BEFORE THE PUBLIC UTILITIES COMMISSION OF THE

STATE OF CALIFORNIA

Order Instituting Rulemaking to Examine Electric Utility De-Energization of Power Lines in Dangerous Conditions	Rulemaking 18-12-005

SOUTHERN CALIFORNIA EDISON COMPANY'S (U 338-E) 2025 POST-SEASON REPORT

Pursuant to California Public Utilities Commission (Commission) Decisions (D.) 21-06-014, Ordering Paragraph 66, and D.21-06-034, Appendix A, Southern California Edison Company (SCE) hereby provides its 2025 PSPS Post-Season Report (Attachment 1 hereto). SCE also provides the following link to access and download the 2025 PSPS Post-Season Report and its appendices: https://on.sce.com/PSPSPostSeasonReporting.

Appendix B thereto will be filed via mixed media with the Commission's Docket Office.

Respectfully submitted,

JENNIFER SHIGEKAWA
WILLIAM W.YU

Attachment 1

SCE's 2025 PSPS Post-Season Report

Instructions

1. Requirements in italics apply to PG&E, SCE and SDG&E only.

2. Respond to all applicable questions in the template in a single document.

3. Response to each question should be no longer than two pages.

4. Follow the section heading and subheading organization used in the template in your response.

5. Submit your response in a Word and a PDF format. Both files should follow the file name convention and syntax below:

a. syntax: *<Utility Abbreviation>_ POSTSR1_<Submission Date>*

b. examples:

PGE_POSTSR1_3-1-2023
PacifiCorp_POSTSR1_3-1-2023
PGE_POSTSR1_CONF_3-1-2023
PacifiCorp_POSTSR1_CONF_3-1-2023

6. Responses must be filed to the service list of R.18-12-005 no later than March 1 of the current filing year.

7. File POSTSR 2, 3, and 4 as separate attachments. POSTSR 2, 3, and 4 must be filed even if there were no de-energizations or the IOU did not receive any complaints (mark N/A or none).

Section I. Background: Overarching Regulation

1. *Each electric investor-owned utility must file a comprehensive [prior year] Post-Season Report, no later than March 1 of each year, in R.18-12-005 or its successor proceeding. The report must follow a template provided by SED no later than 60 days after SED posts a [prior year] Post-Season Report template on the Commission's website. Parties may file comments on these reports within 20 days after they are filed, and reply comments within 10 days after the final date to file comments.*

[Authority: Decision (D.) 21-06-034; Guidelines at p. A15, Section K-3]

2. The [prior year] Post-Season Report must include, but will not be limited to:
f. Annual report, as applicable, required by Ordering Paragraph 66 of D.21-06-014.

[Authority: D.21-06-034; Guidelines at p. A15, Section K-3.f]

3. To the extent a required item of information is also required to be included in the electric investor-owned utility's Wildfire Mitigation Plan, the [prior year] Post-Season Report may refer

to the electric investor-owned utility's Wildfire Mitigation Plan rather than repeat the same information; such reference must specify, at minimum, the page and line number(s) for where the required information is contained within the electric investor-owned utility's Wildfire Mitigation Plan. In cases where this reference is to data, a summary table of the data shall be provided in the report.

[Authority: D.21-06-034; Guidelines at p. A17, Section K-3]

Section II: Amendments to Post-Event Reports

A. Regulatory Requirements

1. *Pacific Gas and Electric Company, Southern California Edison Company, and San Diego Gas & Electric Company must provide aggregate data, as identified above* [D.21-06-014, Ordering Paragraph (OP) 65]*, in an annual report, including aggregate data that may not have been available at the time the utility filed the 10-day post-event report and must contact the Commission's Safety and Enforcement Division if the utility requires additional guidance to ensure adequate reporting on the requirement to provide information on affected customers in the 10-day post-event reports.*

   [Authority: D.21-06-014; OPs 65 and 66]

2. *Pacific Gas and Electric Company (PG&E), Southern California Edison Company (SCE), and San Diego Gas & Electric Company (SDG&E) must address, among other things, each element of Resolution ESRB-8 reporting requirements, as clarified herein, in the 10-day post-event reports, including the below [OP 65] and, if no information is available, PG&E, SCE, and SDG&E must respond to these Resolution ESRB-8 reporting requirements by indicating the reason this information is not available.*

   [Authority: D.21-06-014; OPs 65 and 66]

B. Direction

1. *Provide any information missing [including, but not limited to the specific topics listed below] from any Post-Event Report for Public Safety Power Shutoffs (PSPS) filed in the previous year by:*

   a. *Identify the date and name of the PSPS.*
   b. *Identify the Section of the Post-Event Report template for which the missing information will be added.*
   c. *Provide the missing information under that heading.*

   [Authority: D.21-06-014; OPs 65 and 66]

Response: Subsequent to the filing of SCE's 2025 PSPS post-event reports, SCE conducted additional routine post-season validation and quality-control review of reported PSPS metrics included in its 2025 event reports. As a result of this review, SCE identified limited updates to previously reported 2025 PSPS

event data. Consistent with Ordering Paragraphs 65 and 66 of D.21-06-014, the updated information is marked in red in the tables below.

PSPS Event Summary Updates

For January 4, 2025 event updates, please see "2025.01.04-SCE PSPS Event Amendments" attachment.
For January 20, 2025 event updates, please see "2025.01.20-SCE PSPS Event Amendments" attachment.

Breakdown of Notification Failures			
Notifications sent to	**Notification Failure Description**	**Number of Entities or Customer Counts**	**Explanation**
Public Safety Partners excluding Critical Facilities and Infrastructure	Entities who did not receive 48-to 72-hour advance notification.	~~2~~ 3	missing authorized campaign - ~~2~~ 1 missing authorized campaign/message sent error - 1 notification missed due to emergent weather - 1
	Entities who did not receive 1–4-hour imminent notification.	~~2~~ 3	missing authorized campaign - 2 notification missed due to emergent weather - 1
	Entities who did not receive any notifications before de-energization.	~~2~~ 3	~~missing authorized campaign - 2~~ missing authorized campaign/message sent error - 1 notification missed due to emergent weather - 2
	Entities who were not notified immediately before re-energization.	~~0~~ 1	missing authorized campaign/message sent error - 1
	Entities who did not receive cancellation notification within two hours of the decision to cancel.	0	N/A
Critical Facilities and Infrastructure	Facilities who did not receive 48–72-hour advance notification.	40	missing authorized campaign - 37 campaign authorized less than 48 hours, successfully sent - 3
	Facilities who did not receive 1-4 hour of imminent notifications.	45	missing authorized campaign - 45
	Facilities who did not receive any notifications before de-energization.	22	missing authorized campaign - 22
	Facilities who were not notified at de-energization initiation.	5	missing authorized campaign - 5
	Facilities who were not notified immediately before re-energization.	3	missing authorized campaign - 2 campaign authorized after re-energization - 1
	Facilities who were not notified when re-energization is complete.	0	N/A

	Facilities who did not receive cancellation notification within two hours of the decision to cancel.	2	received de-en notifications, was not de-energized, missing authorized campaign - 2
All other affected customers	Customers who did not receive 24–48-hour advance notifications.	411	missing authorized campaign - 373 campaign authorized less than 24 hours, successfully sent - 1 no contact information / message send error - 37
	Customers who did not receive 1–4-hour imminent notifications.	654	missing authorized campaign - 622 no contact information / message send error - 32
	Customers who did not receive any notifications before de-energization.	64	no contact information / message send error - 37 missing authorized campaign - 27
	Customers who were not notified at de-energization initiation.	42	no contact information / message send error - 39 missing authorized campaign - 3
	Customers who were not notified immediately before re-energization.	44	no contact information / message send error - 36 missing authorized campaign - 4 campaign authorized after re-energization - 4
	Customers who were not notified when re-energization is complete.	38	no contact information / message send error - 35 missing authorized campaign - 3
	Customers who did not receive cancellation notification within two hours of the decision to cancel.	104	no contact information / message send error - 45 received de-en notifications, was not de-energized, missing authorized campaign - 8 missing authorized campaign - 51

Breakdown of Notification Failures			
Notifications sent to	**Notification Failure Description**	**Number of Entities or Customer Counts**	**Explanation**
Public Safety Partners excluding Critical Facilities and Infrastructure	Entities who did not receive 48-to 72-hour advance notification.	~~4~~ 5	~~campaign authorized less than 48 hours, successfully sent - 3~~ circuit added to event scope after notification window due to emergent weather, successfully sent - 4 ~~missing authorized campaign - 1~~ notification missed due to emergent weather - 1
	Entities who did not receive 1–4-hour imminent notification.	~~0~~ 1	missing authorized campaign - 1
	Entities who did not receive any notifications before de-energization.	0	N/A
	Entities who were not notified immediately before re-energization.	~~0~~ 1	missing authorized campaign - 1
	Entities who did not receive cancellation notification within two hours of the decision to cancel.	0	N/A
Critical Facilities and Infrastructure	Facilities who did not receive 48–72-hour advance notification.	29	campaign authorized less than 48 hours, successfully sent - 29
	Facilities who did not receive 1-4 hour of imminent notifications.	1	missing authorized campaign - 1
	Facilities who did not receive any notifications before de-energization.	0	N/A
	Facilities who were not notified at de-energization initiation.	0	N/A
	Facilities who were not notified immediately before re- energization.	0	N/A
	Facilities who were not notified when re-energization is complete.	0	N/A
	Facilities who did not receive cancellation notification within two hours of the decision to cancel.	0	N/A

All other affected customers	Customers who did not receive 24–48-hour advance notifications.	9	missing authorized campaign - 5 no contact information / message send error - 4
	Customers who did not receive 1–4-hour imminent notifications.	4	no contact information / message send error - 3 missing authorized campaign - 1
	Customers who did not receive any notifications before de-energization.	4	no contact information / message send error - 4
	Customers who were not notified at de-energization initiation.	4	no contact information / message send error - 4
	Customers who were not notified immediately before re-energization.	4	no contact information / message send error - 4
	Customers who were not notified when re-energization is complete.	2	no contact information / message send error - 2
	Customers who did not receive cancellation notification within two hours of the decision to cancel.	13	no contact information / message send error - 8 missing authorized campaign - 3 received deen notifications, was not deen, missing authorized campaign - 2

Table 12: July 15, 2025 Post-Event Report

Count and Nature of Complaints Received	
Nature of Complaints	**Number of Complaints**
PSPS Frequency/Duration Including, but not limited to complaints regarding the frequency and/or duration of PSPS events, Including delays in restoring power, scope of PSPS and dynamic of weather conditions.	3

Safety/Health Concern Including, but not limited to complaints regarding difficulties experienced by AFN/MBL populations, traffic accidents due to non-operating traffic lights, inability to get medical help, well water or access to clean water, inability to keep property cool/warm during outage raising health concern	1
Communications/Notifications Including, but not limited to complaints regarding lack of notice, excessive notices, confusing notice, false alarm notice, problems with getting up-to-date information, inaccurate information provided, not being able to get information in the prevalent languages and/or information accessibility, complaints about website, Public Safety Partner Portal, REST/DAM sites (as applicable)	2
Outreach/Assistance Including, but not limited to complaints regarding community resource centers, community crew vehicles, backup power, hotel vouchers, other assistance provided by utility to mitigate impact of PSPS	0
General PSPS Dissatisfaction/Other Including, but not limited to complaints about being without power during PSPS event and related hardships such as food loss, income loss, inability to work/attend school, plus any PSPS-related complaints that do not fall into any other category.	~~4~~ 5
Total	~~10~~ 11

Breakdown of Notification Failures			
Notifications sent to	**Notification Failure Description**	**Number of Entities or Customer Counts**	**Explanation**
Public Safety Partners excluding Critical Facilities and Infrastructure	Entities who did not receive 48-to 72-hour advance notification.	~~4~~ 3	missing authorized campaign – ~~4~~ 1 notification missed due to emergent weather - 2
	Entities who did not receive 1–4-hour imminent notification.	~~4~~ 3	missing authorized campaign – ~~4~~ 1 notification missed due to emergent weather - 2
	Entities who did not receive any notifications before de-energization.	~~4~~ 3	~~missing authorized campaign - 4~~ notification missed due to emergent weather - 3
	Entities who were not notified immediately before re-energization.	0	N/A
	Entities who did not receive cancellation notification within two hours of the decision to cancel.	0	N/A
Critical Facilities and Infrastructure	Facilities who did not receive 48–72-hour advance notification.	63	missing authorized campaign - 63
	Facilities who did not receive 1-4 hour of imminent notifications.	63	missing authorized campaign - 63
	Facilities who did not receive any notifications before de-energization.	63	missing authorized campaign - 63
	Facilities who were not notified at de-energization initiation.	0	N/A
	Facilities who were not notified immediately before re- energization.	0	N/A
	Facilities who were not notified when re-energization is complete.	0	N/A
	Facilities who did not receive cancellation notification within two hours of the decision to cancel.	0	N/A
All other affected customers	Customers who did not receive 24–48-hour advance notifications.	1149	missing authorized campaign - 1149
	Customers who did not receive 1–4-hour imminent notifications.	1149	missing authorized campaign - 1149

	Customers who did not receive any notifications before de-energization.	1149	missing authorized campaign - 1149
	Customers who were not notified at de-energization initiation.	3	no contact information / message send error - 2 missing authorized campaign - 1
	Customers who were not notified immediately before re-energization.	3	no contact information / message send error - 2 missing authorized campaign - 1
	Customers who were not notified when re-energization is complete.	3	no contact information / message send error - 2 missing authorized campaign - 1
	Customers who did not receive cancellation notification within two hours of the decision to cancel.	0	N/A

Table 9: October 28, 2025 Post-Event Report

Breakdown of Notification Failures			
Notifications sent to	**Notification Failure Description**	**Number of Entities or Customer Counts**	**Explanation**
Public Safety Partners excluding Critical Facilities and Infrastructure	Entities who did not receive 48-to 72-hour advance notification.	~~12~~ 13	~~missing authorized campaign - 1~~ notification missed due to emergent weather - 1 ~~campaign authorized less than 48 hours, successfully sent - 11~~ circuit added to event scope after notification window due to emergent weather, successfully sent - 12
	Entities who did not receive 1–4-hour imminent notification.	0	N/A
	Entities who did not receive any notifications before de-energization.	0	N/A
	Entities who were not notified immediately before re-energization.	0	N/A
	Entities who did not receive cancellation notification within two hours of the decision to cancel.	0	N/A
Critical Facilities and Infrastructure	Facilities who did not receive 48–72-hour advance notification.	132	missing authorized campaign - 47 campaign authorized less than 48 hours, successfully sent - 85
	Facilities who did not receive 1-4 hour of imminent notifications.	0	N/A
	Facilities who did not receive any notifications before de-energization.	0	N/A
	Facilities who were not notified at de-energization initiation.	0	N/A
	Facilities who were not notified immediately before re-energization.	0	N/A
	Facilities who were not notified when re-energization is complete.	0	N/A

	Facilities who did not receive cancellation notification within two hours of the decision to cancel.	0	N/A
All other affected customers	Customers who did not receive 24–48-hour advance notifications.	45	missing authorized campaign - 30 campaign authorized less than 24 hours, successfully sent - 11 no contact information / message send error - 4
	Customers who did not receive 1–4-hour imminent notifications.	25	missing authorized campaign - 21 no contact information / message send error - 4
	Customers who did not receive any notifications before de-energization.	25	missing authorized campaign - 21 no contact information / message send error - 4
	Customers who were not notified at de-energization initiation.	5	missing authorized campaign - 1 no contact information / message send error - 4
	Customers who were not notified immediately before re-energization.	9	missing authorized campaign - 1 no contact information / message send error - 8
	Customers who were not notified when re-energization is complete.	4	no contact information / message send error - 4
	Customers who did not receive cancellation notification within two hours of the decision to cancel.	57	no contact information / message send error - 42 received de-en notifications, was not de-en, missing authorized campaign - 1 missing authorized campaign - 14

Count and Nature of Complaints Received	
Nature of Complaints	**Number of Complaints**
PSPS Frequency/Duration Including, but not limited to complaints regarding the frequency and/or duration of PSPS events, Including delays in restoring power, scope of PSPS and dynamic of weather conditions.	~~60~~ 61
Safety/Health Concern Including, but not limited to complaints regarding difficulties experienced by AFN/MBL populations, traffic accidents due to non-operating traffic lights, inability to get medical help, well water or access to clean water, inability to keep property cool/warm during outage raising health concern	6
Communications/Notifications Including, but not limited to complaints regarding lack of notice, excessive notices, confusing notice, false alarm notice, problems with getting up-to-date information, inaccurate information provided, not being able to get information in the prevalent languages and/or information accessibility, complaints about website, Public Safety Partner Portal, REST/DAM sites (as applicable)	~~12~~ 10
Outreach/Assistance Including, but not limited to complaints regarding community resource centers, community crew vehicles, backup power, hotel vouchers, other assistance provided by utility to mitigate impact of PSPS	3
General PSPS Dissatisfaction/Other Including, but not limited to complaints about being without power during PSPS event and related hardships such as food loss, income loss, inability to work/attend school, plus any PSPS-related complaints that do not fall into any other category.	52
Total	~~133~~ 132

2. *Community Resource Centers:*

   Provide aggregate data, including aggregate data that may not have been available at the time the utility filed the 10-day post-event report:

   a. *Address and describe each Community Resource Center during a de-energization event.*

   [Authority: D.21-06-014, OPs 65 and 66]

Response: During 2025, and consistent with the annual aggregate reporting requirements in OPs 65 and 66, SCE activated Community Resource Centers (CRC) on 136 occasions, representing a cumulative total of 537 days of operation. Additionally, Community Crew Vehicles (CCVs) were deployed 10 times, providing services for a total of 24 days across multiple counties. It is important to note that only a

portion of the communities served by CRCs and CCVs experienced de-energization events. Regardless of energization status, all CRCs and CCVs consistently delivered an array of resources and services. Each location was staffed by SCE personnel who disseminated event-specific information, including details regarding SCE's resiliency programs, and assisted customers with updating contact information and enrolling in outage alert notifications. Furthermore, each CRC and CCV site provided bottled water, light snacks, ice vouchers, restroom facilities, charging stations for personal mobile or medical devices, and resiliency kits for customers.

Aggregated CRC and CCV data, including locations and services provided are presented in Attachment A.

3. *Notification:*

   Provide aggregate data that may not have been available at the time the utility filed the 10-day post-event report:

   a. *Identify who the utility contacted in the community prior to de-energization and whether the affected areas are classified as High Fire Threat District Tier 1, Tier 2, or Tier 3 (as defined in General Order 95, Rule 21.2-D22);*
   b. *Explain why notice could not be provided at least two hours prior to a de-energization, if such notice was not provided;*

   [Authority: D.21-06-014, OPs 65 and 66]

Response:

a. See Attachment A for aggregate data of who the utility contacted in the community prior to de-energization and whether the affected areas are classified as High Fire Threat District Tier 1, Tier 2, or Tier 3.

b. SCE's standard practice is to provide PSPS notifications in advance of a potential de-energization, including notifications approximately 48–72 hours, 24–48 hours, and 1–4 hours prior to a possible outage, when conditions allow. In 2025, there were instances in which earlier notification, including at least two hours in advance, was not feasible. These instances were driven by rapidly changing weather or wildfire conditions, late-developing circuit risk, or system and data limitations that constrained notification lead time. Such as when weather and wildfire conditions intensified faster than forecasted, bringing circuits into scope with little advance warning or when winds strengthened suddenly or fire risk increased more quickly than expected. In such circumstances, SCE de-energized facilities as necessary to mitigate immediate public safety risk.

   These rapid changes reduced the time available to send advance customer notifications.

   In addition, SCE was unable to successfully deliver notifications to certain customers where contact information was missing, outdated, or incomplete; where customers had opted out of specific communication channels; or where recent account changes, such as a recent move, limited data availability. These limitations are outside of SCE's direct control and are consistent with factors previously acknowledged by the Commission in PSPS reporting. In addition, system or data issues, such as brief outages, inconsistencies, or circuit-mapping errors, occasionally delayed notifications.

Throughout the 2025 season, SCE continued taking steps to improve notification performance. This included enhancing weather-forecasting tools, strengthening internal systems, and expanding efforts to verify and update customer contact information. SCE also conducts annual notification tests in High Fire Risk Areas and follows up on unsuccessful deliveries to improve accuracy. These efforts are ongoing as SCE works to provide timely and reliable PSPS notifications whenever conditions safely allowed.

4. *Restoration:*

   Provide aggregate data, as identified in OP 65, in an annual report, including aggregate data that may not have been available at the time the utility filed the 10-day post-event report:

   a. Provide a detailed description of the steps the utility used to restore power.

   [Authority: D.21-06-014, OPs 65 and 66]

Response: Table 1 below provides aggregate data on SCE's restoration times for 2025 PSPS de-energization events.

Table 1: Aggregate Restoration Times for 2025

PSPS Event Name	Date/Time of First Circuit Restoration (2400)	Date/Time of Last Circuit Restoration (2400)
PSPS Incident 01-03-2025	01/05/2025 12:01	02/06/2025 12:42
PSPS Incident 01-20-2025	01/20/2025 06:17	01/27/2025 02:34
PSPS Incident 06-10-2025	06/11/2025 09:20	06/22/2025 11:11
PSPS Incident 06-30-2025	07/01/2025 10:42	07/11/2025 09:28
PSPS Incident 07-15-2025	07/15/2025 08:09	07/15/2025 08:09
PSPS Incident 07-20-2025	07/24/2025 09:11	07/24/2025 09:11
PSPS Incident 08-01-2025	08/02/2025 04:28	08/08/2025 08:15
PSPS Incident 08-11-2025	08/11/2025 11:55	08/24/2025 09:52
PSPS Incident 09-02-2025	09/02/2025 07:00	09/10/2025 12:49
PSPS Incident 10-08-2025	10/12/2025 08:15	10/14/2025 09:20
PSPS Incident 10-28-2025	10/28/2025 04:45	10/29/2025 07:54
PSPS Incident 11-05-2025	11/05/2025 06:59	11/06/2025 09:17
PSPS Incident 11-09-2025	11/10/2025 12:20	11/10/2025 01:11

Restoration planning begins at the outset of each PSPS event, including prior to de-energization. If multiple circuits were de-energized, the restoration plans include prioritization for de-energized circuits (prioritization can include first off, critical facilities and infrastructure customers, medical baseline customers, etc.). The Period of Concern (POC) expires when fire scientists and meteorologists confirm that fire weather conditions have subsided. SCE's Incident Management Team (IMT) Incident Commander issues an All-Clear declaration authorizing restoration activities. Following the All-Clear declaration, field patrols are conducted of all impacted circuits and segments to confirm that restoration can safely proceed. In many cases, restoration begins within eight hours of the All-Clear declaration.

However, restoration timelines may be extended where daylight visual inspections, aerial patrols or wildfire related access constraints are required.

For multi-day events when there is a sufficient break in the weather and fuel conditions, field crews may attempt to temporarily restore customers if authorized by the Incident Commander, even if this requires a repeat de-energization later in the POC.

Section III: Decision-Specified

C. Education and Outreach

Include the results of the most recent education and outreach surveys not yet previously reported on, as an attachment to the Post-Season Report. See D.21-06-034, Sections E-1 for specific requirements on the surveys.

[Authority: D.21-06-034, Guidelines at p. A7, Section E-1]

Response: Final reports for SCE's 2025 residential and business Pre- and Post- Wildfire Season surveys are included in Appendix A. These include an assessment of SCE's performance "before, during, and after" wildfires from the residential and business customers' perspective.

As in the previous five years, SCE and the other IOUs administered a common core questionnaire in two phases – prior to and after the PSPS season. Additionally, each IOU added custom questions, if desired, and identified the prevalent languages in their service territory. In order to administer the surveys, each IOU developed its own sampling plan, using their research vendor to implement the surveys. SCE's 2025 Pre-Wildfire Season surveys were conducted between June 19, 2025, through August 8, 2025, and the Post-Wildfire Season survey was conducted from November 5, 2025, to January 10, 2026. Note that the Post-Wildfire Season survey includes questions from the Pre-Wildfire Season survey in order to directly measure the impact of SCE's education and outreach. The primary objective of the research is to measure the effectiveness of communications and outreach prior to and coincident with when wildfire activity was expected to be greatest.

SCE offered the survey to customers in English and the 19 prevalent languages in SCE's service territory. SCE's research design encompasses customers throughout its service territory. Special emphasis is placed on customers who reside in an HFRA to allow for greater focus and more detailed analysis, and to enable comparisons between HFRA and non-HFRA customers.

D. Medical Baseline and Access and Functional Needs

1. *Describe in detail all programs and/or types of assistance, including:*

    a. *Free and/or subsidized backup batteries*
    b. *Self-Generation Incentive Program Equity Resiliency Budget*
    c. *Community Microgrid Incentive Program [sic] ["Microgrid Incentive Program" per D.21-01-018]*
    d. *Hotel vouchers*

e. Transportation to CRCs
f. Any other applicable programs or pilots to support resiliency for persons with access and functional needs and vulnerable populations.

Identify and describe the costs and associated funding source(s) for all partnerships, each unique program and form of assistance (e.g., backup batteries as distinct from hotel vouchers), and any other efforts aimed at mitigating the impacts of public safety power shutoff events on persons with access and functional needs and vulnerable populations. Use the below table to provide this information.

Response: Data on each type of assistance provided in 2025 to support resiliency for customers with Access and Functional Needs (AFN) is in the table below.

Table 2: Medical Baseline and Access and Functional Needs Programs and/or Types of Assistance

Program	Cost[1]	Funding Source(s)	Program/Cost Description
Critical Care Battery Backup Program (CCBB)	$8.75M	GRC	The program offers fully subsidized backup batteries to MBL customers living in areas affected by PSPS events. These batteries are intended to support the operation of medical equipment during PSPS incidents or other types of emergencies.
In-Event Battery Loan	$0.201M	GRC	The pilot offers in-event support to qualified customers who request backup battery assistance during PSPS events.
Portable Power Station Rebates	$1.34M	GRC	SCE offers portable power station rebates for PSPS-affected customers. GRC-allocated costs of $.53M were exceeded by $.81M in actual costs due to the increased volume of participants resulting from then January wildfire and windstorm event.
Portable Generator Rebates	$0.94M	GRC	SCE offers generator rebates for PSPS-affected customers. GRC-allocated costs of $.79M were exceeded by $.15M in actual costs due to the increased volume of participants resulting from then January wildfire and windstorm event.
Temp Gen K-12 School Pilot	$0.75M	WMPMA	Pilot program to deploy backup generators to K-12 schools impacted by two or more PSPS de-energizations in 2024. Twelve (12) schools were identified, and SCE was able to mitigate exposure for two of the schools by switching load to other circuits. SCE deployed backup generators to 10 schools in 2025.

[1] Costs are 2025 total program spend.

Program	Cost[1]	Funding Source(s)	Program/Cost Description
Hotel Discount Program	N/A	N/A	SCE provides additional assistance to customers by encouraging local hotels to provide discounts to customers experiencing a PSPS or an extended outage. Customers can review a list of participating hotels listed on SCE's website and can interact directly with the hotel to book rooms at a discounted rate.
Disability Disaster Access and Resources (DDAR) Program[2]	$1.4M	WMPMA	The DDAR Program strengthens community resilience and preparedness before, during, and after PSPS events. DDAR centers actively participate in local community events, providing presentations and hands-on training to educate power dependent customers on PSPS preparedness and overall emergency readiness. Outside of PSPS events, DDAR outreach focuses on building or enhancing customer resiliency plans and enrolling eligible customers in programs such as Medical Baseline Allowance (MBL). Through these efforts, the program educated approximately 4,626 customers about MBL, assisted 320 customers with enrollment, and distributed 107 portable batteries. In addition, DDAR hosted 409 community outreach and education events, engaging more than 22,000 participants. During PSPS, DDAR centers conducted 4,409 customer check-in calls. The program provided 37 portable backup batteries, distributed 523 food gift cards and 76 gas/propane gift cards, coordinated accessible transportation services to hotels, and arranged 111 accessible hotel accommodations for customers impacted by PSPS.
211 Partnership (Transportation, hot meal delivery or shelf stable food, and/or shelter)	$2.1M	GRC	SCE coordinates with 211 to provide support services to customers with AFN during PSPS. Services available during PSPS include transportation assistance, temporary hotel accommodations, hot meal delivery, and provision of shelf stable food. In 2025, 211 delivered 1,309 meals, provided six transportation

[2] Consistent with the General Rate Case determination disallowing DDAR program costs, SCE terminated DDAR services immediately upon issuance of the decision. Given that SCE administered the program in good faith with the expectation of cost recovery, seeking recovery of these costs is both reasonable and prudent.

Program	Cost[1]	Funding Source(s)	Program/Cost Description
			rides, issued one fuel voucher, and facilitated 295 hotel night accommodations for customers impacted by PSPS. Outside of PSPS, 211 provides individualized emergency preparedness planning for individuals with AFN. In 2025, 211 screened 26,165 individuals for program interest and eligibility. These screening efforts resulted in 5,242 appointments for personalized emergency preparedness planning. 211 assesses PSPS related needs through multiple intake and outreach channels, including inbound calls and text messages, outbound communications, and in person engagement. These activities are conducted before, during, and after PSPS to identify and evaluate the needs of AFN households. The screening process also supports the identification of households that may require assistance with emergency preparedness or may benefit from Care Coordination services-related needs through multiple intake and outreach channels, including inbound calls and text messages, outbound communications, and in-person engagement. These activities are conducted before, during, and after PSPS to identify and evaluate the needs of AFN households. The screening process also supports the identification of households that may require assistance with emergency preparedness or may benefit from Care Coordination services. Care Coordination services are designed to support households by providing emergency safety planning assistance and increasing awareness of available programs, including utility sponsored initiatives and referrals to local community resources. During PSPS activations, 211 Care Coordinators conduct proactive outreach to individual customers to confirm needs and facilitate access to additional support, as appropriate.
Food Support	$0.1M	GRC	SCE partners with foodbanks to offer food support to individuals who have been de-energized by PSPS. In 2025, food banks distributed 4,054 food boxes or bags to individuals affected by PSPS.

Program	Cost[1]	Funding Source(s)	Program/Cost Description
Resiliency Item Distribution via CBO	$0.08M	GRC	This initiative leverages partnerships with Community-Based Organizations (CBOs) to proactively provide targeted resiliency items for customers with AFN including GO Bags for most vulnerable customers with AFN. SCE utilizes partnerships with trusted local entities and community-based organizations, such as Regional Centers and Independent Living Centers, to distribute emergency resources to the most vulnerable customers, including seniors and individuals with disabilities. In 2025, SCE distributed 150 lanterns capable of charging small devices like cellphones, tablets, or communication devices, and 750 emergency go backpacks. Additionally, SCE supplemented customers affected by the PSPS events in January with 27 batteries.
Community Resource Center (CRC) Program	$0.950K	GRC	Brick and mortar locations that provide snacks, water, resiliency kits, medical thermal bags, charging capabilities, restrooms, program information, and customer representatives to answer customer questions. In 2025, SCE received 17,650 customer visits at CRC locations and distributed over 17k resiliency kits. Overall satisfaction with CRC's was 74%.
Self-Generation Incentive Program	$3.34M	GRC	SGIP provides eligible customers with financial incentives for the installation of new qualifying technologies installed to meet all, or a portion of, the electric energy needs of a facility. To help address the need for resiliency and better prepare our customers for outages and PSPS, SGIP offers incentives for the installation of self-generating energy storage systems designed to offset the customer's energy use and work as backup battery to provide power when an outage occurs. The incentives for resiliency qualified projects cover close to 100% of residential and roughly 85% of non-residential battery cost. 2025: Over 2,880 new applications; $1.69M incentives paid; $35M waitlisted.

Program	Cost[1]	Funding Source(s)	Program/Cost Description
Resiliency Zones	$0.148 M	GRC	SCE identified eight Resiliency Zones: Acton, Agua Dulce, Cabazon, Idyllwild, Bridgeport/Lee Vining, Mammoth Lakes, and Tehachapi. SCE developed an initiative to support community resilience in these areas by funding the installation of switching equipment to enable the use of backup generators at customer sites that provide essential services, including fuel stations (gas and diesel), small grocery stores (mini marts), pharmacies, and similar critical community resources. SCE worked in coordination with community partners to identify eligible sites within the designated Resiliency Zones for participation in the pilot program. As part of the pilot deployment, SCE installed backup generator infrastructure at a total of eight sites: three sites in Agua Dulce, and one site each in Cabazon, Bridgeport, Lee Vining, Mammoth Lakes, and Tehachapi.
Microgrid Incentive Program	N/A	N/A	No PSPS-related applications have been submitted under the Microgrid Incentive Program during 2025. Accordingly, there is no PSPS specific AFN customer data to report for this program for the reporting period. Currently, no further funding is anticipated. More information is available at https://www.sce.com/MIP.

1. *Funding source(s) shall specify applicable utility balancing accounts or other accounting mechanisms, and non-utility funding sources, if applicable.*

   Identify any communities or areas not served by utility partnerships with CBOs that provide assistance to persons with access and functional needs or vulnerable populations in preparation for or during a public safety partners event;

   [Authority: D.21-06-034, Guidelines at p. A16, Sections K-3.d]

Response: In accordance with D.21-06-034, SCE, along with SDG&E and PG&E, used the Federal Emergency Management Agency's (FEMA) Six-Step Planning Process to formulate

each IOU's respective AFN Plan for PSPS Support (2026 AFN PSPS Plan[3]). Adhering to the FEMA Six-Step Planning Process, SCE engaged with external stakeholders from the Statewide Joint IOU AFN Advisory Council to identify any potential service gaps.

SCE did not identify any gaps in services for assisting customers with AFN in 2025. CBOs played a vital role in supporting communities before, during, and after this year's wildfire events by delivering timely education, in-language assistance, and localized resource coordination for customers with AFN and other vulnerable populations. Drawing from information shared at SCE's wildfire community meetings and adapting to the discontinuation of the DDAR program, CBOs reinforced key safety and preparedness messages through their own outreach efforts, ensuring consistent and equitable support across SCE's service area.

E. Mitigation

1. *For each proactive de-energization event that occurred during the prior calendar year:*

   a. *i. Circuit-by-circuit analysis of mitigation provided from backup power and microgrid pilots.*

   [Authority: D.21-06-034, Guidelines at p. A15, Section K-3.a.i.]

Response: SCE used backup generation across a variety of use cases.

During the 2025 PSPS season, SCE provided backup generation as a targeted mitigation measure in specific, limited instances. SCE deployed 10 temporary mobile generators for 10 K-12 public schools during the 2025 PSPS season. These generators were installed in the September-August timeframe and removed once SCE determined additional PSPS events were unlikely. Additionally, SCE deployed 21 generators during PSPS activations to Resiliency Zones (RZs), a private residence, and to SCE facilities vital to restoration efforts.

These deployments supported critical community locations, selected RZs, and individual customers with life-sustaining needs, as identified through PSPS coordination processes. Backup generation deployments are summarized in the tables below and were not intended as a substitute for PSPS decision-making.

Microgrids were not utilized as a mitigation strategy for any PSPS events during the reporting period, and no microgrid resources were deployed or activated in support of PSPS operations.

Table 3: Generators Deployed to Schools During 2025 PSPS Events

School name	Circuit	Install Date	Remove Date	Mitigation
Round Valley Elementary	BIRCHIM	10.10.25	01.26.26	Diesel generator/automatic transfer switch

10.28.2025 PSPS Incident	Acton Community Center	Pick	Diesel generator/manual transfer switch

F. Public Safety Partners

1. *Identification of all requests for selective re-energization made by public safety partners during a de-energization event, whether each such request was granted or denied, and the reason for granting or denying each such request.*

   [Authority: D.21-06-034, Guidelines at p. A16, Section K-3.c.]

Response: SCE did not receive requests for selective re-energization by public safety partners during de-energization events in 2025.

G. Transmission

2. *Description of the impact of de-energization on transmission.*

Response: During PSPS events, SCE may proactively de-energize transmission-level circuits based on real-time weather, fire risk, and field conditions. In some cases, circuits may be de-energized even if they do not formally meet PSPS de-energization criteria, where conditions indicate an elevated wildfire or public-safety risk, regardless of voltage class. Additionally, SCE's grid is operated to withstand next-contingency (N-1) and some multiple-contingency (N-2) conditions on an on-going basis. If/when transmission line(s) are de-energized for PSPS, further system adjustments will be performed to

maintain a reliable state; however, based on the grid conditions at the time of the PSPS event, and the number of transmission lines de-energized for PSPS, there can be instances where voltage collapse, thermal and/or voltage violations, or firm load shed may be required. SCE performs transmission risk and reliability analyses to identify potential impacts to the broader transmission system, including risks to customer load or generation assets. If risks are identified, mitigation actions are coordinated with the California ISO (CAISO) and, when applicable, neighboring utilities to ensure system reliability and public safety.

3. *Evaluation of how to mitigate and prepare for those impacts in future potential de-energization events.*

Response: SCE begins its evaluation of bulk transmission lines that are identified in-scope for an upcoming PSPS event upon the sooner of 4-7 days-prior to the event, or immediately after weather modeling determines that these lines could be impacted. Transmission lines come into scope when forecasted windspeeds and Fire Potential Index (FPI) exceed PSPS thresholds. Additionally, SCE takes circuit health, environmental, and event-specific conditions into account to determine the likelihood of de-energization. The PSPS Operations group then develops a Study Plan that specifies various scenarios of identified transmission line(s) in-scope and sends this over to SCE's Grid Control Center (GCC) real-time and support personnel for evaluation. For example, those transmission lines with the highest forecasted windspeeds and highest forecasted FPI would be grouped into one scenario, while others that traverse a common corridor in the same county may be grouped into another scenario. After defining these scenarios, SCE determines what transmission equipment outages are planned and on-going during the PSPS event. SCE then performs contingency analysis based on forecasted load conditions during the PSPS event with the planned transmission equipment outages and transmission line de-energization scenarios to determine potential impacts. If potential impacts can be mitigated by rescheduling planned transmission equipment outage(s), then those will be evaluated for reschedule potential. Once rescheduling of planned transmission outages are determined, SCE then performs contingency analysis again to evaluate any potential unmitigated impacts. The GCC real-time and support personnel then communicates any potential thermal and voltage violations and discusses mitigating action plans with the PSPS Operations group, as well as with the CAISO. Mitigating actions will then be discussed among PSPS Operations, GCC, and CAISO—and implemented prior to the start of the PSPS event, when required.

4. *Identify and describe all studies that are part of such analysis and evaluation.*

Response: PSPS load flow studies are performed with off-line (GE PSLF) and/or real-time (GE X/A-21 State Estimator) study tools. Typically, GCC real-time and support personnel use the X/A-21 State Estimator (SE) and Real-Time Contingency Analysis (RTCA) tools to perform studies pre- and during-event. The SE and RTCA tools take a snapshot of the grid topology and then modifies the status of equipment to model planned outages, load and generation adjustments, as well as intertie flow adjustments. Additionally, these tools are used to extract data (using a data historian) to trend all necessary real-time data points including load, MW/MVAR flows, voltages, CB status, etc., in order to accurately simulate scenarios for the PSPS event. Once all necessary modeling and adjustments have

been made, the RTCA automated function is enabled to perform all selected contingencies. Once all scenarios have been simulated, all thermal and voltage violations are evaluated. In instances where bulk transmission intertie lines are in-scope for PSPS, GCC real-time and support personnel may use the GE PSLF off-line study tool to perform contingency analysis and transient stability studies, when required. After all study scenarios are performed, GCC real-time and support personnel summarize those violations that are not automatically mitigated for (via Remedial Action Schemes, etc.), and shares the results and recommendations (i.e., mitigations) with PSPS Operations and CAISO, when applicable.

