SOUTHERN CALIFORNIA GAS COMPANY

555 West 5th Street, GT14E7 Los Angeles, California 90013 Telephone: (213) 244-8197 Facsimile: (213) 629-9620 E-mail: ehsu2@socalgas.com

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

Order Instituting Rulemaking to Establish Policies, Processes, and Rules to Ensure Safe and Reliable Gas Systems in California and Perform Long-Term Gas System Planning.

Rulemaking 24-09-012 (Filed January 16, 2020)

JOINT SUBMISSION OF SOUTHERN CALIFORNIA GAS COMPANY (U 904 G) AND SAN DIEGO GAS & ELECTRIC COMPANY (U 902 G) OF REVISED GAS DISTRIBUTION COST DATA

Pursuant to emails dated November 20 and 25, 2025, from a representative of the California Public Utilities Commission's (Commission) Staff requesting revisions to the data submitted on November 5, 2025, in compliance with the Assigned Law Judges' Ruling Directing Gas Utilities to Provide Gas Distribution Cost Data, dated September 24, 2025, Southern California Gas Company (SoCalGas) and San Diego Gas & Electric Company (SDG&E) hereby provide the following information:¹

- Attachment A: SoCalGas Distribution Pipeline Replacement Costs Revised
- Attachment B: SoCalGas Regulator Station Replacement Costs Revised
- Attachment C: SoCalGas Maintenance Costs Revised
- Attachment D: SDG&E Distribution Pipeline Replacement Costs Revised
- Attachment E: SDG&E Regulator Station Replacement Costs Revised
- Attachment F: SDG&E Maintenance Costs Revised

Respectfully submitted,

By: /s/ Jonathan J. Newlander
JONATHAN J. NEWLANDER

Attorney for:

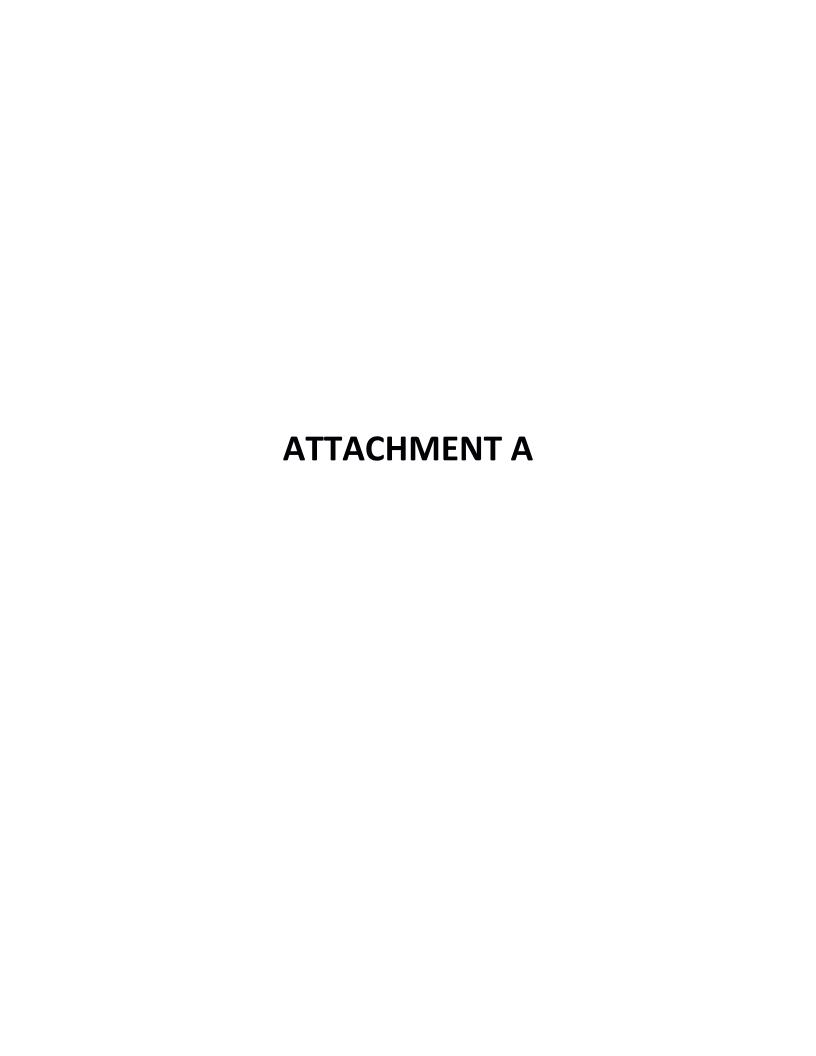

SAN DIEGO GAS & ELECTRIC COMPANY

8330 Century Park Court, CP32D San Diego, California 92123 Telephone: (858) 654-1652 Facsimile: (619) 699-5027

E-mail: jnewlander@sdge.com

Date: December 9, 2025 E-mail: jnewla

Pursuant to Rule 1.8(d) of the Commission's Rules of Practice and Procedures, counsel for SDG&E was authorized to submit this Joint Submission on behalf of SoCalGas.

Row ID	Program Category	Row Name	Value	Definition
A1	Main and service replacement programs	Cost per service, for main programs	\$21,135.70	Average cost of gas distribution main and service replacement activities, per service. Also shown in next table, row B8, final column.
A2	Service-only replacement programs	Cost per services replaced, for services only	\$13,716.27	Average cost of replacing gas distribution services only. Also shown in next table, row B1, final column.
A3	Main and service replacement programs	Cost per main mile replaced	\$2,505,980.50	Average cost of gas distribution main and service replacement activities, per mile of main. Also shown in next table, row B9, final column.
A4	Main and service replacement programs	Services per project, for main programs	15.03	Average number of services in a single work order. Also shown in next table, row B10, final column.
A5	Main and service replacement programs	Main program projects per year	771.25	Average work orders per year, totaled across the utility's main and service replacement programs. Also shown in next table, row B11, final column.
A6	Service-only replacement programs	Services replaced per year, when services only	5087.25	Average number of services replaced by service-only replacement programs. Also shown in next table, row B3, final column.
A7	Both main and service and service- only replacement programs	Anual pipeline replacement expenditures	\$314,839,513.59	Total cost across gas distribution replacement programs. Sum of next table's B5 and B15, final column.
A8	NA	Maintenance cost per service		Average cost of gas distribution pipeline maintenance, per service, not including replacement costs. Also shown in later table, cell G1.
A9	Main and service replacement programs	Project planning period, for main programs	392.40	Average days between the date that the project was identified for replacement and the date that replacement activities broke ground. Also shown in next table, row B21, final column.
A10	Service-only replacement programs	Project planning period, for services only	107.00	Average days between the date that the service(s) was identified for replacement and the date that replacement activities broke ground. Also shown in next table, row B6, final column.

[1] [Note: Footnote From Template] Programs which replace both mains and services sometimes replace services alone, but including those projects would be more challenging to include in this calculation.
[2] [Note: Footnote From Template] Note this will be less than the total services replaced annually because mains and services programs can also includes projects which only replace services. However, it would be more challenging to include those in this calculation.

C13	Main and service replacement programs	Costs Excluded from Budget Code	Include any and all costs that are recorded within C9, C10, C11 or C12 and are not recorded within the program's budget code for rate case purposes. For example, this may include field capital support for some utilities. Thus, this total, if not zero, will overlap with the cost categories shown above.	NA		NA		NA		NA	
C14	Main and service replacement programs	, 1	Average days between the date that the project was identified for replacement and the date that replacement activities broke ground.		148.59		414.45		618.98		394.01
C15	Main and service replacement programs	Project time to completion, for main programs	Average days between the date that the project was identified for replacement and the date that the replacement equipment was placed in operation.		230.1		552.74		795.75		526.20

[1] [Note: Footnote From Template] Programs which replace both mains and services sometimes replace services alone, but including those projects would be onerous to include in this calculation.

[2] [Note: Footnote From Template] Note this will be an undercount because mains and services programs can also includes projects which only replace services. However, it would be more challenging to include those in this calculation.

a. In the tab "Summary," provide the rows of information shown. In the first column, provide the Row ID, as shown; in the second column, provide the Program Category, as shown; in the third column, provide the Row Name, as shown; in the fourth column, provide the value, calculated as described in the definition, averaged across the years; and in the fifth column, provide the Definition, as shown.

Costs by Operating District

b. In the tab "Costs by Operating District," provide the program accomplishments and costs shown (rows), broken down by operating district (columns). In the first four columns, provide the Row ID, Program Category, Row Name and Definition, as shown. Next provide a column for each operating district, with the heading stating the district's name and ID number, and in it, include only the information for work orders in that operating district. In the last column, provide the information across all operating districts (totals unless definition is an average, in which case provide average across all operating districts). For each row, include only information for the programs specified in the "Program Category."

Values for B8 through B15 in the last column should match with values for C1 through C8 in the last column in the tab "Utility-Wide Costs by Program."

Utility-Wide Costs by Program

c. In the tab, "Utility-Wide Costs by Program," provide the program accomplishments and costs shown (rows), broken down by programs (columns). In the first four columns, provide the Row ID, Program Category, Row Name and Definition, as shown. Next provide a column for each program, and in it, include only the information for work orders in that program. Include all the costs for work orders associated with the program, even if these costs are not recorded under the work order or program. In the last column, provide the information across all programs (totals unless definition is an average, in which case provide average across all programs shown in preceding columns).

1. Definitions

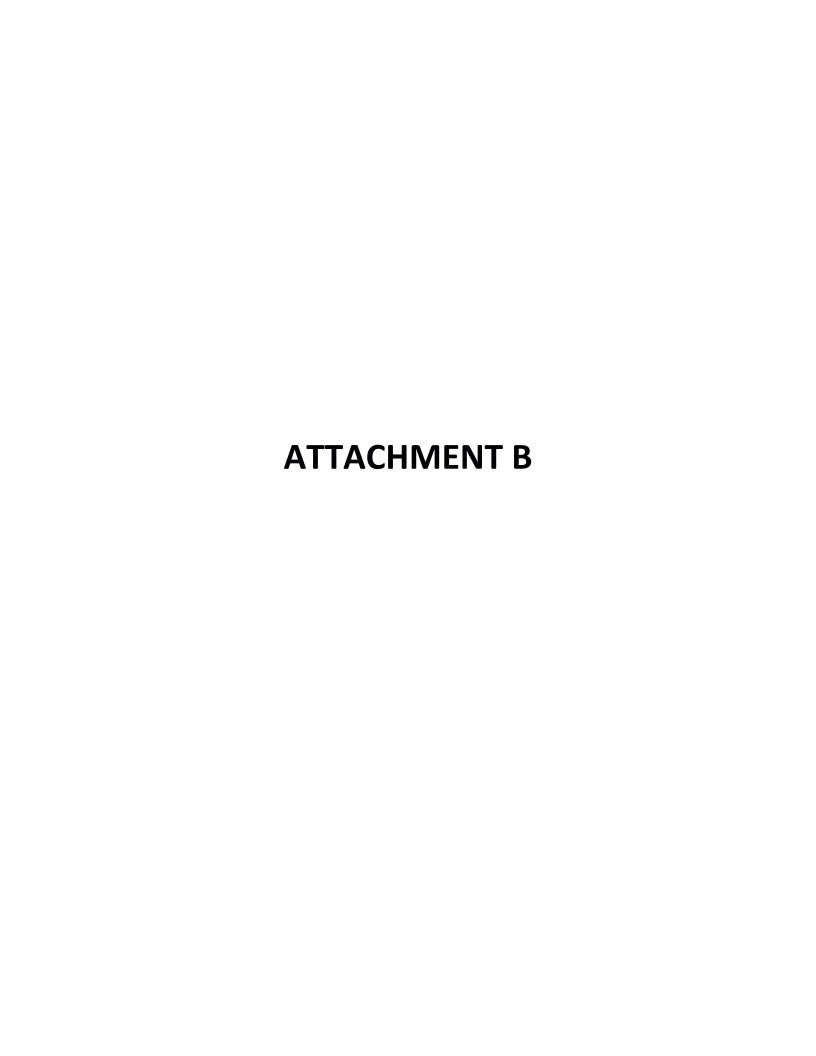

For the data required in this template, use the following definitions unless otherwise stated:

