Order Instituting Rulemaking to
Update the California Universal
Telephone Service (California
LifeLine) Program.

Rulemaking 20-02-008

**ADMINISTRATIVE LAW JUDGE'S RULING REQUESTING COMMENTS ON
STAFF PROPOSAL ON ENROLLMENT FOR INDIVIDUALS WITHOUT
SOCIAL SECURITY NUMBERS**

This ruling requests party comments on the attached staff proposal for the California Universal Telephone Service Program (California LifeLine), which proposes an enrollment path for individuals without social security numbers (Staff Proposal). Opening comments are due May 10, 2024, and reply comments are due on May 24, 2024.

Comments shall be limited to 10 pages and should indicate support, conditional support, or opposition to the phased approach described in the Staff Proposal and why. Parties are also encouraged to respond to the questions at the end of the Staff Proposal.

IT IS RULED.

Dated April 19, 2024, at San Francisco, California.

/s/ ROBYN PURCHIA

Robyn Purchia
Administrative Law Judge

ATTACHMENT A

California Public Utilities Commission

Staff Proposal for California LifeLine Program: Enrollment Path for Individuals without Social Security Numbers

COMMUNICATIONS DIVISION

04/11/2024

Executive Summary

In Decision (D.) 14-01-036, the Commission determined that the California Universal LifeLine Telephone Service Program (LifeLine Program) should extend eligibility to Californians without a Social Security Number (SSN) to further the Moore Act's legislative mandate and the Commission's policies to promote public safety, access, and affordability. D.14-01-036 also provided that the Commission's staff should request a waiver from the Federal Communications Commission (FCC) of the requirement for federal LifeLine participants in California to provide their SSN. The CPUC filed the waiver petition with the FCC in February of 2015, which as of now is still pending. On December 19th, 2023, Commissioner Shiroma issued a ruling stating the CPUC's commitment to ensuring that low-income Californians have access to essential communication services without barriers to program participation. The ruling invited party comments on this issue.

The current application requires the applicant to provide the last four digits of their SSN as it is an FCC requirement. However, in compliance with D.14-01-036, the current application process for California LifeLine does not use the last four digits of the SSN (SSN4) to make any determination of waste, fraud, or abuse (WFA) against the consumer.

This staff proposal recommends revisions to the application, identity verification, and eligibility determination processes to create a defined path for individuals without SSNs to apply for California LifeLine and when qualified, to begin receiving California LifeLine benefits.

Objectives

Two objectives will guide staff as it works to effectively implement D.14-01-036: (1) create a clear path for Californians without a SSN4 to participate in the LifeLine Program, and (2) preserve the existing pathway for applicants that have a SSN4. To further these objectives, staff identified solutions to update the LifeLine Program application, identity, and eligibility processes.

Staff recognizes a need to preserve the existing enrollment pathway which requires applicants with assigned SSNs to provide their SSN4s because, with it, the Third-Party Administrator (TPA) can swiftly confirm applicant's identities and comply with the FCC's requirement that applicants for federal Lifeline benefits possess SSNs. Additionally, the TPA can confirm eligibility through CalFresh with the SSN4, which allows individuals to be quickly approved when initially enrolling, as well as automatically renewed annually rather than having to re-apply to the Program.

Proposed Solution

Staff recommend a phased approach for introducing the non-SSN enrollment pathway to allow for a more expedient solution in the near-term, while continuing to expand and refine the process by layering in improvements and increased efficiencies:

- Phase 1: Updating the online and hard copy application process, including manual review of applications submitted without a SSN4.

- Phase 2: Implementing software into the TPA's system that will systematically authenticate identity documents and help detect instances of document tampering.
- Phase 3: Service Providers implement the identity software onto their platforms. *(Optional)*
- Phase 4: Transitioning the enrollment processes for all applicants to the TPA.

Phase 1: Focuses on updating the application process by allowing individuals to check a box certifying that they are applying without a SSN4.

