Re: CITADEL Project No. 1358.1015.0
Initial Site Assessment Report
OC Loop Segments O, P, and Q Project
Los Angeles and Orange Counties, California

Dear Ms. Lindsay:

Enclosed please find Citadel EHS's Initial Site Assessment Report for the above-referenced location.

The Initial Site Assessment Report was conducted for UltraSystems Environmental, in accordance with Citadel's Proposal 1358.1015.P, dated February 6, 2020, and a mutually agreed upon scope of work.

If after your review, you have any questions or require additional information, please do not hesitate to telephone me at the Citadel Office in Glendale at (818) 246-2707.

Sincerely,
CITADEL EHS

Mark Drollinger, M.Eng., CSP, CHMM, EiT
Principal, Engineering and Environmental Sciences

EXECUTIVE SUMMARY

Citadel EHS (Citadel) was contracted by UltraSystems Environmental (Client) to perform an Initial Site Assessment (ISA) of the Orange County (OC) Loop Segments O, P, and Q Project (Project) located in the Los Angeles and Orange Counties, California; hereinafter referred to as the "Site."

PROJECT INFORMATION

The OC Loop will form a 66-mile continuous facility for bicycle and pedestrians throughout the west and north portions of Orange County and small portions of Los Angeles County. The OC Loop will link important existing regional facilities such as the Santa Ana River Bikeway, the Coastal Bikeway, the San Gabriel River Bikeway, and the Coyote Creek Bikeway. The Project includes the construction and operation of a 2.7-mile Class I Bikeway component of the OC Loop. The Project Area is along the Coyote Creek flood control channel (channel) and consists of the three following segments:

- Segment O is located between 183rd Street and Artesia Boulevard in the Cities of Cerritos and Buena Park
- Segment P is located between Artesia Boulevard and Knott Avenue in the City of La Mirada
- Segment Q is located between Knott Avenue and Malvern Avenue in the Cities of La Mirada and Buena Park

Based on the linear aspect of the Project, the ISA focuses on properties along the Coyote Creek channel that may adversely impact the vicinity of the construction areas and workers. The radius of the ISA extends approximately 100 feet from the Project path although select properties located beyond the 100-foot radius were reviewed based on their potential environmental impact to the segments.

ENVIRONMENTAL DATABASES

As part of the ISA, Citadel utilized Environmental Record Search (ERS), as an information source for regulatory agency database records. Information from standard federal, state, county, and city environmental record sources was provided by ERS. The following summary of the database information is divided into four columns. The first column identifies the environmental database researched; the second column indicates the distance from the Site that was used for the research; the third column indicates if the Site was identified in the specified database; and the fourth column lists the number of listings identified on the database within the specified distance of the Site.

Database	Radius	Site Identified	No. of Listings Identified
National Priorities List	1 mile	No	0
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	No	0
Delisted National Priorities List	1 mile	No	0
CERCLIS Sites	½ mile	No	1
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	No	5

Database	Radius	Site Identified	No. of Listings Identified
RCRA Non-Corrective Action TSD Facilities	½ mile	No	1
State/Tribal Voluntary Cleanup Sites	½ mile	No	1
State/Tribal Leaking Registered Storage Tank Sites	½ mile	No	72
State/Tribal Brownfield Sites/CERCLIS Equivalent	1 mile	No	0
Historic CORTESE List	½ mile	No	0
State/Tribal Solid Waste Landfill Sites/Facilities	½ mile	No	1
Federal/State/Tribal Engineering Controls Registries	½ mile	No	0
Federal/State/Tribal Institutional Controls Registries	½ mile	No	0
RCRA Large Quantity Generators	¼ mile	No	10
RCRA Small Quantity Generators	¼ mile	No	40
RCRA Non Generators	¼ mile	No	65
State/Tribal Registered Storage Tank Sites	¼ mile	No	31
HIST UST	¼ mile	No	29
Facility Index System (FINDS)	1/16 mile	No	27

The following provides information on areas where there may be environmental concerns based on our environmental database and regulatory agency research.

SEGMENT O

While several of the properties along the channel were identified with former USTs and leaking underground storage tanks (LUSTs), most of the cases for the LUST have been closed or are eligible for closure. No environmental concerns were identified for Segment O.

SEGMENT P

While several of the properties along the channel were identified with former USTs and LUSTs, the cases for the LUST have been closed. However, the property located at 14730 Firestone Boulevard was occupied by print shops with spray booths in 2004 and 2006. Aquatic Stands and More occupied the space in 2004; and California Ink Printing occupied the space in 2006. Solvent-based inks were identified in 2006. No further information was provided. Based on the use of spray booths and solvent-based inks, this property may be a vapor encroachment condition (VEC) concern to Segment P.

In addition, the exposure to the fuel pipelines by the railway tracks may be an environmental concern; however, the pipelines are aboveground and crosses over the channel. The proximity of the Interstate 5 Freeway to Segment P may be a recognized environmental condition (REC) due to possible shallow soil contamination of aerially deposited lead (ADL) from vehicle exhaust.

SEGMENT Q

While several of the properties along the channel were identified with releases and LUSTs, the cases for the leaks have been closed. However, the proximity of the underground Chevron fuel pipeline along Segment Q may represent a REC due to possible future releases.

1.0 INTRODUCTION

Citadel EHS (Citadel) was contracted by UltraSystems Environmental (Client) to perform an Initial Site Assessment (ISA) of the Orange County (OC) Loop Segments O, P, and Q Project (Project) located in the Los Angeles and Orange Counties, California; hereinafter referred to as the "Site."

1.1 PURPOSE

The purpose of the ISA was to review past and present land use practices and to evaluate the presence, or likely presence, of any hazardous substances or petroleum products that have been discharged into the ground, groundwater, or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the Site. A Site visit was also conducted to observe existing Site conditions. This report provides the results of the ISA performed.

1.2 INVOLVED PARTIES

The involved party(s) in this study, to the best of our knowledge, is UltraSystems Environmental and County of Orange.

Citadel understands that this ISA is being requested in conjunction with due diligence activities by UltraSystems Environmental and County of Orange. Citadel recognizes that this report is to be used exclusively by UltraSystems Environmental, County of Orange and its successors, lenders, and assigns. It is a report upon which UltraSystems Environmental, County of Orange, and its successors, lenders, and assigns, can rely.

This assessment and report were prepared on behalf of and for the exclusive use of UltraSystems Environmental and County of Orange, their lenders and assigns (Client) solely for its use and reliance, subject to the terms and conditions agreed upon between Citadel and the Client.

1.3 SCOPE OF SERVICES

This ISA was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-13 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The scope of services for this assessment consisted of the following:

- Performed a Site inspection to verify current Site conditions, and check for visible evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs), and other potential environmental hazards.
- Conducted a visual survey of the adjacent properties and the immediate vicinity to determine if any nearby sites posed a significant environmental threat to the Site.
- Reviewed currently and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and underground tanks, other consultant reports (if any), fire insurance maps, and other accessible records.

- Prepared this ISA report, inclusive of our findings and recommendations, with applicable illustrations and documentation.

The scope of services outlined above is generally considered sufficient to properly assess the Site based on the data search, reasonably ascertainable documents, and Site inspection. Based on the linear aspect of the Site, the ISA focuses on properties along the Coyote Creek channel that may adversely impact the vicinity of the construction areas and workers. The radius of the IESA extends approximately 100 feet from the Project path although select properties located beyond the 100-foot radius were reviewed based on their potential environmental impact to the segments.

2.0 GENERAL SITE CHARACTERISTICS

2.1 LOCATION

The OC Loop will form a 66-mile continuous facility for bicycle and pedestrians throughout the west and north portions of Orange County and small portions of Los Angeles County. The OC Loop will link important existing regional facilities such as the Santa Ana River Bikeway, the Coastal Bikeway, the San Gabriel River Bikeway, and the Coyote Creek Bikeway. The Project includes the construction and operation of a 2.7-mile Class I Bikeway component of the OC Loop. The Project Area is along the Coyote Creek flood control channel (channel) and consists of the three following segments:

- Segment O is located between 183rd Street and Artesia Boulevard in the Cities of Cerritos and Buena Park and is approximately 0.91 mile in length.
  - The beginning of Segment O is located at approximate coordinates of 33° 51' 58.25" North Latitude and 118° 2' 4.16" West Longitude and ends at the beginning of Segment P. Elevations range between 41 and 56 feet above mean sea level (AMSL).
- Segment P is located between Artesia Boulevard and Knott Avenue in the City of La Mirada and is approximately 0.62 mile in length.
  - The beginning of Segment P is located at approximate coordinates of 33° 52' 23.80" North Latitude and 118° 1' 9.08" West Longitude and ends at the beginning of Segment Q. Elevations range between 57 and 72 feet AMSL.
- Segment Q is located between Knott Avenue and Malvern Avenue in the Cities of La Mirada and Buena Park and is approximately one mile in length.
  - The beginning of Segment Q is located at approximate coordinates of 33° 52' 41.08" North Latitude and 118° 0' 41.58" West Longitude; and ends at approximate coordinates of 33° 53' 9.86" North Latitude and 117° 59' 52.29" West Longitude. Elevations range between 66 and 97 feet AMSL.

The Site is generally located within residential and industrial areas. A Site Location Map identified as Figure 1 is included in Appendix A.

2.2 SITE DESCRIPTION

According to information provided by the County of Orange, the channel was constructed between 1967 and 1968. Segment O begins in the City of Cerritos along the channel near 183rd Street and travels to the northeast. As the channel passes Valley View Avenue, the channel is now

in the City of Buena Park and turns east-northeast. Segment O ends at Artesia Boulevard. The 100-foot radius of Segment O is generally developed with industrial properties.

Segment P begins in the City of La Mirada along the channel at Artesia Boulevard and travels north-northeast, crossing through the Union Pacific Railroad (UPRR) Industrial Lead Line (Anaheim Branch Line) and the Interstate 5 Freeway. Upon crossing the Interstate 5 Freeway, the channel turns east. Segment P ends at Knott Avenue. The 100-foot radius of Segment P is generally developed with industrial properties.

Segment Q begins in the City of Buena Park along the channel at Knott Avenue and travels east, crossing through railway tracks, and then turns northeast, crossing additional railway tracks (BNSF and Metrolink Railway Line). Segment Q ends at La Mirada Boulevard. The 100-foot radius of Segment Q is generally developed with residential and industrial properties.

According to the Counties of Los Angeles and Orange Assessor's Parcel Maps, the Site is legally identified by the following Assessor's Parcel Numbers (APNs):

- Segment O
  - APNs 7022-014-905 and 7022-023-904 (Los Angeles County)
  - APNs 276-011-05 and 276-031-10 (Orange County)
- Segment P
  - APNs 7003-011-091, 7003-009-903, and 7001-015-903 (Los Angeles County)
- Segment Q
  - APNs 066-010-30, -36, -54, and -55; 066-581-05; 066-582-02, and 066-584-07

A Site Plan is included as Figure 2 in Appendix A. Select photographs of the Site and vicinity is included as Appendix B.

2.3 ADJACENT PROPERTIES

Refer to Section 4.1 for adjacent properties along the Site.

3.0 ENVIRONMENTAL SETTING

3.1 PHYSICAL SITE CHARACTERISTICS

The Site is situated within the Traverse Ranges Geomorphic Province, an east-west trending series of steep mountain ranges and valleys. Segment O and a small portion of Segment P are identified on the geologic map of California: Long Beach sheet (Jennings, 1962) as recent alluvium (Qal). Most of Segment P and Segment Q are identified on the geologic map of the Whittier and La Habra quadrangles (western Puente Hills), Los Angeles and Orange Counties, California, as Holocene aged alluvial gravel, sand and silt of valleys and floodplains (Qa) and elevated surficial sediments (Qo) (Dibblee and Ehrenspeck, 2001).

