Defendant

ECP C.21-03-014
(Filed March 10, 2021)

**SOUTHERN CALIFORNIA EDISON COMPANY (U 338-E) MOTION FOR
SUBMISSION OF EVIDENCE INTO THE RECORD**

I.

INTRODUCTION

Pursuant to California Public Utilities Commission (Commission) Rules of Practice and Procedure 13.7, and Administrative Law Judge John H Larsen's May 10, 2021 email ruling, Southern California Edison Company (SCE) respectfully submits this Motion for Submission of Evidence into the Record.

///

///

II.

SOUTHERN CALIFORNIA EDISON SUBMITS THE FOLLOWING INTO THE EVIDENTIARY RECORD

As noted in the Instructions for Preparing and Filing Exhibits on May 10, 2021, SCE submits the following documents into evidential record:

- Schedule NEM-ST.
- Interconnection documents
- Billing Statements.
- Correspondence between Complainant and SCE.
- Excel spreadsheet of net electricity exported to SCE's grid.

Accordingly, SCE respectfully request that the above-identified exhibits be formally accepted into the evidentiary record.

Respectfully submitted,

/S / Prabha Cadambi

Scheduled NEM-ST

Before the
Public Utilities Commission of the State of California

Date May, 20, 2021

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF

Sheet 1

APPLICABILITY

This Schedule is applicable to Eligible Customer-Generators (Customers) served on time-of-use (TOU) rates who elect to install a Renewable Electrical Generating Facility(ies) (Generating Facility(ies)) pursuant to California Public Utilities (PU) Code Section 2827.1 and California Public Utilities Commission (Commission) Decision (D.)16-01-044, subject to the additional terms and conditions contained herein and any other applicable state or federal laws. Customers who are receiving service on this Schedule, or who have submitted all documentation necessary to receive service on this Schedule, are subject to the grandfathering provisions pursuant to Special Condition 8 below.

Customers who participate in Direct Access (DA), Community Choice Aggregation (CCA) or Community Aggregation (CA) Service are eligible for service under this Schedule consistent with the NEM services that SCE provides to its Bundled Service Customers, except as otherwise provided herein, provided the Customer's Electric Service Provider (ESP), Community Choice Aggregator or Community Aggregator offers a NEM tariff or program consistent with the provisions of this Schedule. DA, CCA or CA Service Customers must look to their ESP, Community Choice Aggregator or Community Aggregator for NEM services related to the generation charges and credits that result from receiving service under this Schedule.

This Schedule is also applicable to (a) eligible Customers who elect to participate in NEM Aggregation (NEM-A) (see Special Condition 5 below), (b) Customers who install eligible NEM-Paired Storage Systems (see Special Condition 6 below), or (c) Customers whose Generating Facility(ies) meets the definition of a Multiple Tariff Generating Facility (see Special Condition 7 below).

NEM-ST Grandfathering Eligible Customer-Generators, as defined in Special Condition 8, who replace a Renewable Electrical Generating Facility due to impacts of a Natural Disaster will remain eligible under this Schedule pursuant to Special Condition 9. (N)
(N)

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF
(Continued)

Sheet 2

RATES

All terms and conditions of the Customer's Otherwise Applicable Tariff (OAT) apply, except as provided below.

1. Mandatory TOU Rates.

- a. To be an Eligible Customer-Generator, the Customer must receive service on a TOU rate schedule (which is then considered the Customer's OAT for the purpose of this Schedule), with no exceptions and no option to opt-out to an underlying rate option that is not time differentiated, at the time the Customer begins service on this Schedule, except as provided in 1.e below.
- b. The default TOU rate for Residential Customers taking service under this Schedule is Schedule TOU-D, Option 4 to 9 p.m., though Residential Customers may elect another TOU rate option for which they are eligible. (T)
- c. Residential Customers who are served under this Schedule or who submit all documentation necessary to receive service under this Schedule prior to the implementation of default Residential TOU rates in SCE's service territory (expected to be in 2019, subject to Commission direction) have the option to stay on the TOU rate that they are served on at that time for a period of five years from the date the Customer commenced service on that TOU rate.
- d. Any Residential Customer who submits all necessary documentation for service under this Schedule after default Residential TOU rates have been implemented in SCE's service territory (expected to be in 2019, subject to Commission direction) shall be put on the appropriate default TOU rate as a condition of receiving service under this Schedule. Such Customers may opt out of their default TOU rate, but must switch to another available TOU rate for which they are eligible in order to continue receiving service under this Schedule.
- e. Residential Customers for whom an eligible TOU rate option does not exist (e.g., including but not necessarily limited to customers served on Schedules DM, DMS-1, DMS-2 and DMS-3) are eligible for service on this Schedule while on a non-TOU rate but must begin receiving service on a TOU rate option for which they are eligible as soon as one becomes available in order to continue receiving service on this Schedule.

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF

Sheet 3

(Continued)

RATES (continued)

2. Nonbypassable Charges (NBCs).

For the purpose of this Schedule only, NBCs include the following rate components, as provided in the Customer's OAT: (1) Public Purpose Programs Charge (PPPC), (2) Nuclear Decommissioning Charge (NDC), (3) Competition Transition Charge (CTC), and (4) Department of Water Resources (DWR) Bond Charge.

As determined in each billing period, a Customer is responsible for NBCs, assessed on a \$-per-kilowatthour (kWh) basis using the NBC factors contained in the Customer's OAT, for each kWh of electricity that is consumed/imported from the grid net of exports (i.e., net consumption) in each metered interval (e.g., one hour or 15-minute). For example, if a Customer consumes/imports 5 kWh from the grid in a metered interval and exports 3 kWh to the grid in that same metered interval, the Customer is assessed NBCs on 2 kWh for that metered interval. If a Customer consumes/imports 2 kWh from the grid in a metered interval and exports 3 kWh in that same metered interval, the Customer is assessed NBCs on 0 kWh for that metered interval since there was no net consumption from the grid in that metered interval.

For DA, CCA or CA Service Customers, the CTC and DWR Bond NBC components are based on the factors contained in Schedules DA-CRS and CCA-CRS, as applicable, and the PPPC and NDC NBC components are based on the factors contained within the Customer's OAT. NBCs are assessed on a \$-per kWh basis for each kWh of electricity that is consumed/imported from the grid net of exports (i.e., net consumption) in each metered interval (e.g., one hour or 15-minute).

NEM-A aggregated accounts are assessed NBCs on a \$-per-kWh basis for each kWh of electricity that is consumed/imported from the grid in each metered interval.

For Residential Customers, the assessed NBCs will be used in the Minimum Charge calculation consistent with how these components are used in the Minimum Charge calculation for non-NEM Residential customers.

Customers who receive service on California Alternate Rates for Energy (CARE) or who receive a Medical Baseline Exemption are currently exempt from the DWR Bond Charge. Therefore, the DWR Bond Charge component of the NBCs for these Customers under this Schedule is \$0.00/kWh.

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF

Sheet 4

(Continued)

RATES (continued)

3. Monthly Energy (kWh) Charges and Credits.

As determined in each billing period, when a Customer is a net consumer of energy, E_s is greater than E_F , where E_s is energy supplied by SCE and E_F is energy generated by the Customer's Generating Facility and exported onto SCE's electrical system, the resulting net consumed energy will be used in the calculation of all applicable energy charges, with the exception of the NBCs as outlined above, calculated by (1) multiplying the Customer's net consumed kWh by the applicable energy rate components of the Customer's OAT, in each TOU period, for Bundled Service Customers, or (2)(a) multiplying the Customer's net consumed kWh by the applicable Delivery Service rate components of the Customer's OAT, in each TOU period, and (b) multiplying the Customer's net consumed kWh by the applicable Cost Responsibility Surcharge (CRS) rate components (e.g., PCIA) of Schedules DA-CRS or CCA-CRS that are not defined as NBCs above, in each TOU period, for DA, CCA or CA Service Customers. The Customer's ESP or Community Choice Aggregator/Community Aggregator is responsible for providing the generation-related energy charges. NBCs, as defined above, are not included as part of these calculations.

As determined in each billing period, when a Customer is a net producer of energy, E_F is greater than E_s , the resulting net produced energy will be used in the calculation of energy credits, calculated by (1) multiplying the Customer's net produced kWh by the applicable energy rate components of the Customer's OAT, in each TOU period, for Bundled Service Customers (though in no case can the calculation and application of these energy credits result in the reduction of the NBCs owed by the Customer), or (2)(a) multiplying the Customer's net produced kWh by the applicable Delivery Service rate components of the Customer's OAT, in each TOU period, and (b) multiplying the Customer's net produced kWh by the applicable CRS rate components (e.g., PCIA) of Schedules DA-CRS or CCA-CRS that are not defined as NBCs above, in each TOU period, for DA, CCA or CA Service Customers (though in no case can the calculation and application of these energy credits result in the reduction of the NBCs owed by the Customer). The Customer's ESP or Community Choice Aggregator/Community Aggregator is responsible for providing the generation-related energy credits. NBCs, as defined above, are not included as part of these calculations.

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF

Sheet 5

(Continued)

RATES (continued)

4. Net Surplus Compensation (NSC).

Net Surplus Compensation (NSC) is equal to the Net Surplus Compensation Rate (NSCR) multiplied by Net Surplus Energy. To calculate NSC, the kWh of Net Surplus Energy are multiplied by the NSCR. The NSCR is based on the default load aggregation point (DLAP) price, and is equal to the simple rolling average of SCE hourly \$-per-kWh prices from the Hour Ending 08 through the Hour Ending 17 (7 a.m. to 5 p.m.) for each day of the 12-month period corresponding to the Customer's 12-month Relevant Period. The rolling average is calculated on a monthly basis to be effective the first of each month and is applied to all Customers with a Relevant Period ending in that month. SCE uses a full 12 months (365 days, or 366 days for leap years) of DLAP prices, as published on the California Independent System Operator (California ISO) Open Access Same-time Information System (OASIS), ending the twentieth (20th) day of each month. SCE then calculates the NSCR within five days of the first of the month to allow the California ISO to finalize the day-ahead DLAP prices. The NSCR is applied to all eligible Net Surplus Generators, irrespective of their rate class. The NSCR is posted on SCE's website and updated monthly. See Special Condition 4.i below for specific terms and provisions regarding NSC. (T)

NSC Renewable Attribute Adder (RAA)

Pursuant to D.11-06-016, SCE will include a Renewable Attribute Adder (RAA) with the NSC rate if the eligible Customer or the Customer's aggregator provides a completed Form 14-935 (see Special Condition 4.i.v below) verifying that the Customer: (1) has registered the Generating Facility at the Western Renewable Energy Generation Information System (WREGIS); (2) has obtained Renewables Portfolio Standard (RPS) ownership certification from the California Energy Commission (CEC) for the Customer's Net Surplus Energy and provides this certification to SCE; and (3) allows for the ownership of the Renewable Energy Credits (RECs) associated with the Customer's Net Surplus Energy to be transferred to SCE. For details on the CEC and WREGIS certification process, refer to the CEC's RPS Eligibility Guidebook, which can be found at: <http://www.energy.ca.gov/renewables/documents/#rps>. (T)

The RAA will be calculated using the most recent Western Electricity Coordinating Council (WECC) average renewable premium, based on United States Department of Energy (DOE) published data. The RAA will only be paid to those Net Surplus Generators who provide RECs to SCE.

Value of RECs = Net Surplus kWh x RAA.

The RAA will be updated annually and is available at:

<https://www.sce.com/wps/portal/home/regulatory/tariff-books/rates-pricingchoices/renewable-energy-credit>.

At the conclusion of each Relevant Period, the eligible Customer will notify SCE that the Customer has transferred the RECs associated with the Net Surplus Energy in WREGIS by completing Form 14-935 and will send the CEC RPS certificate with the form to SCE.

5. Standby and Customer Generation Departing Load Charges.

No additional Standby or Customer Generation Departing Load charges are currently applicable to Customers served under this Schedule, as provided in SCE's Standby and Customer Generation Departing Load tariffs.

6. NEM-A Billing Services Charges.

NEM-A Customers served pursuant to Special Condition 5 below are subject to the following additional billing services charges:

Manually Billed Accounts – (N)

a. Account Set-Up Fee: \$25.00 per account in the NEM-A arrangement. Any account added to an NEM-A arrangement is subject to this one-time fee. (D)

b. Monthly Billing Fee: \$20.00 per month per account in the NEM-A arrangement. (I)

Automated Billed Accounts – (N)

a. Account Set-Up Fee: \$16.00 per account in the NEM-A arrangement. Any account added to an NEM-A arrangement is subject to this one-time fee. |

b. Monthly Billing Fee: \$2.70 per month per account in the NEM-A arrangement. | (N)

SPECIAL CONDITIONS

1. Definitions: Except as otherwise defined in SCE's Electric Rule 1, capitalized terms utilized in the context of this Schedule are defined below and applicable to Customers receiving service under this Schedule.

a. Eligible Customer-Generator (Customer).

- i. A Residential, Small Commercial, commercial, industrial, agricultural, pumping or metered lighting customer served on a TOU rate who uses a Generating Facility, or a combination of those facilities, that is (A) located on the Customer's Premises, (B) interconnected and operates in parallel with SCE's electric system, and (C) intended primarily to offset part or all of the Customer's own electrical requirements.

Sheet 8 (T)

SPECIAL CONDITIONS (continued)

1. Definitions. (continued)

b. Renewable Electrical Generating Facility (Generating Facility).

- i. A facility that generates electricity from a renewable source listed below pursuant to paragraph (1) of subdivision (a) of Section 25741 of the Public Resources Code. These renewable sources are further defined in the CEC's RPS Guidebook.ⁱ

Biomass, solar thermal, photovoltaic, wind, geothermal, fuel cells using renewable fuels, small hydroelectric generation, digester gas, municipal solid waste conversion, landfill gas, ocean wave, ocean thermal, or tidal current (Renewable Generator), and any additions or enhancements to the facility using that technology.

For certain technologies, Customers are required to sign an affidavit (Form 14-912) certifying that they are an Eligible Customer-Generator. Specifically, a Customer using municipal solid waste conversion, fuel cells using renewable fuel, or small hydroelectric generation will need to certify that the following technology specific criteria have been met:

- A. For purposes of this Schedule, qualifying "municipal solid waste conversion" is as defined in Public Resources Code Section 25741(b).
- B. For purposes of qualifying as a "fuel cell using renewable fuels" under this Schedule, the Customer's fuel cell must be powered solely with renewable fuel.
- C. For purposes of qualifying as a "small hydroelectric generation facility" under this Schedule, the Customer must certify that the facility will neither cause an adverse impact on instream beneficial uses nor cause a change in the volume or timing of streamflow.

- ii. To be eligible for service under this Schedule, Generating Facilities must meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the Commission regarding safety and reliability (i.e., SCE's Electric Rule 21). All Generating Facilities must have a warranty of at least 10 years for all equipment and the associated installation from the system provider (not from SCE).ⁱⁱ Additionally, for Customers installing solar Generating Facilities, all major solar system components (including PV panels and other generation equipment, inverters and meters) must be on the verified equipment list maintained by the CEC. For all Generating Facilities, any other equipment, as determined by SCE, must be verified as having safety certification from a Nationally Recognized Testing Laboratory (NRTL).

ⁱ RPS Eligibility Guidebook: <http://www.energy.ca.gov/renewables/documents/#rps>.

ⁱⁱ Warranties or service agreements conforming to requirements applicable to the Self-Generation Incentive Program (SGIP) may be used for technologies eligible for the SGIP. In appropriate circumstances conforming to industry practice, this requirement may also rely on and be satisfied by manufacturers' warranties for equipment and separate contractors' warranties for workmanship (i.e., installation).

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF

Sheet 9 (T)

(Continued)

SPECIAL CONDITIONS (continued)

1. Definitions. (continued)

b. Renewable Electrical Generating Facility (Generating Facility). (continued)

iii. Sizing. Customer's Generating Facilities must meet the sizing requirements outlined below in order to be eligible for service under this Schedule.

A. Sized to Load Requirement: To be eligible for NEM, a Generating Facility must be sized to offset part or all of the Customer's own electrical requirements, and may not be oversized. This means that the estimated output of the Generating Facility, using the CEC-AC Nameplate rating for inverter-based Generating Facilities and the applicable technology-specific capacity factor as specified in SCE's NEM Interconnection Handbook, must not exceed the Customer's previous annual usage (in kWh), unless additional load verification or acknowledgment is provided to SCE, as required by SCE (this also applies where the Customer has less than 12 months of previous recorded usage data). For non-inverter-based Generating Facilities, this calculation is based on the AC nameplate rating of the Generating Facility.

B. Capacity: Except for the sized-to-load requirement specified above (and as provided in Special Conditions 1.a.ii and 1.a.iii above), there is no limit on the capacity of a Generating Facility served under this Schedule. However, primarily for the purposes of interconnection, cost responsibility (as outlined in SCE's Electric Rule 21) and NSC eligibility (as outlined in Special Condition 4.i below), certain provisions apply differently to Generating Facilities served under this Schedule depending on whether they have a capacity of (1) 1 MW or less or (2) greater than 1 MW. Both the CEC-AC rating, as applicable, and the aggregate inverter capacity must not be greater than 1 MW for a Generating Facility to be considered 1 MW and smaller. For Generating Facilities utilizing fuel cell technology, to be considered as a 1 MW or smaller Generating Facility, the total Generating Facility capacity must not exceed 1 MW CEC-AC Nameplate rating and the lesser of (1) 1 MW aggregate inverter capacity or (2) 1 MW aggregate fuel cell gross nameplate capacity.

c. NEM Eligible Generator. A Generating Facility (served under either this Schedule or Schedule NEM), or a generating facility served under Schedule FC-NEM or Schedule BG-NEM.

d. Group of NEM Eligible Generators. Generators qualifying for NEM service under the same NEM tariff provisions. Thus, Generating Facilities served under this Schedule would form one group, Generating Facilities served under Schedule NEM would form another group, biogas generators and fuel cell generators served under Schedules BG-NEM or FC-NEM without aggregated accounts would form a third group, and biogas generators and fuel cell generators served under Schedules BG-NEM or FC-NEM with aggregated accounts would form a fourth group.

Sheet 10 (T)

(Continued)

SPECIAL CONDITIONS (continued)

1. Definitions. (continued)

- e. Non-NEM Eligible Generator. An electrical generator that does not meet the definition of a Generating Facility in this Schedule or Schedule NEM, and/or an electrical generator that does meet the definition of an eligible generating facility in Schedules BG-NEM or FC-NEM.
- f. Multiple Tariff Generating Facility. A Generating Facility consisting of one or more NEM Eligible Generators served under this Schedule and one or more NEM Eligible Generators served under Schedules NEM, BG-NEM and/or FC-NEM, or consisting of one or more NEM Eligible Generators served under this Schedule and one or more Non-NEM Eligible Generators.
- g. NEM-Paired Storage System. A Generating Facility that includes a Renewable Generator(s) and an Integrated or Directly Connected Energy Storage Device(s) behind the same SCE revenue meter and/or Service Account. Integrated or Directly Connected Energy Storage Devices are considered an addition or enhancement to the Renewable Generator and not a separate generating facility for the purposes of applying the cost exemptions specified in Special Condition 6 below when interconnecting at the same time as the Renewable Generator.

An energy storage device shall be considered an addition or enhancement to the Renewable Generator if the energy storage device is either:

- i. Integrated into the Generating Facility, such that the energy storage device is capable of storing only energy produced by the Renewable Generator, either as an intermediary form of energy during the generation cycle or after electricity has been generated (Integrated Energy Storage Device); or,
- ii. Directly connected to the Generating Facility, such that electricity is delivered from the Renewable Generator to the energy storage device behind the meter used for RPS purposes and any electricity from a source other than the Renewable Generator is included as an energy input to the Generating Facility; the energy storage device must be operated as part of the Generating Facility represented in the application and not in conjunction with any other facility, renewable or otherwise (Directly Connected Energy Storage Device). As such, a Directly Connected Energy Storage Device is not required to be charged exclusively from the Renewable Generator and may also be charged from the grid.
- h. Large NEM-Paired Storage System: A NEM-Paired Storage System where the Integrated or Directly Connected Energy Storage Device(s) is sized larger than 10 kW (AC) (i.e., maximum aggregate discharge capacity) and that meets the applicable sizing and metering requirements included in Special Condition 6 below.
- i. Small NEM-Paired Storage System: A NEM-Paired Storage System where the Integrated or Directly Connected Energy Storage Device(s) is sized 10 kW (AC) or smaller (i.e., maximum aggregate discharge capacity) and that meets the applicable sizing and metering requirements included in Special Condition 6 below.

SPECIAL CONDITIONS (continued)

1. Definitions. (continued)

j. Relevant Period.

- i. A twelve-month period, or portion thereof, commencing on the anniversary Date of Parallel Operation of the Customer's Generating Facility to SCE's electric system and on every subsequent anniversary thereof. For Customers electing to receive service under this Schedule for a Generating Facility that is already interconnected to SCE's electrical system, the Relevant Period will commence on the date that the Customer begins receiving service under this Schedule and on every subsequent anniversary thereof. If a Customer terminates service, or experiences a change from SCE Bundled Service to CCA/CA Service or DA Service or from CCA/CA Service or DA Service to SCE Bundled Service prior to the end of the 12-month period, the Relevant Period will consist of that period from the anniversary date until the effective date of the termination or change in service.
- ii. The initial Relevant Period of an aggregated account added to an NEM-A arrangement, pursuant to Special Condition 5 below, during an arrangement's ongoing Relevant Period may be less than 12 months to align with the other accounts in the NEM-A arrangement.
- iii. Customers may elect to change the start date of their Relevant Period on a one-time prospective basis by completing and returning Form 14-936, *NEM One-Time Relevant Period Change Request Form*, or Form 16-345, *Net Energy Metering Billing Option Change Request and One-Time Relevant Period Selection Form for Residential and Small Commercial Customers*, to SCE. SCE must receive this form at least 60 days prior to the requested start date of the new Relevant Period. When the start date change is effectuated, it will cause a shortened existing Relevant Period and the new 12-month Relevant Period will begin. In no case will a Relevant Period extend beyond 12 months.
- k. Date of Parallel Operation. The date that SCE provides the Customer with SCE's written approval (e.g., the Permission to Operate (PTO) notice) to commence parallel operation of the Generating Facility.

- l. Net Energy.** The difference between the electric energy supplied and/or delivered through SCE, and the electric energy produced by the Customer's Generating Facility and exported into SCE's electric system, measured over the Relevant Period.

$$\text{Net Energy} = E_s \text{ minus } E_F$$

- m. Net Surplus Energy.** All electricity generated by a Customer's Generating Facility that is exported to SCE's grid measured in kWh over the Relevant Period that exceeds the amount of electricity consumed by that Customer.ⁱ
- n. Net Surplus Generator.** A Customer using a Generating Facility that generates and exports to SCE's grid more electricity (in kWh) during a Relevant Period than is supplied by SCE to the Customer during that same Relevant Period.
- o. Otherwise Applicable Tariff (OAT).** The Customer's regularly filed TOU rate schedule under which service is rendered.

2. Required Application and Contracts for Interconnection.

- a.** All Customers must submit an online *Net Energy Metering (NEM) Generating Facility Interconnection Application* (Form 14-957), along with any applicable fees as specified in SCE's Electric Rule 21, and an executed CPUC-jurisdictional NEM Interconnection Agreement prior to receiving service under this Schedule. Additional forms may be required depending on (1) the type of Generating Facility being installed and (2) the requirements of any specific provisions of this Schedule under which the Customer is electing to be served. The following table outlines the various Interconnection Agreements and forms that may be applicable to Customers requesting service under this Schedule.

Applicable Interconnection Agreements (IAs)	
Form 14-923	NEM IA for Generating Facilities Sized 10 kW and Smaller
Form 16-344	NEM IA for Generating Facilities Sized 1 MW and Smaller
Form 14-773	NEM Multiple Tariffs (NEM-MT) IA for Generating Facilities Sized 1 MW and Smaller (see Special Condition 7 below)
Form 14-974	NEM IA for Generating Facilities Sized Greater Than 1 MW
Form 14-972	NEM Multiple Tariffs (NEM-MT) IA for Generating Facilities Sized Greater Than 1 MW (see Special Condition 7 below)
Applicable NEM Forms	
Form 14-912	Eligible Customer-Generator Warranty (see Special Condition 1.b.i above)
Form 14-935	NSC RAA Compensation Form (see Special Condition 4.h.v)
Form 14-936	NEM One-Time Relevant Period Change Request Form (see Special Condition 1.j.iii above)
Form 14-937	NEM-A Account Information (see Special Condition 5 below)
Form 16-345	NEM Billing Option Change Request and One-Time Relevant Period Selection Form (see Special Condition 4.b below)

ⁱ kWh subject to forfeit under the NEM-Paired Storage System estimation methodology provisions of Special Condition 6 below are not considered E_F for the purposes of determining Net Surplus Energy.

SPECIAL CONDITIONS (continued)

2. Required Application and Contracts for Interconnection. (continued)

- b. Customers seeking to interconnect their Generating Facilities for the purpose of receiving service under this Schedule are subject to the interconnection requirements and interconnection cost responsibility provisions for NEM-ST Customers as established in SCE's Electric Rule 21. These costs may include interconnection application fees, study costs and/or costs for upgrading the Distribution and/or Transmission Systems, depending on the Customer and the size of the Generating Facility. All Customers are responsible for the costs of any applicable Interconnection Facilities, as defined in SCE's Electric Rule 21.
- c. A new Customer of Record or New Party In (NPI) who owns, rents or leases a Premises that includes a Generating Facility with a capacity of 30 kW or less, that was approved by SCE for Parallel Operation prior to the new Customer or NPI moving in and/or taking electric service with SCE will not have to submit a new Interconnection Agreement, will take service under this Schedule as long as the requirements of this Schedule, including Special Condition 8, are met. This provision also applies to Premises where the developer/contractor establishes the interconnection, so that the Customer who buys/rents/leases the Premises will not have to re-submit and sign a new Interconnection Agreement. To be eligible, the new Customer or NPI must (1) ensure that the Generating Facility is compliant with all applicable safety and performance standards as delineated in SCE's Electric Rule 21 and other applicable tariffs; (2) keep in force the amount of property, commercial general liability and/or personal liability insurance the NPI or new Customer had in place at the time it initiated service under this Schedule; and (3) understand that SCE may from time to time release information to the Commission or CEC regarding the new Customer or NPI's Generating Facility, including the NPI or new Customer's name and the location, capacity and operational characteristics of the Generating Facility. SCE will provide the NPI or new Customer with (1) a copy of the Interconnection Agreement in effect and as signed by the previous Customer, which will remain unchanged, (2) a copy of the NEM fact sheet that explains NEM operation and billing, and (3) SCE's website link where information on NEM can be found. A NPI or a new Customer may need to sign an affidavit certifying that it meets the requirement for an Eligible Customer-Generator and is utilizing an eligible Generating Facility pursuant to PU Code Section 2827.1(a).

A new Customer or NPI who owns, rents or leases a Premises that includes a Generating Facility with a capacity above 30 kW will need to sign a new Interconnection Agreement. If no changes are made to the interconnection or Generating Facility, the Interconnection Agreement will have identical terms and conditions as the ones approved for the previous Customer, subject to the provisions of Special Condition 8 below.

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF

Sheet 14 (T)

(Continued)

SPECIAL CONDITIONS (continued)

3. Metering Requirements. Metering requirements for Customers served under this Schedule are as follows:
- a. Net Energy shall be metered using a single TOU meter capable of separately registering the flow of energy in two directions, with one channel of the meter registering E_s and a separate channel of the meter registering E_f . If the Customer's existing meter is not a TOU meter capable of separately registering the flow of energy in two directions, an appropriate TOU meter shall be provided at the expense of the Customer. Customers who refuse to allow the installation and use of a TOU meter capable of separately registering the flow of energy in two directions are not eligible for service under this Schedule.
 - b. SCE may elect to install an additional meter or meters, at SCE's expense, with the Customer's consent. Such additional metering shall be used only to provide the information necessary to accurately bill or credit the Customer. Where additional meters are required to accurately bill and/or credit the Customer, if authorization is not granted by the Customer, SCE shall have the right to refuse interconnection.
 - c. For NEM-A accounts receiving service pursuant to Special Condition 5 below, the account directly interconnected to the Generating Facility must have a single meter that is capable of separately registering the flow of energy in two directions in 15-minute intervals. If the Customer's existing meter is not capable of separately registering the flow of energy in two directions at the 15-minute interval level or if the Customer's existing meter is unable to separately register the amount of energy exported to the grid by the Generating Facility, an appropriate meter shall be provided at the Customer's expense. All other NEM-A aggregated accounts must have a standard SCE TOU billing meter capable of registering the flow of energy (E_s) in 15-minute intervals.
 - d. The specific metering requirements for Customers using a NEM-Paired Storage System or a Multiple Tariff Generating Facility are provided in Special Conditions 6 and 7, respectively, below.

SPECIAL CONDITIONS (continued)

4. Billing. The following billing processes apply to Customers served under this Schedule.
- a. SCE will provide all Customers with net energy consumption information and/or net generation information with each monthly bill, on which the Customer's monthly NEM energy charges and credits that are subject to true-up are billed – regardless of whether the customer is responsible for paying these charges on a monthly or annual basis (see Special Condition 4.b below).
 - b. For all Customers who meet the definition of a Residential or Small Commercial Customer, the monthly valued (in \$) NEM energy-related charges and credits are accumulated until the end of a Relevant Period. This is referred to as the Annual Billing Option (ABO), and is the default billing option for Residential and Small Commercial Customers. However, upon a Customer's request, SCE shall permit a Residential or Small Commercial Customer to be billed pursuant to the MBO described below. The request must be made by the Customer upon initiation of service under this Schedule or upon written notice to SCE using Form 16-345 no later than thirty (30) days prior to the end of a Relevant Period, whichever applies. For all Customers who do not meet the definition of a Residential or Small Commercial Customer, and for those customers participating in NEM Aggregation, it is mandatory to pay all applicable charges, both energy and non-energy related, on a monthly basis, in accordance with the Customer's OAT. This is referred to as the Monthly Billing Option (MBO), and is the only billing option available to Customers who do not meet the definition of a Residential or Small Commercial Customer or those participating in NEM Aggregation.
 - c. For all Customers served under this Schedule, the value (in \$) of NEM energy credits will be used to offset other TOU periods' and/or other billing periods' NEM energy related charges (in \$) when they exist. However, at no time will NEM energy credits (in \$) be applied towards any NBCs and/or non-energy related charges, and such NEM credits (in \$) cannot be carried over to a new Relevant Period.
 - d. The energy charges and credits for Customers utilizing NEM-Paired Storage Systems are billed in accordance with the provisions of Special Condition 6 below.

4. Billing. (continued)

e. At the end of each Relevant Period, SCE shall proceed as follows:

- i. For all Customers who meet the definition of a Residential or Small Commercial Customer who did not elect the MBO, SCE will subtract all monthly valued accrued energy credits from all accrued energy charges. If this calculation results in monies owed to SCE, such energy charges shall be due and payable in accordance with the Customer's OAT. However, if this calculation results in an excess energy credit, SCE shall neither pay the Customer for any unused energy credit nor carry forward any unused energy credit. The unused energy credit shall be zeroed out and a new Relevant Period shall commence. Eligible Customers electing NSC as provided in Special Condition 4.i below will be compensated as outlined therein pursuant to the Rates section of this Schedule. Additionally, Special Condition 4.j may apply to Residential Customers.
- ii. For all Customers who do not meet the definition of a Residential or Small Commercial Customer, and all Residential and Small Commercial Customers who elected the MBO, an annual true-up of energy-related charges and credits occurs at the end of the Relevant Period. Upon completion of the annual true-up, any remaining energy credits will be zeroed out and a new Relevant Period will begin. Eligible Customers electing NSC as provided in Special Condition 4.i below will be compensated as outlined therein pursuant to the Rates section of this Schedule. Additionally, Special Condition 4.j may apply to Residential Customers.
- iii. If any Customer terminates service under this Schedule prior to the end of a Relevant Period, Special Conditions 4.e.i and 4.e.ii above shall apply. Except for customers who opted out of CCA Service during the CCA's Follow-up Notification Period in accordance with Rule 23 Section I, a Customer switching from CCA/CA Service or DA Service to Bundled Service or from Bundled Service to CCA/CA Service or DA Service during an ongoing Relevant Period shall be deemed as terminating service under this Schedule prior to the end of the current Relevant Period, and Special Conditions 4.e.i and 4.e.ii above shall apply. Upon switching, the Customer shall begin a new Relevant Period. (N)
|
(N)
- f. For all Customers served under this Schedule, all NBCs, as defined in the Rates section above, Monthly Customer Charges, Minimum Charges, Demand Charges, and/or other non-energy related charges, excluding any adjustments due to power factor provisions, as defined in the Customer's OAT, apply, as applicable, regardless of the Customer's monthly net energy consumption or export.