- **New process for individuals without SSNs:** Multiple stakeholders recommended that the California LifeLine Program follow the Affordable Connectivity Program's (ACP) model of inputting "0000" in lieu of a SSN4. Staff propose a similar but slightly different approach to implement the change in a seamless and efficient manner, whereby applicants who do not have an assigned SSN check a box certifying "I have never been assigned a Social Security Number. I understand that I will be required to submit government-issued identification document(s) so the LifeLine Program can authenticate my identity." The attestation may encourage Californians who possess a SSN4 to input the digits, which is important to comply with the FCC's requirement for those qualifying for federal subsidies, as well as being able to confirm individuals in the CalFresh database, which does require the SSN4 for matching purposes. Checking the box opens a new screen and sends the user through the "non-SSN path" to create a seamless enrollment experience for the applicant. Some stakeholders raised concerns that requiring applicants to enter any SSN4 value and then certify that their application is true and correct under penalty of perjury compels applicants to lie. The "check box certification" eliminates these concerns.
- **New language added to hard copy and online applications:**
 - **For all applicants:** Verbiage will be added to the application which states, "Applicants who have a Social Security Number (SSN) must enter the last 4 digits to confirm their identity. If you do not have a SSN, check the box below to certify that you do not have a SSN, as you will be required to provide alternative form(s) of identification to validate LifeLine Program eligibility."
 - **For non-SSN applicants:** Verbiage will be added to the application which states, "A Social Security Number (SSN) or proof of U.S. citizenship is not required to receive California LifeLine Program benefits. The California LifeLine Program is available to anyone who lives in California, regardless of immigration status. The California LifeLine Program will not ask anyone for their immigration status. While SSNs are not required to enroll in the California LifeLine Program, alternative forms of identity documentation will be required to confirm your identity, which may increase application review and processing time."
 - On hard copy applications this verbiage will appear next to the "no SSN4" box.
 - Online, this verbiage will pop up once an individual checks the "no SSN4" box.
 - **Language Translations:** Once changes are made, all forms will be translated to the 7 supported languages (English, Spanish, Korean, Chinese, Japanese, Tagalog, and Vietnamese).
- **New Manual Review Process for Non-SSN Applicants:** Applications received with the "No SSN4" box selected will require manual review. In this phase, staff recommend accepting limited types of identity documents. Globally there are thousands of identity documents, and the formats are constantly changing. The TPA's Customer Service Representatives (CSRs) cannot practically be expected to accurately validate thousands of different identity documents, many of which may be in written

languages the California LifeLine Program does not currently support. The key pillars the California LifeLine Program has relied upon for identity documents are (1) a photograph of the applicant, (2) document displays two personal identifying factors, i.e. name, home address, date of birth, and/or the SSN4, (3) be unexpired, (4) be legible. The proposed acceptable documents for Phase 1 are listed below and adhere to the current California LifeLine Program requirements for identity documents.

- Foreign passports
 - Consular identification cards
 - AB 60 drivers' licenses
 - Mexican federal electoral cards
 - The list of acceptable documents will expand in Phase 2
 - The full list of documents that will be accepted in Phase 2 is included as an appendix to this staff proposal.
- **Rule Changes:** Staff recommends the following updates to General Order 153 sections 5.4.2.2 and 5.12.4 to reflect the proposed changes to the application form regarding collection of the SSN4:
 - 5.4.2.2 In the Application Form, the Applicant must provide: (a) The Applicant's full name; (b) the Applicant's full Residential address; (c) whether the Residential address is permanent or temporary, (d) the Applicant's billing address, if different from the Residential address; (e) the Applicant's date of birth; ~~and~~ (f) if the Applicant has a Social Security Number, the Applicant must provide the last four digits of ~~the Applicant's~~ their Social Security Number, or the Applicant's Tribal identification number, if the Applicant is a member of a Tribal Nation and does not have a Social Security Number; and (g) if the Applicant does not have a Social Security Number and is not a member of a Tribal nation, they must check the box certifying that they do not have a Social Security Number and Applicant will be required to provide a form of government-issued identification, as defined by the Commission, to confirm their identity.
 - 5.12.4 The enrollment request freeze shall not be imposed where the California LifeLine Administrator does not have access to the Applicant's name, Residential service address, and date of birth, and last four digits of the social security number, ~~where applicable~~, or Tribal Identification.
 - **Timeline:** The TPA and staff will implement Phase 1 within three (3) months after a Commission decision and will continue to implement subsequent phases as quickly as possible, as subsequent phases require coordination with external parties, such as LexisNexis® and service providers, to implement proposed enhancements. While this phase is not inclusive of all the changes the Program will make to benefit those without an SSN4, these are the updates that can be made in the shortest time frame to promptly begin accepting applicants who do not have a SSN4 into the California LifeLine Program. This phase also provides structural changes that pave the way for continued enhancements that will roll out in the subsequent phases.

Phase 2: TPA will integrate LexisNexis® software which uses automated forensic analysis to automatically authenticate global identity documents. The software is known as TrueID® and is utilized to confirm identity by a variety of institutions such as insurance companies, banking, and financial services institutions, as well as state government agencies such as Maryland Department of Unemployment and Colorado Department of Labor and Employment. TrueID® will allow the California LifeLine Program to expand the acceptable forms of

identification for individuals applying without a SSN4, as this software helps organizations authenticate over four hundred (400) government-issued identity documents, such as driver's licenses, Tribal cards, passports, visas, and national IDs. The full list of documents that will be accepted in phase 2 is included as an appendix to this staff proposal.