The Site is located within the Coastal Plain of Orange County Groundwater Basin, which underlies a coastal alluvial plain in the northwestern portion of Orange County. The basin is bounded by consolidated rocks of the Puente and Chino Hills to the north; the Santa Ana Mountains to the east; and the San Joaquin Hills to the south. The basin is bounded by the Pacific Ocean to the southwest and a low topographic divide approximated by the Orange County – Los Angeles

County line to the northwest. Recharge to the basin is derived from percolation of Santa Ana River flow, infiltration of precipitation, and injection into wells.

Citadel reviewed the GeoTracker database of sites that have had releases of fuels, solvents, or other material into the soil and groundwater to obtain information regarding depth to first ground water in the Site vicinity. This database is maintained by the California Regional Water Quality Control Board. Information was obtained from this database for Prudential Overall Supply located at 16641 Fabrica Way, an adjoining property in Segment O. According to the Semiannual Groundwater Monitoring and Sampling, and LPH Monitoring and Recovery Report, October 2016-March 2017, dated April 15, 2017, and prepared by EEC Environmental, depth to groundwater at the facility was measured between approximately between 19.24 and 20.96 feet below ground surface (bgs) and groundwater flow was determined to be to the southeast.

4.0 SITE RECONNAISSANCE

Citadel representatives Ms. Alexandria Reed and Ms. Shirley Lee conducted the ISA reconnaissance on February 21, 2020. Ms. Reed and Ms. Lee were unescorted during the Site reconnaissance. The Site reconnaissance consisted of an inspection of the Site and a perimeter survey of the surrounding properties. Mr. Mark Drollinger reviewed this ISA. Findings from the Site inspection, research and perimeter survey are presented below.

4.1 SITE RECONNAISSANCE FINDINGS

The following tables provides information regarding adjoining/adjacent properties of interest or potential environmental concern within the 100-foot radius of the Project Area during the Site reconnaissance.

BUSINESS NAME	ADDRESS/LOCATION	OCCUPANCY	OBSERVATIONS
SEGMENT O - CITY OF CERRITOS			
T. Hasegawa USA	14017 183rd Street	Food flavor manufacturer	None
WestRock Corrugated Packages	18021 Valley View Avenue	Corrugated packaging manufacturer	Exterior propane aboveground storage tank (AST)
Unknown	17817 Valley View Avenue	Warehouse	Exterior propane AST
Prudential Overall Supply	17641 Fabrica Way	Work uniform and apparel distributor	None
Amphenol Nelson Dunn Inc.	17719 Valley View Avenue	Cable and hose manufacturer and distributor	Pad-mounted transformer
Unknown	17707 Valley View Avenue	Industrial/warehouse	None
Galls LLC	17600 Fabrica Way	Uniform and apparel sales and distributor	None
Docupack / Elite Menu Covers	17515 Valley View Avenue	Menu cover products design and manufacturer	None
SEGMENT O - CITY OF BUENA PARK			
Manhattan Beachwear Inc.	6300 Valley View Avenue	Swimsuit distribution center	No access

BUSINESS NAME	ADDRESS/LOCATION	OCCUPANCY	OBSERVATIONS
VER	6170 Valley View Avenue	Production equipment (audio, video, lights) rental agency	No access
Polarstone US	6190 Valley View Avenue	Stone surfaces distributor	No access
Exemplis	6280 Artesia Boulevard	Seating solutions distributor	No access
International Paper Company	6211 Descanso Avenue	Corrugated packaging manufacturer and distributor	No access
Roadtex Transportation Company	6350 Altura Boulevard	Trucking company	No access
Awesome Products	6201 Regio Avenue, 6370 Altura Boulevard	Household cleaning product manufacturer and distributor; also doing business as Sunderi Inc. and Derm Cosmetics Labs, Inc.	No access
Alco Printing and Packaging	6340 Artesia Boulevard	Printing and packaging materials distributor	No access
OmniDuct	6400 Artesia Boulevard	HVAC ductwork manufacturer	No access
Premier Packaging Inc.	6530 Altura Boulevard	Paper, packaging, and janitorial supply distributor	No access
States Logistics Services, Inc.	6570 Altura Boulevard	Third-party logistics provider	No access
CNL Mannequins	6600 Artesia Boulevard	Mannequin distributor	No access
SEGMENT P – CITY OF LA MIRADA			
Dale Tiffany Outlet Store	14765 Industry Circle	Lighting distributor (warehouse and store)	None
Agents West	14733 Industry Circle	Electrical component supply distributor	None
Fred David	14731 Industry Circle	Insurance agency	None
South Coast Containers	14715 Industry Circle	Logistics and supply chain company	None
Batesville Casket Company	14701 Industry Circle	Casket distributor	None
June Ceramic Studio	14709 Artesia Boulevard	Dental laboratory fabricating cosmetic restorations	Silo along the exterior of building
Forest Plywood	14711 Artesia Boulevard	Hardwood lumber and plywood distributor	Exterior propane AST
None	South of railway tracks	Pipelines	Fuel lines
Vacant	14670 Firestone Boulevard (likely associated with the address 14730 Firestone Boulevard)	Vacant land former building foundations and surface parking lot	None
TEC Equipment	14800 Firestone Boulevard	Truck rental agency and service center	None
Extended Stay America	14775 Firestone Boulevard	Hotel	None
Unknown	14815 Firestone Boulevard	Storage yard	Pallets, totes, rubber, scrap metals

BUSINESS NAME	ADDRESS/LOCATION	OCCUPANCY	OBSERVATIONS
Hawaiian Express Service Inc.	16800 Trojan Way	Freight forwarders/distributor of Hawaiian products	Propane cylinder storage
Accu-Tech Corporation	16801-16831 Knott Avenue	Distributor of low voltage solutions	None
DRB America Inc.	16811 Knott Avenue	Rubber product supplier/distributor	None
ECMS – Southern California	16821 Knott Avenue	Firefighting gear cleaning service	None
Kilo E-Liquids	16831 Knott Avenue	Electronic vaping liquid manufacturer	None
Kinetic Concepts	16855 Knott Avenue	Medical supply store	
SSDI	16961 Knott Avenue	Office for semi-conductor supplier	Evidence of possible leak in parking lot
SEGMENT Q – CITY OF LA MIRADA			
VNT Link, Inc.	15080 Desman Road	Garden décor product importer and wholesaler	None
All-Ways Pacific LLC	15300 Desman Road	Logistics services	None
SEGMENT Q – CITY OF BUENA PARK			
Shelf Rack	5620 Knott Avenue	Warehouse solutions provider	None
Exclusively Contents	5640 Knott Avenue	Contents restoration company	None
Doosan Material Handling Solutions	5650 Knott Avenue	Forklift dealer and maintenance	None
Merit Moving Systems	5655 Dolly Avenue	Residential and commercial movers	None
States Logistics Services, Inc.	5650 Dolly Avenue	Third-party logistics provider	Two large fuel ASTs and dispensers; propane cylinder storage
None	North of railway tracks	Pipeline	Chevron Pipeline; however, this pipeline also appears to be located along the channel
G&G Door Products	7600 Stage Road	Door and door frame manufacturer	None
Island Snacks Inn.	7650 Stage Road	Candies and snack factory	None
Redline Mechanical	7580 Stage Road	HVAC contractor	None
Super 1 Mart	5301 Beach Boulevard	Market	Pad-mounted transformer

5.0 SITE HISTORY

The purpose of the records review is to obtain and review reasonably ascertainable/standard sources that will help identify recognized environmental conditions in connection with the property. Reasonably ascertainable records from standard sources is (1) information that is publicly available, (2) information that is obtainable from its source within reasonable time and cost constraints, and (3) information that is practically reviewable.

Reasonable time and cost means that the information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information. Information that can only be reviewed by a visit to the source is reasonably ascertainable if the visit is permitted by the source within 20 days of request.

To investigate the history of the Site, Citadel reviewed select historic aerial photographs, building permits, city directories, and Sanborn Fire Insurance Maps provided by Environmental Record Search (ERS). In addition, Citadel reviewed client-supplied information, and oil and gas maps, and Citadel interviewed selected individuals regarding historic Site use. Citadel's reviews of these reports and interviews are discussed below.

5.1 HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs of the Site and vicinity were obtained from ERS to ascertain historical land uses and to identify any evidence of hazardous material generation or storage. Below are brief descriptions of observations made from the aerial photographs of the Site and vicinity.

Segment O

Dates(s)	Site Description
1930	Coyote Creek appears at and/or adjacent to the future channel. The vicinity appears generally undeveloped. Valley View Street and Artesia Boulevard appear developed.
1947, 1954	Relatively unchanged with the exception of the development of several structures developed further north of the Coyote Creek along Valley View Street. In addition, several properties along the Coyote Creek appear as agricultural land.
1963	Coyote Creek now appears developed as a channel. The vicinity appears relatively unchanged.
1972	Relatively unchanged with exception that the vicinity appears moderately developed with industrial properties.
1989, 1994, 2005, 2014, 2018	Further development of industrial properties along this segment. The properties along the channel appear in their current configuration.

Segment P

Dates(s)	Site Description
1930	Coyote Creek appears at and/or adjacent to the future channel. The vicinity appears generally undeveloped with the exception of the following: ➢ Railway tracks appear developed in its current configuration ➢ ASTs appear developed further north
1947, 1954	Relatively unchanged with the exception of the development of the Interstate 5 Freeway and Knott Avenue.
1963	Coyote Creek now appears developed as a channel. The vicinity appears relatively unchanged with exception of the industrial development of properties between the railway tracks and Interstate 5 Freeway
1972	Relatively unchanged with exception that the vicinity appears sparsely developed with industrial properties.
1989	Further development of industrial properties along this segment. The properties along the south portion of the channel generally appear in their current configuration.

Dates(s)	Site Description
1994	Further development of industrial properties along the north portion of this segment. The previously identified ASTs further north of the channel appears to have been removed.
2005, 2014	The properties along the north portion of the channel generally appear in their current configuration.
2018	The properties along the channel now appear in their current configuration with the demolishment and redevelopment of two properties.

Segment Q

Dates(s)	Site Description
1930	Coyote Creek appears at and/or adjacent to the future channel. The vicinity appears generally undeveloped with the exception of the following: ➢ Railway tracks appear developed in its current configuration ➢ Agricultural land appears northwest of the Coyote Creek and south of the railway tracks The northmost portion of Segment Q was not shown on this map.
1947, 1954	Relatively unchanged with the exception of the development a residential neighborhood south of Coyote Creek.
1963	Coyote Creek now appears developed as a channel. The vicinity appears relatively unchanged.
1972	Relatively unchanged with exception that the vicinity in the north portion of the segment appears further developed with residential neighborhoods.
1989	Relatively unchanged with exception of the development of several industrial properties along the channel.
1994	Further development of industrial and residential properties along this segment.
2005, 2014, 2018	The properties along the channel now appear in their current configuration with the further development of industrial and residential properties.

Copies of the Aerial Photographs provided by ERS can be found in Appendix C.

5.2 HISTORIC BUILDING PERMITS

Based on the extensive Site vicinity and that no buildings are part of the Site, no building permits were requested or reviewed during this ISA.

