APPENDIX A

QUARTERLY GREEN TARIFF SHARED RENEWABLES PROGRAM PROGRESS REPORT OF PACIFIC GAS & ELECTRIC COMPANY FOR ACTIVITIES OCCURRING JULY - SEPTEMBER 2025

Pursuant to Decision (“D.”) 15-01-051 and D.21-12-036, Pacific Gas & Electric Company (“PG&E”) files this quarterly report of the Green Tariff Shared Renewables (“GTSR”) program activities occurring July 1 - September 30, 2025. Additional information is included in this report to comply with Ordering Paragraphs (OPs) 4 and 5 of D.21-12-036.

D.21-12-036 reinstated monthly issuance of the GTSR program activities report, however, on September 26, 2024, PG&E requested authorization from the Deputy Executive Director for Energy and Climate Policy to submit progress reports for its GTSR program on a quarterly, instead of monthly, basis as provided by OP 4 of D. 21-12-036. The Deputy Executive Director granted this request on October 1, 2024. Subsequently, PG&E submitted its first quarterly GTSR report for activities occurring October 1 – December 31, 2024 on January 31, 2025.

Additionally, on May 30, 2024, D.24-05-065 directed the utilities to close the Enhanced Communities Renewable (“ECR”) program to new procurement and modified the Green Tariff and the associated reporting requirements. Therefore, June 2024 was the last quarterly report that included ECR information.¹

I. AVAILABLE CAPACITY DATA

D.15-01-051 requires “available capacity” data at the most detailed level feasible, updated monthly, to be reported with increasing precision over time.² D.15-01-051 also sets a total capacity for PG&E’s GTSR program of 272 MW of generation facilities, of which 45 MW is reserved for facilities of no larger than 1 MW located in areas previously identified by the California Environmental Protection Agency (“CalEPA”) as the most impacted and disadvantaged communities (“Environmental Justice” or “EJ Reservation”). Separately, two capacity reservations of the GTSR program capacity are established: (1) 20 MW is reserved for the City of Davis,³ and (2) 45 MW is reserved for PG&E’s residential customers (which is PG&E’s portion of the 100 MW reservation for residential customers across all three Investor Owned Utilities (“IOUs”) mandated by Senate Bill (“SB”) 43).⁴

To help meet the intent of the original legislation to site projects close to load, PG&E established a sub-category in the solicitation called ‘Community Project’, which is included in the ‘Unrestricted’ category below. For a project to have been eligible for this category, it must have been located in: (a) one of the 10 cities with top enrollment in the ClimateSmart program, (b) any city in the nine county Bay Area with a population over 50 thousand people, or (c) any of the

¹ PG&E had not procured any capacity in the ECR component of the program.

² D. 15-01-051, p. 141.

³ *Id.*, pp. 4-5.

⁴ *Id.*, p. 5.

remaining cities in PG&E’s service area with a population over 50 thousand people according to most recently available United States Census data. As described in Advice Letter 4780-E, filed January 22, 2016, PG&E procured two projects in this category totaling 6.25 MW.⁵

Table 1 presents the current solar capacity procured specifically for the Green Tariff (“GT”) component of the GTSR program.

Table 1: Cumulative Procured Solar Capacity for GT

Category	Available Capacity (MW)	GT Procured (MW)	Remaining Capacity (MW)
Unrestricted	207	50.75	156.25
Other		44.50	
Community Projects		6.25	
EJ Reservation	45	2	43
City of Davis	20	0	20
Totals	272	52.75	219.25

Table 2 presents GTSR customer enrollment data, showing estimated customer capacity for GT by customer type. The methodology used in Table 2 converts actual consumption over the past 12 months in the program into a capacity figure. While this is an accurate representation of program capacity, it does not provide timely information about future enrollment capacity as it takes 12 months to fully capture the impact of a newly enrolled customer on enrollment capacity.

In 2020, anticipating the possibility of rapid enrollment of non-residential customers due to a GT rate change that resulted in a “discount” for the program, PG&E developed a forward-looking capacity estimation methodology using the past 12 months usage of all currently enrolled customers, including customers who just recently enrolled. PG&E cannot know if currently-enrolled customers will remain enrolled in the program or if their loads will change post-enrollment, but in order to ensure compliance with statutory program caps, a forward-looking capacity calculation is necessary. **Table 3** shows the results of this alternate methodology.

Table 2: Cumulative Estimated MW of Customer Enrollment

Category	GT Enrolled (MW)
Residential Customers	8.1
Non-Residential Customers	133.8
Total	141.9

The numbers in the table above are rounded to the nearest decimal, therefore the **Total by Program number may differ slightly from the Residential & Non-Residential components outlined in the table.*

⁵ Advice Letter 4780-E, pp. 9-10 and Appendix E, p. 25.