- **New TrueID® Software:** LexisNexis® software will be integrated into the California LifeLine Customer Portal. Applicants, or Service Providers on behalf of applicants, will utilize a smart phone or tablet with a camera to navigate to the TPA's website and click on the TrueID® link which will then prompt individual to capture a live image of the front and back of the applicant's ID document, as well as a selfie, with the mobile camera. This launches the automated forensic analysis of the document material, ink, layout, and security features and provides validation to the TPA if the document is real or fake.
 - **WFA Concerns-** Staff recognize that the implementation of TrueID® helps address the concerns of manufactured or altered documents by reducing the need for human inspection, reducing customer delays for applicants, and allowing the TPA to make informed identity verification decisions. Current WFA prevention includes "catching" identity documents that appear abnormal. In an example WFA incident, a batch of applications had included a doctored California Driver's License where the name on the license had been altered. The last character and third to last character of the customer's name were changed in each to represent a different "name" on the application. The fraud was caught when a CSR remembered the driver's license from a previous application. Each CSR on average manually reviews 76 forms per day. As we move towards including hundreds of new identity documents from across the globe, this avenue of catching manufactured identity documents will become increasingly complex and the TrueID® software will be necessary to allow TPA to confidently make decisions regarding the accuracy of the expanded list of acceptable documents.
 - TPA's total average number of forms reviewed by CSRs weekly: 11,171.
 - TPA's total average number of forms reviewed by CSRs daily: 2,972.
- **Contract Changes:** CPUC staff will amend the TPA contract to add funding to pay for TrueID® software integration and ongoing checks, as well as allow TPA additional time to process applications for individuals applying without a SSN4. The current contract requires the TPA to process applications within 3 days. Although TrueID® can be initiated by an applicant and responded to in real time, TrueID® typically allows applicants up to 7 days to complete the TrueID® check once the process is initiated in case applicant needs more time to gather their documents and have a proper device with which to respond.
- **Safe Harbor:** While some Service Providers requested the implementation of a Safe Harbor, staff do not think a Safe Harbor is necessary at this time. With the implementation of TrueID®, the TPA would be able to confidently authenticate identity documents, thus reducing risk for the Service Provider.

Phase 3 (Optional): The TPA will work with Service Providers to update their systems to integrate the TrueID® technology onto their platforms. Service Providers would need to update their systems at this time which may include programming, testing, and quality control. This phase is listed as optional because Phase 4 (applicants applying directly to the Program rather than through Service Providers) may occur in a timeframe

that would render this phase unnecessary, but it is a potential option to consider and discuss with Service Providers as we move forward.

- **Data Collection:** The TPA will conduct a thorough and methodical evaluation of impacts to all TPA platform modules necessitated by integrating TrueID®. The TPA will work with Service Providers to determine if there is an opportunity to increase efficiencies by integrating TrueID® into the Service Providers' platforms.
 - In evaluating the longer-term picture, staff also recommend the TPA collect data for a period of 18 months following the launch of Phase 1 and revisit the data in 18 months. This will allow the TPA and CPUC staff to conduct a comprehensive data collection and evaluation across an entire enrollment and renewal period, provide insight into the effectiveness of these proposed changes, and identify opportunities to further refine the process. Data collected will include, but is not limited to, the below:
 - Count of applicants who check the “No SSN4” box
 - Percentage of applicant’s identity documents positively matched in TrueID®
 - Average count of days from enrollment form creation to the rendering of the eligibility decision
 - Qualification Rate (overall, by Service Provider, by ZIP Code/County, submission method, etc.)
 - Eligibility basis (count qualifying based on income/count qualifying by program)
 - Counts of alternative identification forms by document type (i.e. foreign passports, AB 60 driver’s licenses, consular cards, etc.)
 - Average length of enrollment
 - LifeLine benefit transfer rate
 - Final denial counts by reason
 - Renewal rate
 - Budget impact

Phase 4: In this final phase, the entry point for the Program’s enrollment process would shift from Service Providers to TPA.