5.3 HISTORICAL FIRE INSURANCE MAPS

Citadel requested that ERS review its collection of Sanborn Fire Insurance Maps for potential coverage of the Site and vicinity. Sanborn Map coverage was not available for the Site. A copy of the ERS Fire Insurance Map Results is included as Appendix D.

5.4 CITY PARCEL PROFILE REPORT

Based on the extensive Site vicinity, no parcel profiles were reviewed during this ISA.

5.5 HISTORICAL CITY DIRECTORIES

Based on the extensive Site vicinity, no city directories were provided for review during this ISA.

5.6 CLIENT-SUPPLIED ENVIRONMENTAL INFORMATION

No prior reports or relevant documentation was provided to Citadel.

5.7 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps were provided by ERS in order to identify natural features and changes in development over a long period of time. The topographic maps provides the user with a regional view of changes to the Site and vicinity that other historical databases such as aerial photographs may not provide. Below are brief descriptions of observations made from the topographic maps of the Site and vicinity.

Segment O

Dates(s)	Site Description
1896; 1906, 1911, or 1912; 1922 or 1923	Coyote Creek appears at and/or adjacent to the future channel. The vicinity appears generally undeveloped with the exception of several small structures north and south of the stream. Artesia Boulevard appears developed.
1942 or 1944	Relatively unchanged with the exception of the following: ➢ Valley View Street appears developed ➢ Several small structures appear developed along Valley View Avenue
1950 or 1955; 1961	Relatively unchanged with the exception that Coyote Creek now appears as a channel.
1975	Relatively unchanged with the exception that the vicinity appears moderately developed with industrial properties.
1982	Relatively unchanged with the exception of additional development of industrial properties along the Coyote Creek.
2015	Structures are not depicted on this map.

Segment P

Dates(s)	Site Description
1896; 1906, 1911, or 1912; 1922 or 1923	Coyote Creek appears at and/or adjacent to the future channel. The vicinity appears generally undeveloped with the exception of the development of railway tracks in its current configuration.
1942 or 1944	Relatively unchanged with the exception of the following: ➢ Interstate 5 Freeway appears developed ➢ Knott Avenue appears developed ➢ Numerous tanks appear developed further north
1950 or 1955; 1961	Relatively unchanged with the exception that Coyote Creek now appears as a channel.
1975	Relatively unchanged with the exception that the vicinity appears sparsely developed with industrial properties.
1982	Relatively unchanged with the exception of additional development of industrial properties along the Coyote Creek.
2015	Structures are not depicted on this map.

Segment Q

Dates(s)	Site Description
1896; 1906, 1911, or 1912; 1922 or 1923	Coyote Creek appears at and/or adjacent to the future channel. The vicinity appears generally undeveloped with the exception of the development of railway tracks in its current configuration.
1942 or 1944	Relatively unchanged with the exception of the following: ➢ Stage Road appears developed
1950 or 1955; 1961	Relatively unchanged with the exception of the following: ➢ Coyote Creek now appears as a channel ➢ Bear Creek channel appears developed east of Knott Avenue ➢ A residential neighborhood appears developed south of Coyote Creek
1975	Relatively unchanged with the exception that the vicinity appears sparsely developed with industrial properties.
1982	Relatively unchanged with the exception of additional development of industrial properties along the Coyote Creek.
2015	Structures are not depicted on this map.

Copies of the historical topographic maps provided by ERS are included as Appendix C.

5.8 HISTORIC OIL AND GAS MAPS

Citadel reviewed information available on-line through the California Department of Conservation's website. The Geological Energy Management Division (CalGEM) Online Mapping System (COMS) shows that there are no oil wells within 1,000-feet radius of the Site. Previously identified ASTs further north of the Site appear to be associated with four oil wells located within the La Mirada Oil Field, approximately 0.75 mile northwest of Segment P.

5.9 INTERVIEWS

Based on the extensive Site vicinity, no interviews were performed during this ISA. According to information provided by the County of Orange, the channel was constructed between 1967 and 1968.

5.10 ENVIRONMENTAL LIEN

Based on the extensive Site vicinity, no environmental lien search was requested or reviewed during this ISA.

6.0 REGULATORY AGENCY REVIEW

6.1 DATABASE REVIEW

As part of the ISA, Citadel utilized ERS of Laguna Hills, California, as an information source for regulatory agency database records.

The following summary of the database information is divided into four columns. The first column identifies the environmental database researched; the second column indicates the distance from the Site that was used for the research; the third column indicates if the Site was identified in the specified database; and the fourth column lists the number of listings identified on the database within the specified distance of the Site.

Although locations of the orphan sites are frequently unknown, Citadel attempts to evaluate the potential adverse environmental impact that these facilities may have on the Site. This evaluation consists of reviewing street names in an effort to learn whether the street on which the Site is located lies within the search distance of the subject property, a drive-by view of surrounding properties during the Site visit, and evaluating the Site type and information provided by government agencies. The orphan sites included in the following table are those Citadel identified as potentially located within the identified search distance.

Database	Radius	Site Identified	No. of Listings Identified
National Priorities List	1 mile	No	0
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	No	0
Delisted National Priorities List	1 mile	No	0
CERCLIS Sites	½ mile	No	1
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	No	5
RCRA Non-Corrective Action TSD Facilities	½ mile	No	1
State/Tribal Voluntary Cleanup Sites	½ mile	No	1
State/Tribal Leaking Registered Storage Tank Sites	½ mile	No	72
State/Tribal Brownfield Sites/CERCLIS Equivalent	1 mile	No	0
Historic CORTESE List	½ mile	No	0
State/Tribal Solid Waste Landfill Sites/Facilities	½ mile	No	1
Federal/State/Tribal Engineering Controls Registries	½ mile	No	0
Federal/State/Tribal Institutional Controls Registries	½ mile	No	0
RCRA Large Quantity Generators	¼ mile	No	10
RCRA Small Quantity Generators	¼ mile	No	40
RCRA Non Generators	¼ mile	No	65
State/Tribal Registered Storage Tank Sites	¼ mile	No	31
HIST UST	¼ mile	No	29
Facility Index System (FINDS)	1/16 mile	No	27

The following summary of the database information provides brief description of the facility name; the databases the facility was identified in; location of the property to the Site; and whether the facility is a concern to the Site. Based on the linear aspect of the segments, the ISA focuses on properties along the segments that may adversely impact the vicinity of the construction areas and workers. The radius of the ISA includes 100 feet of the segments although select properties located beyond the 100-feet radius were reviewed based on its potential impact to the segments.

SEGMENT O

FACILITY NAME	DATABASE(S)	LOCATION	COMMENTS
Prudential Overall Supply	Hist-HWS-CA, AIR-DIST-CA, CHMIRS-CA, Cleaners-CA, County-Others-CA, County-UST-CA, CRSP-CA, ENF-CA, FRS-US, Hist-CA, Hist-FINDS-US, Hist-LUSTIS-CA, HIST-R4-CA, Hist-Regional-SLIC-CA, Hist-US, Hist-UST-CA, HWIS-CA, LUST-Open-CA, RCRA-SQG-US, SLIC-Closed-CA	17641 Fabrica Way – North of Site	This facility was identified on numerous databases. According to information reviewed, the facility formerly included laundering operations and utilized USTs as part of its operations. Laundering operations had ceased in 2007. A 2,000-gallon waste mop oil UST and a 10,000-gallon gasoline UST were removed in 1988; while a 10,000-gallon gasoline UST was installed in 1988. The UST was removed in 1998. Results from the soil sampling conducted during the USTs removal indicate a small release from the gasoline UST removed in 1998 and a larger release from the mop oil UST and/or associated piping, which was located in the north portion of the facility. Liquid-phase hydrocarbon (LPH) recovery efforts had been ongoing since 1997, with two enhanced LPH removal events completed in 2017. The case for the leak is currently eligible for closure. Based on the location of the leak (approximately 300 feet north of the Site) and the remediation efforts, this facility is not expected to represent a significant environmental concern to the Site.
QuarterMaster Inc.	HWIS-CA	17600 Fabrica Way – North of Site	This facility was identified as a hazardous waste generator of off-specification, aged, or surplus organics and other inorganic solid waste between 2010 and 2014. The appearance of the facility on this database reflects proper disposal of hazardous materials and do not represent an environmental concern to the Site.
Consolidation Services	County-Others-CA	17515 Valley View Avenue, Unit B – North of Site	This facility was identified on the Los Angeles County Department of Public Works (LADPW) database. An inspection was performed in October 2000 and found no such business at this address. This listing does not represent an environmental concern to the Site.
Docupak Inc.	County-Others-CA; Hist-CA	17515 Valley View Avenue, Unit A – North of Site	This facility was identified on the LADPW database. An inspection was performed in October 2000 and

FACILITY NAME	DATABASE(S)	LOCATION	COMMENTS
			January 2001; the inspections found no runoff from the facility operations. This listing does not represent an environmental concern to the Site.
ASE Technologies USA Inc.	FRS-US, Hist-US, RCRA-SQG-US	6190 Valley View Avenue – North of Site	This facility was identified as a RCRA Small Quantity Generator (SQG) in 2000. No further information was provided. This listing does not represent an environmental concern to the Site.
OC Polymer	FRS-US, Hist-US, HWIS-CA, RCRA-SQG-US,	17707 Valley View Avenue – South of Site	The facility was identified as RCRA SQG in 2011 and as a hazardous generator of off-specification, aged, or surplus inorganics; unspecified oil-containing waste; and other inorganic solid waste in 2011. The appearance of the facility on these databases reflect proper disposal of hazardous materials and do not represent an environmental concern to the Site.
Amphenol Nelson Dunn Technologies	HWIS-CA	17707 Valley View Avenue – South of Site	The facility was identified as a hazardous generator of off-specification, aged, or surplus inorganics; unspecified oil-containing waste, and other inorganic solid waste between 2013 and 2015. The appearance of the facility on this database reflects proper disposal of hazardous materials and do not represent an environmental concern to the Site.
Security Pacific Corporation, Ultra Wheel Company	AIR-DIST-CA, CERS-CA, County-LUST-Closed-CA, CRSP-CA, ENF-SMARTS-CA, Hist-CalFID-CA, Hist-LUSTIS-CA, Hist-Regional-UST-CA, NEI-LF-CA, RCRA-LQG-US, RCRA-SQG-US, TierPer-CA	6300 Valley View Avenue – South of Site	This property was identified on numerous databases. According to records reviewed, a gasoline leak was reported in 1990 and impacted soil. The case was completed and closed in December 1993. Ultra Wheel Company was identified as a RCRA Large Quantity Generator (LQG) from 2001 to 2005. Several violations have been reported; however, the violations have been returned to compliance. This property does not represent a significant environmental concern to the Site.
Esselte Corporation, Modern Materials, Inc., Nielsen and Bainbridge	AIR-DIST-CA, CERS-CA, County-LUST-Closed-CA, County-Others-CA, CRSP-CA, FRS-US, Hist-CA, Hist-LUSTIS-CA, Hist-Printers, Hist-Regional-Other-CA, HWIS-CA,	6280 Artesia Boulevard – North of Site	This property was identified on numerous databases. According to records reviewed, one 5,000-gallon diesel UST and one 8,000-gallon gasoline UST were removed in 1986; and two 6,000-gallon diesel USTs were removed in 1991. Release was

FACILITY NAME	DATABASE(S)	LOCATION	COMMENTS
	NPDES-SW-CA, RCRA-SQG-US,		observed during the removal of the USTs in 1986. A Remedial Action Completion Certification was issued by the Orange County Health Care Agency (OCHCA) in September 2000. This property does not represent a significant environmental concern to the Site.
Omniduct, Shade Allied Inc., SCM Walton Printing, Fibertron	CHMIRS-CA, County-Others-CA, CRSP-CA, FRS-US, Hist-FINDS-US, Hist-Steel-Metals, RCRA-NON-US, RCRA-SQG-US	6400 Artesia Boulevard – North of Site	This property was identified on numerous databases. Omniduct was identified as a RCRA Non-Generator in 2018. The property was reportedly occupied by Walton Printing in 1998. No further information was provided; however, it does not appear that large scale printing occurred at this space. This property does not represent a significant environmental concern to the Site.
Western Photographic Service Inc., Universal Directory Publishing, Elson Alexandre Photography	AIR-DIST-CA, Hist-Printers, HWIS-CA	6571 Altura Boulevard – South of Site	This property was identified as a historical print shop and was identified as a hazardous waste generator of photo-chemicals/ photo-processing waste in 1998. While this may represent an environmental concern, this property does not represent a significant environmental concern due to the distance of the property structure and the likely groundwater gradient to the general south.