Table 3: Alternate GT Capacity Methodology Results (MW)

Category	Dec 2024	Jan 2025	Feb 2025	Mar 2025	Apr 2025	May 2025	Jun 2025	Jul 2025	Aug 2025	Sep 2025
Residential Customers	5.8	5.4	5.2	5.1	4.8	4.6	4.5	4.3	4.2	4.1
Non-Residential Customers	84.2	81.0	81.0	79.6	74.3	73.9	74.0	69.9	69.3	69.0
Total*	90.0	86.4	86.2	84.7	79.1	78.5	78.5	74.3	73.5	73.1

The numbers in the table above are rounded to the nearest decimal, therefore the **Total number may differ slightly from the Residential & Non-Residential components outlined in the table.*

II. PROCUREMENT ACTIVITIES

Following the launch of the Summer 2024 GTSR RFO on September 27, 2024, customer enrollment in the Green Tariff program sharply decreased. This lower demand, together with the adoption of the 'top-off' framework directed by Decision 24-05-065 (the GAP Decision), may eliminate the need for additional capacity. A pending decision from the CPUC is expected to provide further guidance. At present, no Power Purchase Agreements are being executed.

Similarly, due to the aforementioned reasons, on December 16, 2024, PG&E filed a Rule 16.6 Request for Extension of the deadline to run its second solicitation of 2024 and its solicitations for 2025 until 60 days after disposition of PG&E's anticipated Tier 2 Advice Letter per Ordering Paragraph 9 of D.24-05-065.6 This extension request was granted on December 26, 2024.

Correspondingly, on August 7, 2025, PG&E submitted Tier 2 Advice Letter 7670-E requesting modifications to its GTSR procurement obligations. The utility sought approval to adjust its solicitation requirement for the legacy GTSR program to the anticipated number of incremental MW needed under the program as modified by the GAP decision, to pause solicitations until the Commission issues further instructions, and to revise its solicitation targets in accordance with anticipated changes from the upcoming decision. On September 3, 2025, the California Public Utilities Commission (CPUC) released a Suspension Notice stating that the initial suspension period will be 120 days starting September 6, 2025.

III. ADDITIONAL REPORTING PURSUANT TO D.21-12-036

The Commission ordered PG&E in OP 4 of D.21-12-036 to "...file in its monthly Green Tariff

⁶ D.24-05-065, OP 9, orders the Utilities to submit a Tier 2 advice letter updating their Green Tariff in accordance with the decision, including details on how the tariff "will result in incremental new renewable energy being purchased to specifically serve subscribers" of the tariff. On September 5, 2024, the Executive Director granted the Utilities an extension of the deadline to submit this advice letter to 90 days from issuance of a Commission decision on the more granular implementation details of the Modified GT.

Shared Renewables (GTSR) reports the information described in this decision on the cumulative number of oversubscribed customers, by class, and the level of borrowed Renewables Portfolio Standard energy and capacity to serve the oversubscribed customers.” Oversubscribed customers, as referenced in D.21-12-036, are those customers whose load results in program capacity exceeding the 52.75 MW of dedicated resources that PG&E has procured for the Green Tariff, or Solar Choice, program.

Table 4 indicates oversubscribed capacity – enrolled customers whose participation cause Solar Choice enrollment to exceed 52.75 MW – by rate schedule code and customer class in kW. This data changes daily due to customer enrollment changes and reflects the program on the day data was retrieved for this report. **Table 5** shows monthly dedicated resource generation subtracted from participant energy usage to yield interim resource pool needs, in MWh, on a monthly basis. Note that consumption information is more quickly available than generation data for dedicated resource generation, and as such generation data will lag consumption data by one month.

Table 4: Oversubscribed Solar Choice Customers By Class & Load

Rate Schedule Code	Estimated Oversubscribed kW	Customer Class
HA1	7.7	Commercial/Industrial
HB19P	29.5	Commercial/Industrial
HB1	343.0	Commercial/Industrial
HB6	540.7	Commercial/Industrial
HB10S	2233.2	Commercial/Industrial

HE1	563.9	Residential
HETOUD	720.1	Residential
	2030.8	Residential Total

Table 5: Solar Choice Estimated Interim Resource Need (MWh)

	Feb 2025	Mar 2025	Apr 2025	May 2025	Jun 2025	Jul 2025	Aug 2025	Sep 2025
Customer Usage	13,304	15,066	17,207	14,504	16,205	18,755	16,540	17,534
Dedicated Resource Generation	2,902	3,717	4,087	9,716	10,132	9,204	8,003	N/A
Interim Resource Need	10,402	11,349	13,120	4,788	6,073	9,551	8,537	N/A

IV. EXTERNAL ADVISORY BOARD

D.15-01-051 requires a summary of advisory group activities or consultation with community-based organizations, if any.

No Advisory Board meetings were held in Q3 2025.

ATTACHMENT A

2024 GREEN TARIFF SHARED RENEWABLES PROGRAM GENERATION TRANSFER REPORT OF PACIFIC GAS & ELECTRIC COMPANY

Pursuant to Decision 15-01-051 (“Decision”) Pacific Gas & Electric (“PG&E”) files this annual report on Green Tariff Shared Renewables (“GTSR”) generation transfer between the Renewables Portfolio Standard (RPS) and GTSR programs in program year 2024.