5. *Identify all efforts to work with publicly owned utilities and cooperatives to evaluate the impacts of de-energization on transmission.*

   [Authority: D.21-06-034, Guidelines at pp. A15-A16, Section K-3.b.]

Response: PSPS Operations will advise potentially impacted neighboring entities, up to seven days in advance of an event, depending on the confidence level of the forecast. Leading to the PSPS event, PSPS Operations will communicate to SCE's Outage Coordination group within the GCC any "high likelihood" of de-energizing based on forecast windspeeds at/near wind speed thresholds of those transmission lines. The Outage Coordination group will in turn submit this information as potential PSPS transmission outages to the CAISO and any publicly owned utilities and cooperatives, typically three days in advance of the PSPS event for their awareness and to plan for mitigating actions. The GCC will also schedule a call with the CAISO and PSPS Operations to ensure all outage submittals have been received, and mitigations will be in place prior to the start of the event, when required.

Section IV: Safety and Enforcement Division-Specified

Response no longer than two pages.

1. *Discuss how your PSPS meteorology and fire science predictive models performed in the prior year. What changes were made to the models in the prior year? What are the planned modeling improvement efforts?*

Response: No changes were made operationally to any of the models associated with Fire Sciences, but a new FPI has been developed to help improve estimations of daily fire potential. These improvements were extensive, addressing limitations in the current modeling such as the assessment of fuel conditions and the inability to capture extreme wind events.

SCE plans to implement the new FPI by the middle part of this year. As a result, this new metric will be used operationally for PSPS, replacing the current methods and criteria for scoping PSPS events.

Performance of the meteorology predictive models across all PSPS activations in 2025 is provided in Table 5. Statistics are provided for the 0-24 hour, 24-48 hour, and 48-72 hour lead times in advance of the start of a Period of Concern (e.g. expected time of possible de-energization). As models are updated at most twice per day, statistics specific to the 1-4 hour window are not available and are included within the 0-24 hour analysis when the start of a Period of Concern is less than 4 hours after the publishing of a new weather forecast. Performance across all days of the year (PSPS activation and non-

PSPS activations inclusive) is provided in Table 6. Meteorology predictive models did not undergo any substantial changes in 2025; however, SCE did expand and retrain its machine learning forecast systems in alignment with its Wildfire Mitigation Plan goals. In 2026, SCE will continue to retrain and expand its machine learning forecast system through planned model system updates with its modeling vendor. SCE is also replacing its aging high-performance computing system, which will allow it to extend its 1-km ensemble and 1-km ensemble-based machine learning systems to a longer forecast horizon, giving additional lead-time for these more accurate model systems. SCE will also sunset its deterministic and 2-km ensemble systems, focusing future improvement efforts on its 1-km and machine learning systems.

Table 5: Forecast verification statistics for meteorology predictive models for PSPS events occurring in 2025. Bias is defined as Forecasts – Observations. Statistics are derived for a particular predictive model source only on circuits forecast to exceed PSPS activation conditions by that particular model source. Therefore, sample sizes vary by model source since each model will predict different numbers of circuits impacted. Time horizon calculated from start of forecasted POC.

2. *What were the challenges in quantifying risks and benefits in terms of determining the scope (size and duration) of the PSPS you conducted?*

Response: The main challenge SCE experienced in 2025 was the timely availability of FireRisk model information for circuits that were not originally forecast in scope for potential de-energization. These circuits were brought into scope based on emergent weather conditions. While FireRisk modeling inputs are normally based on information provided as part of SCE's initial PSPS forecast, SCE does retain capability to perform a risk benefit analysis for most emergent conditions based on FireRisk model info for circuits within High Fire Threat Districts (HFTD). However, circuits that are not originally identified in

scope for a PSPS event and not included in the FireRisk Model inputs cannot be assessed. SCE continues to refine and update its forecast modeling, which continues to further improve forecasting for PSPS event scope to address this challenge.

3. *Explain mitigations conducted for each PSPS event in the year, including but not limited to circuit switching, sectionalization, and microgrid activations.*

Response: SCE interprets this question as referring to the strategies SCE employs to mitigate customer de-energization during a PSPS event. During 2025 PSPS events, SCE implemented a layered suite of mitigation measures immediately before and during each event to reduce customer impacts while maintaining public safety. Prior to forecasted PSPS conditions, SCE conducted pre-event operational reviews to identify opportunities for circuit switching and load transfers, where feasible, to move customers from potentially impacted circuits to adjacent non-impacted circuits, including non-HFRA circuits when system conditions and topology allowed. These actions were supported by engineering assessments, system capacity evaluations, and input from frontline field resources with localized knowledge of circuit configurations. Pre-event mitigations were further enabled by preseason grid-hardening activities, including the installation of covered conductor on targeted segments and the installation of sectionalizing devices intended to support more granular isolation of high-risk areas. During PSPS events, SCE employed circuit switching and sectionalization strategies, where conditions permitted, to isolate only those circuit segments exposed to elevated wildfire risk, thereby minimizing outage footprints and duration. Operational decisions during events were informed by real-time system and weather data, as well as field observations from frontline crews regarding wind exposure, terrain effects, vegetation conditions, and the potential for airborne debris. In addition, mobile generation assets were available and deployed where appropriate to support service to critical facilities and assist in mitigating customer impacts, consistent with operational readiness and site-specific conditions.

Microgrids were not utilized as a mitigation strategy for any PSPS events during the reporting period, and no microgrid resources were deployed or activated in support of PSPS operations. At this time, SCE has not implemented microgrids as PSPS mitigation due to foundational gaps that must be addressed to ensure their safe, reliable, and cost-effective use within PSPS operations.

Collectively, these pre-event and during-event mitigation measures reduced customer impacts while ensuring PSPS execution remained aligned with wildfire risk conditions and public safety objectives.

4. *Explain how you fully incorporated public safety partners in your exercise planning. How many were invited to, and attended each planning meeting? Describe your communication efforts-dates and methods-to solicit participation.*

Response: SCE actively promotes and encourages participation from public safety partners in PSPS readiness activities through recurring PSPS Working Group sessions and workshops with local, state, tribal governments, and critical infrastructure providers. These forums serve as collaborative platforms for sharing information, gathering input, and aligning exercise objectives with stakeholder priorities.

In 2025, SCE conducted both Tabletop and Functional PSPS exercises. Details regarding exercise dates, participant counts, and participating entities are documented in SCE's 2025 Pre-Season Report (Appendix F, Tabs 8 and 9). Invitations to observe or participate in these exercises were extended to more than 6,200 public safety partner representatives across the service territory, including critical infrastructure operators, tribal nations, and first responder agencies.

To fully incorporate public safety partners in exercise planning, SCE solicited input during the design and development phases through multiple communication methods, including email invitations, calendar holds, and follow-up calls. Planning meetings were scheduled well in advance, and partners were encouraged to provide feedback on objectives, scenarios, and injects. Their recommendations and lessons learned from real-world events were integrated into the exercise design to the extent feasible within established parameters. This collaborative approach ensured that public safety partners were not only invited but meaningfully engaged throughout the planning process.

5. *Recap the lessons learned from all of your de-energization exercises, the resulting action items, their implementation, and observed consequences.*

Response:

Table 7: 2025 Lessons Learned

LESSONS LEARNED	Resulting Action	Implementation	Observed Consequence
The exercise scenario was specifically designed to test interoperability between an ES IMT activated to respond to a wildfire and a PSPS IMT. In most instances, the PSPS IMT operates independently and rarely with concurrent IMT activations. During the exercise, evaluators observed that some positions (OSC, PSC & IC) could have benefitted from additional cross team coordination and collaboration with the ES IMT.	During events with multiple IMT's activated, the PSPS Planning Section should assign representatives from Ops, Planning, Customer Care and Incident Command to attend daily Incident Action Planning Meetings to ensure integration across IMTs. Depending on complexity, iBRDM should consider activating an IST IC.	Q3 2025	Limited cross-team coordination between the PSPS IMT and ES IMT during concurrent activations resulted in missed opportunities for collaboration among key positions (OSC, PSC, and IC), potentially impacting operational efficiency.
Some surge team members demonstrated the need for additional training and hands-on experience with core PSPS applications, such as Customer Data Platform (CDP) and iPEMS. To mitigate this, the dedicated IMT provides hands-on guidance during events, ensuring	Provide surge team members with additional opportunities for hands-on experience via shadow opportunities during real-world events. Consider enhancements to CDP & iPEMS training modules in annual refresher training. Add specific objectives to	Q3 2025	Surge team members exhibited knowledge gaps in core PSPS applications (CDP and iPEMS), which could hinder operational efficiency without additional training and hands-on experience.

LESSONS LEARNED	Resulting Action	Implementation	Observed Consequence
smooth operations and reducing the impact of any knowledge gaps. However, it would still be beneficial to provide additional training and user groups for the surge team members to further enhance their skills and confidence.	evaluate system proficiency in future exercises.		
For the Functional Exercise, Player Briefing at start of day one was rushed and may not have provided enough detail for players and external observers to start exercise smoothly. External Briefing wasn't sufficiently planned ahead of time and was executed at the last minute.	Ensure roles and responsibilities of Players, Controllers, Evaluators and External Observers are clearly defined and understood. Provide guides and agenda ahead of time to observers, so they are aware of what elements of play are accessible, how to access, and the timeline of exercise play and key exercise elements. Ensure External Observer Briefing is planned out ahead of exercise and conducted to ensure external observers are led through the exercise layout and can observe play effectively.	Q3 2025	Rushed and insufficiently planned player and external briefings at the start of day one led to unclear expectations and a less smooth exercise launch.

6. *Discuss how you fully implemented the whole community approach into your de-energization exercises.*

Response: SCE fully implemented the Whole Community approach in its de-energization exercises by actively engaging a broad spectrum of stakeholders representing diverse community needs and critical functions. This included local, state, and tribal governments; first responder agencies; critical infrastructure providers; and organizations serving populations with AFN. Invitations were extended to almost 3,500 public safety partners across the service territory, ensuring representation from jurisdictions, tribal nations, and essential service providers.

Exercise design incorporated input from these stakeholders through PSPS Working Group sessions, planning meetings, and direct outreach. Scenarios were developed to reflect real-world conditions and interdependencies, emphasizing impacts on critical lifelines such as communications, transportation, healthcare, and water systems. Feedback from previous events and partner recommendations were integrated into objectives and injects to ensure exercises addressed community-wide considerations.

By fostering collaboration across sectors and incorporating lessons learned from diverse partners, SCE ensured that its PSPS exercises reflected the Whole Community approach—prioritizing inclusivity, shared situational awareness, and coordinated response strategies to minimize impacts on all populations during de-energization events.

7. *Discuss the complaints you received (as documented in POSTSR4) and any lessons learned and implementation of changed business practices.*

Response: In 2025, SCE received a total of 9,947 PSPS complaints, 87% of which were in response to the January 3 and January 20 PSPS events. Of the complaints received, approximately 79% were related to General PSPS Dissatisfaction (41%) and PSPS Frequency/Duration (38%).

SCE noted that most complaints were primarily expressions of frustration and did not require action. However, all concerns deemed actionable were immediately escalated to the appropriate teams or referred to community partners such as 211 for timely resolution.

During the review of PSPS complaints, SCE observed that customers often confused PSPS events with repair and maintenance outage activity. To address this, SCE has revised its quality control process for PSPS complaints beginning with the July 15 event. The updated procedure involves validating PSPS complaints against circuits identified as within scope during the relevant PSPS event period, rather than relying solely on the specifics of each complaint. This updated process has resulted in a 27% improvement in the identification of PSPS complaints.

8. *How did your PSPS notifications, to both customers and public safety partners/local governments, perform over the year? What changes will you make to improve performance?*

Response: Throughout 2025, SCE continued to improve the performance of PSPS notifications to customers and to public safety partners, including local and tribal governments. Notifications were delivered before, during, and after each PSPS event in accordance with the approved notification process, and SCE worked closely with jurisdictions to help ensure timely and accurate information as conditions evolved.

Over the year, SCE observed improvements in overall notification performance. Missed notifications caused by system or data related issues decreased as SCE strengthened internal processes, improved data synchronization, and implemented enhancements to the CDP. Upgrades made to CDP in 2025 helped improve contact matching and message targeting, leading to more consistent delivery for both customers and public safety partners.

Looking ahead, SCE is planning additional improvements in 2026 to further support reliable and timely PSPS notifications. These enhancements include continued upgrades to the CDP to strengthen data validation and improve notification delivery speed and accuracy. SCE will also expand efforts to automatically enroll customers in emergency notifications, correct invalid or outdated customer contact information, and reduce unintended opt outs. As part of ongoing preparedness efforts, SCE will conduct one additional notification test prior to the start of the fire season. This test supplements the annual High Fire Risk Area notification test and will help ensure contact information is accurate and that notification systems are performing as expected. If additional circuits are added to the PSPS scope during an event, SCE will also add the corresponding local, tribal, and public safety jurisdictions to the notification distribution lists so they remain informed throughout the event. SCE remains committed to strengthening communication with customers and public safety partners and will continue investing in system, process, and data improvements to enhance PSPS notification performance in 2026 and beyond.

9. *Describe feedback received from CBOs and customers on CRC performance last year. How was the feedback collected and how is feedback being incorporated into future CRC plans?*

Response: Each year, SCE sends a survey to CBOs via email and emails a post-event survey to customers who shared their email address at a CRC or CCV during a PSPS event. SCE reviews all feedback and, when appropriate, uses it to make improvements to the CRC plan for the following year.

Below are SCE's CRC survey results from 2025.

2025 CRC Survey Results

- *Customer Satisfaction Score = 74%*
- *Customers found resiliency kits useful = 86%*

The table below provides survey topics, feedback collected, and support and resources to help mitigate the impacts of PSPS.

Table 8: CRC Customer Survey Response:

Topic	Feedback	Mitigation
Communication Improvements	Provide advance notice before shutoffs (4–10 minutes minimum, ideally hours).	SCE provides Imminent Notifications to Public Safety Partners and Customers when weather conditions are near threshold for de-energization. These are designed to occur approximately 1-4 hours before the de-energization and are based on live weather readings. Due to the dynamic changes that can occur during weather events, SCE makes every attempt to provide this notification, but in some rare cases, is unable to provide this notification when thresholds are reached quickly and there is an immediate risk to infrastructure and public safety that requires pro-active de-energization.

Topic	Feedback	Mitigation
	Send accurate and frequent updates during outages, including realistic restoration timelines.	Restoration activities are generally based on diminishing weather conditions and resource availability for patrol and inspection. Restoration times are severely impacted by night conditions, air operations, and crew safety. SCE currently provides restoration times as a range to consider the end of the weather conditions and the time required for patrol, inspection, and repair. This range is communicated up to 8 hours after weather conditions subside. Restoration may be delayed due to damage or repair of infrastructure following weather events, and the range provided in SCE's communications is in place to account for this variance.
	Explain PSPS criteria clearly (wind speed, humidity, fire risk) and why specific areas are impacted.	SCE has a comprehensive outline of the criteria and decision-making process for PSPS events available on SCE.com. Details are also provided via marketing collateral throughout the year, and through education and outreach efforts with CBOs. Please visit https://www.sce.com/outages-safety for more detail.
	Limit alerts reasonable hours and avoid overwhelming customers with inaccurate messages.	For PSPS, update notifications are typically sent between the hours of 7am - 10pm during normal communications. During an emergency, notifications are not subject to restrictive hours and are disseminated based on real-time conditions that present risk to customers. These real-time notifications should not be limited to restrictive hours.
	Improve website accuracy and outage map functionality.	In 2025, SCE introduced a range of improvements to SCE.com to improve customer experience. These enhancements include the reduction of outage boundaries to more accurately reflect affected areas, the addition of a 'pre-restore' outage status to notify customers when restoration activities commence, and the inclusion of de-energization times for outages to provide improved event information. Furthermore, SCE has updated event information cards on SCE.com and anticipates that these visual improvements will further enhance customer experience.
Community Resource Centers	Stock adequate supplies (water, ice, firewood, charging stations).	During a PSPS event, SCE deploys CRCs at brick-and-mortar locations and CCVs in areas without a physical CRC. These sites provide water,

Topic	Feedback	Mitigation
	Offer hot meals, coffee, and seating areas for comfort during outages.	light snacks, small-device charging, and medical equipment charging for individuals with AFN. CRCs may also offer flashlights, firewood, blankets, and other resources depending on weather and location. SCE is also partnered with food banks to support customers impacted by PSPS.
	Provide more charging ports and tables for extended stays.	
	Ensure staff are knowledgeable about programs and outage details.	
Support for Vulnerable Customers	Supply generators or rebates for homes on wells and medically dependent customers.	SCE offers a robust portfolio of programs that provides eligible customers with free portable back up batteries, rebates to purchase portable batteries and portable generators, as well as several other resources such as transportation, food support, and discounted hotel accommodation to support customers impacted by PSPS. Please visit https://www.sce.com/outages-safety for more detail.
	Offer valid fuel vouchers for generators and dry ice for food preservation.	
	Provide food vouchers or grocery gift cards for those who lose perishable items.	
Infrastructure and Policy Changes	Bury power lines or install better cut-off switches to reduce PSPS frequency.	SCE is committed to the customers and the communities we serve. Through our wildfire mitigation plan, we are strengthening the grid by replacing bare wire with covered conductor and undergrounding in high fire risk areas to lower wildfire risk. Visit www.sce.com/gridhardening to learn more about SCE's wildfire mitigation progress.
	Limit outage duration and consider turning power on briefly for basic needs (e.g., a few hours daily).	
	Accelerate grid hardening and improve fire risk algorithms.	
Transparency and Fairness	Explain why some neighborhoods experience repeated outages while others do not.	SCE provides detailed information on SCE.com regarding PSPS. Customers can review common questions about PSPS, including why some neighborhoods experience repeated outages while others do not. Please visit https://www.sce.com/outages-safety/outage-preparedness/outage-types/public-safety-power-shutoff-psps/psps-faqs for more detail.
	Provide clear reimbursement processes for food loss.	SCE provides a detailed overview of the claims policy and process at https://sce.com/claims. Customers can review claims coverage, documentation requirements, and submittal instructions necessary to submit a claim.

Topic	Feedback	Mitigation
	Communicate long-term plans to reduce PSPS reliance.	SCE communicates its long term PSPS reduction strategy through formal regulatory filings (WMPs, PSPS Action Plans), progress and compliance reports, dedicated wildfire safety portals, newsletters, and public facing storytelling channels. Across all these platforms, SCE provides transparent updates on multi-year infrastructure projects and technology improvements designed to minimize the need for PSPS as the system becomes more resilient.

The table below contains the topics collected from CBO Survey responses.

Table 9: CBO CRC Survey Response:

Survey Response	Mitigation
Portable generators for those who have health problems and need electricity. Also Switch over generators that will enable much of downtown to continue with the business. It can help support residence and property owners alike. Flashlights and batteries, solar panels for communication in long term with no power.	SCE provides backup power options for customers who rely on electricity, such as free portable batteries, rebates for generators and power stations, and battery loans during outages. During PSPS, SCE provides support to impacted communities by deploying CRCs to provide water, light snacks, small-device charging, and medical equipment charging for individuals with AFN. CRCs may also offer flashlights, firewood, blankets, and other resources depending on weather and location. In rural areas, SCE partners with locations that are essential within the community to provide generators, ensuring impacted communities have access to resources during PSPS. Learn more at https://www.sce.com/outages-safety.
Do you have an easier to read pamphlet for when we have vendors booths. possible a list of numbers to call so our elderly or disabled patrons don't need to read so many words to find what they are looking for	SCE will evaluate opportunities to create or further streamline quick reference pamphlets consistent with SCE's ongoing efforts to improve accessibility and customer experience across all PSPS communications. In addition, SCE will develop a standardized marketing toolkit for CBOs to support consistent, accessible distribution of preparedness information across community events and engagements. 211 is available to customers who may require more personalized assistance, providing one-on-one phone support, resource navigation, and emergency preparedness guidance delivered by trained specialists. To learn more about 211, visit https://www.sce.com/outages-safety/wildfire-safety/access-functional-needs.

Survey Response	Mitigation
I think having the information available and sending notifications to the affected community as well as providing specific addresses of where to find those resources is very important. I also think having extra solar batteries as backup can be very beneficial. That is if something that you might be proving already, but I don't know if your power bank in thar kit is also solar.	SCE communicates Public Safety Power Shutoff (PSPS) notifications through various channels up to 72 hours in advance. These notifications inform customers of potential outages and provide links to support services and additional resources. For details about PSPS and to sign up for notifications, visit sce.com/psps and choose your preferred contact method. To check outage maps, tips, and resources, go to sce.com/outagemap. During PSPS events, customers can see outage information, CRCs, and available hotel discounts at sce.com/outagemap. Additionally, SCE provides backup power options for customers who rely on electricity, such as free portable batteries, rebates for generators and power stations, and battery loans during outages. Learn more at sce.com/outages-safety.
Many residents aren't aware of SCE's resources during planned outages. To improve outreach, you might: * Send a mailer detailing the available kits, with clear links or instructions for ordering. * Distribute refrigerator magnets printed with key emergency phone numbers. * Partner with local Chambers of Commerce in fire-prone areas, their mailing lists can help you reach homeowners and businesses quickly. I live in Agoura Hills, where power shuts off regularly, and we've been evacuated twice due to wildfires. I know firsthand how vital these kits and reminders can be.	SCE will evaluate opportunities to improve outreach, and to create or further streamline quick reference pamphlets consistent with SCE's ongoing efforts to improve accessibility and customer experience across all PSPS communications. In addition, SCE will develop a standardized marketing toolkit for CBOs to support consistent, accessible distribution of preparedness information across community events and engagements. 211 is available to customers who may require more personalized assistance, providing one-on-one phone support, resource navigation, and emergency preparedness guidance delivered by trained specialists.
We serve as a CRC and I believe that we and Edison provide electricity, bathrooms, solar chargers, and snacks. Perhaps cots for a quick nap? Or an actual meal not just snacks. If I have no electricity and my house has electric cooking I can't make a meal and if I am low income I might not be able to afford to go out to eat.	SCE will continue to explore the feasibility of providing different resources at CRCs. Certain resources like firewood and blankets are dependent on weather and location. SCE can quickly procure and provide a wide range of resources to support communities impacted by PSPS.
Picture images less wording / sensory fidget devices with direct link along with SCE logo (not just SCE.com) SPECIFIC LINK in incentives	SCE will evaluate opportunities to improve outreach, and to create or further streamline quick reference pamphlets consistent with SCE's ongoing efforts to improve accessibility and customer experience across all PSPS communications.

Survey Response	Mitigation
	During PSPS, SCE provides sensory kits at CRCs which include noise canceling headphones and weighted sensory blanket.
Back up battery packs, trained staff at CRCs, wheelchairs, transportation access	SCE provides backup power options for customers who rely on electricity, such as free portable batteries, rebates for generators and power stations, and battery loans during outages. During PSPS, SCE provides support to impacted communities by deploying CRCs to provide water, light snacks, and small-device charging. To support individuals with disabilities or AFN at CRCs, SCE provides medical equipment charging, wheelchairs, medical thermal bags, support for service animals, and offers privacy screens. SCE also provides transportation support such as Uber and Lyft rides, as well as non-emergency transport upon request. To learn more, visit https://www.sce.com/outages-safety/wildfire-safety/access-functional-needs.
I think SCE needs to know more about the SCE customers who have these needs. Access to written information and links is excellent; however, when people are in crisis, they need immediate, hands-on support. Perhaps create a dedicated database that will enable SCE to communicate with customers. Something that is much more hands-on, and an immediate response to help alleviate the burden or those older adults and persons with physical challenges. During a crisis, they are already under a lot of stress, and many don't have family members nearby to help them.	SCE distributes an AFN Self Identification Survey to customers affected by PSPS. The survey offers customers the opportunity to voluntarily disclose if they have a disability or AFN. This information enables SCE to more effectively identify individuals who are not enrolled in the Medical Baseline Allowance program and allows SCE to provide targeted communications regarding resources and support available during PSPS. SCE issues PSPS notifications through multiple channels up to 72 hours in advance. These communications inform customers about potential outages and provide access to support services and additional resources. Early notification enables customers to adequately prepare for PSPS events, which may include contacting 211 to arrange transportation assistance, thereby helping customers remain safe and resilient during power interruptions. To learn more, visit https://www.sce.com/outages-safety/wildfire-safety/access-functional-needs.

SECTION 08: Power Restoration Timeline

Table 14: Circuits Requiring More Than 24 Hours to Restore

Circuits Requiring more than 24 hours to restore

Circuit Name	Reason the utility was unable to restore the circuit within 24 hours
AVANTI	Continued high winds caused delay in re-energization
BADGER	Continued high winds caused delay in re-energization
BALCOM	Continued high winds caused delay in re-energization
BALDWIN	Re-energization delayed due to the Eaton Fire
~~BARRINGTON~~	~~Re-energization delayed due to Outage Management System communications issue and technology outage~~
BROADCAST	Re-energization delayed due to the Eaton Fire
BUCKHORN	Restoration extended due to jurisdictional coordination
CACHUMA	Shared circuit with PG&E, circuit required air patrol causing delays
CALAMAR (DS OF LUISENO)	Continued high winds caused delay in re-energization
CALSTATE	Continued high winds caused delay in re-energization
DALBA (DS OF ROWCO)	Continued high winds caused delay in re-energization
ENERGY	Continued high winds caused delay in re-energization
GALAHAD	Continued high winds and Federal Aviation Administration (FAA) Temporary Flight Restrictions (TFR) caused delay in re-energization
HIGHBALL	Continued high winds caused delay in re-energization
JARVIS	Limited air patrol resources caused delay in re-energization
KINNELOA	Re-energization delayed due to the Eaton Fire
KINSEY	Continued high winds caused delay in re-energization
LA MANCHA	Continued high winds caused delay in re-energization
LAMANDA	Re-energization delayed due to the Eaton Fire
LUISENO	Continued high winds caused delay in re-energization
MAMBA	Continued high winds caused delay in re-energization
MERLIN	Limited patrol resources caused delay in re-energization
MILO	Re-energization delayed due to the Kenneth Fire
MULHOLLAND	Damage found on circuit and required repair before re-energization could occur
NICHOLAS	Re-energization delayed due to the Palisades Fire
NORTHPARK	Damage found on circuit and required repair before re-energization could occur
OBSERVATORY (DS OF VIDEO)	Downstream to the Broadcast, re-energization delayed due to the Eaton Fire.
ONBORD	Continued high winds caused delay in re-energization
PARADISE	Re-energization delayed due to the Kenneth Fire
PLATEAU	Re-energization delayed due to the Palisades Fire
RAINBOW	Continued high winds caused delay in re-energization
RED BOX (DS OF BROADCAST)	Downstream to the Broadcast, re-energization delayed due to the Eaton Fire.
RICARDO	Continued high winds caused delay in re-energization
ROWCO	Continued high winds caused delay in re-energization
SAND CANYON	Continued high winds caused delay in re-energization.

January 17, 2025 to January 27, 2025

SECTION 05: Notifications

Table 8: Positive Notifications

Positive Notification

Category	Total Number of Customers	Timing of Attempts	Notification Attempts	Successful Positive Notification	Who made the notification
Medical Baseline	23,716	DAILY	~~24,503~~ 24,371	~~23,338~~ 23,296	SCE
Self Certified	4,077	DAILY	~~4,685~~ 4,553	~~3,984~~ 3,930	SCE

SECTION 05: Notifications

Table 9: Breakdown of Notification Failures

Breakdown of Notification Failures

Notifications sent to	Notification Failure Description	Number of	Explanation
Public Safety Partners excluding Critical Facilities and Infrastructure	Entities who did not receive 48-to 72-hour advance notification.	~~17~~ 23	~~campaign authorized less than 48 hours, successfully sent~~ circuit added to event scope after notification window due to emergent weather, successfully sent - 5 missing authorized campaign/message sent error - ~~12~~ 9 missing authorized campaign - 2 notification missed due to emergent weather - 5 notification sent after notification window. successfully sent - 2
	Entities who did not receive 1–4-hour imminent notification.	~~12~~ 11	missing authorized campaign - ~~12~~ 10 notification missed due to emergent weather - 1
	Entities who did not receive any notifications before de-energization.	~~12~~ 11	missing authorized campaign/message sent error - ~~12~~ 9 notification missed due to emergent weather - 2
	Entities who were not notified immediately before re-energization.	~~12~~ 11	missing authorized campaign/message sent error - ~~12~~ 9 missing authorized campaign - 2
	Entities who did not receive cancellation notification within two hours of the decision to cancel.	~~0~~ 1	missing authorized campaign - 1
Critical Facilities and Infrastructure	Facilities who did not receive 48–72-hour advance notification.	~~1,094~~ 1,087	campaign authorized less than 48 hours, successfully sent - ~~480~~ 84 notification missed due to emergent weather - 505 no contact information / message send error - 1 missing authorized campaign - ~~611~~ 497
	Facilities who did not receive 1-4 hour of imminent notifications.	271	missing authorized campaign - 270 no contact information / message send error - 1
	Facilities who did not receive any notifications before de-energization.	102	missing authorized campaign - 100 no contact information / message send error - 2
	Facilities who were not notified at de-energization initiation.	23	missing authorized campaign - 21 no contact information / message send error - 2
	Facilities who were not notified immediately before re- energization.	113	missing authorized campaign - 57 no contact information / message send error - 2 campaign authorized after re-energization - 54
	Facilities who were not notified when re-energization is complete.	27	missing authorized campaign - 25 no contact information / message send error - 2
	Facilities who did not receive cancellation notification within two hours of the decision to cancel.	~~62~~ 63	received deen notifications, was not deen, missing authorized campaign - 61 missing authorized campaign - ~~1~~ 2
All other affected customers	Customers who did not receive 24–48-hour advance notifications.	40,919	campaign authorized less than 24 hours, successfully sent - 5,941 missing authorized campaign - 34,536 no contact information / message send error - 442
	Customers who did not receive 1–4-hour imminent notifications.	13,032	no contact information / message send error - 360 missing authorized campaign - 12,672
	Customers who did not receive any notifications before de-energization.	4,804	missing authorized campaign - 4,235 no contact information / message send error - 569
	Customers who were not notified at de-energization initiation.	1,837	missing authorized campaign - 1,223 no contact information / message send error - 614
	Customers who were not notified immediately before re-energization.	7,931	campaign authorized after re-energization - 3,305 missing authorized campaign - 4,048 no contact information / message send error - 578
	Customers who were not notified when re-energization is complete.	1,878	no contact information / message send error - 560 missing authorized campaign - 1,318
	Customers who did not receive cancellation notification within two hours of the decision to cancel.	~~6,231~~ 6,301	missing authorized campaign - ~~26~~ 107 received deen notifications, was not deen, missing authorized campaign - ~~6,017~~ 6,016 no contact information / message send error - 178

Background and Research Methodology

Energy for What's Ahead®

SOUTHERN CALIFORNIA EDISON®

Background

- As mandated by CPUC Decision 20.03.004, starting in 2020, the California IOUs began conducting a two-wave survey (i.e., pre-wildfire season and post-wildfire season) on an annual basis.
- The objective of the survey is to assess the effectiveness of utility communications and outreach for wildfire safety/preparedness and PSPS activities.
- Each IOU determined its own methodology for optimizing the survey implementation and utilized their own preferred research partners.
- Core questions are asked by all three IOUs via their individual surveys, allowing some comparisons across IOUs, while each IOU also incorporates custom questions.
- Most of the pre-season questions are repeated in the post-season survey along with additional unique post-season questions.
- SCE administers the pre- and post-season surveys to residential and business customers across its service territory (i.e., systemwide) with a special focus on high fire risk areas (HRFAs).

Research Methodology – Target Location

- This research specifically targets customers who reside in High Fire Risk Areas (HFRAs).
- In addition to HFRAs, customers within the entire SCE service territory are also included.
  - For this research, this group of customers are referred to as "Systemwide".
- This means the HFRA base size (i.e., the total number of responses or completed surveys) is supplemented by the customers who reside in a HFRA from the Systemwide sample.
- Given this approach, the Systemwide base size will not equal the HFRA + non-HFRA base sizes.
- In 2025, customers affected by the Eaton fire were excluded from the research.

Research Methodology – Data Collection

- 793 business customers took the 2025 post-season survey between November 5th 2025 and January 10th 2026.
  - 1,071 business customers took the 2025 pre-season survey between June 19th and August 8th 2025.
- Customers completed the pre-season survey via a self-administered web survey or an interviewer-administered telephone survey.
  - 70% of the surveys completed are web-based and 30% are telephone-based.

2025	Business HFRA				Business Systemwide			
Wave	Pre		Post		Pre		Post	
Mode	Online	Telephone	Online	Telephone	Online	Telephone	Online	Telephone
Completed Surveys	86	136	99	140	633	216	341	213
Survey Length	9.2	11.7	11.6	16.2	8.8	10.4	11.3	14.3

Research Methodology – Prevalent Languages

- In addition to English, the pre- and post-season surveys are offered to customers in the 20 prevalent languages spoken within SCE service territory:

English	Farsi	Korean	Vietnamese
Arabic	French	Punjabi	Hindi
Armenian	German	Russian	Hmong
Chinese - Cantonese	Japanese	Spanish	Portuguese
Chinese - Mandarin	Khmer	Tagalog	Thai

- Email invitations greeted potential respondents in all 20 languages with a jump link in the email to a web survey in that language.
- CATI phone center has staff proficient in the various languages, but all are not always available at the time of the interview. Upon encountering a language barrier, the interviewer attempts to identify the language and stores the record for re-contact later. If the language cannot be identified, a surname-based, pre-coded flag is used to assign the record for in-language re-contact.

Research Methodology – Prevalent Languages

Executive Summary

Energy for What's Ahead®

SOUTHERN CALIFORNIA EDISON®

Summary

Overall, business customer awareness of PSPS and wildfire preparedness communications remained high in 2025, and preparedness levels improved, with the share feeling ready for extended outages remaining high. Multilingual outreach continues to play an important role, with communications delivered in 19 non-English languages and customers emphasizing the need for clearer, mobile-first updates.

Awareness

- While awareness of PSPS remains widespread, favorable opinion of the program among HFRA business customers declined to 44%, and systemwide satisfaction with wildfire preparedness fell to 50% following the 2025 wildfire season.

Consistent Communication Sources

- Email and text messaging continue to be the most recalled and useful communication channels, and SCE.com remains the primary source customers use to check outage status.
- Despite expanded text outreach, about 20% of customers request more phone/mobile notifications, along with clearer and more timely communications.

PSPS Alert Satisfaction

- Satisfaction with PSPS alerts decreased from 2024 to 2025, with fewer customers reporting that the number of alerts was "about right" and lower overall satisfaction with the information provided, indicating an opportunity to improve alert timing, clarity, and relevance.

Key Findings

Among business customers in High Fire Risk Areas (HFRA), awareness of Public Safety Power Shutoff (PSPS) stayed consistent from 79% in the 2025 pre-season to 82% in the 2025 post-season. Similarly, the recall of SCE's wildfire communications dropped to 656% over the same period.

Business Customers			
HIGH FIRE RISK AREA (HFRA)			
2024 PRE (A)	2024 POST	2025 PRE (B)	2025 POST
N=426	N=472	N=423	N=354
Recall SCE Wildfire Communications	50%	63% ↑ B	61% A	56%
Aware of PSPS	74%	80% ↑	79% A	82%

indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between years.

Q1. "In the past few months do you recall any communications of any type (i.e., mail, TV, radio, social media, etc.) from SCE about the threat of wildfires and how you can prepare for them?"
Q16. Public Safety Power Shutoff, or PSPS, is a precautionary safety measure where SCE may proactively turn off power lines when extreme fire danger conditions are forecasted, in order to reduce the risk of wildfires. Before today, had you ever heard of the Public Safety Power Shutoff program?

In the 2025 post-season survey, 44% of HFRA business customers had a favorable opinion of SCE's PSPS program, up significantly from the 2025 pre-season. Satisfaction with SCE's overall wildfire preparedness efforts remained flat at 54%, from the 2025 pre-season surveys.

Business Customers			
HIGH FIRE RISK AREA (HFRA)			
2024 PRE (A)	2024 POST	2025 PRE (B)	2025 POST
N=426	N=472	N=423	N=354
Opinion of SCE's PSPS Program	50% B	51%	44%	52% ↑
Satisfaction with SCE's Wildfire Preparedness Efforts	56%	56%	53%	54%

indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between years.

Q22. Overall, what is your opinion of SCE's Public Safety Power Shutoff program?
Q15. How satisfied are you with SCE's overall wildfire safety and preparedness efforts?