Automotive Caliper Exchange Inc., Fore-Par Group, Inc., Stage Road Property, Island Snacks Inc.,	AIR-DIST-CA, County-Others-CA, CRSP-CA, FRS-US, Hist-Auto Dealers, Hist-CA, HWIS-CA	7650 Stage Road	This property was identified on several databases. According to records reviewed, the property was historically occupied by an auto dealer in the 1990s. The property was identified as an Industrial Site Cleanup due to a release of tetrachloroethylene (PCE). The case was closed by the OCHCA in October 2008. Based on the case closure, this property does not represent an environmental concern to the Site.

Maps showing the location of these facilities and additional information are provided in the RecCheck Corridor Report Results in Appendix E.

6.2 VAPOR ENCROACHMENT CONDITION

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Tier 1 screening begins with the default area of concern (AOC) defined by the approximate minimum search distances adjusted as appropriate for local conditions, and then determining if known or suspected contaminated properties with contaminants of concern (COCs) exist within the established AOC. The default AOC is one third of a mile around the TP for COCs and one-tenth of a mile for petroleum hydrocarbon COCs. The AOC is measured from the TP boundary to a contaminated property with known or suspected COC contamination of soil or groundwater or both. The default AOC may be expanded or reduced by the environmental professional (adjusted AOC) using experience and professional judgment, based on factors like groundwater flow direction, subsurface characteristics, surficial features and man-made features.

If groundwater flow direction is known or can be inferred from the Phase I ESA investigation of the TP, the default AOC in the down-gradient direction may be reduced to the area within the critical distance of 100 feet. The AOC in the cross-gradient direction may also be reduced, depending upon the critical distance and the width of the COC-contaminated plume associated with a known or likely COC-contaminated property located in a cross-gradient direction from the TP. The critical distance is the lineal distance in any direction between the nearest edge of the contaminated plume and the nearest TP boundary, and is equal to 100 feet for COCs or 30 feet for dissolved petroleum hydrocarbon COCs.

For a COC-contaminated property identified in Tier 1 located down-gradient from the TP, it is not necessary to have information on migrating groundwater contaminated plume dimensions as the critical distance is measured from the nearest TP boundary to the source of contamination at the off-site down-gradient property. In this case, the AOC may be reduced to the area within the critical distance.

For a contaminated property identified in Tier 1 located crossgradient from the TP, the AOC will be the area within the critical distance plus one half of a reasonable estimation of the contaminated plume width (at the point nearest the closest TP boundary) that might be associated with the nearby known or suspected COC-contaminated property (that is, the COC-contaminated property where the groundwater contamination originated). The environmental professional's judgment and experience can be used to estimate the width of the COC-contaminated plume that might be associated with the nearby known or suspected COC-contaminated property. If it is not possible to estimate the contaminated plume width, then the AOC cannot be reduced in the cross-gradient direction.

Citadel reviewed information provided by ERS regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to ERS, historical releases of petroleum products from a leaking underground storage tank (LUST) occurred within 0.25-mile and upgradient of the Site. These LUST properties are discussed in Section 6.1. ERS also provided the listings on the Historical Gas Station and Dry Cleaners databases within 0.25-mile radius of the Site. Two properties were identified on the Historical Cleaners and 11 properties were identified on the Historical Gas Station databases as within 0.125 miles. These properties were not located within 100 feet of the Site.

7.0 DATA GAPS

A data gap is a lack of or inability to obtain information despite good faith efforts to gather such information. A data failure is a failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful.

The following data gaps have been identified during the course of this investigation:

- Access to portions of Segment O was not provided due to locked gates during the Site reconnaissance.
- Additional governmental agencies that are not included in the Government Records report may maintain information regarding environmental conditions at the Site and nearby facilities. However, based on the nature of the Site as a concrete channel, no further information has been requested.

With regard to these data gaps, Citadel believes that the most significant potential sources for on-site contamination have been identified during the current investigation.

8.0 FINDINGS

Citadel was contracted by UltraSystems Environmental (Client) to perform an ISA of the OC Loop Segments O, P, and Q Project located in the Los Angeles and Orange Counties, California; hereinafter referred to as the "Site."

PROJECT INFORMATION

The OC Loop will form a 66-mile continuous facility for bicycle and pedestrians throughout the west and north portions of Orange County and small portions of Los Angeles County. The OC Loop will link important existing regional facilities such as the Santa Ana River Bikeway, the Coastal Bikeway, the San Gabriel River Bikeway, and the Coyote Creek Bikeway. The Project includes the construction and operation of a 2.7-mile Class I Bikeway component of the OC Loop. The Project Area is along the Coyote Creek flood control channel and consists of the three following segments:

- Segment O is located between 183rd Street and Artesia Boulevard in the Cities of Cerritos and Buena Park
- Segment P is located between Artesia Boulevard and Knott Avenue in the City of La Mirada
- Segment Q is located between Knott Avenue and Malvern Avenue in the Cities of La Mirada and Buena Park

Based on the linear aspect of the Project, the ISA focuses on properties along the Coyote Creek channel that may adversely impact the vicinity of the construction areas and workers. The radius of the ISA extends approximately 100 feet from the Project path although select properties located beyond the 100-foot radius were reviewed based on their potential environmental impact to the segments.

ENVIRONMENTAL DATABASES

As part of the ISA, Citadel utilized ERS, as an information source for regulatory agency database records. Information from standard federal, state, county, and city environmental record sources was provided by ERS. The following summary of the database information is divided into four columns. The first column identifies the environmental database researched; the second column indicates the distance from the Site that was used for the research; the third column indicates if the Site was identified in the specified database; and the fourth column lists the number of listings identified on the database within the specified distance of the Site.

Database	Radius	Site Identified	No. of Listings Identified
National Priorities List	1 mile	No	0
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	No	0
Delisted National Priorities List	1 mile	No	0
CERCLIS Sites	½ mile	No	1
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	No	5
RCRA Non-Corrective Action TSD Facilities	½ mile	No	1
State/Tribal Voluntary Cleanup Sites	½ mile	No	1

State/Tribal Registered Storage Tank Sites	¼ mile	No	31
HIST UST	¼ mile	No	29
Facility Index System (FINDS)	1/16 mile	No	27

The following provides information on areas where there may be environmental concerns based on our environmental database and regulatory agency research.

SEGMENT O

While several of the properties along the channel were identified with former USTs and leaking underground storage tanks (LUSTs), most of the cases for the LUST have been closed or are eligible for closure. No environmental concerns were identified for Segment O.

SEGMENT P

While several of the properties along the channel were identified with former USTs and LUSTs, the cases for the LUST have been closed. However, the property located at 14730 Firestone Boulevard was occupied by print shops with spray booths in 2004 and 2006. Aquatic Stands and More occupied the space in 2004; and California Ink Printing occupied the space in 2006. Solvent-based inks were identified in 2006. No further information was provided. Based on the use of spray booths and solvent-based inks, this property may be a VEC concern to Segment P.

In addition, the exposure to the fuel pipelines by the railway tracks may be an environmental concern; however, the pipelines are aboveground and crosses over the channel. The proximity of the Interstate 5 Freeway to Segment P may be a REC due to possible shallow soil contamination of ADL from vehicle exhaust.

SEGMENT Q

While several of the properties along the channel were identified with releases and LUSTs, the cases for the leaks have been closed. However, the proximity to the underground Chevron fuel pipeline along Segment Q may represent a REC due to possible future releases.

9.0 CONCLUSIONS AND RECOMMENDATIONS

According to ASTM Standard of Practice E1527-13, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A CREC, is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

An HREC, is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Based on our review of these databases, reported release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC were identified as follows:

- The property located at 14730 Firestone Boulevard along Segment P was occupied by print shops with spray booths in 2004 and 2006. Based on the use of spray booths and solvent-based inks, this property may represent a VEC concern to Segment P;
- The proximity of the Interstate 5 Freeway to Segment P may be a REC due to possible shallow soil contamination of ADL from vehicle exhaust; and
- The proximity of the underground Chevron fuel pipeline along Segment Q may present a REC due to possible future releases.
- As noted in the Addendum, the proximity of the Interstate 5 Freeway to the easement at Trojan Way and the proximity of La Mirada Boulevard to the easements along the road may be RECs due to possible shallow soil contamination of aerially deposited lead (ADL) from vehicle exhaust.

The following table provides further information about adjoining properties that may be a concern to the Site and Citadel's recommendation to evaluate potential environmental impacts to the Site.

PROPERTIES THAT NEED A PHASE II INVESTIGATION

ADDRESS/LOCATION; (BUSINESS NAME)	PARCEL NUMBER(S)	PARTIAL/FULL TAKE	REGULATORY STATUS	SPECIFIC/POTENTIAL HAZARDOUS WASTE IMPACTS	RECOMMENDATION
SEGMENT P					
14730 Firestone Boulevard – West of Site	7003-009-909	None	None	Volatile organic compounds (VOCs) from solvents and aerially deposited lead (ADL) from vehicle exhaust	Collect two soil samples at five feet below ground surface(bgs) using a hand auger; soil samples analyzed for: • VOCs by EPA Method 8206B • Lead by EPA Method 6010B.

7600 Stage Road (Chevron)	066-295-06	None	Buena Park Fire Department – release contained	TPH from pipeline leak; metals, organochlorine pesticides (OCPs), and polychlorinated biphenyls (PCBs) from nearby railway tracks	Collect one soil sample at five feet bgs using a hand auger; soil sample analyzed for: • TPH Full Range by EPA Method 8015B • Title 22 Metals by EPA Method 6010B/7471A • OCPs by EPA Method 8081A • PCBs by EPA Method 8082.
Additional properties in close proximity to the railway tracks 7650 Stage Road (G&G Door Products and Island Snacks Inn.)	066-581-05; 066-585-21; 066-582-01; 066-582-03	None	None	Metals, OCPs, and PCBs from nearby railway tracks	Collect three soil samples at five feet bgs using a hand auger; soil samples analyzed for: • Title 22 Metals by EPA Method 6010B/7471A • OCPs by EPA Method 8081A • PCBs by EPA Method 8082.
Easement on La Mirada Boulevard – north end of Segment Q	066-584-05; 066-601-04; 066-403-02; 066-591-24	None	None	ADL from vehicle exhaust	Collect one soil sample from four properties in close proximity to the easement at five feet bgs using a hand auger; soil samples analyzed for: • Lead by EPA Method 6010B.
Chevron fuel pipeline along Segment Q	Various	None	None	TPH from underground pipeline	Collect one soil sample approximately every 1,000 feet (five soil samples) at five feet bgs using a hand auger; soil samples analyzed for: • TPH Full Range by EPA Method 8015B

Citadel would be able to complete the proposed recommendation and scope of work under a separate cover. To complete the proposed scope of work, Citadel would require two days to conduct the field sampling activities and collect soil samples. Sample results would be available

from the laboratory approximately seven business days from delivery of the samples to the laboratory.

