I. INTRODUCTION

Pacific Gas and Electric Company (PG&E) submits this *Application for Compliance Review of Utility Owned Generation Operations, Portfolio Allocation Balancing Account Entries, Energy Resource Recovery Account Entries, Contract Administration, Economic Dispatch of Electric Resources, Utility Owned Generation Fuel Procurement, and Other Activities for the Record Period January 1 Through December 31, 2024* (2024 ERRA Compliance, or Application), pursuant to California Public Utilities Code Section 454.5(d), Rules 2.1 and 3.2 of the Rules of Practice and Procedure of the California Public Utilities Commission (Commission), and relevant Commission decisions.

PG&E respectfully requests that the Commission find that during the record period PG&E complied with its Commission-approved Bundled Procurement Plan (BPP) in the areas of fuel procurement, administration of power purchase contracts, greenhouse gas compliance instrument procurement, resource adequacy sales, and least-cost dispatch of electric generation

resources. PG&E requests that the Commission find that during the record period PG&E managed its utility-owned generation (UOG) facilities reasonably. PG&E also submits in this Application four contract amendments for the Commission's review and approval.¹

PG&E requests that the Commission find that the record period expenditures in the Green Tariff Shared Renewables Memorandum Account (GTSRMA) were reasonable and that the record period entries in the Portfolio Allocation Balancing Account (PABA), Energy Resources Recovery Account (ERRA), Green Tariff Shared Renewables Balancing Account (GTSRBA), DAC-SASH balancing account (DACSASHBA), Disadvantaged Communities Green Tariff Balancing Account (DACGTBA), and Community Solar Green Tariff Balancing Account (CSGTBA) were consistent with applicable tariffs and Commission directives.

PG&E also presents for the Commission's review the Central Procurement Entity's administrative costs recorded to the Centralized Local Procurement Sub-Account (CLPSA) in the New System Generation Balancing Account (NSGBA), pursuant to D.20-06-022.

II. BACKGROUND

In 2002, the California Legislature and the Commission established the regulatory framework for PG&E, Southern California Edison Company (SCE), and San Diego Gas & Electric Company (SDG&E) (collectively, the utilities) to resume electricity procurement, beginning January 1, 2003. Public Utilities Code Section 454.5(d)(2) provided for a procurement plan that would:

Eliminate the need for after-the-fact reasonableness reviews of an electrical corporation's actions in compliance with an approved procurement plan, including resulting electricity procurement contracts, practices, and related expenses. However, the commission may establish a regulatory process to verify and assure that each contract was administered in accordance with the terms of the contract, and contract disputes which may arise are reasonably resolved.

In Decision (D.) 02-10-062, the Commission implemented Section 454.5(d) by establishing ERRA balancing accounts for PG&E and the other utilities, requiring the utilities to

¹ See Prepared Testimony Chapter 9, Section E.

track fuel and purchased power revenues against actual recorded costs,² and to establish an annual ERRA compliance review for the previous year. Since D.02-10-062 was issued, the Commission has addressed PG&E's ERRA compliance applications in a number of proceedings.³ In 2018, the Commission significantly modified the ERRA balancing accounts and created a new balancing account to track the above-market costs and revenues associated with the utilities' electric portfolios, called the Portfolio Allocation Balancing Account (PABA) in D.18-10-019. Pursuant to that decision, PG&E also presents the PABA in this Application.⁴

In D.15-10-031, the Commission approved PG&E's 2014 BPP. PG&E updates the BPP to respond to market activity and seeks Commission approval via Advice Letter. The Conformed 2014 BPP is included as workpapers to the testimony.