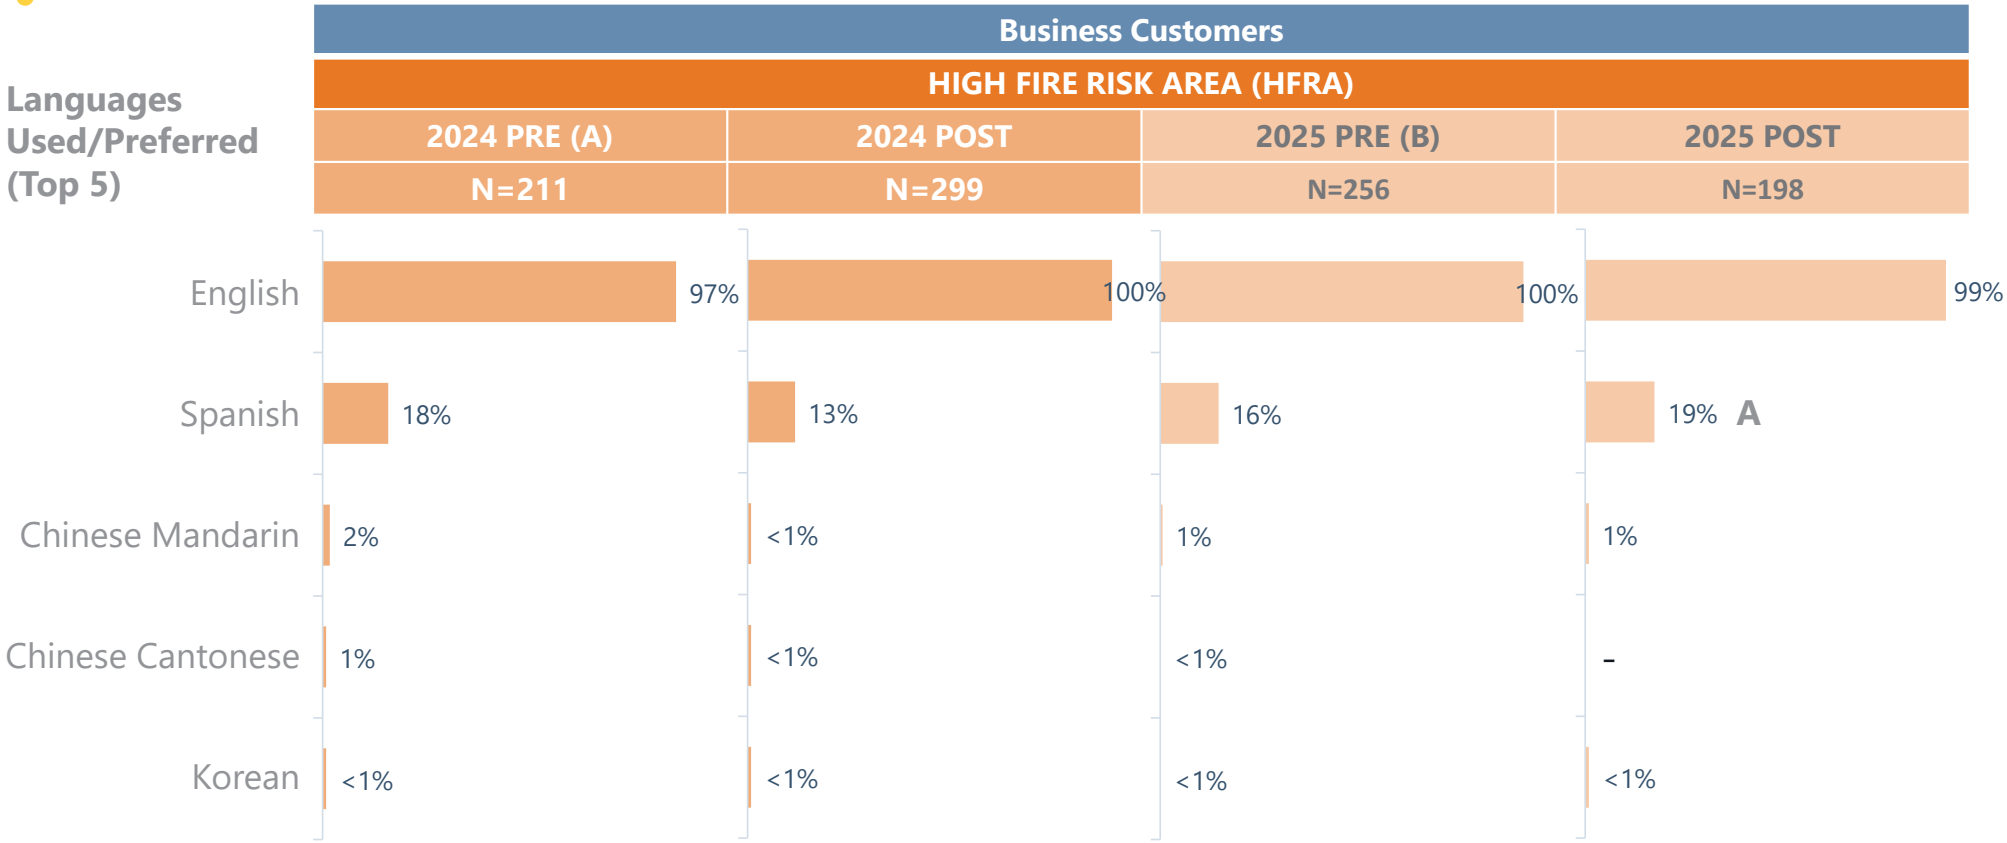
Between the 2025 pre and post-seasons, self-reported preparedness for extended power outages among business customers in High Fire-Risk Areas (HFRAs) remained stable at 72%.

	Business Customers			
	HIGH FIRE RISK AREA (HFRA)			
Personal Level of Preparedness:	**2024 PRE (A)**	**2024 POST**	**2025 PRE (B)**	**2025 POST**
	N=426	**N=472**	**N=423**	**N=354**
Completely / Somewhat Prepared	62%	68% ↑	69% A	72%

↑↓ indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between years.

Q20. A Public Safety Power Shutoff event could last anywhere from 24-48 hours, or longer in some cases. How would you rate your level of preparedness for being without electricity for an extended period?

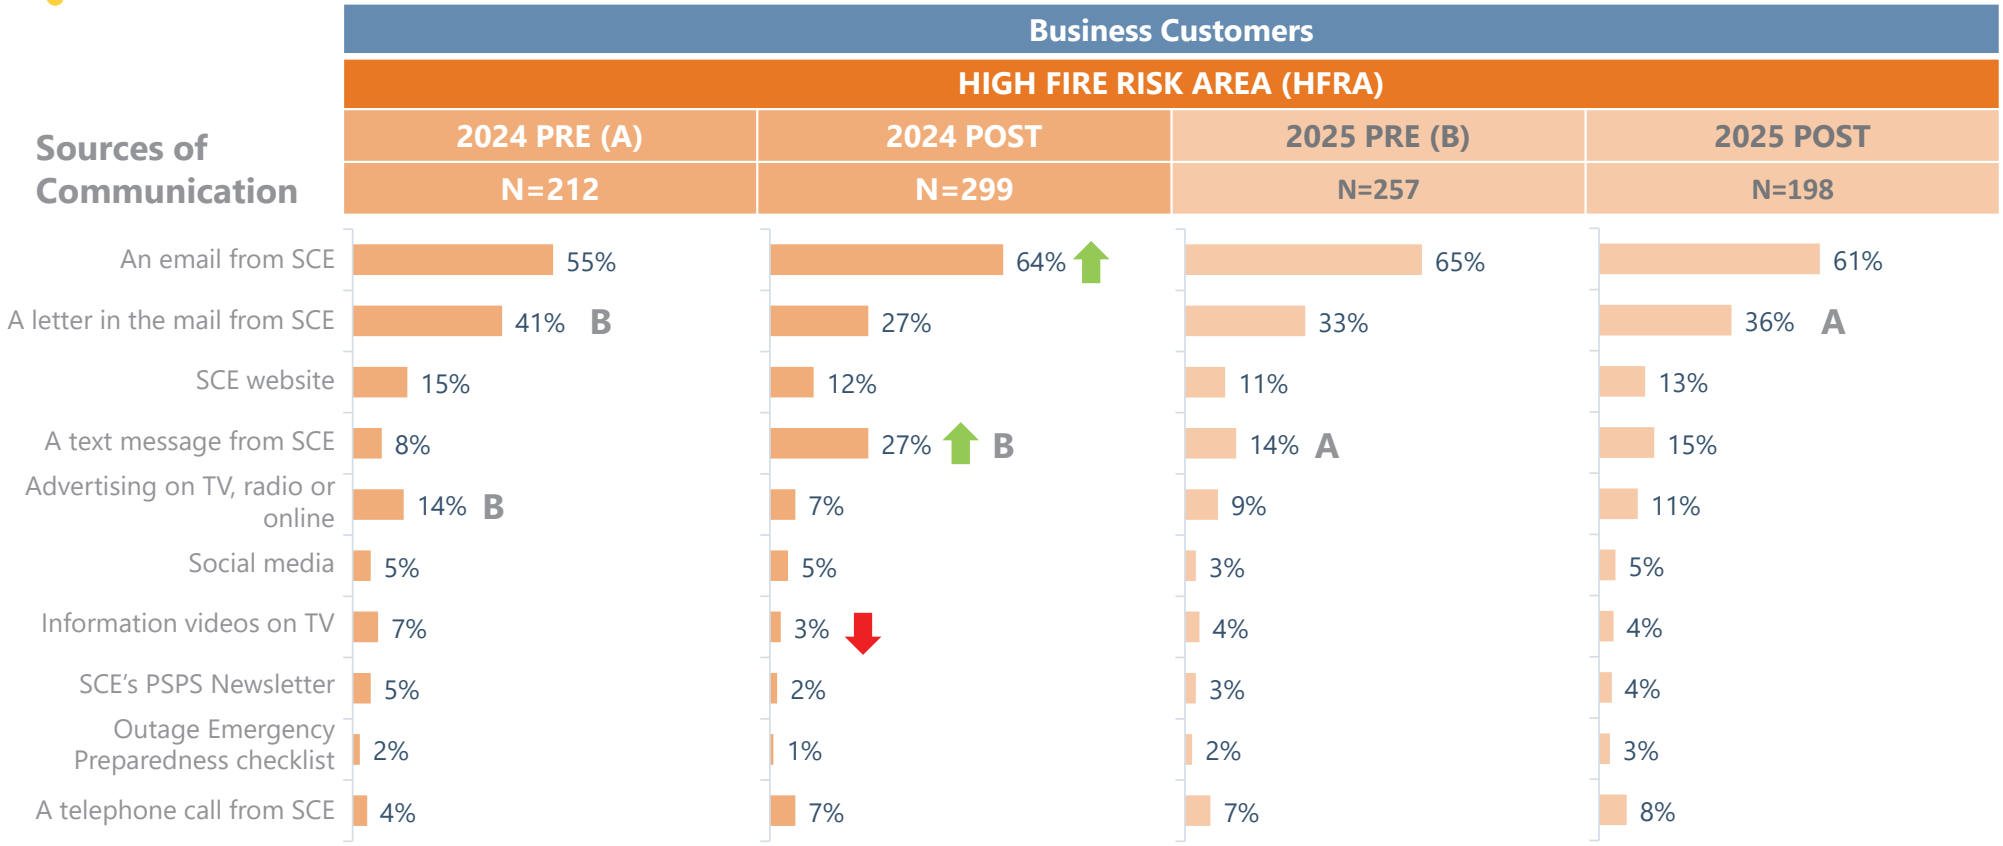
Among HFRA business customers who recalled SCE communications, nearly all information was seen or heard in English & Spanish.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between years.

Q5. [RECALL COMMUNICATION] In what language(s) was the wildfire safety and preparedness information that you recall seeing or hearing from SCE?

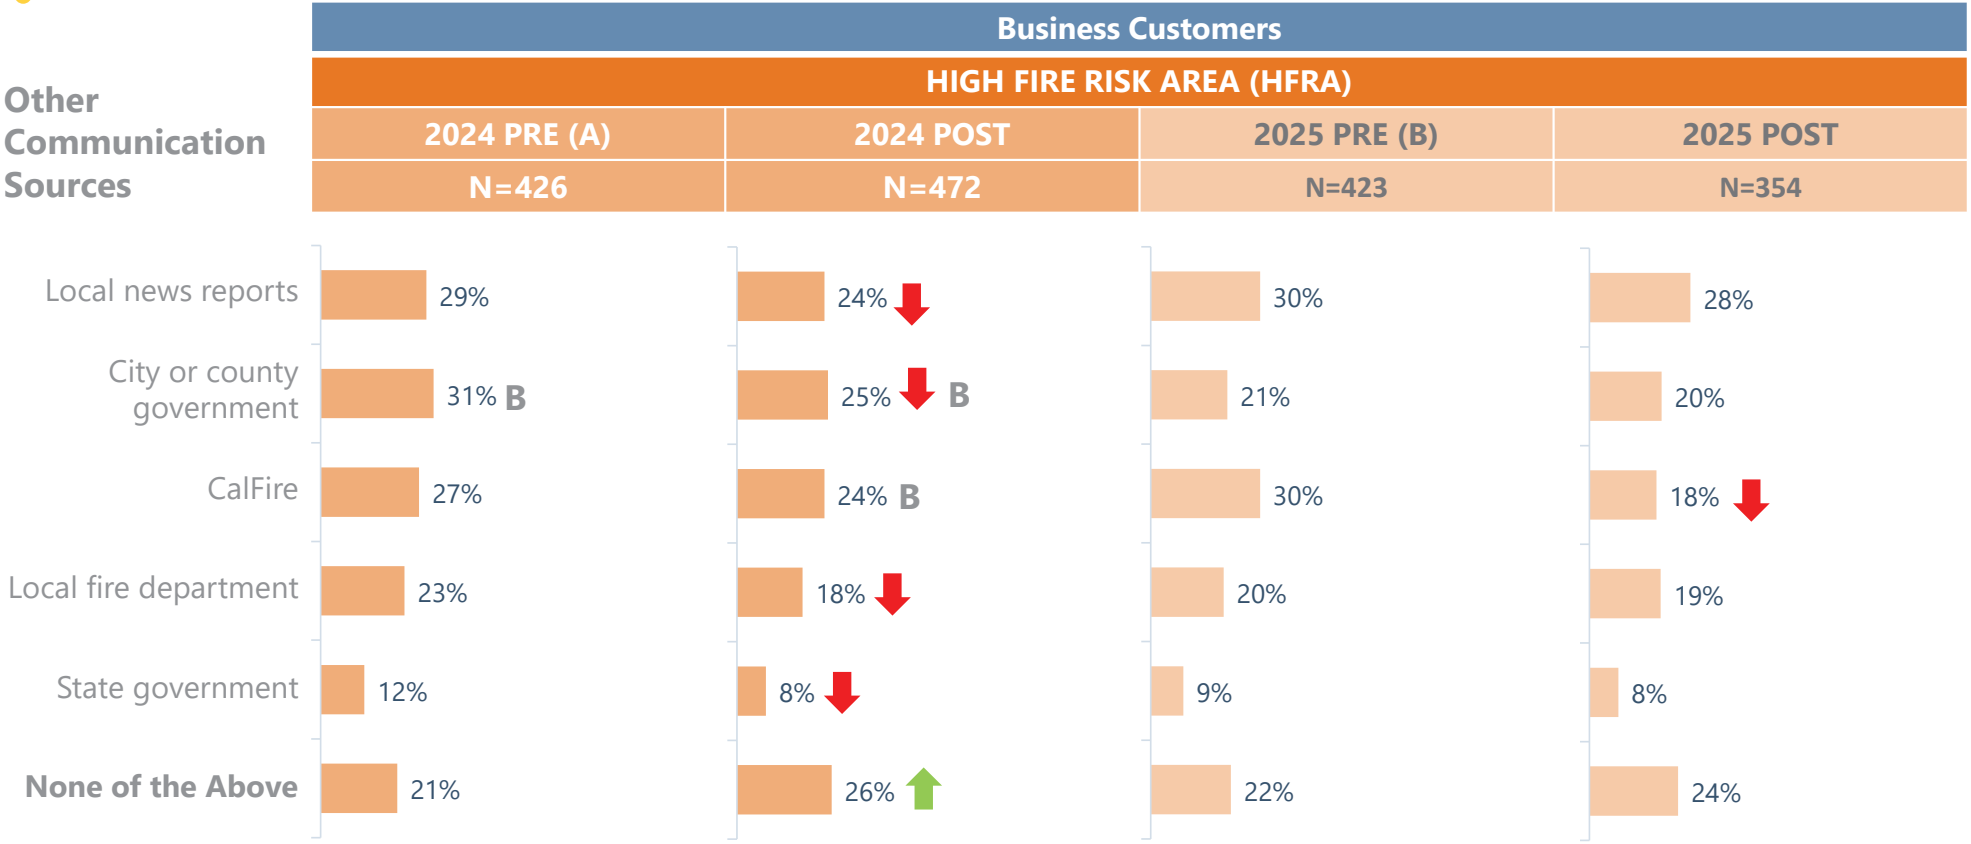
The primary ways HFRA business customers recalled hearing about wildfire preparedness from SCE were through email, letters in the mail, texts from SCE, and the SCE website. Recall from text messages dropped significantly in 2025.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between years.

Q6. [RECALL COMMUNICATION] Where did you see or hear SCE's communications about wildfire season safety and preparedness?

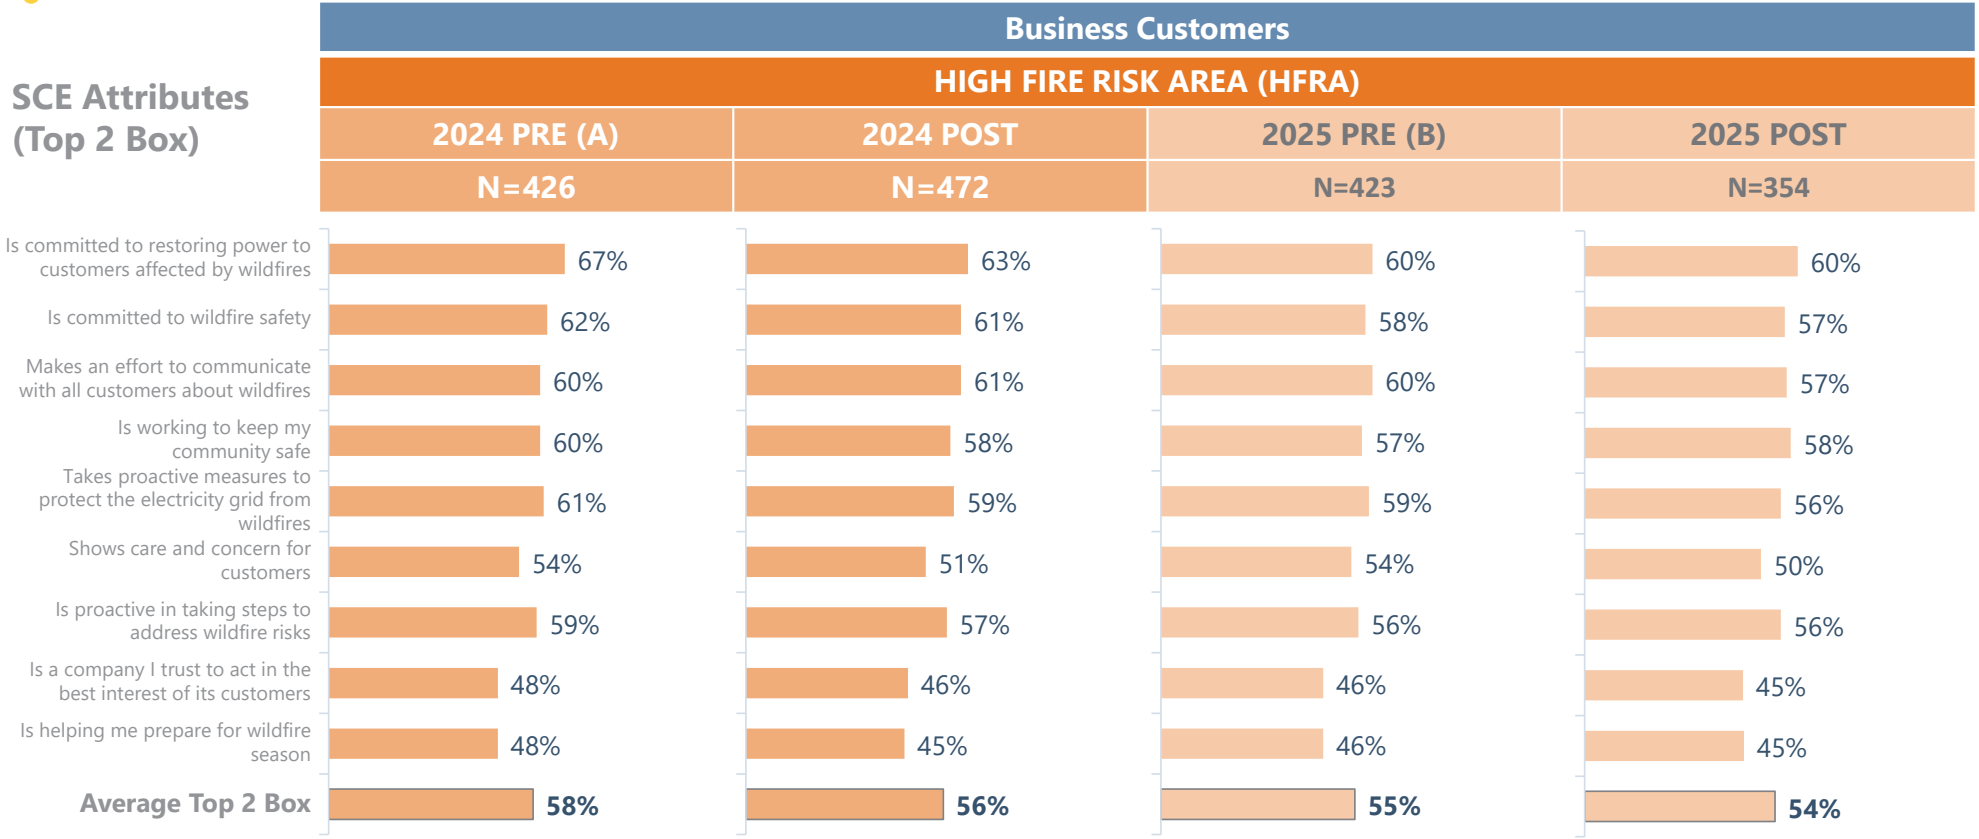
Other than SCE, HFRA business customers most commonly received wildfire safety information from local news reports, their city or county government, and CalFire. The use of CalFire decreased significantly from the 2025 pre to the 2025 post-season survey.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between years.

Q10. Other than SCE's communications, what other sources have you used to obtain information about wildfire safety and preparedness?

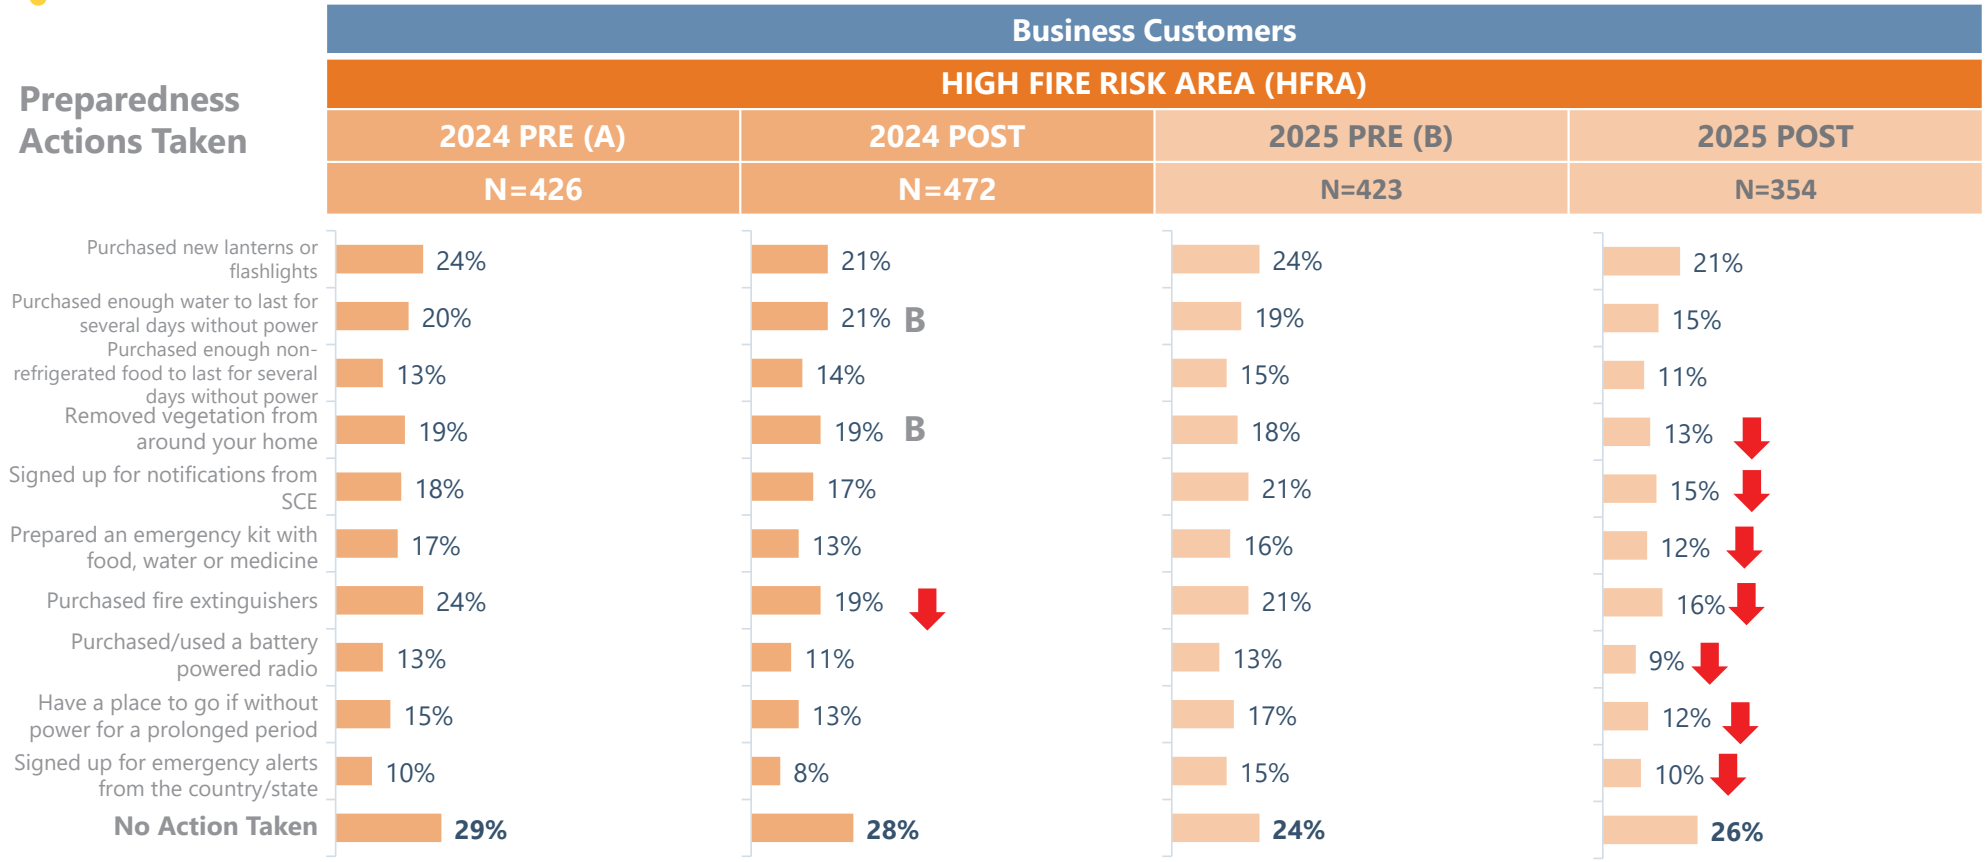
Customer agreement with SCE attributes, such as its commitment to safety and the community, remained consistent across all measured attributes between the 2024 and 2025 pre-season surveys.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between years.

Q14. Using a scale where 1 means completely disagree and 5 means completely agree, Please indicate how much you agree or disagree with the following statements about SCE. SCE…

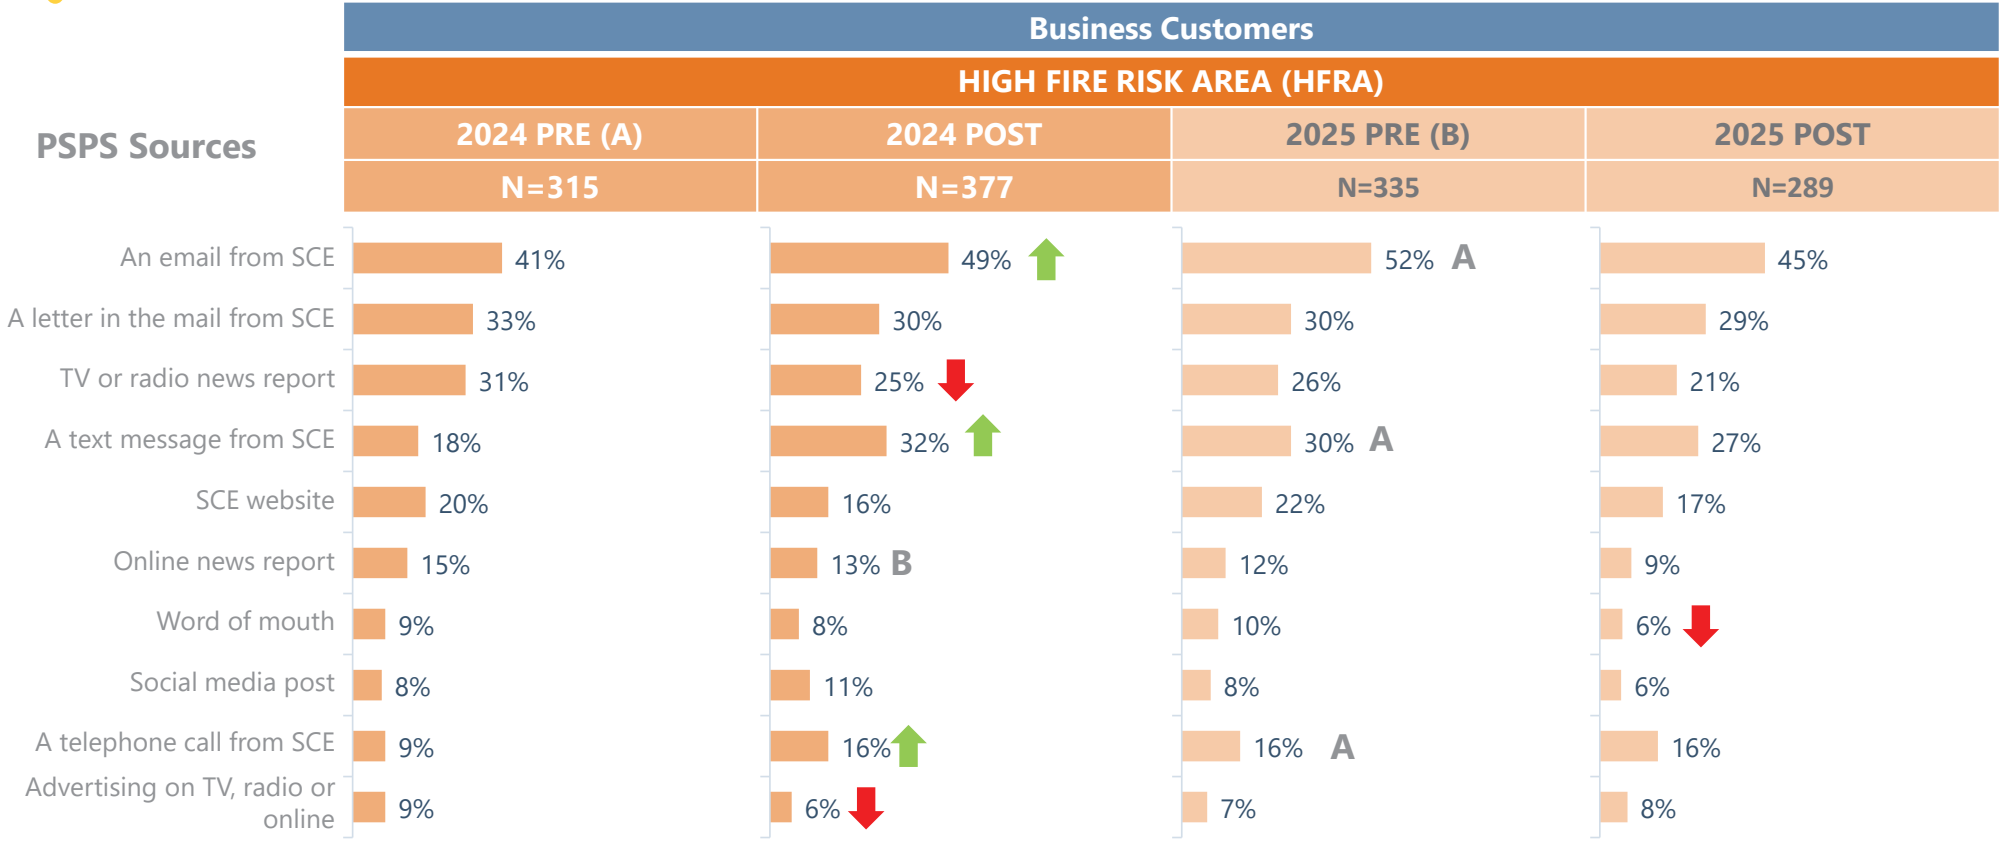
The most common preparedness actions taken by HFRA business customers include purchasing flashlights, water, and non-perishable food. Many preparedness actions dropped in the post-survey due to the relatively moderate fire season.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between years.

Q21. What, if any, actions have you taken to prepare for a Public Safety Power Shutoff (PSPS) in 2025?

HFRA business customers most frequently heard about PSPS through emails from SCE, texts from SCE, TV or radio news reports, and letters from SCE.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between years.

Q17. [RECALL PSPS] Where have you heard about Public Safety Power Shutoffs?

HFRA business customers found PSPS information delivered via text / email from SCE to be the most useful. Phone calls from SCE usefulness increased compared to 2025 pre-season.

Satisfaction with SCE's Wildfire Preparedness Efforts	53%	54%	48%	51%	50%	52%

↑↓ indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q22. Overall, what is your opinion of SCE's Public Safety Power Shutoff program?
Q15. How satisfied are you with SCE's overall wildfire safety and preparedness efforts?

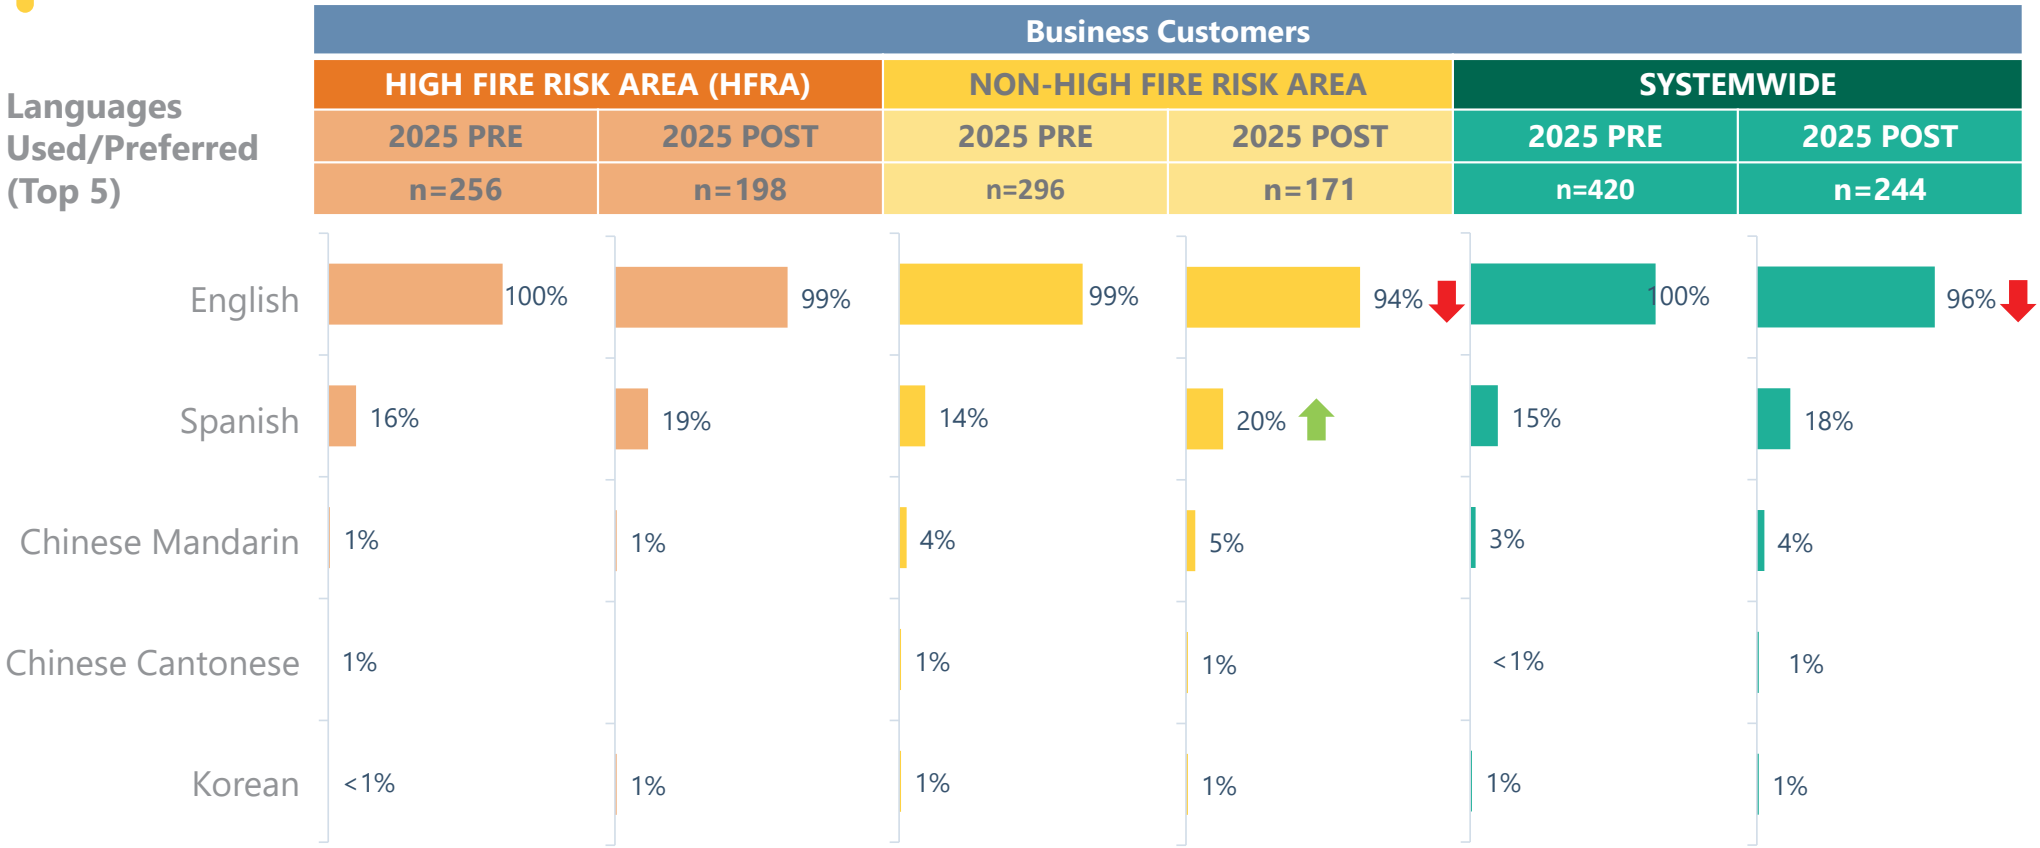
Self-reported preparedness for a prolonged power outage remained stable across all customer areas from 2025 pre- to 2025 post- surveys. In High Fire Risk Areas, the percentage of business customers who feel prepared increased directionally from 69% to 72%.

	Business Customers					
	HIGH FIRE RISK AREA (HFRA)		NON-HIGH FIRE RISK AREA		SYSTEMWIDE	
Personal Level of Preparedness:	2025 PRE	2025 POST	2025 PRE	2025 POST	2025 PRE	2025 POST
	n=423	n=354	n=648	n=439	n=849	n=554
Completely / Somewhat Prepared	69%	72%	56%	55%	59%	58%

indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q20. A Public Safety Power Shutoff event could last anywhere from 24-48 hours, or longer in some cases. How would you rate your level of preparedness for being without electricity for an extended period?