- a. Data time period: Annual for calendar years 2021-2024, averaged across these four years.
- b. Main and service replacement programs:
- i. PG&E: Plastic Pipeline Replacement Program (MAT Code 14D) (which covers aldyl-A); Gas Pipeline Replacement Program (14A) (which covers pre-1941 steel); Reliability Main Replacement Program (50A)
- ii. SoCalGas/SDG&E: Vintage Integrity Plastic Plan (within Budget Code 277); Bare Steel Replacement Plan (within 277) (which covers pre-1972 steel without cathodic protection); Main Replacement Programs (252, 253, 255, 267, 278[1])
- iii. Southwest Gas: Targeted Pipe Replacement Program (which covers Driscopipe 7000 plastic[2]) (within budget code 9636); Vintage Steel Program (which covers pre-1961 steel) (within 9636 and 9605)
- c. Service-only replacement programs:
 - i. PG&E: Reliability Service Replacement Program (50B)
 - ii. SoCalGas/SDG&E: Service Replacement Programs (256, 257, 258, 260)
 - iii. Southwest Gas: Customer-Owned Yard Line Program (school and non-school locations)
 - iv. Regulator station replacement programs: PG&E: Regulator Station Rebuilds (50C)
- v. SoCalGas/SDG&E: rebuilds/replacements within Regulator Stations Program (within budget code 265; exclude non-replacement activities not addressed here)
- d. Operating Districts:[3]
 - i. PG&E: provide name and number of 18 divisions.[4]
 - ii. SoCalGas: provide name and number of about 50 gas districts.[5]
 - iii. SDG&E: provide name and number of 5 districts.[6]
 - iv. Southwest Gas: provide name and number of 7 districts.[7]
- e. Work order: Common identifier used by the gas utility to track gas infrastructure work at a given location. For example, the replacement of five adjacent services and the mains serving them typically would be tracked as one work order. The term "project" is also used in this document to refer to a work order.

- f. Costs: Provide the costs for all work orders associated with the program, as recorded for the applicable years. That is, state the amount totaled across the program's work orders. Include costs under the year they were incurred. Include all the costs described in the cost category, regardless of what budget code they are recorded under.
- g. Pressure District: Set of customer meters, services and mains that together depends on one or more gas distribution regulator stations, and not on other gas distribution regulator stations.[8] Note that operating districts and pressure districts are not the same.
 - i. SoCalGas: about 750 pressure systems.[9]
 - ii. PG&E: about 1200 hydraulically independent systems.[10]
 - iii. Southwest Gas: Fewer systems due to smaller footprint in California.
- h. Pressure Category: Describes the pressure in a pressure district or the outgoing pressure from a regulator station that serves a pressure district.[11]
 - i. Medium-pressure: pressure of 1 through 60 psig, and the regulator station is not "HPR-type"
 - ii. Low-pressure: pressure less than 1 psig
- [1] Workpaper includes these codes within work group 252. Southern California Gas Company, submitted in SoCalGas General Rate Case A.22-05-015 for years 2024-2027, Work Unit/Activity Level Estimates, SCG-04-CWP-R_Mario_Aguirre-Gas_Distribution_49456.pdf, pp. 45 &ff.
- [2] Driscopipe 7000 was installed in 1974-1980. See Prepared Direct Testimony of Kevin Lang on behalf of Southwest Gas Corporation, submitted in Southwest Gas General Rate Case A.22-05-015, August 2019, https://docs.cpuc.ca.gov/PublishedDocs/SupDoc/A1908015/2695/338276400.pdf, p. 5.
- [3] Consistent definitions were used for Operating District in Gas System Census Tract Data, filed by gas utilities in response to Administrative Law Judge's Ruling Seeking Data from Gas Utilities in R.24-09-012, January 13, 14, and 17, 2024, posted on the CPUC's R.24-09-012 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking. See definitions in Administrative Law Judge's Ruling Seeking Revised Data from Gas Utilities in R.20-01-007, September 22, 2022, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/rulings/revisedgassystemdataruling09212022.pdf, also available on the CPUC's R.20-01-007 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.

- [4] PG&E's 18 Divisions have been reported as: Diablo, East Bay, Mission, Peninsula, De Anza, San Jose, San Francisco, Central Coast, Fresno, Kern, Stockton, Yosemite, North Bay, Sonoma, Humboldt, Northern Valley, Sacramento, and Sierra. For 14A and 14D distribution pipeline replacement contracts, these divisions are used as bid areas, while for some other contract types they may be combined into 8 larger bid areas.
- [5] SoCalGas' 50 districts have been reported as: Orange Coast Azusa, Anaheim, Alhambra, Aliso Viejo, Downey, Garden Grove, Industry, La Jolla, Pasadena, Santa Ana, Whittier (group 1); Inland Beaumont, Corona, Chino, Fontana, Murrieta, Ramona, Redlands, Rim Forest, Riverside, San Bernardino (group 2); Inland Desert Blythe, El Centro, Palm Desert, Yucca Valley (group 3); Lower Los Angeles 182nd, Belvedere, Crenshaw, Compton, Hollywood, Huntington Park, Juanita, Santa Monica, San Pedro (group 4); Upper Los Angeles/SFV Branford, Canoga Park, Chatsworth, Glendale, Lancaster, Mojave, Simi Valley, Saticoy, Valencia (group 5); Central Coast Goleta, Ventura/Oxnard, Santa Barbara, Santa Maria, San Luis Obispo, Templeton (group 6); and San Juaquin Valley Bakersfield, and Visalia (group 7). The groupings are used for some contract cost purposes.
- [6] SDG&E's five districts are Beach Cities, Eastern, Metro, North Coast, and Northeast.
- [7] Southwest Gas' seven districts are: District 11-Barstow; District 12-Victorville; District 13-Big Bear; District 14-North Lake Tahoe; District 15-Truckee; District 16-South Lake Tahoe; District 19-Needles.
- [8] Pressure districts are also discussed in Recommendations for SB 1221 California Natural Gas System Mapping, CPUC Energy Division Staff Proposal, February 20, 2025, https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897432.PDF, p. 15. For additional background on pressure zones, see DeWitte, Tom and Coolidge, Tom, Understanding Pressure Zones, April 2024, https://community.esri.com/t5/gas-and-pipeline-blog/understanding-pressure-zones/ba-p/1416830.
- [9] SoCalGas provided pressure district data including meters served and overlapping census tracts per ruling in proceeding R.20-01-007, now available as "demand nodes csv" and "May 20 demand nodes csv" on the "Long Term Gas Planning Rulemaking-Closed" webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.
- [10] Recommendations for SB 1221 California Natural Gas System Mapping, p. 15. See also Gas System Census Tract Data Notes, filed by PG&E in response to Administrative Law Judge's Ruling Seeking Data from Gas Utilities in R.24-09-012, January 13, 2024, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/pge/gassystemcensustractdatanotes_pgne.pdf, p. B-18, also posted on the CPUC's R.24-09-012 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking.
- [11] Exclude HPR-type regulators from this analysis. "HPR-type" means reduces to pressure of 1 through 60 psig and is an "HPR-type" regulator station or a district served by such a station. "HPR-type" refers to a regulator station that uses any of the following spring-operated regulators: Fisher 621, Fisher 627, Fisher 630, Reliance Model HPR 10, Reliance Model HPR 20, Reliance Model HPR 268, Rockwell 141, Rockwell 141A, Rockwell 041, Sprague/Itron B35. HPR-type regulators are excluded because they are smaller and simpler than medium-pressure and low-pressure regulators. These definitions align with regulator station categories proposed in Appendix B Direction to Utilities Draft for Comment, https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897318.PDF. Transmission-level regulator stations are not included.

Cost Group	Cost Category	Definition
Other Misc Costs	Fleet	Use of utility-owned vehicles.
Other Misc Costs	Permitting	Costs of acquiring local permits.
Other Misc Costs	AFUDC	Allowance funds used during construction. Refers to the costs of construction-related borrowing.
Other Misc Costs	Land	Payments for easements or right-of-way.
Other Misc Costs	Other	Include utility-owned and utility-rented building and facilities overhead; taxes other than payroll; discounts from contractors; minor materials, e.g. fuel, office supplies and safety equipment; shipping and hazardous waste costs; and other minor costs associated with these activities. Also include these gas distribution replacement activities' share of the cost of capital tools, e.g., pipe cutting and tapping equipment.
Other Misc Costs	Administrative & General Costs	Exclude permitting. Include other capitalized A&G costs. Note this tends to be a relatively large category.

Row ID	Program Category	Row Name	Value	Definition
D1	Regulator station replacement programs	Cost per service, for regulator station replacement	\$292.85	Average cost of replacing gas distribution regulator stations, per service. Also shown in next table, row E1, final column.
D2	Regulator station replacement programs	Cost per customer meter, for regulator station replacement	\$285.00	Average cost of replacing gas distribution regulator stations, per meter. Also shown in next table, row E2, final column.
D3	Regulator station replacement programs	Cost per regulator station replaced	\$649,568.15	Average cost of replacing a gas distribution regulator station. Also shown in next table, row E3, final column.
D4	Regulator station replacement programs	Services per station, for replaced regulator stations	2,218.10	Average number of services served by a replaced regulator station. Also shown in next table, row E4, final column.
D5	Regulator station replacement programs	Meters per station, for replaced regulator stations	2,279.22	Average number of meters served by a replaced regulator station. Also shown in next table, row E5, final column.
D6	Regulator station replacement programs	Regulator stations replaced per year	7.50	Average regulator stations replaced per year. Also shown in next table, row E6, final column.
D7	Regulator station replacement programs	Services affected by replaced regulator stations	16,635.78	Services served by replaced regulator stations. Also shown in next table, row E7, final column.
D8	Regulator station replacement programs	Meters affected by replaced regulator stations	17,094.15	Meters served by replaced regulator stations. Also shown in next table, row E8, final column.
D9	Regulator station replacement programs	Total costs, for regulator station replacement	\$4,871,761.13	Total costs of regulator station replacement program work orders. Also shown in next table, row E9, final column.