Based on the findings of the Phase II Investigations described above, Citadel may additionally recommend the following:

- Preparing a soil management plan (SMP) to manage any contaminated soils and/or subsurface features encountered during the development of the OC Loop Project;
- Preparing an ADL plan to manage shallow surface soils in close proximity to freeways that may be contaminated with lead from vehicle exhaust; and
- Implementing soil monitoring for VOCs during excavation activities of the areas identified with environmental concerns including the former print shop along Segment P and areas near pipelines in Segment Q.

10.0 LIMITATIONS

The information and opinions rendered in this report are exclusively for use by the Client. Citadel will not distribute this report without the Client's written consent, except as may be required by law or court order. The recommendations expressed in this report took into consideration the purpose and scope of this limited assignment. We accept responsibility for the competent performance of our duties in executing the assignment and preparing this report in accordance with the normal standards of our profession, but disclaim any responsibility for consequential damages resulting from inaccuracies in information provided by the Client, federal, state, county, or local regulatory agencies.

12.0 PROFESSIONAL CERTIFICATION

Citadel has completed an ISA of the Orange County (OC) Loop Segments O, P, and Q Project (Project) located in the Los Angeles and Orange Counties, California. The Phase I ESA was performed at the Clients request in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-2013 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The independent conclusions represent our professional judgment based on information and data available to Citadel during the course of this project. Information regarding historical and present operations, conditions and test data provided by the Client or their representative, is assumed to be correct and complete. The conclusions presented by this ISA are based on information provided to Citadel and from observations and perceived conditions existing on the date of the site reconnaissance.

In expressing the opinions stated in this report, Citadel has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional. Documentation provided by the Client, Client-designated representatives, interested third-parties, or from the public domain, and referenced in preparation of the ISA report, have been assimilated with the understanding that Citadel assumes no responsibility or liability for their accuracy.

Report Reviewed by:

Mark Drollinger, M. Eng., CSP, CHMM, EiT
Principal, Engineering and Environmental Sciences

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by the final All Appropriate Inquiry (AAI) Rule published in 40 CFR Part 312.10 (November 1, 2013). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting described in this ISA. I have developed and performed the AAI in conformance with the standard and care of this Rule.

Historical Fire Insurance Map Search Result:

The review of collections and indexes has determined that no historical fire insurance maps are available within these collections and indexes for the referenced site; therefore they are not available and are considered not "reasonably ascertainable" according to ASTM standards. Environmental Record Search (ERS) certifies that a thorough search of our holdings, various other collections and indexes has been completed.

Thank you for selecting ERS.

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

- ERS Exclusive Historic Sources

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency/source. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Potential air dispersion plumes are depicted to graphically show the direction contaminates may travel based on prevailing wind data and provide a visual screening tool only. Actual direction will vary especially by season. Depending on the actual contaminate, amount released, and other variables, the distance from the source the contaminate may travel can and will vary. Interpretation and review of all the actual relevant data by an environmental professional is recommended before making any decisions, conclusions or otherwise based on the map depictions, air data, and potential air dispersion plumes.

This "MAPPED AIR PERMITS WITH POTENTIAL DISPERSION (MAP 6)" is fully protected against reproduction in any way, shape or form by ERS Environmental Record Search. ALL applicable laws, copyrights, pending copyrights, trademarks, and any and all applicable Federal and State laws apply at all times. These protections include the concept, procedures, processes, layout, vision, color scheme, mapping layout, legends, data, any and all verbiage, and the entire concept.

DETAILS

Global ID: SLT4L6981856
County: Orange
Site History: The Site comprises of two connected office, warehouse, and operation structures that were formerly used for mixing and blending of specialty chemicals including halogenated volatile organic compounds (VOCs). According to the information provided, several Site investigations were conducted beginning in 1983. The investigations included installation of 53 soil borings and 11 groundwater monitoring wells at the Site. The analytical results confirmed that soil and groundwater beneath the Site are impacted with VOCs and petroleum hydrocarbons. A total of 10 underground storage tanks (USTs) identified as potential sources were either removed or abandoned in place, filled with cement slurry, and the use of chlorinated solvents was also discontinued since 1990. As part of the remediation effort, a groundwater collection gallery was installed and operated from 1985 to 1996. The Site is located in the Central Groundwater Basin of the Coastal Plain of Los Angeles. Based on the soil boring logs, the soil beneath the Site consists of primarily silty clay, clayey silt and fine grained sand. Groundwater was encountered at 16 feet below ground surface (bgs) at the Site. The shallow groundwater encountered at the Site is part of the perched and semi-perched alluvial deposits underlain by the Bellflower aquiclude which are in turn underlain by the Artesia and Gage aquifers. The shallow groundwater flow is toward the northwest.

Loc Case Number: Not Reported
File Location: Regional Board
Potential Contaminants of Concern: Not Reported
Potential Media Affected: Not Reported
Site History: The Site comprises of two connected office, warehouse, and operation structures that were formerly used for mixing and blending of specialty chemicals including halogenated volatile organic compounds (VOCs). According to the information provided, several Site investigations were conducted beginning in 1983. The investigations included installation of 53 soil borings and 11 groundwater monitoring wells at the Site. The analytical results confirmed that soil and groundwater beneath the Site are impacted with VOCs and petroleum hydrocarbons. A total of 10 underground storage tanks (USTs) identified as potential sources were either removed or abandoned in place, filled with cement slurry, and the use of chlorinated solvents was also discontinued since 1990. As part of the remediation effort, a groundwater collection gallery was installed and operated from 1985 to 1996. The Site is located in the Central Groundwater Basin of the Coastal Plain of Los Angeles. Based on the soil boring logs, the soil beneath the Site consists of primarily silty clay, clayey silt and fine grained sand. Groundwater was encountered at 16 feet below ground surface (bgs) at the Site. The shallow groundwater encountered at the Site is part of the perched and semi-perched alluvial deposits underlain by the Bellflower aquiclude which are in turn underlain by the Artesia and Gage aquifers. The shallow groundwater flow is toward the northwest.

Site ID: 50
Site EI ID: 10310554
Agency Provided Latitude: 33.871726
Agency Provided Longitude: -118.02864

Program Description: Chemical Storage Facilities

Evaluation Information
Evaluation Date: 12/19/2016
Violations Found? (Y/N): No
Evaluation General Type: Other/Unknown
Evaluation Type: Other, not routine, done by local agency
Evaluation Note(s): For your site map can you please include the location of the water, electrical, and gas shutoffs, evacuation staging area, hazardous material location, emergency equipment location, facility name and address, and nearby storm drains and sewers. If you have any questions please contact me at anesbit@ochca.com or 714-640-4249. Thank you.
Evaluation Division: Orange County Environmental Health
Evaluation Program: HMRRP
Evaluation Source: CERS

Evaluation Date: 6/21/2016
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site to conduct a routine Hazardous Materials Business Emergency Plan inspection. Consent to inspect and take photos was provided by Richard Scott. We discussed that the materials stored in the facility are retail however only contractors can purchase the items and therefore all materials stored at the regulated volume must be disclosed. A walk through of the facility was conducted. This facility is responsible for identifying all hazardous materials and hazardous wastes at the following volumes: Solids > 500 pounds. Liquids > or = 55 gallons Gas > or = 200 cubic feet Hazardous wastes should have a separate disclosure. During the inspection it was noted that propane must be added to the HMBEP. Please add Propane. Site map is available for review. Employee training is available for review. Electronic Reporting has been submitted and completed using the E Submit Portal. Ensure the HMBEP is resubmitted by March 1st every year. Further review [Truncated]

Evaluation Information
Evaluation Date: 6/6/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): The following were observed on site meeting or exceeding the reportable thresholds of 55 gallons for liquids, 500 pounds for solids, and 200 cubic feet for compressed gas: - Car wash hot and cold wax (55 gallons) - Car shampoo (55 gallons) - Rainbow wax (165 gallons) - Rubber life dressing (55 gallons) - Unleaded gas (30,000 gallons)
Evaluation Division: Orange County Environmental Health
Evaluation Program: HMRRP
Evaluation Source: CERS

Evaluation Date: 6/6/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site for routine UST inspection, monitoring system certification, and spill bucket testing. The facility has two double-walled tanks (87, 91) monitored by a Veeder Root TLS-350 system. The site has double-walled pressurized piping with mechanical line leak detectors. Positive shutdown and fail safe programming were verified. Flapper valves are used for overfill prevention. Testing was conducted by David Simon of Shancor. Tester certifications (VR, ICC, VMI) were verified. Please submit the test reports to this Agency within 30 days. Secondary containment testing was last conducted on 12/18/17. It must be tested every 36 months.

Permit Type: Industrial
Status: Terminated
Status Date: 6/17/2013
Owner/Operator Name: TIN Inc DBA International Paper
Owner/Operator Address: 6211 Descanso Avenue
Owner/Operator City: Buena Park
Owner/Operator State: California
Owner/Operator Zip: 90620
Country: United States
Agency Provided Longitude: -118.0243807
Agency Provided Latitude: 33.87104168

B Type Inspections from 2009-2014
Inspection ID: 2011592
Inspection Date: 4/29/2011
Inspector Name: Adam Fischer
Action Taken: No Further Action
Note(s): Weather: warm and sunny. SWPPP is dated 2005 and is currently being updated. Sediment filter is indicated in NW storm drain; inspection found the inlet filter partially-collapsed. Contact agreed to repair/replace today. Three open trash bins found; Contact reports that these are kept closed during winter. Scrap cardboard baling area is covered; has much scrap but little extends out beyond the cover. Bale bin has scrap underneath it; Contact reports this is removed regularly and swept at that time. Surplus machinery is stored uncovered; Contact reports it will be disposed of in one month. Rooftop has the scrap collection system and is neat and clean. Reviewed storm water sample results for 2/16/2011.

Program Description: Chemical Storage Facilities

Program Description: Hazardous Waste Generator

Program Description: Underground Storage Tank

Evaluation Information
Evaluation Date: 5/3/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site for routine UST inspection, monitoring system certification, and spill bucket testing. The facility has two double-walled tanks (87 91) monitored by a Veeder Root TLS-350R system. The site has double-walled pressurized piping with electronic line leak detectors. Positive shutdown and fail safe programming were verified. Flapper valves are used for overfill prevention. Testing was conducted by Steven Galladro of Fastech. Tester certifications (VR, ICC, VMI) were verified. Please submit the test reports to this Agency within 30 days.