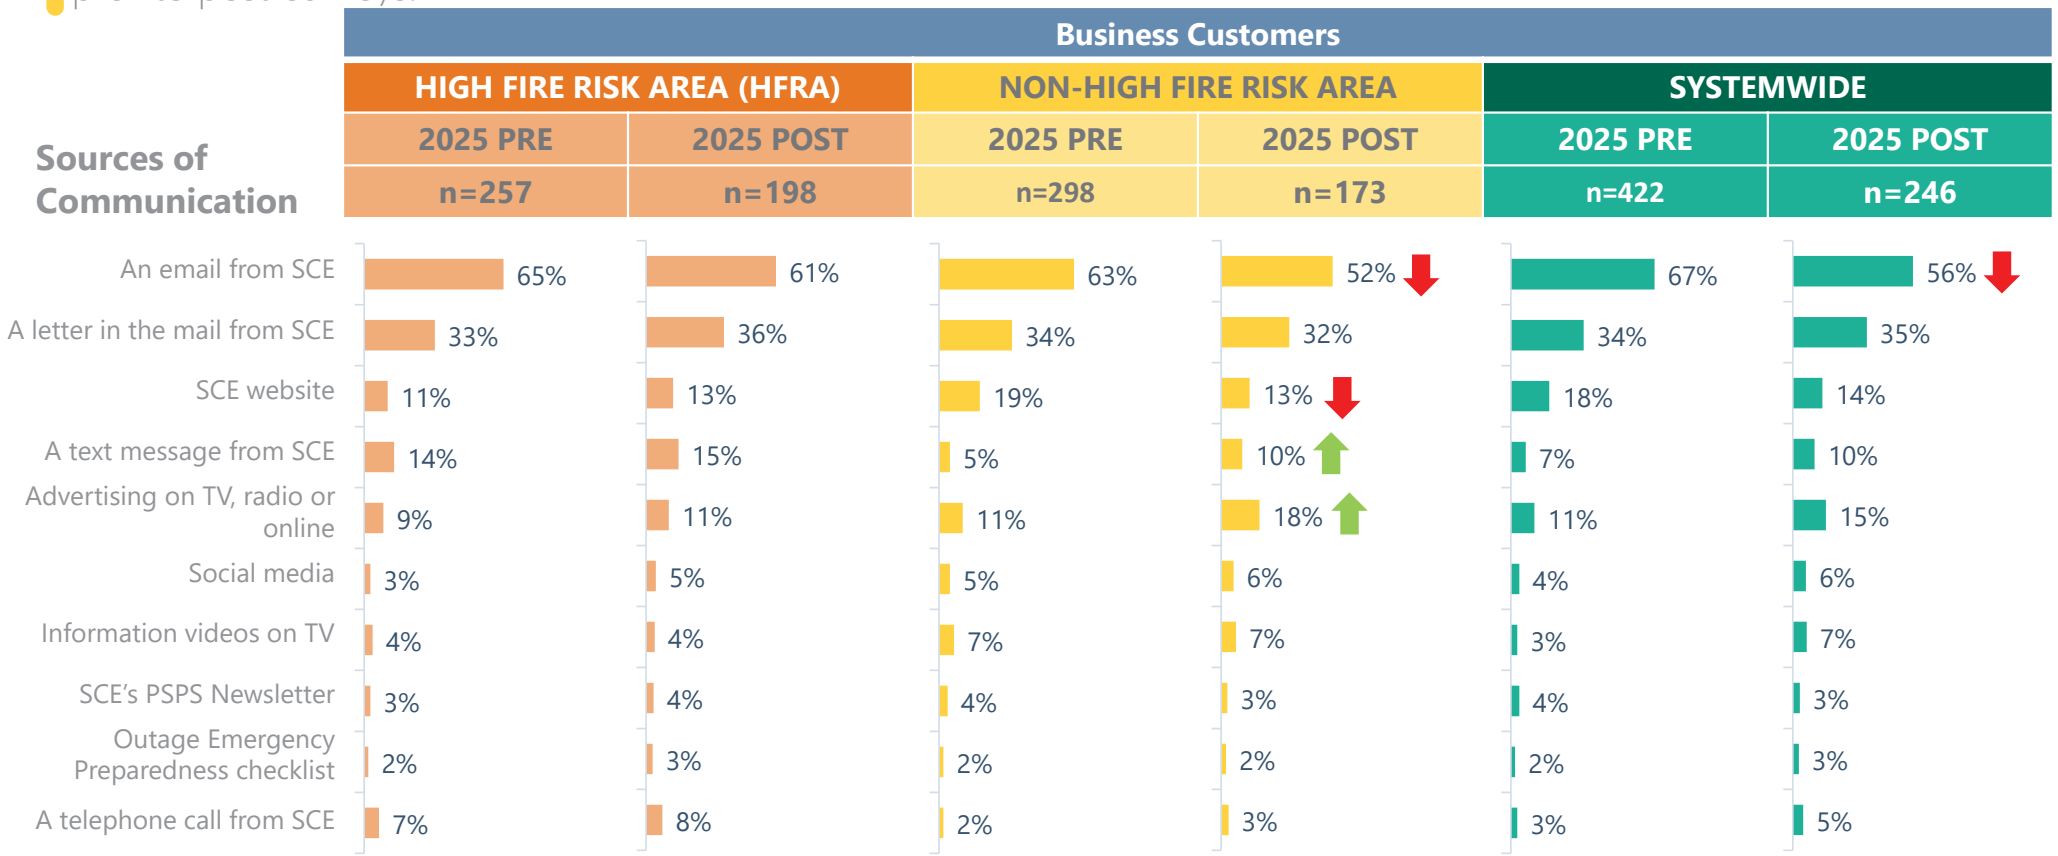
Among business customers who recalled SCE communications, nearly all information was seen or heard in English & Spanish.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q5. [RECALL COMMUNICATION] In what language(s) was the wildfire safety and preparedness information that you recall seeing or hearing from SCE?

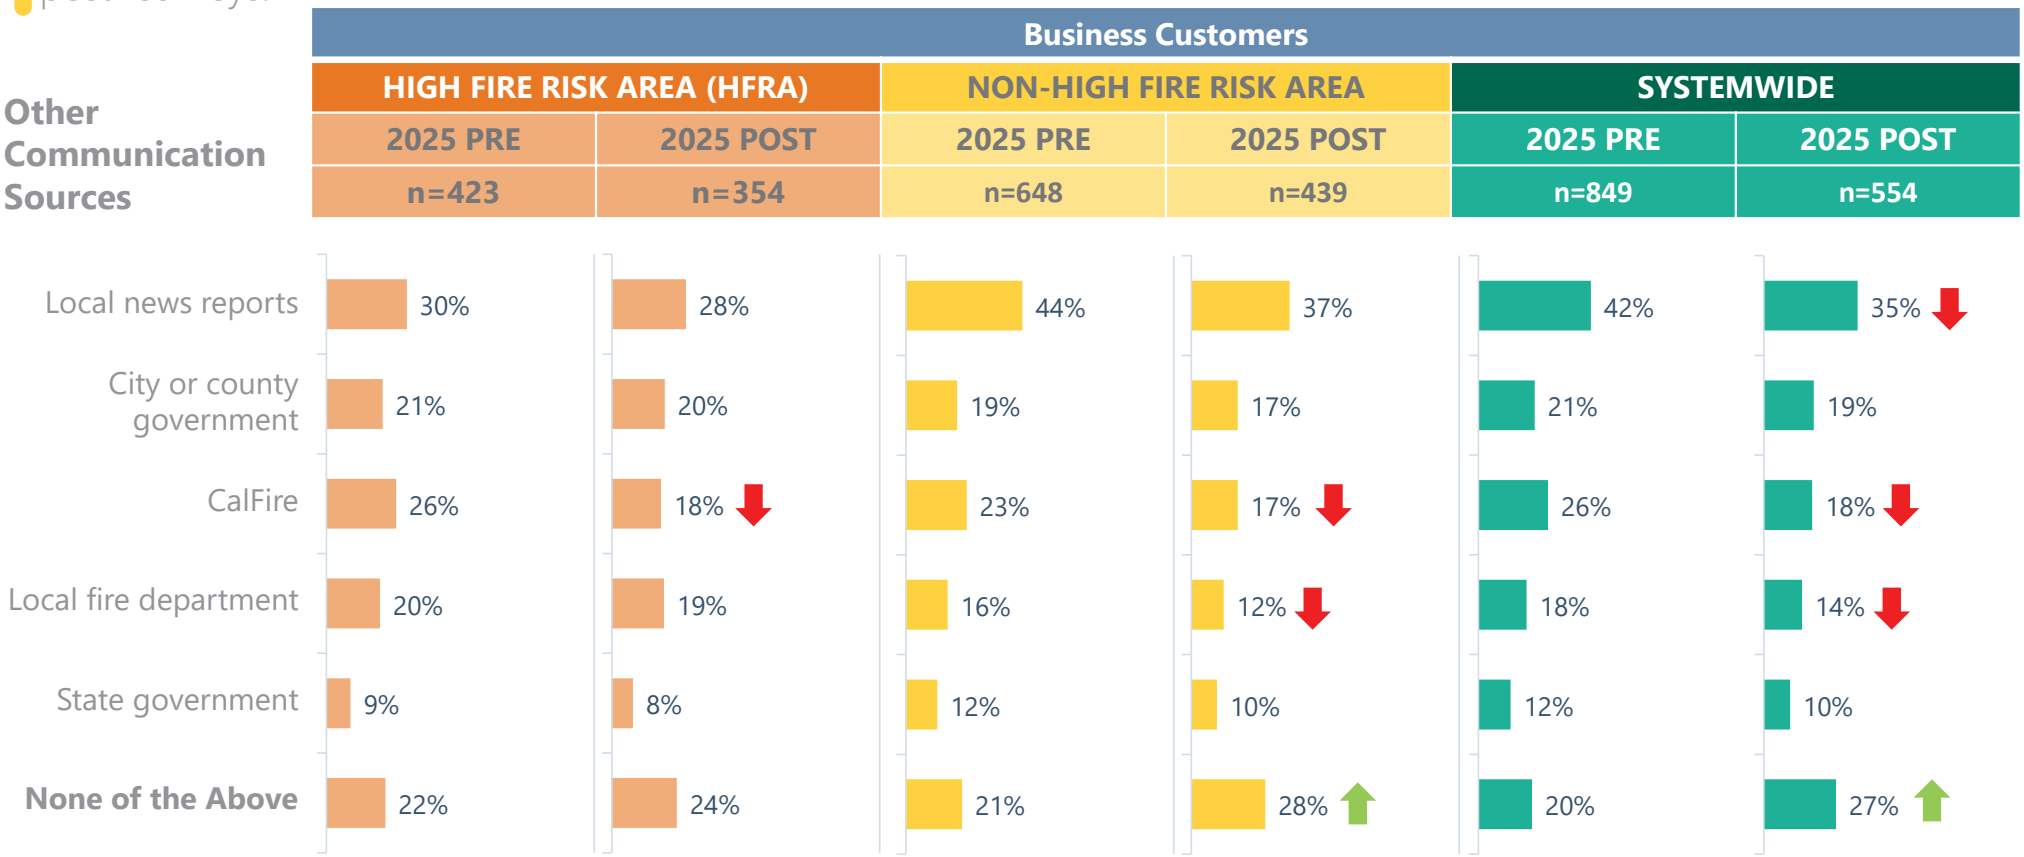
Email and mail from SCE are the most cited sources where customers recall seeing or hearing communications about wildfire preparedness. Email messages showed a decrease in recall among Non-HFRA business customers from 2025 pre- to post-surveys.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q6. [RECALL COMMUNICATION] Where did you see or hear SCE's communications about wildfire season safety and preparedness?

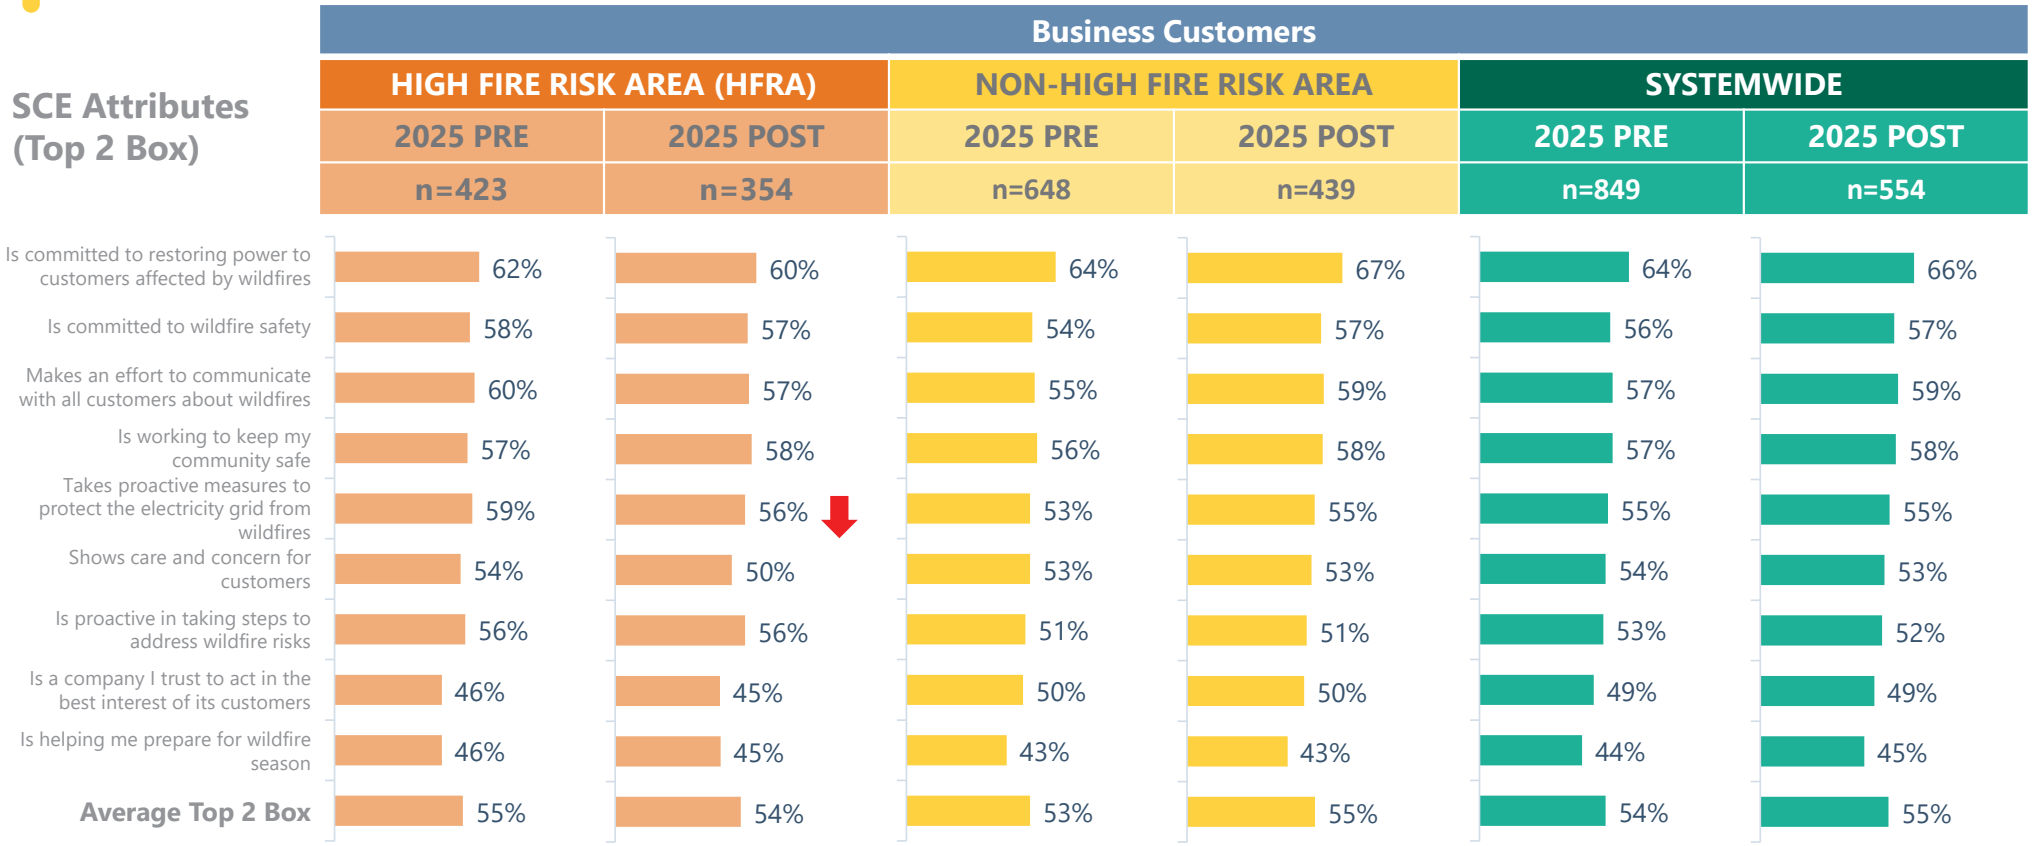
Local news reports are the most common non-SCE source for wildfire information, followed by city or county government and CalFire. The reliance on these external sources has decreased in Non-HFRAs between pre- and post- surveys.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q10. Other than SCE's communications, what other sources have you used to obtain information about wildfire safety and preparedness?

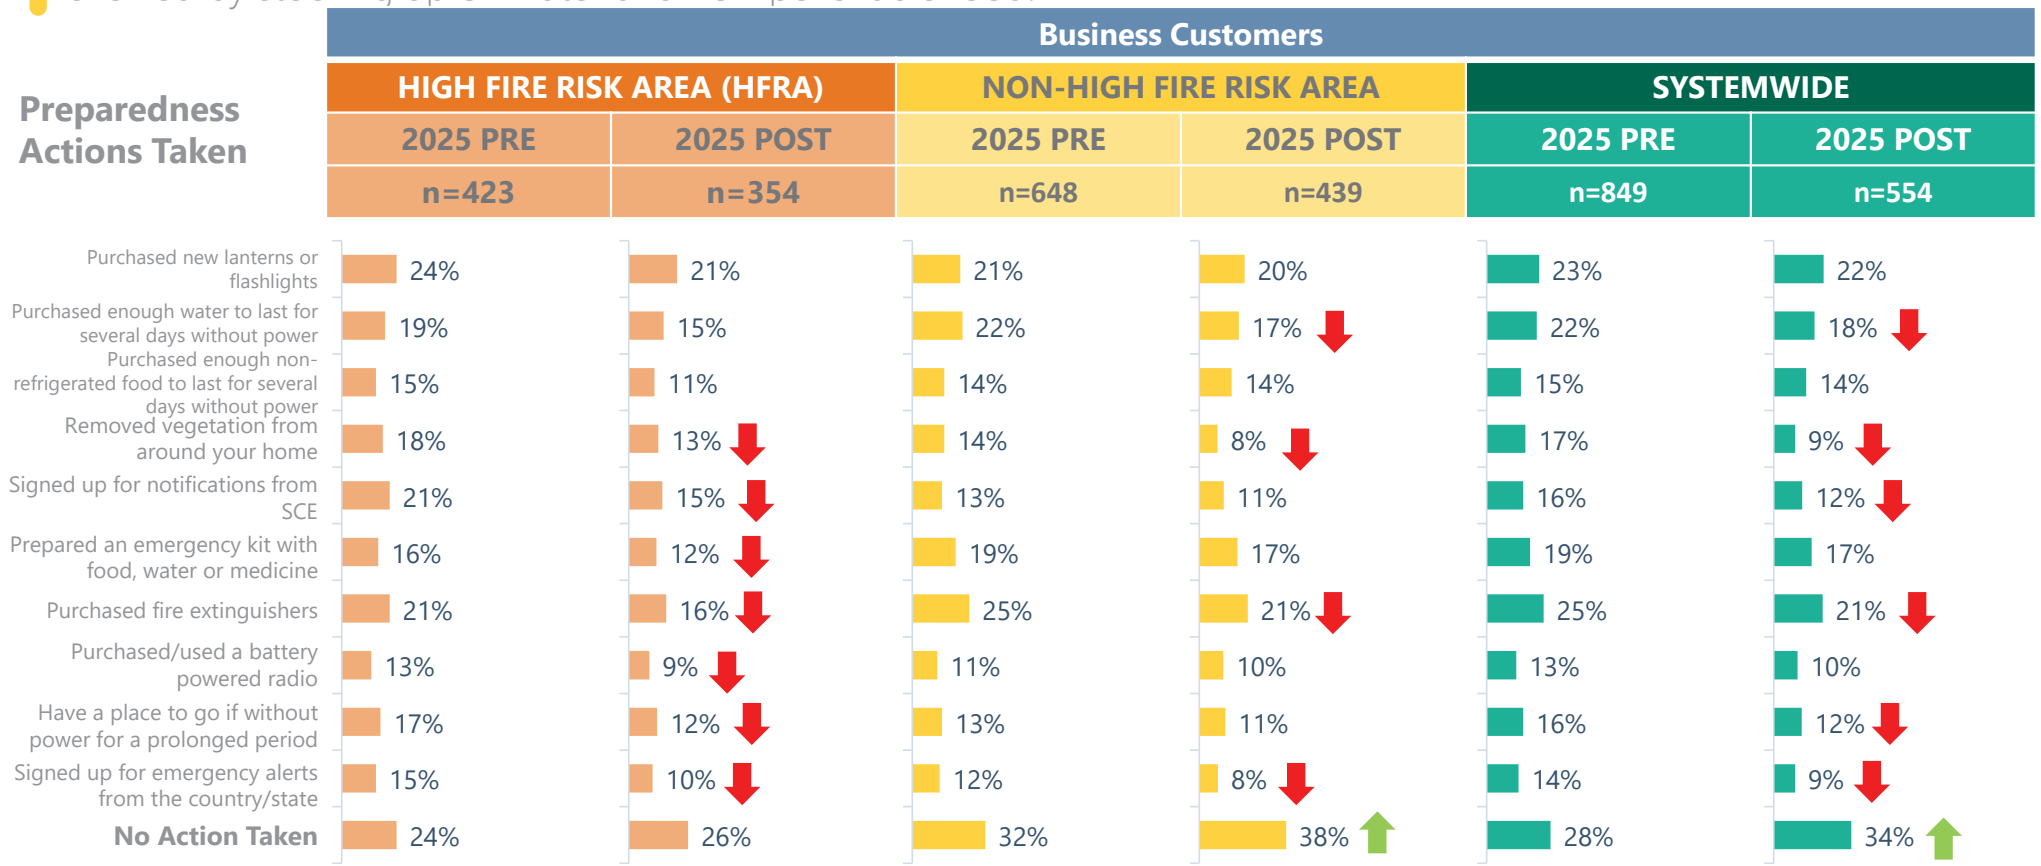
Customer perception of SCE has remained unchanged among business customers in 2025.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q14. Using a scale where 1 means completely disagree and 5 means completely agree, Please indicate how much you agree or disagree with the following statements about SCE. SCE…

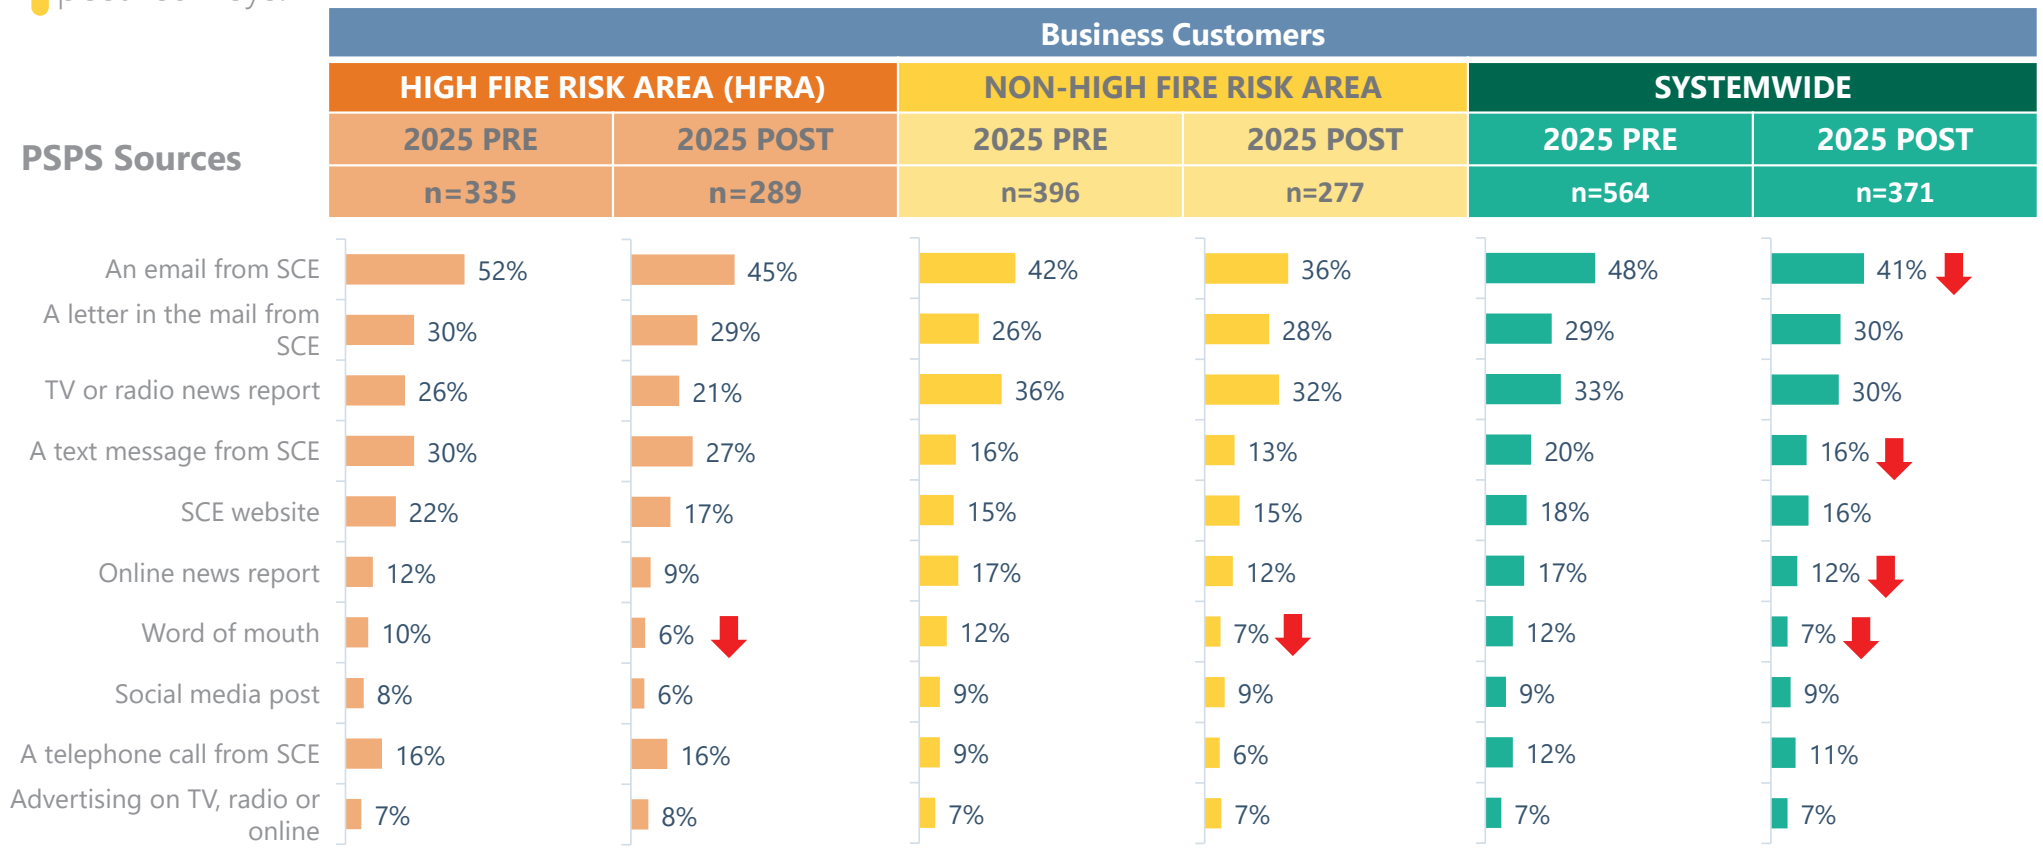
After increases in 2024, fewer customers have taken action to prepare for power outages in 2025. Purchasing lanterns or flashlights is the most common action taken by business customers to prepare for a PSPS event in 2025, followed by stocking up on water and non-perishable food.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q21. What, if any, actions have you taken to prepare for a Public Safety Power Shutoff (PSPS) in 2025?

Email from SCE is the primary source through which customers in all areas have heard about Public Safety Power Shutoffs. Email, text messages, online news, and word of mouth all saw a decrease in recall between 2025 pre- and post- surveys.

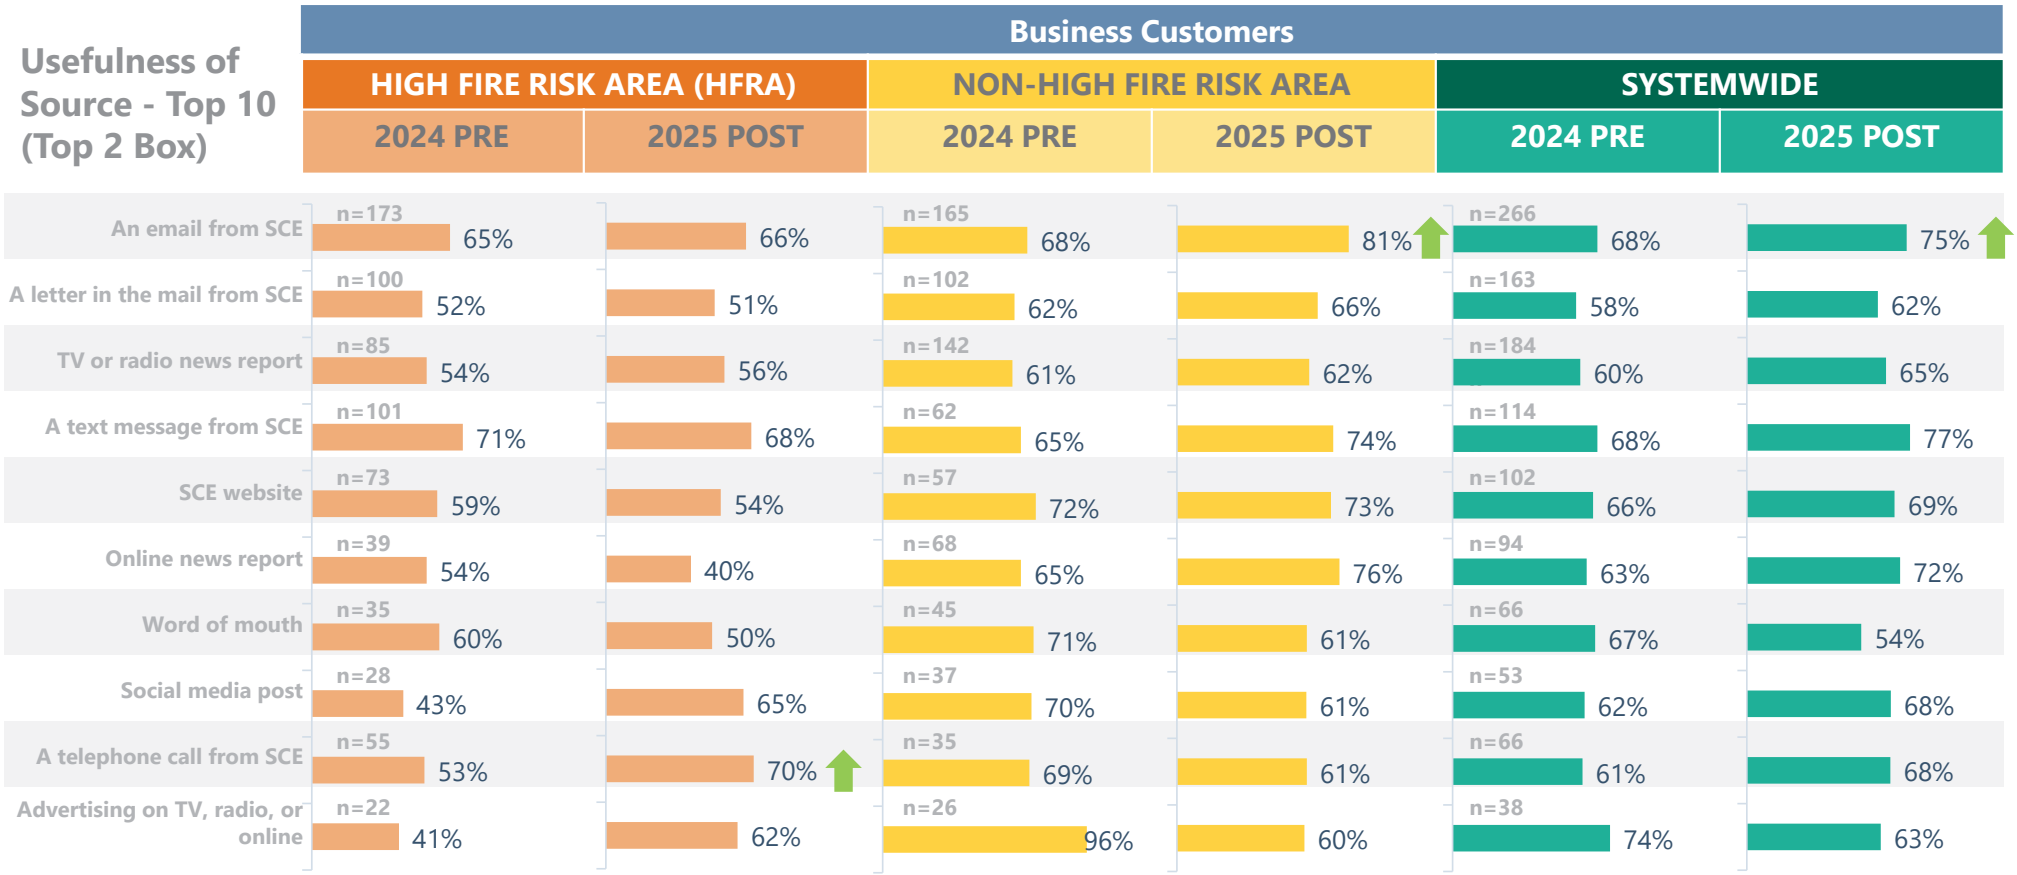


indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q17. [RECALL PSPS] Where have you heard about Public Safety Power Shutoffs?

Business customers found PSPS information delivered via text / email from SCE to be the most useful.

Usefulness of Source - Top 10 (Top 2 Box)



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q19A. [SAW COMMUNICATIONS] On a 1 to 5 scale where 1 is not at all useful and 5 is extremely useful, how useful was the PSPS information from ...?

Customers who recall seeing or hearing SCE advertising about PSPS and emergency preparedness have remained flat systemwide. Business customers in High Fire Risk Areas also reported the highest recall of advertising.

Seen SCE PSPS Advertising

Background and Research Methodology

Energy for What's Ahead®

SOUTHERN CALIFORNIA EDISON®

Background

- As mandated by CPUC Decision 20.03.004, starting in 2020, the California IOUs began conducting a two-wave survey (i.e., pre-wildfire season and post-wildfire season) on an annual basis.
- The objective of the survey is to assess the effectiveness of utility communications and outreach for wildfire safety/preparedness and PSPS activities.
- Each IOU determined its own methodology for optimizing the survey implementation and utilized their own preferred research partners.
- Core questions are asked by all three IOUs via their individual surveys, allowing some comparisons across IOUs, while each IOU also incorporates custom questions.
- Most of the pre-season questions are repeated in the post-season survey along with additional unique post-season questions.
- SCE administers the pre- and post-season surveys to residential and business customers across its service territory (i.e., systemwide) with a special focus on high fire risk areas (HRFAs).

Research Methodology – Target Location

- This research specifically targets customers who reside in High Fire Risk Areas (HFRAs).
- In addition to HFRAs, customers within the entire SCE service territory are also included.
  - For this research, this group of customers are referred to as "Systemwide".
- This means the HFRA base size (i.e., the total number of responses or completed surveys) is supplemented by the customers who reside in a HFRA from the Systemwide sample.
- Given this approach, the Systemwide base size will not equal the HFRA + non-HFRA base sizes.
- In 2025, customers affected by the Eaton fire were excluded from the research.

Research Methodology – Data Collection

- 1,071 business customers took the 2025 pre-season survey between June 19th and August 8th .
  - Post-season data will be collected in Q4 2025 to meet CPUC testimony timing.

- Customers completed the pre-season survey via a self-administered web survey or an interviewer-administered telephone survey.
  - 70% of the surveys completed are web-based and 30% are telephone-based.

2025	Business HFRA				Business Systemwide			
Wave	Pre		Post		Pre		Post	
Mode	Online	Telephone	Online	Telephone	Online	Telephone	Online	Telephone
Completed Surveys	86	136			633	216		
Survey Length	9.2	11.7			8.8	10.4		

Research Methodology – Prevalent Languages

- In addition to English, the pre- and post-season surveys are offered to customers in the 20 prevalent languages spoken within SCE service territory:

English	Farsi	Korean	Vietnamese
Arabic	French	Punjabi	Hindi
Armenian	German	Russian	Hmong
Chinese - Cantonese	Japanese	Spanish	Portuguese
Chinese - Mandarin	Khmer	Tagalog	Thai

- Email invitations greeted potential respondents in all 20 languages with a jump link in the email to a web survey in that language.

- CATI phone center has staff proficient in the various languages, but all are not always available at the time of the interview. Upon encountering a language barrier, the interviewer attempts to identify the language and stores the record for re-contact later. If the language cannot be identified, a surname-based, pre-coded flag is used to assign the record for in-language re-contact.

Research Methodology – Prevalent Languages

Language of Interview	Business Systemwide (Including HFRAs)		Business HFRA (Not including Systemwide)	
	2024 Pre	2025 Pre	2024 Pre	2025 Pre

Executive Summary

Energy for What's Ahead®

SOUTHERN CALIFORNIA EDISON®

Executive Summary

SCE saw a mixed reaction to its wildfire safety efforts in 2025. While more business customers in high-risk fire areas (HFRAs) are aware of SCE's Public Safety Power Shutoff (PSPS) program and remember receiving communications about it, they are less satisfied with the utility's overall performance and outreach compared to the 2024 pre-wildfire season.

Increased Awareness

- SCE's outreach has become significantly more effective at reaching business customers. Between the 2024 and 2025 pre-seasons, awareness of Public Safety Power Shutoff (PSPS) events among HFRA customers increased from 74% to 79%. During the same period, their recall of SCE's wildfire communications rose even more sharply, from 50% to 61%..

Consistent Communication Sources

- Email, mail, and the SCE website remain primary channels through which business customers recall receiving information. Recall from digital channels like email and text messages saw significant growth.

Executive Summary

Overall opinion of SCE's wildfire preparedness has declined following the early 2025 fires..

Negative Perceptions

- Favorable opinions of SCE's PSPS program among HFRA business customers fell from 50% in 2024 to 44% in 2025. While satisfaction with SCE's overall wildfire preparedness efforts remained flat in HFRAs , it decreased significantly systemwide, from 55% to 50%.

Business customers are hearing the PSPS messaging but are becoming increasingly dissatisfied with SCE's performance.

Key Findings

Among business customers in High Fire Risk Areas (HFRA), awareness of Public Safety Power Shutoff (PSPS) significantly increased from 74% in the 2024 pre-season to 79% in the 2025 pre-season. Similarly, the recall of SCE's wildfire communications saw a significant rise from 50% to 61% over the same period.