- **New Customer Portal Functionality:** TPA will release “customer portal 2.0”, which will require applicants to apply directly to the California LifeLine Program, rather than initiating the process through Service Providers, as is the current process. Applicants would complete their identity checks and eligibility determinations with the TPA, receive their approval, and then select their Service Provider and service plans. Staff envision that service provider contractors can still be utilized for this new process. However, having a customer receive an eligibility determination first will allow the California LifeLine Program to align with other state agency customer portals, such as the statewide verification hub and the California State Digital ID Framework, which will further expand and automate enrollment and renewal processes.
- **Background:** As of April 1, 2024, California LifeLine has 1,281,921 subscribers. In a timeframe of just over three months, the below tables reflect how the customer portal is quickly gaining momentum as a preferred method for individuals to complete their enrollment forms (outside of the Service Provider Intake Application Programming Interface, also known as SPIA) and renewal forms (outside of CalFresh participants). Staff believe that by leveraging this existing infrastructure and harnessing the power of

automation, this change will mark a pivotal moment in the Program's evolution, expediting the application process, reducing the administrative burdens of Service Providers, and ultimately leading to increased accessibility for applicants seeking assistance through California LifeLine.

Received Channel for **Enrollment** Forms – 1/1/2024 through 4/9/2024

Received Channel	# of enrollment forms	Percent of total
SPIA	434,883	98.02%
Mail	6,427	1.45%
Portal	2,370	0.53%

Received Channel for **Renewal** Forms – 1/1/2024 through 4/9/2024

Received Channel	# of renewal forms	Percent of total
System [CalFresh Confirm]	133,480	84.71%
Mail	8,359	5.31%
Portal	7,406	4.70%
Call Center-assisted	4,291	2.72%
IVR	2,243	1.42%
SPIA	1,789	1.14%

LifeLine Eligibility

There are two ways to qualify for the California LifeLine Program, either Program-based or Income-based.

- **Program-based eligibility:** Individuals may qualify for California LifeLine discounts if one or more people in their household are enrolled in one of the qualifying assistance programs below. Staff continue to work on establishing database sharing with qualifying assistance programs to automatically confirm an individual's eligibility. There are known constraints, as some databases do require a SSN4 to check eligibility. For programs that LifeLine does not currently have data sharing available, or in instances where a SSN4 is not provided, documentation will be required to prove eligibility. Qualifying assistance programs are listed below.

- **Programs That Do NOT Require a SSN to Apply:**

- **Medicaid/Medi-Cal:** – May apply without a SSN.
 - Staff have been actively working on establishing a database connection to automatically confirm an applicant's enrollment in Medicaid/MediCal, thereby establishing eligibility for LifeLine. Before the end of April 2024, the TPA will be able to begin confirming an applicant's enrollment in MediCaid/MediCal utilizing the California Department of Health Care Services' (DHCS) Automated Eligibility Verification System (AEVS). The system requires an individual's Benefit Information Card Number (BIC) or Client Index Number (CIN).
- **Women, Infants and Children Program (WIC)** – May apply without a SSN.

- **National School Lunch Program (NSL)** – May apply without a SSN.
 - **Stanislaus County Work Opportunity & Responsibility to Kids (StanWORKs)** – May apply without a SSN.
 - **Welfare-to-Work (WTW)** - May apply without a SSN.
 - **Greater Avenues for Independence (GAIN)** – Not Applicable (individuals do not apply for GAIN. If individuals are in WTW, they are required to be in GAIN, unless exempt).
 - **Tribal TANF** – SSN Not Applicable.
 - **Bureau of Indian Affairs General Assistance** - SSN Not Applicable.
 - **Head Start Income Eligible (Tribal Only)** - SSN Not Applicable.
 - **Food Distribution Program on Indian Reservations** - SSN Not Applicable.
- **Programs That Require a SSN (or have a narrow exemption):**
- **TANF/California Work Opportunity & Responsibility to Kids (CalWORKs).** – May apply without a SSN, but applicants should have a SSN or have applied for one.
 - **Federal Veterans and Survivors Pension Benefit Program** – May apply without a SSN if applicant served in the US military.
 - **Low Income Home Energy Assistance Program (LIHEAP):** Requires SSN.
 - **Supplemental Security Income (SSI)** – Requires SSN or individuals will need to apply for one and one can be assigned at the time Social Security entitles them to SSI.
 - **Federal Public Housing Assistance or Section 8** – Limited to U.S. citizens and certain categories of non-citizens with eligible immigration status.
 - **CalFresh, Food Stamps or Supplemental Nutrition Assistance Program (SNAP)** – Applicants may apply without a SSN but applicants must either have a SSN, or have applied for one, or have good cause for not applying for one. When there is good cause for an applicant not having a SSN, such as waiting for their SSN to be granted, applicant may be granted temporary enrollment in CalFresh for a predetermined amount of time, for example, three months. If an individual is not able to provide proof of a SSN by the designated time, the individual may be removed. In such cases, the LifeLine Program cannot assume an individual will have CalFresh for a full year.
CPUC has a data sharing agreement in place which allows TPA to automatically confirm an individual's enrollment in CalFresh, which confirms their eligibility for LifeLine. The database matching requires a SSN4. For individuals who do not have a SSN4, they would need to provide documentation proving their enrollment.
- No changes to the eligibility process for program-based enrollment would need to be made, but staff will continue to pursue partnerships with these Programs to identify opportunities to share data and more seamlessly confirm LifeLine eligibility.