SPECIAL CONDITIONS (continued)

4. Billing. (continued)

g. Billing Provisions Applicable to DA, CCA or CA Service Customers.

- i. For DA, CCA or CA Service Customers, SCE will provide the applicable Delivery Service and CRS charges and credits, and the Customer's ESP, Community Choice Aggregator or Community Aggregator is responsible for timely providing the applicable generation charges and credits.
- ii. For DA Customers served under the Consolidated SCE Billing option, as defined in SCE's Electric Rule 22, the ESP is responsible for providing SCE with the generation-related energy charges or credits applicable to those DA Customers. For CCA or CA Service Customers, the Community Choice Aggregator or Community Aggregator is responsible for providing SCE with the generation charges or credits applicable to the CCA or CA Service Customer.
- iii. At the end of each Relevant Period, SCE and the ESP, Community Choice Aggregator or Community Aggregator shall proceed as follows:
 1. For all Customers who meet the definition of a Residential or Small Commercial Customer who did not elect the MBO, SCE will subtract all monthly valued accrued Delivery Service energy credits from all accrued Delivery Service energy charges and/or all applicable (i.e., those not defined as NBCs) monthly valued CRS energy credits from all applicable accrued CRS energy charges. If this calculation results in monies owed to SCE, such energy charges shall be due and payable in accordance with the Customer's OAT. However, if this calculation results in an excess energy credit, SCE shall neither pay the Customer for any unused energy credit nor carry forward any unused energy credit. Instead, the unused energy credit shall be zeroed out and a new Relevant Period shall commence. Additionally, Special Condition 4.j below may apply to Residential Customers. For DA Customers, separate annual true-ups of all energy charges and credits, consistent with the provisions set forth under this Schedule, will be calculated by SCE for the applicable SCE charges and credits, as outlined above, and by the ESP for the applicable ESP charges and credits. Any net balance related to generation charges that are collected from an eligible DA Customer will be paid annually by SCE to the ESP as set forth in SCE's Electric Rule 22, Section L. For CCA/CA Service Customers, SCE and the Community Choice Aggregator/Community Aggregator shall complete an annual true-up of all energy charges and credits calculated monthly, consistent with the provisions set forth under this Schedule. Credits and charges related to the Community Choice Aggregator's/Community Aggregator's generation services shall be based on the information provided by the Community Choice Aggregator/Community Aggregator to SCE. Any net balance related to generation charges that are collected from a CCA/CA Customer will be paid annually by SCE to the Community Choice Aggregator/Community Aggregator as set forth in SCE's Electric Rule 23, Section Q.

4. Billing. (continued)

g. Billing Provisions Applicable to DA, CCA or CA Service Customers. (continued)

iii. At the end of the Relevant Period. (continued)

2. For all Customers who do not meet the definition of a Residential or Small Commercial Customer, and all Residential and Small Commercial Customers who elected the MBO, separate annual true-ups of all energy charges and credits, consistent with the provisions set forth under this Schedule, will be calculated by SCE for the applicable SCE charges and credits, as outlined above, and by the ESP, Community Choice Aggregator or Community Aggregator for the applicable ESP, Community Choice Aggregator or Community Aggregator charges and credits. Any unused Delivery Service and/or CRS energy credits shall not be carried forward to the start of a new Relevant Period; rather, the unused Delivery Service and/or CRS energy credits shall be zeroed out and a new Relevant Period will commence. Additionally, Special Condition 4.j may apply to Residential Customers. DA, CCA or CA Service Customers should look to their ESP, Community Choice Aggregator or Community Aggregator for the treatment of unused generation energy credits.
- iv. For DA, CCA or CA Service Customers, generation credits, if any, do not reduce the charges owed to SCE for energy supplied to such Customer, and Delivery Service and/or CRS credits, if any, do not reduce the charges owed to the ESP or Community Choice Aggregator/Community Aggregator for energy supplied to such Customer.
- v. ESP Charges: Where SCE provides metering and billing for a DA Customer, SCE may recover the incremental costs related to net energy metering and billing services from the Customer's ESP, as set forth in Schedule ESP-DSF.

SPECIAL CONDITIONS (continued)

4. Billing. (continued)

i. NSC Billing Provisions.

- i. To be eligible for NSC, a Customer must meet the definition of an Eligible Customer-Generator within PU Code Section 2827.1(a), including that its Generating Facility be intended primarily to offset part or all of the Customer's own electrical requirements. Generating Facilities that are sized larger than the Customer's electrical requirements are not eligible for NEM and, therefore, are not eligible for NSC.
- ii. Except as provided in Special Condition 4.i.iv below, Bundled Service Customers are eligible to receive NSC if, at the conclusion of the Relevant Period, the true-up process indicates that the Customer is a Net Surplus Generator, and provided the Customer affirmatively elected to receive NSC and submitted any necessary documentation prior to SCE processing the final bill of the Relevant Period. NSC is applied to Customers' future charges (i.e., Customer's SCE account) as an on-bill credit, unless the Customer elects to receive payment via check (Customers may only modify this election once a year, and must do so prior to the conclusion of the existing Relevant Period for the new election to occur in that Relevant Period). For Customers electing to receive NSC via check, the amount of the check will be reduced by any amount that the Customer owes to SCE before a check is issued to the Customer. After the on-bill credit or check is issued to the Customer, Net Surplus Energy is set to zero at the start of the next Relevant Period.
- iii. In order to be eligible to receive NSC from SCE, Bundled Service Customers with Generating Facilities sized greater than 1 MW must provide notice to SCE that the Customer self-certified its Generating Facility as a Qualifying Facility pursuant to the Public Utility Regulatory Policies Act of 1978 by properly completing and filing Federal Energy Regulatory Commission (FERC) Form No. 556 with the FERC and providing SCE with a copy of the certification.
- iv. DA, CCA or CA Service Customers, Customers electing to participate in NEM-A are not eligible to receive NSC from SCE. However, if an NEM-A aggregated account that is not a generating account is separated from the NEM-A arrangement, and subsequently qualifies for service under this Schedule, that account is eligible to receive NSC on a going-forward basis, provided it meets all other NEM-ST eligibility criteria; but NEM-A generating accounts are permanently ineligible to receive NSC from SCE.
- v. In order to receive the NSC RAA, Form 14-935 must additionally be executed and submitted to SCE at the end of each Relevant Period.

SPECIAL CONDITIONS (continued)

5. NEM Aggregation (NEM-A).

Pursuant to D.16-01-044, Customers served under this Schedule who have additional metered service accounts located on property where the Generating Facility is located and/or on property adjacent or contiguous to the property on which the Generating Facility is located, if those properties are all solely owned, leased, or rented by the Customer, may choose to have the electrical load (kWh) served by such meters aggregated for the purposes of determining if the Customer is a net consumer or a net producer of energy. For the purposes of NEM-A only, parcels that are divided by a street, highway, or public thoroughfare are considered contiguous, provided they are within an unbroken chain of otherwise contiguous parcels and are all solely owned, leased or rented by the Customer, as verified in Form 14-937. Customers are also eligible to participate in NEM-A where all meters in an NEM-A arrangement are located within an unbroken chain of contiguous parcels that are all solely owned, leased, or rented by the Customer. For example, if there are three parcels (A, B and C), all of which are solely owned, leased or rented by the Customer, where A contains the Generating Facility and abuts B, B abuts C, but A and C are separated by B, then the loads of all three parcels shall be eligible to participate in NEM-A. Refer to Diagram 1 (for illustrative purposes only). In addition, if there are five parcels (A, B, C, D and E) that form a cluster of contiguous parcels, where A contains the Generating Facility, and D and E are separated from A, B, and C by a street, highway or public thoroughfare, for the purposes of participating in NEM-A only, all five parcels are considered contiguous, provided they are otherwise contiguous and all solely owned, leased or rented by the Customer. Refer to Diagram 2 (for illustrative purposes only).

Diagram 1

Diagram 2

The Customer must provide SCE with a list of additional metered service accounts on Form 14-937 (subject to eligibility verification by SCE) that are to be included in the NEM-A arrangement, which consists of the account directly interconnected to and located on the same property as the Generating Facility (the generating account, which is also considered an aggregated account when allocated kWh) and all aggregated accounts. A Customer may have more than one NEM-A arrangement, but accounts may not be shared across multiple arrangements. Aggregated accounts may not have any other NEM Eligible Generators directly interconnected to them, but are permitted to have Non-NEM Eligible Generators directly interconnected to them. All accounts in an NEM-A arrangement must be (1) all Bundled Service accounts; or (2) all DA Service accounts served by the same ESP; or (3) all CCA or CA Service accounts served by the same Community Choice Aggregator or Community Aggregator.

Issued by
Caroline Choi
Senior Vice President

(To be inserted by Cal. PUC)

Date Filed Dec 13, 2018
Effective Jan 1, 2019
Resolution _____

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF

Sheet 22 (T)

(Continued)

SPECIAL CONDITIONS (continued)

5. NEM Aggregation (NEM-A). (continued)

A Customer may elect to modify the aggregated accounts included in an NEM-A arrangement, provided a minimum of 60-days' notice is provided to SCE prior to the change taking effect, and such change remains in effect for a minimum of 12 months and doesn't result in the Generating Facility being oversized compared to the electrical requirements of the NEM-A arrangement.

Customers electing to participate in NEM-Aggregation are required to pay all applicable charges, including energy, non-energy and NBCs, on a monthly basis in accordance with their OAT, pursuant to the provisions of Special Condition 4.b. All accounts in an NEM-A arrangement will be placed on the same billing cycle, and will be billed individually pursuant to the Rates section and Special Condition 4 of this Schedule. The electrical consumption (kWh) registered on each account's meter will be reduced, for purposes of billing monthly energy charges and credits as described in the Rates section, by a proportional allocation, at the 15-minute interval level, of the electricity generated by the Generating Facility that is exported to SCE's grid. The proportional allocation is determined per billing period based on the cumulative consumption of each aggregated account compared to the cumulative consumption of the NEM-A arrangement since the start of the Relevant Period, and the cumulative generation exported from the Generating Facility since the start of the Relevant Period. The Customer is required to designate one account in the NEM-A arrangement to receive any remaining kWh not allocated due to rounding after the proportional allocation methodology described above is completed. All accounts included in an NEM-A arrangement are ineligible to receive NSC from SCE. However, if an aggregated account that is not a generating account is separated from the NEM-A arrangement, and subsequently qualifies for service under this Schedule, that account is eligible to receive NSC on a going-forward basis, provided it meets all other NEM-ST eligibility criteria.

Aggregated accounts are eligible for the same demand response programs as other Customers served under this Schedule. All demand response programmatic elements (e.g., eligibility) and payments to aggregated accounts are based on the metered usage disregarding any contributions from kWh allocated to the aggregated accounts based on the proportional allocation methodology described above.

Customers electing to participate in NEM-A are not eligible to concurrently participate under the terms of Special Condition 7.a of this Schedule, as provided. Customers may dual participate under the terms of Special Condition 7.b of this Schedule, provided there is only one NEM-ST Generating Facility behind the same meter as the Non-NEM Eligible Generator(s).

Existing Customers served under this Schedule who elect to participate in NEM-A who also have existing executed NEM-ST Interconnection Agreements and who are making no modifications to their Generating Facilities other than electing NEM-A will not be required to complete new Interconnection Agreements, nor conduct new interconnection studies.

Date Filed Dec 13, 2018Effective Jan 1, 2019

Resolution _____

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF

Sheet 23

(Continued)

SPECIAL CONDITIONS (continued)

5. NEM Aggregation (NEM-A). (continued)

In lieu of interconnecting the Generating Facility to an existing metered service account, Customers electing to participate in NEM-A may request an additional service from SCE for the purposes of interconnecting the Generating Facility. This additional service and associated metering must be located on the same property as the Generating Facility at a location approved by SCE and must not result in adverse impacts to SCE's electrical system, as determined by SCE. No additional load other than incidental load related to the inverters and support of the Generating Facility may be registered on this additional metered service. This additional service and associated metering are provided under the Added Facilities provisions of SCE's Electric Rule 2.H and are at the Customer's expense. The new service will be billed monthly for any charges of its OAT not already provided for under Added Facilities.

6. NEM-Paired Storage Systems.

Pursuant to D.16-04-020, D.16-01-044 and D.14-05-033, where a Customer utilizes a NEM-Paired Storage System (as defined in Special Condition 1.g), the applicable provisions of this Special Condition 6 shall apply. Additionally, where this Special Condition conflicts with any other Special Condition within this Schedule, the provisions contained in this Special Condition shall prevail. Customers with NEM-Paired Storage Systems who take service under this Special Condition are exempt from Supplemental Review fees, Detailed Study costs, and the costs associated with any Distribution or Network upgrades triggered by the Interconnection Request, provided the Renewable Generator is sized 1 MW or smaller.¹ Customers with NEM-Paired Storage Systems who take service under this Special Condition are exempt from Standby charges.

a. Sizing Requirements. The size of the Integrated or Directly Connected Energy Storage Device is determined by the inverter alternating current (AC) nameplate rating.

i. Small NEM-Paired Storage System: There are no additional sizing requirements for the Integrated or Directly Connected Energy Storage Device(s) relative to the size of the Renewable Generator.

ii. Large NEM-Paired Storage System: The maximum aggregate output capacity of the Integrated or Directly Connected Energy Storage Device(s) can be no greater than 150 percent of the Renewable Generator's maximum output capacity. For example, if the maximum output capacity of the Renewable Generator is 15 kW, the maximum aggregate output capacity of the Integrated or Directly Connected Energy Storage Device(s) can be no greater than 22.5 kW. Pursuant to D.20-06-017, the maximum aggregate output capacity limitation shall not apply for a period of three years beginning August 16, 2020 and ending August 15, 2023.

(N)
|
(N)

iii. Direct Current-Coupled NEM-Paired Storage System: The system size shall be determined as the lesser of the shared inverter's nameplate capacity and the storage device's maximum continuous output rating. Continuous output of a storage device is determined by referring to the device's technical specifications sheets. If that metric is not included, the inverter nameplate will be used.

ⁱ In the event the Integrated or Directly Connected Energy Storage Device is added subsequent to the date that the Renewable Generator received Permission to Operate, the same interconnection cost categories applicable to the Renewable Generator shall apply to the Integrated or Directly Connected Energy Storage Device. Customers defined in Special Conditions 1.a.ii and 1.a.iii do not receive these cost exemptions.

6. NEM-Paired Storage Systems. (continued)

b. Metering Requirements.

i. Small NEM-Paired Storage Systems.

A. Solar Photovoltaic (PV): Where the Renewable Generator(s) utilizes solar PV only, an estimation methodology, as described in Section 6.c below, shall apply in lieu of additional metering. As an alternative option, at the start of a new Relevant Period, a Customer may elect to adhere to the metering and billing requirements applicable to Large NEM-Paired Storage Systems. Customers who elect this option shall not be subject to the estimation methodology so long as they adhere to the necessary metering requirements. The cost of the metering required under this option shall not exceed \$600, unless Complex Metering, as described below, is required. For Small NEM-Paired Storage Systems that are unable to meet the metering requirements of Large NEM-Paired Storage Systems, the estimation methodology shall apply. Where the Small NEM-Paired Storage System is combined in a Multiple Tariff Generating Facility pursuant to Special Condition 7 of this Schedule and the Renewable Generator(s) utilizes NGOM, the billing provisions of Special Condition 7 will apply and not the estimation methodology described in Section 6.c below.

B. Non-Solar PV: Where the Renewable Generator(s) utilizes a technology other than only solar PV, the Customer must adhere to the metering and billing requirements applicable to Large NEM-Paired Storage Systems. The cost of the metering required under this provision shall not exceed \$600, unless Complex Metering, as described below, is required.

ii. Large NEM-Paired Storage Systems.

A. The Customer must adhere to the metering and billing requirements contained within Special Condition 7.b of this Schedule or use power control-based options described below. For metering and billing purposes only, the Integrated or Directly Connected Energy Storage Device is treated as the Non-NEM Eligible Generator when applying the provisions of Special Condition 7.b. The cost of the metering required under this provision shall not exceed \$600, unless Complex Metering, as described below, is required. Generating Facilities that are unable to meet the metering requirements of Special Condition 7.b are ineligible for service under this Schedule as a NEM-Paired Storage System. (T)
(T)

B. Power control-based firmware or software options shall be certified to a national standard. Power control-based options include using equipment that prevents electricity to be exported from the storage device to the grid, and using equipment that prevents electricity imported from the grid to charge the storage device. Open loop response time outlined in the control technical specification documentation must not be greater than 10 seconds. (N)

SPECIAL CONDITIONS (continued)

6. NEM-Paired Storage Systems. (continued)

- c. Estimation Methodology for Small NEM-Paired Storage Systems (where storage is < or = 10 kW rated capacity).

Small NEM-Paired Storage billing uses an “estimation method” that caps maximum allowable NEM bill credits based on solar photovoltaic (PV) generation estimates. The approach used to develop the generation estimates applied to NEM-Paired Storage billing is as follows:

- i. SCE has established a maximum cap for NEM-eligible exports by California Energy Commission (CEC) Climate Zone for each calendar month based on standardized monthly estimates that are scaled for a given NEM customer based on the size of the customer’s solar system.
- ii. To develop the generation estimates, SCE used the California Solar Initiative Expected Performance-Based Buydown (CSI EPBB) calculator to produce a single, scalable, production factor table. This table captures the estimated amount of kWh generated per installed kW of solar PV capacity (kWh/kW production factor) for each calendar month and each of the nine CEC Climate Zones in SCE’s service area. Climate Zones are referred to as Baseline Regions in SCE’s tariffs.
- iii. For a given NEM-Paired Storage customer, the NEM-eligible cap on exports is calculated by multiplying the Customer-appropriate production factor for a given month and Climate Zone (based on billing period and location) and scaling the kWh by the customer’s PV installed capacity (in kW).
- iv. The solar PV configuration assumptions used in the CSI EPBB calculator to generate the scalable production factor table are the following:
 - Tilt: If Optimal Tilt as defined by the EPBB Calculator was <20 degrees for a given Climate Zone, then 20 degree tilt was used, otherwise Optimal Tilt as defined by the EPBB Calculator was used
 - Azimuth: 180 degrees
 - For each climate zone, identified the three zip codes with the most residential PV installations; chose the zip code with the highest generation estimate per the EPBB calculator
 - Panel: SunPower.SPR-327NE-WHT-D
 - Inverter: SPR-X20-327-C-AC (240V) or any other micro-inverter designed to match the panels.
 - As a reference, inverter efficiency is 96%.
 - Mounting Method: > 6 “ average standoff (EPBB default)
 - Shade: Minimal (EPBB default)

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF
(Continued)

Sheet 26 (T)

SPECIAL CONDITIONS (continued)

6. NEM-Paired Storage Systems. (continued)

c. Estimation Methodology for Small NEM-Paired Storage Systems...(Continued)

- v. Once implemented in SCE's billing system, Customers subject to this provision shall have a maximum monthly generation output cap established for each calendar month based on the "production factor table."
- vi. In all cases, the first day of the Customer's Billing Period determines which calendar month cap is used for that Billing Period. For example, if the Customer's Billing Period starts on January 15 and ends on February 15, the January cap is used.
- vii. Any export (E_F) registered on SCE's revenue meter(s) that exceeds the monthly cap is not eligible for credit as outlined in the Rates section above and is forfeited by the Customer. For example, if a Customer's monthly cap amount for January is 500 kWh and the Customer exports 525 kWh for that monthly Billing Period, 25 kWh are not eligible for NEM credit and are forfeited. The forfeited kWh are assumed to have occurred during the Customer's highest priced TOU period, regardless of when the energy was actually exported. If the amount of forfeited kWh for a Billing Period exceeds the amount of E_F registered during the Customer's highest priced TOU period, the remaining kWh subject to forfeit are then removed from the next highest priced TOU period and so on until all kWh subject to forfeit are accounted for. For example, if a Customer has a July monthly cap amount of 700 kWh and exports 1,000 kWh, 300 kWh must be forfeited. If the Customer exported 200 kWh in the Summer On-peak period and 800 kWh in the Summer Mid-Peak period, 200 kWh of the forfeited 300 kWh are removed from the Summer On-Peak period (so the Customer's E_F during the Summer On-Peak period is billed at zero); the remaining 100 kWh of the forfeited 300 kWh are removed from the Summer Mid-Peak period (so the Customer's E_F during the Summer Mid-Peak period is billed at 700 kWh). Forfeited kWh are not eligible for NSC.

- d. Interconnection and Safety Requirements. NEM-Paired Storage Systems must meet the technical and safety standards required for interconnection under Rule 21. This includes evaluation under the same technical interconnection standards currently applied to Generating Facilities that are not paired with energy storage devices.
- e. NEM Transition Provisions. NEM-Paired Storage Systems are subject to the transition provisions included in Special Condition 8 below. In regards to Special Condition 8.b, NEM-Paired Storage Systems shall remain eligible for service under this Schedule provided the capacity of the Integrated or Directly Connected Energy Storage Device(s) is not increased by more than 10 percent of its original maximum aggregate output capacity.

Resolution _____

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF

Sheet 27 (T)

(Continued)

SPECIAL CONDITIONS (continued)

7. Customers with a Multiple Tariff Generating Facility (NEM-MT).

Where a Customer utilizes a Multiple Tariff Generating Facility (as defined in Special Condition 1), the applicable provisions of this Special Condition 7 shall apply. Additionally, where this Special Condition conflicts with any other Special Condition contained herein, the provisions contained in this Special Condition shall prevail. Customers served pursuant to this Special Condition are responsible for paying NBCs, as defined in the Rates section above, on each kWh of electricity that is consumed from the grid net of exports (i.e., net consumption) in each metered interval as recorded on the TOU revenue meter at the Point of Common Coupling (PCC). Multiple Tariff Generating Facilities consisting of generating facilities served under Schedules FC-NEM or BG-NEM that receive service pursuant to Special Condition 7.a below are not eligible to concurrently participate in an NEM-A arrangement pursuant to Special Condition 5 above. For purposes of tariff administration, other metering configurations than those outlined below may be allowed at SCE's discretion.

- a. A Customer utilizing a Multiple Tariff Generating Facility consisting of all NEM Eligible Generating Facilities, with at least one NEM-ST Generating Facility, shall adhere to the following:
- i. Where a Customer chooses not to install separate Net Generation Output Metering (NGOM) on each group of NEM Eligible Generators (as defined in Special Condition 1 above), all energy exported to SCE's system from any group of NEM Eligible Generators shall receive only the generation component energy credits per the Customer's OAT. The NEM credits will not include any portion of the Delivery Service energy rate components, or any other component of the Customer's OAT, unless separate NGOMs are installed on each group of NEM Eligible Generators. A Customer with a Multiple Tariff Generating Facility that includes a Renewable Electrical Generating Facility served under this Schedule shall be responsible for all nonbypassable charges as specified herein.
 - ii. Where a Customer chooses to install NGOM on a group of NEM Eligible Generators, the NGOM must conform to the requirements set forth in SCE's Electric Rule 21, Section J. The total energy exported to SCE's system, as determined at the PCC meter (SCE billing meter) will be allocated to each group based on its NGOM reading to the total of all NGOM readings. For example, if the SCE billing meter registered 900 kWh of energy exported to SCE's system, and during that same time period a group of NEM Eligible Generators (group 1) had an NGOM registration of 2,000 kWh, while another group of NEM Eligible Generators (group 2) had an NGOM registration of 4,000 kWh, then group 1 would be allocated 300 kWh and group 2 would be allocated 600 kWh, for NEM crediting purpose.

Schedule NEM-ST
NET ENERGY METERING
SUCCESSOR TARIFF

Sheet 28 (T)

(Continued)

SPECIAL CONDITIONS (continued)

7. Customers with a Multiple Tariff Generating Facility (NEM-MT). (continued)

- b. A Customer with a Multiple Tariff Generating Facility consisting of one or more NEM Eligible Generators served under this Schedule and one or more Non-NEM Eligible Generators (defined in Special Condition 1 above) shall adhere to the following:
- i. Where all Non-NEM Eligible Generators have a non-export relay (reverse or minimum power protection), per SCE's Electric Rule 21, Section G.1.i, Screen 2 (option 1 or 2), thus assuring no export to SCE's system from any Non-NEM Eligible Generator, the Customer is not required to install NGOM on their NEM Eligible Generator(s). However, where a Customer's Multiple Tariff Generating Facility includes more than one group of NEM Eligible Generators, NGOM in accordance with Special Condition 7.a.ii above must be installed to determine which percentage of the measured excess energy exported to SCE's system will receive NEM energy credits at the bundled rate (Delivery Service plus generation) and which percentage of the measured excess energy exported to SCE's system will receive NEM energy credits at the generation rate component only. Otherwise, unallocated NEM-eligible excess energy exported to SCE's system will be subject to the provisions of Special Condition 7.a.i above.
 - ii. Where one or more of the Customer's Non-NEM Eligible Generators does not have a non-export relay, and where each group of the NEM Eligible Generators does not have NGOM installed in accordance with Special Condition 7.a.ii above, NEM credits will only be applicable on the NEM Eligible Generators that do have NGOM. Monthly valued NEM credits for each of the NEM-Eligible Generator groups with NGOM will be the lesser of (A) its proportion of the NGOM reading to the total of all NEM Eligible Generators' NGOM readings multiplied at the PCC, or (N) its NGOM reading.
 - iii. The value of energy credits will be applied consistent with the appropriate NEM tariff as follows, including the requirement that Customers with a Multiple Tariff Generating Facility that includes a Renewable Electrical Generating Facility served under this Schedule shall be responsible for all nonbypassable charges as specified herein:
 - A. First, apply BG-NEM and/or FC-NEM generation rate component credits (if any) to generation rate component charges on any aggregated account served by the Generating Facility.
 - B. Second, apply any remaining BG-NEM and/or FC-NEM credits from (A) above to the remainder of generation rate component charges on the account served by the Generating Facility.
 - C. Third, apply NEM-ST energy (generation and delivery service rate component) credits to any remaining energy charges of the accounts that are served by the Generating Facility.
 - D. Fourth, apply NEM energy (generation and delivery service rate component) credits to any remaining energy charges of the accounts that are served by the Generating Facility.

Sheet 29

(Continued)

SPECIAL CONDITIONS (continued)

8. NEM-ST Grandfathering Provisions. This Special Condition is applicable to all Customers receiving service on this Schedule and to all Customers who have submitted all documentation necessary to receive service on this Schedule.

a. 20-Year Transition Period.

Pursuant to D.16-01-044, Customers who are receiving service on this Schedule, or who have submitted all documentation necessary to receive service on this Schedule, are eligible to continue receiving service on this Schedule for a period of 20 years from the original year in which their Generating Facility was interconnected to SCE's grid, indicated by and measured from the date on which the Customer originally received permission to operate (PTO) the Generating Facility from SCE and ending at the conclusion of the Customer's applicable Relevant Period that ends immediately on or after the 20th anniversary of the original PTO date. For example, if a Customer initially received PTO on April 1, 2018, the Customer is eligible to continue receiving service on this Schedule through the conclusion of the Relevant Period ending immediately on or after March 31, 2038. Customers served on Schedule NEM who elect to make a one-time switch to this Schedule prior to the conclusion of their Schedule NEM 20-year transition period can continue service under this Schedule from the date of their original Schedule NEM PTO date; these Customers may not restart their 20-year transition period by transitioning early to this Schedule. Customers electing to switch to this Schedule prior to the conclusion of their Schedule NEM 20-year transition period permanently forfeit any of their Generating Facility's remaining transition period eligibility on Schedule NEM and may not later change back to receiving service under Schedule NEM.

b. Modifications.

Generating Facilities eligible for the 20-year transition period outlined above that are modified and/or repaired shall remain eligible for the remainder of their 20-year transition period as long as the modifications and/or repairs do not increase the Generating Facility by more than the greater of (1) 10 percent of the Generating Facility's nameplate rating capacity, as established when the Generating Facility was originally interconnected, or (2) 1 kW; and provided the modifications and/or repairs do not result in the Generating Facility exceeding the Customer's annual onsite load. Customers making modifications and/or additions to their Generating Facilities that exceed the 10 percent or 1 kW limit referenced above have the option of either metering the additions and/or modifications separately under another eligible tariff, or having the entire Generating Facility served under another eligible tariff, subject to the terms and conditions contained therein. SPECIAL CONDITIONS (continued)

8. NEM-ST Grandfathering Provisions. (continued)

c. Transferability.

Generating Facilities eligible for the 20-year transition period shall not lose their eligibility if transferred to a new owner, operator, or SCE account, provided the Generating Facility remains at its original location.ⁱ The transfer of an existing Generating Facility to a new location is considered a new installation requiring a new Interconnection Agreement that is subject to the applicable tariffs in place at the time the new Interconnection Request is completed.

d. Integrated or Directly Connected Energy Storage Devices.

Integrated or Directly Connected Energy Storage Devices shall be treated in the same way, and be subject to the same transition period, as the Renewable Generator to which they are connected.

ⁱ The Generating Facility must at all times serve an Eligible Customer-Generator as defined in Special Condition 1.a above.

(Continued)

SPECIAL CONDITIONS (continued)

9. Natural Disaster (Disaster): This Special Condition is applicable to NEM-ST Grandfathering Eligible Customer-Generators impacted by an event in affected area declared in a state of emergencyⁱ and included in either the California Governor's Proclamation of a State of Emergency or the President of the United States'. Disaster impacted customers will retain their original permission to operate (PTO) date. The original 20-Year Transition Period will remain in effect under this Schedule as defined in Special Condition 8.

Disaster impacted Eligible Customer-Generators must:

- a. Submit a new Interconnection Request with a replacement Renewable Electrical Generating Facility sized to generate no more than 12 months of historic, or estimated, usage (kWh), and
- b. Submit proof of destruction of the Renewable Electrical Generating Facility, if requested by SCE.
- c. If the Renewable Electrical Generating Facility needs to be replaced due to a Disaster, SCE will true-up all charges and credits pursuant to Special Condition 4.e up to the date of the Disaster, unless the Eligible Customer-Generator requests that SCE continue to bill through the end of the Relevant Period.
- d. The period from destruction of the Renewable Electrical Generating Facility to PTO of the replacement Renewable Electrical Generating Facility must not exceed two years, unless reasonable documentation acceptable to SCE is provided showing that a new Interconnection Request has been submitted. The new Interconnection Request must be completed by the same Customer of Record who was taking service under Schedule NEM-ST prior to the Disaster. If the Renewable Electrical Generating Facility is not replaced by the Customer, but the property is sold to a new Customer after the destruction of the Renewable Electrical Generating Facility, this provision does not extend to the new Customer of Record or New Party In.
- e. Customers impacted by Disaster who meet the requirements included in this Special Condition and whose replacement system is sized no greater than 1 megawatt (MW) are exempt from the interconnection application fee when submitting a new Interconnection Request.

Chronology		
NST-123260		
12/13/2019	Application submitted	Exhibit #1 SLD Returned on 12/16/19
12/16/2019	Application reviewed and returned for corrections	Inverter model #s on the application and SLD did not match
12/16/2019	Revised application resubmitted	Exhibit #2 SLD Returned on 12/30/19
12/30/2019	Application reviewed and returned for corrections	A deficiency on the original return notice was missed. New noticed advised, <i>"The capacity for NEM Renewable Electrical Generating Facility (REGF) is 7.6 kW; the aggregate capacity for the energy storage is 15 kW. Please note, in order to meet NEM Paired Storage program eligibility, the maximum output power of the energy storage cannot be larger than 150% of the REGF capacity."</i>
1/13/2020	Revised application resubmitted	Exhibit #3 SLD
1/14/2020	Revised application resubmitted	
1/24/2020	SLD Submitted	Exhibit #4 SLD Returned on 1/27/19
1/27/2020	Application reviewed and returned for corrections	Panel model #s on the application and SLD does not match.
1/27/2020	Revised application resubmitted	Exhibit #5 SLD Returned on 2/6/19
2/6/2020	Application reviewed and returned for corrections	1. Panel model #s on the application and SLD still did not match. 2. The batteries were removed from the application but still showed on the SLD
2/6/2020	Revised application resubmitted	
2/20/2020	Application reviewed and deemed valid	
2/20/2020	Permission to Operate (PTO) Issued	Exhibit #6 contains final documents
1/4/2021	Project withdrawn	Expansion application granted PTO under NST-123260.
Notes		
1. This project started with a request for 15kW battery storage. Applicant was advised that to be eligible for NEM, the energy storage could not be greater than 150% of the solar system. 2. A revised application and SLD was submitted on 2/6/20 without the battery storage. 3. In July if 2020, CPUC approved a decision to remove the 150% rule. 4. An expansion application was received on 12/03/20 to add battery storage to the existing solar system. NST-123260 was withdrawn when the new interconnection request was given PTO.		