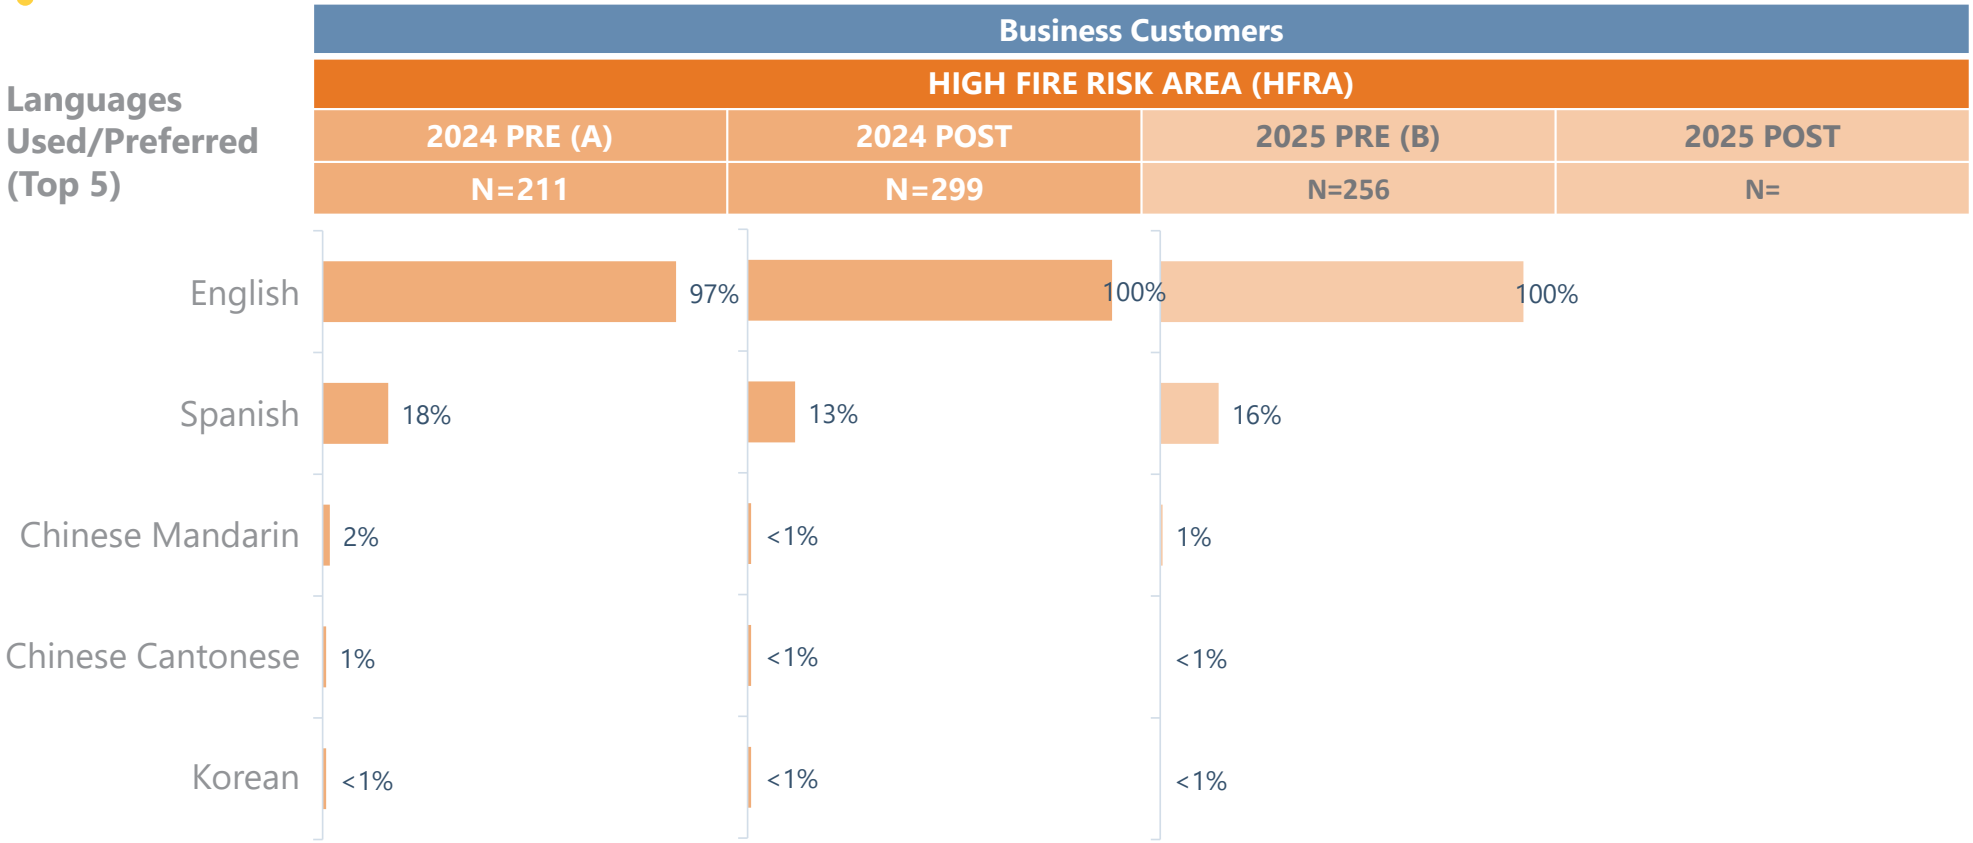
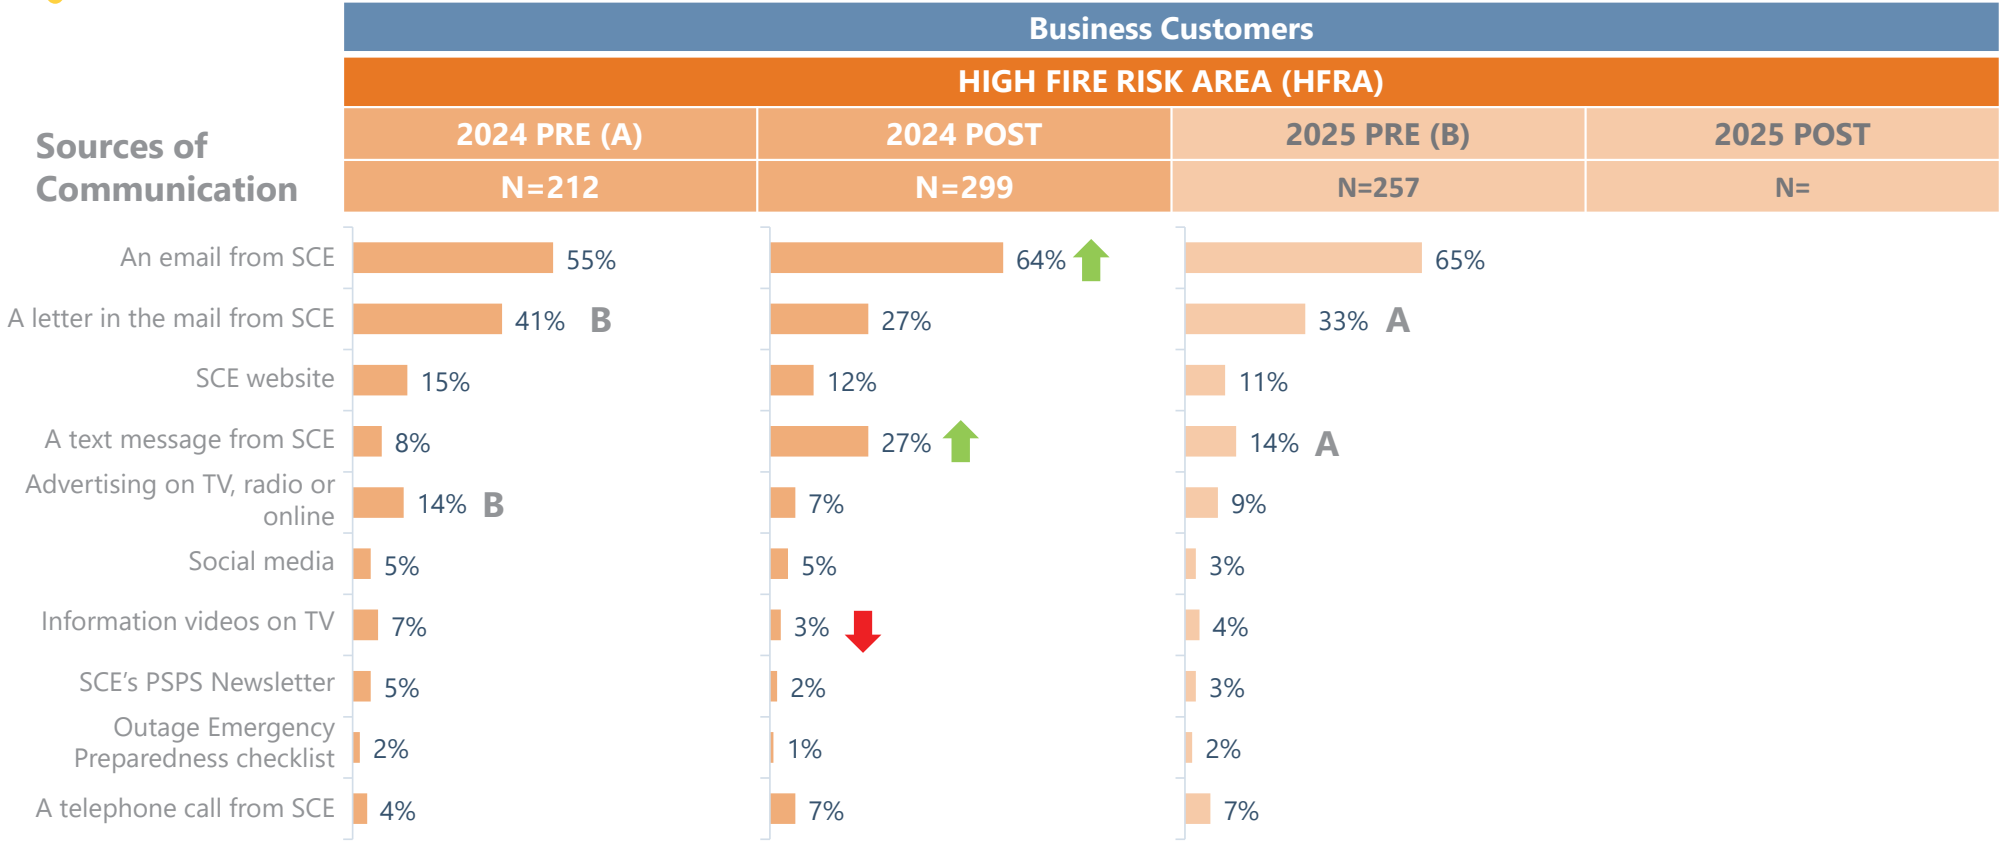
Among HFRA business customers who recalled SCE communications, nearly all information was seen or heard in English & Spanish.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q5. [RECALL COMMUNICATION] In what language(s) was the wildfire safety and preparedness information that you recall seeing or hearing from SCE?

The primary ways HFRA business customers recalled hearing about wildfire preparedness from SCE were through email, letters in the mail, texts from SCE, and the SCE website. Recall from email, text messages and social media all increased between the 2024 and 2025 pre-season surveys.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q6. [RECALL COMMUNICATION] Where did you see or hear SCE's communications about wildfire season safety and preparedness?

Other than SCE, HFRA business customers most commonly received wildfire safety information from local news reports, their city or county government, and CalFire. The use of government sources decreased significantly from the 2024 to the 2025 pre-season survey.

Other Communication Sources

Business Customers

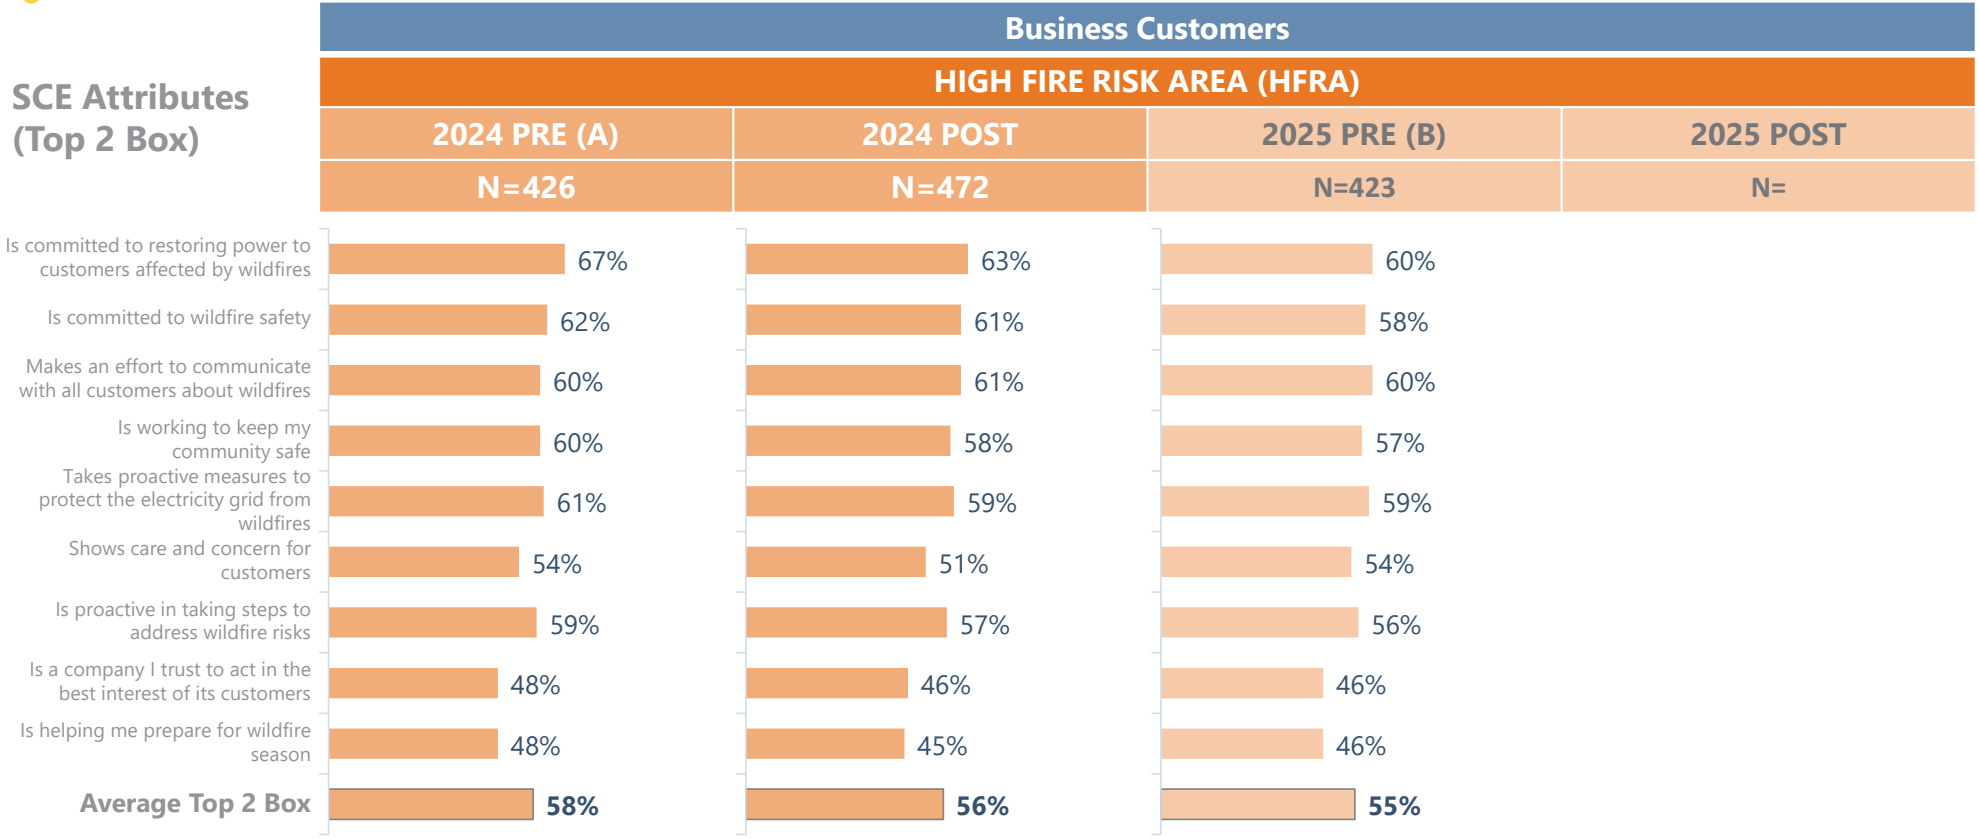
Q10. Other than SCE's communications, what other sources have you used to obtain information about wildfire safety and preparedness?

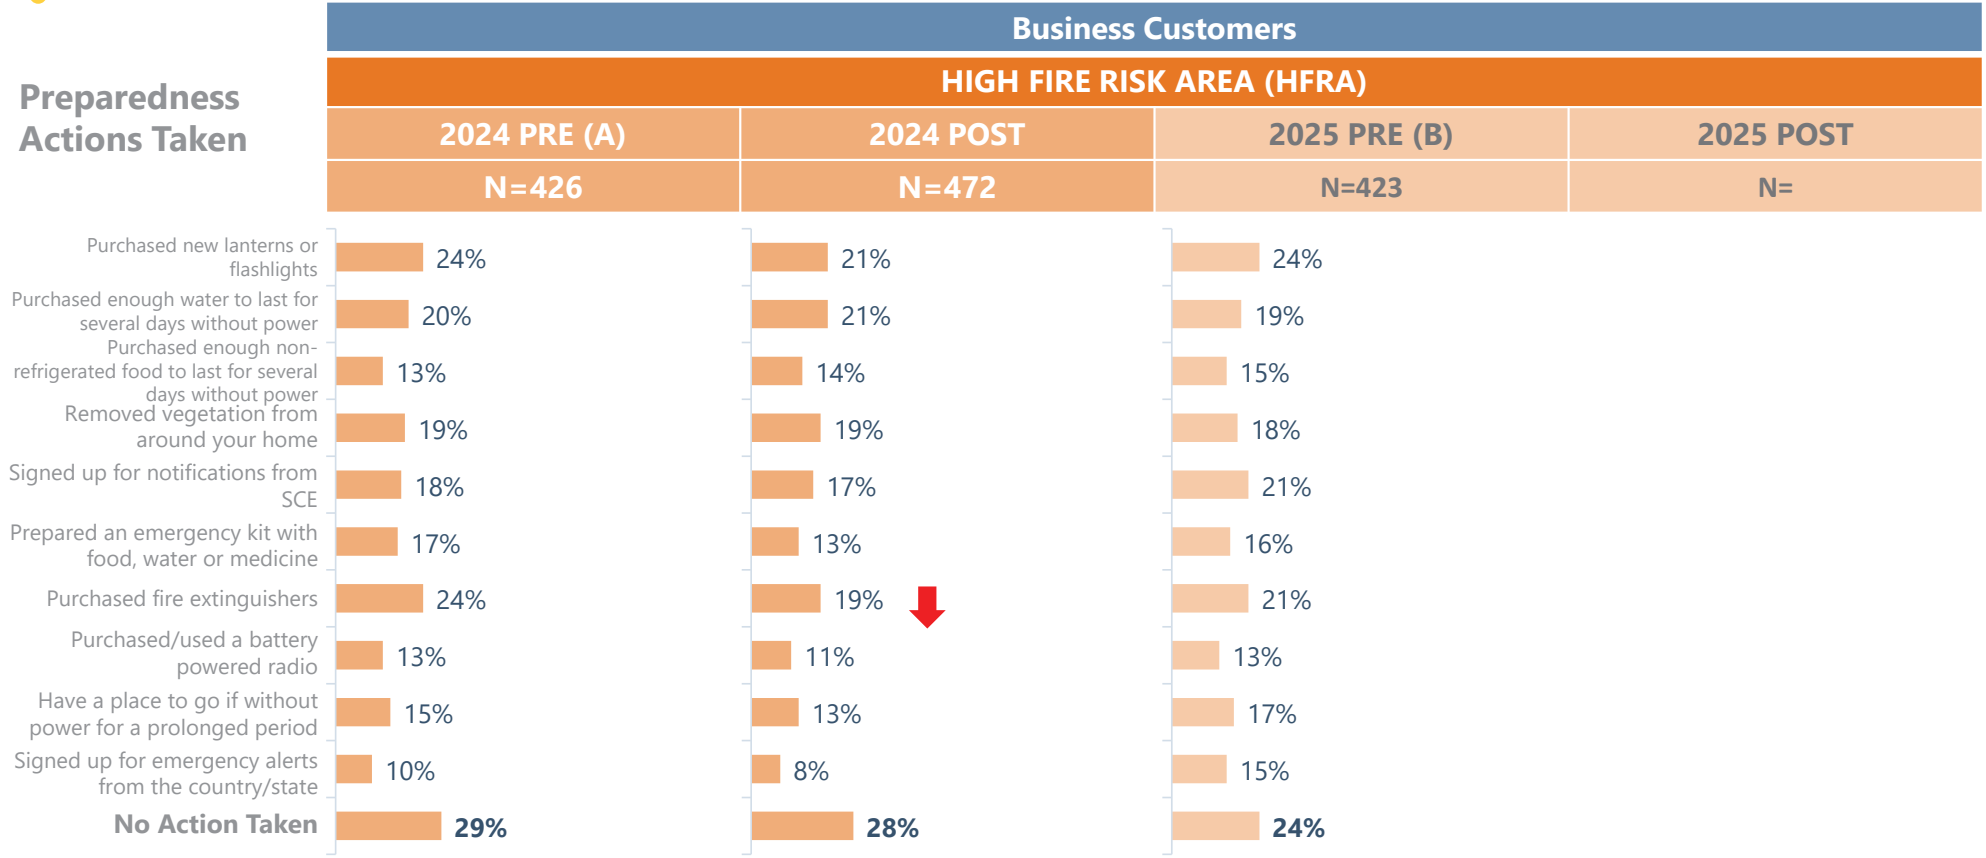
Customer agreement with SCE attributes, such as its commitment to safety and the community, remained consistent across all measured attributes between the 2024 and 2025 pre-season surveys.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q14. Using a scale where 1 means completely disagree and 5 means completely agree, Please indicate how much you agree or disagree with the following statements about SCE. SCE…

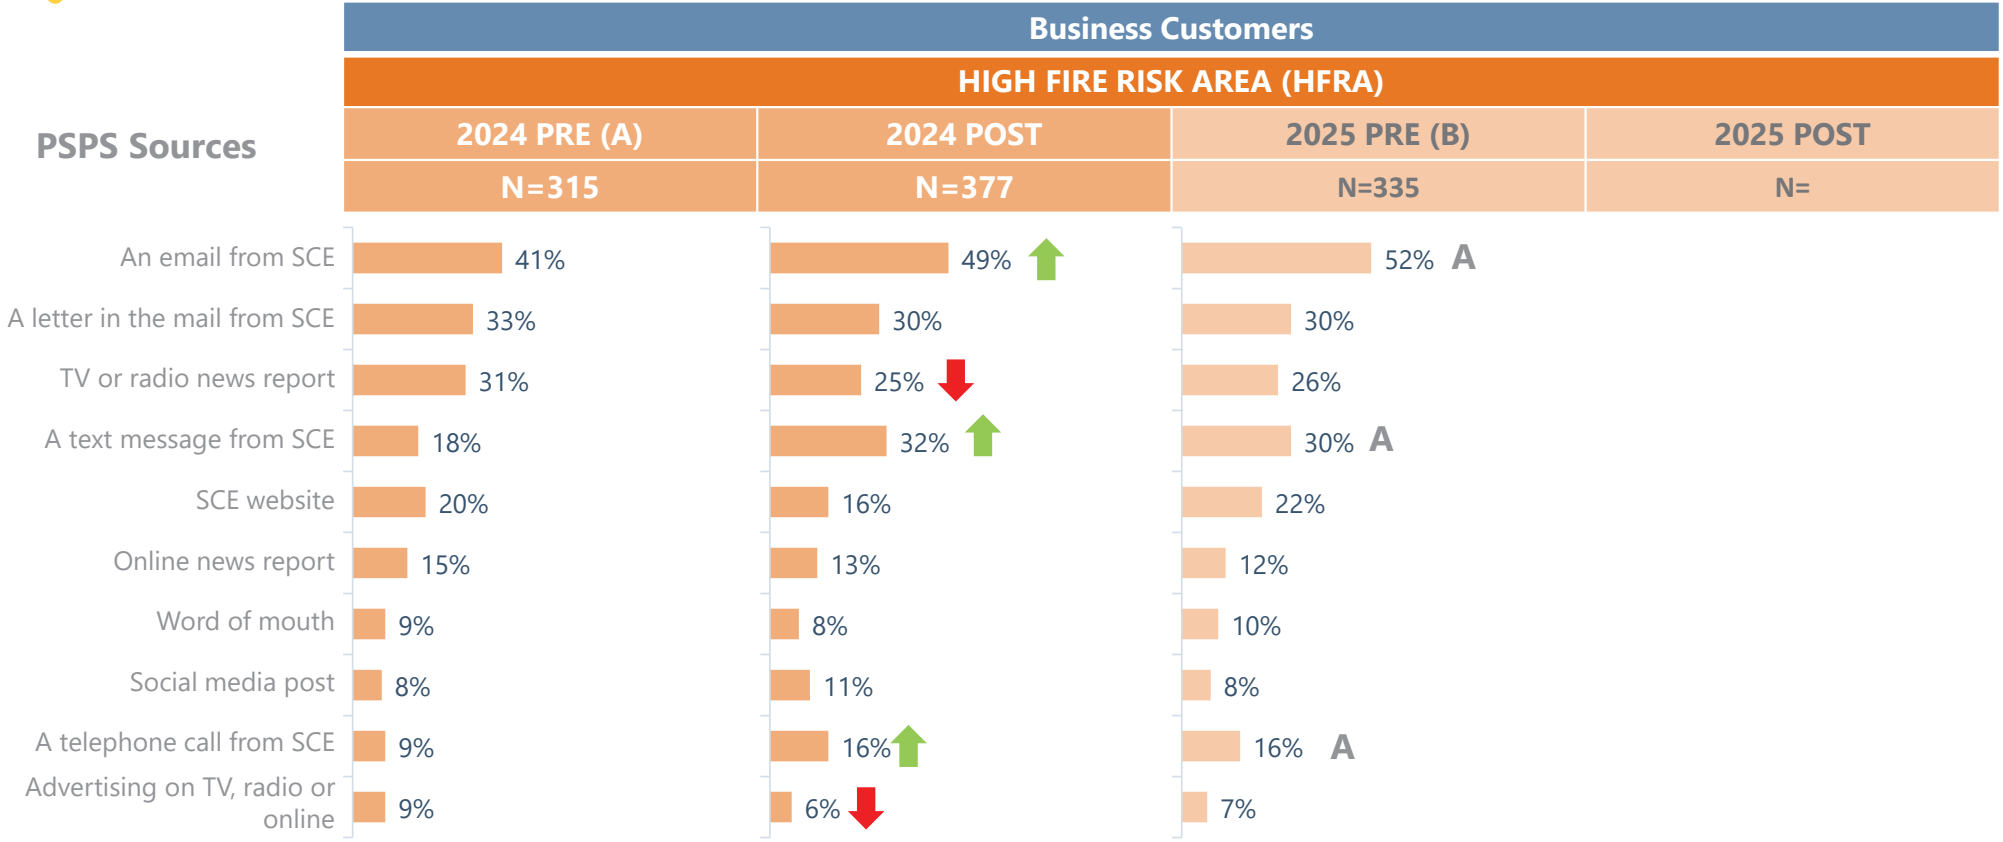
The most common preparedness actions taken by HFRA business customers include purchasing flashlights, water, and non-perishable food.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q21. What, if any, actions have you taken to prepare for a Public Safety Power Shutoff (PSPS) in 2025?

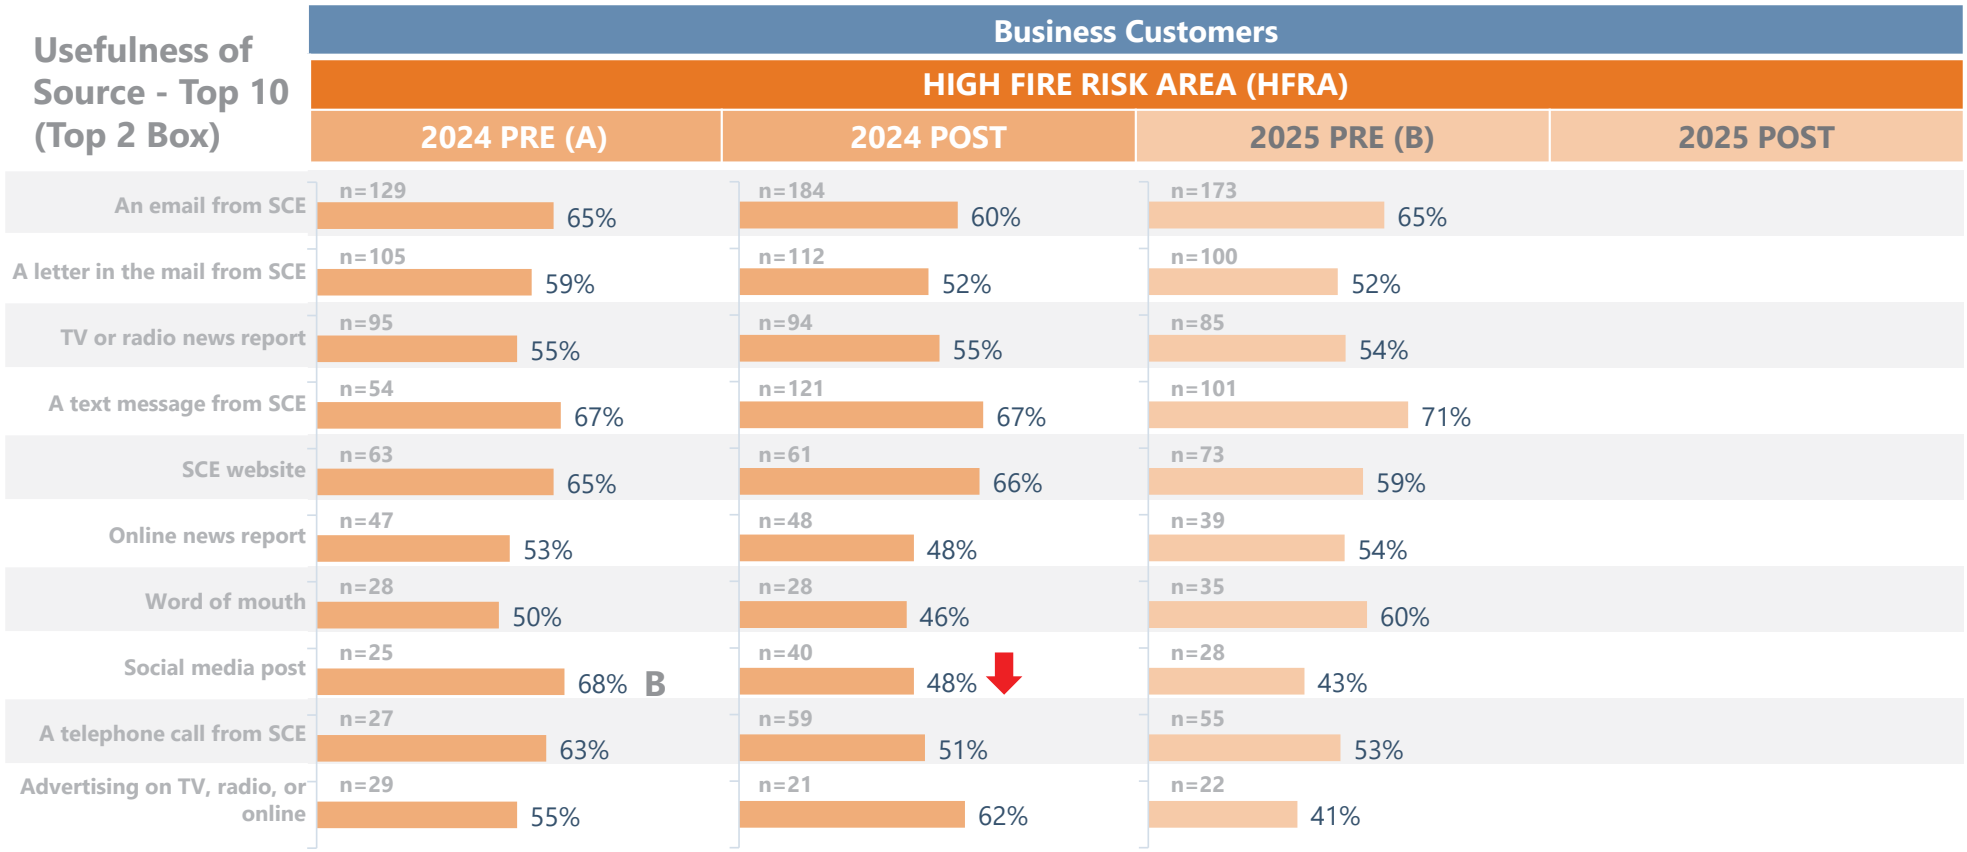
HFRA business customers most frequently heard about PSPS through emails from SCE, texts from SCE, TV or radio news reports, and letters from SCE. There were significant increases in awareness through SCE emails, text messages, and telephone calls from SCE.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q17. [RECALL PSPS] Where have you heard about Public Safety Power Shutoffs?

HFRA business customers found PSPS information delivered via text / email from SCE to be the most useful. Social Media usefulness dropped compared to 2024 pre-season.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q19A. [SAW COMMUNICATIONS] On a 1 to 5 scale where 1 is not at all useful and 5 is extremely useful, how useful was the PSPS information from ...?

Detailed Findings

SOUTHERN CALIFORNIA EDISON®

Customer awareness of PSPS and recall of SCE's wildfire communications have both significantly increased from 2024 to 2025 across nearly all areas.

Business Customers					
HIGH FIRE RISK AREA (HFRA)		NON-HIGH FIRE RISK AREA		SYSTEMWIDE	
2024 PRE	2025 PRE	2024 PRE	2025 PRE	2024 PRE	2025 PRE

Satisfaction with SCE's Wildfire Preparedness Efforts	56%	53%	55%	48% ↓	55%	50% ↓

↑↓ indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q22. Overall, what is your opinion of SCE's Public Safety Power Shutoff program?
Q15. How satisfied are you with SCE's overall wildfire safety and preparedness efforts?

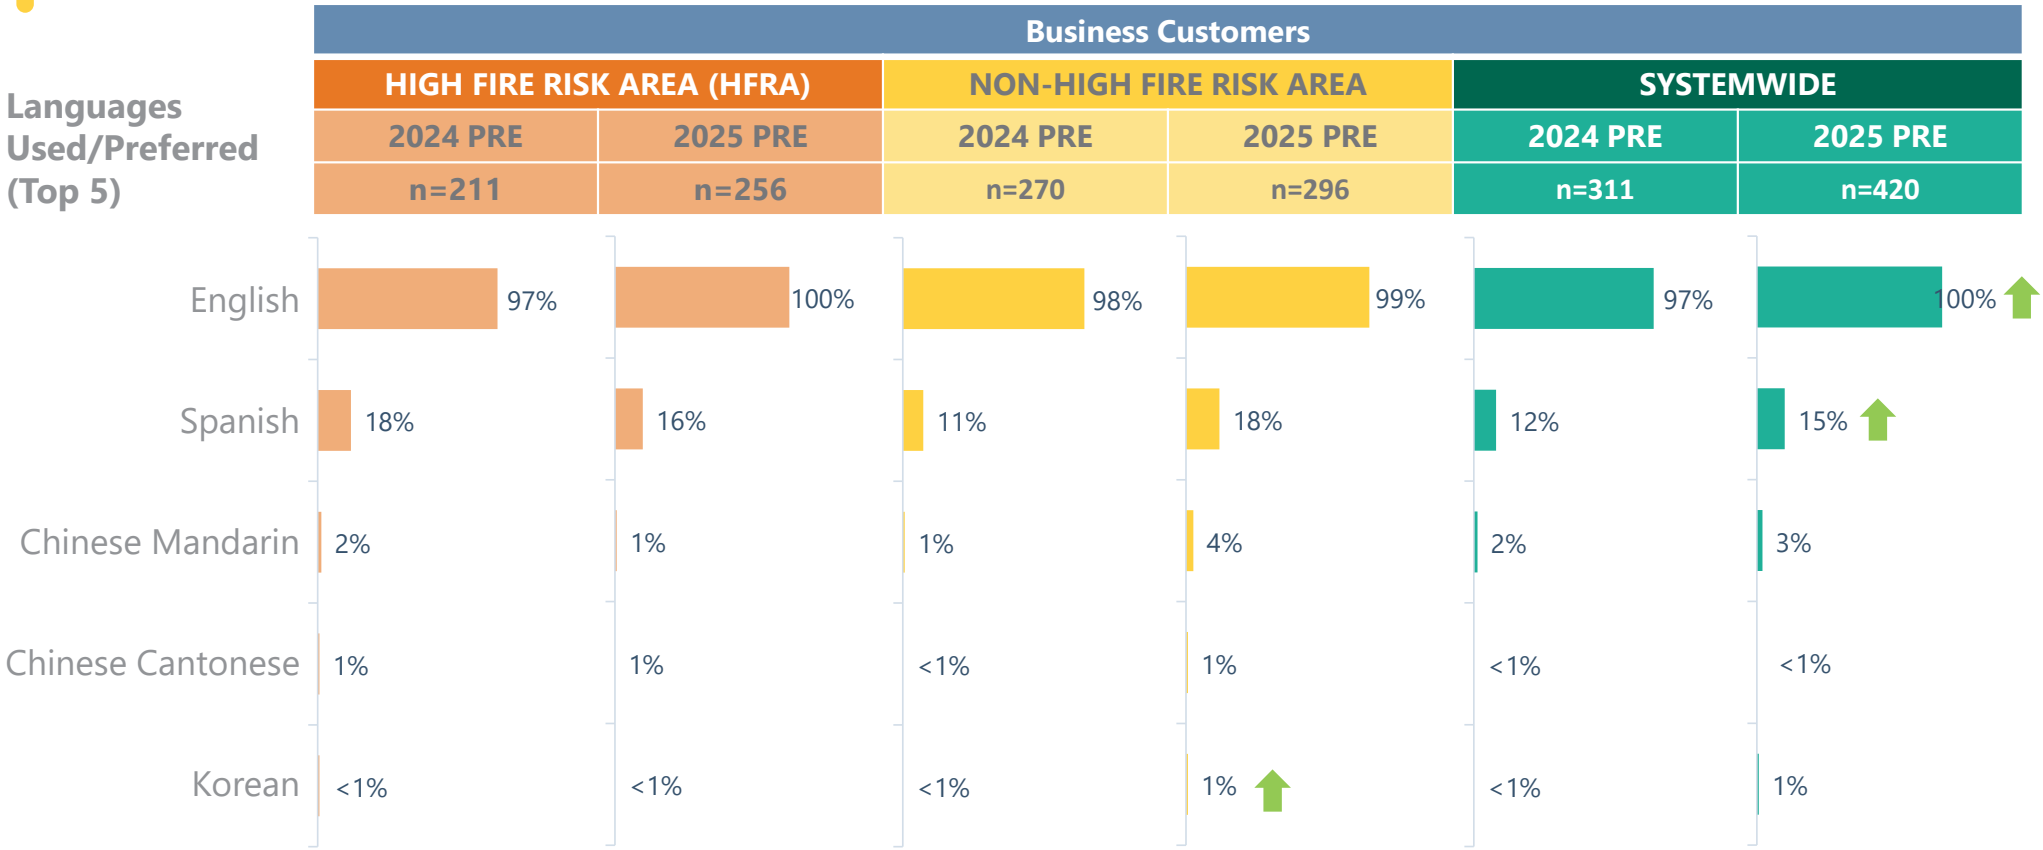
There has been a significant increase in self-reported preparedness for a prolonged power outage across all customer areas from 2024 to 2025. In High Fire Risk Areas, the percentage of business customers who feel prepared increased from 62% to 69%.