- **Income-based eligibility:** Currently, applicants may qualify for California LifeLine if their household income is at or less than 150% of the Federal Poverty Limit (FPL). The California LifeLine Program requires the applicant to provide proof of income. Documents currently accepted are the prior year's state, federal or tribal tax return; income statements or paycheck stubs for three (3) consecutive months within the calendar year, child support documents, statements of benefits from Social Security, Veterans Administration, retirement/pension, unemployment compensation; and/or workmen's compensation; and divorce decrees. However, determining income-based eligibility for California LifeLine for applicants without a SSN poses challenges because it is difficult to verify that the individual has submitted all official income records.
 - Staff recommend continuing to require proof of income documentation, consistent with the current practice, for applicants without a SSN who desire to establish income-based eligibility, even though documentation verification is challenging. Additionally, staff propose that if an individual claims zero (0) income, they must provide either bank statements for three (3) consecutive calendar months immediately prior to applying for LifeLine, or a notarized affidavit or self-declaration from the applicant to serve as supporting documentation for zero income. If individuals cannot provide proof of income eligibility, they may still qualify through one or more of the eligible public-assistance programs.
- **Budget:**
 - LexisNexis TrueID® software: There will be additional costs incurred by the California LifeLine Program to run identity document checks through LexisNexis® software. Staff are working with LexisNexis® to determine the estimated annual cost this proposal will add to the California LifeLine Program budget and require additional time to include this information. The funding will be allocated to the TPA's Contract.
 - Federal Subsidy: California LifeLine will continue to make up the federal Lifeline subsidy for non-SSN subscribers. Staff will need to conduct a thorough evaluation of the budget impact of subsidizing non-SSN holders to determine if the current surcharge rate is sufficient or if it needs to be increased.
 - Timeline: Staff recommend we collect this data over an 18-month period, which aligns with the Data Collection timeline referenced in Phase 3 above as well.

Conclusion:

Staff believe that implementing the proposed changes in this phased approach will most quickly create a clear, unbiased enrollment path for California residents who do not have a SSN, while staff continue to work with external parties to further enhance the process and safeguard against manufactured or altered documents.

Staff Propose the Following Questions in Ruling (Please limit responses to 10 pages):

1. Do you agree with the staff's phased approach to providing a pathway for applicants without a SSN?
2. For individuals applying for California LifeLine based on income eligibility, should the Program allow individuals to attest to zero income? Should this apply to the entire program or just the non-SSN population?
3. Are there other assistance programs that should be considered to qualify Californians for California LifeLine?
 - a. What qualifications should staff use to evaluate "other programs" that may provide California LifeLine eligibility?

Total Supported Documents	4777	878	3899

Legend

Term	Meaning
Issuer	The government jurisdiction that issued the document. This could be a country, state, province, or other government jurisdiction
Document Type	The full descriptive name of the document type. The name typically includes issuer (e.g. France), issuer abbreviation (e.g. FRA), document class (e.g. driver's license or passport), and type of issue (e.g. commercial driver's license, under 21, learner's permit, etc.)
Series	Jurisdictions release new versions of documents regularly. The Series is a label that has been assigned by AssureTec to uniquely identify each version of the document (also known as series or issue). Typically the Series represents the first year that the document version was released, but that is not always the case
Size	The physical size of the document. ID1 represents a card-sized document such as a driver's license or identification card. ID3 represents a passport-sized document
Region	Certain editions of AssureID only include a subset of the global document library, which is divided into four geographic regions: NA=North America, SA=South America, EMEA=Europe, Middle East, and Africa, and APAC=Asia-Pacific. Since regional boundaries may overlap, a document may be included in more than one region
ICAO	Indicates whether a document is compliant with the International Civil Aviation Organization (ICAO) machine-readable document standards for passports and identification cards
Classification	Indicates whether the document can be automatically classified using either the front or back of the document. Some scanners require a manual process to "flip" the document to capture the reverse side. Documents that list only "Front" classification will not classify when only the back side is scanned, whereas those that list "Front & Back" have at least 1 variation that can classify as a back type when only the back is scanned
