission orders PG&E, SDG&E, SoCalGas and Southwest Gas to submit proposals addressing how California’s long-term natural gas needs should be met through contracts with interstate pipelines, new Liquefied Natural Gas (LNG) Facilities, storage facilities and in-state production of natural gas. The Commission invites all parties to respond to these proposals, and the Commission will thereafter issue orders guiding or directing the California utilities on these matters.

F. Economic Assessment Methodology (T.E.A.M.) OII

Proceeding No.	Commissioner	Admin. Law Judge (ALJ)	Counsel	Energy Division Staff
I. 05-06-041	Grueneich	TerKeurst		White

What it Does

The Commission will decide what methods are appropriate to determine the economic benefits of a proposed transmission project.

Next Steps

The work of this proceeding is completed, and the proceeding may be closed soon.

Proceeding Overview

Date	Actions Taken	Comments
November 9, 2006	By 4-1 vote (Commissioner Brown Opposed), Commission approved President Peevey's Alternate Decision (AD).	<p>The AD contains the same substantive requirements for economic assessments of transmission projects presented in CPUC certification proceedings, regarding basic assessment principles and minimum requirements. However, for such proceedings the AD establishes a rebuttable presumption in favor of an economic evaluation approved by the CAISO Board and submitted in a CPCN proceeding, such that opposing parties bear the burden of demonstrating either (1) that the CAISO Board-approved economic evaluation does comply with the principles and minimum requirements of this decision or (2) that the project in question is not cost-effective.</p> <p>However, for a CAISO Board-approved economic evaluation to be granted a rebuttable presumption in its favor, certain safeguards must be met. First, the CAISO Board must make findings that the CAISO evaluation process meets public participation requirements summarized and substantive requirements specified in the present CPUC decision, and that the proposed project is cost effective based on clearly defined information, assumptions and weighting of the different economic criteria utilized. Also, the CAISO evaluation must be submitted in a timely manner and be updated if found to be outdated or inaccurate, and the CAISO must be a party to any proceeding in which a rebuttable presumption is to be granted.</p> <p>Such a rebuttable presumption has no impact on the CPUC's environmental analysis or consideration of other factors outside of economic evaluation of a proposed project.</p>
July 20, Aug 24, and Sept 7, 2006	Decision held.	Consideration is being given to the issue of deference or rebuttable presumption for a CAISO economic assessment.

June 20, 2006	Proposed Decision on Economic Assessment Methodology (Phase I)	PD establishes minimum requirements and general framework for economic assessment methodology for use in transmission permitting (CPCN) proceedings and determines not to prescribe a specific methodology. Either network or transportation modeling of transmission systems may be used, but must be adequately justified. CAISO analyses and findings should be reported by proponent and may be used to support a finding of need, but will not substitute for an independent finding of need by CPUC.

G. Renewable Transmission OII

Proceeding No.	Commissioner	Admin. Law Judge (ALJ)	Counsel	Energy Division Staff
I. 05-09-005	Grueneich	Weissman		White; Blanchard; Flynn

What it Does

This OII takes proactive steps to ensure the development of adequate transmission infrastructure to access renewable resources for California. It will examine and modify the Commission's transmission processes as they relate to renewable energy development, building on the progress made in OII 00-11-001 and OIR 04-04-026.

Next Steps

- Next steps are addressed by the July 13, 2006 Assigned Commissioner's Ruling. See summary below. An imminent ACR will be specify selected next steps in this proceeding.
- Overseen by Tehachapi project manager Tom Flynn: Continuing stakeholder phone conferences and possible continuation of Tehachapi workshops? (there have now been 3)