In D.20-06-002, the Commission ordered PG&E to serve as the Central Procurement Entity (CPE) in PG&E's distribution service territory. The CPE is responsible for procuring all required Local Resource Adequacy on behalf of Commission-jurisdictional load serving entities in its distribution service area. PG&E, as CPE, was also ordered to report certain CPE-related items in its ERRA Compliance applications, including the administrative costs incurred in a Centralized Local Procurement Balancing Account sub-account of the NSGBA (CLPSA). In D.20-12-006, the Commission specified that CPE-related confidential, market-sensitive information should be filed in separate chapters. While not confidential or market-sensitive

² The ERRA records energy costs associated with serving bundled electric customers. The Ongoing Competition Transition Charge (CTC) consists of eligible contract arrangements entered into before December 20, 1995, and QF contract restructuring costs. Ongoing CTC costs are recorded in the Modified Transition Cost Balancing Account (MTCBA).

information, the presentation of administrative costs recorded to CLPSA is provided in a separate chapter in testimony.

The ERRA regulatory process includes two annual proceedings. The first is an annual ERRA Compliance proceeding to review the utility's compliance with Commission-approved standards for generation-procurement and cost recovery activity occurring in the preceding year, such as energy resource contract administration, least-cost dispatch, fuel procurement, and balancing account entries. The second is an annual "ERRA Forecast" proceeding, which sets generation rates for the coming year based on a forecast of the utility's electric procurement cost revenue requirement and electricity sales. PG&E's most recent ERRA Forecast proceeding, for forecast year 2025, was filed as Application (A.) 24-05-009.

III. STANDARD OF REVIEW AND COMMISSION REQUIREMENTS

The Commission has issued a number of decisions discussing the standards of review for specific aspects of the utilities' ERRA Compliance applications, as well as requirements for additional information that should be included in ERRA Compliance applications. In general, PG&E has the burden of proof in ERRA Compliance proceedings and satisfies that burden of proof based on a preponderance of the evidence.⁵ In addition to this general principle regarding the burden of proof, the Commission has also adopted specific standards of review for various aspects of the ERRA Compliance application. Below, PG&E provides an overview of the standards of review for this Application, as well as Commission requirements for additional information and materials to be included in PG&E's ERRA Compliance application, testimony, and workpapers.

A. Least-Cost Dispatch

The standard of review for achieving least-cost dispatch under Standard of Conduct 4 (SOC 4) is compliance with the bundled procurement plan and applicable Commission

⁵/ D.16-04-006, p. 11.

Decisions.⁶ PG&E’s 2014 Bundled Procurement Plan was approved in D.15-10-031 and was in effect during the 2024 record period.

PG&E’s burden of proof to demonstrate compliance is established by various Commission Decisions and Settlement Agreements. In D.15-05-006, as modified by D.15-12-015, the Commission adopted, with minor modifications, the *Joint Utilities’ Proposal for the Demonstration of Least-Cost Dispatch*⁷ and also required the utilities to include information identified in the *Metrics for Demand Response* proposed by the Public Advocates Office at the California Public Utilities Commission (Cal Advocates), formerly the Office of Ratepayer Advocates.⁸ The Commission consolidated the joint utilities’ proposal, with modifications, and Cal Advocates’ demand response metrics in Attachment A to D.15-12-015.

In addition, PG&E and Cal Advocates entered into settlement agreements in the 2014 ERRA Compliance proceeding (2014 ERRA Settlement) and 2015 ERRA Compliance proceeding (2015 ERRA Settlement) that included agreements related to the least-cost dispatch and demand response showings in future ERRA Compliance proceedings.⁹ The Commission approved the 2014 ERRA Settlement in D.16-12-045 and the 2015 ERRA Settlement in D.17-03-021. PG&E’s showing in this Application is consistent with the Commission’s requirements in D.15-05-006 and D.15-12-015 and incorporates the least-cost dispatch and demand response requirements from the 2014 and 2015 ERRA Settlements. The least-cost dispatch and demand response showing for the record period is included in Chapter 1 of PG&E’s Prepared Testimony and the detailed workpapers associated with Chapter 1.