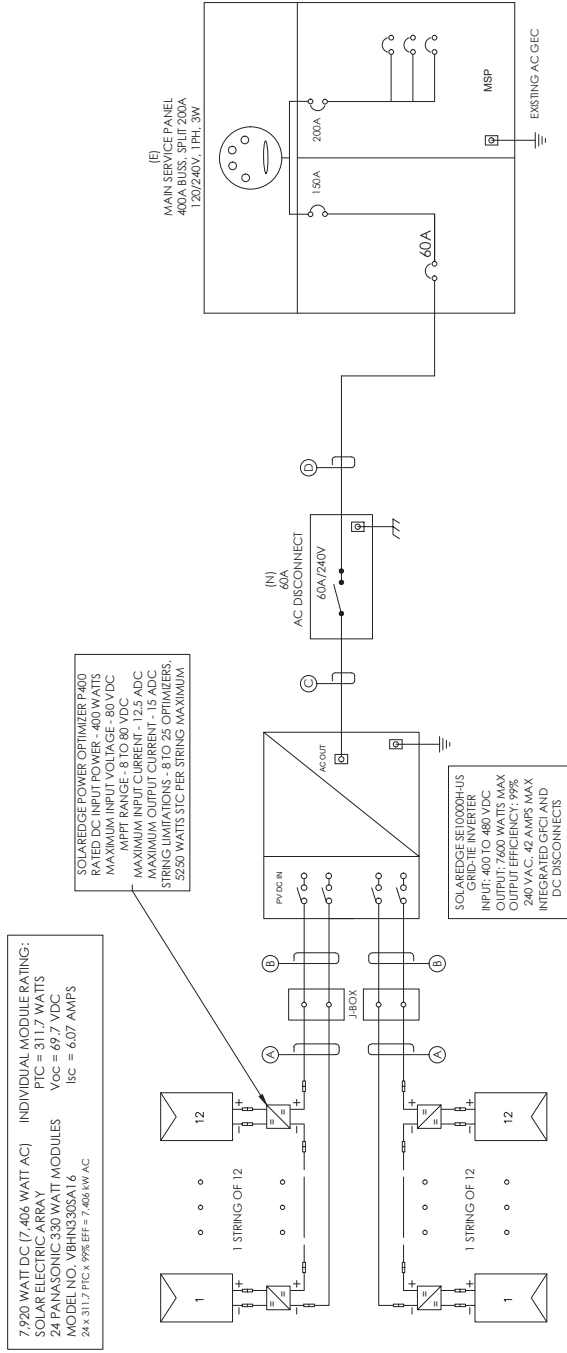

NST-173600		
12/3/2020	Application Submitted.	
12/8/2020	Application reviewed and Deemed valid. Sent to Field Engineering (FE) for technical review.	
12/15/2020	FE completed the review and return to NEMIC for final review.	
12/18/2021	NEMIC reviewed and returned for corrections.	A deficiency on the original review was missed. <i>The panel model# in the Application does not match the SLD.</i>
12/18/2020	Application re-submitted.	
12/21/2020	Application reviewed and Deemed valid. Sent to Field Engineering (FE) for technical review.	
12/30/2020	FE completed the review and return to NEMIC for final review.	
1/4/2021	PTO issued.	<i>Exhibit #7 Final Documents</i>

 2. PROVIDE WARNING SIGN PER 690.17 BEADING "WARNING-ELECTRIC SHOCK HAZARD - DO NOT TOUCH TERMINALS-TERMINALS ON BOTH THE LINE AND THE LOAD SIDES MAY BE ENERGIZED IN THE OFF POSITION"
 3. PROVIDE WARNING SIGN PER 690.54 AT THE PV AC DISCONNECTING MEANS; 1. INVERTER OUTPUT CURRENT 2. INVERTER OUTPUT VOLTAGE
 4. LABEL PANEL "PHOTOVOLTAIC POWER SOURCE CONNECTED" PER NEC 705-10, AND IDENTIFY BACKED BREAKERS PER NEC 690.44(b) 7. INDIVIDUAL INVERTERS ARE GROUNDED THROUGH THE MANUFACTURERS NPT TESTED AND CERTIFIED AC CABLE.
 5. ALL EQUIPMENT SHALL BE PROTECTED FROM PHYSICAL DAMAGE.
 6. ALL LIVE PARTS IN SYSTEM, INCLUDING FUSES ARE NOT ACCESSIBLE TO ANYONE OTHER THAN QUALIFIED PERSONS.
 7. ALL PV SYSTEM EQUIPMENT SHALL BE LISTED BY A RECOGNIZED TESTING AGENCY.
 8. ALL EXTERIOR WIRING MATERIAL SHALL BE SUITABLE FOR A SUN EXPOSURE AND WET LOCATIONS.
 9. REMOVAL OF THE INVERTER SHALL NOT DISCONNECT THE BONDING CONNECTION BETWEEN THE GEC AND/OR OUTPUT CIRCUIT CONDUCTOR.
 10. CONNECT THE UTILITY WIRES TO THE LINE SIDE OF AC DISCONNECT WHEN INSTALLED.
 11. ELECTRICAL INSTALLATION IN ACCORDANCE WITH 2016 CALIFORNIA ELECTRIC CODE.
 12. BACKED BREAKER SHALL BE LOCATED AT THE BOTTOM OF THE SERVICE PANEL OR AT THE END OF THE CIRCUIT.

PERMISSION TO OPERATE
Self-Generation Facility Interconnected to SCE's Electric Grid

2/20/2020

Patty Nesbit
46471 Manitou Dr
Indian Wells, CA 92210

Dear Customer:

Congratulations on completing the installation of your self-generation facility. Your application for interconnection has been approved and Permission to Operate your system has been granted.

Project ID	Generating Facility Address	Energy Storage Capacity (kW - if applicable)	CEC-AC Nameplate Rating (kW)
NST-123260	46471 Manitou Dr, Indian Wells CA 92210	0	7.406

Service under the NEM Rate Schedule will become effective on your next regularly scheduled meter read date, if proper metering is in place, or the next regularly scheduled meter read date following installation of the required bi-directional or interval data meter. Additionally, NEM 2.0 customers are required to be on a Time-of-Use (TOU) Rate Schedule. Residential customers will be defaulted to Schedule TOU-D-4-9PM if they are not already on a TOU rate. Customers may contact SCE to select another TOU rate for which they are eligible or view additional information [here](#). Customers shall not be allowed to make an additional change in rate until 12 months of service has been provided under the elected rate, unless otherwise specified in that rate schedule.

If you've elected to participate in Net Surplus Compensation (NSC) when you applied for interconnection using Form 14-957, any Net Surplus Generation will be paid as an on-bill credit. NSC is equal to the [Net Surplus Compensation Rate](#) (NSCR), which is the market-base rate, multiplied by your net surplus energy. Any credit can be applied to energy or non-energy charges. Alternatively, you may elect to receive a check through the mail for the value (dollar amount) of the net surplus energy, excluding any amount owed to us for other charges on your electric bill, by calling us at the number listed below.

Your "Relevant Period" begins on the date that you receive your Permission to Operate (PTO) and remains your anniversary date for subsequent years. Your first Relevant Period must be a minimum of 365 days in length. When the first NEM statement is shorter than the typical billing range of 27 to 33 days, the Relevant Period will reconcile on a 13th month (to complete the minimum number of days). You may elect to change the start date of your Relevant Period one time only by completing and returning an [NEM One-Time Relevant Period Change Request Form](#) (14-936).

If your generating facility is a NEM Aggregation (NEM-A) project, please review the [Welcome Guide](#) which will provide you with details on how the billing allocation method works for all accounts.

Below are some resources to help understand your new energy bill on Net Energy Metering (NEM).

- [Read](#) how you may have "energy charges" accumulating monthly which can be paid monthly or at the end of your 12 month settlement bill and understand Non-Bypassable Charges (NBCS) or
- [View](#) a short video about getting started with NEM or
- Sign up for the NEM monthly billing option, by calling SCE's Customer Call Center NEM Bills at (866) 701-7868 for residential customers or (866) 701-7869 for commercial customers or
- Read our [NEM FAQs](#)

For questions related to Net Energy Metering, please contact SCE's Customer Service Department at (800) 655-4555.

Sincerely,

Eduyng Castano
Senior Manager of Customer Generation Programs
Southern California Edison

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

APPLICABILITY

This Net Energy Metering (NEM) Generating Facility Interconnection Application (Application) is used to request the interconnection of a Renewable Electrical Generating Facility (Generating Facility) to Southern California Edison's (SCE) Distribution System over which the California Public Utilities Commission (CPUC or Commission) has jurisdiction for the purposes of receiving service under SCE's NEM tariffs, including rate schedules NEM and NEM-ST (including NEM Aggregation (NEM-A) and NEM-MT¹), MASH-VNM and MASH-VNM-ST, NEM-V and NEM-V-ST, FC-NEM, and SOMAH-VNM to offset part or all of the Customer's own electrical requirements. (T)

This document is solely an application. It does not authorize you to operate your Generating Facility in parallel with SCE's electric system. To ensure safety and grid reliability, you must not operate your Generating Facility in parallel with the Distribution System until SCE provides you with written Permission to Operate (PTO). Unauthorized Parallel Operation may be dangerous and may result in injury to persons and/or may cause damage to equipment and/or property for which the Customer may be liable.

GUIDELINES AND STEPS FOR INTERCONNECTION

This Application, along with any applicable payments, must be completed online and include all of the additional information indicated in the NEM Interconnection Handbook (see also Section 10 below) to initiate SCE's interconnection review of the proposed Generating Facility. Please refer to SCE's [Rule 21](#), the [NEM Interconnection Handbook](#) and SCE's [Electric Service Requirements](#) (ESRs) for more information regarding the interconnection of an NEM Generating Facility to SCE's Distribution System. **PURSUANT TO CPUC DECISION (D.)14-11-001, CERTAIN DATA PROVIDED ON THIS APPLICATION WILL BE TRANSFERRED TO A THIRD-PARTY FOR PROCESSING AND POSTING ON THE CALIFORNIA SOLAR STATISTICS WEBSITE. A LIST OF THE DATA THAT WILL BE SHARED CAN BE FOUND IN APPENDIX A OF D.14-11-001.** Applications submitted with blank fields (as applicable) will be deemed incomplete and will be returned to the main project contact for completion. The main project contact is also responsible for updating the Application should the information submitted change between system design and installation.

This Application must be accompanied by a Single Line Diagram (SLD) of the proposed system showing the Generating Facility components and the electrical path from the Generating Facility to SCE's meter. The SLD must clearly identify the point of interconnection (a sample SLD is available at <http://www.sce.com/nem>). Additional documentation may be required as outlined in Section 10 below. **A signed Interconnection Agreement and a copy of the final electrical inspection approval issued by the local jurisdictional authority are required before SCE will issue PTO, but may be submitted separately.** An Application Checklist and all required forms are available at <http://www.sce.com/nem>.

SCE normally provides PTO within 30 working days of receiving all necessary information, including but not limited to a completed Application, SLD, signed Interconnection Agreement and a copy of the final electrical inspection approval issued by the local jurisdictional authority. SCE will notify the Customer of Record (COR) if PTO cannot be issued within 30 working days of receiving all necessary information and will provide an estimate of the date that PTO is likely to be issued.

☐ **Please check this box to indicate acknowledgment of the information provided above.**

¹ For NEM-MT interconnection requests seeking to interconnect a non-NEM generator behind the same SCE revenue meter / Point of Common Coupling as an existing NEM generator, Application Form 14-732 should be used in lieu of this Application.

- ☐ **Please check here if the Contractor is the Main Project Contact for this Application**
(Do not check here if the Service Account holder is the main project contact – see Section 1.A above)

C. Preparer Information *(if different from Section 1.B above)*

Please indicate who prepared and submitted this Application:

Brian Davidson	
Preparer Name, Title	Preparer Company (if applicable)

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

SECTION 2 – Application Type

A. This Application is for:

New NEM - Existing SCE Meter

B. Please indicate the NEM program under which you intend to participate:

NEM-ST

C. Please indicate the Electric Rate Schedule under which the Service Account listed in Section 1.A above receives service (prior to NEM) on or will receive service on (for new accounts):

(e.g., Schedule D "Domestic," TOU-GS-1)

Other

D. Will an Electric Vehicle (EV) Charger be installed at the same location (i.e., service account address) as the Generating Facility:

No

How many EVs are charged or will be charged by the EV Charger(s)?

SECTION 3 – Rebate Information

This Application is NOT an application for any incentive and/or rebate program. Incentives or rebates must be applied for separately with the appropriate agency – for example, see <http://www.energy.ca.gov> or <http://www.cpuc.ca.gov>.

A. Are you participating in a California rebate program related to the installation of the Generating Facility?

No

If yes, please provide the following information:

i. Rebate Program:

ii. Rebate Amount:

\$

iii. SASH Project No.³

(if applicable)

iv. SOMAH-VNM Reservation No.

(if applicable)

(T)

³NEM-ST customers participating in the Single-family Affordable Solar Homes (SASH) Program are exempt from any interconnection application fees, provided the Generating Facility is sized 1 MW or smaller. Participation in the SASH Program, along with the Customer's corresponding unique SASH Project Number, must be indicated in this section for those Customers to receive the NEM-ST interconnection application fee exemption.

SECTION 4 – Ownership, Pricing and Financing

A. Please indicate if the Generating Facility is / will be owned by a third party?

(i.e., owned by someone other than the Service Account holder listed in Section 1.A above)

No (SCE customer-owned)

**NET ENERGY METERING (NEM)
GENERATING FACILITY INTERCONNECTION
APPLICATION**

B. For Customer-Owned Generating Facilities, please indicate the following:	
i. Purchase Price: <i>(indicate the system cost paid by the Customer)</i>	\$ 24000.00
ii. Was Property Assessed Clean Energy (PACE) financing used?	
No	
C. For Third-Party-Owned Generating Facilities, please indicate the following:	
i. Claimed Federal Investment Tax Credit (ITC) Cost Basis:	\$
ii. Name of Developer: <i>(at the time of sale)</i>	
iii. Contract Type: <i>(e.g., PPA, lease, pre-paid lease, other)</i>	

SECTION 5 – Net Surplus Compensation (NSC) Elections

Please indicate if the Customer elects to participate in the NSC program and receive compensation for Net Surplus Energy, if any, that may be generated during the Customer's 12-month Relevant Period.

(This option is only available to eligible Bundled Service Customers taking service on Schedules NEM, NEM-ST, MASH-VNM, MASH-VNM-ST, NEM-V, NEM-V-ST or SOMAH-VNM.)

(T)

Yes (for less than or equal to 1 MW Generating Facilities)

- ☐ **Yes (for ≤1 MW Generating Facilities)** – The Customer is interested in receiving NSC and certifies under the penalty of perjury that the Generating Facility is a Qualifying Facility pursuant to the Public Utility Regulatory Policies Act of 1978 that is exempt from certification filing at the Federal Energy Regulatory Commission (FERC); or,
- ☐ **Yes (for >1 MW Generating Facilities)** – The Customer is interested in receiving NSC and certifies under the penalty of perjury that the Generating Facility is a Qualifying Facility pursuant to the Public Utility Regulatory Policies Act of 1978 that has been self-certified as a Qualifying Facility with the FERC by the proper completion and filing of FERC Form No. 556, *Certification of Qualifying Facility (QF) Status for a Small Power Production or Cogeneration Facility*. A copy of the completed FERC Form No. 556 must be sent to SCE.
- ☐ **No** – The Customer is not interesting in participating in the NSC program and elects not to receive NSC.

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

Note: Customers electing to participate in the NSC program will receive any applicable NSC as an on-bill credit at the end of the Customer's Relevant Period. Customers may elect to receive NSC via a check instead in accordance with the provisions of the Customer's applicable NEM rate schedule.

Note: To receive compensation for Renewable Energy Credits (RECs) associated with the Customer's Net Surplus Energy, Form 14-935 must additionally be completed and submitted to SCE.

Section 6 – Cost Envelope Option (CEO) Election for Upgrades

Please indicate below if the Customer elects to participate in the CEO pursuant to Section F.7 of Rule 21 for the costs associated with any applicable Interconnection Facilities and/or Distribution Upgrades.

(The CEO is only available to customers with Interconnection Requests processed under the Fast Track Process or Independent Study Process. Customers electing this option may be subject to a \$2,500 deposit, as outlined in Section F.7 of Rule 21.)

No

Yes – Customers electing the CEO must provide all of the following additional information as part of this Interconnection Request in the manner specified by SCE:

A. Final location of the Point of Common Coupling (PCC) (Point of Change of Ownership): *[provide a description of the physical location of the Point of Common Coupling and indicate on the site drawing provided under Section 6.E below]*

B. Final location of the Point of Interconnection (POI): *[provide a description of the physical location of the Point of Interconnection and indicate on the site drawing provided under Section 6.E below]*

C. Confirmation of service voltage:

D. Confirmation that technical data provided in the Interconnection Request is accurate, including equipment type and manufacturer:

E. A site drawing on a scale of 1:30 or less, which shows the final location of the PCC, POI, and final location and routing of conductors and equipment between the PCC and POI:

F. Identification of any constraints or limitations related to the siting or routing of conductors and equipment between the PCC and the POI: *[provide a description of the constraints/limitations and indicate their location on the site drawing provided under Section 6.E above]*

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

Section 7 – New Generating Facility Description / Technical Information

The information provided in this section is for the Generating Facility that this Application seeks to have interconnected to SCE's Distribution System or the Generating Facility that this Application seeks to modify (e.g., adding energy storage). Subsections A through D of Section 7 must be completed for all Generating Facilities. Subsections E through G are required, as applicable, only for those Generating Facilities that meet one or more of the following criteria: are sized larger than 10 kW; utilize a technology other than wind, solar or fuel cells that use renewable fuels; have a point of interconnection on the line side of the main circuit breaker (line side tap); require net generation output (NGO) metering; have additional generation on-site (including energy storage devices); and/or utilize non-certified equipment. Please complete a separate Section 7 for each new / modified Generating Facility that is seeking interconnection via this Application.

NOTE: Customers with >1 MW Generating Facilities may be subject to and have additional obligations pursuant to the California Independent System Operator (California ISO) tariff. These Customers should contact the California ISO for more information; SCE is not a party to the Customer's interaction with the California ISO.

A. Generating Facility Description *(see Appendix A)*

i. Number of Generators	
ii. Generator Manufacturer	
iii. Generator Model Number	
iv. Generator Technology Type	Solar PV
v. Generator CEC-AC Nameplate Rating (kW)	7.406
vi. Generator Gross AC Nameplate Rating (kW) <i>Required for Generators where the CEC-AC Nameplate Rating is not available / applicable</i>	
vii. Generator Estimated Monthly Production (kWh)	1170.67
viii. Inverter Information <i>For non-inverter-based Generators, please indicate "0" and "N/A"</i>	Inverter: 1 x SolarEdge Technologies 10.0 kW (Model SE10000H-US (240V) [SI1]) Inverter Rating (ea): 9.994 kW AC Efficiency: 99% PV Module Array: 24 x Panasonic Group SANYO Electric 330W (Model VBHN330SA16) Module Rating (ea): 330 W DC, 311.7 W PTC Tilt: 5 Azimuth: 220 Tracking: Fixed Nameplate Rating: 7.92 kW DC Inverter Nameplate Rating: 10 kW AC AC Rating: 7.406 kW CEC-AC

b. Customer's Main Panel Continuous Current Rating <i>(Amps)</i>	

F. Information Required for <u>MASH-VNM/ST, NEM-V/ST</u> and <u>SOMAH-VNM</u> Interconnection Requests	(T)
i. Does your interconnection satisfy SCE's ESR?	
ii. Is the current proposed tie-in point a result of restrictions placed on altering the existing panel or equipment within, as imposed by the local authority having jurisdiction?	
iii. Are there existing utility facilities in the vicinity of the proposed point of interconnection? Minimum clearances must be maintained from SCE facilities, as specified in SCE's ESR and/or Underground Structures Standards (UGS).	

G. Additional Information Required for Interconnection Requests that Include <u>Energy Storage Devices</u> <i>(e.g., batteries)</i>
i. Will an Energy Storage Device (ESD) be connected behind the same SCE meter as the New Generating Facility?

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

<input type="checkbox"/> Yes , an ESD is currently interconnected (<i>proceed to Section 6.D unless the ESD is being modified</i>) No	
<input type="checkbox"/> Yes , an ESD will be interconnected as part of this Application (<i>please complete the information below</i>) No	
ii. ESD Type	
iii. Number of ESDs	
iv. ESD Manufacturer(es)	
v. ESD Model Number(s)	
vi. ESD Max Capacity (kWh)	
vii. ESD Rated Discharge (kW)	
viii. ESD Max Discharge (kW)	
ix. Please list the devices used to limit discharge (if any): (<i>e.g., inverter, power control</i>)	
x. Please describe the intended use of the ESD: For example, peak shaving, export to the grid, load shifting, back-up, etc. The intended use specified may be taken into consideration during any applicable study processes.	
xi. Energy Storage Charging Function	
a. Rated Charge Load Demand (kW)	
b. Estimated annual Net Energy Usage* of the ESD (kWh) <small>*Net Energy Usage = (kWh input, including charging, storage device auxiliary loads, and losses) – (kWh output, including discharging)</small>	
c. Will SCE's Distribution System be used to charge the ESD:	
<u>If no:</u> Provide technical description of control systems including:	
<ul style="list-style-type: none"> Source of energy for charging: Mechanism to prevent charging from the Distribution System: 	
<u>If yes:</u> Will charging the ESD increase the host facility's existing peak load demand?	
<u>If yes:</u> Provide the following load information:	
<ul style="list-style-type: none"> Amount of added peak demand (kW): 	
<u>If no:</u> Provide technical description of control systems, including:	
<ul style="list-style-type: none"> Charging periods: Mechanism to prevent charging from the Distribution System during host facility peak: 	
xii. Generation / Export Function	
a. Will the Generating Facility(ies) export power to SCE's Distribution System? (Include all generation sources behind the SCE meter specified in Section 1.A above, such as PV, an ESD or other technologies when answering)	

**NET ENERGY METERING (NEM)
GENERATING FACILITY INTERCONNECTION
APPLICATION**

If yes , please specify the Generating Facility's maximum coincident export to the grid: <i>(kW)</i>	
b. If all generation sources are not simultaneously exporting to the grid, please provide a technical description of the control systems for this function:	

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

Section 8 – Existing Generating Facility Description / Technical Information

The information provided in this section is for previously interconnected generating facilities that already exist behind the same SCE meter as the new Generating Facility(ies) outlined in Section 7 above. If an existing generating facility is being modified by this Application, please complete Section 7 (and not Section 8) for that Generating Facility. Please complete a separate Section 8 for each existing generating facility.

A. Existing Generating Facility Description <i>(see Appendix A)</i>			
i. Number of Generators			
ii. Generator Manufacturer			
iii. Generator Model Number			
iv. Generator Technology Type			
v. Generator CEC-AC Nameplate Rating (kW)			
vi. Generator Gross AC Nameplate Rating (kW) <small>Required for Generators where the CEC-AC Nameplate Rating is not available / applicable</small>			
vii. Generator Estimated Monthly Production (kWh)			
viii. Inverter Information <i>For non-inverter-based Generators, please indicate "0" and "N/A"</i>			
a. Number of Inverters

Section 9 – Safety and Consumer Protection Acknowledgements

This section is applicable to Customers requesting service on Schedules NEM-ST, MASH-VNM-ST or NEM-V-ST.

A. Equipment Verification

True

- ☐ **For Applicants with Solar Generating Facilities** - By checking this box, Applicant verifies that all major solar system components (including PV panels and other generation equipment, inverters and meters) are on the verified equipment list maintained by the California Energy Commission. This requirement is subject to additional verification by SCE.

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

***Note:** For all Generating Facilities, SCE may require the Applicant to verify that other equipment, as determined by SCE, has safety certification from a NRTL.*

B. Warranty Verification True

- ☐ By checking this box, Applicant verifies that a warranty of at least 10 years has been provided on all equipment and the installation of that equipment. In appropriate circumstances conforming to industry practice, satisfaction of this requirement may rely on manufacturers' warranties for equipment and separate contractors' warranties for workmanship (i.e., installation). Warranties or service agreements conforming to requirements applicable to the Self-Generation Incentive Program (SGIP) may be used to satisfy this requirement for Generating Facilities with technologies eligible for the SGIP. This requirement is subject to additional verification by SCE.

SECTION 10 – Additional Information

Please refer to the NEM Interconnection Handbook for a complete list of technical information that is required when submitting this Application. The NEM Interconnection Handbook can be found at <http://www.sce.com/nem> under the "NEM Forms and Documents" section. All drawings must conform to accepted engineering standards and must be legible. 11" x 17" drawings are preferred.

Please also refer to the NEM Application Checklist on <http://www.sce.com/nem> for additional forms that may be required based on your interconnection request.

Finally, please indicate here ☐ if there are additional existing generating facilities located on the same Premises (but not behind the same SCE revenue meter) as the NEM Generating Facility that is seeking interconnection pursuant to this Application.

Section 11 – Submittal Instructions, Payment and Assistance

Completed applications must be submitted via SCE's online application tool, which can be accessed at <https://sceinterconnect.powerclerk.com/Account/Login>. Any applicable Interconnection Request fees must be paid electronically via credit card (Visa or MasterCard) or debit card at the time the application is submitted online.

All NEM Projects (except NEM-MT)

If you have questions or need assistance in completing this application, please call SCE's NEM team at (866) 600-6290.

NEM-MT (Multiple Tariff) Projects

If you have questions or need assistance in completing this NEM-MT Application, please contact SCE for Distributed Generation at (626) 302-3688 or email interconnectionQA@sce.com.

**NET ENERGY METERING (NEM)
GENERATING FACILITY INTERCONNECTION
APPLICATION**

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

Appendix A – Instructions for Completing Sections 7 and 8

Manufacturer	Enter the brand name of the generator.								
Model Number	Enter the model number assigned by the manufacturer of the generator.								
Technology Type	<ul style="list-style-type: none"> For <i>Schedules NEM, NEM-ST, NEM-V and NEM-V-ST</i>: biomass, solar thermal, photovoltaic, wind, geothermal, fuel cells using renewable fuels, small hydroelectric generation, digester gas, municipal solid waste conversion, landfill gas, ocean wave, ocean thermal, or tidal current, and any additions or enhancements to the facility using that technology. For <i>Schedules MASH-VNM, MASH-VNM-ST and SOMAH-VNM</i>: Solar PV For <i>Schedule FC-NEM</i>: Fuel Cells 								
CEC-AC Nameplate Rating	<p>For NEM generating facilities, this value is the CEC-AC Net Nameplate Rating and is not the same as the Net Nameplate that accounts for auxiliary loads or station service loads. The calculations used are as follows:</p> <table border="1"> <thead> <tr> <th>Technology</th><th>CEC-AC Nameplate Calculation</th></tr> </thead> <tbody> <tr> <td>Solar PV</td><td>(Qty of Modules) x (PTC Rating) x (Inverter Efficiency %) / 1000 = ____ kW</td></tr> <tr> <td>Wind</td><td>(Qty of Turbines) x (Power Output) x (Inverter Efficiency %) / 1000 = ____ kW</td></tr> <tr> <td>Fuel Cell</td><td>(Qty of Cells) x (Rated Output) x (Inverter Efficiency %) / 1000 = ____ kW</td></tr> </tbody> </table>	Technology	CEC-AC Nameplate Calculation	Solar PV	(Qty of Modules) x (PTC Rating) x (Inverter Efficiency %) / 1000 = ____ kW	Wind	(Qty of Turbines) x (Power Output) x (Inverter Efficiency %) / 1000 = ____ kW	Fuel Cell	(Qty of Cells) x (Rated Output) x (Inverter Efficiency %) / 1000 = ____ kW
Technology	CEC-AC Nameplate Calculation								
Solar PV	(Qty of Modules) x (PTC Rating) x (Inverter Efficiency %) / 1000 = ____ kW								
Wind	(Qty of Turbines) x (Power Output) x (Inverter Efficiency %) / 1000 = ____ kW								
Fuel Cell	(Qty of Cells) x (Rated Output) x (Inverter Efficiency %) / 1000 = ____ kW								
Gross AC Nameplate Rating	This is the capacity value normally supplied by the manufacturer and stamped on the Generator's nameplate.								
Estimated Monthly Production	Example (solar): CEC-AC kW * 720 hours * 0.2 (solar) = Estimated Monthly kWh; the factors for other technologies can be found in the NEM Interconnection Handbook.								
Inverter Manufacturer	Enter the brand name of the inverter.								
Inverter Model Number	Enter the model number assigned by the manufacturer of the inverter.								
Module Manufacturer	Enter the brand name of the modules.								
Module Model Number	Enter the model number assigned by the manufacturer of the modules.								
Mounting Method	Applicable to solar generating facilities.								
Tracking Type	Applicable to solar generating facilities.								
NRTL Certification	Answer "yes" only if the generator manufacturer can or has provided certification data. Please see SCE's Rule 21, Section L for additional information regarding this certification.								
Smart Inverter Certification	Answer "yes" only if the inverter manufacturer can or has provided certification data. Please see SCE's Rule 21, Section Hh for Smart Inverter requirements, and Section L for additional information regarding certification.								
Prime Mover Type	Please indicate the type and fuel used as the prime mover or source of energy for the generator.								
Generator Software Version	If the control and/or protective functions are dependent on a software program supplied by the manufacturer of the equipment, please provide the version or release number for the software that will be used.								
Inverter Software Version	If the control and/or protective functions are dependent on a software program supplied by the manufacturer of the equipment, please provide the version or release number for the software that will be used.								
Gross Nameplate Rating (kVA)	This is the capacity value normally supplied by the manufacturer and stamped on the Generator's nameplate. This value is not required where								

(T)

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

	the manufacturer provides only a kW rating. However, where both kVA and kW values are available, please provide both.
Gross Nameplate Rating (kW)	This is the capacity value normally supplied by the manufacturer and stamped on the Generator's nameplate. This value is not required where the manufacturer provides only a kVA rating. However, where both kVA and kW values are available, please provide both. For NEM generating facilities, the "gross" value is DC power.
Net Nameplate Rating (kW)	<ul style="list-style-type: none"> For NEM generating facilities, this value is the CEC-AC Net Nameplate Rating and is not the same as the Net Nameplate that accounts for auxiliary loads or station service loads. For non-NEM generating facilities (e.g., those included in an NEM-MT installation), this capacity value is determined by subtracting the "Auxiliary" or "Station Service" loads used to operate the Generator or Generating Facility. Applicants are not required to supply this value but, if it is not supplied, applicable Standby Charges may be based on the higher "gross" values.
Operating Voltage	This value should be the voltage rating designated by the manufacturer and used in the Generator. Please indicate phase-to-phase voltages for 3-phase installations. See SCE's Rule 21, Section H.2.b. for additional information.
Power Factor (PF) Rating	This value should be the nominal power factor rating designated by the manufacturer for the Generator. See SCE's Rule 21, Section H.2.i. for additional information.
PF Adjustment Range	Where the power factor of the Generator is adjustable, please indicate the maximum and minimum operating values. See SCE's Rule 21, Section H.2.i.
Wiring Configuration	Please indicate whether the Generator is a single-phase or three-phase device. See SCE's Rule 21, Section H.3.
3-Phase Winding Configuration	For three-phase generating units, please indicate the configuration of the Generator's windings or inverter systems.
Neutral Grounding System Used	Wye-connected generating units are often grounded – either through a resistor or directly, depending upon the nature of the electrical system to which the Generator is connected. If the grounding method used at this facility is not listed, please attach additional descriptive information.
Short Circuit Current Produced by Generator	Please indicate the current each Generator can supply to a three-phase fault across its output terminals. For single phase Generators, please supply the phase-to-phase fault current.
Generator Design	Please indicate the designated type of each Generator. Designate "Inverter" anytime an inverter is used as the interface between the Generator and the electric system regardless of the primary power production / storage device used.
For Synchronous Generators	If the Generator is a "synchronous" design, please provide the synchronous reactance, transient reactance, and subtransient reactance values supplied by the manufacturer along with the Gross kVA Nameplate Rating or Base kVA, if different. This information is necessary to determine the short circuit contribution of the Generator and as data in load flow and short circuit computer models of SCE's Distribution System.