Personal Level of Preparedness:	Business Customers					
	HIGH FIRE RISK AREA (HFRA)		NON-HIGH FIRE RISK AREA		SYSTEMWIDE	
	2024 PRE	2025 PRE	2024 PRE	2025 PRE	2024 PRE	2025 PRE
	n=426	n=423	n=666	n=648	n=752	n=849
Completely / Somewhat Prepared	62%	69% ↑	52%	56%	53%	59% ↑

↑↓ indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q20. A Public Safety Power Shutoff event could last anywhere from 24-48 hours, or longer in some cases. How would you rate your level of preparedness for being without electricity for an extended period?

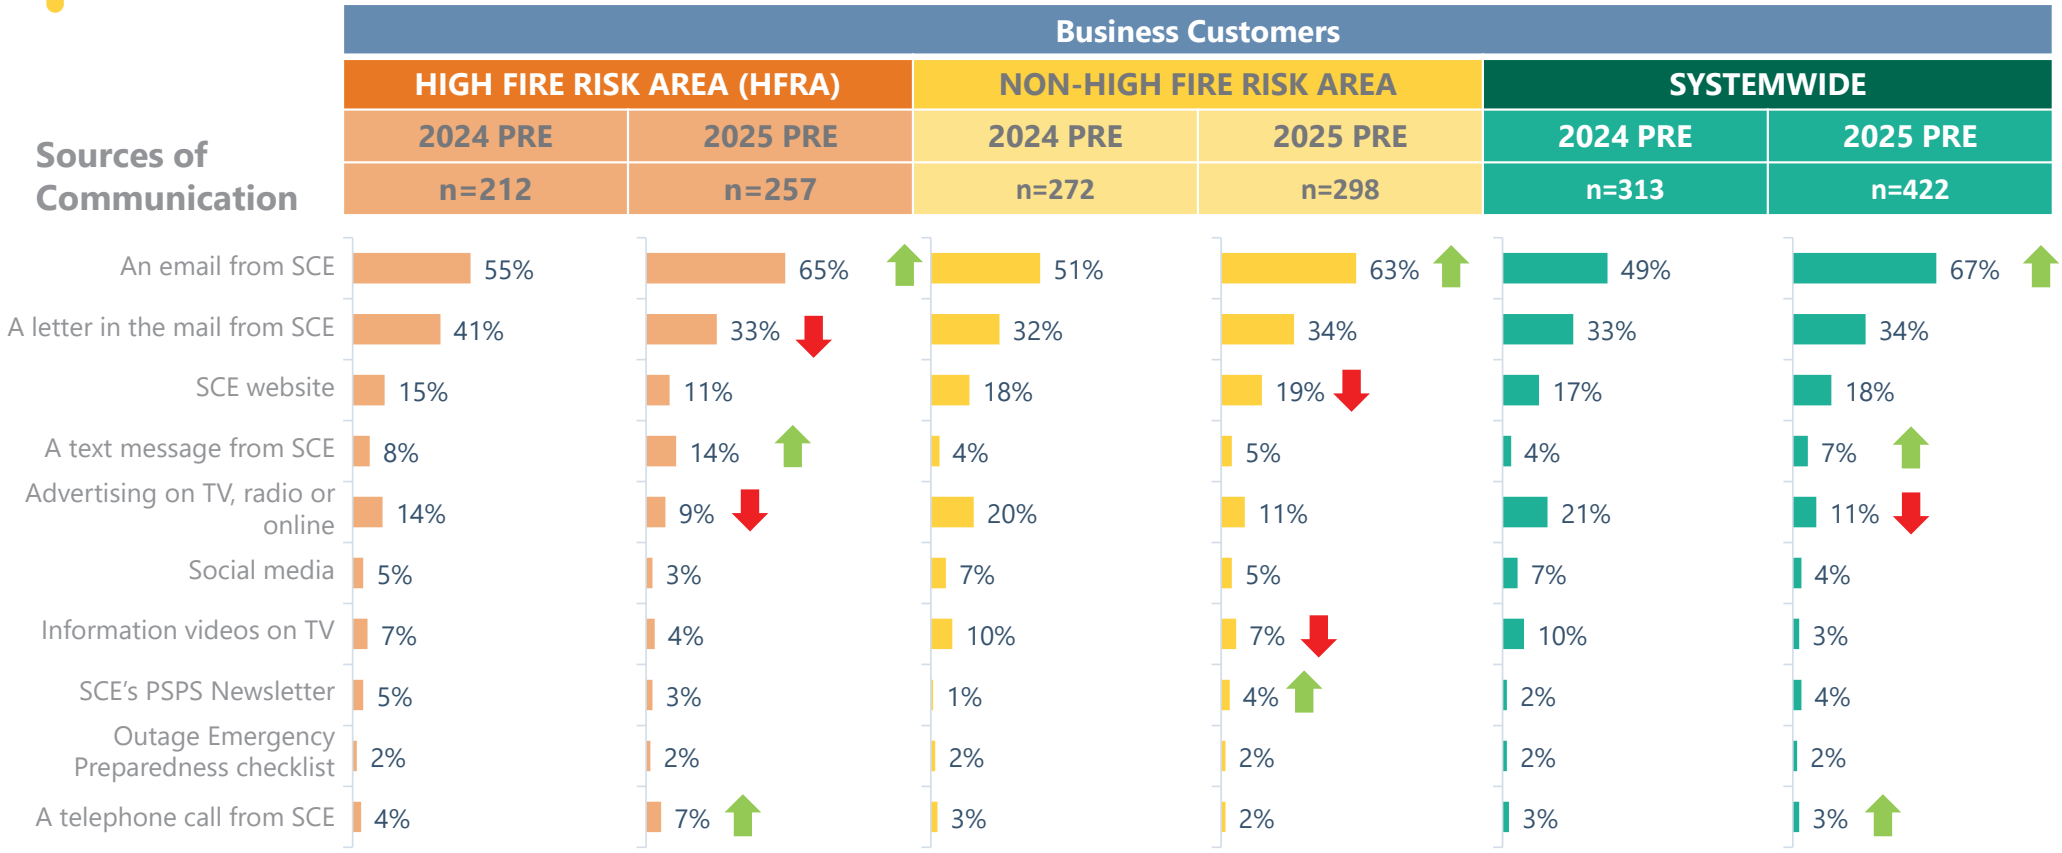
Among business customers who recalled SCE communications, nearly all information was seen or heard in English & Spanish.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q5. [RECALL COMMUNICATION] In what language(s) was the wildfire safety and preparedness information that you recall seeing or hearing from SCE?

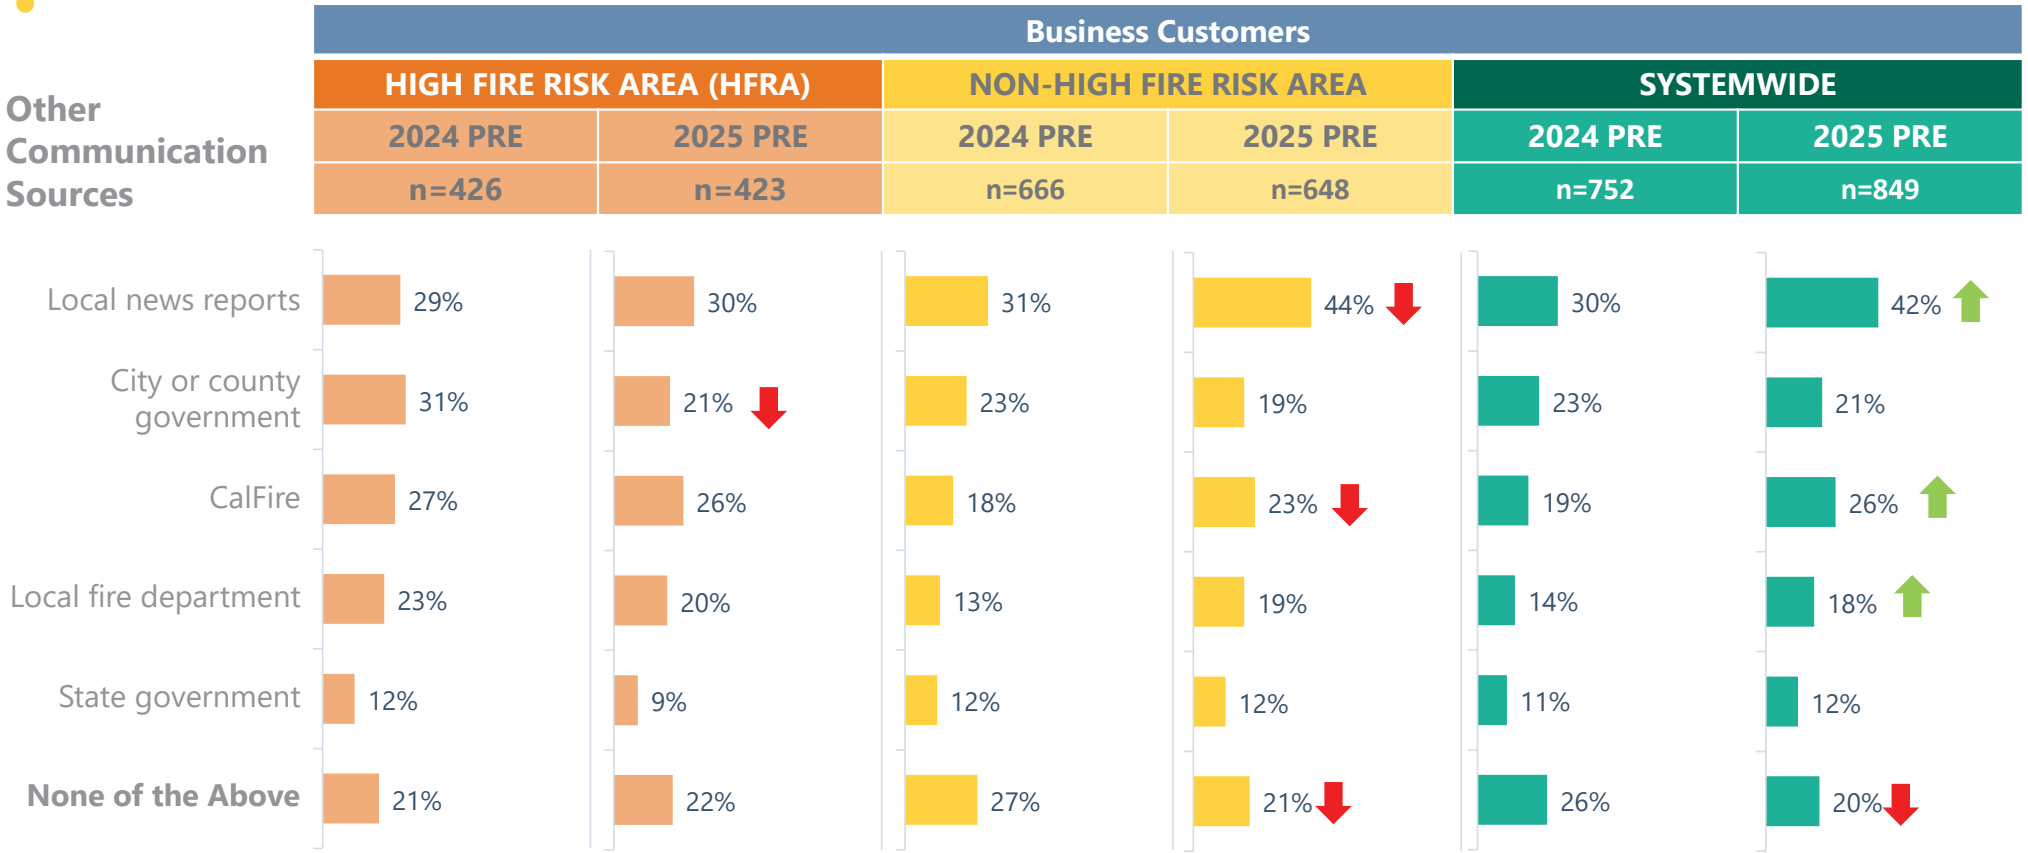
Email and mail from SCE are the most cited sources where customers recall seeing or hearing communications about wildfire preparedness. Email and text messages showed an increase in recall among all business customers from 2024 to 2025.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q6. [RECALL COMMUNICATION] Where did you see or hear SCE's communications about wildfire season safety and preparedness?

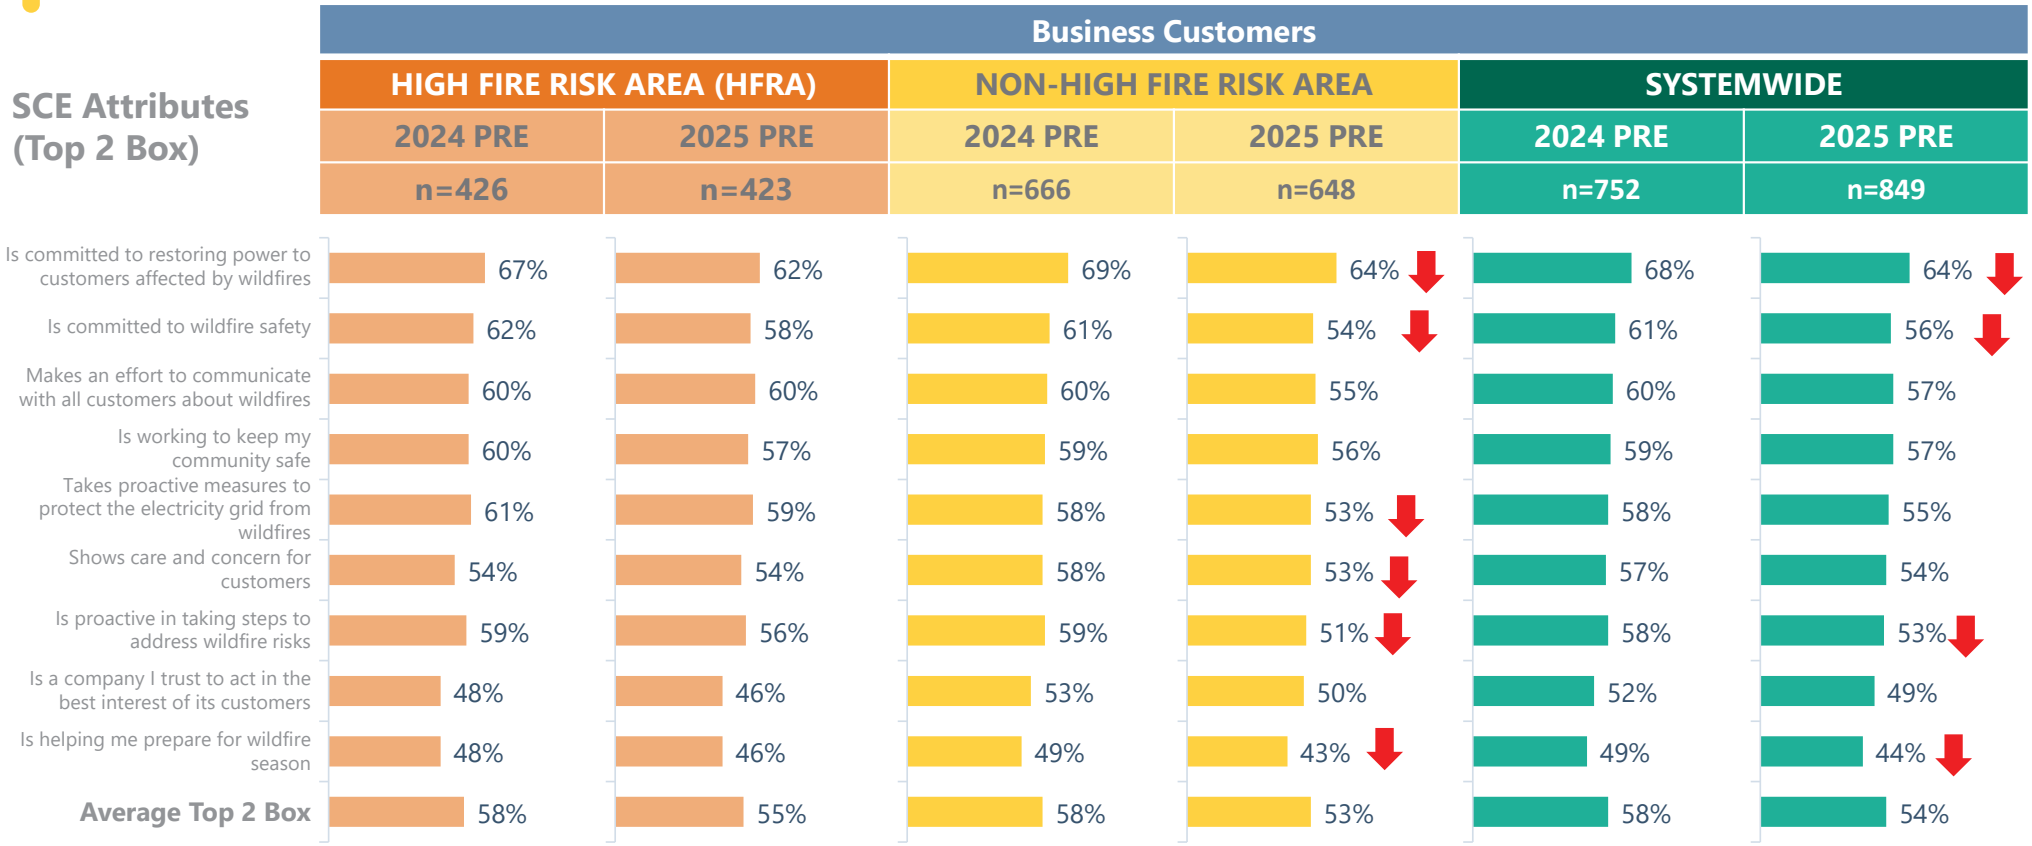
Local news reports are the most common non-SCE source for wildfire information, followed by city or county government and CalFire. The reliance on these external sources has increased Systemwide between 2024 and 2025.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q10. Other than SCE's communications, what other sources have you used to obtain information about wildfire safety and preparedness?

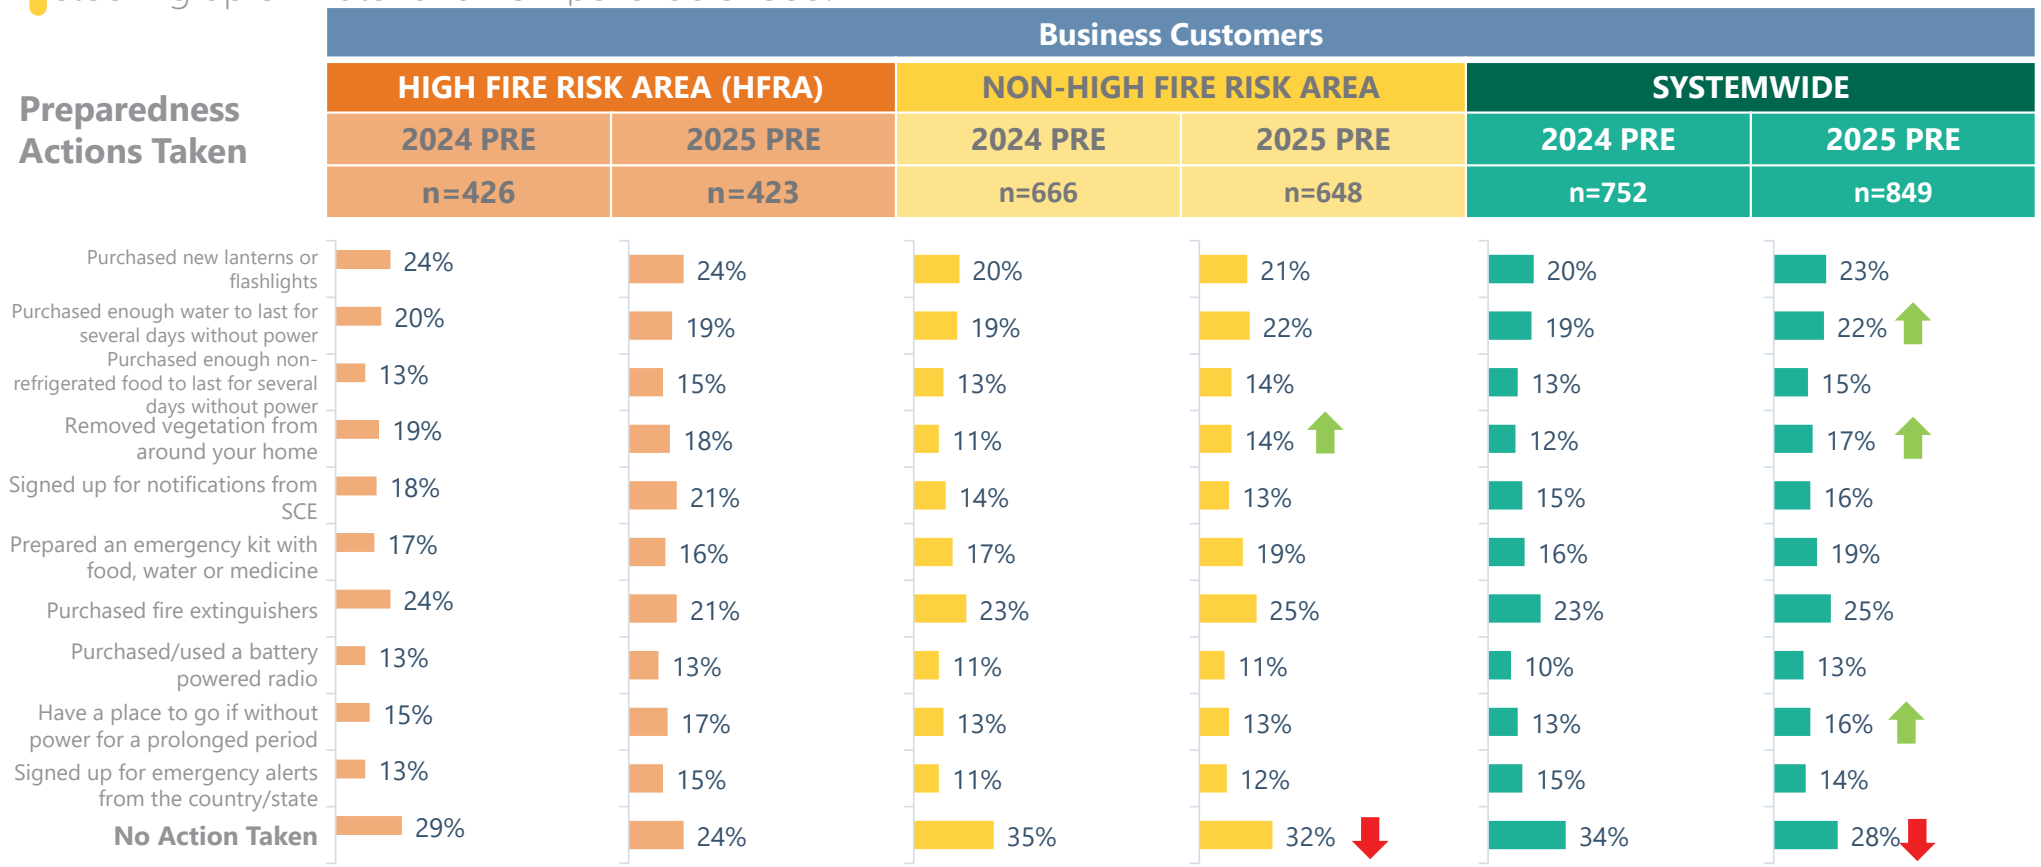
Customer perception of SCE has declined significantly among business customers in Non-High Fire Risk areas between 2024 and 2025.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q14. Using a scale where 1 means completely disagree and 5 means completely agree, Please indicate how much you agree or disagree with the following statements about SCE. SCE...

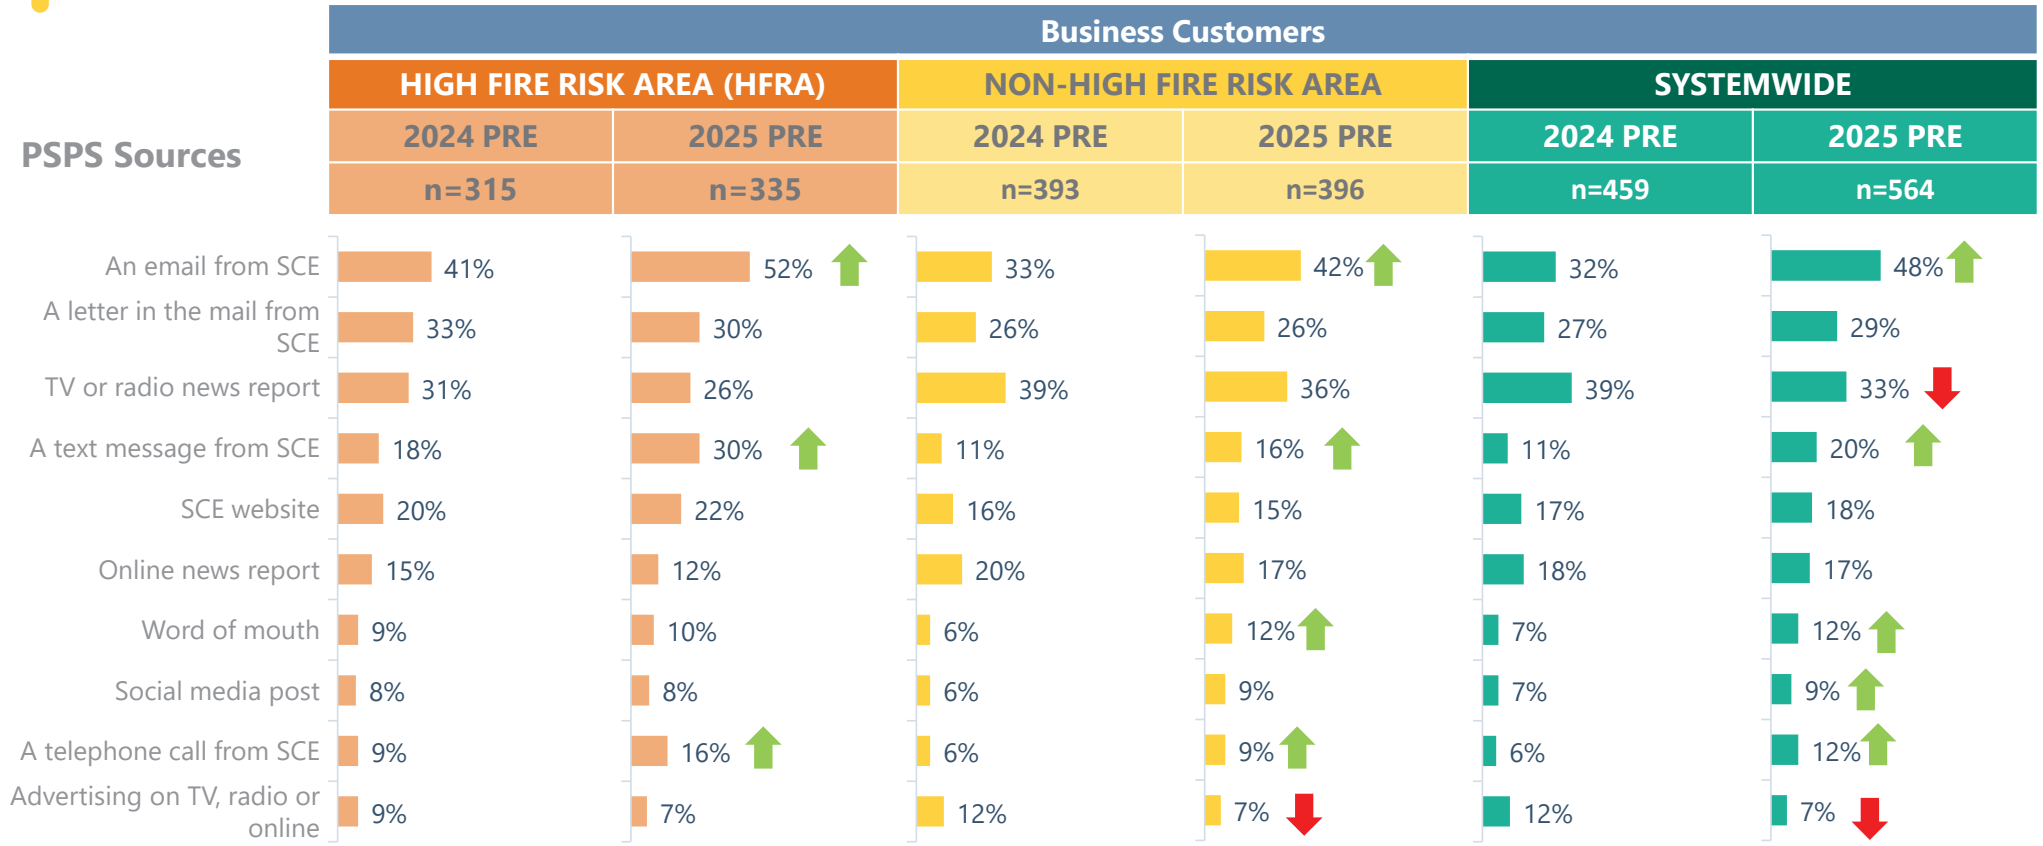
Increasingly more customers have taken action to prepare for power outages in 2025. Purchasing lanterns or flashlights is the most common action taken by business customers to prepare for a PSPS event in 2025, followed by stocking up on water and non-perishable food.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q21. What, if any, actions have you taken to prepare for a Public Safety Power Shutoff (PSPS) in 2025?

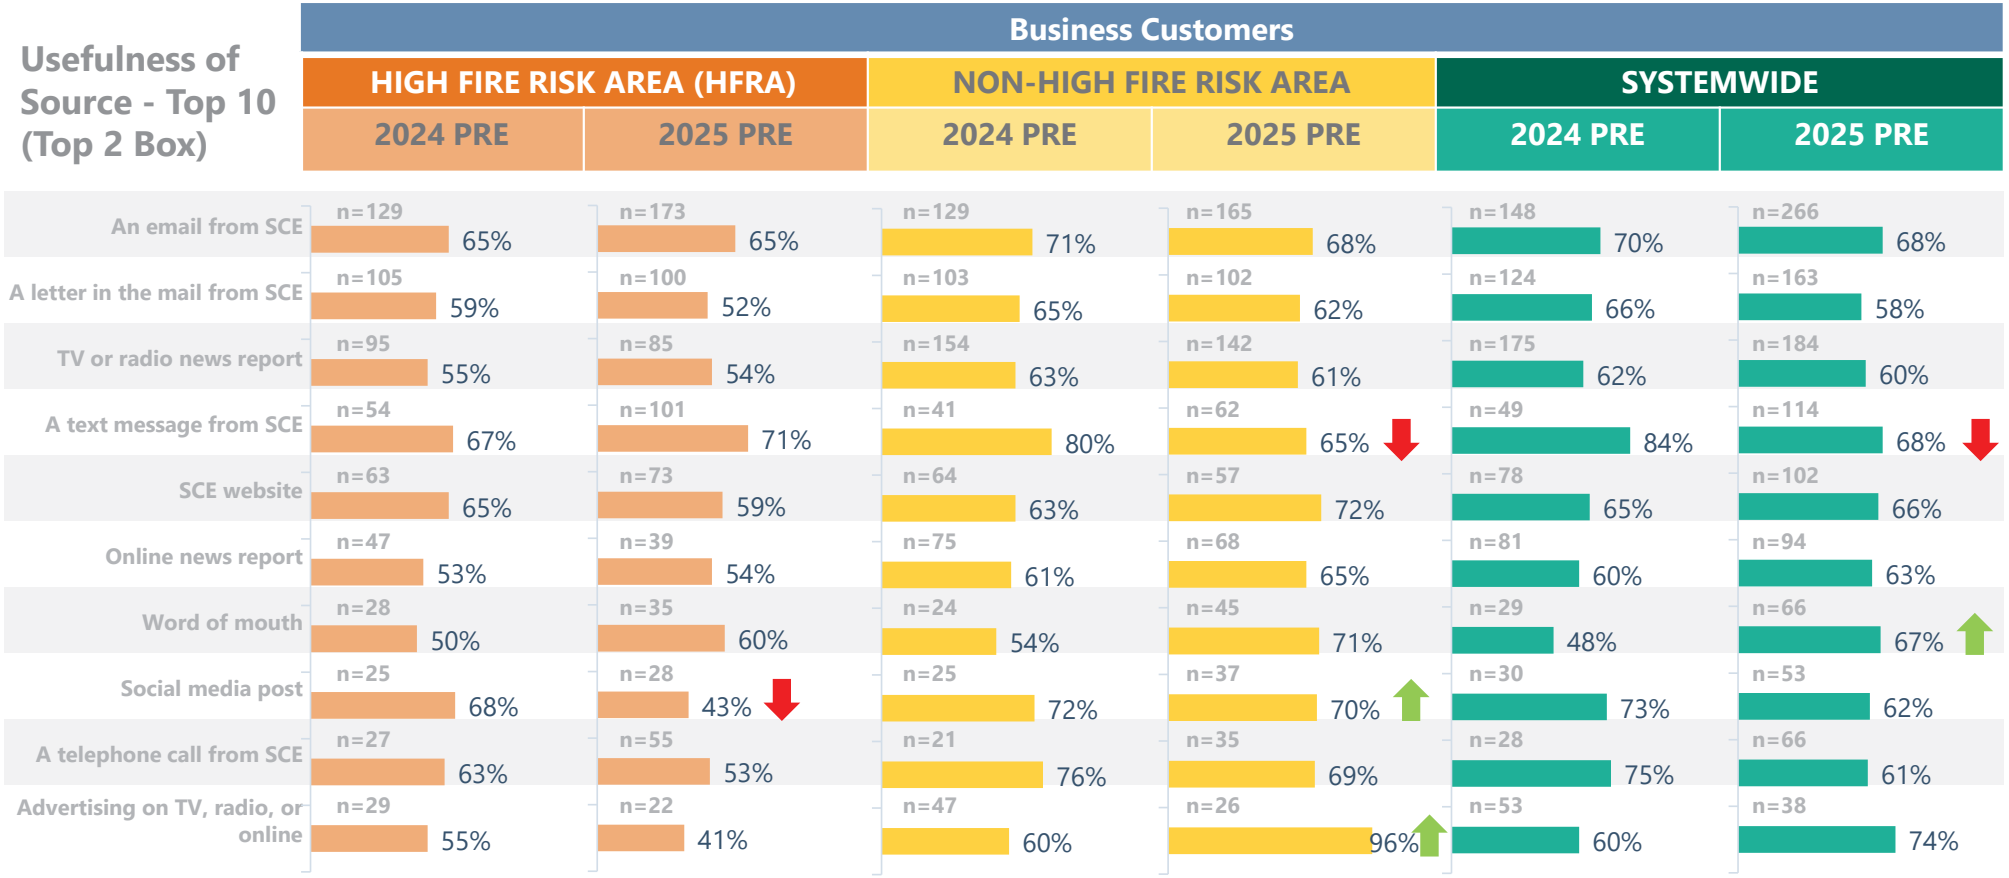
Email from SCE is the primary source through which customers in all areas have heard about Public Safety Power Shutoffs. Email, text messages, social media, word of mouth and calls from SCE all saw an increase in recall between 2024 and 2025.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q17. [RECALL PSPS] Where have you heard about Public Safety Power Shutoffs?

Business customers found PSPS information delivered via text / email from SCE to be the most useful.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q19A. [SAW COMMUNICATIONS] On a 1 to 5 scale where 1 is not at all useful and 5 is extremely useful, how useful was the PSPS information from ...?

Customers who recall seeing or hearing SCE advertising about PSPS and emergency preparedness have increased among HFRAs, but remained flat systemwide, rising from 50% in 2024 to 54% in 2025. Business customers in High Fire Risk Areas also reported the highest recall of advertising.

Seen SCE PSPS Advertising

Background and Research Methodology

Energy for What's Ahead®

SOUTHERN CALIFORNIA EDISON®

Background

- As mandated by CPUC Decision 20.03.004, starting in 2020, the California IOUs began conducting a two-wave survey (i.e., pre-wildfire season and post-wildfire season) on an annual basis.
- The objective of the survey is to assess the effectiveness of utility communications and outreach for wildfire safety/preparedness and PSPS activities.
- Each IOU determined its own methodology for optimizing the survey implementation and utilized their own preferred research partners.
- Core questions are asked by all three IOUs via their individual surveys, allowing some comparisons across IOUs, while each IOU also incorporates custom questions.
- Most of the pre-season questions are repeated in the post-season survey along with additional unique post-season questions.
- SCE administers the pre- and post-season surveys to residential and business customers across its service territory (i.e., systemwide) with a special focus on high fire risk areas (HRFAs).

Research Methodology – Target Location

- This research specifically targets customers who reside in High Fire Risk Areas (HFRAs).
- In addition to HFRAs, customers within the entire SCE service territory are also included.
  - For this research, this group of customers are referred to as "Systemwide".
- This means the HFRA base size (i.e., the total number of responses or completed surveys) is supplemented by the customers who reside in a HFRA from the Systemwide sample.
- Given this approach, the Systemwide base size will not equal the HFRA + non-HFRA base sizes.
- In 2025, customers affected by the Eaton fire were excluded from the research.

Research Methodology – Data Collection

- 4,963 residential customers participated in the 2025 post-season survey between November 5th 2025 and January 10th 2026.
  - 4,033 residential customers participated in the 2025 pre-season survey between June 19th 2025 and August 8th 2025.
- Customers completed the post-season survey via a self-administered online survey or an interviewer-administered telephone survey.
  - 70% of the surveys completed are web-based and 30% are telephone-based.

2025	Residential HFRA				Residential Systemwide			
Wave	Pre		Post		Pre		Post	
Mode	Online	Telephone	Online	Telephone	Online	Telephone	Online	Telephone
Completed Surveys	1229	425	1220	426	1740	639	1884	640
Survey Length	17.0	21.3	21.3	29.7	16.2	21.1	19.7	27.6

Research Methodology – Prevalent Languages

- In addition to English, the pre- and post-season surveys are offered to customers in the 20 prevalent languages spoken within SCE service territory:

English	Farsi	Korean	Vietnamese
Arabic	French	Punjabi	Hindi
Armenian	German	Russian	Hmong
Chinese - Cantonese	Japanese	Spanish	Portuguese
Chinese - Mandarin	Khmer	Tagalog	Thai

- Email invitations greeted potential respondents in all 20 languages with a jump link in the email to a web survey in that language.
- CATI phone center has staff proficient in the various languages, but all are not always available at the time of the interview. Upon encountering a language barrier, the interviewer attempts to identify the language and stores the record for re-contact later. If the language cannot be identified, a surname-based, pre-coded flag is used to assign the record for in-language re-contact.

Research Methodology – Prevalent Languages

Executive Summary

Energy for What's Ahead®

SOUTHERN CALIFORNIA EDISON®

Summary

SCE experienced a mixed reaction to its wildfire safety efforts among customers in 2025. While more customers living in high-risk fire areas (HFRAs) are aware of SCE's Public Safety Power Shutoff (PSPS) program, fewer remember receiving communications about it and were satisfied with the utility's overall performance.