D10	NA	Maintenance cost per regulator station	\$1,474.38	Average cost of regulator station maintenance, per service, not including replacement costs. Also shown in later table, cell H1.
D11	Regulator station replacement programs	Project planning period, for regulator station replacement	583 00	Average days between the date that the regulator station was identified for replacement and the date that replacement activities broke ground. Also shown in next table, row E14, final column.

Tibloor: Footnote From Template I If all requiator stations in a pressure district serve an equal number of services, then that value would be shown in F2 for that pressure district.

(Phiotox: Footnote From Tomplate) If all requisitor stations in a pressure district serve an equal number of meters, then that value would be shown in F3 for that pressure district,

Column ID	F1	F2	F3	F4	F5	F6	F7	F8	F9	F10	F11	F12
umn Name	Pressure district	Services per regulator station	Meters per regulator station	Regulator stations	Regulator stations identified for replacement	Pressure category	Services served	Meters served [1]	Core meters served	Non-core meters served	Operating district	Census tracts
Definition	ID number for the pressure district.	Average number of services served by regulator stations in the pressure district. Calculated by dividing F7 by F4.	Average number of meters served by regulator stations in the pressure district. Calculated by dividing F8 by F4.	Number of gas distribution regulator stations immediately serving the pressure district.	Regulator stations whose replacement is forecast to begin during the next ten years, identified consistent with each utility's existing project selection methods, at an annual replacement rate consistent with the rates approved in each utility's most recently adopted general rate case decision.	"Medium-pressure" or "low-pressure."	Number of customer services connected to the pressure district.	Number of customer meters connected to the pressure district. Sum of F9 and F10.	Number of core customer meters connected to the pressure district.	Number of non-core customer meters connected to the pressure district.	Name and ID number of the operating district that the pressure district is in.	ID numbers of all 2020 census tracts overlapping the district.

a. In the tab "Summary," provide the rows of information shown. In the first column, provide the Row ID, as shown; in the second column, provide the Program Category, as shown; in the third column, provide the Row Name, as shown; in the fourth column, provide the value, calculated as described in the definition, averaged across 2021 through 2024; and in the fifth column, provide the Definition, as shown.

Costs by Operating District

b. In the tab "Costs by Operating District," provide the program accomplishments and costs shown (rows), broken down by operating district (columns). In the first four columns, provide the Row ID, Program Category, Row Name and Definition, as shown. Next provide a column for each operating district, with the heading stating the district's name and ID number, and in it, include only the information for work orders in that operating district. In the last column, provide the information across all operating districts (totals unless definition is an average, in which case provide average across all operating districts).

Pressure Districts

c. In the tab "Pressure Districts," provide the columns of information shown for all pressure districts operated by the utility, with a row for each pressure district. In the first row, provide the Column Name, as shown; in the second row, provide the Definition, as shown; and in the following rows, provide the current value, calculated or identified as described in the definition. In the last row, provide the information across all pressure districts (totals unless definition is an average, in which case provide average across all pressure districts shown in preceding columns).

1. Definitions

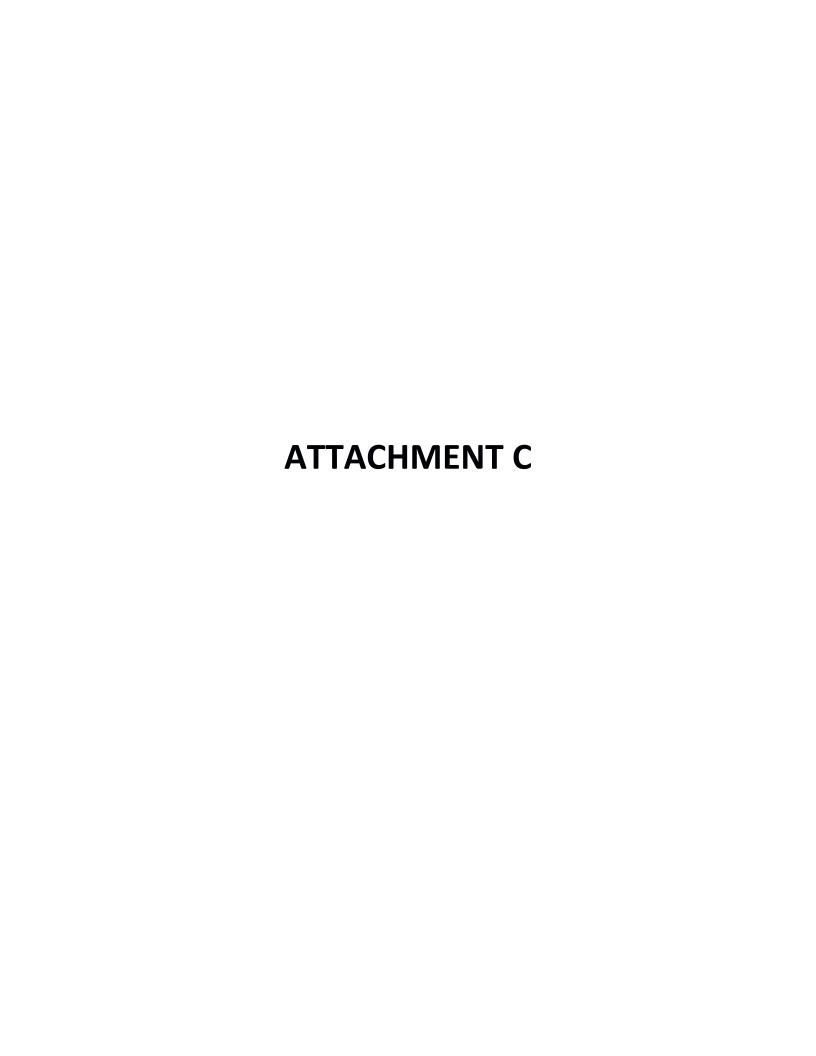

For the data required in this template, use the following definitions unless otherwise stated:

- a. Data time period: Annual for calendar years 2021-2024, averaged across these four years.
- b. Main and service replacement programs:
- i. PG&E: Plastic Pipeline Replacement Program (MAT Code 14D) (which covers aldyl-A); Gas Pipeline Replacement Program (14A) (which covers pre-1941 steel); Reliability Main Replacement Program (50A)
- ii. SoCalGas/SDG&E: Vintage Integrity Plastic Plan (within Budget Code 277); Bare Steel Replacement Plan (within 277) (which covers pre-1972 steel without cathodic protection); Main Replacement Programs (252, 253, 255, 267,
- iii. Southwest Gas: Targeted Pipe Replacement Program (which covers Driscopipe 7000 plastic[2]) (within budget code 9636); Vintage Steel Program (which covers pre-1961 steel) (within 9636 and 9605)
- c. Service-only replacement programs:
 - i. PG&E: Reliability Service Replacement Program (50B)
 - ii. SoCalGas/SDG&E: Service Replacement Programs (256, 257, 258, 260)
 - iii. Southwest Gas: Customer-Owned Yard Line Program (school and non-school locations)
 - iv. Regulator station replacement programs: PG&E: Regulator Station Rebuilds (50C)
- v. SoCalGas/SDG&E: rebuilds/replacements within Regulator Stations Program (within budget code 265; exclude non-replacement activities not addressed here)
- d. Operating Districts:[3]
 - i. PG&E: provide name and number of 18 divisions.[4]
 - ii. SoCalGas: provide name and number of about 50 gas districts.[5]
 - iii. SDG&E: provide name and number of 5 districts.[6]
 - iv. Southwest Gas: provide name and number of 7 districts.[7]
- e. Work order: Common identifier used by the gas utility to track gas infrastructure work at a given location. For example, the replacement of five adjacent services and the mains serving them typically would be tracked as one work order. The term "project" is also used in this document to refer to a work order.

- f. Costs: Provide the costs for all work orders associated with the program, as recorded for the applicable years. That is, state the amount totaled across the program's work orders. Include costs under the year they were incurred. Include all the costs described in the cost category, regardless of what budget code they are recorded under.
- g. Pressure District: Set of customer meters, services and mains that together depends on one or more gas distribution regulator stations, and not on other gas distribution regulator stations.[8] Note that operating districts and pressure districts are not the
 - i. SoCalGas: about 750 pressure systems.[9]
 - ii. PG&E: about 1200 hydraulically independent systems.[10]
 - iii. Southwest Gas: Fewer systems due to smaller footprint in California.
- h. Pressure Category: Describes the pressure in a pressure district or the outgoing pressure from a regulator station that serves a pressure district.[11]
 - i. Medium-pressure: pressure of 1 through 60 psig, and the regulator station is not "HPR-type"
 - ii. Low-pressure: pressure less than 1 psig
- [1] Workpaper includes these codes within work group 252. Southern California Gas Company, submitted in SoCalGas General Rate Case A.22-05-015 for years 2024-2027, Work Unit/Activity Level Estimates, SCG-04-CWP-R_Mario_Aguirre-Gas_Distribution_49456.pdf, pp. 45 &ff.
- [2] Driscopipe 7000 was installed in 1974-1980. See Prepared Direct Testimony of Kevin Lang on behalf of Southwest Gas Corporation, submitted in Southwest Gas General Rate Case A.22-05-015, August 2019, https://docs.cpuc.ca.gov/PublishedDocs/SupDoc/A1908015/2695/338276400.pdf, p. 5.
- [3] Consistent definitions were used for Operating District in Gas System Census Tract Data, filed by gas utilities in response to Administrative Law Judge's Ruling Seeking Data from Gas Utilities in R.24-09-012, January 13, 14, and 17, 2024, posted on the CPUC's R.24-09-012 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking. See definitions in Administrative Law Judge's Ruling Seeking Revised Data from Gas Utilities in R.20-01-007, September 22, 2022, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/rulings/revisedgassystemdataruling09212022.pdf, also available on the CPUC's R.20-01-007 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.
- [4] PG&E's 18 Divisions have been reported as: Diablo, East Bay, Mission, Peninsula, De Anza, San Jose, San Francisco, Central Coast, Fresno, Kern, Stockton, Yosemite, North Bay, Sonoma, Humboldt, Northern Valley, Sacramento, and Sierra. For 14A and 14D distribution pipeline replacement contracts, these divisions are used as bid areas, while for some other contract types they may be combined into 8 larger bid areas.