**NET ENERGY METERING (NEM)
GENERATING FACILITY INTERCONNECTION
APPLICATION**

For Induction Generators	If the Generator is an “induction” design, please provide the locked rotor current value supplied by the manufacturer along with the Gross kVA Nameplate Rating or Base kVA, if different. If this value is not available, the stator resistance, stator leakage reactance, rotor resistance, and rotor leakage reactance values supplied by the manufacturer may be used to determine the locked rotor current.
For Generators started as Motors	This information is needed only for Generators that are started by “motoring” the generator. See SCE’s Rule 21, Section G.1.c. and Section L.3.d for significance and additional information.

NET ENERGY METERING (NEM) RESIDENTIAL CUSTOMER SYSTEM SIZE ACKNOWLEDGEMENT 30 KW OR LESS

Renewable Electrical Generating Facilities (Generating Facility) that are sized larger than a customer's electrical requirements are not eligible for Net Energy Metering (NEM) as described in [Schedule NEM](#). A Generating Facility is considered to be sized larger than a customer's electrical requirements when the estimated annual production (in kWh) of the Generating Facility exceeds the customer's past 12 months of usage (in kWh).

When a Generating Facility appears to be oversized or where an account does not have 12 months of usage history, SCE allows customers to complete this form to certify that their Generating Facility is sized appropriately as required under SCE's NEM tariffs so that the NEM interconnection process can continue. Therefore, please check the appropriate box below and sign:

By signing below, I (Customer) certify that:

- ☒ I have compared the estimated annual production of my Generating Facility¹ with my most recent 12-month usage history². I am aware that my Generating Facility is expected to produce more energy than I used in the last 12 months. However, I affirm that I expect to increase my usage accordingly in the upcoming year. My Generating Facility was sized to meet this expected increase; OR
- ☐ Because I do not have 12 months of usage history, I have compared the estimated annual production of my Generating Facility against the standard 2 Watts/sq. ft. usage at www.sce.com/nem. Where the estimated annual production of my Generating Facility exceeds this calculated value, I affirm that I expect to increase my usage accordingly in the upcoming year. My Generating Facility was sized to meet this expected increase.

I understand that SCE reserves the right to further validate that my Generating Facility is sized in accordance with the NEM tariff.

Customer Acknowledgment

From Your SCE Bill, Please Provide:

Email Address

¹ The estimated solar annual production in kWh for sizing verification purposes is (CEC Nameplate kW) X 720 hrs./month X 12 months/year X 0.20 capacity factor = Annual kWh. For Wind and Fuel Cell technologies, see SCE NEM Handbook.

² You may obtain your most recent 12 months of usage history by calling SCE at 866-701-7868 or 800-655-4555, or by logging in online at www.sce.com, then going to MyAccount.

SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER

This Net Energy Metering (NEM) and Renewable Electrical Generating Facility Interconnection Agreement ("Agreement") is entered into by and between [Patty Nesbit](#) ("Customer"), and Southern California Edison Company ("SCE"), sometimes also referred to herein jointly as "Parties" or individually as "Party."

1. APPLICABILITY

This Agreement is applicable only to Customers who satisfy all requirements of the definition of a Renewable Electrical Generating Facility ("Generating Facility") sized one megawatt (MW) and smaller as set forth in paragraph 1 of subdivision (a) of Section 25741 of the California Public Resources Code and all conditions and requirements as specified in Schedule NEM and its successor, Schedule NEM-ST.

2. SUMMARY OF GENERATING FACILITY AND CUSTOMER ACCOUNT

2.1 Generating Facility Identification Number:

2.2 Customer Meter Number: [222011-841590](#)

2.3 Customer Service Account Number: [3048543024](#)

2.4 Applicable Rate Schedule: [OtherTOU-D-A](#)

2.5 Generating Facility Location: [46471 Manitou Dr, Indian Wells CA 92210](#)

2.5.1 This agreement is applicable only to the Generating Facility described below and installed at the above location. The Generating Facility may not be relocated or connected to SCE's system at any other location without SCE's express written permission.

2.5.2 This Agreement is applicable only to Renewable Electrical Generating Facilities, which includes biomass, solar thermal, photovoltaic, wind, geothermal, fuel cells (using renewable fuel), small hydroelectric generation, digester gas, municipal solid waste conversion, landfill gas, ocean wave, ocean thermal, or tidal current, and any additions or enhancements using such technology.

2.5.3 Renewable Electrical Generating Facilities using fuel cells, municipal solid waste conversion, and small hydroelectric generating will be required to sign an Affidavit (Form 14-912) certifying the following criteria have been met:

- a) For purposes of this Agreement, qualifying "solid waste conversion" is defined pursuant to Public Resources Code Section 25741(b)(3).
- b) For purposes of qualifying under "fuel cell" using renewable fuels, the Generating Facility must use technology the California Public Utilities Commission ("Commission") determines will achieve reductions in emissions of greenhouse gases and meet emissions requirements for eligibility for funding pursuant to the Self-Generation Incentive Programs.
- c) A "small hydroelectric" generating facility is not an eligible Generating Facility if it will cause an adverse impact on instream beneficial uses or cause a change in the volume or timing of streamflow.

2.6 Generating Facility Technology (technologies using the renewable resources reflected above):
[Solar PV](#)

SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER

- 2.7 Generating Facility Nameplate Rating (kW): [7.6](#)
- 2.8 Generating Facility CEC-AC Rating or Equivalent (kW): [7.294](#)
- 2.9 Estimated monthly energy production of Generating Facility (kWh): [1160](#)

3. METERING AND BILLING:

- 3.1 Metering requirements and billing procedures shall be set forth in SCE's, Electric Service Provider's and/or Community Choice Aggregator's/Community Aggregator's rate schedule(s) applicable to the electric service account assigned to the location where the Generating Facility is connected.

3.2 MONTHLY BILLING ELECTION:

By default, Residential and Small Commercial NEM Customers are billed (i.e., required to pay) ANNUALLY for their energy charges. However, the provisions of Schedules NEM and NEM-ST provide that "Upon a Customer's request, SCE shall permit a Residential or Small Commercial Customer to pay all applicable energy charges monthly.

Customers on monthly billing will receive monthly bill statements showing both the energy and non- energy related billing components and corresponding charges, and will be required to pay any positive energy charges monthly.

Having considered billing options that are available, I hereby request for monthly billing for the Customer Service Account Number listed above. _____ (initial here)

4. GENERATING FACILITY INTERCONNECTION AND DESIGN REQUIREMENTS:

- 4.1 Customer shall be responsible for the design, installation, operation, and maintenance of the Generating Facility and shall obtain and maintain any required governmental authorizations and/or permits.
- 4.2 The Generating Facility shall meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers ("IEEE"), and accredited testing laboratories such as Underwriters Laboratories ("UL"), and, where applicable, rules of the Commission regarding safety and reliability. This requirement shall include, but not be limited to, the provisions of IEEE Standard 929, UL Standard 1741 and SCE's Electric Rule 21 – Generating Facility Interconnections.
- 4.3 For Customers interconnecting a Generating Facility under the provisions of Schedule NEM-ST, the Generating Facility must have a warranty of at least 10 years for all equipment and the associated installation from the system provider. In appropriate circumstances conforming to industry practice, this requirement may rely on and be satisfied by manufacturers' warranties for equipment and separate contractors' warranties for workmanship (i.e., installation). Warranties or service agreements conforming to requirements applicable to the Self-Generation Incentive Program ("SGIP") may also be used for technologies eligible for the SGIP.
- 4.4 For Customers interconnecting a solar Generating Facility under the provisions of Schedule

SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER

NEM-ST, all major solar system components (including PV panels and other generation equipment, inverters and meters) must be on the verified equipment list maintained by the California Energy Commission ("CEC"). For all NEM-ST Generating Facilities, any other equipment, as determined by SCE, must be verified as having safety certification from a Nationally Recognized Testing Laboratory ("NRTL").

- 4.5 Customer shall not commence parallel operation of the Generating Facility until written approval has been provided to it by SCE. SCE shall normally provide such written approval no later than 30 business days following SCE's receipt of (1) a completed Net Energy Metering Application including all supporting documents and required payments, (2) a completed signed Net Energy Metering Interconnection Agreement, and (3) evidence of the Applicant's final electric inspection clearance from the Local Authority having jurisdiction over the Generating Facility. If the 30-day period cannot be met, SCE shall notify Applicant and the Commission of the reason for the inability to process the interconnection request and the expected completion date.
- 4.6 SCE shall have the right to have its representatives present at the final inspection made by the governmental authority having jurisdiction to inspect and approve the installation of the Generating Facility.
- 4.7 Customer shall not add generation capacity in excess of the ratings set forth in Sections 2.7 and 2.8 of this Agreement, or otherwise modify the Generating Facility without the prior written permission of SCE.
- 4.8 Customers interconnecting inverter-based Generating Facilities are required to comply with the requirements of Section Hh of SCE's Electric Rule 21, including configuration of protective settings in accordance with the specifications therein. Verification of compliance with such requirements shall be provided by the Customer upon request by SCE in accordance with SCE's Electric Rule 21.

(N)
|
|
|
(N)

5. DISCONNECTION, INTERRUPTION OR REDUCTION OF DELIVERIES:

- 5.1 SCE may require Customer to interrupt or reduce the output of its Generating Facility under the following circumstances:
 - (a) Whenever SCE deems it necessary in its sole judgment, to construct, install, maintain, repair, replace, remove, investigate, or inspect any of its equipment or any part of its electric system; or
 - (b) Whenever SCE determines in its sole judgment, that curtailment, interruption, or reduction of Customer's electrical generation is otherwise necessary due to emergencies, forced outages, force majeure, or compliance with prudent electrical practices.
- 5.2 Notwithstanding any other provision of this Agreement, upon termination of this Agreement or at any time SCE determines the continued parallel operation of the Generating Facility may endanger the public or SCE personnel, or affect the integrity of SCE's electric system or the quality of electric service provided to other customers, SCE shall have the right to require the Generating Facility to be immediately disconnected from SCE's electric system. The Generating Facility shall remain disconnected until such time as SCE is satisfied, in its sole judgment, that the condition(s) causing such disconnection have ended or have been corrected.
- 5.3 Whenever feasible, SCE shall give Customer reasonable notice of the possibility that interruption or reduction of deliveries may be required.

SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER

- 5.4 Electrical energy and capacity provided to Customer during periods of curtailment or interruption of the output of the Generating Facility shall be provided pursuant to the terms of the rate schedule(s) applicable to the electric service account to which the Generating Facility is connected.

6. ACCESS TO PREMISES:

SCE may enter Customer's premises at all times, without notice to Customer for emergency purposes only.

- (a) To inspect Customer's protective devices or check meter(s); to ascertain there is no power flow; or
- (b) To disconnect the Generating Facility and/or service to Customer, whenever in SCE's discretion, a hazardous condition exists and such immediate action is necessary to protect persons, SCE's facilities, or property of others from damage or interference caused by the Generating Facility, or the failure of properly operating protective devices.

SCE will make prior arrangements with the Customer for gaining emergency access to Customer's premises by obtaining keys to a lock box or a padlock or by making other mutually agreeable arrangements.

7. INDEMNITY AND LIABILITY:

- 7.1 Each Party as indemnitor shall defend, hold harmless, and indemnify the other Party and the directors, officers, employees, and agents of the other Party against and from any and all loss, liability, damage, claim, cost, charge, demand, or expense (including any direct, indirect or consequential loss, liability, damage, claim, cost, charge, demand, or expense, including attorneys' fees) for injury or death to persons, including employees of either Party, and damage to property, including property of either Party, arising out of or in connection with (a) the engineering, design, construction, maintenance, repair, operation, supervision, inspection, testing, protection or ownership of the indemnitor's facilities, or (b) the making of replacements, additions, betterments to, or reconstruction of the indemnitor's facilities. This indemnity shall apply notwithstanding the active or passive negligence of the indemnitee. However, neither Party shall be indemnified hereunder for its loss, liability, damage, claim, cost, charge, demand, or expense resulting from its sole negligence or willful misconduct.
- 7.2 The indemnitor shall, on the other Party's request, defend any suit asserting a claim covered by this indemnity and shall pay for all costs, including reasonable attorney fees, that may be incurred by the other Party in enforcing this indemnity.
- 7.3 The provisions of this Section shall not be construed to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.
- 7.4 Except as otherwise provided in Section 7.1, neither Party shall be liable to the other Party for consequential damages incurred by that Party.
- 7.5 Nothing in this Agreement shall create any duty to, any standard of care with reference to, or any liability to any person who is not a Party to it.
- 7.6 Notwithstanding the provisions of Section 7.1, Customer shall be responsible for protecting its Generating Facility from damage by reason of the electrical disturbances or faults caused by the operation, faulty operation, or non-operation of SCE's facilities, and SCE shall not be liable

SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER

for any such damage so caused.

8. GOVERNING LAW:

This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California.

9. CALIFORNIA PUBLIC UTILITIES COMMISSION:

9.1 This Agreement shall at all times be subject to such changes or modifications by the Commission as the Commission may, from time to time, direct in the exercise of its jurisdiction.

9.2 Notwithstanding any other provisions of this Agreement, SCE has the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, or rule or any agreement relating thereto.

10. AMENDMENT, MODIFICATIONS, WAIVER OR ASSIGNMENT:

10.1 This Agreement may not be altered or modified by either of the Parties, except by an instrument in writing executed by each of them.

10.2 None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.

10.3 This Agreement shall supersede any existing agreement under which Customer is currently operating the Generating Facility identified in Section 2, herein, and any such agreement shall be deemed terminated as of the date this Agreement becomes effective.

10.4 This Agreement contains the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement.

10.5 A new Customer of Record or New Party In ("NPI") who owns, leases, or rents a premises with an operating NEM Generating Facility, previously approved by SCE for Parallel Operation, does not have to submit a new interconnection agreement as long as the Customer meets the requirements of Schedule NEM or its successor, Schedule NEM-ST, as applicable. This will also apply to premises where the developer/contractor establishes the interconnection, so that the Customer who buys/rents/leases the premises will not have to re-submit and sign a new interconnection agreement.

A new Customer of Record or NPI, who owns, rents or leases a premises that includes NEM Generating Facilities with a capacity of 30 kW or less, that were approved by SCE for Parallel Operation prior to the new Customer or NPI moving in and/or taking electric service with SCE will take service on Schedule NEM or its successor, Schedule NEM-ST, as applicable, as long as the requirements of this section are met in accordance with the transition provisions contained in Schedules NEM and NEM-ST, as applicable. To be eligible, the new Customer or NPI must (1) ensure that the Generating Facility is compliant with all applicable safety and performance standards as delineated in SCE's Electric Rule 21 and other applicable tariffs in effect at the time of initial approval for Parallel Operation; (2) keep in force the amount of

SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER

property, commercial general liability and/or personal liability insurance the NPI or new Customer has in place at the time it initiates service on this tariff; and, (3) understand that SCE may from time to time release to the CEC and/or the Commission, information regarding the new Customer or NPI's Generating Facility, including NPI or new Customer's name and Generating Facility location, capacity and operational characteristics. SCE will provide the NPI or new Customer with (i) a copy of the interconnection agreement in effect and as signed by the previous customer, which will remain unchanged, (ii) a copy of the NEM Fact Sheet on operation and billing, and (iii) SCE's website information on the NEM or NEM-ST tariffs.

- 10.6 A new Customer or NPI who owns, rents or leases a premises that includes a NEM Generating Facility above 30 kW will need to sign a new interconnection agreement. If no changes are made to the interconnection facilities, the agreement will have identical terms and conditions as the ones approved for the previous customer.

11. NOTICES:

- 11.1 Any notice required under this Agreement shall be in writing and mailed at any United States Post Office with postage prepaid and addressed to the Party, or personally delivered to the Party, at the address below. Changes in such designation may be made by notice similarly given. All written notices shall be directed as follows:

SOUTHERN CALIFORNIA EDISON COMPANY:
 Attn: NEM Program Administrator
 SCE Customer Solar & Self Generation
 P.O. Box 800
 Rosemead, CA 91770

CUSTOMER:

Hot Purple Energy
 810 N Farrell Dr, Palm Springs CA 92262

- 11.2 Customer's notices to SCE pursuant to this Section shall refer to the Generating Facility Identification Number that is set forth in Section 2.1

12. TERM AND TERMINATION OF AGREEMENT:

- 12.1 This Agreement shall become effective when SCE issues written authorization to interconnect the Generating Facility after receipt of all required documents and payments, and this completed Agreement signed by the Customer and SCE, and shall remain in effect thereafter from month to month unless terminated by either Party on thirty (30) days' prior written notice in accordance with Section 11.
- 12.2 This Agreement shall terminate, without notice, upon: (a) termination of the electric distribution service provided to Customer by SCE; or (b) changes to Customer's electric load which cause Customer to no longer satisfy all requirements of the definition of an Eligible Customer-Generator, as set forth in Sections 2827(b)(4) or 2827.1(a) of the California Public Utilities Code; or (c) termination of Customer's NEM arrangements with its Electric Service Provider, Community Choice Aggregator or Community Aggregator.

13. TRANSITION PROVISIONS:

- 13.1 Customers receiving service on Schedule NEM, or who have submitted all documentation necessary for receiving service on Schedule NEM, prior to SCE reaching its NEM trigger level

SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER

or July 1, 2017, whichever is earlier, are subject to the transition provisions as outlined in Schedule NEM.

- 13.2 Customers receiving service on Schedule NEM-ST, or who have submitted all documentation necessary for receiving service on Schedule NEM-ST, are subject to the transition provisions as outlined in Schedule NEM-ST.

14. SIGNATURES:

This Agreement may be executed in counterparts, and by Electronic Signature on the part of SCE and/or the Customer, and copies of a Party's signed signature page may be transmitted to the other Party by facsimile or other electronic means. Copies of the signature page so transmitted may be used for the purpose of enforcing the terms of this Agreement as though they were originals and will not be made inadmissible in any legal or regulatory proceeding concerning this Agreement on the basis of the Best Evidence Rule or similar rule of admissibility.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by their duly authorized representatives. This Agreement is effective as provided in Section 12.1 above.

PERMISSION TO OPERATE
Self-Generation Facility Interconnected to SCE's Electric Grid

1/4/2021

Patty Nesbit
46471 Manitou Dr
Indian Wells, CA 92210

Dear Customer:

Congratulations on completing the installation of your self-generation facility. Your application for interconnection has been approved and Permission to Operate your system has been granted.

Project ID	Generating Facility Address	Energy Storage Capacity (kW - if applicable)	CEC-AC Nameplate Rating (kW)
NST-173600	46471 Manitou Dr, Indian Wells CA 92210	15	7.406

Service under the NEM Rate Schedule will become effective on your next regularly scheduled meter read date, if proper metering is in place, or the next regularly scheduled meter read date following installation of the required bi-directional or interval data meter. Additionally, NEM 2.0 customers are required to be on a Time-of-Use (TOU) Rate Schedule. Residential customers will be defaulted to Schedule TOU-D-4-9PM if they are not already on a TOU rate. Customers may contact SCE to select another TOU rate for which they are eligible or view additional information [here](#). Customers shall not be allowed to make an additional change in rate until 12 months of service has been provided under the elected rate, unless otherwise specified in that rate schedule.

If you've elected to participate in Net Surplus Compensation (NSC) when you applied for interconnection using Form 14-957, any Net Surplus Generation will be paid as an on-bill credit. NSC is equal to the [Net Surplus Compensation Rate](#) (NSCR), which is the market-base rate, multiplied by your net surplus energy. Any credit can be applied to energy or non-energy charges. Alternatively, you may elect to receive a check through the mail for the value (dollar amount) of the net surplus energy, excluding any amount owed to us for other charges on your electric bill, by calling us at the number listed below.

Your "Relevant Period" begins on the date that you receive your Permission to Operate (PTO) and remains your anniversary date for subsequent years. Your first Relevant Period must be a minimum of 365 days in length. When the first NEM statement is shorter than the typical billing range of 27 to 33 days, the Relevant Period will reconcile on a 13th month (to complete the minimum number of days). You may elect to change the start date of your Relevant Period one time only by completing and returning an [NEM One-Time Relevant Period Change Request Form](#) (14-936).

If your generating facility is a NEM Aggregation (NEM-A) project, please review the [Welcome Guide](#) which will provide you with details on how the billing allocation method works for all accounts.

Below are some resources to help understand your new energy bill on Net Energy Metering (NEM).

- [Read](#) how you may have "energy charges" accumulating monthly which can be paid monthly or at the end of your 12 month settlement bill and understand Non-Bypassable Charges (NBCS) or
- [View](#) a short video about getting started with NEM or
- Sign up for the NEM monthly billing option, by calling SCE's Customer Call Center NEM Bills at (866) 701-7868 for residential customers or (866) 701-7869 for commercial customers or
- Read our [NEM FAQs](#)

For questions related to Net Energy Metering, please contact SCE's Customer Service Department at (800) 655-4555.

Sincerely,

Eduyng Castano
Senior Manager of Customer Generation Programs
Southern California Edison

This is a system generated email.

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

APPLICABILITY

This Net Energy Metering (NEM) Generating Facility Interconnection Application (Application) is used to request the interconnection of a Renewable Electrical Generating Facility (Generating Facility) to Southern California Edison's (SCE) Distribution System over which the California Public Utilities Commission (CPUC or Commission) has jurisdiction for the purposes of receiving service under SCE's NEM tariffs, including rate schedules NEM and NEM-ST (including NEM Aggregation (NEM-A) and NEM-MT¹), MASH-VNM and MASH-VNM-ST, NEM-V and NEM-V-ST, FC-NEM, and SOMAH-VNM to offset part or all of the Customer's own electrical requirements. (T)

This document is solely an application. It does not authorize you to operate your Generating Facility in parallel with SCE's electric system. To ensure safety and grid reliability, you must not operate your Generating Facility in parallel with the Distribution System until SCE provides you with written Permission to Operate (PTO). Unauthorized Parallel Operation may be dangerous and may result in injury to persons and/or may cause damage to equipment and/or property for which the Customer may be liable.

GUIDELINES AND STEPS FOR INTERCONNECTION

This Application, along with any applicable payments, must be completed online and include all of the additional information indicated in the NEM Interconnection Handbook (see also Section 10 below) to initiate SCE's interconnection review of the proposed Generating Facility. Please refer to SCE's [Rule 21](#), the [NEM Interconnection Handbook](#) and SCE's [Electric Service Requirements](#) (ESRs) for more information regarding the interconnection of an NEM Generating Facility to SCE's Distribution System. **PURSUANT TO CPUC DECISION (D.14-11-001, CERTAIN DATA PROVIDED ON THIS APPLICATION WILL BE TRANSFERRED TO A THIRD-PARTY FOR PROCESSING AND POSTING ON THE CALIFORNIA SOLAR STATISTICS WEBSITE. A LIST OF THE DATA THAT WILL BE SHARED CAN BE FOUND IN APPENDIX A OF D.14-11-001.** Applications submitted with blank fields (as applicable) will be deemed incomplete and will be returned to the main project contact for completion. The main project contact is also responsible for updating the Application should the information submitted change between system design and installation.

This Application must be accompanied by a Single Line Diagram (SLD) of the proposed system showing the Generating Facility components and the electrical path from the Generating Facility to SCE's meter. The SLD must clearly identify the point of interconnection (a sample SLD is available at <http://www.sce.com/nem>). Additional documentation may be required as outlined in Section 10 below. **A signed Interconnection Agreement and a copy of the final electrical inspection approval issued by the local jurisdictional authority are required before SCE will issue PTO, but may be submitted separately.** An Application Checklist and all required forms are available at <http://www.sce.com/nem>.

SCE normally provides PTO within 30 working days of receiving all necessary information, including but not limited to a completed Application, SLD, signed Interconnection Agreement and a copy of the final electrical inspection approval issued by the local jurisdictional authority. SCE will notify the Customer of Record (COR) if PTO cannot be issued within 30 working days of receiving all necessary information and will provide an estimate of the date that PTO is likely to be issued.

☐ **Please check this box to indicate acknowledgment of the information provided above.**

¹ For NEM-MT interconnection requests seeking to interconnect a non-NEM generator behind the same SCE revenue meter / Point of Common Coupling as an existing NEM generator, Application Form 14-732 should be used in lieu of this Application.

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

For SCE Use Only			
Project Name:	Project ID:	Date Application Received:	Application Expiration Date²:
Application Approval Date:	PTO Date:	Decommissioned Date:	

² The information submitted in this Application will remain active and valid consistent with the timelines specified in SCE's Rule 21, including Section D.13 and Section F.

SECTION 1 – Customer and Contractor / Installer Information
A. Customer Electric Account and Contact Information
This is the electric service account that the Generating Facility will be interconnected to for Parallel Operation with SCE. The Customer Name and Service Account # listed below must match the account information on the Customer's SCE electric bill.

Please check the applicable Customer Sector box: Residential			
<input type="checkbox"/> Residential	<input type="checkbox"/> Commercial	<input type="checkbox"/> Industrial	<input type="checkbox"/> Non-Profit
<input type="checkbox"/> Educational	<input type="checkbox"/> Military	<input type="checkbox"/> Other Government	

Please check the applicable Customer Type box: Bundled Service		
<input type="checkbox"/> Bundled Service (All services are provided by SCE)	<input type="checkbox"/> Direct Access (DA) (Certain services are provided by an Electric Service Provider)	<input type="checkbox"/> Community Choice Aggregation (CCA) / Community Aggregation (Certain services are provided by a Community Choice Aggregator or Community Aggregator)

C. Preparer Information *(if different from Section 1.B above)*

Please indicate who prepared and submitted this Application:

Andrew Allanbeck	
Preparer Name, Title	Preparer Company (if applicable)

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

SECTION 2 – Application Type

A. This Application is for:

Modification to Existing NEM

B. Please indicate the NEM program under which you intend to participate:

NEM-ST

C. Please indicate the Electric Rate Schedule under which the Service Account listed in Section 1.A above receives service (prior to NEM) on or will receive service on (for new accounts):

(e.g., Schedule D "Domestic," TOU-GS-1)

Other

D. Will an Electric Vehicle (EV) Charger be installed at the same location (i.e., service account address) as the Generating Facility:

No

How many EVs are charged or will be charged by the EV Charger(s)?

SECTION 3 – Rebate Information

This Application is NOT an application for any incentive and/or rebate program. Incentives or rebates must be applied for separately with the appropriate agency – for example, see <http://www.energy.ca.gov> or <http://www.cpuc.ca.gov>.

A. Are you participating in a California rebate program related to the installation of the Generating Facility?

Yes

If yes, please provide the following information:

i. Rebate Program: Self-Generation Incentive Program

ii. Rebate Amount: \$8700.00

One-Time Payment

iii. SASH Project No.³

(if applicable)

iv. SOMAH-VNM

Reservation No.

(if applicable)

(T)

³NEM-ST customers participating in the Single-family Affordable Solar Homes (SASH) Program are exempt from any interconnection application fees, provided the Generating Facility is sized 1 MW or smaller. Participation in the SASH Program, along with the Customer's corresponding unique SASH Project Number, must be indicated in this section for those Customers to receive the NEM-ST interconnection application fee exemption.

SECTION 4 – Ownership, Pricing and Financing

A. Please indicate if the Generating Facility is / will be owned by a third party?

(i.e., owned by someone other than the Service Account holder listed in Section 1.A above)

No (SCE customer-owned)

**NET ENERGY METERING (NEM)
GENERATING FACILITY INTERCONNECTION
APPLICATION**

B. For Customer-Owned Generating Facilities, please indicate the following:	
i. Purchase Price: <i>(indicate the system cost paid by the Customer)</i>	\$ 24000.00
ii. Was Property Assessed Clean Energy (PACE) financing used?	
No	
C. For Third-Party-Owned Generating Facilities, please indicate the following:	
i. Claimed Federal Investment Tax Credit (ITC) Cost Basis:	\$
ii. Name of Developer: <i>(at the time of sale)</i>	
iii. Contract Type: <i>(e.g., PPA, lease, pre-paid lease, other)</i>	

SECTION 5 – Net Surplus Compensation (NSC) Elections

Please indicate if the Customer elects to participate in the NSC program and receive compensation for Net Surplus Energy, if any, that may be generated during the Customer's 12-month Relevant Period.

(This option is only available to eligible Bundled Service Customers taking service on Schedules NEM, NEM-ST, MASH-VNM, MASH-VNM-ST, NEM-V, NEM-V-ST or SOMAH-VNM.)

(T)

Yes (for less than or equal to 1 MW Generating Facilities)

- ☐ **Yes (for ≤1 MW Generating Facilities)** – The Customer is interested in receiving NSC and certifies under the penalty of perjury that the Generating Facility is a Qualifying Facility pursuant to the Public Utility Regulatory Policies Act of 1978 that is exempt from certification filing at the Federal Energy Regulatory Commission (FERC); or,
- ☐ **Yes (for >1 MW Generating Facilities)** – The Customer is interested in receiving NSC and certifies under the penalty of perjury that the Generating Facility is a Qualifying Facility pursuant to the Public Utility Regulatory Policies Act of 1978 that has been self-certified as a Qualifying Facility with the FERC by the proper completion and filing of FERC Form No. 556, *Certification of Qualifying Facility (QF) Status for a Small Power Production or Cogeneration Facility*. A copy of the completed FERC Form No. 556 must be sent to SCE.
- ☐ **No** – The Customer is not interesting in participating in the NSC program and elects not to receive NSC.

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

Note: Customers electing to participate in the NSC program will receive any applicable NSC as an on-bill credit at the end of the Customer's Relevant Period. Customers may elect to receive NSC via a check instead in accordance with the provisions of the Customer's applicable NEM rate schedule.

Note: To receive compensation for Renewable Energy Credits (RECs) associated with the Customer's Net Surplus Energy, Form 14-935 must additionally be completed and submitted to SCE.

Section 6 – Cost Envelope Option (CEO) Election for Upgrades

Please indicate below if the Customer elects to participate in the CEO pursuant to Section F.7 of Rule 21 for the costs associated with any applicable Interconnection Facilities and/or Distribution Upgrades.

(The CEO is only available to customers with Interconnection Requests processed under the Fast Track Process or Independent Study Process. Customers electing this option may be subject to a \$2,500 deposit, as outlined in Section F.7 of Rule 21.)

No

Yes – Customers electing the CEO must provide all of the following additional information as part of this Interconnection Request in the manner specified by SCE:

- | | |
|--|--|
| A. Final location of the Point of Common Coupling (PCC) (Point of Change of Ownership): <i>[provide a description of the physical location of the Point of Common Coupling and indicate on the site drawing provided under Section 6.E below]</i> | |
| B. Final location of the Point of Interconnection (POI): <i>[provide a description of the physical location of the Point of Interconnection and indicate on the site drawing provided under Section 6.E below]</i> | |
| C. Confirmation of service voltage: | |
| D. Confirmation that technical data provided in the Interconnection Request is accurate, including equipment type and manufacturer: | |
| E. A site drawing on a scale of 1:30 or less, which shows the final location of the PCC, POI, and final location and routing of conductors and equipment between the PCC and POI: | |
| F. Identification of any constraints or limitations related to the siting or routing of conductors and equipment between the PCC and the POI: <i>[provide a description of the constraints/limitations and indicate their location on the site drawing provided under Section 6.E above]</i> | |

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

Section 7 – New Generating Facility Description / Technical Information

The information provided in this section is for the Generating Facility that this Application seeks to have interconnected to SCE's Distribution System or the Generating Facility that this Application seeks to modify (e.g., adding energy storage). Subsections A through D of Section 7 must be completed for all Generating Facilities. Subsections E through G are required, as applicable, only for those Generating Facilities that meet one or more of the following criteria: are sized larger than 10 kW; utilize a technology other than wind, solar or fuel cells that use renewable fuels; have a point of interconnection on the line side of the main circuit breaker (line side tap); require net generation output (NGO) metering; have additional generation on-site (including energy storage devices); and/or utilize non-certified equipment. Please complete a separate Section 7 for each new / modified Generating Facility that is seeking interconnection via this Application.