B. Utility-Owned Generation Operation

With regard to the operation of UOG resources, the Commission has applied a reasonable manager standard.¹⁰ Under the reasonable manager standard,

utilities are held to a standard of reasonableness based upon the facts that are known or should have been known at the time. The act of the utility should comport with what a reasonable manager of sufficient education, training, experience, and skills using the tools and knowledge at his or her disposal would do when faced with a need to make a decision and act.¹¹

The utility has the burden of proof to show that the reasonable manager standard has been met. For purposes of this Application, Chapters 2-4 of the Prepared Testimony and the corresponding workpapers satisfy PG&E's burden of proof that it operated its UOG facilities in compliance with the Commission's reasonable manager standard. PG&E's 2023 ERRA Compliance Application recommended that the Commission defer review of 2023 outages related to the Belden and Caribou 1 Powerhouses as well as two maintenance outages at the Diablo Canyon Power Plant to this 2024 ERRA Compliance Proceeding. As confirmed in the Scoping Memo in the 2023 ERRA Compliance Proceeding,¹² PG&E presents this information in this 2024 ERRA Compliance Application. This approach is consistent with previous ERRA Compliance applications, where a complete record of the UOG outage is still in development at the end of the record period.¹³

¹³/ See *Assigned Commissioner's Scoping Memo and Ruling*, A.21-03-008 (PG&E's 2020 ERRA Compliance Application) (June 21, 2022), pp. 5-6, that authorized review of the Diablo Canyon Unit 2 outages to occur in a future ERRA Compliance application when root cause evaluations would completed; and *Assigned Commissioner's Scoping Memo and Ruling*, A.18-02-015 (PG&E's 2017 ERRA Compliance Application) (May 14, 2018) p. 2, that authorized review of the Humboldt Bay Generating Station Unit 3 and the Pit 5 Unit 4 Hydro Station outages to occur in a future ERRA Compliance application when a complete record could be developed.

C. Contract Administration, Fuel Costs, and Hedging

With regard to contract administration, the Commission reviews whether procurement contracts have been administered prudently and in compliance with the contract provisions.¹⁴ In Chapter 9 of the Prepared Testimony and the corresponding workpapers, PG&E demonstrates that it prudently administered its contracts.

PG&E recovers fuel costs associated with its UOG facilities and certain third-party contracts and hedging costs through PABA or ERRA. PG&E demonstrates compliance specifically with its BPP hedging plan through its discussion of electric portfolio hedging activities that occurred during 2024 and describing its internal procedures and controls.¹⁵ These fuel cost and hedging compliance showings are in Chapter 6 of the Prepared Testimony.

D. GHG Compliance Instrument Procurement

In D.12-04-046, the Commission authorized PG&E to procure allowances and offsets necessary to meet its Greenhouse Gas (GHG) compliance obligations. The Commission reviews whether PG&E’s GHG compliance instrument procurement complies with its GHG Procurement Plan, as set forth in its BPP.¹⁶ In addition to demonstrating compliance for GHG instrument procurement, PG&E provides an analysis on its contract management decision to financially settle or physically settle tolling agreements, pursuant to its 2017 ERRA Settlement Agreement approved by the Commission in D.19-02-005. Contract management decisions are assessed using the reasonable manager standard, as described in Section III.C. PG&E’s GHG procurement compliance showings are in Chapter 7 of the Prepared Testimony.

E. Resource Adequacy Sales

In Resolution E-4998, the Commission approved PG&E’s BPP Appendix S, which established a framework for resource adequacy sales conduct. Consistent with the “compliance review” standard used for assessing PG&E’s conduct on other BPP activities, PG&E requests

that this standard of review extend to Appendix S. PG&E’s compliance with Appendix S is demonstrated in Chapter 8.

F. Energy Resource Recovery Account

The ERRA Balancing Account is audited by the Commission to ensure that recorded entries are reasonable, accurate, and consistent with Commission decisions. PG&E requests the Commission find its recorded entries to ERRA are appropriate, correctly stated, and in compliance with Commission decisions, as demonstrated in Chapter 13 and related workpapers.

G. Portfolio Allocation Balancing Account

The Commission established the PABA in D.18-10-019. The PABA is a two-way cost balancing account that trues up the above-market forecast of generation resources recovered through the Power Charge Indifference Adjustment (PCIA) with actual recorded costs and revenues. D.18-10-019 directed that “the accuracy of the entries into the vintage subaccounts” be reviewed in each utility’s ERRA compliance proceeding. PG&E requests that the Commission find its recorded entries to PABA are accurate, as demonstrated in Chapter 12.