- [5] SoCalGas' 50 districts have been reported as: Orange Coast Azusa, Anaheim, Alhambra, Aliso Viejo, Downey, Garden Grove, Industry, La Jolla, Pasadena, Santa Ana, Whittier (group 1); Inland Beaumont, Corona, Chino, Fontana, Murrieta, Ramona, Redlands, Rim Forest, Riverside, San Bernardino (group 2); Inland Desert Blythe, El Centro, Palm Desert, Yucca Valley (group 3); Lower Los Angeles 182nd, Belvedere, Crenshaw, Compton, Hollywood, Huntington Park, Juanita, Santa Monica, San Pedro (group 4); Upper Los Angeles/SFV Branford, Canoga Park, Chatsworth, Glendale, Lancaster, Mojave, Simi Valley, Saticoy, Valencia (group 5); Central Coast Goleta, Ventura/Oxnard, Santa Barbara, Santa Maria, San Luis Obispo, Templeton (group 6); and San Juaquin Valley Bakersfield, and Visalia (group 7). The groupings are used for some contract cost purposes.
- [6] SDG&E's five districts are Beach Cities, Eastern, Metro, North Coast, and Northeast.
- [7] Southwest Gas' seven districts are: District 11-Barstow; District 12-Victorville; District 13-Big Bear; District 14-North Lake Tahoe; District 15-Truckee; District 16-South Lake Tahoe; District 19-Needles.
- [8] Pressure districts are also discussed in *Recommendations for SB 1221 California Natural Gas System Mapping*, CPUC Energy Division Staff Proposal, February 20, 2025, https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897432.PDF, p. 15. For additional background on pressure zones, see DeWitte, Tom and Coolidge, Tom, *Understanding Pressure Zones*, April 2024, https://community.esri.com/t5/gas-and-pipeline-blog/understanding-pressure-zones/ba-p/1416830.
- [9] SoCalGas provided pressure district data including meters served and overlapping census tracts per ruling in proceeding R.20-01-007, now available as "demand nodes csv" and "May 20 demand nodes csv" on the "Long Term Gas Planning Rulemaking-Closed" webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.
- [10] Recommendations for SB 1221 California Natural Gas System Mapping, p. 15. See also Gas System Census Tract Data Notes, filed by PG&E in response to Administrative Law Judge's Ruling Seeking Data from Gas Utilities in R.24-09-012, January 13, 2024, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/pge/gassystemcensustractdatanotes_pgne.pdf, p. B-18, also posted on the CPUC's R.24-09-012 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking.
- [11] Exclude HPR-type regulators from this analysis. "HPR-type" means reduces to pressure of 1 through 60 psig and is an "HPR-type" regulator station or a district served by such a station. "HPR-type" refers to a regulator station that uses any of the following spring-operated regulators: Fisher 621, Fisher 627, Fisher 630, Reliance Model HPR 10, Reliance Model HPR 20, Reliance Model HPR 268, Rockwell 141, Rockwell 141A, Rockwell 041, Sprague/Itron B35. HPR-type regulators are excluded because they are smaller and simpler than medium-pressure and low-pressure regulators. These definitions align with regulator station categories proposed in Appendix B *Direction to Utilities Draft for Comment*,
- https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897318.PDF. Transmission-level regulator stations are not included.

Cost Group	Cost Category	Definition		
Other Misc Costs	Fleet	Use of utility-owned vehicles.		
Other Misc Costs	Permitting	Costs of acquiring local permits.		
Other Misc Costs	AFUDC	Allowance funds used during construction. Refers to the costs of construction-related borrowing.		
Other Misc Costs	Land	Payments for easements or right-of-way.		
Other Misc Costs	Other	Include utility-owned and utility-rented building and facilities overhead; taxes other than payroll; discounts from contractors; minor materials, e.g. fuel, office supplies and safety equipment; shipping and hazardous waste costs; and other minor costs associated with these activities. Also include these gas distribution replacement activities' share of the cost of capital tools, e.g., pipe cutting and tapping equipment.		
Other Misc Costs	Administrative & General Costs	Exclude permitting. Include other capitalized A&G costs. Note this tends to be a relatively large category.		

Row ID	Row Name	Value	Definition	General Rate Case Citation (document and page number)
G1	Maintenance cost per service	\$26.76	Average cost of gas distribution pipeline maintenance, per service. Calculated by adding G3 and G4, then dividing by G2.	NA
G2	Services	4587642	Number of services operated by the utility.	NA
G3	Total capital maintenance costs	NA	Annual capital cost of all gas distribution main and service leak detection and prevention, maintenance, and repairs, <i>excluding</i> pipeline replacement.	NA
G4	Total O&M maintenance costs		Annual operations and maintenance cost of all gas distribution main and service leak detection and prevention, maintenance, and repairs, excluding pipeline replacement.	NA
G5	CATHODIC PROTECTION	\$16,612,926.99		Program description: Exhibit SCG-04-R-E, p. MAA-49, line 7 to p. MAA-53, line 14. Recorded costs: Exhibit SCG-04-WP-R-2E, p. 84 to p. 92

H7	[cost component]	[value]	[definition]	[citation]

a. In the tab "Distribution Pipelines," provide the information shown. In the first two columns, provide the Row ID, and Row Name, as shown; in the third column, provide the information requested; and in the fourth column, provide the Definition, as shown. Provide additional rows showing the cost components which sum to G3 and to G4, as categorized in the utility's rate case workpapers, and a final column showing general rate case citations for each cost component, including page numbers. If the general rate case application was submitted before 2025, dollar values in rate case citations may be different from values reported here. Include only and all such actual costs borne by ratepayers. Include activities that support gas distribution pipeline safety such as leak surveys and locate-and-mark programs.

Medium-Pressure Regulator Stations

b. In the tab "Medium-Pr Regulator Stations," provide the information shown. In the first column two columns, provide the Row ID, and Row Name, as shown; in the third column, provide the information for medium-pressure regulator stations; in the fourth column, provide the information for low-pressure regulator stations; and in the fifth column, provide the Definition, as shown. Provide additional rows showing the cost components which sum to H3 and to H4, as categorized in the utility's rate case workpapers, and a final column showing general rate case citations for each cost component, including page numbers. If the general rate case application was submitted before 2025, dollar values in rate case citations may be different from values reported here. Include only and all such actual costs borne by ratepayers. Include costs associated with maintaining regulator station locations and on-site equipment, such as SCADA equipment, vault lids, fencing, and access roadway maintenance.

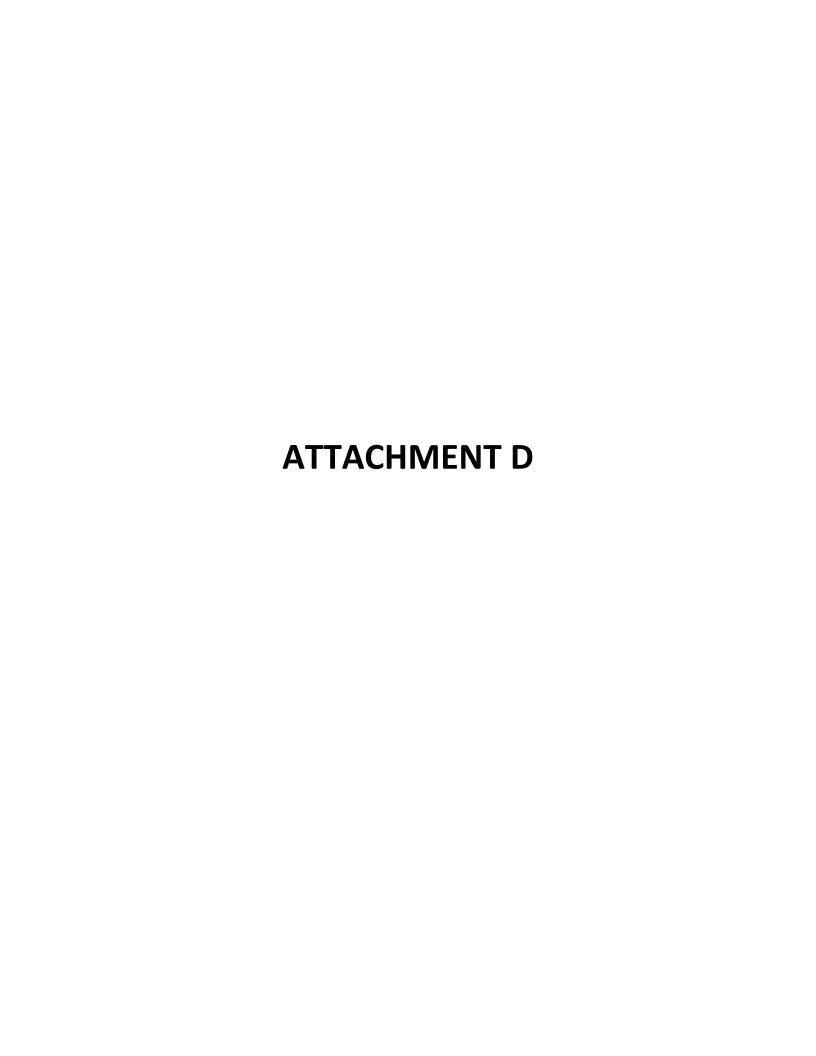

1. *Definitions*

For the data required in this template, use the following definitions unless otherwise stated:

- a. Data time period: Annual for calendar years 2021-2024, averaged across these four years.
- b. Main and service replacement programs:
- i. PG&E: Plastic Pipeline Replacement Program (MAT Code 14D) (which covers aldyl-A); Gas Pipeline Replacement Program (14A) (which covers pre-1941 steel); Reliability Main Replacement Program (50A)
- ii. SoCalGas/SDG&E: Vintage Integrity Plastic Plan (within Budget Code 277); Bare Steel Replacement Plan (within 277) (which covers pre-1972 steel without cathodic protection); Main Replacement Programs (252, 253, 255, 267, 278[1])
- iii. Southwest Gas: Targeted Pipe Replacement Program (which covers Driscopipe 7000 plastic[2]) (within budget code 9636); Vintage Steel Program (which covers pre-1961 steel) (within 9636 and 9605)
- c. Service-only replacement programs:
 - i. PG&E: Reliability Service Replacement Program (50B)
 - ii. SoCalGas/SDG&E: Service Replacement Programs (256, 257, 258, 260)
 - iii. Southwest Gas: Customer-Owned Yard Line Program (school and non-school locations)
 - iv. Regulator station replacement programs: PG&E: Regulator Station Rebuilds (50C)
- v. SoCalGas/SDG&E: rebuilds/replacements within Regulator Stations Program (within budget code 265; exclude non-replacement activities not addressed here)
- d. Operating Districts:[3]
 - i. PG&E: provide name and number of 18 divisions.[4]
 - ii. SoCalGas: provide name and number of about 50 gas districts.[5]
 - iii. SDG&E: provide name and number of 5 districts.[6]
 - iv. Southwest Gas: provide name and number of 7 districts.[7]
- e. Work order: Common identifier used by the gas utility to track gas infrastructure work at a given location. For example, the replacement of five adjacent services and the mains serving them typically would be tracked as one work order. The term "project" is also used in this document to refer to a work order.