NOTE: Customers with >1 MW Generating Facilities may be subject to and have additional obligations pursuant to the California Independent System Operator (California ISO) tariff. These Customers should contact the California ISO for more information; SCE is not a party to the Customer's interaction with the California ISO.

A. Generating Facility Description *(see Appendix A)*

i. Number of Generators							
ii. Generator Manufacturer							
iii. Generator Model Number							
iv. Generator Technology Type							
v. Generator CEC-AC Nameplate Rating (kW)							
vi. Generator Gross AC Nameplate Rating (kW) <i>Required for Generators where the CEC-AC Nameplate Rating is not available / applicable</i>							
vii. Generator Estimated Monthly Production (kWh)							
viii. Inverter Information <i>For non-inverter-based Generators, please indicate "0" and "N/A"</i>							
a. Number of Inverters							
b. Inverter Manufacturer(es)							
c. Inverter Model Number(s)							
ix. Module Information <i>For Generators that don't use modules, please indicate "0" and "N/A"</i>							
a. Number of Modules							
b. Module Manufacturer(es)							
c. Module Model Number(s)							
x. Mounting Method							
a. Average Standoff							
xi. Tracking Type							
*If fixed, indicate:				Tilt:		Azimuth:	

B. Are System Output Performance Monitoring and Reporting Services being utilized?

If yes, please indicate **who** is receiving the data (check all that apply):

If applicable, which **vendor** is receiving the data:

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

C. Is the Generator certified by a Nationally Recognized Testing Laboratory (NRTL) in accordance with Rule 21?

If No, please explain:

C.1 If the Generator is inverter-based, is the Inverter(s) Certified as a Smart Inverter(s) in accordance with Rule 21 Section Hh by a Nationally Recognized Testing Laboratory (NRTL)? For non-inverter-based Generators, please indicate "N/A"

If No, please explain:

D. Electrical Connection Method

E. Additional Generating Facility Technical Information (see Appendix A)

i. Prime Mover Type				
ii. Generator Software Version Number				
iii. Inverter Software Version Number				
iv. Gross Nameplate Rating (kVA)				
v. Gross Nameplate Rating (kW)				
vi. Net Nameplate Rating (kW)				
vii. Operating Voltage (Volts or kV)				
viii. Power Factor (PF) Rating (%)				
ix. PF Adjustment Range (%)	Maximum		Minimum	
x. Wiring Configuration (Choose One)				
xi. 3-Phase Winding Configuration (Choose One)				
xii. Neutral Grounding Systems Used (Choose One)				
		Ohms		
xiii. Short Circuit Current Produced by Generator (Amps)				
xiv. Generator Design (Choose One)				
xv. For Synchronous Generators Only: (Gross kVA Nameplate Rating must be provided above)				
a. Base kVA (if different from Gross Nameplate kVA above)				
b. Synchronous Reactance (%)				
c. Transient Reactance (%)				
d. Subtransient Reactance (%)				
xvi. For Induction Generators Only: (Gross kVA Nameplate Rating must be provided above)				
a. Base kVA (if different from Gross Nameplate kVA above)				
b. Locked Rotor Current (Amps)				
OR				
c. Stator Resistance (%)				

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

d. Stator Leakage Reactance (%)	
e. Rotor Resistance (%)	
f. Rotor Leakage Reactance (%)	
xvii. For Generators that are Started as a Motor Only:	
a. In-Rush Current (Amps)	
b. Customer's Main Panel Continuous Current Rating (Amps)	

F. Information Required for <u>MASH-VNM/ST, NEM-V/ST and SOMAH-VNM</u> (T)	
i. Does your interconnection satisfy SCE's ESR?	
ii. Is the current proposed tie-in point a result of restrictions placed on altering the existing panel or equipment within, as imposed by the local authority having jurisdiction?	
iii. Are there existing utility facilities in the vicinity of the proposed point of interconnection? Minimum clearances must be maintained from SCE facilities, as specified in SCE's ESR and/or Underground Structures Standards (UGS).	

G. Additional Information Required for Interconnection Requests that Include <u>Energy Storage Devices</u> (e.g., batteries)	
i. Will an Energy Storage Device (ESD) be connected behind the same SCE meter as the New Generating Facility?	
<input type="checkbox"/> Yes , an ESD is currently interconnected (<i>proceed to Section 6.D unless the ESD is being modified</i>) Yes (to existing generator) <input type="checkbox"/> Yes , an ESD will be interconnected as part of this Application (<i>please complete the information below</i>) No	
ii. ESD Type	Battery
iii. Number of ESDs	3
iv. ESD Manufacturer(es)	Tesla
v. ESD Model Number(s)	1092170-05-J
vi. ESD Max Capacity (kWh)	39
vii. ESD Rated Discharge (kW)	15
viii. ESD Max Discharge (kW)	21
ix. Please list the devices used to limit discharge (if any): (e.g., inverter, power control)	
Inverter	
x. Please describe the intended use of the ESD:	

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

For example, peak shaving, export to the grid, load shifting, back-up, etc. The intended use specified may be taken into consideration during any applicable study processes.

Load Shifting

xi. Energy Storage Charging Function

a. Rated Charge Load Demand (kW)

5

b. Estimated annual Net Energy Usage* of the ESD (kWh)

*Net Energy Usage = (kWh input, including charging, storage device auxiliary loads, and losses) – (kWh output, including discharging)

c. Will SCE's Distribution System be used to charge the ESD:

No

If no: Provide technical description of control systems including:

- Source of energy for charging: Inverter
- Mechanism to prevent charging from the Distribution System:

If yes: Will charging the ESD increase the host facility's existing peak load demand?

If yes: Provide the following load information:

- Amount of added peak demand (kW):

If no: Provide technical description of control systems, including:

- Charging periods: Inverter
- Mechanism to prevent charging from the Distribution System during host facility peak:

xii. Generation / Export Function

a. Will the Generating Facility(ies) export power to SCE's Distribution System?

(Include all generation sources behind the SCE meter specified in Section 1.A above, such as PV, an ESD or other technologies when answering)

No

If yes, please specify the Generating Facility's maximum coincident export to the grid:
(kW)

b. If all generation sources are not simultaneously exporting to the grid, please provide a technical description of the control systems for this function:

Inverter

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

Section 8 – Existing Generating Facility Description / Technical Information

The information provided in this section is for previously interconnected generating facilities that already exist behind the same SCE meter as the new Generating Facility(ies) outlined in Section 7 above. If an existing generating facility is being modified by this Application, please complete Section 7 (and not Section 8) for that Generating Facility. Please complete a separate Section 8 for each existing generating facility.

A. Existing Generating Facility Description <i>(see Appendix A)</i>			
i.	Number of Generators		
ii.	Generator Manufacturer		
iii.	Generator Model Number		
iv.	Generator Technology Type	Solar PV	
v.	Generator CEC-AC Nameplate Rating (kW)	7.406	
vi.	Generator Gross AC Nameplate Rating (kW) <small>Required for Generators where the CEC-AC Nameplate Rating is not available / applicable</small>		
vii.	Generator Estimated Monthly Production (kWh)	1170.67	
viii.	Inverter Information <i>For non-inverter-based Generators, please indicate "0" and "N/A"</i> Inverter: 1 x SolarEdge Technologies 10.0 kW (Model SE10000H-US (240V) [SI1]) Inverter Rating (ea): 9.994 kW AC Efficiency: 99% PV Module Array: 24 x Panasonic Group SANYO Electric 330W (Model VBHN330SA16) Module Rating (ea): 330 W DC, 311.7 W PTC Tilt: 5 Azimuth: 220 Tracking: Fixed Nameplate Rating: 7.92 kW DC Inverter Nameplate Rating: 10 kW AC AC Rating: 7.406 kW CEC-AC		
a.	Number of Inverters		
b.	Inverter Manufacturer(es)		
c.	Inverter Model Number(s)		
ix.	Module Information <i>For Generators that don't use modules, please indicate "0" and "N/A"</i>		
a.	Number of Modules		
b.	Module Manufacturer(es)

<u>If yes:</u> Provide the following load information:	
<ul style="list-style-type: none"> Amount of added peak demand (kW): 	
<u>If no:</u> Provide technical description of control systems, including:	
<ul style="list-style-type: none"> Charging periods: 	
<ul style="list-style-type: none"> Mechanism to prevent charging from the Distribution System during host facility peak: 	

Section 9 – Safety and Consumer Protection Acknowledgements

This section is applicable to Customers requesting service on Schedules NEM-ST, MASH-VNM-ST or NEM-V-ST.

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

A. Equipment Verification

True

- ☐ **For Applicants with Solar Generating Facilities** - By checking this box, Applicant verifies that all major solar system components (including PV panels and other generation equipment, inverters and meters) are on the verified equipment list maintained by the California Energy Commission. This requirement is subject to additional verification by SCE.

Note: For all Generating Facilities, SCE may require the Applicant to verify that other equipment, as determined by SCE, has safety certification from a NRTL.

B. Warranty Verification

True

- ☐ By checking this box, Applicant verifies that a warranty of at least 10 years has been provided on all equipment and the installation of that equipment. In appropriate circumstances conforming to industry practice, satisfaction of this requirement may rely on manufacturers' warranties for equipment and separate contractors' warranties for workmanship (i.e., installation). Warranties or service agreements conforming to requirements applicable to the Self-Generation Incentive Program (SGIP) may be used to satisfy this requirement for Generating Facilities with technologies eligible for the SGIP. This requirement is subject to additional verification by SCE.

SECTION 10 – Additional Information

Please refer to the NEM Interconnection Handbook for a complete list of technical information that is required when submitting this Application. The NEM Interconnection Handbook can be found at <http://www.sce.com/nem> under the "NEM Forms and Documents" section. All drawings must conform to accepted engineering standards and must be legible. 11" x 17" drawings are preferred.

Please also refer to the NEM Application Checklist on <http://www.sce.com/nem> for additional forms that may be required based on your interconnection request.

Finally, please indicate here ☐ if there are additional existing generating facilities located on the same Premises (but not behind the same SCE revenue meter) as the NEM Generating Facility that is seeking interconnection pursuant to this Application.

Section 11 – Submittal Instructions, Payment and Assistance

Completed applications must be submitted via SCE's online application tool, which can be accessed at <https://sceinterconnect.powerclerk.com/Account/Login>. Any applicable Interconnection Request fees must be paid electronically via credit card (Visa or MasterCard) or debit card at the time the application is submitted online.

All NEM Projects (except NEM-MT)

**NET ENERGY METERING (NEM)
GENERATING FACILITY INTERCONNECTION
APPLICATION**

If you have questions or need assistance in completing this application, please call SCE's NEM team at (866) 600-6290.

NEM-MT (Multiple Tariff) Projects

If you have questions or need assistance in completing this NEM-MT Application, please contact SCE for Distributed Generation at (626) 302-3688 or email interconnectionQA@sce.com.

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

Appendix A – Instructions for Completing Sections 7 and 8									
Manufacturer	Enter the brand name of the generator.								
Model Number	Enter the model number assigned by the manufacturer of the generator.								
Technology Type	<ul style="list-style-type: none"> For <i>Schedules NEM, NEM-ST, NEM-V and NEM-V-ST</i>: biomass, solar thermal, photovoltaic, wind, geothermal, fuel cells using renewable fuels, small hydroelectric generation, digester gas, municipal solid waste conversion, landfill gas, ocean wave, ocean thermal, or tidal current, and any additions or enhancements to the facility using that technology. For <i>Schedules MASH-VNM, MASH-VNM-ST and SOMAH-VNM</i>: Solar PV For <i>Schedule FC-NEM</i>: Fuel Cells 								
CEC-AC Nameplate Rating	<p>For NEM generating facilities, this value is the CEC-AC Net Nameplate Rating and is not the same as the Net Nameplate that accounts for auxiliary loads or station service loads. The calculations used are as follows:</p> <table border="1"> <thead> <tr> <th>Technology</th> <th>CEC-AC Nameplate Calculation</th> </tr> </thead> <tbody> <tr> <td>Solar PV</td> <td>(Qty of Modules) x (PTC Rating) x (Inverter Efficiency %) / 1000 = ____ kW</td> </tr> <tr> <td>Wind</td> <td>(Qty of Turbines) x (Power Output) x (Inverter Efficiency %) / 1000 = ____ kW</td> </tr> <tr> <td>Fuel Cell</td> <td>(Qty of Cells) x (Rated Output) x (Inverter Efficiency %) / 1000 = ____ kW</td> </tr> </tbody> </table>	Technology	CEC-AC Nameplate Calculation	Solar PV	(Qty of Modules) x (PTC Rating) x (Inverter Efficiency %) / 1000 = ____ kW	Wind	(Qty of Turbines) x (Power Output) x (Inverter Efficiency %) / 1000 = ____ kW	Fuel Cell	(Qty of Cells) x (Rated Output) x (Inverter Efficiency %) / 1000 = ____ kW
Technology	CEC-AC Nameplate Calculation								
Solar PV	(Qty of Modules) x (PTC Rating) x (Inverter Efficiency %) / 1000 = ____ kW								
Wind	(Qty of Turbines) x (Power Output) x (Inverter Efficiency %) / 1000 = ____ kW								
Fuel Cell	(Qty of Cells) x (Rated Output) x (Inverter Efficiency %) / 1000 = ____ kW								
Gross AC Nameplate Rating	This is the capacity value normally supplied by the manufacturer and stamped on the Generator's nameplate.								
Estimated Monthly Production	Example (solar): CEC-AC kW * 720 hours * 0.2 (solar) = Estimated Monthly kWh; the factors for other technologies can be found in the NEM Interconnection Handbook.								
Inverter Manufacturer	Enter the brand name of the inverter.								
Inverter Model Number	Enter the model number assigned by the manufacturer of the inverter.								
Module Manufacturer	Enter the brand name of the modules.								
Module Model Number	Enter the model number assigned by the manufacturer of the modules.								
Mounting Method	Applicable to solar generating facilities.								
Tracking Type	Applicable to solar generating facilities.								
NRTL Certification	Answer "yes" only if the generator manufacturer can or has provided certification data. Please see SCE's Rule 21, Section L for additional information regarding this certification.								
Smart Inverter Certification	Answer "yes" only if the inverter manufacturer can or has provided certification data. Please see SCE's Rule 21, Section Hh for Smart Inverter requirements, and Section L for additional information regarding certification.								
Prime Mover Type	Please indicate the type and fuel used as the prime mover or source of energy for the generator.								
Generator Software Version	If the control and/or protective functions are dependent on a software program supplied by the manufacturer of the equipment, please provide the version or release number for the software that will be used.								
Inverter Software Version	If the control and/or protective functions are dependent on a software program supplied by the manufacturer of the equipment, please provide the version or release number for the software that will be used.								
Gross Nameplate Rating (kVA)	This is the capacity value normally supplied by the manufacturer and stamped on the Generator's nameplate. This value is not required where								

(T)

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

	the manufacturer provides only a kW rating. However, where both kVA and kW values are available, please provide both.
Gross Nameplate Rating (kW)	This is the capacity value normally supplied by the manufacturer and stamped on the Generator's nameplate. This value is not required where the manufacturer provides only a kVA rating. However, where both kVA and kW values are available, please provide both. For NEM generating facilities, the "gross" value is DC power.
Net Nameplate Rating (kW)	<ul style="list-style-type: none"> For NEM generating facilities, this value is the CEC-AC Net Nameplate Rating and is not the same as the Net Nameplate that accounts for auxiliary loads or station service loads. For non-NEM generating facilities (e.g., those included in an NEM-MT installation), this capacity value is determined by subtracting the "Auxiliary" or "Station Service" loads used to operate the Generator or Generating Facility. Applicants are not required to supply this value but, if it is not supplied, applicable Standby Charges may be based on the higher "gross" values.
Operating Voltage	This value should be the voltage rating designated by the manufacturer and used in the Generator. Please indicate phase-to-phase voltages for 3-phase installations. See SCE's Rule 21, Section H.2.b. for additional information.
Power Factor (PF) Rating	This value should be the nominal power factor rating designated by the manufacturer for the Generator. See SCE's Rule 21, Section H.2.i. for additional information.
PF Adjustment Range	Where the power factor of the Generator is adjustable, please indicate the maximum and minimum operating values. See SCE's Rule 21, Section H.2.i.
Wiring Configuration	Please indicate whether the Generator is a single-phase or three-phase device. See SCE's Rule 21, Section H.3.
3-Phase Winding Configuration	For three-phase generating units, please indicate the configuration of the Generator's windings or inverter systems.
Neutral Grounding System Used	Wye-connected generating units are often grounded – either through a resistor or directly, depending upon the nature of the electrical system to which the Generator is connected. If the grounding method used at this facility is not listed, please attach additional descriptive information.
Short Circuit Current Produced by Generator	Please indicate the current each Generator can supply to a three-phase fault across its output terminals. For single phase Generators, please supply the phase-to-phase fault current.
Generator Design	Please indicate the designated type of each Generator. Designate "Inverter" anytime an inverter is used as the interface between the Generator and the electric system regardless of the primary power production / storage device used.
For Synchronous Generators	If the Generator is a "synchronous" design, please provide the synchronous reactance, transient reactance, and subtransient reactance values supplied by the manufacturer along with the Gross kVA Nameplate Rating or Base kVA, if different. This information is necessary to determine the short circuit contribution of the Generator and as data in load flow and short circuit computer models of SCE's Distribution System.

NET ENERGY METERING (NEM) GENERATING FACILITY INTERCONNECTION APPLICATION

For Induction Generators	If the Generator is an “induction” design, please provide the locked rotor current value supplied by the manufacturer along with the Gross kVA Nameplate Rating or Base kVA, if different. If this value is not available, the stator resistance, stator leakage reactance, rotor resistance, and rotor leakage reactance values supplied by the manufacturer may be used to determine the locked rotor current.
For Generators started as Motors	This information is needed only for Generators that are started by “motoring” the generator. See SCE’s Rule 21, Section G.1.c. and Section L.3.d for significance and additional information.

**SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER**

This Net Energy Metering (NEM) and Renewable Electrical Generating Facility Interconnection Agreement ("Agreement") is entered into by and between [Patty Nesbit](#) ("Customer"), and Southern California Edison Company ("SCE"), sometimes also referred to herein jointly as "Parties" or individually as "Party."

1. APPLICABILITY

This Agreement is applicable only to Customers who satisfy all requirements of the definition of a Renewable Electrical Generating Facility ("Generating Facility") sized one megawatt (MW) and smaller as set forth in paragraph 1 of subdivision (a) of Section 25741 of the California Public Resources Code and all conditions and requirements as specified in Schedule NEM and its successor, Schedule NEM-ST.

2. SUMMARY OF GENERATING FACILITY AND CUSTOMER ACCOUNT

2.1 Generating Facility Identification Number:

2.2 Customer Meter Number: [222011-841590](#)

2.3 Customer Service Account Number: [3048543024](#)

2.4 Applicable Rate Schedule: [OtherTOU-D-A](#)

2.5 Generating Facility Location: [46471 Manitou Dr, Indian Wells CA 92210](#)

2.5.1 This agreement is applicable only to the Generating Facility described below and installed at the above location. The Generating Facility may not be relocated or connected to SCE's system at any other location without SCE's express written permission.

2.5.2 This Agreement is applicable only to Renewable Electrical Generating Facilities, which includes biomass, solar thermal, photovoltaic, wind, geothermal, fuel cells (using renewable fuel), small hydroelectric generation, digester gas, municipal solid waste conversion, landfill gas, ocean wave, ocean thermal, or tidal current, and any additions or enhancements using such technology.

2.5.3 Renewable Electrical Generating Facilities using fuel cells, municipal solid waste conversion, and small hydroelectric generating will be required to sign an Affidavit (Form 14-912) certifying the following criteria have been met:

- a) For purposes of this Agreement, qualifying "solid waste conversion" is defined pursuant to Public Resources Code Section 25741(b)(3).
- b) For purposes of qualifying under "fuel cell" using renewable fuels, the Generating Facility must use technology the California Public Utilities Commission ("Commission") determines will achieve reductions in emissions of greenhouse gases and meet emissions requirements for eligibility for funding pursuant to the Self-Generation Incentive Programs.
- c) A "small hydroelectric" generating facility is not an eligible Generating Facility if it will cause an adverse impact on instream beneficial uses or cause a change in the volume or timing of streamflow.

2.6 Generating Facility Technology (technologies using the renewable resources reflected above):

[Solar PV](#)

FACILITIES SIZED ONE MEGAWATT AND SMALLER

- 2.7 Generating Facility Nameplate Rating (kW): [10](#)
- 2.8 Generating Facility CEC-AC Rating or Equivalent (kW): [7.406](#)
- 2.9 Estimated monthly energy production of Generating Facility (kWh):
[1171](#)

3. METERING AND BILLING:

- 3.1 Metering requirements and billing procedures shall be set forth in SCE's, Electric Service Provider's and/or Community Choice Aggregator's/Community Aggregator's rate schedule(s) applicable to the electric service account assigned to the location where the Generating Facility is connected.

3.2 MONTHLY BILLING ELECTION:

By default, Residential and Small Commercial NEM Customers are billed (i.e., required to pay) ANNUALLY for their energy charges. However, the provisions of Schedules NEM and NEM-ST provide that "Upon a Customer's request, SCE shall permit a Residential or Small Commercial Customer to pay all applicable energy charges monthly.

Customers on monthly billing will receive monthly bill statements showing both the energy and non- energy related billing components and corresponding charges, and will be required to pay any positive energy charges monthly.

Having considered billing options that are available, I hereby request for monthly billing for the Customer Service Account Number listed above. _____ (initial here)

4. GENERATING FACILITY INTERCONNECTION AND DESIGN REQUIREMENTS:

- 4.1 Customer shall be responsible for the design, installation, operation, and maintenance of the Generating Facility and shall obtain and maintain any required governmental authorizations and/or permits.
- 4.2 The Generating Facility shall meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers ("IEEE"), and accredited testing laboratories such as Underwriters Laboratories ("UL"), and, where applicable, rules of the Commission regarding safety and reliability. This requirement shall include, but not be limited to, the provisions of IEEE Standard 929, UL Standard 1741 and SCE's Electric Rule 21 – Generating Facility Interconnections.
- 4.3 For Customers interconnecting a Generating Facility under the provisions of Schedule NEM-ST, the Generating Facility must have a warranty of at least 10 years for all equipment and the associated installation from the system provider. In appropriate circumstances conforming to industry practice, this requirement may rely on and be satisfied by manufacturers' warranties for equipment and separate contractors' warranties for workmanship (i.e., installation). Warranties or service agreements conforming to requirements applicable to the Self-Generation Incentive Program ("SGIP") may also be used for technologies eligible for the SGIP.

SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER

- 4.4 For Customers interconnecting a solar Generating Facility under the provisions of Schedule NEM-ST, all major solar system components (including PV panels and other generation equipment, inverters and meters) must be on the verified equipment list maintained by the California Energy Commission ("CEC"). For all NEM-ST Generating Facilities, any other equipment, as determined by SCE, must be verified as having safety certification from a Nationally Recognized Testing Laboratory ("NRTL").
- 4.5 Customer shall not commence parallel operation of the Generating Facility until written approval has been provided to it by SCE. SCE shall normally provide such written approval no later than 30 business days following SCE's receipt of (1) a completed Net Energy Metering Application including all supporting documents and required payments, (2) a completed signed Net Energy Metering Interconnection Agreement, and (3) evidence of the Applicant's final electric inspection clearance from the Local Authority having jurisdiction over the Generating Facility. If the 30-day period cannot be met, SCE shall notify Applicant and the Commission of the reason for the inability to process the interconnection request and the expected completion date.
- 4.6 SCE shall have the right to have its representatives present at the final inspection made by the governmental authority having jurisdiction to inspect and approve the installation of the Generating Facility. (N)
- 4.7 Customer shall not add generation capacity in excess of the ratings set forth in Sections 2.7 and 2.8 of this Agreement, or otherwise modify the Generating Facility without the prior written permission of SCE. (N)
- 4.8 Customers interconnecting inverter-based Generating Facilities are required to comply with the requirements of Section Hh of SCE's Electric Rule 21, including configuration of protective settings in accordance with the specifications therein. Verification of compliance with such requirements shall be provided by the Customer upon request by SCE in accordance with SCE's Electric Rule 21.

5. DISCONNECTION, INTERRUPTION OR REDUCTION OF DELIVERIES:

- 5.1 SCE may require Customer to interrupt or reduce the output of its Generating Facility under the following circumstances:
- (a) Whenever SCE deems it necessary in its sole judgment, to construct, install, maintain, repair, replace, remove, investigate, or inspect any of its equipment or any part of its electric system; or
 - (b) Whenever SCE determines in its sole judgment, that curtailment, interruption, or reduction of Customer's electrical generation is otherwise necessary due to emergencies, forced outages, force majeure, or compliance with prudent electrical practices.
- 5.2 Notwithstanding any other provision of this Agreement, upon termination of this Agreement or at any time SCE determines the continued parallel operation of the Generating Facility may endanger the public or SCE personnel, or affect the integrity of SCE's electric system or the quality of electric service provided to other customers, SCE shall have the right to require the Generating Facility to be immediately disconnected from SCE's electric system. The Generating Facility shall remain disconnected until such time as SCE is satisfied, in its sole judgment, that the condition(s) causing such disconnection have ended or have been corrected.
- 5.3 Whenever feasible, SCE shall give Customer reasonable notice of the possibility that interruption or reduction of deliveries may be required.

SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER

- 5.4 Electrical energy and capacity provided to Customer during periods of curtailment or interruption of the output of the Generating Facility shall be provided pursuant to the terms of the rate schedule(s) applicable to the electric service account to which the Generating Facility is connected.

6. ACCESS TO PREMISES:

SCE may enter Customer's premises at all times, without notice to Customer for emergency purposes only.

- (a) To inspect Customer's protective devices or check meter(s); to ascertain there is no power flow; or
- (b) To disconnect the Generating Facility and/or service to Customer, whenever in SCE's discretion, a hazardous condition exists and such immediate action is necessary to protect persons, SCE's facilities, or property of others from damage or interference caused by the Generating Facility, or the failure of properly operating protective devices.

SCE will make prior arrangements with the Customer for gaining emergency access to Customer's premises by obtaining keys to a lock box or a padlock or by making other mutually agreeable arrangements.

7. INDEMNITY AND LIABILITY:

- 7.1 Each Party as indemnitor shall defend, hold harmless, and indemnify the other Party and the directors, officers, employees, and agents of the other Party against and from any and all loss, liability, damage, claim, cost, charge, demand, or expense (including any direct, indirect or consequential loss, liability, damage, claim, cost, charge, demand, or expense, including attorneys' fees) for injury or death to persons, including employees of either Party, and damage to property, including property of either Party, arising out of or in connection with (a) the engineering, design, construction, maintenance, repair, operation, supervision, inspection, testing, protection or ownership of the indemnitor's facilities, or (b) the making of replacements, additions, betterments to, or reconstruction of the indemnitor's facilities. This indemnity shall apply notwithstanding the active or passive negligence of the indemnitee. However, neither Party shall be indemnified hereunder for its loss, liability, damage, claim, cost, charge, demand, or expense resulting from its sole negligence or willful misconduct.
- 7.2 The indemnitor shall, on the other Party's request, defend any suit asserting a claim covered by this indemnity and shall pay for all costs, including reasonable attorney fees, that may be incurred by the other Party in enforcing this indemnity.
- 7.3 The provisions of this Section shall not be construed to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.
- 7.4 Except as otherwise provided in Section 7.1, neither Party shall be liable to the other Party for consequential damages incurred by that Party.
- 7.5 Nothing in this Agreement shall create any duty to, any standard of care with reference to, or any liability to any person who is not a Party to it.
- 7.6 Notwithstanding the provisions of Section 7.1, Customer shall be responsible for protecting its Generating Facility from damage by reason of the electrical disturbances or faults caused by

**SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER**

the operation, faulty operation, or non-operation of SCE's facilities, and SCE shall not be liable for any such damage so caused.

8. GOVERNING LAW:

This Agreement shall be interpreted, governed, and construed under the laws of the State of California as if executed and to be performed wholly within the State of California.

9. CALIFORNIA PUBLIC UTILITIES COMMISSION:

- 9.1 This Agreement shall at all times be subject to such changes or modifications by the Commission as the Commission may, from time to time, direct in the exercise of its jurisdiction.
- 9.2 Notwithstanding any other provisions of this Agreement, SCE has the right to unilaterally file with the Commission, pursuant to the Commission's rules and regulations, an application for change in rates, charges, classification, service, or rule or any agreement relating thereto.

10. AMENDMENT, MODIFICATIONS, WAIVER OR ASSIGNMENT:

- 10.1 This Agreement may not be altered or modified by either of the Parties, except by an instrument in writing executed by each of them.
- 10.2 None of the provisions of this Agreement shall be considered waived by a Party unless such waiver is given in writing. The failure of a Party to insist in any one or more instances upon strict performance of any of the provisions of this Agreement or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provisions or the relinquishment of any such rights for the future, but the same shall continue and remain in full force and effect.
- 10.3 This Agreement shall supersede any existing agreement under which Customer is currently operating the Generating Facility identified in Section 2, herein, and any such agreement shall be deemed terminated as of the date this Agreement becomes effective.
- 10.4 This Agreement contains the entire agreement and understanding between the Parties, their agents, and employees as to the subject matter of this Agreement. Each party also represents that in entering into this Agreement, it has not relied on any promise, inducement, representation, warranty, agreement or other statement not set forth in this Agreement.
- 10.5 A new Customer of Record or New Party In ("NPI") who owns, leases, or rents a premises with an operating NEM Generating Facility, previously approved by SCE for Parallel Operation, does not have to submit a new interconnection agreement as long as the Customer meets the requirements of Schedule NEM or its successor, Schedule NEM-ST, as applicable. This will also apply to premises where the developer/contractor establishes the interconnection, so that the Customer who buys/rents/leases the premises will not have to re-submit and sign a new interconnection agreement.

A new Customer of Record or NPI, who owns, rents or leases a premises that includes NEM Generating Facilities with a capacity of 30 kW or less, that were approved by SCE for Parallel Operation prior to the new Customer or NPI moving in and/or taking electric service with SCE will take service on Schedule NEM or its successor, Schedule NEM-ST, as applicable, as long as the requirements of this section are met in accordance with the transition provisions contained in Schedules NEM and NEM-ST, as applicable. To be eligible, the new Customer or NPI must (1) ensure that the Generating Facility is compliant with all applicable safety and performance standards as delineated in SCE's Electric Rule 21 and other applicable tariffs in effect at the time of initial approval for Parallel Operation; (2) keep in force the amount of

**SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER**

property, commercial general liability and/or personal liability insurance the NPI or new Customer has in place at the time it initiates service on this tariff; and, (3) understand that SCE may from time to time release to the CEC and/or the Commission, information regarding the new Customer or NPI's Generating Facility, including NPI or new Customer's name and Generating Facility location, capacity and operational characteristics. SCE will provide the NPI or new Customer with (i) a copy of the interconnection agreement in effect and as signed by the previous customer, which will remain unchanged, (ii) a copy of the NEM Fact Sheet on operation and billing, and (iii) SCE's website information on the NEM or NEM-ST tariffs.

- 10.6 A new Customer or NPI who owns, rents or leases a premises that includes a NEM Generating Facility above 30 kW will need to sign a new interconnection agreement. If no changes are made to the interconnection facilities, the agreement will have identical terms and conditions as the ones approved for the previous customer.

11. NOTICES:

- 11.1 Any notice required under this Agreement shall be in writing and mailed at any United States Post Office with postage prepaid and addressed to the Party, or personally delivered to the Party, at the address below. Changes in such designation may be made by notice similarly given. All written notices shall be directed as follows:

SOUTHERN CALIFORNIA EDISON COMPANY:
Attn: NEM Program Administrator
SCE Customer Solar & Self Generation
P.O. Box 800
Rosemead, CA 91770

CUSTOMER:

Hot Purple Energy
810 N Farrell Dr, Palm Springs CA 92262

- 11.2 Customer's notices to SCE pursuant to this Section shall refer to the Generating Facility Identification Number that is set forth in Section 2.1

12. TERM AND TERMINATION OF AGREEMENT:

- 12.1 This Agreement shall become effective when SCE issues written authorization to interconnect the Generating Facility after receipt of all required documents and payments, and this completed Agreement signed by the Customer and SCE, and shall remain in effect thereafter from month to month unless terminated by either Party on thirty (30) days' prior written notice in accordance with Section 11.
- 12.2 This Agreement shall terminate, without notice, upon: (a) termination of the electric distribution service provided to Customer by SCE; or (b) changes to Customer's electric load which cause Customer to no longer satisfy all requirements of the definition of an Eligible Customer-Generator, as set forth in Sections 2827(b)(4) or 2827.1(a) of the California Public Utilities Code; or (c) termination of Customer's NEM arrangements with its Electric Service Provider, Community Choice Aggregator or Community Aggregator.