Program Description: Aboveground Petroleum Storage

Evaluation Information
Evaluation Date: 4/24/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): The following APSA regulated tanks were observed on-site: -Biodiesel, two 6,000 gallon tanks
Evaluation Division: Orange County Environmental Health
Evaluation Program: APSA
Evaluation Source: CERS

Evaluation Date: 4/24/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site to perform routine Hazardous Materials Business Plan inspection. Observed the following hazardous materials on site: - Diesel Exhaust Fluid (500 gal) - Lead Acid Batteries (on fork lifts, approximate total of 456 gal.) - Biodiesel Fuel (two ASTs 6,000 gal each, 12,000 gal total.) - Liquefied Petroleum Gas cylinders (approximate total of 200 gal) Site no longer has 1500 gal LPG tank.
Evaluation Division: Orange County Environmental Health
Evaluation Program: HMRRP
Evaluation Source: CERS

WD ID: 8 30I019429
Application ID: 288890
Permit Type: Industrial
Status: Active
Status Date: 4/15/2005
Owner/Operator Name: LD Hardas
Owner/Operator Address: 6370 Altura Blvd
Owner/Operator City: Buena Park
Owner/Operator State: California
Owner/Operator Zip: 90620
Country: United States
Agency Provided Longitude: -118.022288
Agency Provided Latitude: 33.870631

B Type Inspections from 2009-2014
Inspection ID: 2011590
Inspection Date: 4/29/2011
Inspector Name: Adam Fischer
Action Taken: No Further Action
Note(s): Weather: Warm and sunny. Contact consented to photos and walk-through. SWPPP indicates four sampling points (tank truck unloading area catch basin, tank farm, and two driveways) where Contact reports only two at driveway outflows. Much of the site is now covered by tall fixed covers where much of the roofing is not shown in SWPPP. Roof is made up of several overlapping roofs and there are two roof drains that discharge runoff through parts of the covered area. With exception of the tank truck loading area, site is neat and orderly. Loading area has indications of many spills of soap under the roof and beyond; some caused by loading and some from equipment work. Contact was advised to use BMPs to prevent spills when anticipated, such as a drip pan, as opposed to their granular absorbent. The drain inlet in this area was opened and found filled with soap. Contact had inlet cleaned out later the same day and provided photos of cleaned inlet showing that it doesn't drain elsewhere. Contact reported plans to fill inlet with concrete since it is not in use.

Contact reported plans to fill inlet with concrete since it is not in use.
Evaluation Division: Water Boards
Evaluation Program: INDSTW
Evaluation Source: SMARTS

Evaluation Date: 6/23/2005
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Industrial Storm Water Compliance Evaluation
Evaluation Note(s): Accompanied by John Balobeck, City of Buena Park. Met with Kiran Walvekar, as LD Hardas (owner) was not available. New to the permit, no letter with WDID number received by facility. Conducted inspection. Some minor trash accumulated near the shipping/receiving docks. Requested this be cleaned. Near front entrance is a spigot with a hose. Ground near the spigot was moist. City of Buena Park personnel reported that the facility may have discharged nonstorm water from washing activities at this spigot. Requested Awesome personnel cease all outside wash activities, as discharge from these types of activities are considered an unauthorized nonstorm water discharge. Inspected trash compactor area, but Mr. Walvekar did not have key to side area (where ASTs are located). Area appeared to be clean, with no visible housekeeping problems. Asked what the tanks hold, and was informed they hold water (?). Requested to see their SWPPP, which was not available.

Program Description: Hazardous Waste Generator

Program Description: Industrial Facility Storm Water

Evaluation Information
Evaluation Date: 12/26/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Industrial Storm Water Compliance Evaluation
Evaluation Note(s): Regional Board staff conducted a No Exposure Certification inspection of the above facility on December 26, 2018. The yard did not have any exposed materials and thus is currently in compliance with the No Exposure Certification requirements as identified in the Industrial General Permit.
Evaluation Division: Water Boards
Evaluation Program: INDSTW
Evaluation Source: SMARTS

Evaluation Date: 11/15/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Pinckney Griffen, Manager. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. Containers were empty, facility's only hazardous waste are retail products that are broken and as of 11/15/18 no hazardous waste items have been collected. Manifests were unavailable since the facility was opened in April of 2018 and there have been no hazardous waste pickups for the facility. Employees are reported to be trained. Emergency plan is posted in office. No hazardous waste or universal waste observed in the dumpster/enclosure area. No hazardous waste violations were observed this date. Performed SR in order to enter facility into EC.
Evaluation Division: Orange County Environmental Health

Agency Provided Longitude: -118.010979

Program Description: Chemical Storage Facilities

Evaluation Information
Evaluation Date: 12/7/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with Andy DeCorte. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Lead Acid Batteries - Propane REQUIREMENT FOR ELECTRONIC SUBMITTAL OF HMBEP DOCUMENTS: This report serves as notice that the facility must submit the following documents electronically within 30 days of this report: - Business Activities - Owner/Operator Information - Hazardous Materials Inventory - Site Map - Emergency Response Plan - Employee Training Plan The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the [Truncated]
Evaluation Division: Orange County Environmental Health
Evaluation Program: HMRRP
Evaluation Source: CERS

Evaluation Date: 7/25/2016
Violations Found? (Y/N): No
Evaluation General Type: Other/Unknown
Evaluation Type: Other, not routine, done by local agency
Evaluation Note(s): hmbep conditionally accepted This submittal is being conditionally approved in order to facilitate transfer of data to California Electronic Reporting System (CERS) database. The facility will need to make the following revisions in CERS following notification of data transfer: Chemical Description--Lead Acid Battery: in the Hazardous Component (mixture) section, indicate that Sulfuric Acid is an EHS and mark the Yes box. Please mark the EHS box next to Sulfuric Acid within the Hazardous Component Section, and uncheck the Extremely Hazardous Substance box below the Hazardous Component Section. Only the sulfuric acid of the lead acid battery is an extremely hazardous substance. Also this should be reported in gallons. The Sulfuric Acid component is roughly 40% of the battery.
Evaluation Division: Orange County Environmental Health
Evaluation Program: HMRRP
Evaluation Source: CERS

Program Description: Underground Storage Tank

Evaluation Information
Evaluation Date: 2/22/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): INSPECTOR COMMENTS: On site to witness monitoring system certification testing activities and to conduct routine UST inspection. Testing was conducted by John Kneisel of Petroleum Tank Testing. Tester certifications (VR, ICC, VMI) were verified. Certification stickers were attached to all tested components. Please submit the test reports to this Agency within 30 days. The facility has three single-walled tanks (87,91, D) monitored by a Veeder Root TLS-350R system. Site has flappers for overfill prevention. Sump sensors alarmed properly (visual and audible) and shut down respective turbine when submerged in water for the 87, 91 and D tanks. UDC uses Bravo Float & Chain sensors and 208 in UDC 9/10 all sensors are functional. Fail-safe, sensor out and emergency shut off were tested and passed. Line leak detectors were tested and passed. Spill buckets were tested visually without any changes in water level. The following documents were available for [Truncated]

Program Description: Underground Storage Tank

Evaluation Information
Evaluation Date: 2/22/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): INSPECTOR COMMENTS: On site to witness monitoring system certification testing activities and to conduct routine UST inspection. Testing was conducted by John Kneisel of Petroleum Tank Testing. Tester certifications (VR, ICC, VMI) were verified. Certification stickers were attached to all tested components. Please submit the test reports to this Agency within 30 days. The facility has three single-walled tanks (87,91, D) monitored by a Veeder Root TLS-350R system. Site has flappers for overfill prevention. Sump sensors alarmed properly (visual and audible) and shut down respective turbine when submerged in water for the 87, 91 and D tanks. UDC uses Bravo Float & Chain sensors and 208 in UDC 9/10 all sensors are functional. Fail-safe, sensor out and emergency shut off were tested and passed. Line leak detectors were tested and passed. Spill buckets were tested visually without any changes in water level. The following documents were available for [Truncated]

Program Description: Chemical Storage Facilities

Evaluation Information
Evaluation Date: 10/15/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site for routine hazardous waste inspection. Inspection was conducted and consent was given by Gilbert Ramirez. Lisa Wales of OCHCA was also present. Previous inspector had noted that the facility has discontinued generating hazardous waste. While on site, the following process was observed: Waste ink and ink press cleaner are discarded to a sump system. From here, waste is pumped to a batch tank in ink wash room. Per Mr. Ramirez, flocculant is added to the batch the precipitate out ink solids. Liquid portion of the waste is discarded to sewer under permit. Ink sludge is transferred to ink press for further water removal. Resulting ink cake is discarded to municipal trash. This process will be evaluated by this agency and further direction will be provided. There were no other hazardous waste observed on site.
Evaluation Division: Orange County Environmental Health
Evaluation Program: HW
Evaluation Source: CERS

Evaluation Date: 10/15/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site for routine hazardous materials and business emergency plan inspection. Observed the facility and inspected hazardous materials storage. Facility disclosed three chemicals on hazardous materials inventory on the California Electronic Reporting System (CERS). The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Bond Adhesive - Special Crafting Adhesive - AmeriClean Blue - Lay Flat Laminating Glue - Black Ink Waterbase - Various Ink - Argon/O2 - Acetylene - O2 - Floccin ? 1106 Add these materials to your CERS disclosure within 30 days. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change. Hazardous Materials documents can be submitted via the [Truncated]

Industrial Permit Information
County: Orange
Type: Industrial General Permits
GIS Mapper URL:
http://app102283.giscloud.com/
URL Instructions: Go to URL, under search, enter industrial and Select Industrial General Permits Mapper.
WD ID: 8 30I022080
Application ID: 362605
Permit Type: Industrial
Status: Active
Status Date: 3/24/2009
Owner/Operator Name: Sunopta Fruit Group Inc
Owner/Operator Address: 13810 Cerritos Corporate Dr
Owner/Operator City: Cerritos
Owner/Operator State: California
Owner/Operator Zip: 90620
Country: United States
Agency Provided Longitude: -118.0238072
Agency Provided Latitude: 33.8704388

B Type Inspections from 2009-2014
Inspection ID: 2013297
Inspection Date: 11/21/2011
Inspector Name: Adam Fischer
Action Taken: Follow-up Inspection Needed
Note(s): Weather: mostly sunny and cool. Rain occurred the previous day. Contact was unable to produce the SWPPP; was initially unsure if one was prepared but later confirmed that none was. Sanitizing foam is still in use at N-dock; Contact reports that they have reduced the amount being sprayed. Foam is still being tracked onto uncovered dock and entering floor drain, then dripping onto yard pavement; no off-site discharge observed, but reminded contact that this was a threatened discharge; discussed possible ways to eliminate the discharge. Contact showed the sump and pump in the drop inlet on W-side; explained that sump is on a 20-minute timer to pump back to clarifier then sewer, afterwards, the sump overflows to the street. Strawberry juice is still leaking from dumpsters, through the cut dike, and into the sump. S-side has been reorganized with excess machinery disposed of.