- **Stable PSPS Program Awareness and Declining Wildfire Communications Recall**
  - Awareness of the PSPS program among HFRA residents remained stable at 87% between 2025 pre-wave and post-wave.
  - Recall of SCE's wildfire communications declined significantly from 64% (pre-wave) to 56% (post-wave) driven by the recency of the Eaton fire and PSPS events that occurred in June and July (during the pre-wave data collection).

- **In-Language Communications (Prevalent Languages)**
  - Among High Fire Risk Area (HFRA) residents who prefer communications in a non-English language, satisfaction declined directionally from the 2025 pre-wave to post-wave (77% to 70%).
  - However, their opinion of the PSPS program improved significantly (64% to 83%), suggesting perceptions of the program strengthened.

Summary

- **Negative Perceptions of SCE**
  - Systemwide satisfaction with SCE's overall wildfire preparedness efforts fell 3 points, from 52% to 49%.
  - Similarly, customer agreement with positive attributes about SCE, such as its commitment to safety and the community, declined significantly across most measured metrics.

- **PSPS Resource Utilization**
  - While resource awareness remained steady from the pre-wave to the post-wave, interest remained stable or declined for many resources.

Key Findings

Among residents in High Fire Risk Areas (HFRA), awareness of SCE PSPS remained flat (87%) from 2025 pre-season to 2025 post-season. Interestingly, there was a significant drop in recall of SCE wildfire communications from pre-season (64%) to post-season (56%). We believe this is due to the wildfires from January of last year.

Q1. "In the past few months do you recall any communications of any type (i.e., mail, TV, radio, social media, etc.) from SCE about the threat of wildfires and how you can prepare for them?"
Q16. Public Safety Power Shutoff, or PSPS, is a precautionary safety measure where SCE may proactively turn off power lines when extreme fire danger conditions are forecasted, in order to reduce the risk of wildfires. Before today, had you ever heard of the Public Safety Power Shutoff program?

In the 2025 pre-season survey, 47% of HFRA residents had a favorable opinion of SCE's PSPS program while 48% in the post-season survey had a favorable opinion. This is virtually unchanged pre to post. Similarly, there was no change from the pre-season to the post-season survey for satisfaction with SCE's wildfire preparedness efforts (49%).

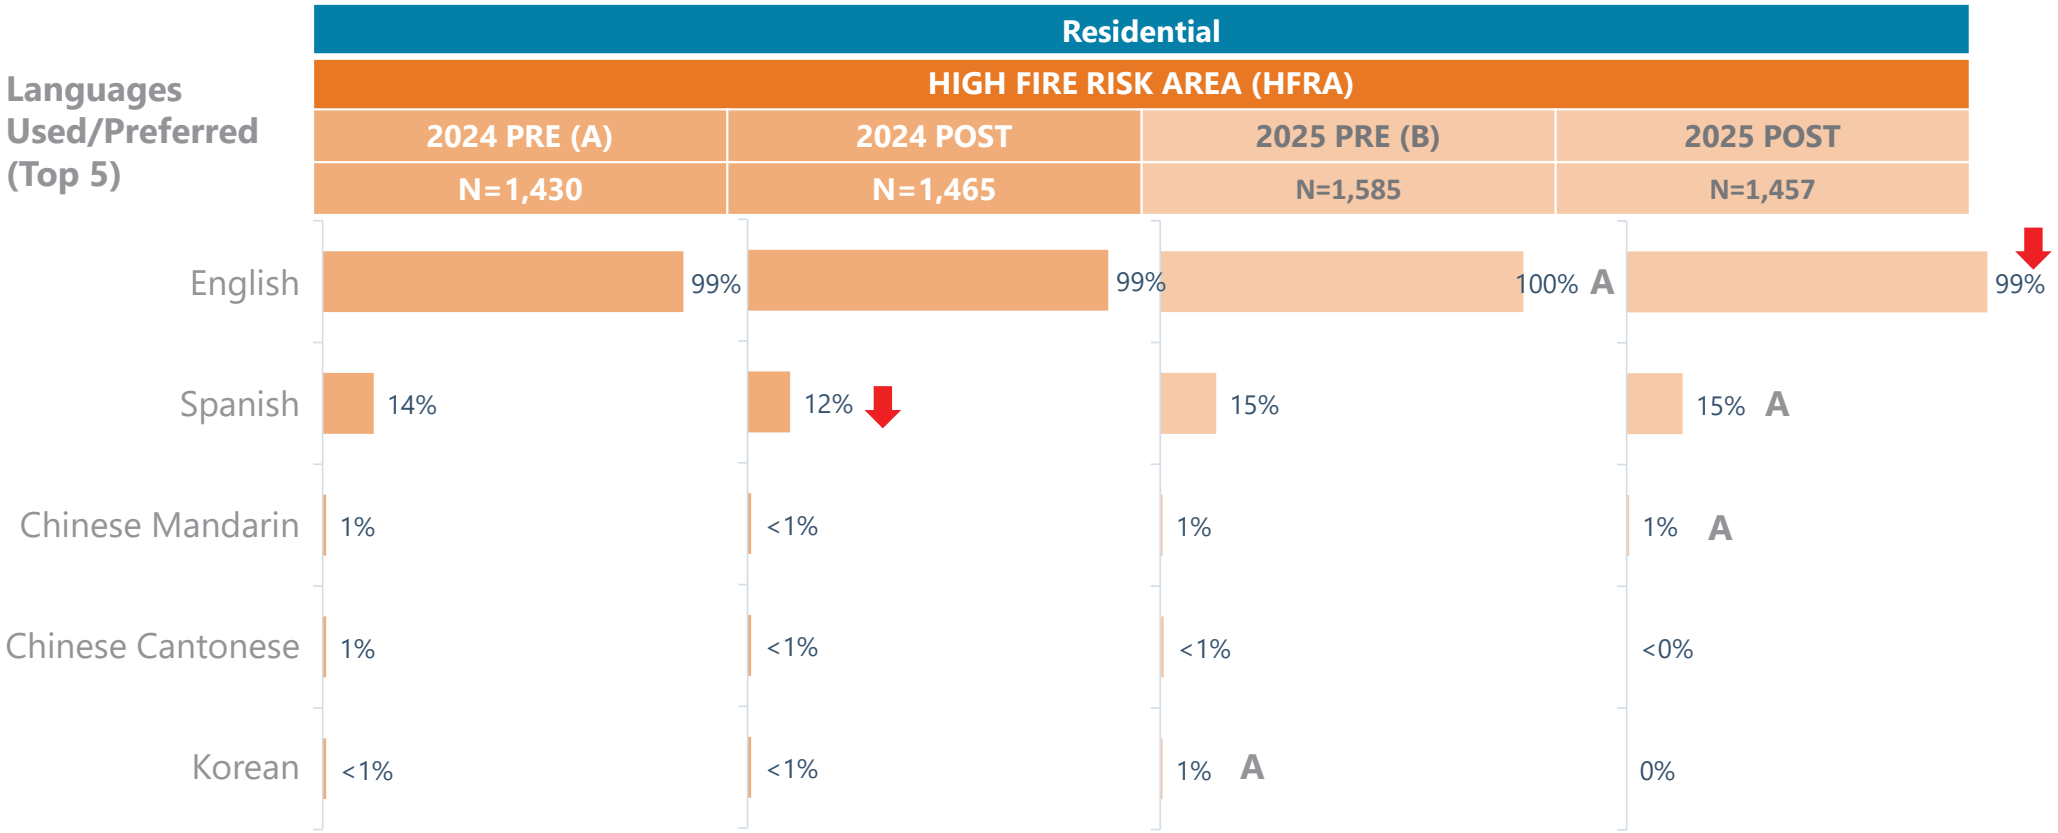
indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q20. A Public Safety Power Shutoff event could last anywhere from 24-48 hours, or longer in some cases. How would you rate your level of preparedness for being without electricity for an extended period?

Among HFRA residents who recalled SCE communications, nearly all information was seen or heard in English & Spanish.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

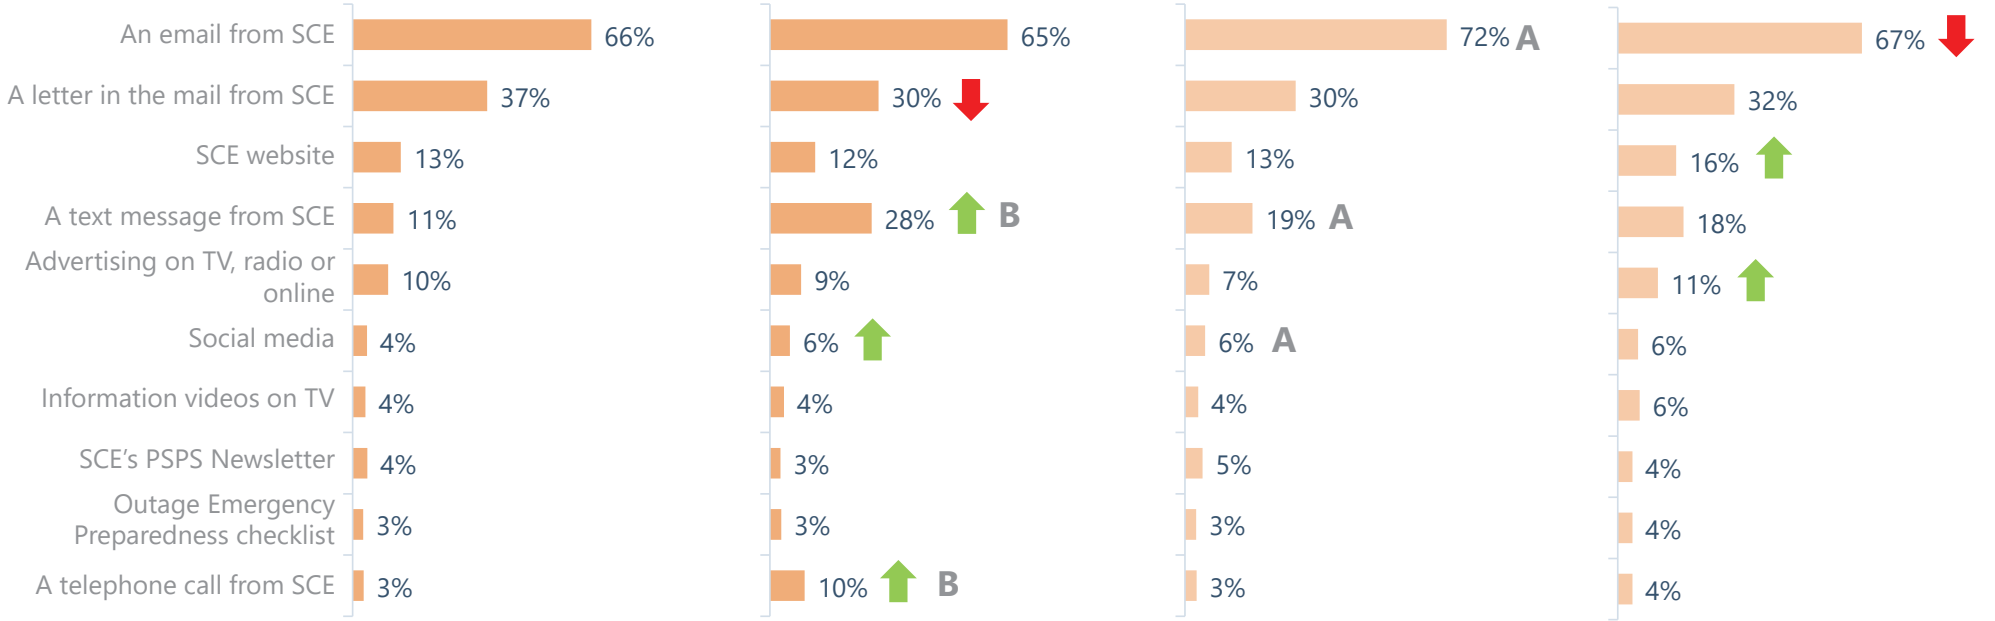
Q5. [RECALL COMMUNICATION] In what language(s) was the wildfire safety and preparedness information that you recall seeing or hearing from SCE?

The primary ways HFRA residents recalled hearing about wildfire preparedness from SCE were through email, letters in the mail, texts from SCE, and the SCE website. From the pre-season to the post-season, recall from email significantly decreased (72% to 67%), while the SCE website significantly increased (13% to 16%) and advertising on TV, radio, or online also significantly increased (7% to 11%).

Wildfire Safety and Preparedness: Sources of Communication

Residential

HIGH FIRE RISK AREA (HFRA)



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

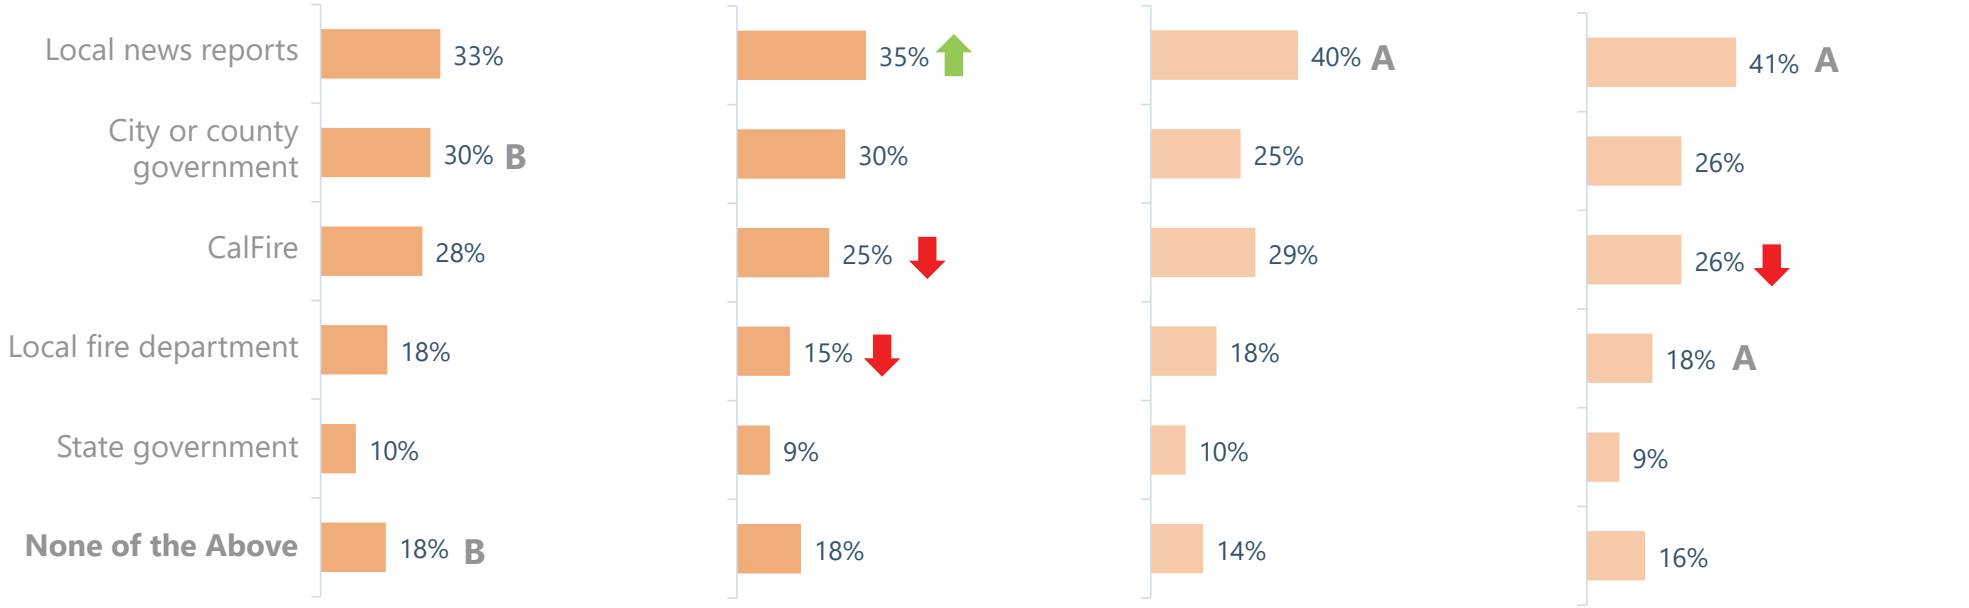
Q6. [RECALL COMMUNICATION] Where did you see or hear SCE's communications about wildfire season safety and preparedness?

Other than SCE, HFRA residents most commonly received wildfire safety information from local news reports, their city or county government, and CalFire. The use of local news and government remained flat while CalFire significantly decreased between the pre-season and post-season surveys (29% to 26%).

Non-SCE Wildfire Safety and Preparedness Communication Sources

Residential

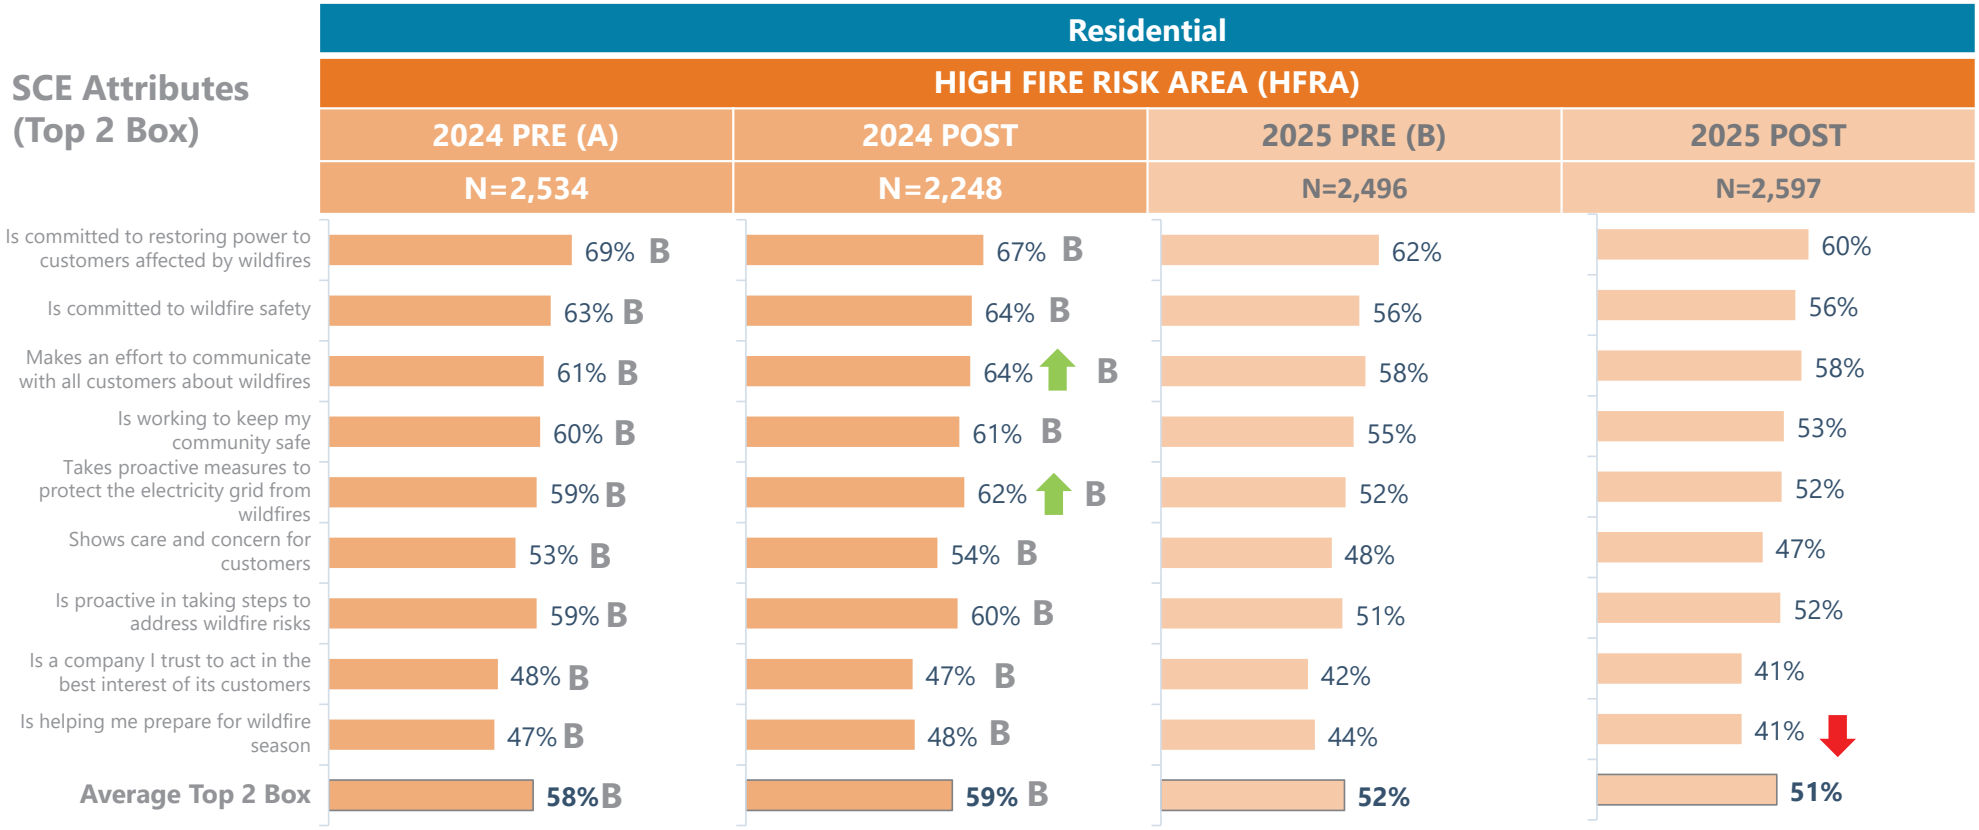
HIGH FIRE RISK AREA (HFRA)



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q10. Other than SCE's communications, what other sources have you used to obtain information about wildfire safety and preparedness?

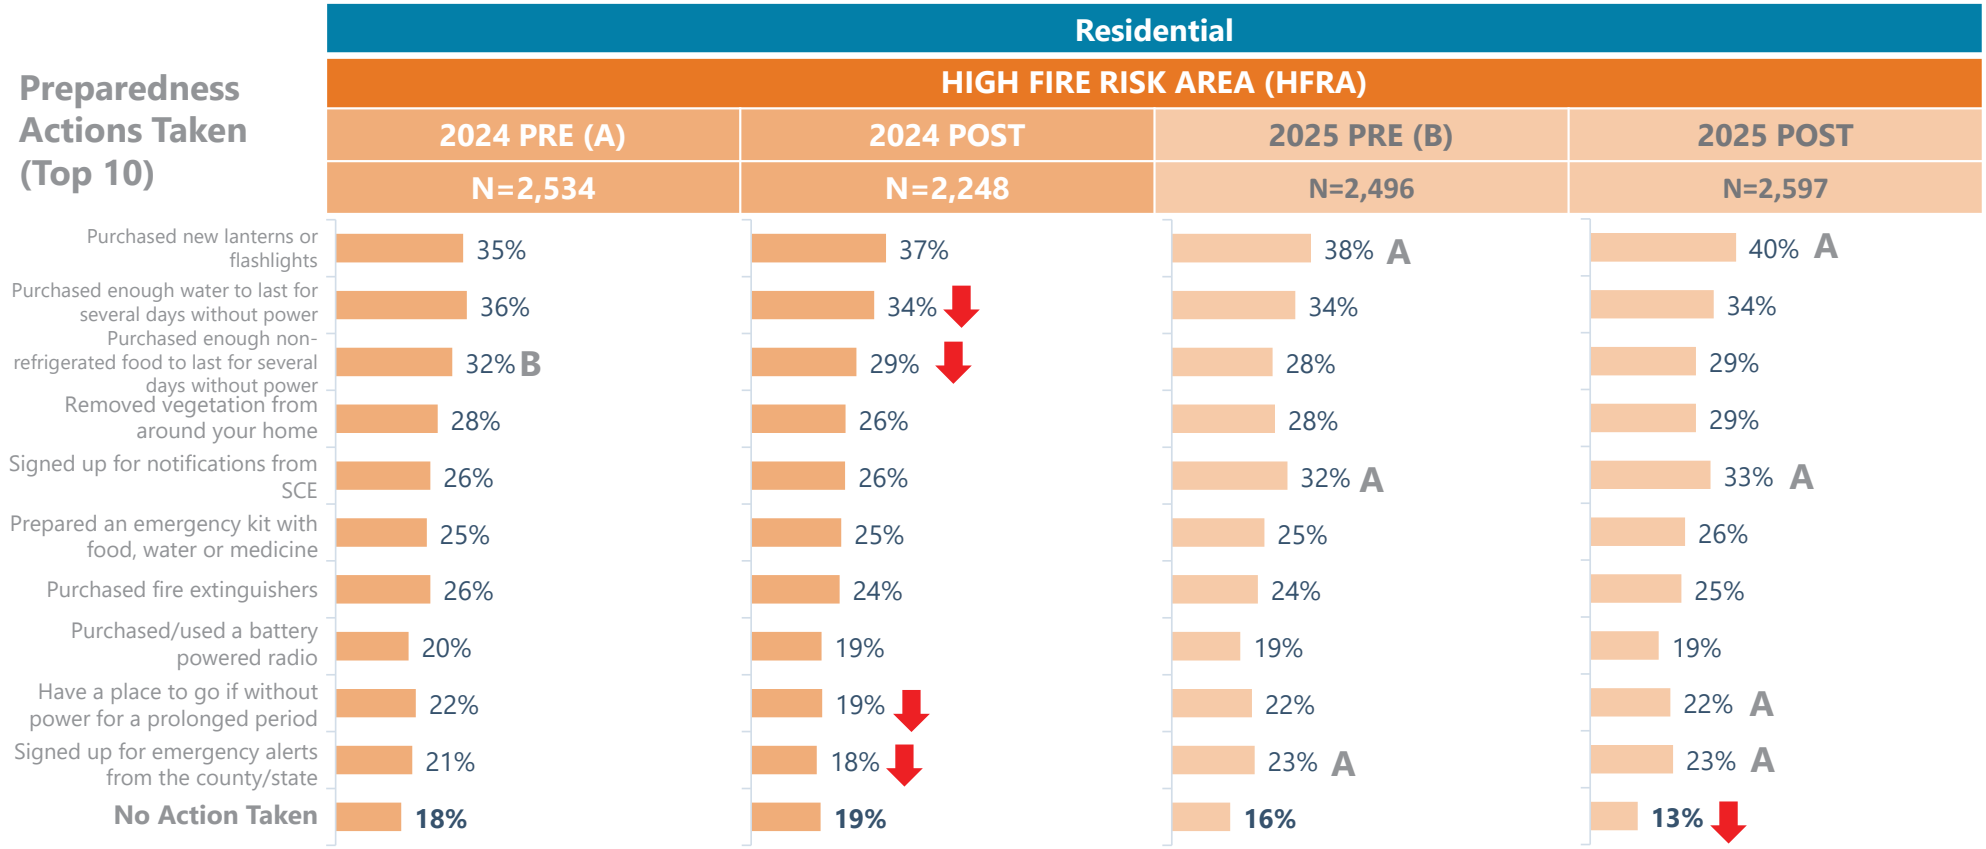
HFRA customer agreement with SCE attributes, such as its commitment to safety and the community, remained relatively flat from pre-season to post-season surveying, with the exception of feeling that SCE is helping them prepare for the wildfire season, declining from 44% to 41%.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q14. Using a scale where 1 means completely disagree and 5 means completely agree, Please indicate how much you agree or disagree with the following statements about SCE. SCE...

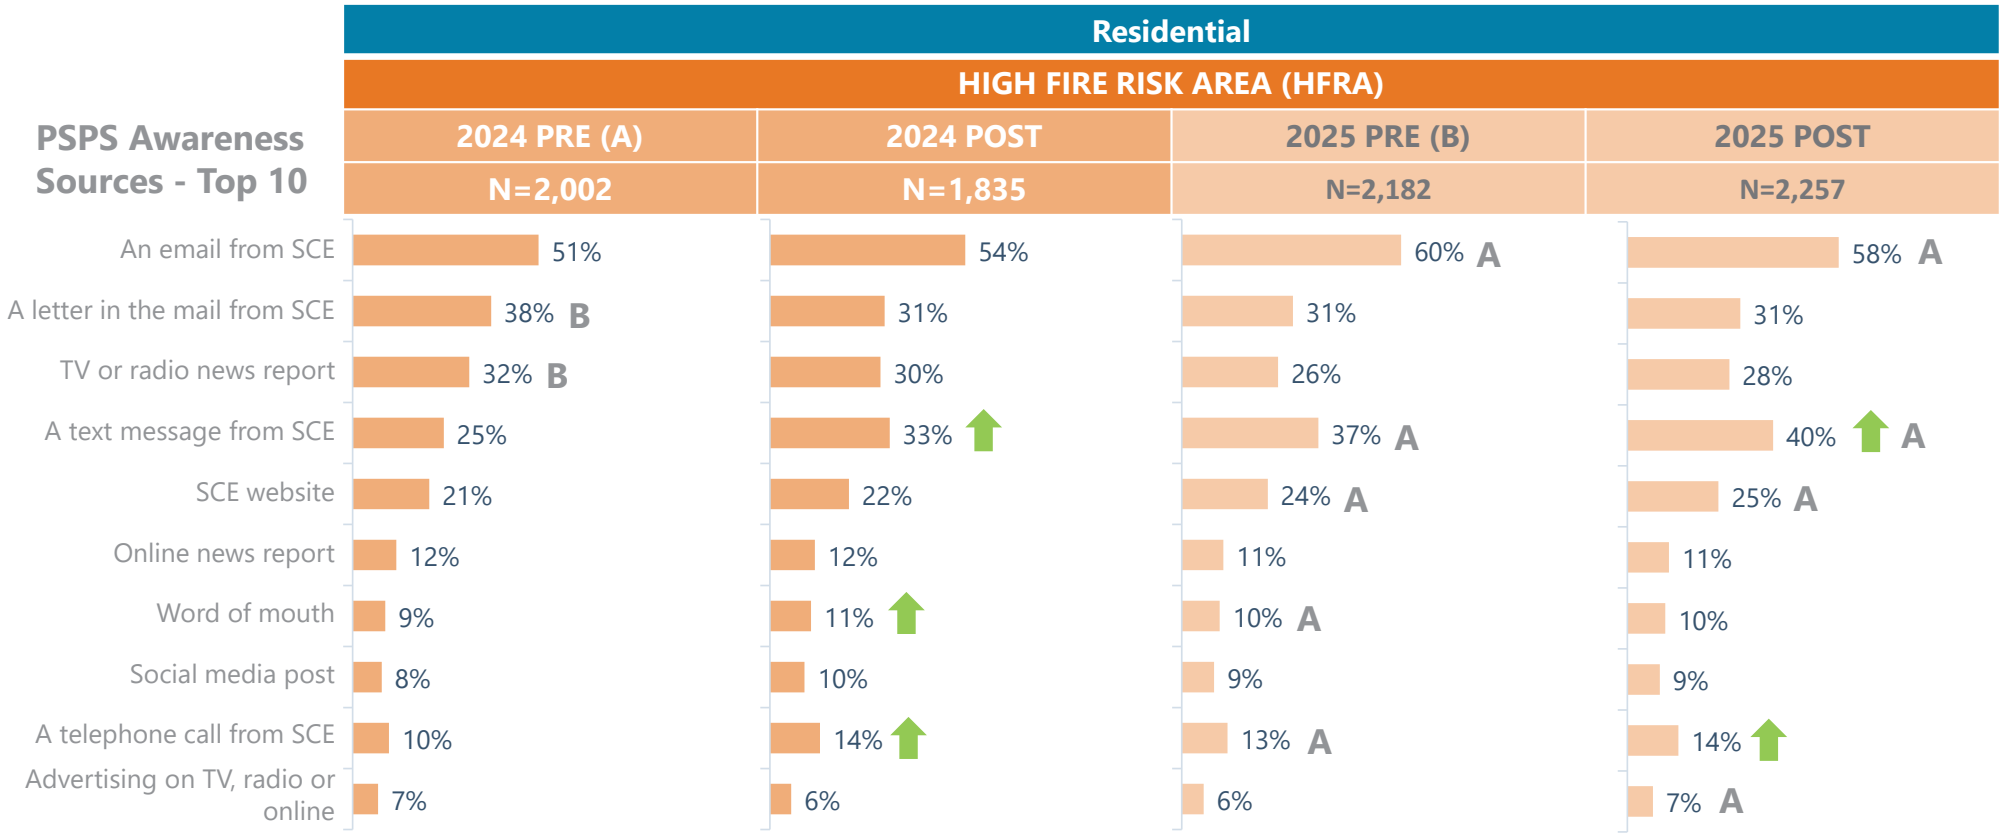
The most common preparedness actions taken by HFRA residents include purchasing flashlights, water, and non-perishable food. Significantly fewer HFRA residents said they took no action, declining from 16% pre-season to 13% post-season. We view this trend positively.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q21. What, if any, actions have you taken to prepare for a Public Safety Power Shutoff (PSPS) in 2025?

HFRA residents most frequently heard about PSPS through emails from SCE, texts from SCE, TV or radio news reports, and letters from SCE. There was a significant increase in awareness through texts from SCE from pre-season to post-season.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

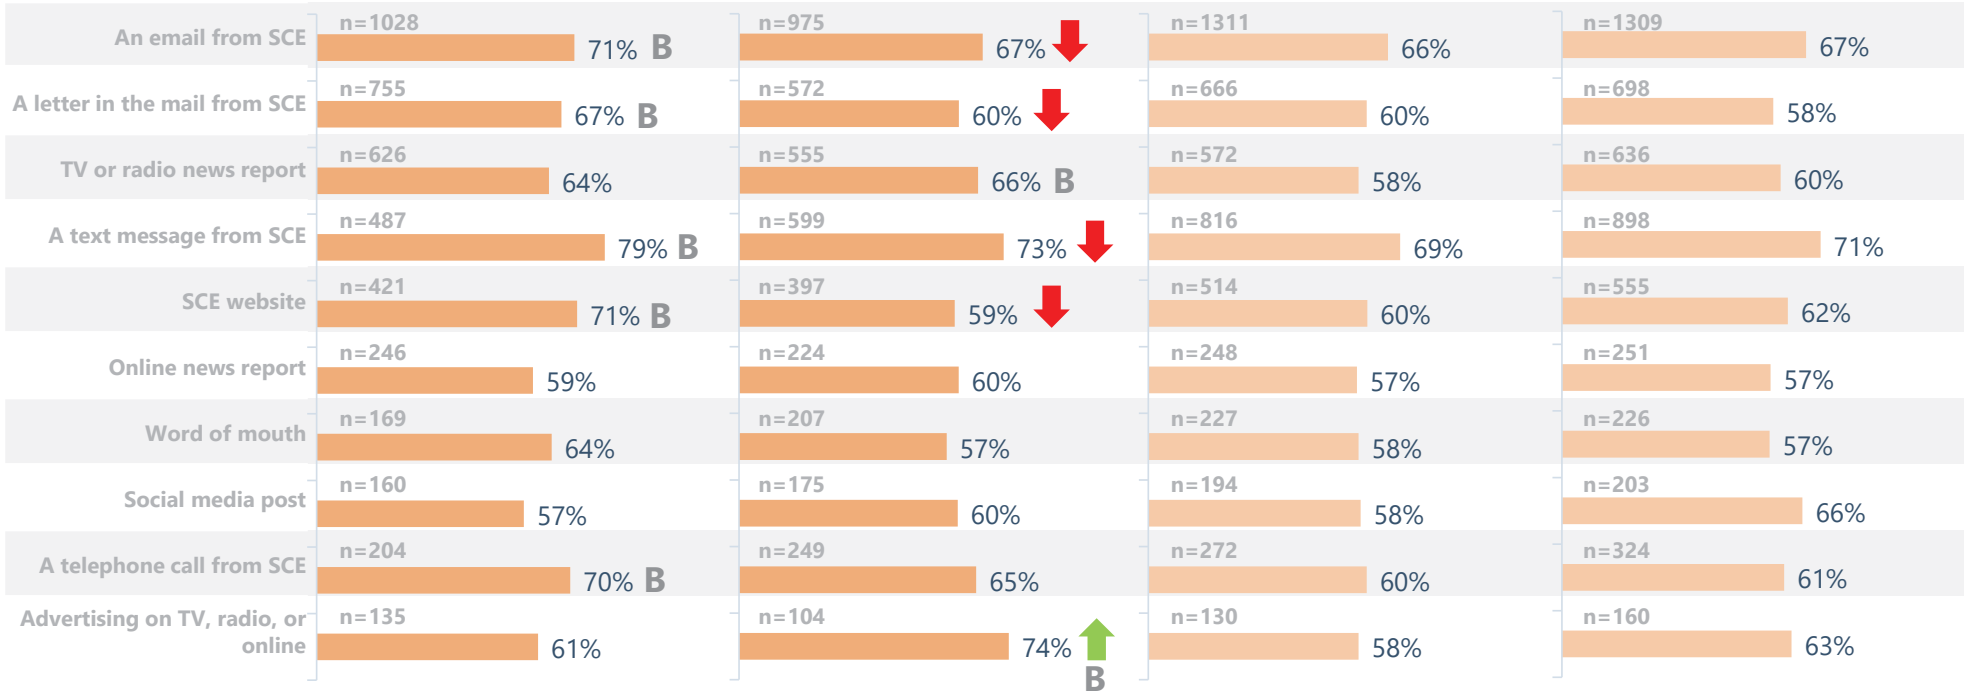
Q17. [RECALL PSPS] Where have you heard about Public Safety Power Shutoffs?

HFRA residents found PSPS information delivered via text / email from SCE to be the most useful. Usefulness remained relatively stable from pre-season to post-season surveying.

Usefulness of Source - Top 10 (Top 2 Box)

Residential

HIGH FIRE RISK AREA (HFRA)



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q19A. [SAW COMMUNICATIONS] On a 1 to 5 scale where 1 is not at all useful and 5 is extremely useful, how useful was the PSPS information from ...?

Awareness of PSPS support resources among HFRA residents remained somewhat stable from pre-season to post-season, with the exception of address level alerts, community resource centers, and food, which all had significant declines.

PSPS Resource Awareness

Q1. "In the past few months do you recall any communications of any type (i.e., mail, TV, radio, social media, etc.) from SCE about the threat of wildfires and how you can prepare for them?"
Q16. Public Safety Power Shutoff, or PSPS, is a precautionary safety measure where SCE may proactively turn off power lines when extreme fire danger conditions are forecasted, in order to reduce the risk of wildfires. Before today, had you ever heard of the Public Safety Power Shutoff program?

Satisfaction with SCE's wildfire preparedness efforts has significantly decreased among residents in Non-High Fire Risk Areas, dropping from 55% to 50% pre-season to post-season (a less dramatic drop was seen in the Systemwide data, too). The overall opinion of SCE's PSPS program was unchanged.

	Residential

Satisfaction with SCE's Wildfire Preparedness Efforts	49%	49%	55%	50% ↓	52%	49% ↓

↑↓ indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q22. Overall, what is your opinion of SCE's Public Safety Power Shutoff program?
Q15. How satisfied are you with SCE's overall wildfire safety and preparedness efforts?