13. TRANSITION PROVISIONS:

- 13.1 Customers receiving service on Schedule NEM, or who have submitted all documentation necessary for receiving service on Schedule NEM, prior to SCE reaching its NEM trigger level

SOUTHERN CALIFORNIA EDISON COMPANY
NET ENERGY METERING AND RENEWABLE ELECTRICAL GENERATING
FACILITY INTERCONNECTION AGREEMENT FOR GENERATING
FACILITIES SIZED ONE MEGAWATT AND SMALLER

or July 1, 2017, whichever is earlier, are subject to the transition provisions as outlined in Schedule NEM.

- 13.2 Customers receiving service on Schedule NEM-ST, or who have submitted all documentation necessary for receiving service on Schedule NEM-ST, are subject to the transition provisions as outlined in Schedule NEM-ST.

14. SIGNATURES:

This Agreement may be executed in counterparts, and by Electronic Signature on the part of SCE and/or the Customer, and copies of a Party's signed signature page may be transmitted to the other Party by facsimile or other electronic means. Copies of the signature page so transmitted may be used for the purpose of enforcing the terms of this Agreement as though they were originals and will not be made inadmissible in any legal or regulatory proceeding concerning this Agreement on the basis of the Best Evidence Rule or similar rule of admissibility.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by their duly authorized representatives. This Agreement is effective as provided in Section 12.1 above.

Balance forward	\$0.00
Your new charges	\$3.82

Total amount you owe by 05/10/21 \$3.82

Understand Net Energy Metering (NEM) billing

You are billed annually for your energy charges because they can be offset by energy credits over your 12-month billing period. Any charges not offset by credits will become due at the end of your 12-month billing period.

You also receive a monthly bill. It reflects the minimum amount due each month, which supports the cost of maintenance and operation for providing electricity.

Stay informed about your annual bill

Your new charges Due monthly	Year-to-date charges: \$2,332.59 Settled at end of 12-month billing period (on or about 07/25/21)
If you pay only this month's new charges, you may owe a large amount at the end of your 12-month billing period.	You may make additional payments anytime. Payments will not show up in your year-to-date charges. They will create a credit on your account. Any remaining balance forward will be settled against any charges in your 12-month settlement bill. You are in billing month 9 of 12.

Your cost varies by time of day

Important information

What are my options for paying my bill?

On-line	Pay one-time or recurring on www.sce.com/bill
Mail-in	Check or Money order
In Person	Authorized payment locations 1-800-747-8908
Phone	QuickCheck 1-800-950-2356
	Debit & credit card * 1-800-254-4123

*Residential customers only

Electronic check processing

Your check payment will be processed as a one-time Electronic Fund Transfer (EFT). With EFTs, funds may be withdrawn from your account the day we receive your payment. Your check will not be returned, but will appear on your financial statement.

Rates and applicable rules: Available at www.sce.com or upon request.

Past due bills

When is my bill past due? It is past due 19 days after the preparation date, which was 04/17/21.

- Reconnecting service that has been disconnected requires a Service Connection payment.
- Unable to pay: If payment arrangements were not extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission.
- For safety reasons, if service is disconnected, please ensure any sensitive or potentially hazardous equipment is unplugged on the day of reconnection. For additional home safety tips, visit www.sce.com/safety or call SCE at 1-800-655-4555.

What is the Late Payment Charge (LPC)?

0.7% will be applied to the total unpaid balance if payment is not received by the due date on this bill (except for CARE and state agency accounts).

What is a rotating outage?

Rotating outages are controlled electrical outages used to avoid widespread or uncontrolled blackouts. Your Rotating Outage Group number is located on page 1, upper left, of your SCE bill. Your rotating outage group number may change at any time. For more information, visit www.sce.com/rotating-outage.

Disputed bills

If you believe there is an error on your bill or have a question about your service, please call Southern California Edison (SCE) customer support at 1-800-655-4555. If you are not satisfied with SCE's response, submit a complaint to the California Public Utilities Commission (CPUC) at www.cpuc.ca.gov/complaints/. The CPUC's Consumer Affairs Branch (CAB) handles billing and service complaints and can be reached by:

Telephone 1-800-649-7570 (8:30 AM - 4:30 PM, Monday - Friday)

Mail CPUC, Consumer Affairs Branch, 505 Van Ness Ave., Room 2003, San Francisco, CA 94102

If you have limitations hearing or speaking, contact the California Relay Service, which is for those needing assistance relaying telephone conversations. Dial 711 or one of the numbers below to be routed to a California Relay Service provider in your preferred mode of communication.

Type of Call	English	Spanish
TTY/VCO/HCO to Voice	1-800-735-2929	1-800-855-3000
Voice to TTY/VCO/HCO	1-800-735-2922	1-800-855-3000
Speech-to-Speech Relay	1-800-854-7784	1-800-854-7784

To avoid having service turned off while waiting for the outcome of a complaint to the CPUC regarding the accuracy of your bill, contact CAB for assistance. If your case meets the eligibility criteria, CAB will instruct you on how to mail a check or money order to be impounded pending resolution of your case. You must continue to pay your current charges while your complaint is reviewed to keep your service turned on.

Definitions

- **Baseline Credit:** The baseline credit provides reduced electricity rates on electricity used up to the baseline allocation for the region that you live in.
- **CA Climate Credit:** Credit from state effort to fight climate change. Applied monthly to eligible businesses and semi-annually to residents.
- **DWR Bond Charge:** Bonds issued by the Department of Water Resources (DWR) to cover the cost of buying power during the energy crisis are being repaid through this charge.
- **Public Purpose Programs Charge:** Funds state-mandated programs for low income discounts, energy efficiency, renewable energy and R&D.
- **SCE Generation:** For recovering energy procurement and generation costs for that portion of your energy provided by SCE.

To change your contact information, complete the form below and return it to SCE

- Net Surplus Compensation option: Rollover

Things you should know

Changes to DWR Bond Charge on your bill

As of October 1, 2020, the DWR Bond Charge is being collected to support Californias Wildfire Fund. This charge is no longer being used to repay bonds issued by the California Department of Water Resources (DWR) to cover the costs of buying power during the 2001-02 energy crisis. For more information on this change, please visit www.sce.com/understandyourbill.

Have you received a past due notice containing service disconnection language, or are you having trouble paying your bill?

For residential customers, SCE has suspended service disconnections for nonpayment and waived late fees because of the hardships caused by COVID-19, but Past Due notices containing service disconnection language may still be sent. SCE has also eliminated service reconnection fees for residential customers. If you are a residential customer and have received a Past Due notice containing service disconnection language or you are having trouble paying your bill, please call 1-800-950-2356 to discuss how we can help.

You may qualify for bill payment options (including a 12-month payment plan) and financial programs available to assist you such as SCEs CARE and FERA programs, which can help to reduce your bill. We can also connect you with community agencies that can provide additional assistance to you, and you may also qualify for SCEs Energy Savings Assistance (ESA) program for income-qualified residential customers. For more information, please visit www.sce.com/billhelp. Some CARE/FERA customers may also qualify to participate in SCEs Arrearage Management Plan (AMP), which offers forgiveness of eligible past due bill amounts when on-time payments of current charges are made. To learn more about AMP, please call 1-800-655-4555 or visit www.sce.com/careandfera.

You Received a California Climate Credit

California is fighting climate change and so can you! Your bill includes a Climate Credit from a state program to cut carbon pollution while also reducing your energy costs. Find out how at EnergyUpgradeCA.org/credit.

Understand Net Energy Metering (NEM) billing

You are billed annually for your energy charges because they can be offset by energy credits over your 12-month billing period. Any charges not offset by credits will become due at the end of your 12-month billing period.

You also receive a monthly bill. It reflects the minimum amount due each month, which supports the cost of maintenance and operation for providing electricity.

Stay informed about your annual bill

Your new charges Due monthly	Year-to-date charges: \$2,281.67 Settled at end of 12-month billing period (on or about 08/13/21)
If you pay only this month's new charges, you may owe a large amount at the end of your 12-month billing period.	You may make additional payments anytime. Payments will not show up in your year-to-date charges. They will create a credit on your account. Any remaining balance forward will be settled against any charges in your 12-month settlement bill.
	You are in billing month 8 of 12.

Electronic check processing

Your check payment will be processed as a one-time Electronic Fund Transfer (EFT). With EFTs, funds may be withdrawn from your account the day we receive your payment. Your check will not be returned, but will appear on your financial statement.

Rates and applicable rules: Available at www.sce.com or upon request.

Past due bills

When is my bill past due? It is past due 19 days after the preparation date, which was 03/20/21.

- Reconnecting service that has been disconnected requires a Service Connection payment.
- Unable to pay: If payment arrangements were not extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission.
- For safety reasons, if service is disconnected, please ensure any sensitive or potentially hazardous equipment is unplugged on the day of reconnection. For additional home safety tips, visit www.sce.com/safety or call SCE at 1-800-655-4555.

What is the Late Payment Charge (LPC)?

0.7% will be applied to the total unpaid balance if payment is not received by the due date on this bill (except for CARE and state agency accounts).

What is a rotating outage?

Rotating outages are controlled electrical outages used to avoid widespread or uncontrolled blackouts. Your Rotating Outage Group number is located on page 1, upper left, of your SCE bill. Your rotating outage group number may change at any time. For more information, visit www.sce.com/rotating_outage.

Disputed bills

If you believe there is an error on your bill or have a question about your service, please call Southern California Edison (SCE) customer support at 1-800-655-4555. If you are not satisfied with SCE's response, submit a complaint to the California Public Utilities Commission (CPUC) at www.cpuc.ca.gov/complaints/. The CPUC's Consumer Affairs Branch (CAB) handles billing and service complaints and can be reached by:

Telephone 1-800-649-7570 (8:30 AM - 4:30 PM, Monday - Friday)

Mail CPUC, Consumer Affairs Branch, 505 Van Ness Ave., Room 2003, San Francisco, CA 94102

If you have limitations hearing or speaking, contact the California Relay Service, which is for those needing assistance relaying telephone conversations. Dial 711 or one of the numbers below to be routed to a California Relay Service provider in your preferred mode of communication.

Type of Call	English	Spanish
TTY/VCO/HCO to Voice	1-800-735-2929	1-800-855-3000
Voice to TTY/VCO/HCO	1-800-735-2922	1-800-855-3000
Speech-to-Speech Relay	1-800-854-7784	1-800-854-7784

To avoid having service turned off while waiting for the outcome of a complaint to the CPUC regarding the accuracy of your bill, contact CAB for assistance. If your case meets the eligibility criteria, CAB will instruct you on how to mail a check or money order to be impounded pending resolution of your case. You must continue to pay your current charges while your complaint is reviewed to keep your service turned on.

Total electricity usage this month in kWh	808

Your next billing cycle for meter 222020-034075 will end on or about 02/17/21.

Consumption is the total amount of electricity imported from SCE.

Net generation is the amount of excess electricity exported to the grid by your generating system.

Total electricity usage is your system's total net generation minus your total consumption.

Things you should know

DIRECT PAYMENT INFORMATION.....

We will automatically debit the total amount due, \$30.72, from your checking account on or after 01/31/21. Your bank may place a hold on these funds prior to that date. Thank you!

Change to NEM Monthly Billing Option

Currently, your non-energy (public purpose programs, tax and fees) are due monthly. Your energy charges are tracked, but not due until your 12-month settlement bill. If you sign up for the NEM Monthly Billing Option, all charges will be due and payable each month. Requesting monthly billing is easy, call us at 1-866-701-7868. To learn more about NEM billing go to on.sce.com/nembillcalc.

Changes to DWR Bond Charge on your bill

As of October 1, 2020, the DWR Bond Charge is being collected to support California's Wildfire Fund. This charge is no longer being used to repay bonds issued by the California Department of Water Resources (DWR) to cover the costs of buying power during the 2001-02 energy crisis. For more information on this change, please visit sce.com/understandyourbill.

Our Call Center Hours Have Changed

Effective February 1, 2021, our Customer Service Representatives will be available to assist you Monday through Friday, from 7 a.m. - 7 p.m. and Saturdays from 8 a.m. - 5 p.m. We are still here 24 hours a day, 7 days a week for outage and emergency calls. For assistance or more information, visit sce.com/customer-service/contact-us.

Additional information regarding your Net Consumption/Generation:

- Your year-to-date energy charges total as of previous month: \$2,068.17
- Your current month energy charge total: \$106.82
- Your year-to-date energy charges: \$2,174.99
- Your year-to-date kWh: 10,710 kWh

Things you should know

Have you received a past due notice or are you having trouble paying your bill?

For residential customers, SCE has suspended service disconnections for nonpayment and waived late fees because of the hardships caused by COVID-19, but Past Due notices may still be sent. SCE has also eliminated service reconnection fees for residential customers. If you are a residential customer and have received a Past Due notice or you are having trouble paying your bill, please call 1-800-950-2356 to discuss how we can help.

You may qualify for bill payment options (including a 12-month payment plan) and financial programs available to assist you such as SCE's CARE and FERA programs, which can help to reduce your bill. We can also connect you with community agencies that can provide additional assistance to you, and you may also qualify for SCE's Energy Savings Assistance (ESA) program for income-qualified residential customers. For more information, please visit www.sce.com/billhelp.

What's on your bill?

Nonbypassable charges (NBCs), which are comprised of DWR Bond Charge (DWRBC), Competition Transition Charge (CTC), Nuclear Decommissioning Charge (NDC), and Public Purpose Programs Charge (PPPC) are assessed on the kWh consumed in each metered interval of the current billing period and billed monthly. For more information, please refer to your rate tariff sheet available on SCE.com.

Thank you for your participation in SCE's NEM program.

Electronic check processing

Your check payment will be processed as a one-time Electronic Fund Transfer (EFT). With EFTs, funds may be withdrawn from your account the day we receive your payment. Your check will not be returned, but will appear on your financial statement.

Rates and applicable rules: Available at www.sce.com or upon request.

Past due bills

When is my bill past due? It is past due 19 days after the preparation date, which was 01/21/21.

- Reconnecting service that has been disconnected requires a Service Connection payment.
- Unable to pay: If payment arrangements were not extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission.
- For safety reasons, if service is disconnected, please ensure any sensitive or potentially hazardous equipment is unplugged on the day of reconnection. For additional home safety tips, visit www.sce.com/safety or call SCE at 1-800-655-4555.

What is the Late Payment Charge (LPC)?

0.7% will be applied to the total unpaid balance if payment is not received by the due date on this bill (except for CARE and state agency accounts).

What is a rotating outage?

Rotating outages are controlled electrical outages used to avoid widespread or uncontrolled blackouts. Your Rotating Outage Group number is located on page 1, upper left, of your SCE bill. Your rotating outage group number may change at any time. For more information, visit www.sce.com/rotating_outage.

Disputed bills

If you believe there is an error on your bill or have a question about your service, please call Southern California Edison (SCE) customer support at 1-800-655-4555. If you are not satisfied with SCE's response, submit a complaint to the California Public Utilities Commission (CPUC) at www.cpuc.ca.gov/complaints/. The CPUC's Consumer Affairs Branch (CAB) handles billing and service complaints and can be reached by:

Telephone 1-800-649-7570 (8:30 AM - 4:30 PM, Monday - Friday)

Mail CPUC, Consumer Affairs Branch, 505 Van Ness Ave., Room 2003, San Francisco, CA 94102

If you have limitations hearing or speaking, contact the California Relay Service, which is for those needing assistance relaying telephone conversations. Dial 711 or one of the numbers below to be routed to a California Relay Service provider in your preferred mode of communication.

Type of Call	English	Spanish
TTY/VCO/HCO to Voice	1-800-735-2929	1-800-855-3000

DIRECT PAYMENT INFORMATION.....

We will automatically debit the total amount due, \$13.27, from your checking account on or after 12/29/20. Your bank may place a hold on these funds prior to that date. Thank you!

Change to NEM Monthly Billing Option

Currently, your non-energy (public purpose programs, tax and fees) are due monthly. Your energy charges are tracked, but not due until your 12-month settlement bill. If you sign up for the NEM Monthly Billing Option, all charges will be due and payable each month. Requesting monthly billing is easy, call us at 1-866-701-7868. To learn more about NEM billing go to on.sce.com/nembillcalc.

Changes to DWR Bond Charge on your bill

As of October 1, 2020, the DWR Bond Charge is being collected to support California's Wildfire Fund. This charge is no longer being used to repay bonds issued by the California Department of Water Resources (DWR) to cover the costs of buying power during the 2001-02 energy crisis. For more information on this change, please visit sce.com/understandyourbill.

Our Call Center Hours Have Changed

Effective February 1, 2021, our Customer Service Representatives will be available to assist you Monday through Friday, from 7 a.m. - 7 p.m. and Saturdays from 8 a.m. - 5 p.m. We are still here 24 hours a day, 7 days a week for outage and emergency calls. For assistance or more information, visit sce.com/customer-service/contact-us.

Additional information regarding your Net Consumption/Generation:

- Your year-to-date energy charges total as of previous month: \$1,958.66
- Your current month energy charge total: \$109.51
- Your year-to-date energy charges: \$2,068.17
- Your year-to-date kWh: 9,902 kWh

Things you should know

Have you received a past due notice or are you having trouble paying your bill?

For residential customers, SCE has suspended service disconnections for nonpayment and waived late fees because of the hardships caused by COVID-19, but Past Due notices may still be sent. SCE has also eliminated service reconnection fees for residential customers. If you are a residential customer and have received a Past Due notice or you are having trouble paying your bill, please call 1-800-950-2356 to discuss how we can help.

You may qualify for bill payment options (including a 12-month payment plan) and financial programs available to assist you such as SCE's CARE and FERA programs, which can help to reduce your bill. We can also connect you with community agencies that can provide additional assistance to you, and you may also qualify for SCE's Energy Savings Assistance (ESA) program for income-qualified residential customers. For more information, please visit www.sce.com/billhelp.

What's on your bill?

Nonbypassable charges (NBCs), which are comprised of DWR Bond Charge (DWRBC), Competition Transition Charge (CTC), Nuclear Decommissioning Charge (NDC), and Public Purpose Programs Charge (PPPC) are assessed on the kWh consumed in each metered interval of the current billing period and billed monthly. For more information, please refer to your rate tariff sheet available on SCE.com.

Thank you for your participation in SCE's NEM program.

SOUTHERN CALIFORNIA EDISON'S ELECTRIC RATE OPTIONS 2

Para solicitar una copia en español de esta notificación, por favor escriba a:

Southern California Edison
P.O. Box 800, G.O. 1, Quad 4A
Rosemead, CA 91770
a la atención de Comunicaciones Corporativas,
o visita www.sce.com/avisos.

Below are brief descriptions of various rate options for Southern California Edison's (SCE) residential customers.

SCE provides these descriptions to help customers understand what rate options are available to help manage monthly electric bills. Your current rate is listed on your electric bill. Your bill separates the costs of generation and costs related to the delivery of electricity. The charges for generation include costs related to the operation of SCE's electric generating plants, plus the cost of purchasing power from other sources. The California Department of Water Resources (DWR) obtained electricity on behalf of SCE. SCE has repaid the cost of the associated contracts and is now returning the cash reserves held to support the contracts through the DWR Energy Credit. The credit will end once the reserves are fully repaid to customers. Eligibility requirements, terms and conditions apply and may vary for each rate schedule.

Please refer to SCE's Tariff Books for a complete list of terms and conditions of service www.sce.com/tariffbooks or call us at 1-800-655-4555 to see if you qualify for one of the energy and money-saving rates below.

RATE SCHEDULES

Domestic (D): This rate schedule serves domestic customers and is applicable to those who are individually metered by SCE and who live in single-family accommodations or individually metered single-family dwellings in a Multifamily Accommodation (e.g., houses, townhouses, condominiums, apartments, rental units, manufactured houses or mobile homes). Schedule D has a lower energy rate for all electricity used up to the Baseline* amount. Energy used up to this point is considered Tier 1 usage. Electricity used above Baseline (Tiers 2 and 3) is priced higher. Schedule D also has a daily Basic Charge and Minimum Charge that are independent of the energy charges and cover a portion of costs for services such as meter reading and customer billing. Beginning January 1, 2017, any usage that exceeds 400% of your baseline allocation will be charged at the High Usage Charge rate.

* Baseline

"Baseline" refers to a specific amount of energy allocated to residential customers for the essential portion of energy use for such things as lighting, cooking, heating and refrigeration. The baseline allocation, or Tier 1 usage, is charged at a lower rate than energy used in excess of that amount. As usage increases beyond the Tier 1 allocation, the price for energy in each subsequent tier is charged at a higher rate. This rate structure is meant to incentivize energy conservation. California's regulated energy utilities are mandated to allocate a Baseline quantity to each residential customer, based on that customer's geographic area, the season (winter or summer), and whether the customer has a single source of energy (i.e., if the customer's home is "all electric") or a combination of gas and electric ("basic" service). Customers can check the "Details of your new charges" section of their bills to see which tier their usage falls into each month.

Medical Baseline is an additional allowance of kilowatt hours (kWh) charged at the Baseline rate, and is available to customers or their household members who require the regular use of electrical life support or essential medical equipment, or have a qualifying illness. The standard Medical Baseline allocation is 16.5 kWh per day, in addition to the daily Baseline allocation residential customers receive.

Schedule D customers may be eligible for other rate options that could further lower their electric bills, such as:

Domestic Summer Discount Plan (D-SDP): This plan is applicable to domestic service customers residing in individually metered, single-family accommodations with central air conditioning, in which a portion of the customer's electrical air conditioning load is subject to disconnection, as initiated by an SDP Event Trigger, from SCE's service by SCE through a direct load control device, with or without optional customer-controlled override capabilities. This plan is not applicable to customers receiving a Medical Baseline Allocation for air conditioning. To participate in this plan, customers must have an appropriate SCE-direct load control device installed, programmed, and activated.

Domestic - California Alternate Rates for Energy (D-CARE): This program provides reduced rates for income-qualified customers. Schedule D-CARE rates are approximately 30 percent lower than rates contained in Schedule D. Household income must be at or less than the CARE income guidelines, defined as 200 percent of the Federal Poverty Guidelines. Qualifying income guidelines are shown on the CARE application. This rate may also be applicable with other residential rate schedules.

Domestic - Family Electric Rate Assistance (D-FERA): This program offers a discounted rate to income-qualified households. There must be a minimum of three or more persons residing in a household and the total household income must be at or less than 250 percent of the Federal Poverty Guidelines. Schedule D-FERA rates are on average 12 percent lower than rates contained in Schedule D. Qualifying income guidelines are shown on the FERA application. FERA is not available to CARE customers.

Edison SmartConnect Opt-Out - ESC-OO This rate is available to residential customers who do not wish to have a wireless, communicating meter, known as Edison SmartConnect[®] meter, installed at their Premises (hereafter, "Opt-Out Customers"). Under this schedule, Opt-Out Customers shall receive service using the meter or meter form that had been installed at the customer's Premises prior to the installation of an Edison SmartConnect meter (i.e. analog or non-analog, non-smart digital meter). There is a one-time initial fee and a reoccurring monthly fee to opt-out which applies for three years from the time the customer elects to opt-out.

Critical Peak Pricing (CPP): The CPP rate offers a discount during the summer months for bundled service customers (those whose electric power, transmission, distribution, billing, metering and related services are provided by SCE). The customer must have an interval meter or an Edison SmartConnect (CR) program-ready meter. When electricity demand and prices climb, SCE will activate CPP "events" (weekdays from 4:00 p.m. - 9:00 p.m., excluding holidays) during which energy charges increase significantly. However, if customers reduce or reschedule usage to lower demand times of day during these events, CPP may help lower electric bills. Participants receive bill protection up to the first 12 months. Customers who receive Medical Baseline allocation(s), customers served under Schedule TOU-EV-1, or customers served under the Smart Energy Program option are not eligible for service under this rate.

(continued)

Customers who use most of their electricity during “off-peak” hours could benefit from a Time-of-Use (TOU) rate schedule.

Time-of-Use Domestic (TOU-D): TOU-D is applicable to customers eligible for service under Schedule D, Schedule D-CARE, and Schedule D-FERA. Schedule TOU-D has 10 rate options: Option 4-9 PM, Option 4-9 PM-CPP, Option 5-8 PM, Option 5-8 PM-CPP, Option PRIME, Option PRIME- CPP, and TOU Period Grandfathering Option A, Option A-CPP, Option B and Option B-CPP. Option 4-9 PM and Option PRIME have an on-peak time period of 4:00 pm. to 9:00 p.m. and Option 5-8 PM has an on-peak period of 5:00 pm. to 8:00 p.m. Option PRIME is a new Option intended for higher usage customers that have load-modifying electric technologies, including those who have electric vehicles (EVs), behind-the-meter (BTM) energy storage systems and/or electric heat pumps. Customers who have EV load that is separately metered under Schedule TOU-EV-1 are ineligible for service under this Schedule for the TOU-EV-1 account. Option A and Option B are only available to customers meeting the TOU Period Grandfathering eligibility criteria, and existing customers receiving service on Option A and Option B as of March 1, 2019. Option A is for lower-usage customers, while Option B is for higher-usage customers. Option A contains fixed charges similar to Schedule D but has a baseline credit and higher energy charges. Option B has no baseline credit, a fixed charge, and lower energy charges. Lower rates may be achieved with Schedule TOU-D Options A and B if the customer reduces usage between the on-peak period of 2:00 p.m. and 8:00 p.m. weekdays, except holidays.

Time-of-Use Tiered Domestic (TOU-D-T): As of March 1, 2019, this Schedule is closed to new Customers. Schedule TOU-D-T is a seasonal time-of-use rate with a level pricing structure (Level 1 is up to 130% of Baseline, and Level 2 is more than 130% of Baseline). TOU-D-T is applicable to customers eligible for service under Schedule D, D-CARE, and D-FERA. Lower rates may be achieved with TOU-D-T if the customer reduces usage between the on-peak period of 12:00 p.m. and 6:00 p.m. weekdays, except holidays.

Time-of-Use Electric Vehicle (TOU-EV-1): This rate is designed for residential customers who charge their electric vehicle(s) at their primary residence, on a separate meter provided by SCE. **On-peak hours for TOU-EV-1** are noon to 9:00 p.m., all year, every day; **off-peak** hours are all other hours. Under this schedule, customers receive substantial savings if they charge their electric vehicle(s) during off-peak hours. As of March 1, 2019, this Schedule is closed to new Customers. Customers who requested service on this Schedule prior to March 1, 2019 are eligible to continue receiving service on this Schedule.

Smart Energy Program (SEP): This is an optional program offering annual bill credits to eligible bundled service customers who have technology installed at the home authorized by SCE for direct participation in energy events. Presently, Wi-Fi enabled smart thermostats controlling a working central air conditioning system supported by an SCE approved third party entity are the only technology available for participation in the Smart Energy Program. This program is only available to residential customers with an Edison SmartConnect® meter. Smart Energy Program is not applicable to customers enrolled in any other Demand Response program, such as Summer Discount Plan, or customers receiving a Medical Baseline allocation. Smart Energy Program events can be called for up to 4 hours per day between 11:00 a.m. and 8:00 p.m. on non-holiday weekdays.

Bundled Service Customer Interval Meter Ownership (BSC-IMO): This option is available to bundled service customers (BSC) who replace an existing meter or install retrofit metering facilities in accordance with Schedule CC-DSF (see below). Meter reading services and billing services under this schedule are provided solely by SCE. A BSC is a customer who is not served under Direct Access.

Cost Responsibility Surcharge (DA-CRS, CCA-CRS, CGDL-CRS): Cost Responsibility Surcharges (CRS) are applicable to Customer Generation Departing Load (CGDL), Direct Access (DA) Service customers, Community Aggregation (CA) customers, and Community Choice Aggregation (CCA) customers.

Community Choice Aggregation Service (CCA Service): Cities, counties, a Joint Power Authority, and certain other public agencies whose governing boards have elected to act as Community Choice Aggregators can purchase and sell electricity on behalf of utility customers within their service area(s). Under CCA Service, a Community Choice Aggregator is solely responsible for procuring and providing for the electric power needs (including ancillary services) of its customers, ensuring resource adequacy and renewable portfolio requirements for these customers, and scheduling and settling with the California Independent System Operator (CAISO). Community Choice Aggregators are required to meet certain requirements with the California Public Utilities Commission in addition to meeting financial and technical requirements with SCE. CCA customers are subject to additional charges as explained in Schedules CCA-CRS and CCA-SF.

Direct Access (DA) Service: Direct Access refers to any end-use SCE customer electing to procure its electricity directly from an Electric Service Provider. Pursuant to Decision 10-03-022, residential customers receiving DA Service prior to March 11, 2010 may continue to be served under DA Service, but effective on March 11, 2010, the right to transfer to DA Service is closed to residential customers.

Direct Participation Demand Response Service (DPDR Service): DPDR Service is offered by the CAISO and allows a Demand Response Provider (DRP) or a retail customer to participate or “bid-in” directly into the CAISO wholesale energy market for compensation by the CAISO, in accordance with the market awards and dispatch instructions established by the CAISO.

Customer Choice Discretionary Service Fees (CC-DSF): This rate schedule is applicable to DPDR, DA, CA, and CCA Service customers purchasing metering services; Bundled Service customers electing a rate option that requires the use of interval data recorder (IDR) metering facilities; or customers requesting IDR metering and/or metering facilities in substitution for or in addition to standard facilities.

Generation Municipal Surcharge (GMS): This rate is applicable to DA customers, CCA Service customers, CA customers, or any SCE Delivery Service customer who receives generation service from a supplier other than SCE. Certain exemptions may apply.

Multifamily Affordable Solar Housing Virtual Net Metering (MASH-VNM and MASH-VNM-ST): This rate is applicable to qualified customers whose service account(s) is located at an income-qualified residential complex on the same premises upon which one or more eligible generators are installed, and where the owner or operator of the complex contracts with SCE to have all of the eligible energy produced from the generator supplied to SCE for the purpose of providing allocated credits [in kilowatt-hours (kWh)] to the residential complex's common area and/or tenant service accounts to offset energy usage. The owner or operator is also eligible for up-front incentives, subject to funding availability. Service under Schedule MASH-VNM was closed to new customers on July 1, 2017. Beginning July 1, 2017, MASH-VNM-ST (MASH-VNM Successor Tariff) is available to customers and the same program details apply as MASH-VNM with some differences. The generating facility still must be sized to offset a portion or all of the customer's own electrical requirements; yet the generating capacity of 1 MW or less no longer applies; Interconnection fees now apply; and residential customers are required to be served on a time-of-use rate, certain exceptions apply.

Net Energy Metering (NEM, NEM-ST and FC-NEM): These optional rates serve customers who install eligible renewable generating facilities on their premises for the purpose of generating electricity to offset part or all of their own electrical requirements. A customer must produce electricity with a generating facility using any of the renewable sources listed in Section 25741 of the Public Resources Code* or fuel cells as defined in PU Code Section 2827.10. The generating facility must be sized to offset a portion or all of the customer's own electrical requirements, up to a maximum generating capacity of 1 MW or less per premises. Customers must execute a NEM Interconnection Agreement prior to receiving service under one of these rate schedules. To be eligible for service under Schedule FC-NEM, the customer must commence operation of the generating facility prior to January 1, 2022 or the date SCE reaches its FC-NEM program cap. Service under Schedule NEM was closed to new customers on July 1, 2017. Beginning July 1, 2017, NEM-ST (NEM Successor Tariff) is available to customers and the same program details apply as NEM with some differences. The generating facility still must be sized to offset a portion or all of the customer's own electrical requirements; yet the generating capacity of 1 MW or less no longer applies; Interconnection fees now apply; and residential customers are required to be served on a time-of-use rate, certain exceptions apply. (continued)

Virtual Net Energy Metering for Multi-Tenant and Multi-Meter Properties (NEM-V and NEM-V-ST): This optional rate is applicable to qualified customers whose service account(s) are located within a multi-tenant and multi-meter property that includes all residential, commercial and industrial properties on which an eligible generator(s) has been installed at the same service delivery point and for which the owner or operator of the property contracts with SCE to have all eligible energy produced by the eligible generator and exported to the grid supplied to SCE for the sole purpose of providing allocated credits to service accounts served by the same service delivery point as the generator within the property. Service under Schedule NEM-V was closed to new customers on July 1, 2017. Beginning July 1, 2017, NEM-V-ST (NEM-V Successor Tariff) is available to customers and the same program details apply as NEM-V with some differences. The generating facility still must be sized to offset a portion or all of the customer's own electrical requirements; yet the generating capacity of 1 MW or less no longer applies; Interconnection fees now apply; and residential customers are required to be served on a time-of-use rate, certain exceptions apply.