Proceeding Overview

Date	Actions Taken	Comments
Jan 24, 2007	ISO Board approves Tehachapi Project	17 new or upgraded transmission segments scheduled online between 2008 and 2013.
November 21, 2006	Third Tehachapi workshop	<p>Dariush Shirmohammadi briefly summarized the Tehachapi buildout plan and then described at some length the CAISO staff's economic assessment for the plan, giving a benefit/cost ratio of just over 1.3/1, with the main benefit coming from reduced CAISO area consumer energy costs. There was some quantified GHG reduction benefit, modest quantified wind integration costs not captured in production cost simulation (for regulation), and several kinds of benefits not quantified. There was a large (given as 40%) uncertainty in the planning (vs. engineering) level cost estimates. It will be determined today (the 21st) if staff will take this to the CAISO Board on Dec. 12 for approval (considered likely). Four alternative plans to also accommodate 4500 MW of Tehachapi wind were found to be more expensive. The preferred plan (estimated cost about \$1.8B) is estimated to serve 1100 MW of wind at Lowind substation (formerly substation 5) and 1400 MW at WindHub (formerly Tehachapi, or substation 1) - - by 2010. and 4500 MW overall by 2013.</p> <p>SCE (Garly Tarpley and George Chacon) described at some length the 11-segment Tehachapi buildout plan. Key constraints on the schedule are: (1) ability to locate (depending on environmental permitting) and build the LoWind substation (looped into 3rd Midway-Vincent line), (2) timing of obtaining the single large CPCN for segments 4-11 with USFS likely the key hurdle, (3) interdependencies and complexities of the south-of-Vincent segments due to 66 kV rerouting, tear-downs/rebuilds of 230 kV lines sometimes through limited corridors including one via NF and limited by operating contingencies, and (4) lead times for ordering major substation equipment.</p> <p>Rich Ferguson (CEERT) pointed out that California's GHG and possible (33%) RPS targets will require renewable procurement equivalent to several Tehachapis.</p>
September 29,	Second Tehachapi	At least partly reconciled CAISO & SCE views on transmission buildout. CAISO (D.

Energy Roadmap: February 2007 Update

2006	workshop	Shirmohammadi) presented buildout plan indicating some room for sequencing flexibility depending on generators materialize. CAISO is exploring “network upgrade benefit-cost analysis” (with credit for GHG reductions) and an alternative interconnection (clustering) approach to evaluating cost-effectiveness, for presentation to CAISO Board. The date for presenting the post-phase 1 buildout to the CAISO board for approval has been pushed back to the December Board meeting.
Aug 23, 2006	Tehachapi Workshop	Workshop to discuss Tehachapi transmission plan of service and associated project milestone schedule.
Aug 18, 2006	Parties file comments on “next steps”	As requested in the July ACR, parties filed comments on recommended next steps in this proceeding.
Aug 11 & 14, 2006	IOUs file transmission progress reports	PG&E and SCE filed updated RPS Transmission Status Reports Describing transmission developments and barriers for contracted RPS projects, as well as forward looking transmission options and barriers for future renewables procurement.
July 13, 2006	Assigned Commissioner’s Ruling	The ACR summarizes efforts to date and identifies next steps. Key efforts and accomplishments to date include development of the backstop cost recovery decision and transmission project review streamlining directives (both informed by substantial stakeholder input) and requests for/assessment of IOU’s initial transmission status reports describing transmission availability status of contracted RPS resources and potential RPS resources that might be procured without major transmission upgrades. The ACR orders IOUs to file updated transmission status reports in 30 days, based on RPS development status reports due on August 1, but expanded to clarify and elaborate on transmission issues where appropriate, to assess overall transmission obstacles and solutions, and to provide a forward-looking view of future transmission obstacles and RPS supply opportunities not requiring major transmission upgrades. The ACR announces appointment of Tom Flynn as the CPUC’s Tehachapi Project Manager effective in June, orders SCE to provide detailed project schedules for Phases 2 and 3 of the Tehachapi transmission project and encourages SCE to coordinate closely with both Energy Division and CAISO on Tehachapi transmission planning. The ACR also reiterates the CPUC’s commitment to working with the CAISO to explore “viable Tehachapi transmission alternatives, including in particular temporary interconnection” to support RPS goals. The ACR requests that parties file comments regarding additional issues for this proceeding, no later than August 8, 2006, and expresses interest in two particular issues: need to reform the TRCR methodology, and whether it is possible or appropriate to develop guiding principles to evaluate the transmission adequacy of contracted and proposed RPS projects.
July 13, 2006	Executive Director’s Statement Establishing Transmission Project Review Streamlining Directives was release to the public	Directives developed to ensure that each Division within the CPUC conducts procedures related to transmission siting and permitting in the most efficient and coordinated manner possible and to encourage coordination in project review.
June 15, 2006	Decision 06-06-034. Interim Opinion on Procedures to Implement the Cost recovery Provisions of P.U.C. § 399.25	Modifies finding in D.03-07-033 by finding that provisions of PUC §399.25 apply to both network and “high-voltage gen-tie” facilities deemed necessary to facilitate the achievement of RPS goals, and also states that a finding of network benefits is not a prerequisite to provision of backstop cost recovery under PUC §399.25. Furthermore, transmission projects should be considered eligible for such backstop cost recovery if they (1) consist of new high-voltage, bulk-transfer facilities, network or gen-tie, designed to serve multiple RPS-eligible generators where it has been established that the amount of added transmission capacity will likely be utilized by RPS-eligible generation to meet the state-mandated RPS goal, or (2) transmission network upgrades required to connect an RPS-eligible resource that has an approved RPS-eligible power