H. Other Balancing Accounts and Memorandum Accounts

1. Green Tariff Shared Renewables Memorandum Account

In D.15-01-051, the Commission approved the Green Tariff Shared Renewables (GTSR) Programs for PG&E, SCE, and SDG&E. The Commission established a GTSRMA for each utility to cover administrative and marketing costs associated with the utility’s GTSR program.¹⁷ The reasonableness of costs recorded in a utility’s GTSRMA is subject to review in the utility’s ERRA compliance proceedings.¹⁸ Chapter 11 of the Prepared Testimony describes the amounts incurred and recorded in PG&E’s GTSRMA during the record period.

^{17/} D.15-01-051, pp. 112-115.

^{18/} D.15-01-051, p. 113.

2. Green Tariff Shared Renewables Balancing Account

In D.15-01-051, the Commission also established the GTSRBA.¹⁹ Chapter 11 also describes the amounts incurred and recorded in the GTSRBA during the record period, demonstrating that they complied with applicable tariffs and Commission directives.

3. Renewables Portfolio Standard Cost Memorandum Account

In D.06-10-050, the Commission established the RPSCMA to track the third-party consultant costs incurred by the Commission and paid by PG&E in connection with the Commission's implementation and administration of the Renewables Portfolio Standard (RPS).²⁰ PG&E pays its share of the invoices, records the amounts in the RPSCMA, and requests recovery of the balance in the RPSCMA through the ERRA application.²¹ Chapter 13 includes a description of the RPSCMA. In 2024, the PG&E did not receive any invoices for payment of consulting services associated with this account.

4. Disadvantaged Community – Single Family Solar Affordable Homes Balancing Account

In D.18-06-027, the Commission also directed PG&E to establish the two-way DACSASHBA to track the DAC SASH program budget. Chapter 15 also describes the amounts incurred and recorded in the DACSASHBA during the record period, demonstrating that they complied with Commission directives.

5. Disadvantaged Community – Green Tariff Balancing Account

In D.18-06-027, the Commission directed PG&E to establish the two-way DACGTBA to track costs related to the implementation and operation of the Disadvantaged Community - Green Tariff (DAC-GT) program. Chapter 5 describes the amounts recorded in the DACGTBA for expenses incurred during 2024, demonstrating that they complied with Commission directives.

6. Community Solar Green Tariff Balancing Account

In D.18-06-027, the Commission directed PG&E to establish the two-way CSGTBA to track costs related to the implementation and operation of the Community Solar Green Tariff CS-GT) program. Chapter 5 describes the amounts recorded in the CSGTBA for expenses incurred during 2024, demonstrating that they complied with Commission directives.

7. Centralized Local Procurement Sub-Account

In D.20-06-002, the Commission ordered PG&E to serve as the CPE for PG&E's distribution service area for the multi-year Local RA program. The Commission further directed PG&E to establish the CLPSA as a sub-account of the New Generation Services Balancing Account and submit its administrative costs associated with central procurement for review in ERRA Compliance. Chapter 16 describes the amounts incurred and recorded to the CLPSA during the 2024 record period.

I. Additional ERRA Compliance Application Requirements

In recent years, a number of Commission decisions and/or settlements in earlier ERRA Compliance proceedings have required specific items to be included in ERRA Compliance applications. In addition to the items described above, PG&E is providing in its Prepared Testimony and/or workpapers information consistent with Commission directives and/or earlier settlements. The following table summarizes additional ERRA Compliance Application requirements adopted by the Commission in decisions or when it approved settlements, including the subject area, a brief description, source of the requirement, and the location in PG&E's testimony or workpapers.²² The requirements are organized chronologically to reflect when they were adopted by the Commission:

^{22/} In addition to the items listed in the table, PG&E previously reported FuelCo activities in its ERRA Compliance applications pursuant to D.05-09-006, Attachment A (Settlement Agreement, 4). However, as stated in PG&E's ERRA Compliance Application for 2022 and supporting testimony (A.23-02-18), FuelCo formally dissolved in December 2021. Accordingly, there are no FuelCo activities to report.