Solar On Multifamily Affordable Housing Virtual Net Metering (SOMAH-VNM): This rate is applicable to qualified customers whose service account(s) are located at a residential complex on the same premises upon which one or more eligible generators have been installed, and for which the owner or operator of the residential complex contracts with SCE to have all eligible energy produced by the eligible generator(s) supplied to SCE for the sole purpose of providing allocated credits to the residential complex's common area and tenant service accounts primarily to offset electricity usage by tenants. Owners or operators receive an incentive under the SOMAH program.

Green Tariff Shared Renewables - Green Rate (GTSR GR): This rate option is available to Bundled Service customers who elect to participate in one of two optional GTSR programs for the purposes of having SCE procure additional renewable resources from GTSR facilities to meet customer subscriptions. This rate option is available on a first-come, first served basis until the earlier of the date that customer subscriptions served under the Green Rate and Community Renewables programs reach 269 megawatts or the implementation of a California Public Utilities Commission-approved replacement Program.

Green Tariff Shared Renewables - Community Renewables (GTSR CR): This rate option is available to Bundled Service customers who elect to participate in one of two optional GTSR program for the purposes of receiving a bill credit from SCE to reflect the customer's subscription in a Community Renewables (CR) facility. Customers electing this option must enter into a Customer Developer Agreement (CDA) with the developer of the CR Facility to which the customer wishes to subscribe and consent to the developer providing information about the customer's subscription to SCE on a regular basis in order for SCE to accurately bill the customer. This rate option is available on a first-come, first-served basis until the earlier of the date that customer subscriptions served under the Community Renewables and Green Rate programs reach 269 megawatts or the implementation of a California Public Utilities Commission-approved replacement Program.

*The renewable sources included in Section 25741 of the Public Resources Code are biomass, solar thermal, photovoltaic, wind, geothermal, fuel cells using renewable fuels, small hydroelectric generation digester gas, municipal solid waste conversion, landfill gas, ocean wave, ocean thermal, or tidal current, and any additions or enhancement to the facility using these technologies.

For more information about any of our rate options, please call 800-655-4555, visit our web site at www.sce.com/rateoptions, or write to:

Rosemead, CA 91770

(continued)

Do You Regularly Use Medical Equipment in Your Home?

If you or someone in your household requires the regular use of electrically-powered medical equipment or other qualifying medical devices, you may be eligible for SCE's Medical Baseline Allowance program. This program provides an additional 16.5 kilowatt hours (kWh) of electricity per day. Provided at the lowest baseline rate, this helps offset the cost of operating the medical equipment.

You may be eligible for the Medical Baseline Allowance if you or another full-time resident in your home:

- Requires the regular use of any electrically-powered medical/life support equipment (see the list at [sce.com/medicalbaseline](https://www.sce.com/medicalbaseline)) that mechanically or artificially sustains life or restores or replaces a vital physical function, including mobility, and/or
- Is temperature sensitive and requires air conditioning, and/or
- Has a life-threatening illness or compromised immune system or other condition that requires heating and/or cooling.

If you or someone in your home qualifies, or for questions on whether you may qualify, call us at **1-800-655-4555** or visit [sce.com/medicalbaseline](https://www.sce.com/medicalbaseline).

NOTE: All customers who depend upon electrically-operated medical or life-support equipment for survival should be prepared at all times with a back-up power system or other plans necessary to ensure their health and welfare during outages. SCE does not provide back-up generation.

Devices used for therapy but not medically required for sustaining life do not qualify for this program.

Understand Net Energy Metering (NEM) billing

You are billed annually for your energy charges because they can be offset by energy credits over your 12-month billing period. Any charges not offset by credits will become due at the end of your 12-month billing period.

You also receive a monthly bill. It reflects the minimum amount due each month, which supports the cost of maintenance and operation for providing electricity.

Get a discount on your bill every month

Your income may qualify you for discounted bills through the CARE or FERA program. To enroll or learn more, visit sce.com/careandfera or call 1-800-798-5723 (TTY 1-800-352-8580).

Recibe un descuento en tu factura cada mes

Si cumples los requisitos de ingresos, podrías recibir descuentos en tus facturas gracias a los programas CARE o FERA. Para inscribirte o obtener más información, visita sce.com/careandfera o llama al 1-800-798-5723 (TTY 1-800-352-8580).

Important information

What are my options for paying my bill?

On-line	Pay one-time or recurring on www.sce.com/bill
Mail-in	Check or Money order
In Person	Authorized payment locations 1-800-747-8908
Phone	QuickCheck 1-800-950-2356
	Debit & credit card * 1-800-254-4123

*Residential customers only

Electronic check processing

Your check payment will be processed as a one-time Electronic Fund Transfer (EFT). With EFTs, funds may be withdrawn from your account the day we receive your payment. Your check will not be returned, but will appear on your financial statement.

Rates and applicable rules: Available at www.sce.com or upon request.

Past due bills

When is my bill past due? It is past due 19 days after the preparation date, which was 11/19/20.

- Reconnecting service that has been disconnected requires a Service Connection payment.
- Unable to pay: If payment arrangements were not extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission.
- For safety reasons, if service is disconnected, please ensure any sensitive or potentially hazardous equipment is unplugged on the day of reconnection. For additional home safety tips, visit www.sce.com/safety or call SCE at 1-800-655-4555.

What is the Late Payment Charge (LPC)?

0.7% will be applied to the total unpaid balance if payment is not received by the due date on this bill (except for CARE and state agency accounts).

What is a rotating outage?

Rotating outages are controlled electrical outages used to avoid widespread or uncontrolled blackouts. Your Rotating Outage Group number is located on page 1, upper left, of your SCE bill. Your rotating outage group number may change at any time. For more information, visit www.sce.com/rotating_outage.

Disputed bills

If you believe there is an error on your bill or have a question about your service, please call Southern California Edison (SCE) customer support at 1-800-655-4555. If you are not satisfied with SCE's response, submit a complaint to the California Public Utilities Commission (CPUC) at www.cpuc.ca.gov/complaints/. The CPUC's Consumer Affairs Branch (CAB) handles billing and service complaints and can be reached by:

Telephone 1-800-649-7570 (8:30 AM - 4:30 PM, Monday - Friday)

Mail CPUC, Consumer Affairs Branch, 505 Van Ness Ave., Room 2003, San Francisco, CA 94102

If you have limitations hearing or speaking, contact the California Relay Service, which is for those needing assistance relaying telephone conversations. Dial 711 or one of the numbers below to be routed to a California Relay Service provider in your preferred mode of communication.

Type of Call	English	Spanish
TTY/VCO/HCO to Voice	1-800-735-2929	1-800-855-3000
Voice to TTY/VCO/HCO	1-800-735-2922	1-800-855-3000
Speech-to-Speech Relay	1-800-854-7784	1-800-854-7784

To avoid having service turned off while waiting for the outcome of a complaint to the CPUC regarding the accuracy of your bill, contact CAB for assistance. If your case meets the eligibility criteria, CAB will instruct you on how to mail a check or money order to be impounded pending resolution of your case. You must continue to pay your current charges while your complaint is reviewed to keep your service turned on.

Definitions

- Baseline Credit:** The baseline credit provides reduced electricity rates on electricity used up to the baseline allocation for the region that you live in.
- CA Climate Credit:** Credit from state effort to fight climate change. Applied monthly to eligible businesses and semi-annually to residents.
- DWR Bond Charge:** Bonds issued by the Department of Water Resources (DWR) to cover the cost of buying power during the energy crisis are being repaid through this charge.
- Public Purpose Programs Charge:** Funds state-mandated programs for low income discounts, energy efficiency, renewable energy and R&D.
- SCE Generation:** For recovering energy procurement and generation costs for that portion of your energy provided by SCE.

Your new charges Due monthly	Year-to-date charges: \$1,958.66 Settled at end of 12-month billing period (on or about 08/13/21)
If you pay only this month's new charges, you may owe a large amount at the end of your 12-month billing period.	You may make additional payments anytime. Payments will not show up in your year-to-date charges. They will create a credit on your account. Any remaining balance forward will be settled against any charges in your 12-month settlement bill. You are in billing month 4 of 12.

Your cost varies by time of day

Winter cost periods (Oct 01-May 31)

	Weekdays	Weekends & Holidays
Mid peak	4pm - 9pm	4pm - 9pm
Off peak	12am - 8am 9pm - 12am	12am - 8am 9pm - 12am

Change to NEM Monthly Billing Option

Currently, your non-energy (public purpose programs, tax and fees) are due monthly. Your energy charges are tracked, but not due until your 12-month settlement bill. If you sign up for the NEM Monthly Billing Option, all charges will be due and payable each month. Requesting monthly billing is easy, call us at 1-866-701-7868. To learn more about NEM billing go to on.sce.com/nembillcalc.

Changes to DWR Bond Charge on your bill

As of October 1, 2020, the DWR Bond Charge is being collected to support California's Wildfire Fund. This charge is no longer being used to repay bonds issued by the California Department of Water Resources (DWR) to cover the costs of buying power during the 2001-02 energy crisis. For more information on this change, please visit sce.com/understandyourbill.

Energy Charge Total **\$137.67**

Additional information regarding your Net Consumption/Generation:

- Your year-to-date energy charges total as of previous month: \$1,820.99
- Your current month energy charge total: \$137.67
- Your year-to-date energy charges: \$1,958.66
- Your year-to-date kWh: 9,354 kWh

Things you should know

Have you received a past due notice or are you having trouble paying your bill?

For residential customers, SCE has suspended service disconnections for nonpayment and waived late fees because of the hardships caused by COVID-19, but Past Due notices may still be sent. SCE has also eliminated service reconnection fees for residential customers. If you are a residential customer and have received a Past Due notice or you are having trouble paying your bill, please call 1-800-950-2356 to discuss how we can help.

You may qualify for bill payment options (including a 12-month payment plan) and financial programs available to assist you such as SCE's CARE and FERA programs, which can help to reduce your bill. We can also connect you with community agencies that can provide additional assistance to you, and you may also qualify for SCE's Energy Savings Assistance (ESA) program for income-qualified residential customers. For more information, please visit www.sce.com/billhelp.

What's on your bill?

Nonbypassable charges (NBCs), which are comprised of DWR Bond Charge (DWRBC), Competition Transition Charge (CTC), Nuclear Decommissioning Charge (NDC), and Public Purpose Programs Charge (PPPC) are assessed on the kWh consumed in each metered interval of the current billing period and billed monthly. For more information, please refer to your rate tariff sheet available on SCE.com.

Thank you for your participation in SCE's NEM program.

Understand Net Energy Metering (NEM) billing

You are billed annually for your energy charges because they can be offset by energy credits over your 12-month billing period. Any charges not offset by credits will become due at the end of your 12-month billing period.

You also receive a monthly bill. It reflects the minimum amount due each month, which supports the cost of maintenance and operation for providing electricity.

Stay informed about your annual bill

Your new charges Due monthly	Year-to-date charges: \$1,820.99 Settled at end of 12-month billing period (on or about 08/13/21)
If you pay only this month's new charges, you may owe a large amount at the end of your 12-month billing period.	You may make additional payments anytime. Payments will not show up in your year-to-date charges. They will create a credit on your account. Any remaining balance forward will be settled against any charges in your 12-month settlement bill.
	You are in billing month 3 of 12.

Important information

What are my options for paying my bill?

On-line	Pay one-time or recurring on www.sce.com/bill
Mail-in	Check or Money order
In Person	Authorized payment locations 1-800-747-8908
Phone	QuickCheck 1-800-950-2356
	Debit & credit card * 1-800-254-4123

*Residential customers only

Electronic check processing

Your check payment will be processed as a one-time Electronic Fund Transfer (EFT). With EFTs, funds may be withdrawn from your account the day we receive your payment. Your check will not be returned, but will appear on your financial statement.

Rates and applicable rules: Available at www.sce.com or upon request.

Past due bills

When is my bill past due? It is past due 19 days after the preparation date, which was 10/20/20.

- Reconnecting service that has been disconnected requires a Service Connection payment.
- Unable to pay: If payment arrangements were not extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission.
- For safety reasons, if service is disconnected, please ensure any sensitive or potentially hazardous equipment is unplugged on the day of reconnection. For additional home safety tips, visit www.sce.com/safety or call SCE at 1-800-655-4555.

What is the Late Payment Charge (LPC)?

0.7% will be applied to the total unpaid balance if payment is not received by the due date on this bill (except for CARE and state agency accounts).

What is a rotating outage?

Rotating outages are controlled electrical outages used to avoid widespread or uncontrolled blackouts. Your Rotating Outage Group number is located on page 1, upper left, of your SCE bill. Your rotating outage group number may change at any time. For more information, visit www.sce.com/rotating_outage.

Disputed bills

If you believe there is an error on your bill or have a question about your service, please call Southern California Edison (SCE) customer support at 1-800-655-4555. If you are not satisfied with SCE's response, submit a complaint to the California Public Utilities Commission (CPUC) at www.cpuc.ca.gov/complaints/. The CPUC's Consumer Affairs Branch (CAB) handles billing and service complaints and can be reached by:

Telephone 1-800-649-7570 (8:30 AM - 4:30 PM, Monday - Friday)

Mail CPUC, Consumer Affairs Branch, 505 Van Ness Ave., Room 2003, San Francisco, CA 94102

If you have limitations hearing or speaking, contact the California Relay Service, which is for those needing assistance relaying telephone conversations. Dial 711 or one of the numbers below to be routed to a California Relay Service provider in your preferred mode of communication.

- Your year-to-date kWh: 8,694 kWh

Things you should know

What's on your bill?

Nonbypassable charges (NBCs), which are comprised of DWR Bond Charge (DWRBC), Competition Transition Charge (CTC), Nuclear Decommissioning Charge (NDC), and Public Purpose Programs Charge (PPPC) are assessed on the kWh consumed in each metered interval of the current billing period and billed monthly. For more information, please refer to your rate tariff sheet available on SCE.com.

Thank you for your participation in SCE's NEM program.

Please visit us at www.sce.com

Public Safety Power Shutoffs

- It is not a decision we take lightly. It is done to keep you and your community safe.
- We have been able to limit the number of customers impacted by PSPS by using sectionalizing devices to de-energize segments instead of entire circuits.
- It will have to remain available as a tool to mitigate wildfire risk during severe weather and high fire potential index events.

We urge customers to update their contact information and sign up for PSPS alerts at: sce.com/outage. To learn more about Public Safety Power Shutoffs, visit: sce.com/safety/wildfire

HELPING CUSTOMERS DURING THE COVID-19 CRISIS

We've made some changes due to COVID-19, including:

- Suspending service disconnections*
- Waiving late fees*
- Only continuing critical work needed to protect public safety and reduce the risk of wildfires.

Learn more at:

sce.com/safety/coronavirus

** Applies to residential and small business customers.*

HAVE YOU BEEN FINANCIALLY IMPACTED BY COVID-19?

We've implemented new customer protections, including more ways to get financial assistance with your monthly bill during this challenging time. Learn more at:

sce.com/billhelp

Get Help If You Use Medical Equipment

If you or someone in your household requires the regular use of electrically-powered medical equipment or other qualifying medical devices, you may be eligible for our Medical Baseline Allowance program.

This program provides an additional 16.5 kilowatt hours (kWh) of electricity per day. Provided at the lowest baseline rate, this helps offset the cost of operating the medical equipment and prioritizes critical alerts and notifications if outages occur, including Public Safety Power Shutoffs.

Changes during COVID-19

Due to the COVID-19 pandemic, we have temporarily changed how to enroll and recertify for the program:

- Enrollment: You can now enroll online (link below) and without a physician's signature for a period of one year beginning March 4, 2020.
- Renewal: If you are due to renew between March 4, 2020, and March 4, 2021 we will automatically extend your enrollment for one year.

To learn more, apply online or download an application please visit sce.com/medicalbaseline or call **1-800-655-4555**.

NOTES: All customers who depend upon electrically-operated medical equipment should be prepared at all times with a back-up plan or power system to ensure their health and welfare during outages. SCE does not provide back-up generation.

Devices used for therapy but not medically required for sustaining life do not qualify for this program.

** For Santa Catalina Island gas customers, the standard Medical Baseline Allocation will be 0.822 therms per day.*

Support for Customers Affected by a Major Disaster

If you or someone you know has been affected by a disaster for which a state of emergency has been declared, please visit sce.com/disastersupport for information about consumer protections, programs and services SCE has available.

Proposition 65 Warnings

WARNING: The Safe Drinking Water and Toxic Enforcement Act of 1986, commonly referred to as Proposition 65, requires the governor to publish a list of chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. It also requires California businesses to warn the public of potential exposures to these chemicals that result from their operations.

Providing safe and reliable service to all of our customers is a top priority for Southern California Edison and we want you to be aware of these chemicals so that you can reduce exposure to chemicals associated with electricity generation and distribution. We handle all equipment and materials at our sites carefully for your good health as well as ours. However, if you are at or near our facilities and work sites, you can be exposed to the following chemicals on the state's Proposition 65 list. Reduce, limit, or avoid activities at and near the sources of exposure described below. For more information go to:

www.P65Warnings.ca.gov

1. **Diesel Generation:** Diesel Exhaust: SCE uses diesel-fueled emergency generators during emergencies and other times to help minimize the interruption of our customers' supply of electricity. The generators are used at some SCE facilities like substations and service centers, and at locations where repairs are made to the electrical system. SCE also uses diesel as the primary fuel for electricity generation on Catalina Island and in many service vehicles used throughout our service territory. Diesel engines produce exhaust as a by-product of the combustion of diesel fuel. Breathing diesel engine exhaust exposes you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. You should avoid breathing diesel fumes whenever possible.

2. **Wooden Utility Poles:** SCE uses wooden poles that have been treated with chemical preservatives. These chemicals include pentachlorophenol, which is known to the State of California to cause cancer, and petroleum products such as diesel fuel, which contains chemicals including toluene and benzene that are known to the State of California to cause cancer and birth defects or other reproductive harm. If you come into contact with a wooden utility pole or the dust, debris, soil surrounding the pole, or water runoff that may contain dust, debris, and soil previously in contact with the pole, you could be exposed to these chemicals. Avoid contact with wooden utility poles and the dust, debris, soil surrounding the poles, or water runoff that may contain dust, debris, soil surrounding the poles, or water runoff that may contain dust, debris, and soil previously in contact with the poles.

3. **Painted Structures:** SCE utilizes metal and wood structures and equipment that may have been coated with paints containing chemicals, such as lead-based paint, that are known to the State of California to cause cancer and birth defects or other reproductive harm. When the paint on these on these structures deteriorates, flakes of paint can impact the soil adjacent to the structure. To avoid exposure, you should avoid contact with any paint flakes or soil near any structure with deteriorating paint.

www.sce.com/privacynotice

SCE Workers May Inspect Electricity Meters at Any Time

Our field employees are required to randomly access and inspect the operation of Southern California Edison-owned equipment providing your home with electricity service. You can help by keeping the area around the Edison SmartConnect® meter clear of debris and obstacles.

Is Your Water Heater Safely Strapped In?

You and your household members may face a serious threat of fire, explosion, or electrocution if your water heater overturns or suffers damage to electrical wiring or plumbing during a disaster, such as an earthquake.

For that reason, California law requires that all water heaters must be braced, anchored, or strapped to avoid falling during an emergency situation.

To safely secure your water heater and to comply with California's safety requirements, have a licensed professional install an approved restraint kit to your water heater. Kits may be found at your local hardware or home improvement store.

Understand Net Energy Metering (NEM) billing

You are billed annually for your energy charges because they can be offset by energy credits over your 12-month billing period. Any charges not offset by credits will become due at the end of your 12-month billing period.

You also receive a monthly bill. It reflects the minimum amount due each month, which supports the cost of maintenance and operation for providing electricity.

Stay informed about your annual bill

Your new charges Due monthly	Year-to-date charges: \$1,665.82 Settled at end of 12-month billing period (on or about 08/13/21)
If you pay only this month's new charges, you may owe a large amount at the end of your 12-month billing period.	You may make additional payments anytime. Payments will not show up in your year-to-date charges. They will create a credit on your account. Any remaining balance forward will be settled against any charges in your 12-month settlement bill.
	You are in billing month 2 of 12.

Important information

What are my options for paying my bill?

On-line	Pay one-time or recurring on www.sce.com/bill
Mail-in	Check or Money order
In Person	Authorized payment locations 1-800-747-8908
Phone	QuickCheck 1-800-950-2356
	Debit & credit card * 1-800-254-4123

*Residential customers only

Electronic check processing

Your check payment will be processed as a one-time Electronic Fund Transfer (EFT). With EFTs, funds may be withdrawn from your account the day we receive your payment. Your check will not be returned, but will appear on your financial statement.

Rates and applicable rules: Available at www.sce.com or upon request.

Past due bills

When is my bill past due? It is past due 19 days after the preparation date, which was 09/18/20.

- Reconnecting service that has been disconnected requires a Service Connection payment.
- Unable to pay: If payment arrangements were not extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission.
- For safety reasons, if service is disconnected, please ensure any sensitive or potentially hazardous equipment is unplugged on the day of reconnection. For additional home safety tips, visit www.sce.com/safety or call SCE at 1-800-655-4555.

What is the Late Payment Charge (LPC)?

0.7% will be applied to the total unpaid balance if payment is not received by the due date on this bill (except for CARE and state agency accounts).

What is a rotating outage?

Rotating outages are controlled electrical outages used to avoid widespread or uncontrolled blackouts. Your Rotating Outage Group number is located on page 1, upper left, of your SCE bill. Your rotating outage group number may change at any time. For more information, visit www.sce.com/rotating_outage.

Disputed bills

If you believe there is an error on your bill or have a question about your service, please call Southern California Edison (SCE) customer support at 1-800-655-4555. If you are not satisfied with SCE's response, submit a complaint to the California Public Utilities Commission (CPUC) at www.cpuc.ca.gov/complaints/. The CPUC's Consumer Affairs Branch (CAB) handles billing and service complaints and can be reached by:

Telephone 1-800-649-7570 (8:30 AM - 4:30 PM, Monday - Friday)

Mail CPUC, Consumer Affairs Branch, 505 Van Ness Ave., Room 2003, San Francisco, CA 94102

If you have limitations hearing or speaking, contact the California Relay Service, which is for those needing assistance relaying telephone conversations. Dial 711 or one of the numbers below to be routed to a California Relay Service provider in your preferred mode of communication.

Type of Call	English	Spanish
TTY/VCO/HCO to Voice	1-800-735-2929	1-800-855-3000
Voice to TTY/VCO/HCO	1-800-735-2922	1-800-855-3000
Speech-to-Speech Relay	1-800-854-7784	1-800-854-7784

To avoid having service turned off while waiting for the outcome of a complaint to the CPUC regarding the accuracy of your bill, contact CAB for assistance. If your case meets the eligibility criteria, CAB will instruct you on how to mail a check or money order to be impounded pending resolution of your case. You must continue to pay your current charges while your complaint is reviewed to keep your service turned on.

Definitions

- Baseline Credit:** The baseline credit provides reduced electricity rates on electricity used up to the baseline allocation for the region that you live in.
- CA Climate Credit:** Credit from state effort to fight climate change. Applied monthly to eligible businesses and semi-annually to residents.
- DWR Bond Charge:** Bonds issued by the Department of Water Resources (DWR) to cover the cost of buying power during the energy crisis are being repaid through this charge.
- Public Purpose Programs Charge:** Funds state-mandated programs for low income discounts, energy efficiency, renewable energy and R&D.
- SCE Generation:** For recovering energy procurement and generation costs for that portion of your energy provided by SCE.

Mid peak	110 kWh x \$0.10401	\$11.44
Off peak	3,819 kWh x \$0.07435	\$283.94
Energy Charge Total		\$890.64

Additional information regarding your Net Consumption/Generation:

- Your year-to-date energy charges total as of previous month: \$775.18
- Your current month energy charge total: \$890.64
- Your year-to-date energy charges: \$1,665.82
- Your year-to-date kWh: 7,732 kWh

Things you should know

What's on your bill?

Nonbypassable charges (NBCs), which are comprised of DWR Bond Charge (DWRBC), Competition Transition Charge (CTC), Nuclear Decommissioning Charge (NDC), and Public Purpose Programs Charge (PPPC) are assessed on the kWh consumed in each metered interval of the current billing period and billed monthly. For more information, please refer to your rate tariff sheet available on SCE.com.

Thank you for your participation in SCE's NEM program.

Are you prepared?

Emergencies can happen at any time. It's more important to be prepared.

- **Build an emergency kit.** You should keep a kit at home, work and in the car.
- **Make a plan and ensure everyone in your household** understands the plan.
- **Be informed.** Learn about the disasters that could happen in your area.
- **Look for lifesaving** resources available to you and your family.

Visit us at sce.com/staysafe for more safety tips. **Stay aware. Stay safe.**

UNDERSTANDING EMF

ELECTRIC AND MAGNETIC FIELDS

Questions have been raised about the possible health effects of exposure to 60-hertz (power frequency) electric and magnetic fields (EMF*), which are found wherever you have electric power. This article contains information that will help you understand the EMF issue, plus practical tips you can use if you want to reduce your exposure at home and at work.

Campos Eléctricos y Magnéticos (EMF):

Si desea recibir información en español, comuníquese con SCE al **1-800-441-2233**.

Reviewed by: The California Public Utilities Commission (CPUC)

*The term EMF in this publication refers to extremely low frequency (ELF) 60-hertz electric and magnetic fields associated with power delivered by electric utilities. It does not refer to radio frequency (RF) waves associated with wireless communications such as cell phones.

Can EMF Harm Your Health?

Electric and magnetic fields are present wherever electricity flows - around appliances and power lines, in offices, and at schools and homes. Many researchers believe that if there is a risk of adverse health effects from usual residential exposures to EMF, it is probably just at the detection limit of human health studies; nonetheless, the possible risk warrants further investigation. The varying results from epidemiological studies, which looked at estimated EMF exposures and childhood leukemia, are consistent with a weak link. Laboratory studies, including studies investigating a possible mechanism for health effects (mechanistic studies), provide little or no evidence to support this weak link.

The results from many research studies have been evaluated by international, national, and California EMF research programs to determine whether EMF poses any health risk. Given the uncertainty of the issue, the medical and scientific communities have been unable to conclude that usual residential exposures to EMF cause health effects, or to establish any standard or level of residential exposure that is known to be either safe or harmful. These conclusions remain unchanged by recent studies.

Continued in next column

EMF continued from prior column

Magnetic Fields at Home (Measurements are in milligauss.)			
	1.2" away	12" away	36" away
 Microwave Oven	750 to 2,000	40 to 80	3 to 8
 Clothes Washer	8 to 400	2 to 30	0.1 to 2
 Electric Range	60 to 2,000	4 to 40	0.1 to 1
 Compact Fluorescent Bulb	0 to 32.8	0 to 0.1	0
 Hair Dryer	60 to 20,000	1 to 70	0.1 to 3
 LCD/Plasma TV	1.1 to 73.6	0 to 2.5	0 to 2.2
Source: Adapted from Gauger 1985 & EPRI Appliance Measurement Study 2010.			
Magnetic Fields Outside (Maximum values may be lower for some California utilities.)			
 Distribution Lines	1 to 80 milligauss under the line		
 Transmission Lines	1 to 300 milligauss edge of right-of-way		

World Health Organization Findings

The World Health Organization (WHO) completed a review of the potential health implications of extremely low frequency EMF, which includes power-frequency fields. Their conclusions and recommendations were presented in June 2007 in a report known as the *Extremely Low Frequency Fields, Environmental Health Criteria Monograph No. 238*.

The WHO report concluded that evidence linking ELF magnetic fields and childhood leukemia "is not strong enough to be considered causal but sufficiently strong to remain a concern." "Virtually all of the laboratory evidence and the mechanistic evidence fail to support" this reported association. For all other diseases, there is inadequate or no evidence of health effects at low exposure levels.

The report emphasized that, given the weakness of the evidence for health effects, the health benefits of exposure reduction are unclear and adopting policies based on arbitrary low exposure limits is not warranted. In light of this situation, WHO made these and other recommendations:

- National authorities should implement communication programs with all stakeholders to enable informed decision-making, including how individuals can reduce their own exposure.

Continued on next page

EMF continued from prior page

- Policy makers and community planners should implement very low-cost measures to reduce exposures when constructing new facilities and designing new equipment, including appliances.
- Policy makers should establish guidelines for ELF field exposure for both the general public and workers. The best source of guidance for both exposure levels and the principles of scientific review are the international guidelines.
- Government and industry should promote research to reduce the uncertainty of the scientific evidence on the health effects of ELF field exposure. Several recommended research projects are already under way through the Electric Power Research Institute, of which SCE is a member.

To view the full report and a fact sheet summarizing it, visit www.who.int/peh-emf/publications/elf_ehc/en/index.html
www.who.int/peh-emf/publications/facts/fs322/en/index.html

What You Can Do

In a situation of scientific uncertainty and public concern, WHO recommended that utilities explore 'very low-cost' ways to reduce EMF exposure from new or upgraded facilities. SCE and other California public utilities have been pursuing no-cost and low-cost measures to reduce EMF levels from new utility transmission lines and substation projects. You, too, may want to take no-cost and low-cost measures to reduce your EMF exposure at home and at work.

Human studies have not produced a consensus about any health benefits from changing the way people use electric appliances. But, if you feel reducing your EMF exposure would be beneficial, you can increase your distance from electric appliances and/or limit the amount of time you use appliances at home or at work. For instance, you can place phone answering machines and electric clocks away from the head of your bed. Increasing your distance from these and other appliances, such as televisions, computer monitors, and microwave ovens, can reduce your EMF exposure.

You can also reduce your EMF exposure by limiting the time you spend using personal appliances, such as hair dryers, electric razors, heating pads, and electric blankets. You may also want to limit the time you spend using electric cooking appliances.

You can locate the sources of EMF in your work environment and spend break time in lower-field areas.

It is not known whether such actions will have any impact on your health.

Additional Information Is Available

SCE provides free EMF information packages and home/business measurements upon request. For any of these services, please call **1-800-200-4723 (4SCE)**.

Additional information is also available at these links:

Electronic check processing

Your check payment will be processed as a one-time Electronic Fund Transfer (EFT). With EFTs, funds may be withdrawn from your account the day we receive your payment. Your check will not be returned, but will appear on your financial statement.

Rates and applicable rules: Available at www.sce.com or upon request.

Past due bills

When is my bill past due? It is past due 19 days after the preparation date, which was 08/22/20.

- Reconnecting service that has been disconnected requires a Service Connection payment.
- Unable to pay: If payment arrangements were not extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission.
- For safety reasons, if service is disconnected, please ensure any sensitive or potentially hazardous equipment is unplugged on the day of reconnection. For additional home safety tips, visit www.sce.com/safety or call SCE at 1-800-655-4555.

What is the Late Payment Charge (LPC)?

0.7% will be applied to the total unpaid balance if payment is not received by the due date on this bill (except for CARE and state agency accounts).

What is a rotating outage?

Rotating outages are controlled electrical outages used to avoid widespread or uncontrolled blackouts. Your Rotating Outage Group number is located on page 1, upper left, of your SCE bill. Your rotating outage group number may change at any time. For more information, visit www.sce.com/rotating_outage.

Disputed bills

If you believe there is an error on your bill or have a question about your service, please call Southern California Edison (SCE) customer support at 1-800-655-4555. If you are not satisfied with SCE's response, submit a complaint to the California Public Utilities Commission (CPUC) at www.cpuc.ca.gov/complaints/. The CPUC's Consumer Affairs Branch (CAB) handles billing and service complaints and can be reached by:

Telephone 1-800-649-7570 (8:30 AM - 4:30 PM, Monday - Friday)

Mail CPUC, Consumer Affairs Branch, 505 Van Ness Ave., Room 2003, San Francisco, CA 94102

If you have limitations hearing or speaking, contact the California Relay Service, which is for those needing assistance relaying telephone conversations. Dial 711 or one of the numbers below to be routed to a California Relay Service provider in your preferred mode of communication.

