Appendix I

Construction or Extension of Facilities

Appendix I

11.a. Description of proposed construction activities, documentation attached.

Applicant currently does not have specific plans to construct facilities, other than equipment to be installed in existing buildings or structures, for the purpose of providing interexchange or local exchange services.

11.b. List of competing entities

Applicant initially expects to operate in the Internet Exchange (IX) and related interconnection services market. Competitors in such market include:

Equinix Internet Exchange

DE-CIX

Any2 Exchange (CoreSite)

AMS-IX

11.c. Map showing proposed construction

Not applicable. See answer to 11.a. However, Applicant initially plans to provide services in and between locations in Los Angeles and San Jose, California, but may operate elsewhere within the State.

11.d. Statement of franchises and health and safety permits

Applicant will not require discretionary franchise or health and safety permits for construction or extension to provide the services described in this Application. Applicant will abide by all applicable permitting requirements if it carries out any construction activities authorized by the Commission.

11.e. Facts showing public convenience and necessity requiring the proposed construction.

Applicant submits that the public convenience and necessity justifies Commission approval of the Application. Applicant notes that, as described in 11.a., it currently does not intend to construct any facilities, other than equipment to be installed in existing buildings or structures.

Applicant will primarily provide dedicated transport services to enterprise customers utilizing unused capacity from Applicant's facilities and associated equipment. Applicant also intends to offer Local and/or Wide Area Network services to enterprise customers to transmit data between customer equipment within and between data centers. Applicant's service offering will increase competition, improve the quality and efficiency of telecommunications services in the areas of California where Applicant will operate. As such, granting of this Application is in the public interest.

11.f. Statement showing cost of construction.

At this time, Applicant does not have any specific construction plans. However, as described below in 11.g., Applicant possess the requisite financial ability to render service and contribute costs associated with any future construction needs.

11.g. Statement showing financial ability to render service.

Applicant possesses the requisite financial resources to provide the proposed services in California. Applicant has provided as CONFIDENTIAL Appendix K requisite financial instruments consistent with the options in D.24-11-003, Appendix F.

11.h. Statement showing proposed rates.

Applicant does not intend initially to offer basic service or switched access and therefore seeks an exemption from filing a tariff pursuant to GO 96-B, Telecommunications Industry Rule 5.8.² Consistent with Decision 07-09-018, the Commission has granted exemptions from tariff filing requirements to CPCN applicants that did not offer residential basic service.³ Applicant will offer its service on a non-discriminatory basis and at competitive rates but will do so through individually-negotiated contracts. Should Applicant later offer basic or switched access, Applicant will first comply with associated tariffing obligations.

11.i. Annual Report Statement.

No matters that must be reported pursuant to Section 2 of GO 104-A are known to have occurred. Applicant will file all reports required of a public utility under Commission jurisdiction in compliance with GO 104-A going forward.

11.j. Estimated number of customers in the first and fifth years in the future.

Applicant provides below as CONFIDENTIAL Appendix I.1 its estimated number of customers in the first and fifth years in the future.

² G.O. 96-B, Telecommunications Industry Rule 5, provides that the Commission may “grant[] exceptions from the general requirement . . . that a Utility serve its California customers under its filed tariffs.” In D.07-09-018, the Commission established detariffing rules for carriers such as CLCs

³ See, e.g., D.11-12-014, D.12-08-036, and D.13-01-010.

Appendix I.1

Estimated Number of Customers in First and Fifth Years in the Future

[CONFIDENTIAL – SUBMITTED UNDER SEAL]

Applicant provides its estimated number of customers in the first and fifth years in the future.

Appendix J

Categorical Exemption

Appendix J

As described in **Appendix I, 11.a**, Applicant does not currently intend to undertake any construction of facilities, other than to the extent that it may need to install equipment in existing buildings or structures, for the purpose of providing interexchange or local exchange services. No material adverse environmental impacts will result from such activities because no external construction will be involved.

Applicant expects that any outside plant construction ordinarily will be small in scale, consisting of relatively short conduit routes, installations of poles or conduit, and installation or construction of other small above-ground facilities as conditions warrant. Further, such construction generally will occur in existing roadways or other previously developed and disturbed rights-of-way.

Applicant's proposal falls under the following CEQA categorical or statutory exemptions referenced in Decision (D.) 24-11-003:

Class 1 Exemption: operation, repair, maintenance, leasing or minor alteration of existing public or private structures and facilities, with negligible or no expansion of an existing use. This includes existing facilities used to provide public utility services. (California Code of Regulations, Title 14, Section 15301.)

Class 2 Exemption: replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced. (California Code of Regulations, Title 14, Section 15302.)

At this time, any construction that may be undertaken would be for "operation, repair, maintenance, leasing or minor alteration of existing public or private structures and facilities, with negligible or no expansion of an existing use," and therefore categorically exempt under CEQA. California Code of Regulations, Title 14, Section 15301.

Additionally, although not currently planned, if Applicant were to construct new facilities on the sites of these existing facilities, the "replacement or reconstruction of [these] existing[]facilities" would be categorically exempt under CEQA as any "new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced." California Code of Regulations, Title 14, Section 15302.

As the Commission has recognized, previously, it can be expected that such projects will fall within one or more categorical exemptions under CEQA. *See, e.g.*, Decision 13-07-032, which granted full-facilities-based authority to Vodex Communications Corporation, subject to compliance with an expedited 21-day environmental review process.

To assure that there will be no significant adverse environmental impacts from any such construction, Applicant will follow the procedure described in Decision 13-07-032 to establish

whether or not CEQA exemptions apply. If a determination is made that the proposed construction is not exempt, Applicant will file a new application for approval of the contemplated project. Applicant submits that the foregoing process assures that it can be seen with certainty that there is no possibility that grant of the instant application may have a significant adverse effect on the environment.

Appendix K

Financial Instruments

[CONFIDENTIAL – SUBMITTED UNDER SEAL]

Applicant attaches a bank statement demonstrating \$100,000 will be available to Applicant for (1) \$100,000 of unencumbered cash / equivalents for first year expenses and (2) \$25,000 for deposits that may be required by local exchange carriers or interexchange carriers.