- f. Costs: Provide the costs for all work orders associated with the program, as recorded for the applicable years. That is, state the amount totaled across the program's work orders. Include costs under the year they were incurred. Include all the costs described in the cost category, regardless of what budget code they are recorded under.
- g. Pressure District: Set of customer meters, services and mains that together depends on one or more gas distribution regulator stations, and not on other gas distribution regulator stations.[8] Note that operating districts and pressure districts are not the same.
 - i. SoCalGas: about 750 pressure systems.[9]
 - ii. PG&E: about 1200 hydraulically independent systems.[10]
 - iii. Southwest Gas: Fewer systems due to smaller footprint in California.
- h. Pressure Category: Describes the pressure in a pressure district or the outgoing pressure from a regulator station that serves a pressure district.[11]
 - i. Medium-pressure: pressure of 1 through 60 psig, and the regulator station is not "HPR-type"
 - ii. Low-pressure: pressure less than 1 psig
- [1] Workpaper includes these codes within work group 252. Southern California Gas Company, submitted in SoCalGas General Rate Case A.22-05-015 for years 2024-2027, Work Unit/Activity Level Estimates, SCG-04-CWP-R_Mario_Aguirre-Gas_Distribution_49456.pdf, pp. 45 &ff.
- [2] Driscopipe 7000 was installed in 1974-1980. See Prepared Direct Testimony of Kevin Lang on behalf of Southwest Gas Corporation, submitted in Southwest Gas General Rate Case A.22-05-015, August 2019, https://docs.cpuc.ca.gov/PublishedDocs/SupDoc/A1908015/2695/338276400.pdf, p. 5.
- [3] Consistent definitions were used for Operating District in Gas System Census Tract Data, filed by gas utilities in response to *Administrative Law Judge's Ruling Seeking Data from Gas Utilities* in R.24-09-012, January 13, 14, and 17, 2024, posted on the CPUC's R.24-09-012 webpage,
- https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking. See definitions in *Administrative Law Judge's Ruling Seeking Revised Data from Gas Utilities* in R.20-01-007, September 22, 2022, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/rulings/revisedgassystemdataruling09212022.pdf, also available on the CPUC's R.20-01-007 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.
- [4] PG&E's 18 Divisions have been reported as: Diablo, East Bay, Mission, Peninsula, De Anza, San Jose, San Francisco, Central Coast, Fresno, Kern, Stockton, Yosemite, North Bay, Sonoma, Humboldt, Northern Valley, Sacramento, and Sierra. For 14A and 14D distribution pipeline replacement contracts, these divisions are used as bid areas, while for some other contract types they may be combined into 8 larger bid areas.

- [5] SoCalGas' 50 districts have been reported as: Orange Coast Azusa, Anaheim, Alhambra, Aliso Viejo, Downey, Garden Grove, Industry, La Jolla, Pasadena, Santa Ana, Whittier (group 1); Inland Beaumont, Corona, Chino, Fontana, Murrieta, Ramona, Redlands, Rim Forest, Riverside, San Bernardino (group 2); Inland Desert Blythe, El Centro, Palm Desert, Yucca Valley (group 3); Lower Los Angeles 182nd, Belvedere, Crenshaw, Compton, Hollywood, Huntington Park, Juanita, Santa Monica, San Pedro (group 4); Upper Los Angeles/SFV Branford, Canoga Park, Chatsworth, Glendale, Lancaster, Mojave, Simi Valley, Saticoy, Valencia (group 5); Central Coast Goleta, Ventura/Oxnard, Santa Barbara, Santa Maria, San Luis Obispo, Templeton (group 6); and San Juaquin Valley Bakersfield, and Visalia (group 7). The groupings are used for some contract cost purposes.
- [6] SDG&E's five districts are Beach Cities, Eastern, Metro, North Coast, and Northeast.
- [7] Southwest Gas' seven districts are: District 11-Barstow; District 12-Victorville; District 13-Big Bear; District 14-North Lake Tahoe; District 15-Truckee; District 16-South Lake Tahoe; District 19-Needles.
- [8] Pressure districts are also discussed in *Recommendations for SB 1221 California Natural Gas System Mapping*, CPUC Energy Division Staff Proposal, February 20, 2025, https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897432.PDF, p. 15. For additional background on pressure zones, see DeWitte, Tom and Coolidge, Tom, *Understanding Pressure Zones*, April 2024, https://community.esri.com/t5/gas-and-pipeline-blog/understanding-pressure-zones/ba-p/1416830.
- [9] SoCalGas provided pressure district data including meters served and overlapping census tracts per ruling in proceeding R.20-01-007, now available as "demand nodes csv" and "May 20 demand nodes csv" on the "Long Term Gas Planning Rulemaking-Closed" webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.
- [10] Recommendations for SB 1221 California Natural Gas System Mapping, p. 15. See also Gas System Census Tract Data Notes, filed by PG&E in response to Administrative Law Judge's Ruling Seeking Data from Gas Utilities in R.24-09-012, January 13, 2024, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/pge/gassystemcensustractdatanotes_pgne.pdf, p. B-18, also posted on the CPUC's R.24-09-012 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking.
- [11] Exclude HPR-type regulators from this analysis. "HPR-type" means reduces to pressure of 1 through 60 psig and is an "HPR-type" regulator station or a district served by such a station. "HPR-type" refers to a regulator station that uses any of the following spring-operated regulators: Fisher 621, Fisher 627, Fisher 630, Reliance Model HPR 10, Reliance Model HPR 20, Reliance Model HPR 268, Rockwell 141, Rockwell 141A, Rockwell 041, Sprague/Itron B35. HPR-type regulators are excluded because they are smaller and simpler than medium-pressure and low-pressure regulators. These definitions align with regulator station categories proposed in Appendix B *Direction to Utilities Draft for Comment*,
- https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897318.PDF. Transmission-level regulator stations are not included.

Row ID	Program Category	Row Name	Value	Definition [3]
A1	Main and service replacement programs	Cost per service, for main programs	\$ 6,173.58	Average cost of gas distribution main and service replacement activities, per service. Also shown in next table, row B8, final column.
A2	Service-only replacement programs [4]	Cost per service replaced, for services only	\$ 29,127.81	Average cost of replacing gas distribution services only.[1] Also shown in next table, row B1, final column.
A3	Main and service replacement programs	Cost per main mile replaced	\$ 710,327.75	Average cost of gas distribution main and service replacement activities, per mile of main. Also shown in next table, row B9, final column.
A4	Main and service replacement programs	Services per project, for main programs	16.977	Average number of services in a single work order. Also shown in next table, row B10, final column.
A5	Main and service replacement programs	Main program projects per year	905.250	Average work orders per year, totaled across the utility's main and service replacement programs. Also shown in next table, row B11, final column.
A6	Service-only replacement programs	Services replaced per year, when services only	43.500	Average number of services replaced by service-only replacement programs.[2] Also shown in next table, row B3, final column.
A7	Both main and service and service- only replacement programs	Annual pipeline replacement expenditures	\$ 96,142,696.35	Total cost across gas distribution replacement programs. Sum of next table's B5 and B15, final column.

A8	NA	Maintenance cost per service [5]	\$ 16.15	Average cost of gas distribution pipeline maintenance, per service, not including replacement costs. Also shown in later table, cell G1.
A9	Main and service replacement programs	Project planning period, for main programs	48.491	Average days between the date that the project was identified for replacement and the date that replacement activities broke ground. Also shown in next table, row B21, final column.
A10	Service-only replacement programs	Project planning period, for services only	499.707	Average days between the date that the service(s) was identified for replacement and the date that replacement activities broke ground. Also shown in next table, row B6, final column.

- [1] [Note: Footnote From Template] Programs which replace both mains and services sometimes replace services alone, but including those projects would be more challenging to include in this calculation.
- [2] [Note: Footnote From Template] Note this will be less than the total services replaced annually because mains and services programs can also includes projects which only replace services. However, it would be more challenging to include those in this calculation.
- [3] All values are calculated as defined in the "Definition" column for every field that includes a cell calculation or equivalent field in "Definition."
- [4] Because SDG&E does not have service-only programs, costs may also include activities related to main replacements.
- [5] Maintenance costs include activity codes for O&M Maintenance [MAT Codes: Leak Survey 670,672,671,673: CP:603,604,631,633,658,659 Pipeline Ops: 744, and all leak repair orders] District" All O&M leak repairs]. Included damage prevention mark-out costs from FERC 874.3 and 874.31 on Damage Prevention cost centers.

- [1] [Note: Footnote From Template] Programs which replace both mains and services sometimes replace services alone, but including those projects would be onerous to include in this calculation.
- [2] [Note: Footnote From Template] Note this will be an undercount because mains and services programs can also includes projects which only replace services. However, it would be more challenging to include those in this calculation.
- [3] Budget Codes: 508- Gas Distribution Leak Repair Unplanned, 514- RAMP Vintage Steel Replacement (1965-present), 19564- RAMP Vintage Steel Replacement (1934 to 1964), 19565- RAMP Vintage Steel Replacement (1933 and older), 546 DIMP.
- [4] All values are calculated as defined in the "Definition" column for every field that includes a cell calculation or equivalent field in "Definition." \Box

a. In the tab "Summary," provide the rows of information shown. In the first column, provide the Row ID, as shown; in the second column, provide the Program Category, as shown; in the third column, provide the Row Name, as shown; in the fourth column, provide the value, calculated as described in the definition, averaged across the years; and in the fifth column, provide the Definition, as shown.

Costs by Operating District

b. In the tab "Costs by Operating District," provide the program accomplishments and costs shown (rows), broken down by operating district (columns). In the first four columns, provide the Row ID, Program Category, Row Name and Definition, as shown. Next provide a column for each operating district, with the heading stating the district's name and ID number, and in it, include only the information for work orders in that operating district. In the last column, provide the information across all operating districts (totals unless definition is an average, in which case provide average across all operating districts). For each row, include only information for the programs specified in the "Program Category."

Values for B8 through B15 in the last column should match with values for C1 through C8 in the last column in the tab "Utility-Wide Costs by Program."

Utility-Wide Costs by Program

c. In the tab, "Utility-Wide Costs by Program," provide the program accomplishments and costs shown (rows), broken down by programs (columns). In the first four columns, provide the Row ID, Program Category, Row Name and Definition, as shown. Next provide a column for each program, and in it, include only the information for work orders in that program. Include all the costs for work orders associated with the program, even if these costs are not recorded under the work order or program. In the last column, provide the information across all programs (totals unless definition is an average, in which case provide average across all programs shown in preceding columns).