		purchase contract. Utilities are encouraged to upfront-fund transmission for renewables, but generators retain ultimate cost responsibility for gen-ties. Utility transmission projects below CPCN/PTC level may be eligible via application and justification. Where appropriate, renewables-transmission costs recovered via retail rates under §399.25 are recovered from all CPUC-jurisdictional ratepayers.

May 15, 2006	Opening comments on Draft Decision	Most extensive comments came from joint parties (CAISO, PG&E, SCE, SDG&E).
April 25, 2006	Draft Decision of ALJ Halligan (see above Final Decision)	The draft decision modifies a prior finding in D.03-07-033 (see above Final Decision).
April 21, 2006	Workshop Report released to the service list	The workshop report summarizes Parties' November-December comments, ED staff's responses to those comments (concurring and disagreeing), workshop participants' comments (by subject and by commenter), and "next steps" identified at the conclusion of workshop, including upcoming reports to Commr. Grueneich and to Assembly Speaker Nunez's staff, preparation of an implementation plan, and a potential follow-up workshop in the fall.

Several parties filed additional written comments prior to the workshop.
Mar 1, 2006	All-party meeting	Update and parties' short statements regarding cost recovery; summary of the status of the Commission's internal review and planned workshop regarding transmission permitting streamlining; summary of IOU reports on transmission problems of contacted RPS projects and prospects for future "low-hanging fruit" RPS projects requiring little transmission development; update on status of TCSG and its upcoming report to the Commission.

Jan 25, 2006	Transmission status reports	PG&E, SCE and SDG&E filed reports on the status of transmission for contracted RPS projects and prospects for future "low-hanging fruit" RPS projects requiring limited or no transmission development.
Dec 21, 2005	Assigned Commissioner's Scoping Memo and Ruling	Identified top priority issues are (1) cost recovery issues raised by P.U. Code Sec. 399.25; (2) streamlining the Commission's transmission permitting process where possible; (3) coordinating RPS procurement with transmission planning generally; and (4) identifying "low-hanging fruit," or transmission infrastructure investments by the IOUs that do not require Certificate of Public Convenience and Necessity (CPCN) or Permit to Construct (PTC) review by the Commission, and which would facilitate renewable resource development without large-scale, long-term transmission upgrades. Energy Roadmap: February 2007 Update

V. OTHER ISSUES

A. Qualifying Facilities (QFs)

Proceeding No.	Commissioner	Admin. Law Judges (ALJ)	Counsel	Energy Division Staff
R.99-11-022	Peevey	DeBerry		McCartney
R.04-04-003 consolidated with R.04-04-025 on QF issues. See Avoided Cost/QF Pricing in Roadmap.	Peevey	Wetzell, Brown, Gottstein		McCartney

What it Does

- R.99-11-022:** Address the issue remanded by the September 2002 LA Court of Appeals order: The Commission must determine whether "SRAC prices [were or were not] correct for the period of December 2000 through March of 2001." QFs contend that prices were correct during the remand period and no retroactive adjustments are necessary. However, the utilities and two consumer groups contend that QFs were overpaid during the remand period, based on FERC's revised market prices.
- R.04-04-003:** Formulate long-term QF policy in the procurement rulemaking.
- R.04-04-025:** Formulate QF pricing policies and "...promote consistency in methodology and input assumptions in Commission applications of short-run and long-run avoided costs...." **R.04-04-003 and R.04-04-025 are now consolidated.**

Next Steps

- A settlement has been reached on the QF Switcher issue for the remaining QFs not included in the PG&E/IEP settlement. It has not yet been filed.