IV. PUBLIC SAFETY POWER SHUTOFFS

In D.20-02-047, the Commission directed PG&E to include in its ERRA Compliance application for 2019 an accounting of the public safety power shut off events that occurred in its service area in that calendar year and how the PSPS events impacted its revenue collections.²⁴ Separately, the Commission issued D. 21-06-014 (PSPS OII Decision) on June 3, 2021. In that decision the Commission directed the utilities to:

- (1) agree on one methodology to rely upon in calculating these estimated unrealized volumetric sales and unrealized revenue,
- (2) include the amount of estimated unrealized volumetric sales and unrealized revenue resulting from PSPS events in the Energy Resource Recovery Account (ERRA) proceedings addressing the years in which the PSPS events occurred, (3) detail the method of calculating the amounts of estimated unrealized sales and unrealized revenue in the ERRA proceedings, and (4) report these estimated amounts unrealized sales and unrealized revenue in an annual PSPS report, as directed by the Commission in Rulemaking (R.) 18-12-005. Regarding any submitting this information in any pending ERRA or future ERRA proceeding, the utility shall request via an email to the Administrative Law Judge (and the service list) whether additional testimony is required on this topic and establishes (sic) a procedure for submitting this information on an ongoing basis in the ERRA proceeding.²⁵

Chapter 17 details the PSPS events that occurred during the record period and presents the estimated unrealized volumetric sales and unrealized revenue calculations associated with these events, along with supporting workpapers.

PG&E proposes that this Application be categorized as a ratesetting proceeding.

D. Need for Hearings (Rule 2.1(c))

PG&E anticipates that evidentiary hearings may be requested by other parties to this proceeding, but the need for evidentiary hearings will depend on the degree to which and grounds on which other parties might contest the proposals contained in this Application. While PG&E hopes to resolve the issues raised in this Application without hearings, such as through more informal procedures including discovery, evidentiary hearings may be necessary.

E. Issues to be Considered (Rule 2.1(c))

PG&E proposes that the following issues be considered in this proceeding for the 2024 record period, consistent with the scoping items established for the 2023 ERRA Compliance proceeding²⁶ and updated based on 2024 events:

2. Whether PG&E achieved least-cost dispatch of its energy resources and economically-triggered demand response programs pursuant to SOC 4.
3. Whether the entries recorded in the Energy Resource Recovery Account and the Portfolio Allocation Balancing Account are reasonable, appropriate, accurate, and in compliance with Commission decisions.

8. Whether there are any safety considerations raised by this Application.
9. Review of unrealized sales and revenues from PG&E's 2024 PSPS events.

F. Relevant Safety Considerations (Rule 2.1(c))

In D.16-01-017, the Commission amended Rule 2.1(c) requiring an applicant to identify all relevant safety considerations implicated by an Application to which the assigned Commissioners and presiding officer could refer to during the proceeding. In order to ensure that safety considerations have received full consideration by parties and the Commission, PG&E's Prepared Testimony includes specific discussions which detail PG&E's efforts to promote public safety: Chapters 2 and 3 discuss PG&E's commitment to safety at PG&E-owned generation facilities, and Chapter 9 discusses PG&E's protocols and practices related to the administration of third-party power contracts. In addition, as the Commission explained in D.14-12-053, the “[s]afe and reliable provision of utilities at predictable rates promotes public safety.”^{27/} Chapters 5-7, 10-13, and 15-16 of PG&E's Prepared Testimony demonstrate that the

costs incurred by PG&E during the record period were reasonable, that the entries to the PABA, ERRA, and CLPSA accounts were appropriate, and that the program costs for GTSR, DAC SASH, DAC-GT, and CS-GT incurred by PG&E are reasonable and result in predictable rates for customers.