Type of Call	English	Spanish
TTY/VCO/HCO to Voice	1-800-735-2929	1-800-855-3000
Voice to TTY/VCO/HCO	1-800-735-2922	1-800-855-3000
Speech-to-Speech Relay	1-800-854-7784	1-800-854-7784

To avoid having service turned off while waiting for the outcome of a complaint to the CPUC regarding the accuracy of your bill, contact CAB for assistance. If your case meets the eligibility criteria, CAB will instruct you on how to mail a check or money order to be impounded pending resolution of your case. You must continue to pay your current charges while your complaint is reviewed to keep your service turned on.

Definitions

- **Baseline Credit:** The baseline credit provides reduced electricity rates on electricity used up to the baseline allocation for the region that you live in.
- **CA Climate Credit:** Credit from state effort to fight climate change. Applied monthly to eligible businesses and semi-annually to residents.
- **DWR Bond Charge:** Bonds issued by the Department of Water Resources (DWR) to cover the cost of buying power during the energy crisis are being repaid through this charge.
- **Public Purpose Programs Charge:** Funds state-mandated programs for low income discounts, energy efficiency, renewable energy and R&D.
- **SCE Generation:** For recovering energy procurement and generation costs for that portion of your energy provided by SCE.

Stay informed about your annual bill

Your new charges Due monthly	Year-to-date charges: \$775.18 Settled at end of 12-month billing period (on or about 08/13/21)
<i>If you pay only this month's new charges, you may owe a large amount at the end of your 12-month billing period.</i>	<i>You may make additional payments anytime. Payments will not show up in your year-to-date charges. They will create a credit on your account. Any remaining balance forward will be settled against any charges in your 12-month settlement bill.</i>
	You are in billing month 1 of 12.

Things you should know

DIRECT PAYMENT INFORMATION.....

We will automatically debit the total amount due, \$118.61, from your checking account on or after 09/01/20. Your bank may place a hold on these funds prior to that date. Thank you!

Change to NEM Monthly Billing Option

Currently, your non-energy (public purpose programs, tax and fees) are due monthly. Your energy charges are tracked, but not due until your 12-month settlement bill. If you sign up for the NEM Monthly Billing Option, all charges will be due and payable each month. Requesting monthly billing is easy, call us at 1-866-701-7868. To learn more about NEM billing go to on.sce.com/nembillcalc.

Things you should know

What's on your bill?

Nonbypassable charges (NBCs), which are comprised of DWR Bond Charge (DWRBC), Competition Transition Charge (CTC), Nuclear Decommissioning Charge (NDC), and Public Purpose Programs Charge (PPPC) are assessed on the kWh consumed in each metered interval of the current billing period and billed monthly. For more information, please refer to your rate tariff sheet available on SCE.com.

Thank you for your participation in SCE's NEM program.

*Residential customers only

Electronic check processing

Your check payment will be processed as a one-time Electronic Fund Transfer (EFT). With EFTs, funds may be withdrawn from your account the day we receive your payment. Your check will not be returned, but will appear on your financial statement.

Rates and applicable rules: Available at www.sce.com or upon request.

Past due bills

When is my bill past due? It is past due 19 days after the preparation date, which was 07/18/20.

- Reconnecting service that has been disconnected requires a Service Connection payment.
- Unable to pay: If payment arrangements were not extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission.
- For safety reasons, if service is disconnected, please ensure any sensitive or potentially hazardous equipment is unplugged on the day of reconnection. For additional home safety tips, visit www.sce.com/safety or call SCE at 1-800-655-4555.

What is the Late Payment Charge (LPC)?

0.7% will be applied to the total unpaid balance if payment is not received by the due date on this bill (except for CARE and state agency accounts).

What is a rotating outage?

Rotating outages are controlled electrical outages used to avoid widespread or uncontrolled blackouts. Your Rotating Outage Group number is located on page 1, upper left, of your SCE bill. Your rotating outage group number may change at any time. For more information, visit www.sce.com/rotating_outage.

Disputed bills

If you believe there is an error on your bill or have a question about your service, please call Southern California Edison (SCE) customer support at 1-800-655-4555. If you are not satisfied with SCE's response, submit a complaint to the California Public Utilities Commission (CPUC) at www.cpuc.ca.gov/complaints/. The CPUC's Consumer Affairs Branch (CAB) handles billing and service complaints and can be reached by:

Telephone 1-800-649-7570 (8:30 AM - 4:30 PM, Monday - Friday)

Mail CPUC, Consumer Affairs Branch, 505 Van Ness Ave., Room 2003, San Francisco, CA 94102

If you have limitations hearing or speaking, contact the California Relay Service, which is for those needing assistance relaying telephone conversations. Dial 711 or one of the numbers below to be routed to a California Relay Service provider in your preferred mode of communication.

Type of Call	English	Spanish
TTY/VCO/HCO to Voice	1-800-735-2929	1-800-855-3000
Voice to TTY/VCO/HCO	1-800-735-2922	1-800-855-3000
Speech-to-Speech Relay	1-800-854-7784	1-800-854-7784

To avoid having service turned off while waiting for the outcome of a complaint to the CPUC regarding the accuracy of your bill, contact CAB for assistance. If your case meets the eligibility criteria, CAB will instruct you on how to mail a check or money order to be impounded pending resolution of your case. You must continue to pay your current charges while your complaint is reviewed to keep your service turned on.

DIRECT PAYMENT INFORMATION.....

We will automatically debit the total amount due, \$1,106.25, from your checking account on or after 07/28/20. Your bank may place a hold on these funds prior to that date. Thank you!

Public Safety Power Shutoffs

- It is not a decision we take lightly. It is done to keep you and your community safe.
- We have been able to limit the number of customers impacted by PSPS by using sectionalizing devices to de-energize segments instead of entire circuits.
- It will have to remain available as a tool to mitigate wildfire risk during severe weather and high fire potential index events.

We urge customers to update their contact information and sign up for PSPS alerts at: sce.com/outage. To learn more about Public Safety Power Shutoffs, visit: sce.com/safety/wildfire

HELPING CUSTOMERS DURING THE COVID-19 CRISIS

- **We are temporarily suspending service disconnections, waiving late fees, and have resources to help you with your bill.**

We offer a number of payment assistance options for our residential and business customers, including payment extensions and arrangements. If your income has changed, you may also qualify for a reduced energy rate through our CARE or FERA programs. If someone in your home requires the use of electrically powered medical devices or equipment, you may qualify for our Medical Baseline Allowance program. More information for your home is available at:

sce.com/residential/assistance

and for your business at:

sce.com/business/Small-Business-Resources

HELPING CUSTOMERS & EMPLOYEES STAY SAFE AND HEALTHY

- **Crews are working together in pods to minimize exposure while maintaining physical distance from others.**

Due to the nature of the work, our crew members are sometimes unable to maintain physical distancing while making repairs, but they will be wearing face coverings and driving separately when safe and feasible.

- **If we need to reach you, we'll call.**

Customers should not approach crew members and should stay at least six feet away for safety. The safety of our workforce, our customers and the public remain our top priority.

CONTINUING CRITICAL WORK

- **We continue to perform critical work to make urgent repairs and protect communities from wildfires. We are prioritizing and evaluating each outage on a case-by-case basis.**

Safely providing reliable service means critical scheduled outages must continue, even during this unprecedented COVID-19 situation. We are prioritizing critical work necessary to protect our communities from the threat of wildfires and to make urgent repairs. Postponing this critical work could inadvertently create larger and more dangerous risks.

- **We are working to minimize outage impacts.**

SCE is working hard to minimize the impact of outages, especially for vulnerable customers, businesses and other critical services. If an outage is deemed critical, considerations are put in place to maintain power and minimize its duration and impact. SCE also looks for opportunities to schedule outages during overnight hours and increase the number of crews on a project through redeployment to help minimize the duration and impact of any outage. In some cases, we also provide generators to keep the lights on while the work is done.

For more information on our response to the COVID-19 outbreak, please visit

sce.com/safety/coronavirus

Get Help If You Use Medical Equipment

If you or someone in your household requires the regular use of electrically-powered medical equipment or other qualifying medical devices, you may be eligible for our Medical Baseline Allowance program.

This program provides an additional 16.5 kilowatt hours (kWh) of electricity per day. Provided at the lowest baseline rate, this helps offset the cost of operating the medical equipment and prioritizes critical alerts and notifications if outages occur, including Public Safety Power Shutoffs.

Changes during COVID-19

Due to the COVID-19 pandemic, we have temporarily changed how to enroll and recertify for the program:

- **Enrollment:** You can now enroll online (link below) and without a physician's signature for a period of one year beginning March 4, 2020.
- **Renewal:** If you are due to renew between March 4, 2020, and March 4, 2021 we will automatically extend your enrollment for one year.

To learn more, apply online or download an application please visit sce.com/medicalbaseline or call **1-800-655-4555**.

NOTES: All customers who depend upon electrically-operated medical equipment should be prepared at all times with a back-up plan or power system to ensure their health and welfare during outages. SCE does not provide back-up generation.

Devices used for therapy but not medically required for sustaining life do not qualify for this program.

** For Santa Catalina Island gas customers, the standard Medical Baseline Allocation will be 0.822 therms per day.*

Support for Customers Affected by a Major Disaster

If you or someone you know has been affected by a disaster for which a state of emergency has been declared, please visit sce.com/disastersupport for information about consumer protections, programs and services SCE has available.

Proposition 65 Warnings

WARNING: The Safe Drinking Water and Toxic Enforcement Act of 1986, commonly referred to as Proposition 65, requires the governor to publish a list of chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. It also requires California businesses to warn the public of potential exposures to these chemicals that result from their operations.

Providing safe and reliable service to all of our customers is a top priority for Southern California Edison and we want you to be aware of these chemicals so that you can reduce exposure to chemicals associated with electricity generation and distribution. We handle all equipment and materials at our sites carefully for your good health as well as ours. However, if you are at or near our facilities and work sites, you can be exposed to the following chemicals on the state's Proposition 65 list. Reduce, limit, or avoid activities at and near the sources of exposure described below. For more information go to:

www.P65Warnings.ca.gov

1. **Diesel Generation:** Diesel Exhaust: SCE uses diesel-fueled emergency generators during emergencies and other times to help minimize the interruption of our customers' supply of electricity. The generators are used at some SCE facilities like substations and service centers, and at locations where repairs are made to the electrical system. SCE also uses diesel as the primary fuel for electricity generation on Catalina Island and in many service vehicles used throughout our service territory. Diesel engines produce exhaust as a by-product of the combustion of diesel fuel. Breathing diesel engine exhaust exposes you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. You should avoid breathing diesel fumes whenever possible.

2. **Wooden Utility Poles:** SCE uses wooden poles that have been treated with chemical preservatives. These chemicals include pentachlorophenol, which is known to the State of California to cause cancer, and petroleum products such as diesel fuel, which contains chemicals including toluene and benzene that are known to the State of California to cause cancer and birth defects or other reproductive harm. If you come into contact with a wooden utility pole or the dust, debris, soil surrounding the pole, or water runoff that may contain dust, debris, and soil previously in contact with the pole, you could be exposed to these chemicals. Avoid contact with wooden utility poles and the dust, debris, soil surrounding the poles, or water runoff that may contain dust, debris, soil surrounding the poles, or water runoff that may contain dust, debris, and soil previously in contact with the poles.

3. **Painted Structures:** SCE utilizes metal and wood structures and equipment that may have been coated with paints containing chemicals, such as lead-based paint, that are known to the State of California to cause cancer and birth defects or other reproductive harm. When the paint on these on these structures deteriorates, flakes of paint can impact the soil adjacent to the structure. To avoid exposure, you should avoid contact with any paint flakes or soil near any structure with deteriorating paint.

Budget Your Electricity Bill with the Level Pay Plan

Are your electric bills higher in the summer? Do these higher bills stretch your budget? Sign up for SCE's Level Pay Plan (LPP), which allows you to spread high summer and/or winter bills over an entire year into equal monthly payments.

It's easy. SCE calculates your electricity use over the prior 12 months and come up with a dollar amount. This dollar amount is divided by 11 and becomes the Level Pay Plan amount you pay over the next 11 months. On the 12th month, you'll receive a settlement bill showing either a payment due, or a credit to your account based on how much energy you used.

Your account is periodically reviewed and your monthly payment may be adjusted during the year depending on your power usage.

If you'd like to enroll, please call **1-800-434-2365**. LPP is based on eligibility and some restrictions may apply. Once enrolled, you must pay your bills monthly by the due date to remain eligible for the program.

Safe Portable Generator Hook-Up

Connecting a portable generator to your home's electrical wiring is dangerous and can cause serious injuries or electrocution.

Do not hook up a generator directly to an electrical panel. The safe way is to plug the electrical equipment into a portable generator using a properly sized extension cord approved by Underwriters Laboratories (UL).

If your needs require a generator to be wired directly to your home's electrical system, California state law mandates that you notify us. We also recommend that you enlist the service of a qualified electrician to perform the task.

For additional safety information visit:

sce.com/generator

Thinking of Installing Solar?

There is a new no-cost tool on the SCE Marketplace that makes the process easier. Get a rooftop solar and storage system tailored to your home, the top three bids from a network of vetted solar installers, financing options, and a dedicated energy advisor. You will also receive a \$500 Marketplace discount from SCE. Go to:

marketplace.sce.com/solar

Important information

What are my options for paying my bill?

On-line	Pay one-time or recurring on www.sce.com/bill
Mail-in	Check or Money order
In Person	Authorized payment locations 1-800-747-8908
Phone	QuickCheck 1-800-950-2356
	Debit & credit card * 1-800-254-4123

*Residential customers only

Electronic check processing

Your check payment will be processed as a one-time Electronic Fund Transfer (EFT). With EFTs, funds may be withdrawn from your account the day we receive your payment. Your check will not be returned, but will appear on your financial statement.

Rates and applicable rules: Available at www.sce.com or upon request.

Past due bills

When is my bill past due? It is past due 19 days after the preparation date, which was 06/17/20.

- Reconnecting service that has been disconnected requires a Service Connection payment.
- Unable to pay: If payment arrangements were not extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission.
- For safety reasons, if service is disconnected, please ensure any sensitive or potentially hazardous equipment is unplugged on the day of reconnection. For additional home safety tips, visit www.sce.com/safety or call SCE at 1-800-655-4555.

What is the Late Payment Charge (LPC)?

0.7% will be applied to the total unpaid balance if payment is not received by the due date on this bill (except for CARE and state agency accounts).

What is a rotating outage?

Rotating outages are controlled electrical outages used to avoid widespread or uncontrolled blackouts. Your Rotating Outage Group number is located on page 1, upper left, of your SCE bill. Your rotating outage group number may change at any time. For more information, visit www.sce.com/rotating_outage.

Disputed bills

If you believe there is an error on your bill or have a question about your service, please call Southern California Edison (SCE) customer support at 1-800-655-4555. If you are not satisfied with SCE's response, submit a complaint to the California Public Utilities Commission (CPUC) at www.cpuc.ca.gov/complaints/. The CPUC's Consumer Affairs Branch (CAB) handles billing and service complaints and can be reached by:

Telephone 1-800-649-7570 (8:30 AM - 4:30 PM, Monday - Friday)

Mail CPUC, Consumer Affairs Branch, 505 Van Ness Ave., Room 2003, San Francisco, CA 94102

If you have limitations hearing or speaking, contact the California Relay Service, which is for those needing assistance relaying telephone conversations. Dial 711 or one of the numbers below to be routed to a California Relay Service provider in your preferred mode of communication.

Type of Call	English	Spanish
TTY/VCO/HCO to Voice	1-800-735-2929	1-800-855-3000
Voice to TTY/VCO/HCO	1-800-735-2922	1-800-855-3000
Speech-to-Speech Relay	1-800-854-7784	1-800-854-7784

To avoid having service turned off while waiting for the outcome of a complaint to the CPUC regarding the accuracy of your bill, contact CAB for assistance. If your case meets the eligibility criteria, CAB will instruct you on how to mail a check or money order to be impounded pending resolution of your case. You must continue to pay your current charges while your complaint is reviewed to keep your service turned on.

Definitions

- **CA Climate Credit:** Credit from state effort to fight climate change. Applied monthly to eligible businesses and semi-annually to residents.
- **DWR Bond Charge:** Bonds issued by the Department of Water Resources (DWR) to cover the cost of buying power during the energy crisis are being repaid through this charge.
- **Public Purpose Programs Charge:** Funds state-mandated programs for low income discounts, energy efficiency, renewable energy and R&D.
- **SCE Generation:** For recovering energy procurement and generation costs for that portion of your energy provided by SCE.

We will automatically debit the total amount due, \$428.79, from your checking account on or after 05/26/20. Your bank may place a hold on these funds prior to that date. Thank you!

High Usage Charge

The High Usage Charge applies to customers whose total electricity usage exceeds 400% of their Tier 1. To avoid the charge in the future, reduce your energy usage or consider switching to a Time-of-Use (TOU) rate plan. The High Usage Charge does not apply to TOU and provides you more control over how much you pay based upon when you use electricity. Learn more about the High Usage Charge at on.sce.com/highuse or call 1-877-287-2145.

Public Safety Power Shutoffs

- It is not a decision we take lightly. It is done to keep you and your community safe.
- We have been able to limit the number of customers impacted by PSPS by using sectionalizing devices to de-energize segments instead of entire circuits.
- It will have to remain available as a tool to mitigate wildfire risk during severe weather and high fire potential index events.

We urge customers to update their contact information and sign up for PSPS alerts at: sce.com/OutageAlerts. To learn more about Public Safety Power Shutoffs, visit: www.sce.com/safety/wildfire

HELPING CUSTOMERS DURING THE COVID-19 CRISIS

- **We are temporarily suspending service disconnections, waiving late fees, and have resources to help you with your bill.**

We offer a number of payment assistance options for our residential and business customers, including payment extensions and arrangements. If your income has changed, you may also qualify for a reduced energy rate through our CARE or FERA programs. If someone in your home requires the use of electrically powered medical devices or equipment, you may qualify for our Medical Baseline Allowance program. More information for your home is available at:

sce.com/residential/assistance

and for your business at:

sce.com/business/Small-Business-Resources

HELPING CUSTOMERS & EMPLOYEES STAY SAFE AND HEALTHY

- **Crews are working together in pods to minimize exposure while maintaining physical distance from others.**

Due to the nature of the work, our crew members are sometimes unable to maintain physical distancing while making repairs. Just as your family unit, or household, interact but remain physically distant from the rest of the world, our crews interact similarly.

- **If we need to reach you, we'll call.**

Customers should not approach crew members and should stay at least six feet away for safety. The safety of our workforce, our customers and the public remain our top priority.

CONTINUING CRITICAL WORK

- **We continue to perform critical work to make urgent repairs and protect communities from wildfires. We are prioritizing and evaluating each outage on a case-by-case basis.**

Safely providing reliable service means critical scheduled outages must continue, even during this unprecedented COVID-19 situation. We are prioritizing critical work necessary to protect our communities from the threat of wildfires and to make urgent repairs. Postponing this critical work could inadvertently create larger and more dangerous risks.

- **We are working to minimize outage impacts.**

SCE is working hard to minimize the impact of outages, especially for vulnerable customers, businesses and other critical services. If an outage is deemed critical, considerations are put in place to maintain power and minimize its duration and impact. SCE also looks for opportunities to schedule outages during overnight hours and increase the number of crews on a project through redeployment to help minimize the duration and impact of any outage. In some cases, we also provide generators to keep the lights on while the work is done.

For more information on our response to the COVID-19 outbreak, please visit sce.com/safety/coronavirus

Get Help If You Use Medical Equipment

If you or someone in your household requires the regular use of electrically-powered medical equipment or other qualifying medical devices, you may be eligible for our Medical Baseline Allowance program.

This program provides an additional 16.5 kilowatt hours (kWh) of electricity per day. Provided at the lowest baseline rate, this helps offset the cost of operating the medical equipment and prioritizes critical alerts and notifications if outages occur, including Public Safety Power Shutoffs.

Changes during COVID-19

Due to the COVID-19 pandemic, we have temporarily changed how to enroll and recertify for the program:

- **Enrollment:** You can now enroll online (link below) and without a physician's signature for a period of one year beginning March 4, 2020.
- **Renewal:** If you are due to renew between March 4, 2020, and March 4, 2021 we will automatically extend your enrollment for one year.

To learn more, apply online or download an application please visit sce.com/medicalbaseline or call **1-800-655-4555**.

NOTES: All customers who depend upon electrically-operated medical equipment should be prepared at all times with a back-up plan or power system to ensure their health and welfare during outages. SCE does not provide back-up generation.

Devices used for therapy but not medically required for sustaining life do not qualify for this program.

** For Santa Catalina Island gas customers, the standard Medical Baseline Allocation will be 0.822 therms per day.*

Support for Customers Affected by a Major Disaster

If you or someone you know has been affected by a disaster for which a state of emergency has been declared, please visit sce.com/disastersupport for information about consumer protections, programs and services SCE has available.

Proposition 65 Warnings

WARNING: The Safe Drinking Water and Toxic Enforcement Act of 1986, commonly referred to as Proposition 65, requires the governor to publish a list of chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. It also requires California businesses to warn the public of potential exposures to these chemicals that result from their operations.

Providing safe and reliable service to all of our customers is a top priority for Southern California Edison and we want you to be aware of these chemicals so that you can reduce exposure to chemicals associated with electricity generation and distribution. We handle all equipment and materials at our sites carefully for your good health as well as ours. However, if you are at or near our facilities and work sites, you can be exposed to the following chemicals on the state's Proposition 65 list. Reduce, limit, or avoid activities at and near the sources of exposure described below. For more information go to:

www.P65Warnings.ca.gov

1. **Diesel Generation:** Diesel Exhaust: SCE uses diesel-fueled emergency generators during emergencies and other times to help minimize the interruption of our customers' supply of electricity. The generators are used at some SCE facilities like substations and service centers, and at locations where repairs are made to the electrical system. SCE also uses diesel as the primary fuel for electricity generation on Catalina Island and in many service vehicles used throughout our service territory. Diesel engines produce exhaust as a by-product of the combustion of diesel fuel. Breathing diesel engine exhaust exposes you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. You should avoid breathing diesel fumes whenever possible.

2. **Wooden Utility Poles:** SCE uses wooden poles that have been treated with chemical preservatives. These chemicals include pentachlorophenol, which is known to the State of California to cause cancer, and petroleum products such as diesel fuel, which contains chemicals including toluene and benzene that are known to the State of California to cause cancer and birth defects or other reproductive harm. If you come into contact with a wooden utility pole or the dust, debris, soil surrounding the pole, or water runoff that may contain dust, debris, and soil previously in contact with the pole, you could be exposed to these chemicals. Avoid contact with wooden utility poles and the dust, debris, soil surrounding the poles, or water runoff that may contain dust, debris, soil surrounding the poles, or water runoff that may contain dust, debris, and soil previously in contact with the poles.

3. **Painted Structures:** SCE utilizes metal and wood structures and equipment that may have been coated with paints containing chemicals, such as lead-based paint, that are known to the State of California to cause cancer and birth defects or other reproductive harm. When the paint on these on these structures deteriorates, flakes of paint can impact the soil adjacent to the structure. To avoid exposure, you should avoid contact with any paint flakes or soil near any structure with deteriorating paint.

Health and Safety Tips for Temperature-Sensitive Customers

Extreme hot weather may be harmful to people who are in poor health or those who are sensitive to high temperatures. Here are steps you can take to avoid heat-related illness this summer, should you be without air conditioning. To help you stay cool in hot weather:

- Take a cool shower or bath.
- Wear lightweight, loose, light-colored clothing and a head covering.
- Stay out of direct sunlight and limit outdoor activity to covered or shaded areas.
- Drink plenty of water to stay hydrated.

What to Do During Rotating Outages?

A rotating outage is a temporary electricity outage, designed to last no more than one hour, to help protect the integrity of the overall electric system. You can prepare for rotating outages by planning ahead. Your rotating outage group number is located at the top of your bill. Customers in rotating outage group N001 (or "Exempt") are normally not subject to rotating outages.

We strongly encourage you to be prepared for summer heat waves and potential outages. Power outages, regardless of their cause, can occur at any time. Since we cannot guarantee uninterrupted service to our customers, it is important that your emergency plan includes having sufficient standby battery power or a back-up portable unit available to power any in-home medical equipment you may have. If you have back-up power generation, we recommend you test it each month to ensure it is ready in case of a power interruption.

Advance Notification of a Rotating Outage

When possible, we will provide advance notice of a rotating outage via an automated telephone message to residential customers, or to someone in a customer's household who files an application certifying that their health is at risk when they are exposed to extreme temperatures.

Note: If you already participate in our Medical Baseline program, you are automatically enrolled, so you do not need to complete this application form. Medical Baseline program participants receive advance notification, whenever possible, of rotating power outages that may affect them.

To sign up for advance notification, just call **1-800-655-4555** to request an application, complete it, and return it to the address shown on the application.

Upon receipt of your application, we will place your name on a calling list to receive advance notice, whenever practical, if a rotating outage is anticipated in your area. This service will be provided to you at no cost.

Electronic check processing

Your check payment will be processed as a one-time Electronic Fund Transfer (EFT). With EFTs, funds may be withdrawn from your account the day we receive your payment. Your check will not be returned, but will appear on your financial statement.

Rates and applicable rules: Available at www.sce.com or upon request.

Past due bills

When is my bill past due? It is past due 19 days after the preparation date, which was 05/02/20.

- Reconnecting service that has been disconnected requires a Service Connection payment.
- Unable to pay: If payment arrangements were not extended to you by SCE pursuant to SCE's filed tariffs, you may contact the California Public Utilities Commission.
- For safety reasons, if service is disconnected, please ensure any sensitive or potentially hazardous equipment is unplugged on the day of reconnection. For additional home safety tips, visit www.sce.com/safety or call SCE at 1-800-655-4555.

What is the Late Payment Charge (LPC)?

0.7% will be applied to the total unpaid balance if payment is not received by the due date on this bill (except for CARE and state agency accounts).

What is a rotating outage?

Rotating outages are controlled electrical outages used to avoid widespread or uncontrolled blackouts. Your Rotating Outage Group number is located on page 1, upper left, of your SCE bill. Your rotating outage group number may change at any time. For more information, visit www.sce.com/rotating_outage.

Disputed bills

If you believe there is an error on your bill or have a question about your service, please call Southern California Edison (SCE) customer support at 1-800-655-4555. If you are not satisfied with SCE's response, submit a complaint to the California Public Utilities Commission (CPUC) at www.cpuc.ca.gov/complaints/. The CPUC's Consumer Affairs Branch (CAB) handles billing and service complaints and can be reached by:

Telephone 1-800-649-7570 (8:30 AM - 4:30 PM, Monday - Friday)

Mail CPUC, Consumer Affairs Branch, 505 Van Ness Ave., Room 2003, San Francisco, CA 94102

If you have limitations hearing or speaking, contact the California Relay Service, which is for those needing assistance relaying telephone conversations. Dial 711 or one of the numbers below to be routed to a California Relay Service provider in your preferred mode of communication.

Type of Call	English	Spanish
TTY/VCO/HCO to Voice	1-800-735-2929	1-800-855-3000
Voice to TTY/VCO/HCO	1-800-735-2922	1-800-855-3000
Speech-to-Speech Relay	1-800-854-7784	1-800-854-7784

To avoid having service turned off while waiting for the outcome of a complaint to the CPUC regarding the accuracy of your bill, contact CAB for assistance. If your case meets the eligibility criteria, CAB will instruct you on how to mail a check or money order to be impounded pending resolution of your case. You must continue to pay your current charges while your complaint is reviewed to keep your service turned on.

Definitions

- CA Climate Credit:** Credit from state effort to fight climate change. Applied monthly to eligible businesses and semi-annually to residents.
- DWR Bond Charge:** Bonds issued by the Department of Water Resources (DWR) to cover the cost of buying power during the energy crisis are being repaid through this charge.
- Public Purpose Programs Charge:** Funds state-mandated programs for low income discounts, energy efficiency, renewable energy and R&D.
- SCE Generation:** For recovering energy procurement and generation costs for that portion of your energy provided by SCE.

2020 Census Participation

In Spring 2020, a nationwide Census will begin to count every person in the United States. This count is critical to a large state like California because it helps determine funding for energy programs, public safety, schools, hospitals, and emergency programs, among others; how many seats California gets in the U.S. House of Representatives; and much more! All information gathered is confidential and cannot be used for non-Census purposes. Look for an invitation to participate in the Census in your mailbox this Spring. For more information, visit californiacensus.org

You may notice a change in your billing statement.....

Effective 04/13/2020, the billing rates used to calculate your bill have been modified. For more information, please visit www.sce.com/bill_change.

Subject: Southern California Edison CPUC Complaint

Dear Ms. Nesbit:

Re: CPUC Complaint No. 515847/SCE Account No. 2-40-994-3172

I appreciated the opportunity to speak with you regarding your complaint filed with the California Public Utilities Commission (CPUC) and received in Southern California Edison's (SCE) office of Consumer Affairs.

Please accept our apology for any inconvenience you may have experienced due to the delay in billing your account on the Net Energy Metering (NEM) rate. On July 25, 2020, the meter was reprogrammed to measure any excess generation you may have. On August 4, 2020, the meter recorded an excess of 66 kilowatt-hours (kWh). Using that as a basis, we have credited your account in the amount of \$265.44 for the period of March 17, 2020, through July 25, 2020.

Please contact me if you have any additional questions concerning your complaint. A copy of this letter has been sent to the CPUC for their review.

Sincerely,

Nina Holmquist

Ms. Nesbit,

I reviewed your interconnection agreement dated January 27, 2020, and it stated the applicable rate schedule was TOU-D-A and not TOU-D-Prime. In compliance with CPUC approved SCE Rule 12 Rates and Optional Rates, the rate change will become effective on December 17, 2020. The rule states as follows.

"In the event that a customer elects to take service under a different rate schedule or optional tariff provision, than that under which he is being served and qualifies for service thereunder, the change will become effective for service rendered after the next regular meter reading following the date of notice to SCE."

Unfortunately, I cannot provide you a credit of \$2800.00 as there is no basis for it.
Thank you.

Yes that is correct. Another item that should have been completed in FEBRUARY. Also for your information we are filing a formal complaint with the cpuc. According to the bills from February to August and for the TOU-D-Prime we are owed approximately \$2,800.00 from SCE which my solar company was able to figure out. SCE should have been able to do this also. If you would like to revisit this and see what they have please let me know.

Thank you,
Patty Nesbit

Marina,
I am still NOT ON PRIME BILLING. Please remedy this situation immediately and send me proof of this.
Thank you,
Patty Nesbit

On Sep 24, 2020, at 9:14 AM, Marina Holmquist <Marina.Holmquist@sce.com> wrote:

Hello Ms. Nesbit,

As I explained in my 9/8/20 email, the credit was based on your net generation following the meter reprogram. On 8/22/20 and 9/18/20, we sent statements on the NEM rate, so I am not clear on what you mean below that you are still receiving bills that do not reflect net metering. When you say you need a record, are you asking for a copy of your bills since you received your PTO? How much of a credit are you asking for?
Thank you.

CAUTION EXTERNAL EMAIL

Hi Marina,

First, I want to thank you for providing us a credit because of SCE's inability to get our billing to display the fact we are on solar billing with PRIME.

However, the formal complaint made to the CPUC was not because we needed a credit, but rather the fact that we have had permission to operate since February, and our SCE bills are still not reflecting the fact we are solar customers.

We have been left spending a huge amount of money each month, and if we had been on solar billing/net metering we wouldn't have to pay anything other than non-bypassable-charges until our true-up in February 2021.

Again, i appreciate the small credit you gave us, but unfortunately you neglected to address the root of our complaint and are still receiving bills from SCE that do not reflect net metering.

As opposed to making a second complaint to the CPUC, it would be much easier if your billing department simply did what they are supposed to do and credit us back what we have over-paid so far, and get our bills to reflect solar billing.

We also need a record of each month since we received PTO from SCE that shows how much we have overspent.

I appreciate your swift remedy to this situation, and look forward to hearing back from you on how we can proceed accordingly.