Proceeding Overview

Date	Actions Taken	Comments
July 20, 2006	D.06-07-032 adopted settlement between PG&E and IEP.	Some switcher and remand issues still remain.
Apr 18, 2006	PG&E/IEP filed a Settlement on addressing issues in R.04-04-025, R.04-04-003, and R.99-11-022. SEE DESCRIPTION IN AVOIDED COST / QF PRICING IN ROADMAP.	As filed, the settlement was with 41 QFs in PG&E's territory, but other QFs have since joined. Other IOUs are unlikely to join in because some issues have been previously settled (SCE), or some items are not at issue (SDG&E). There are two five-year pricing options, a variable option for cogen QFs, and a fixed-price option for renewable QFs.
Apr 4, 2005	LA Court of Appeals Decision, B177138.	Upholds CPUC decisions.
Jan 21, 2005	Joint Ruling in R.04-04-025 and R.99-11-022.	Joint ruling on Short Run Avoided Cost Pricing for QFs. All comments, briefs, etc. submitted on the remanded issue and PG&E's petition for modification of D01-03-067, filed 12/15/04, will remain in R.99-11-022. Moves SRAC pricing issues into R.04-04-025.

Nov 10, 2004	Proposals filed re policy on Long-Term Policy for Expiring QF Contracts, in R.04-04-003.	Proposals filed on long-term policy options for expiring QF contracts. Ten sets of proposals were filed by CAC/EPUC, CAISO, CBEA/CLGC, CCC, County of Los Angeles, Modesto Irrigation District, ORA, PG&E, SCE, and SDG&E.

SCE is seeking review of Commission decisions D.03-12-062, D.04-01-050, and D.04-07-037 on the grounds that the Commission unlawfully ordered SCE to extend certain QF contracts by entering into SO1 contracts at current SRAC prices. SCE contends that the Commission cannot and should not order such extensions without first determining that prices do not exceed avoided cost. Case No. B177138. CPUC Legal Division is active in this court case. This is the second appeals case filed by SCE in the LA Court of Appeals on QF issues in the last two years. The previous case, in filed in 2002, concerned QF pricing during the 2000-2001 energy crisis.
Jul 29, 2004	CCC filed response to PG&E, SCE and SDG&E's filings, in R.99-11-022.	CCC contends that the IOUs did not present an accurate picture of energy prices during the subject period. Filings are under review. ALJ will determine next steps.
Jul 15, 2004	CCC request to comment, in R.99-11-022.	CCC requested an opportunity to comment on the July 6 th and 13 th utility filings and ALJ granted.

"Order Instituting Rulemaking to Promote Consistency in Methodology and Input Assumptions in Commission Applications of Short-run and Long-run Avoided Costs, Including Pricing for Qualifying Facilities." For detailed next steps in R.04-04-025, see the "Avoided Cost / QF Pricing Rulemaking" section of this Energy Roadmap document.

Feb 17, 2004	In R.99-11-022, comments were submitted.	PG&E/ORA/TURN (Jointly), CAC, CalWEA, CCC, IEP, and SCE filed comments regarding SRAC prices paid during the remand period of December 2000 through March 2001.
Jan 22, 2004	D.04-01-050 issued in the procurement rulemaking, R.01-10-024.	<ul style="list-style-type: none"> • Existing QFs have three contracting options: <ul style="list-style-type: none"> ➤ voluntary QF participation in utility competitive bidding processes; ➤ renegotiation by the QF and the utility on a case-by-case basis of contract terms; and ➤ five-year SO1 contracts with the understanding that appropriate revisions by the Commission to the QF pricing methodology will flow through to the renewed contracts. • New QFs may seek to negotiate contracts with utilities under the following circumstances: <ul style="list-style-type: none"> ➤ voluntary QF participation in utility competitive bidding processes; ➤ renegotiation by the QF and the utility on a case-by-case basis of contract terms that explicitly take into account the utility's actual power needs, and that do not require the utility to take or pay for