Program Description: Industrial Facility Storm Water

Evaluation Information
Evaluation Date: 7/17/2017
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Industrial Storm Water Compliance Evaluation
Evaluation Note(s): See attached inspection report for full details.
Evaluation Division: Water Boards
Evaluation Program: INDSTW
Evaluation Source: SMARTS

Evaluation Date: 2/20/2008
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Industrial Storm Water Compliance Evaluation
Evaluation Note(s): Regional Board staff conducted a routine compliance inspection of the above facility on February 20, 2008 and met with Mr. Marvin Sy. The SWPPP was not available upon request and neither were the training records, however, the SWMP was available. Staff directed Mr. Sy to update the analyte list to include NO3, NO2, P, Pb, Zn, and Cu. After reviewing the 06-07 AR, staff noted that the two sampling events mentioned in the report were not included in the submittal. Several 55-g drums and buckets were observed throughout the facility without secondary containment. A secondary containment pallet located in the northwest corner of the facility was observed nearly full and staff requested that the waste be sumped and correctly removed from the facility. Miscellaneous spills were observed near the lint collector area. Storm swale along the northern property line is full of debris.
Evaluation Division: Water Boards
Evaluation Program: INDSTW

Program Description: Aboveground Petroleum Storage

Evaluation Information
Evaluation Date: 12/7/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with Scott Monson. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - R22 - Lead Acid Batteries - Propane REQUIREMENT FOR ELECTRONIC SUBMITTAL OF HMBEP DOCUMENTS: This report serves as notice that the facility must submit the following documents electronically within 30 days of this report: - Business Activities - Owner/Operator Information - Hazardous Materials Inventory - Site Map - Emergency Response Plan - Employee Training Plan The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of [Truncated]
Evaluation Division: Orange County Environmental Health
Evaluation Program: HMRRP
Evaluation Source: CERS

Evaluation Date: 7/25/2016
Violations Found? (Y/N): No
Evaluation General Type: Other/Unknown
Evaluation Type: Other, not routine, done by local agency
Evaluation Note(s): hmbep conditionally accepted 2-18-16 Review conducted by Brian Erdman. The Business Activities - Remove the APST indication. The Chemical Disclosure for the following Substances must be updated: - Propane_ Change the Fire Code Hazard Class to Flammable Liquefied Gas, Change the Hazardous Material Type to Pure, Remove the Hazardous Components, and add a CAS#.

Program Description: Chemical Storage Facilities

Program Description: Hazardous Waste Generator

Evaluation Information
Evaluation Date: 10/3/2016
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): INSPECTOR COMMENTS On site for routine hazardous materials and business emergency plan inspection. Consent to enter, inspect, and taken any necessary photos was given by Aurora Mosley, assistant manager. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: -Waste Oil, one, 150 gallon tank Business emergency plan is maintained on site. Annual employee training is conducted. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.
Evaluation Division: Orange County Environmental Health
Evaluation Program: HMRRP
Evaluation Source: CERS

Evaluation Date: 10/3/2016
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Aurora Mosley, assistant manager. Walked throughout the facility. Observed hazardous waste storage areas. Facility is a used oil collection center and also generates general retail waste. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted in the back of the store. The dumpster/enclosure was observed, no signs of dumping.
Evaluation Division: Orange County Environmental Health

DETAILS

Global ID: SL0603736300

County: Los Angeles

Site History: Chemicals of Concern (COCs) in soil identified during February 2002 sampling included trichloroethene (TCE), PCE, cis¬1,2-DCE, DCE, acetone, 2-Butanone (MEK), benzene, toluene, ethylbenzene, xylenes (BTEX), total petroleum hydrocarbons as diesel (TPHd), waste oil, barium, copper lead, molybdenum, selenium, vanadium, and zinc. Although other hydrocarbons, mineral solvents and metals were present in low concentrations in the soil column, initial groundwater results showed concentrations to be at or below EPA Region 9 tap water maximum levels (PRGs) and state Maximum Contaminant Levels (MCLs). Four groundwater monitoring wells were installed and sampled during the April 2002 assessment. Cis-1,2-DCE was detected in two wells at concentrations of 73 pg/L (MW01) and 5.8 pg/L (MW02). PCE was detected in MWO4 at a concentration of 5.9 pg/L. The groundwater flow direction ranged from eastward to east-northeastward at a gradient ranging from approximately 0.0003 ft/ft to approximately 0.0005 feet per foot (ft/ft). Low concentrations of Cis-1,2-DCE (5.1 to 95 ug/l in MW-02 and MW-01 respectively) and PCE (5.8 to 11 ug/l in MW-04, the down gradient well) have been consistently found in three wells over two years of monitoring without a significant change in concentrations. The presence of degradation product of PCE, cis 1,2 DCE, indicates a continued biologic breakdown of PCE, which is already at concentrations just above State Maximum Contaminant Levels (MCL) for drinking water. Clearly the site is stabilized in relation to the growth of a contaminant plume and entering a stage of reduction in size and concentration. The plume does not appear to extend offsite in concentrations above MCLs.

Case Type: Cleanup Program Site

Status: Completed - Case Closed

Lead Agency: LOS ANGELES RWQCB (REGION 4)

Case Worker: RE

Local Agency: Not Reported

RB Case Number: 2040220

Loc Case Number: Not Reported

File Location: Regional Board

Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Gasoline, Waste Oil / Motor / Hydraulic / Lubricating

Potential Media Affected: Soil

How Discovered: Not Reported

How Discovered Description: Due diligence during property transfer sale

Stop Method: Change Operating Procedures, Other Means, Remove Contents

Stop Method Description: Decommision clarifier and 6,000 gallon tank.

Action Date: 2012-01-19

Action Type: ENFORCEMENT

Action: Closure/No Further Action Letter

Action Date: 2011-08-30

Action Type: ENFORCEMENT

Action: Technical Correspondence / Assistance / Other

File Location: Regional Board
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Potential Media Affected: Soil
Site History: Chemicals of Concern (COCs) in soil identified during February 2002 sampling included trichloroethene (TCE), PCE, cis¼1,2-DCE, DCE, acetone, 2-Butanone (MEK), benzene, toluene, ethylbenzene, xylenes (BTEX), total petroleum hydrocarbons as diesel (TPHd), waste oil, barium, copper lead, molybdenum, selenium, vanadium, and zinc. Although other hydrocarbons, mineral solvents and metals were present in low concentrations in the soil column, initial groundwater results showed concentrations to be at or below EPA Region 9 tap water maximum levels (PRGs) and state Maximum Contaminant Levels (MCLs). Four groundwater monitoring wells were installed and sampled during the April 2002 assessment. Cis-1,2-DCE was detected in two wells at concentrations of 73 pg/L (MW01) and 5.8 pg/L (MW02). PCE was detected in MWO4 at a concentration of 5.9 pg/L. The groundwater flow direction ranged from eastward to east-northeastward at a gradient ranging from approximately 0.0003 ft/ft to approximately 0.0005 feet per foot (ft/ft). Low concentrations of Cis-1,2-DCE (5.1 to 95 ug/l in MW-02 and MW-01 respectively) and PCE (5.8 to 11 ug/l in MW-04, the down gradient well) have been consistently found in three wells over two years of monitoring without a significant change in concentrations. The presence of degradation product of PCE, cis 1,2 DCE, indicates a continued biologic breakdown of PCE, which is already at concentrations just above State Maximum Contaminant Levels (MCL) for drinking water. Clearly the site is stabilized in relation to the growth of a contaminant plume and entering a stage of reduction in size and concentration. The plume does not appear to extend offsite in concentrations above MCLs.
Begin Date: 2002-09-30 00:00:00

SITE NAME	MAPS	ID
ALL-TEX INKS CORPORATION	1, 4	SL204CA2325

ADDRESS	CITY	ZIP
14650 EAST FIRESTONE BOULEVARD	La Mirada	

DETAILS

Global ID: SL204CA2325

County: Los Angeles

Site History: The site is currently owned by PJK Properties, LLC, and occupied by All-Tex Inks Corporation. The existing building at the site was constructed in 1962. In the 1960s to the early 1970s, Tect, Inc. operated a chemical solvent reclaiming and manufacturing operation at the site. From approximately 1972 to 1981, Western Chemical reclaimed chlorinated solvents at the site, which included at least the following solvents or volatile organic compounds (VOCs): methylene chloride, perchloroethylene (PCE), trichloroethylene (TCE), and 1,1,1-trichloroethane (1,1,1-TCA). Western Chemical's operations occurred primarily in the southernmost bay of the facility. Additional tenants at the subject Site have included a diaper service and a light machine shop. Chlorinated solvents have been identified in soil, soil gas, and groundwater beneath the site. VOCs have been detected in groundwater up to the hundreds of thousands of micrograms per liter range. The groundwater plume has been tracked downgradient toward Coyote Creek to the south-southwest of the site. Its full extent is being actively assessed. An interim remediation plan has been required for the initiation of soil and groundwater cleanup closest to the site.

Case Type: Cleanup Program Site

Status: Open - Assessment & Interim Remedial Action

Lead Agency: LOS ANGELES RWQCB (REGION 4)

Case Worker: MN

Local Agency: Not Reported

RB Case Number: 909

Loc Case Number: Not Reported

File Location: Regional Board

Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride

Potential Media Affected: Aquifer used for drinking water supply, Contaminated Surface / Structure, Indoor Air, Other Groundwater (uses other than drinking water), Sediments, Soil, Soil Vapor, Surface water, Under Investigation, Well used for drinking water supply

How Discovered: Not Reported

How Discovered Description: Ponded waste was discoved during a County of Los Angeles, Department of County Engineer inspection.

Stop Method: Other Means

Stop Method Description: The businesses that reclaimed solvent drums at the site no longer operate there.

Program Description: Chemical Storage Facilities

Program Description: Hazardous Waste Generator

Evaluation Information
Evaluation Date: 10/26/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with Oliver Lojo. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Approlon Black - CFT Blockout 6340 - CFT Discharge Base 897 - CFT Dye Gain - CFT Plastique white - Dyewash Breeze - FT16 Print Blanket Adhesive - Jantex Softener - Soapgen PND - Tricotex Black TK - Trigen Fixer NF - Trigen Thickener PT2 - Trigen Thickener WR - Trigen TNF-014 - Propane - Printassist LO - Ameritex 450 - Citric acid - Caustic soda - Defoamer - Waste Oil Please update chemical inventory with chemicals found on site. Remove Calsoft KGA Dispersion and 313 Polyvinyl Acetone Compound from the inventory. Add propane, Printassist LO, Ameritex 450, citric acid, caustic soda, defoamer, waste oil, and any other hazardous materials over 55 [Truncated]
Evaluation Division: Orange County Environmental Health
Evaluation Program: HMRRP
Evaluation Source: CERS

Evaluation Date: 10/26/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Oliver Lojo. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted near office. No hazardous waste violations were observed this date.