1. Definitions

For the data required in this template, use the following definitions unless otherwise stated:

- a. Data time period: Annual for calendar years 2021-2024, averaged across these four years.
- b. Main and service replacement programs:
- i. PG&E: Plastic Pipeline Replacement Program (MAT Code 14D) (which covers aldyl-A); Gas Pipeline Replacement Program (14A) (which covers pre-1941 steel); Reliability Main Replacement Program (50A)
- ii. SocaiGas/SDG&E: vintage integrity Fiastic Fian (within budget Code 2/1); bare Steel керіасетент Plan (within 277) (which covers pre-1972 steel without cathodic protection); Main Replacement Programs (252, 253, 255, 267, 278[1])
- iii. Southwest Gas: Targeted Pipe Replacement Program (which covers Driscopipe 7000 plastic[2]) (within budget code 9636); Vintage Steel Program (which covers pre-1961 steel) (within 9636 and 9605)
- c. Service-only replacement programs:
 - i. PG&E: Reliability Service Replacement Program (50B)
 - ii. SoCalGas/SDG&E: Service Replacement Programs (256, 257, 258, 260)
 - iii. Southwest Gas: Customer-Owned Yard Line Program (school and non-school locations)
 - iv. Regulator station replacement programs: PG&E: Regulator Station Rebuilds (50C)
- v. SoCalGas/SDG&E: rebuilds/replacements within Regulator Stations Program (within budget code 265; exclude non-replacement activities not addressed here)
- d. Operating Districts:[3]
 - i. PG&E: provide name and number of 18 divisions.[4]
 - ii. SoCalGas: provide name and number of about 50 gas districts.[5]
 - iii. SDG&E: provide name and number of 5 districts.[6]
 - iv. Southwest Gas: provide name and number of 7 districts.[7]
- e. Work order: Common identifier used by the gas utility to track gas infrastructure work at a given location. For example, the replacement of five adjacent services and the mains serving them typically would be tracked as one work order. The term "project" is also used in this document to refer to a work order.

- f. Costs: Provide the costs for all work orders associated with the program, as recorded for the applicable years. That is, state the amount totaled across the program's work orders. Include costs under the year they were incurred. Include all the costs described in the cost category, regardless of what budget code they are recorded under.
- g. Pressure District: Set of customer meters, services and mains that together depends on one or more gas distribution regulator stations, and not on other gas distribution regulator stations.[8] Note that operating districts and pressure districts are not the same.
 - i. SoCalGas: about 750 pressure systems.[9]
 - ii. PG&E: about 1200 hydraulically independent systems.[10]
 - iii. Southwest Gas: Fewer systems due to smaller footprint in California.
- h. Pressure Category: Describes the pressure in a pressure district or the outgoing pressure from a regulator station that serves a pressure district.[11]
 - i. Medium-pressure: pressure of 1 through 60 psig, and the regulator station is not "HPR-type"
 - ii. Low-pressure: pressure less than 1 psig
- [1] Workpaper includes these codes within work group 252. Southern California Gas Company, submitted in SoCalGas General Rate Case A.22-05-015 for years 2024-2027, Work Unit/Activity Level Estimates, SCG-04-CWP-R_Mario_Aguirre-Gas_Distribution_49456.pdf, pp. 45 &ff.
- [2] Driscopipe 7000 was installed in 1974-1980. See Prepared Direct Testimony of Kevin Lang on behalf of Southwest Gas Corporation, submitted in Southwest Gas General Rate Case A.22-05-015, August 2019, https://docs.cpuc.ca.gov/PublishedDocs/SupDoc/A1908015/2695/338276400.pdf, p. 5.
- [3] Consistent definitions were used for Operating District in Gas System Census Tract Data, filed by gas utilities in response to Administrative Law Judge's Ruling Seeking Data from Gas Utilities in R.24-09-012, January 13, 14, and 17, 2024, posted on the CPUC's R.24-09-012 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking. See definitions in Administrative Law Judge's Ruling Seeking Revised Data from Gas Utilities in R.20-01-007, September 22, 2022, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/rulings/revisedgassystemdataruling09212022.pdf, also available on the CPUC's R.20-01-007 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.

- [4] PG&E's 18 Divisions have been reported as: Diablo, East Bay, Mission, Peninsula, De Anza, San Jose, San Francisco, Central Coast, Fresno, Kern, Stockton, Yosemite, North Bay, Sonoma, Humboldt, Northern Valley, Sacramento, and Sierra. For 14A and 14D distribution pipeline replacement contracts, these divisions are used as bid areas, while for some other contract types they may be combined into 8 larger bid areas.
- [5] SoCalGas' 50 districts have been reported as: Orange Coast Azusa, Anaheim, Alhambra, Aliso Viejo, Downey, Garden Grove, Industry, La Jolla, Pasadena, Santa Ana, Whittier (group 1); Inland Beaumont, Corona, Chino, Fontana, Murrieta, Ramona, Redlands, Rim Forest, Riverside, San Bernardino (group 2); Inland Desert Blythe, El Centro, Palm Desert, Yucca Valley (group 3); Lower Los Angeles 182nd, Belvedere, Crenshaw, Compton, Hollywood, Huntington Park, Juanita, Santa Monica, San Pedro (group 4); Upper Los Angeles/SFV Branford, Canoga Park, Chatsworth, Glendale, Lancaster, Mojave, Simi Valley, Saticoy, Valencia (group 5); Central Coast Goleta, Ventura/Oxnard, Santa Barbara, Santa Maria, San Luis Obispo, Templeton (group 6); and San Juaquin Valley Bakersfield, and Visalia (group 7). The groupings are used for some contract cost purposes.
- [6] SDG&E's five districts are Beach Cities, Eastern, Metro, North Coast, and Northeast.
- [7] Southwest Gas' seven districts are: District 11-Barstow; District 12-Victorville; District 13-Big Bear; District 14-North Lake Tahoe; District 15-Truckee; District 16-South Lake Tahoe; District 19-Needles.
- [8] Pressure districts are also discussed in Recommendations for SB 1221 California Natural Gas System Mapping, CPUC Energy Division Staff Proposal, February 20, 2025, https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897432.PDF, p. 15. For additional background on pressure zones, see DeWitte, Tom and Coolidge, Tom, Understanding Pressure Zones, April 2024, https://community.esri.com/t5/gas-and-pipeline-blog/understanding-pressure-zones/ba-p/1416830.
- [9] SoCalGas provided pressure district data including meters served and overlapping census tracts per ruling in proceeding R.20-01-007, now available as "demand nodes csv" and "May 20 demand nodes csv" on the "Long Term Gas Planning Rulemaking-Closed" webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.
- [10] Recommendations for SB 1221 California Natural Gas System Mapping, p. 15. See also Gas System Census Tract Data Notes, filed by PG&E in response to Administrative Law Judge's Ruling Seeking Data from Gas Utilities in R.24-09-012, January 13, 2024, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/pge/gassystemcensustractdatanotes_pgne.pdf, p. B-18, also posted on the CPUC's R.24-09-012 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-oir/pge/gassystemcensustractdatanotes_pgne.pdf,
- [11] Exclude HPR-type regulators from this analysis. "HPR-type" means reduces to pressure of 1 through 60 psig and is an "HPR-type" regulator station or a district served by such a station. "HPR-type" refers to a regulator station that uses any of the following spring-operated regulators: Fisher 621, Fisher 627, Fisher 630, Reliance Model HPR 10, Reliance Model HPR 20, Reliance Model HPR 268, Rockwell 141, Rockwell 141A, Rockwell 041, Sprague/Itron B35. HPR-type regulators are excluded because they are smaller and simpler than medium-pressure and low-pressure regulators. These definitions align with regulator station categories proposed in Appendix B Direction to Utilities Draft for Comment,
- https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897318.PDF. Transmission-level regulator stations are not included.

Cost Group	Cost Category	Definition
Other Misc Costs	Fleet	Use of utility-owned vehicles.
Other Misc Costs	Permitting	Costs of acquiring local permits.
Other Misc Costs	AFUDC	Allowance funds used during construction. Refers to the costs of construction-related borrowing.
Other Misc Costs	Land	Payments for easements or right-of-way.
Other Misc Costs	Other	Include utility-owned and utility-rented building and facilities overhead; taxes other than payroll; discounts from contractors; minor materials, e.g. fuel, office supplies and safety equipment; shipping and hazardous waste costs; and other minor costs associated with these activities. Also include these gas distribution replacement activities' share of the cost of capital tools, e.g., pipe cutting and tapping equipment.
Other Misc Costs	Administrative & General Costs	Exclude permitting. Include other capitalized A&G costs. Note this tends to be a relatively large category.

Row ID	Program Category	Row Name	Value	Definition [3]
D1	Regulator station replacement programs [2]	Cost per service, for regulator station replacement	#DIV/0!	Average cost of replacing gas distribution regulator stations, per service. Also shown in next table, row E1, final column.
D2	Regulator station replacement programs [2]	Cost per customer meter, for regulator station replacement	#DIV/0!	Average cost of replacing gas distribution regulator stations, per meter. Also shown in next table, row E2, final column.
D3	Regulator station replacement programs [2]	Cost per regulator station replaced	#DIV/0!	Average cost of replacing a gas distribution regulator station. Also shown in next table, row E3, final column.
D4	Regulator station replacement programs [2]	Services per station, for replaced regulator stations	#DIV/0!	Average number of services served by a replaced regulator station. Also shown in next table, row E4, final column.
D5	Regulator station replacement programs [2]	Meters per station, for replaced regulator stations	#DIV/0!	Average number of meters[1] served by a replaced regulator station. Also shown in next table, row E5, final column.
D6	Regulator station replacement programs	Regulator stations replaced per year	2.5	Average regulator stations replaced per year. Also shown in next table, row E6, final column.
D7	Regulator station replacement programs	Services affected by replaced regulator stations	4138.283	Services served by replaced regulator stations. Also shown in next table, row E7, final column.

D8	Regulator station replacement programs	Meters affected by replaced regulator stations	4196.239	Meters served by replaced regulator stations. Also shown in next table, row E8, final column.
D9	Regulator station replacement programs	Total costs, for regulator station replacement	0	Total costs of regulator station replacement program work orders. Also shown in next table, row E9, final column.
D10	NA	Maintenance cost per regulator station	\$ 3,649.81	Average cost of regulator station maintenance, per service, not including replacement costs. Also shown in later table, cell H1.
D11	Regulator station replacement programs	Project planning period, for regulator station replacement	0	Average days between the date that the regulator station was identified for replacement and the date that replacement activities broke ground. Also shown in next table, row E14, final column.

[1] [Note: Footnote From Template] Meters analogous to "customers" reported in existing data.

[2] Reg station replacement projects that occurred between years 2021-2024 were a component of much larger projects. Eight of nine stations associated with Line 1600 Test vs Replacement Plan Project; one of nine stations associated with City of San Diego Pure Water Project. Work order dollar amounts are not reflective of true costs of regulator station replacement costs only.

[3] All values are calculated as defined in the "Definition" column for every field that includes a cell calculation or equivalent field in "Definition." \Box

Row ID	Program Category	Row Name	Definition [4]	Metro (2021-2024)	Beach Cities(2021- 2024)	North East (2021- 2024)	North Coast (2021- 2024)	Eastern (2021-2024)		Totals or Averages Across All Operating Districts
E1	Regulator station replacement programs	Cost per service, for regulator station replacement	Average cost of replacing gas distribution regulator stations, per service. Calculated by dividing E9 by E7.	#DIV/0!	0	0	0	#DIV/0!		#DIV/0!
E2	Regulator station replacement programs	Cost per customer meter, for regulator station replacement	Average cost of replacing gas distribution regulator stations, per meter. Calculated by dividing E9 by E8.	#DIV/0!	O	0	0	#DIV/0!		#DIV/0!

a. In the tab "Summary," provide the rows of information shown. In the first column, provide the Row ID, as shown; in the second column, provide the Program Category, as shown; in the third column, provide the Row Name, as shown; in the fourth column, provide the value, calculated as described in the definition, averaged across 2021 through 2024; and in the fifth column, provide the Definition, as shown.