		power that it does not need.
Nov 7, 2003	Prehearing conference held on LA Court of Appeals order, in R.99-11-022.	At the PHC, ALJ DeBerry called for Comments to be filed on February 2, 2004, and Reply Comments on March 2, 2004 to address the issue of whether "SRAC prices were correct for the period of December 2000 through March of 2001." QFs contend they were underpaid during this remand period because IER and O&M Adder values in the SRAC formula were too low relative to these corresponding market values as determined by FERC.
Sep 4, 2002	The Second LA Court of Appeals issued a decision ² in B155748, et.al.	The decision held that, PUC "Decision Nos. 01-03-067, 01-12-028 and 02-02-028 are affirmed except to the extent that the Commission declined [failed] to consider whether the SRAC should be applied retroactively [to the December 2000 through March 2001 period]. That portion of those Decisions is annulled. The matter is remanded back to the Commission for proceedings consistent with this opinion." Petitions for review were denied November 26, 2002. ALJ DeBerry is drafting a ruling on the remand.

B. 206 Complaint Case / DWR Contract Renegotiation

Proceeding No.	Commissioner	Admin. Law Judge (ALJ)	Counsel	Energy Division Staff
EL02-60 (FERC)			Bromson	Chatterjee

What it Does

1. Argue that some of the long-term DWR contracts are unlawful, and try to gain concessions from counterparties.
2. The California State Auditor issued a report on the effects of the renegotiated contracts on California energy markets, which can be found at: <http://www.bsa.ca.gov/bsa/pdfs/2002-009.pdf>
3. The Complaint has been dropped for sellers that have renegotiated their contracts. The El Paso contract was one of the remaining contracts until it was renegotiated under global settlement in March 2003. CDWR renegotiated long-term contracts can be found at: <http://www.cers.water.ca.gov/newContracts.html>

Next Steps

- Awaiting a decision from the Federal Court of Appeals Ninth Circuit.

Proceeding Overview

Date	Actions Taken	Comments
Dec 8, 2004	Appeal of FERC's denial of the CPUC Section 206 Complaint under the Federal Power Act took place in the Federal Court of Appeals Ninth Circuit.	
Sep 22, 2004	In the US Court of Appeals (Ninth Circuit) the consolidated case number for the CPUC v. FERC is 03-74207 and CEOB v. FERC is 03-74-246. CPUC/CEOB filed a joint reply brief.	Reply brief included that FERC's refusal to consider the justness and reasonableness of the rates in its review was pure legal error; the FERC granting market-based rate authority does not mean that these contract rates were determined to be just and reasonable; FERC staff report established more that a "correlation" between the dysfunctional spot market and the long-term contract market; and Petitioners should not be treated as Parties to the contracts.
Mar 22, 2004	CPUC/EOB filed to the US Court of Appeals (Ninth Circuit) seeking a review of FERC's November decision and the legal standards used in refusing to set aside or modify long-term contracts (Coral, Dynegy, Mirant, Sempra and PacifiCorp).	The appeal contests that FERC may have erred in concluding that the Federal Power Act permits the public to bear unjust and unreasonable contract rates.
Nov 10, 2003	FERC Order denied California parties' complaint.	FERC did not rule on whether California spot market adversely affected the DWR long-term contracts instead said that the petitioners did not have sufficient basis for modifying the contracts.
Mar 26, 2003	FERC released <i>Final Report on Price Manipulation in Western Markets</i> .	The report concludes that market dysfunction in the short-term market affected the long-term contracts. The spot power prices correlate with long-term contract prices, especially in one to two year contracts. The analysis will be used to inform the ongoing proceeding. No order was issued and FERC action is pending.
Feb 25, 2002	CPUC and EOB filed Section 206 Complaint at FERC.	The Complaint alleged that certain long-term contracts between sellers and CDWR were unlawful due to price and non-price terms and conditions.