I. GENERATION TRANSFER REPORT TEMPLATE AND TIMING

The Decision requires, as a component of the Annual GTSR Program Progress Reports, a “one page summary tracking the amount and cost of generation transferred between the RPS and GTSR programs.”¹ The Decision also requires a template for the annual report to track the generation transfer between the programs to be filed with the Joint Procurement Implementation Advice Letter (JPIAL).² In the JPIAL filed May 13, 2015, the Investor Owned Utilities (IOUs) included this report template and clarified that this report would be filed by September 1 annually following the launch of each IOU’s program, in order to enable “the IOUs to best operationalize the GTSR reporting function in conjunction with the RPS reporting functions”.³

Ordering Paragraph 6 of Resolution E-5028 consolidates PG&E’s reporting requirements according to Appendix 1 of the Resolution.⁴ Therefore, PG&E submits this 2024 report and all subsequent Generation Transfer Reports as attachments to its Q3 GTSR Program Progress Report.

II. 2024 GENERATION TRANSFER REPORT

The attached report (“2024 Annual GTSR Generation Transfer Report”) reflects that 216,816 megawatt-hours were transferred between the RPS and GTSR programs for program year 2024.

¹ D.15-01-51, p. 141.

GREEN TARIFF SHARED RENEWABLES PROGRAM

Annual GTSR Tracking Reporting Instructions

Annual GTSR Tracking Reports submitted by retail sellers, as required by Decision (D.) 15-01-051. Specific reporting requirements and general explanations about the GTSR Annual Report spreadsheet are detailed below.

Procedural Guidelines

- D.15-01-051 requires Investor Owned Utilities (IOU) to account for the transfer of energy produced by renewable resources between the GTSR Program components (Green Tariff and Enhanced Community Renewables) and the RPS program. This annual report template tracks the amount of generation transferred between the programs (i.e. from the RPS to GT at start-up and from the GT to RPS or the ECR to RPS in the event of over procurement).
- 2 Annual GTSR Tracking Reports must be submitted to the Commission as specified below:
- Serve a public version on the service list in proceeding _____. All pages must be legible. If reports need to be printed and scanned to be issued to the service list, please ensure that scanned documents are not blurry or distorted. The most current version of the service list can be found on the Commission's webpage:
http://www.cpuc.ca.gov/service_lists/ .htm
 - Send paper copies to the assigned Administrative Law Judge (ALJ):
Jeanne McKinney
California Public Utilities Commission
505 Van Ness Avenue
San Francisco, CA 94102
- 3 Include the Title Page and fill out the following information:
- Name of the retail seller serving the Annual GTSR Tracking Report
 - Date the Annual GTSR Tracking Report is being served
 - Contact information

Annual GTSR Tracking Report Spreadsheet Instructions

General Instructions

- Orange cells throughout the spreadsheet indicate data provided by the retail seller.
- All data must be entered in megawatt-hours (MWh) for reported transfers and retirement of generation and renewable energy credits (RECs) between the RPS and GTSR programs. For example, if generation has been transferred between programs but not yet retired, such generation would not be reported in this template until it is retired.

Transfer Summary tab instructions

The Transfer Summary tab is where the annual transfer results between the RPS and GTSR programs are presented.

The annual transfers from the RPS to the GT program are reported on line 8.

The annual transfers from the GT to the RPS program are reported on line 9.
The annual transfers from the ECR to the RPS program are reported on line 10.
The net impact on the RPS program is reported on line 11.

1. In the "Transfer Summary" tab:

Enter the Contract Detail (Name) (each contract name should correspond to a unique RPS ID).
Enter the RPS ID
Enter the Program of Origin
Enter the Contract Execution Date
Enter the Contracted Capacity in Expected MW
Enter the Facility Location (City)
Enter the Facility Location (State)

Transfer Detail tab instructions

This tab includes inputs to determine the quantity of RECs transferred between the RPS and GTSR programs.

1. In the "Transfer Detail" tab:

Enter the RPS ID
Enter the WREGIS ID
Enter the Contract Detail (Name) (each contract name should correspond to a unique RPS ID).
Enter the Program of Origin
Enter the month and year vintage of the RECs retired
Enter the quantity in MWh of the RECs retired
Enter the retirement date in the format "MM/DD/YYYY"
Enter the retirement account year the RECs were retired to in the format "YYYY"

2. In the "Transfer Detail" tab, Repeat step 1 for all RECs retired from 2015 to 2020

RPS ID: The RPS certification identification number provided to facility by the CEC.

WREGIS ID: The generator unit identification number provided to facility by WREGIS.

Vintage Month/Year: Enter the vintage month/year of each batch of RECs retired - enter one line per vintage and retirement year combination. If RECs with the same vintage month/year are retired to separate retirement account years, please enter one line for each distinct retirement account year.

MWh REC Quantity Retired: Enter the quantity of RECs, with a given vintage and retirement account year combination.

Retirement Date: Enter the actual date the RECs were retired. This may be different from the retirement account year.

Retirement Account Year: Enter the retirement account year the RECs were retired to. The retirement account year should correspond to the WREGIS retirement account year and may not necessarily match the year of the actual retirement date. If RECs with the same vintage month/year are retired to separate retirement account years, please enter one line for each of the distinct retirement account years.