Costs by Operating District

b. In the tab "Costs by Operating District," provide the program accomplishments and costs shown (rows), broken down by operating district (columns). In the first four columns, provide the Row ID, Program Category, Row Name and Definition, as shown. Next provide a column for each operating district, with the heading stating the district's name and ID number, and in it, include only the information for work orders in that operating district. In the last column, provide the information across all operating districts (totals unless definition is an average, in which case provide average across all operating districts).

Pressure Districts

c. In the tab "Pressure Districts," provide the columns of information shown for all pressure districts operated by the utility, with a row for each pressure district. In the first row, provide the Column Name, as shown; in the second row, provide the Definition, as shown; and in the following rows, provide the current value, calculated or identified as described in the definition. In the last row, provide the information across all pressure districts (totals unless definition is an average, in which case provide average across all pressure districts shown in preceding columns).

1. Definitions

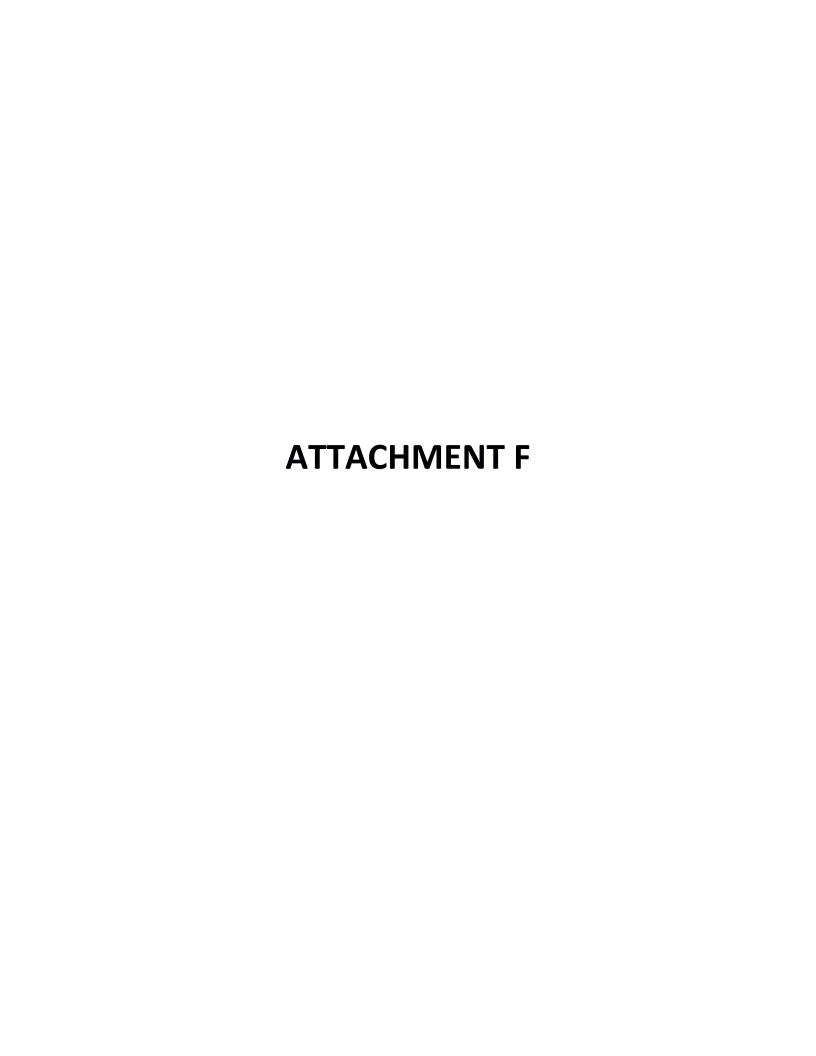

For the data required in this template, use the following definitions unless otherwise stated:

- a. Data time period: Annual for calendar years 2021-2024, averaged across these four years.
- b. Main and service replacement programs:
- i. PG&E: Plastic Pipeline Replacement Program (MAT Code 14D) (which covers aldyl-A); Gas Pipeline Replacement Program (14A) (which covers pre-1941 steel); Reliability Main Replacement Program (50A)
- ii. SocaiGas/SDG&E: vintage integrity Fiastic Fian (within budget Code 2/1); bare Steel керіасетент Plan (within 277) (which covers pre-1972 steel without cathodic protection); Main Replacement Programs (252, 253, 255, 267, 278[1])
- iii. Southwest Gas: Targeted Pipe Replacement Program (which covers Driscopipe 7000 plastic[2]) (within budget code 9636); Vintage Steel Program (which covers pre-1961 steel) (within 9636 and 9605)
- c. Service-only replacement programs:
 - i. PG&E: Reliability Service Replacement Program (50B)
 - ii. SoCalGas/SDG&E: Service Replacement Programs (256, 257, 258, 260)
 - iii. Southwest Gas: Customer-Owned Yard Line Program (school and non-school locations)
 - iv. Regulator station replacement programs: PG&E: Regulator Station Rebuilds (50C)
- v. SoCalGas/SDG&E: rebuilds/replacements within Regulator Stations Program (within budget code 265; exclude non-replacement activities not addressed here)
- d. Operating Districts:[3]
 - i. PG&E: provide name and number of 18 divisions.[4]
 - ii. SoCalGas: provide name and number of about 50 gas districts.[5]
 - iii. SDG&E: provide name and number of 5 districts.[6]
 - iv. Southwest Gas: provide name and number of 7 districts.[7]
- e. Work order: Common identifier used by the gas utility to track gas infrastructure work at a given location. For example, the replacement of five adjacent services and the mains serving them typically would be tracked as one work order. The term "project" is also used in this document to refer to a work order.

- f. Costs: Provide the costs for all work orders associated with the program, as recorded for the applicable years. That is, state the amount totaled across the program's work orders. Include costs under the year they were incurred. Include all the costs described in the cost category, regardless of what budget code they are recorded under.
- g. Pressure District: Set of customer meters, services and mains that together depends on one or more gas distribution regulator stations, and not on other gas distribution regulator stations.[8] Note that operating districts and pressure districts are not the same.
 - i. SoCalGas: about 750 pressure systems.[9]
 - ii. PG&E: about 1200 hydraulically independent systems.[10]
 - iii. Southwest Gas: Fewer systems due to smaller footprint in California.
- h. Pressure Category: Describes the pressure in a pressure district or the outgoing pressure from a regulator station that serves a pressure district.[11]
 - i. Medium-pressure: pressure of 1 through 60 psig, and the regulator station is not "HPR-type"
 - ii. Low-pressure: pressure less than 1 psig
- [1] Workpaper includes these codes within work group 252. Southern California Gas Company, submitted in SoCalGas General Rate Case A.22-05-015 for years 2024-2027, Work Unit/Activity Level Estimates, SCG-04-CWP-R_Mario_Aguirre-Gas_Distribution_49456.pdf, pp. 45 &ff.
- [2] Driscopipe 7000 was installed in 1974-1980. See Prepared Direct Testimony of Kevin Lang on behalf of Southwest Gas Corporation, submitted in Southwest Gas General Rate Case A.22-05-015, August 2019, https://docs.cpuc.ca.gov/PublishedDocs/SupDoc/A1908015/2695/338276400.pdf, p. 5.
- [3] Consistent definitions were used for Operating District in Gas System Census Tract Data, filed by gas utilities in response to *Administrative Law Judge's Ruling Seeking Data from Gas Utilities* in R.24-09-012, January 13, 14, and 17, 2024, posted on the CPUC's R.24-09-012 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking. See definitions in *Administrative Law Judge's Ruling Seeking Revised Data from Gas Utilities* in R.20-01-007, September 22, 2022, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/rulings/revisedgassystemdataruling09212022.pdf, also available on the CPUC's R.20-01-007 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.
- [4] PG&E's 18 Divisions have been reported as: Diablo, East Bay, Mission, Peninsula, De Anza, San Jose, San Francisco, Central Coast, Fresno, Kern, Stockton, Yosemite, North Bay, Sonoma, Humboldt, Northern Valley, Sacramento, and Sierra. For 14A and 14D distribution pipeline replacement contracts, these divisions are used as bid areas, while for some other contract types they may be combined into 8 larger bid areas.

- [5] SoCalGas' 50 districts have been reported as: Orange Coast Azusa, Anaheim, Alhambra, Aliso Viejo, Downey, Garden Grove, Industry, La Jolla, Pasadena, Santa Ana, Whittier (group 1); Inland Beaumont, Corona, Chino, Fontana, Murrieta, Ramona, Redlands, Rim Forest, Riverside, San Bernardino (group 2); Inland Desert Blythe, El Centro, Palm Desert, Yucca Valley (group 3); Lower Los Angeles 182nd, Belvedere, Crenshaw, Compton, Hollywood, Huntington Park, Juanita, Santa Monica, San Pedro (group 4); Upper Los Angeles/SFV Branford, Canoga Park, Chatsworth, Glendale, Lancaster, Mojave, Simi Valley, Saticoy, Valencia (group 5); Central Coast Goleta, Ventura/Oxnard, Santa Barbara, Santa Maria, San Luis Obispo, Templeton (group 6); and San Juaquin Valley Bakersfield, and Visalia (group 7). The groupings are used for some contract cost purposes.
- [6] SDG&E's five districts are Beach Cities, Eastern, Metro, North Coast, and Northeast.
- [7] Southwest Gas' seven districts are: District 11-Barstow; District 12-Victorville; District 13-Big Bear; District 14-North Lake Tahoe; District 15-Truckee; District 16-South Lake Tahoe; District 19-Needles.
- [8] Pressure districts are also discussed in *Recommendations for SB 1221 California Natural Gas System Mapping*, CPUC Energy Division Staff Proposal, February 20, 2025, https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897432.PDF, p. 15. For additional background on pressure zones, see DeWitte, Tom and Coolidge, Tom, *Understanding Pressure Zones*, April 2024, https://community.esri.com/t5/gas-and-pipeline-blog/understanding-pressure-zones/ba-p/1416830.
- [9] SoCalGas provided pressure district data including meters served and overlapping census tracts per ruling in proceeding R.20-01-007, now available as "demand nodes csv" and "May 20 demand nodes csv" on the "Long Term Gas Planning Rulemaking-Closed" webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.
- [10] Recommendations for SB 1221 California Natural Gas System Mapping, p. 15. See also Gas System Census Tract Data Notes, filed by PG&E in response to Administrative Law Judge's Ruling Seeking Data from Gas Utilities in R.24-09-012, January 13, 2024, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/pge/gassystemcensustractdatanotes_pgne.pdf, p. B-18, also posted on the CPUC's R.24-09-012 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking.
- [11] Exclude HPR-type regulators from this analysis. "HPR-type" means reduces to pressure of 1 through 60 psig and is an "HPR-type" regulator station or a district served by such a station. "HPR-type" refers to a regulator station that uses any of the following spring-operated regulators: Fisher 621, Fisher 627, Fisher 630, Reliance Model HPR 10, Reliance Model HPR 20, Reliance Model HPR 268, Rockwell 141, Rockwell 141A, Rockwell 041, Sprague/Itron B35. HPR-type regulators are excluded because they are smaller and simpler than medium-pressure and low-pressure regulators. These definitions align with regulator station categories proposed in Appendix B *Direction to Utilities Draft for Comment*, https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897318.PDF. Transmission-level regulator stations are not included.