Program Description: Chemical Storage Facilities

Evaluation Information
Evaluation Date: 11/27/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with Mr Kang. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Refrigerant 407c - Refrigerant 404a REQUIREMENT FOR ELECTRONIC SUBMITTAL OF HMBEP DOCUMENTS: This report serves as notice that the facility must submit the following documents electronically within 30 days of this report: - Business Activities - Owner/Operator Information - Hazardous Materials Inventory - Site Map - Emergency Response Plan - Employee Training Plan The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the [Truncated]
Evaluation Division: Orange County Environmental Health
Evaluation Program: HMRRP
Evaluation Source: CERS

Evaluation Date: 7/18/2016
Violations Found? (Y/N): No
Evaluation General Type: Other/Unknown
Evaluation Type: Other, not routine, done by local agency
Evaluation Note(s): For your chemical "R-404a" for your maximum daily amount, it should be at least the size of your largest container, for your average daily amount it would be the average daily amount you have stored on-site. For example, if you have three 55 gallon drums of a chemical, your largest container size would be 55, your maximum daily amount would be 165 gallons, and your average daily amount would probably be around 90 gallons. Also, will you please add a CAS# for each of the mixture components. Also, please add Propane to your submission. For your emergency response completely fill out sections c. through f., For your employee training program, you should have an annual training for safety and evacuation procedures. Please update your site map to include electrical, gas, and water shutoffs, emergency staging area, chemical location, and location of emergency response equipment. If you have any questions please contact me at anesbit@ochca.com or 714-640-4249. Thank [Truncated]

DETAILS

Global ID: SL204EF2408
County: Los Angeles
Site History: The site has had a release of tetrahydrofuran (THF) to soil and groundwater from two former underground storage tanks (USTs). In addition, volatile organic compounds (VOCs) and semi-VOCs are impacting shallow groundwater beneath the site. The shallow groundwater impact (except for THF) appears to be emanting from a former Western Chemical facility located northeast of the site (Site Cleanup Program Case #0909).
Case Type: Cleanup Program Site
Status: Completed - Case Closed
Lead Agency: LOS ANGELES RWQCB (REGION 4)
Case Worker: PC
Local Agency: Not Reported
RB Case Number: 885
Loc Case Number: Not Reported
File Location: Regional Board
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Dioxin / Furans
Potential Media Affected: Aquifer used for drinking water supply, Indoor Air, Other Groundwater (uses other than drinking water), Sediments, Soil, Soil Vapor
How Discovered: Not Reported

Enforcement ID: 413964
Facility ID: 235300
Regulatory Measure ID: 190892
Waste Discharge ID: 4 19I015212
Order/Resolution Number: Not Reported
Regional Water Board number: 4
Agency: Kyees Aluminum
Agency Type: Private Business
Regulatory Measure Type: Industrial
Facility/Site County: Los Angeles
Coverage Status: Terminated
Enforcement Status: Historical
Enforcement Type: NOV
Effective Date: 7/1/1999
Termination Date: 3/30/2015
Enforcement Adoption Date: 11/1/2013
Enforcement Effective Date: 12/2/2013
Enforcement Description: Performed a compliance inspection On September 24, 2013, found the facility out of compliance. The pollution prevention team was not identified in the SWPPP. The SWPPP missed a list of materials and industrial activities handled at the site. Rusted equipment and aluminum splashing were observed outdoors without BMPs in place, and non-storm water discharges were release at the facilityÂ¿s backyard. Ineffective BMPs-Benchmark exceedances. Facility received an NOV for the items mentioned above.

Agency Provided Latitude: 33.8651778

B Type Inspections from 2009-2014
Inspection ID: 2011795
Inspection Date: 5/9/2011
Inspector Name: Adam Fischer
Action Taken: No Further Action
Note(s): Weather: sunny and warm. Sign out front says "Kellogg". Contact explained that company had been bought out but wasn't sure if they would submit an NOI to update. SWPPP was produced but was not certified; indicates that permit-triggering activities are truck refueling and washing. Contact explained that refueling was no longer done onsite; this had consisted of a tanker truck coming onto the property. Washing still occurs by a mobile wash vendor. Inspected wash area and didn't observe any washing occurring or evidence of violations. Excplained to Contact that if they ceased all maintenance, they could terminate their coverage.

Agency Provided Longitude: -118.0186347
Agency Provided Latitude: 33.8685798

B Type Inspections from 2009-2014
Inspection ID: 2010981
Inspection Date: 3/15/2011
Inspector Name: Adam Fischer
Action Taken: Follow-up Inspection Needed
Note(s): Weather: warm and clear. Contact is new EHS manager in the position for 2 months. Contact reports that she conducts inspections routinely and showed logs of those inspections. Inspections include roof where the blowers and pipes for carrying cardboard waste are located. SWPPP last updated May 2010. Site is part of a group monitoring program; has exceedances for SC and TS. Contact reports that rooftop sweeping occurs "thoroughly" every 2 weeks and gross accumulations are raked every day. Rooftop inspection found occassional accumulations of box cuttings and frequent accumulations of dry paper fibers at numerous locations. Roof also has several pipes emitting steam and spraying/dripping condensate; condensate mixes with the paper fiber and forms a crust in some locations on roof. Crust also forms where rainwater pools. Paper baling area is heavily littered with cuttings which shed from the bales or are incidentally spilled. Contact reports that cuttings are not found in storm water leaving the site though. Filter cake bin (paper fibers stained with ink) found open and uncovered. Dry starch tank has no secondary containment; found small-quantity spill at transfer point. Wax transfer area has globs of hardened wax spills and smaller spills found elsewhere; this appears to be of neglible water quality threat as wax spills are not soluble and not capable of being carried in runoff. Open uncovered hot water bath and parts washer found in maintenance shop area. Cigarette waste found accumulated on ground in an area designated "No Smoking". Pile of paper fiber found under main cyclone by baler; Contact reported the cyclone was perforated by a foreign object and will be repaired at end of April. Contact took 32 photos and agreed to e-mail them and to provide photos of rooftop after it is cleaned by Friday.

Evaluation Information
Evaluation Date: 9/19/2016
Violations Found? (Y/N): No
Evaluation General Type: Other/Unknown
Evaluation Type: Other, not routine, done by local agency
Evaluation Note(s): Violations I474 and I400 were abated during the follow-up inspection on 5-17-16. The RTC values were updated today.
Evaluation Division: Orange County Environmental Health
Evaluation Program: HW
Evaluation Source: CERS

Evaluation Date: 7/25/2016
Violations Found? (Y/N): No
Evaluation General Type: Other/Unknown
Evaluation Type: Other, not routine, done by local agency
Evaluation Note(s): hmbep conditionally accepted 7/25/16 This submittal is being conditionally approved in order to facilitate transfer of data to California Electronic Reporting System (CERS) database. The facility will need to make the following revisions in CERS following notification of data transfer: The Chemical Inventory The inventory is missing the 6 x 7 gallon cylinders of Propane. Please add the Propane. Unless the propane has been removed. The Site map is complete accept for the propane.
Evaluation Division: Orange County Environmental Health

RB Case Number: 0798
Loc Case Number: Not Reported
File Location: Regional Board
Potential Contaminants of Concern: Not Reported
Potential Media Affected: Aquifer used for drinking water supply, Sediments, Soil, Soil Vapor, Under Investigation
Site History: The site has been used as a paper bag manufacturing facility and for trucking/warehousing operations. An underground storage tank case was closed by LARWQCB in 1996 for gasoline-related costituents. The groundwater in the eastern portion of the site is impacted by chlorinated solvents, which appear to be coming from an off-site source at the former Western Chemical site (SCP Case 0909).

Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Potential Media Affected: Indoor Air, Aquifer used for drinking water supply, Sediments, Soil, Soil Vapor
Site History: The site consists of a single-story industrial building on approximately 1.46 acres of land. The current site building was constructed in 1964 and H.B. Fuller was the only tenant from 1964 through March 2000. The facility was used to produce solvent- and water-based adhesives from 1960 to 1990 and was used for adhesive storage and adhesive laboratory testing from 1990 to March 2000. This site has been occupied by TEC Specialty Products, Inc. (a H.B. Fuller Company) since approximately 2002. The northern portion of the property is paved with concrete and was previously used for storage, including drums. Most of the southern portion of the property is unpaved and is exposed with dirt and grass. A railroad track extends along the western edge of the Site with a loading dock at the southwestern corner of the building. An above-ground storage tank (AST) farm contained eight ASTs for the storage of polyvinyl acetate emulsion, plasticizer, and 1,1,1-trichloroethane. Two of the ASTs remain, but are reportedly empty and not in use. Secondary containment did not exist around the tanks until after 1983. Water-based adhesives were produced in mixers set in a former mezzanine located within a production area near the northern wall of the building. Solvent-based adhesives were produced near the ASTs in an area outside of the northwestern corner of the building. Wastewater produced during production and cleaning operations was discharged to a clarifier located at the east-end of the mezzanine, near the northern wall of the building. TEC Specialty Products, Inc. currently produces and handles tile adhesives, which involve the mixing of dry goods onsite, such as mortar and dyes. In addition, some epoxy products were observed to be stored at the facility in 5-gallon buckets. Chlorinated solvents have been detected in soil, soil gas, and groundwater samples beneath the site. Investigations are underway to evaluate their full extent.

Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride
Potential Media Affected: Other Groundwater (uses other than drinking water)
Site History: In 1999, soil and groundwater samples collected in the vicinity of the former clarifier, 500-gallon diesel UST and a 300 gallong diesel UST. Volatile organic compounds (VOC) were detected in the groundwater near the former clarifier. In 2000, 12 groundwater monitoring wells were installed. The highest concentrations of trichloroethene (TCE) (12 mg/l) and cis1,2-dichloroethene (c12DCE) (12 mg/)l were detected in water samples from well MW-6A located 10 feet west of the former clarifier. Additional investigation was conducted in 2001 soil gas, soil samples and groundwater samples were collected using a CPT rig. In 2001 a multi-phase high vacuum extraction test was conducted to assess the technologies feasibility for cleaning up the site. The clarifier was removed just prior to conducting the test. In February 2004, chemical oxidation using potassium permanganate was initiated to remediated the groundwater. Additional injections were conducted in 2008.

UN-MAPPABLE OCCURRENCES

The following occurrences were not mapped primarily due to incomplete or inaccurate address information. All of the following occurrences were determined to share the same zip code as the area searched. General status information is given with each occurrence along with any address information entered by the agency responsible for the list.

ID	Facility Name	Address	Database	Status
No "un-mapped" sites requested.

DISCLAIMER, LIMITS AND LIABILITIES

All of the data presented in this report was garnered from public information maintained by governmental agencies. ***Environmental Record Search (ERS)*** cannot ensure that the data, which has been entered and maintained by others, is complete and/or accurate. Any, and all omissions, errors, negligence, accidentally or otherwise within the data received by ***ERS*** is assumed to be caused by others and ***ERS*** cannot and does not assume, take, or acknowledge any liability whatsoever for their respective data. The extrapolation of the mapped locations is based solely on the accuracy of the data provided by others. Prior to relying completely on any mapped location within this report, its accuracy should be verified using other means such as further documentation or a field visit. ***ERS*** makes no representation, warranty or guaranty, express or implied regarding the accuracy of the data entered and maintained by others or the suitability of the data received from others in this report for a certain task or interpretation.

The data presented in this report should only be interpreted by an experienced environmental professional, as per EPA definition, that completely understands the potential inaccuracy of the data derived from others, the possible existence of contaminated occurrences that have not been listed, and the possibility that the governmental database misrepresents the actual status of an occurrence or listing. Prior to relying completely on any of the data within this report, an environmental professional should verify the accuracy of the information presented unless one of ERS's Environmental Professionals has interpreted the data and/or report.

It is important that the reader and/or end user of this information realize that the data gathered has not been verified for its accuracy or completeness in any way by ***ERS***. With billions of records, this is an impossible task for any Company. As much as possible, the data is presented unchanged and unaltered to represent the actual data produced by these agencies. This insures the integrity of the data for the end user.

ERS does however stand behind its representation of the data, any manually plotted occurrences, any risk determinations and all other items directly under its control. This report does comply (as far as the data is reasonably ascertainable as outlined in both the following standards) with section 8.2.1 of ASTM 1527-13 – Standard Environmental Record Sources and EPA's 40 CFR Part 312, All Appropriate Inquiries. ***ERS*** does ensure that the data is accurately reproduced from the original source. ***ERS*** backs the reporting of the data with $3,000,000 of General and Environmental Professional Liability (errors and omissions) Insurance!

The ***ERS*** logo, name, report design, presentation, maps, tables, etc., are the exclusive property of ***ERS*** and its parent company and affiliates. Except as provided below, information or images contained in this report may not be reproduced or distributed in whole or in part by any means without the prior written permission from ***ERS.*** United States and international copyright laws protect any and all reports produced by ***ERS*.**

The person or entity that purchased this report may make up to five (5) copies of the entire report or any part of it for archival purposes or to include as part of another report. All copyright information must remain intact and not be modified in any way.