Cost Group	Cost Category	Definition
Other Misc Costs	Fleet	Use of utility-owned vehicles.
Other Misc Costs	Permitting	Costs of acquiring local permits.
Other Misc Costs	AFUDC	Allowance funds used during construction. Refers to the costs of construction-related borrowing.
Other Misc Costs	Land	Payments for easements or right-of-way.
Other Misc Costs	Other	Include utility-owned and utility-rented building and facilities overhead; taxes other than payroll; discounts from contractors; minor materials, e.g. fuel, office supplies and safety equipment; shipping and hazardous waste costs; and other minor costs associated with these activities. Also include these gas distribution replacement activities' share of the cost of capital tools, e.g., pipe cutting and tapping equipment.
Other Misc Costs	Administrative & General Costs	Exclude permitting. Include other capitalized A&G costs. Note this tends to be a relatively large category.

Row ID	Row Name	Value	Definition [1]	General Rate Case Citation (document and page number)
G1	Maintenance cost per service	\$ 16.15	Average cost of gas distribution pipeline maintenance, per service. Calculated by adding G3 and G4, then dividing by G2.	A.22-05-016 SDG&E 2024 General Rate Case (GRC) (May 15, 2022) p LPK-38 to LPK-42

^[1] All values are calculated as defined in the "Definition" column for every field that includes a cell calculation or equivalent field in "Definition." \Box

a. In the tab "Distribution Pipelines," provide the information shown. In the first two columns, provide the Row ID, and Row Name, as shown; in the third column, provide the information requested; and in the fourth column, provide the Definition, as shown. Provide additional rows showing the cost components which sum to G3 and to G4, as categorized in the utility's rate case workpapers, and a final column showing general rate case citations for each cost component, including page numbers. If the general rate case application was submitted before 2025, dollar values in rate case citations may be different from values reported here. Include only and all such actual costs borne by ratepayers. Include activities that support gas distribution pipeline safety such as leak surveys and locate-and-mark programs.

Medium-Pressure Regulator Stations

b. In the tab "Medium-Pr Regulator Stations," provide the information shown. In the first column two columns, provide the Row ID, and Row Name, as shown; in the third column, provide the information for medium-pressure regulator stations; in the fourth column, provide the information for low-pressure regulator stations; and in the fifth column, provide the Definition, as shown. Provide additional rows showing the cost components which sum to H3 and to H4, as categorized in the utility's rate case workpapers, and a final column showing general rate case citations for each cost component, including page numbers. If the general rate case application was submitted before 2025, dollar values in rate case citations may be different from values reported here. Include only and all such actual costs borne by ratepayers. Include costs associated with maintaining regulator station locations and on-site equipment, such as SCADA equipment, vault lids, fencing, and access roadway maintenance.

1. Definitions

For the data required in this template, use the following definitions unless otherwise stated:

- a. Data time period: Annual for calendar years 2021-2024, averaged across these four years.
- b. Main and service replacement programs:
- i. PG&E: Plastic Pipeline Replacement Program (MAT Code 14D) (which covers aldyl-A); Gas Pipeline Replacement Program (14A) (which covers pre-1941 steel); Reliability Main Replacement Program (50A)
- ii. SocaiGas/SDG&E: vintage integrity Fiastic Fian (within budget Code 2/1); bare Steel керіасетент Plan (within 277) (which covers pre-1972 steel without cathodic protection); Main Replacement Programs (252, 253, 255, 267, 278[1])
- iii. Southwest Gas: Targeted Pipe Replacement Program (which covers Driscopipe 7000 plastic[2]) (within budget code 9636); Vintage Steel Program (which covers pre-1961 steel) (within 9636 and 9605)
- c. Service-only replacement programs:
 - i. PG&E: Reliability Service Replacement Program (50B)
 - ii. SoCalGas/SDG&E: Service Replacement Programs (256, 257, 258, 260)
 - iii. Southwest Gas: Customer-Owned Yard Line Program (school and non-school locations)
 - iv. Regulator station replacement programs: PG&E: Regulator Station Rebuilds (50C)
- v. SoCalGas/SDG&E: rebuilds/replacements within Regulator Stations Program (within budget code 265; exclude non-replacement activities not addressed here)
- d. Operating Districts:[3]
 - i. PG&E: provide name and number of 18 divisions.[4]
 - ii. SoCalGas: provide name and number of about 50 gas districts.[5]
 - iii. SDG&E: provide name and number of 5 districts.[6]
 - iv. Southwest Gas: provide name and number of 7 districts.[7]
- e. Work order: Common identifier used by the gas utility to track gas infrastructure work at a given location. For example, the replacement of five adjacent services and the mains serving them typically would be tracked as one work order. The term "project" is also used in this document to refer to a work order.

- f. Costs: Provide the costs for all work orders associated with the program, as recorded for the applicable years. That is, state the amount totaled across the program's work orders. Include costs under the year they were incurred. Include all the costs described in the cost category, regardless of what budget code they are recorded under.
- g. Pressure District: Set of customer meters, services and mains that together depends on one or more gas distribution regulator stations, and not on other gas distribution regulator stations.[8] Note that operating districts and pressure districts are not the same.
 - i. SoCalGas: about 750 pressure systems.[9]
 - ii. PG&E: about 1200 hydraulically independent systems.[10]
 - iii. Southwest Gas: Fewer systems due to smaller footprint in California.
- h. Pressure Category: Describes the pressure in a pressure district or the outgoing pressure from a regulator station that serves a pressure district.[11]
 - i. Medium-pressure: pressure of 1 through 60 psig, and the regulator station is not "HPR-type"
 - ii. Low-pressure: pressure less than 1 psig
- [1] Workpaper includes these codes within work group 252. Southern California Gas Company, submitted in SoCalGas General Rate Case A.22-05-015 for years 2024-2027, Work Unit/Activity Level Estimates, SCG-04-CWP-R_Mario_Aguirre-Gas_Distribution_49456.pdf, pp. 45 &ff.
- [2] Driscopipe 7000 was installed in 1974-1980. See Prepared Direct Testimony of Kevin Lang on behalf of Southwest Gas Corporation, submitted in Southwest Gas General Rate Case A.22-05-015, August 2019, https://docs.cpuc.ca.gov/PublishedDocs/SupDoc/A1908015/2695/338276400.pdf, p. 5.
- [3] Consistent definitions were used for Operating District in Gas System Census Tract Data, filed by gas utilities in response to *Administrative Law Judge's Ruling Seeking Data from Gas Utilities* in R.24-09-012, January 13, 14, and 17, 2024, posted on the CPUC's R.24-09-012 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking. See definitions in *Administrative Law Judge's Ruling Seeking Revised Data from Gas Utilities* in R.20-01-007, September 22, 2022, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/rulings/revisedgassystemdataruling09212022.pdf, also available on the CPUC's R.20-01-007 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.
- [4] PG&E's 18 Divisions have been reported as: Diablo, East Bay, Mission, Peninsula, De Anza, San Jose, San Francisco, Central Coast, Fresno, Kern, Stockton, Yosemite, North Bay, Sonoma, Humboldt, Northern Valley, Sacramento, and Sierra. For 14A and 14D distribution pipeline replacement contracts, these divisions are used as bid areas, while for some other contract types they may be combined into 8 larger bid areas.

- [5] SoCalGas' 50 districts have been reported as: Orange Coast Azusa, Anaheim, Alhambra, Aliso Viejo, Downey, Garden Grove, Industry, La Jolla, Pasadena, Santa Ana, Whittier (group 1); Inland Beaumont, Corona, Chino, Fontana, Murrieta, Ramona, Redlands, Rim Forest, Riverside, San Bernardino (group 2); Inland Desert Blythe, El Centro, Palm Desert, Yucca Valley (group 3); Lower Los Angeles 182nd, Belvedere, Crenshaw, Compton, Hollywood, Huntington Park, Juanita, Santa Monica, San Pedro (group 4); Upper Los Angeles/SFV Branford, Canoga Park, Chatsworth, Glendale, Lancaster, Mojave, Simi Valley, Saticoy, Valencia (group 5); Central Coast Goleta, Ventura/Oxnard, Santa Barbara, Santa Maria, San Luis Obispo, Templeton (group 6); and San Juaquin Valley Bakersfield, and Visalia (group 7). The groupings are used for some contract cost purposes.
- [6] SDG&E's five districts are Beach Cities, Eastern, Metro, North Coast, and Northeast.
- [7] Southwest Gas' seven districts are: District 11-Barstow; District 12-Victorville; District 13-Big Bear; District 14-North Lake Tahoe; District 15-Truckee; District 16-South Lake Tahoe; District 19-Needles.
- [8] Pressure districts are also discussed in *Recommendations for SB 1221 California Natural Gas System Mapping*, CPUC Energy Division Staff Proposal, February 20, 2025, https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897432.PDF, p. 15. For additional background on pressure zones, see DeWitte, Tom and Coolidge, Tom, *Understanding Pressure Zones*, April 2024, https://community.esri.com/t5/gas-and-pipeline-blog/understanding-pressure-zones/ba-p/1416830.
- [9] SoCalGas provided pressure district data including meters served and overlapping census tracts per ruling in proceeding R.20-01-007, now available as "demand nodes csv" and "May 20 demand nodes csv" on the "Long Term Gas Planning Rulemaking-Closed" webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking-closed.
- [10] Recommendations for SB 1221 California Natural Gas System Mapping, p. 15. See also Gas System Census Tract Data Notes, filed by PG&E in response to Administrative Law Judge's Ruling Seeking Data from Gas Utilities in R.24-09-012, January 13, 2024, https://www.cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/natural-gas/long-term-gas-planning-oir/pge/gassystemcensustractdatanotes_pgne.pdf, p. B-18, also posted on the CPUC's R.24-09-012 webpage, https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking.
- [11] Exclude HPR-type regulators from this analysis. "HPR-type" means reduces to pressure of 1 through 60 psig and is an "HPR-type" regulator station or a district served by such a station. "HPR-type" refers to a regulator station that uses any of the following spring-operated regulators: Fisher 621, Fisher 627, Fisher 630, Reliance Model HPR 10, Reliance Model HPR 20, Reliance Model HPR 268, Rockwell 141, Rockwell 141A, Rockwell 041, Sprague/Itron B35. HPR-type regulators are excluded because they are smaller and simpler than medium-pressure and low-pressure regulators. These definitions align with regulator station categories proposed in Appendix B *Direction to Utilities Draft for Comment*,

https://docs.cpuc.ca.gov/PublishedDocs/Efile/G000/M556/K897/556897318.PDF. Transmission-level regulator stations are not included.