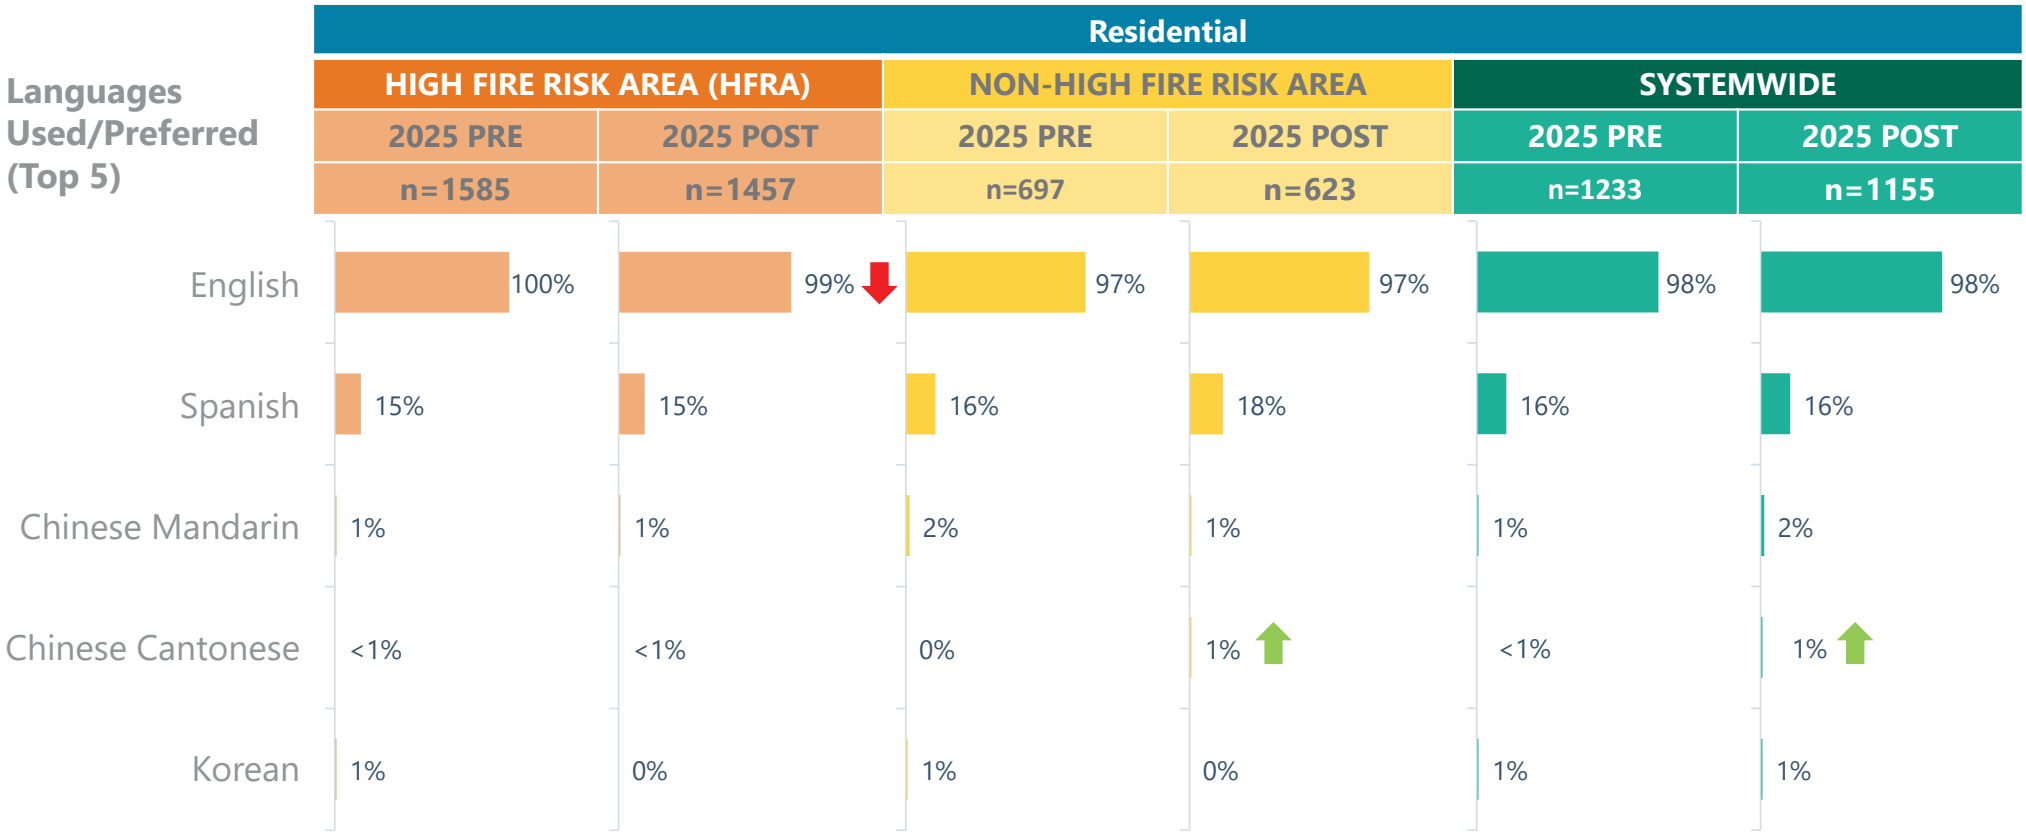
There has been a significant increase in self-reported preparedness for a prolonged power outage among all residential customers from pre-season to post-season.

	Residential					
	HIGH FIRE RISK AREA (HFRA)		NON-HIGH FIRE RISK AREA		SYSTEMWIDE	
Personal Level of Preparedness:	2025 PRE	2025 POST	2025 PRE	2025 POST	2025 PRE	2025 POST
	n=2496	n=2597	n=1537	n=1573	n=2379	n=2524
Completely / Somewhat Prepared	70%	74% ↑	60%	62% ↑	63%	66% ↑

↑↓ indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q20. A Public Safety Power Shutoff event could last anywhere from 24-48 hours, or longer in some cases. How would you rate your level of preparedness for being without electricity for an extended period?

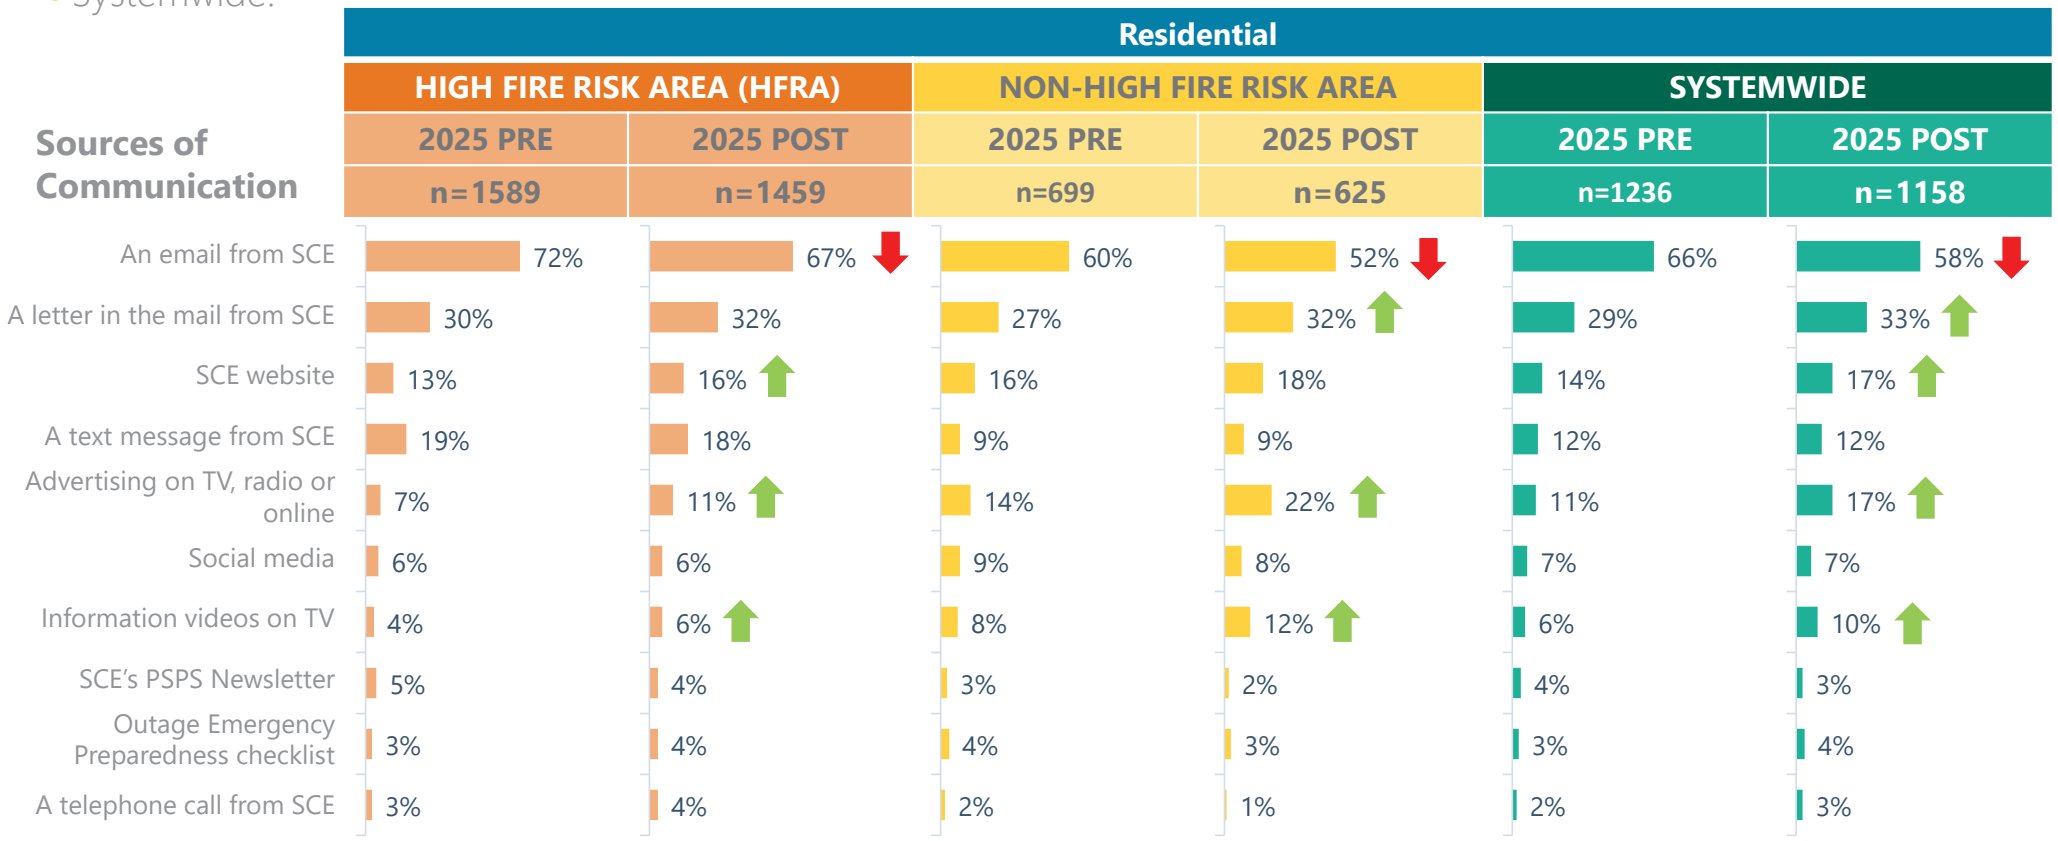
Among residents who recalled SCE communications, nearly all information was seen or heard in English & Spanish.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q5. [RECALL COMMUNICATION] In what language(s) was the wildfire safety and preparedness information that you recall seeing or hearing from SCE?

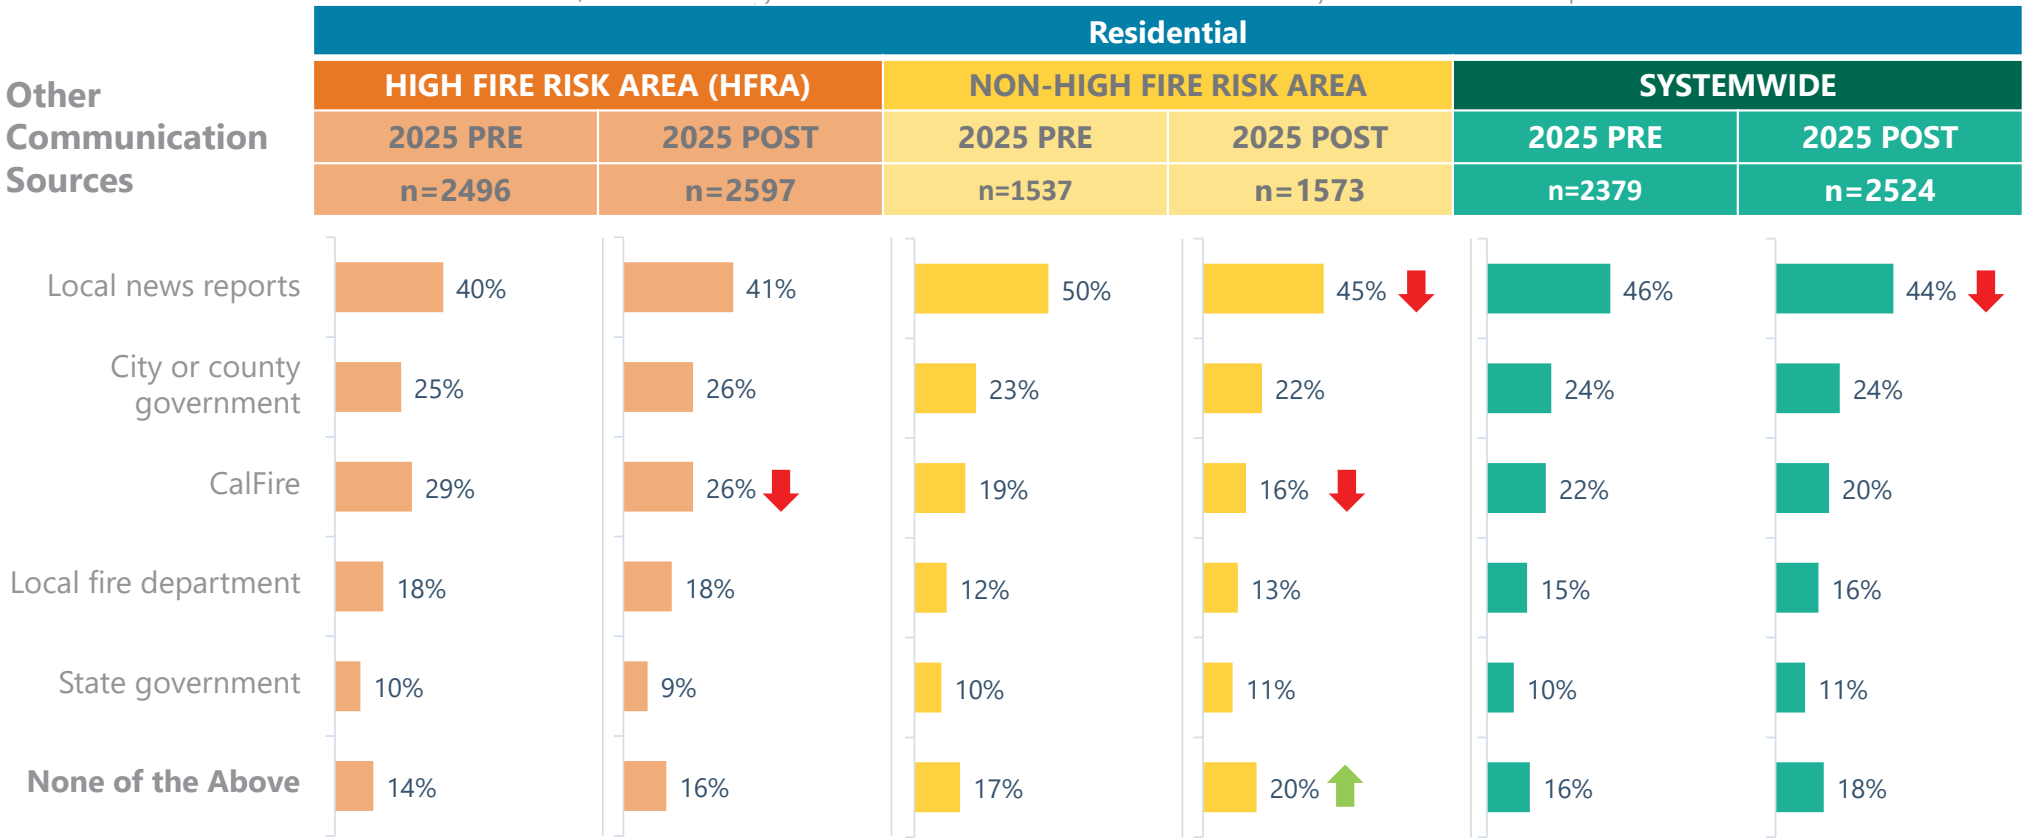
Email and mail from SCE are the most cited sources where customers recall seeing or hearing communications about wildfire preparedness. Email showed a significant decrease in recall among all residents from pre- to post-season while letters, the website, advertising on TV, radio or online and information videos on TV all saw significant increases Systemwide.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q6. [RECALL COMMUNICATION] Where did you see or hear SCE's communications about wildfire season safety and preparedness?

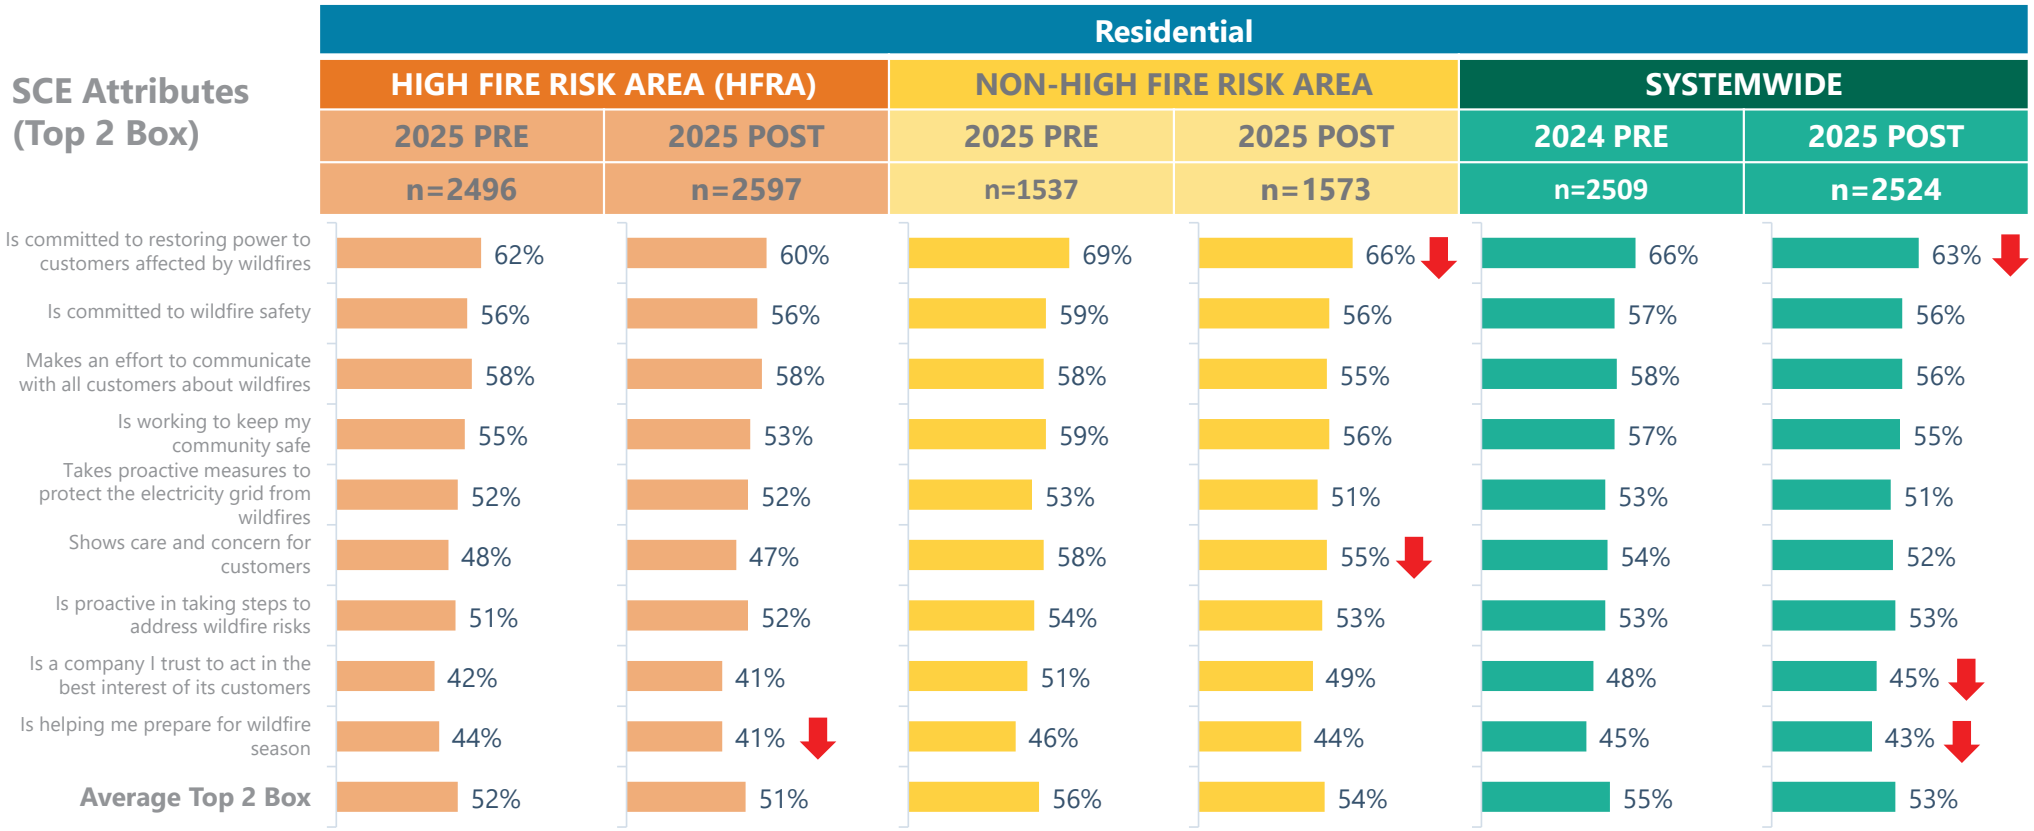
Local news reports are the most common non-SCE source for wildfire information, followed by city or county government and CalFire. Local news reports have declined significantly pre-season to post-season with Non-HFRA customers but did not with HFRA customers. CalFire also saw significant decline pre-season to post-season in the HFRA and Non-HFRA customers, but the significance was attenuated in the Systemwide sample.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q10. Other than SCE's communications, what other sources have you used to obtain information about wildfire safety and preparedness?

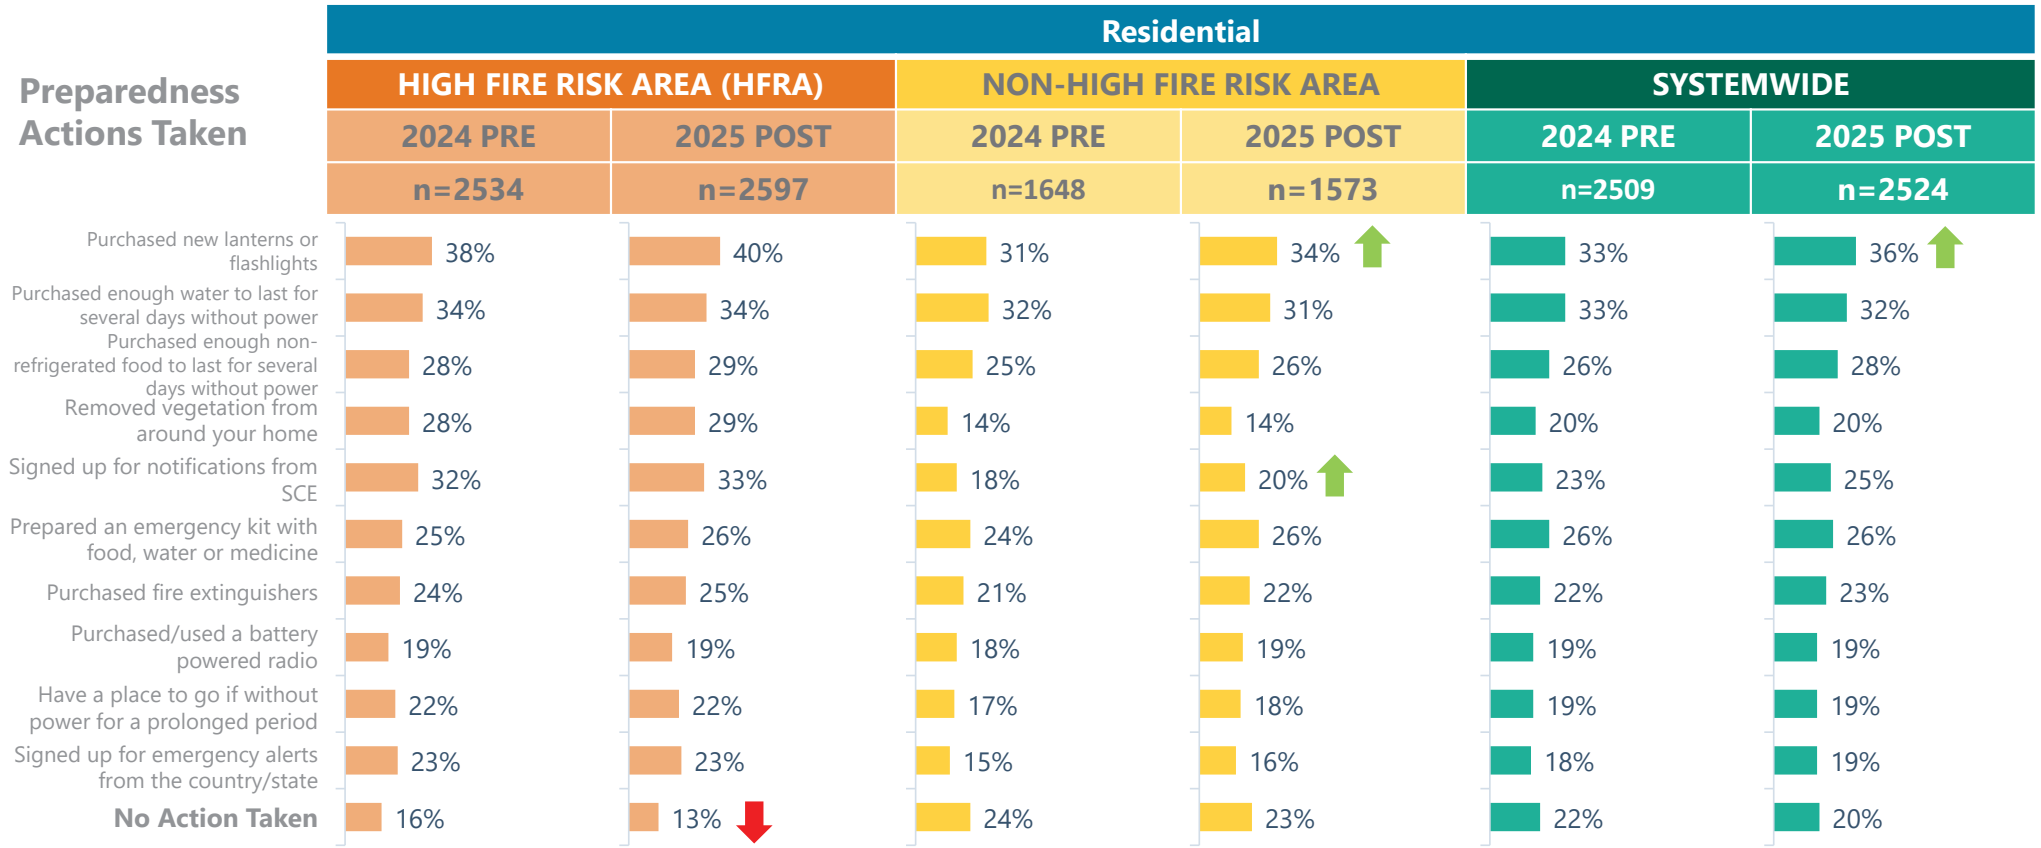
Customer perception of SCE has declined significantly across nearly all attributes Systemwide between pre-season and post season. Significant declines were seen in commitment to restoring power, a company I can trust, and helping prepare for wildfire season.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q14. Using a scale where 1 means completely disagree and 5 means completely agree, Please indicate how much you agree or disagree with the following statements about SCE. SCE…

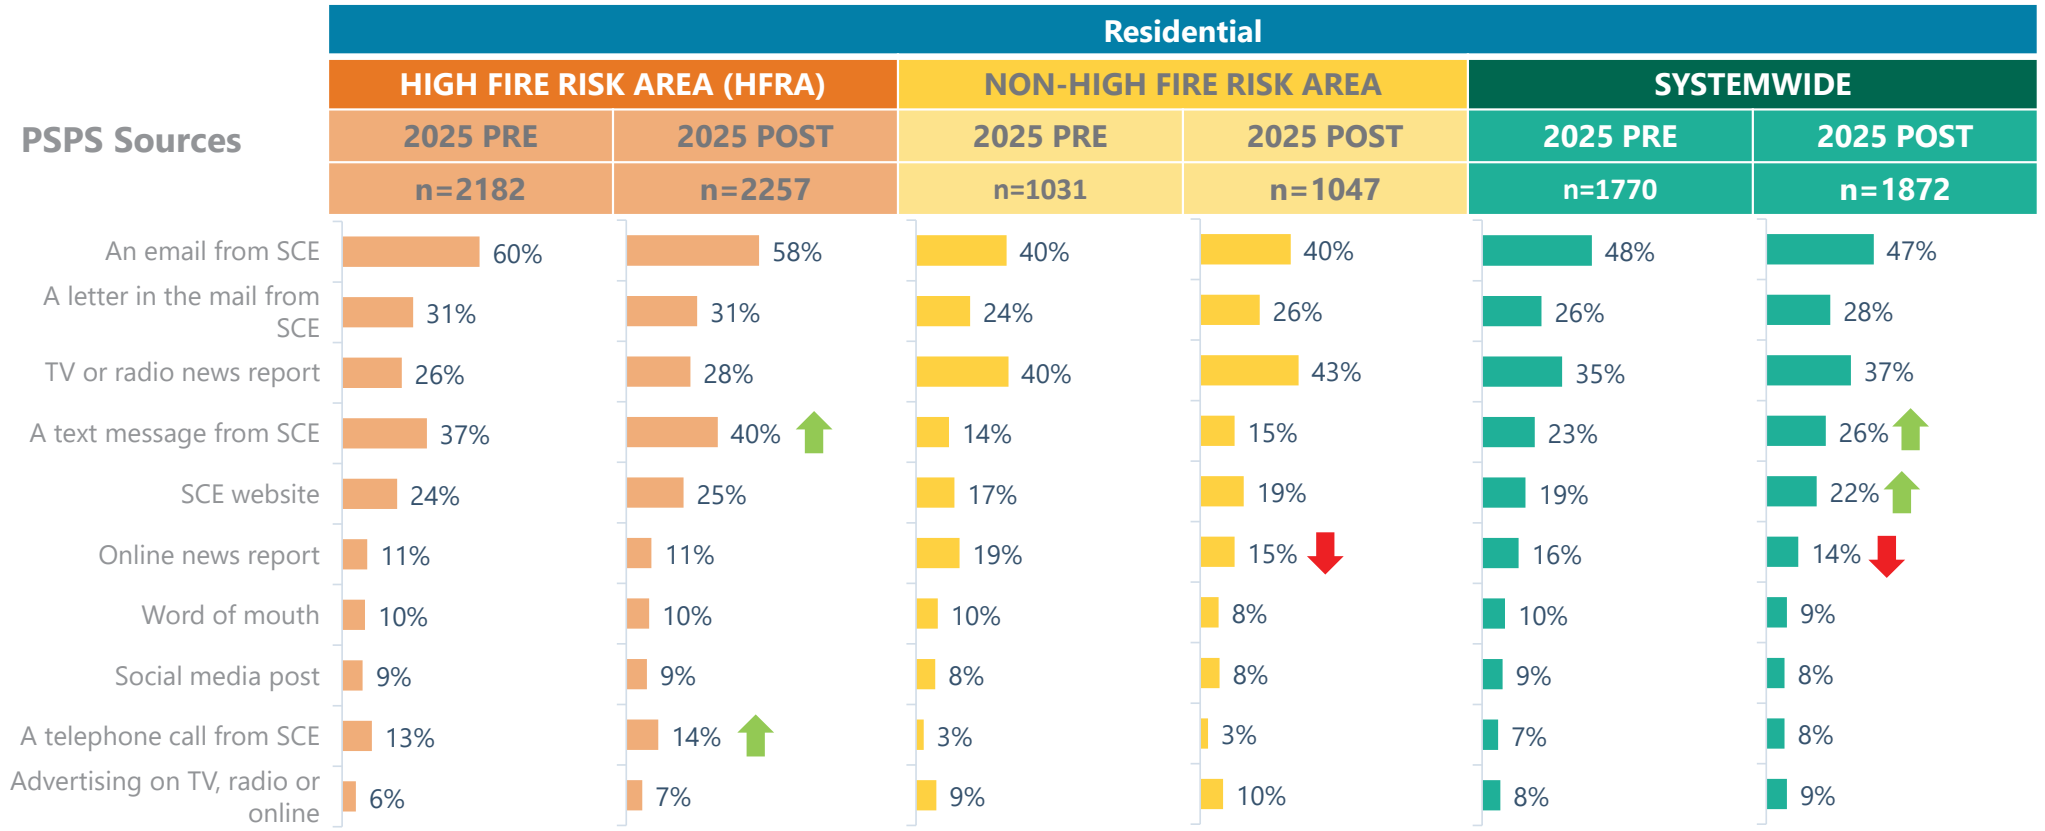
Increasingly more customers have taken action to prepare for power outages pre-season to post-season. Purchasing lanterns or flashlights is the most common action taken by residents to prepare for a PSPS event in 2025 (significant increase from 33% to 36%), followed by stocking up on water and non-perishable food.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q21. What, if any, actions have you taken to prepare for a Public Safety Power Shutoff (PSPS) in 2025?

Email from SCE is the primary source through which customers in all areas have heard about Public Safety Power Shutoffs. Text messages and the SCE website, saw an increase in recall from pre-season to post-season while online news reports saw a significant decrease.

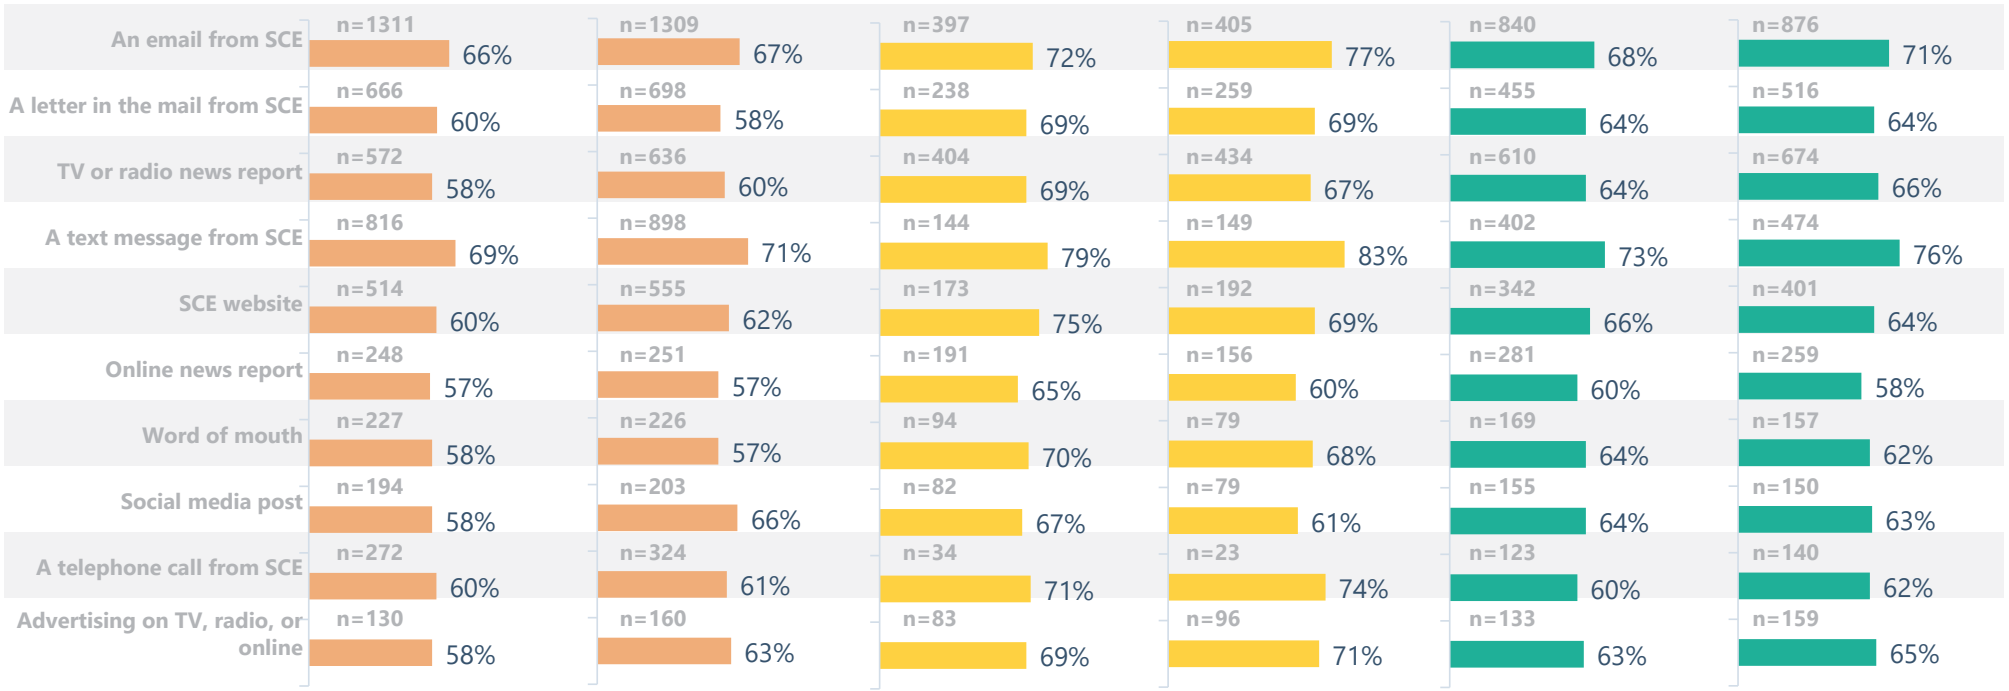


indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q17. [RECALL PSPS] Where have you heard about Public Safety Power Shutoffs?

Residents found PSPS information delivered via text / email from SCE to be the most useful. Across all the sources usefulness varied pre-season to post-season with no significant changes.

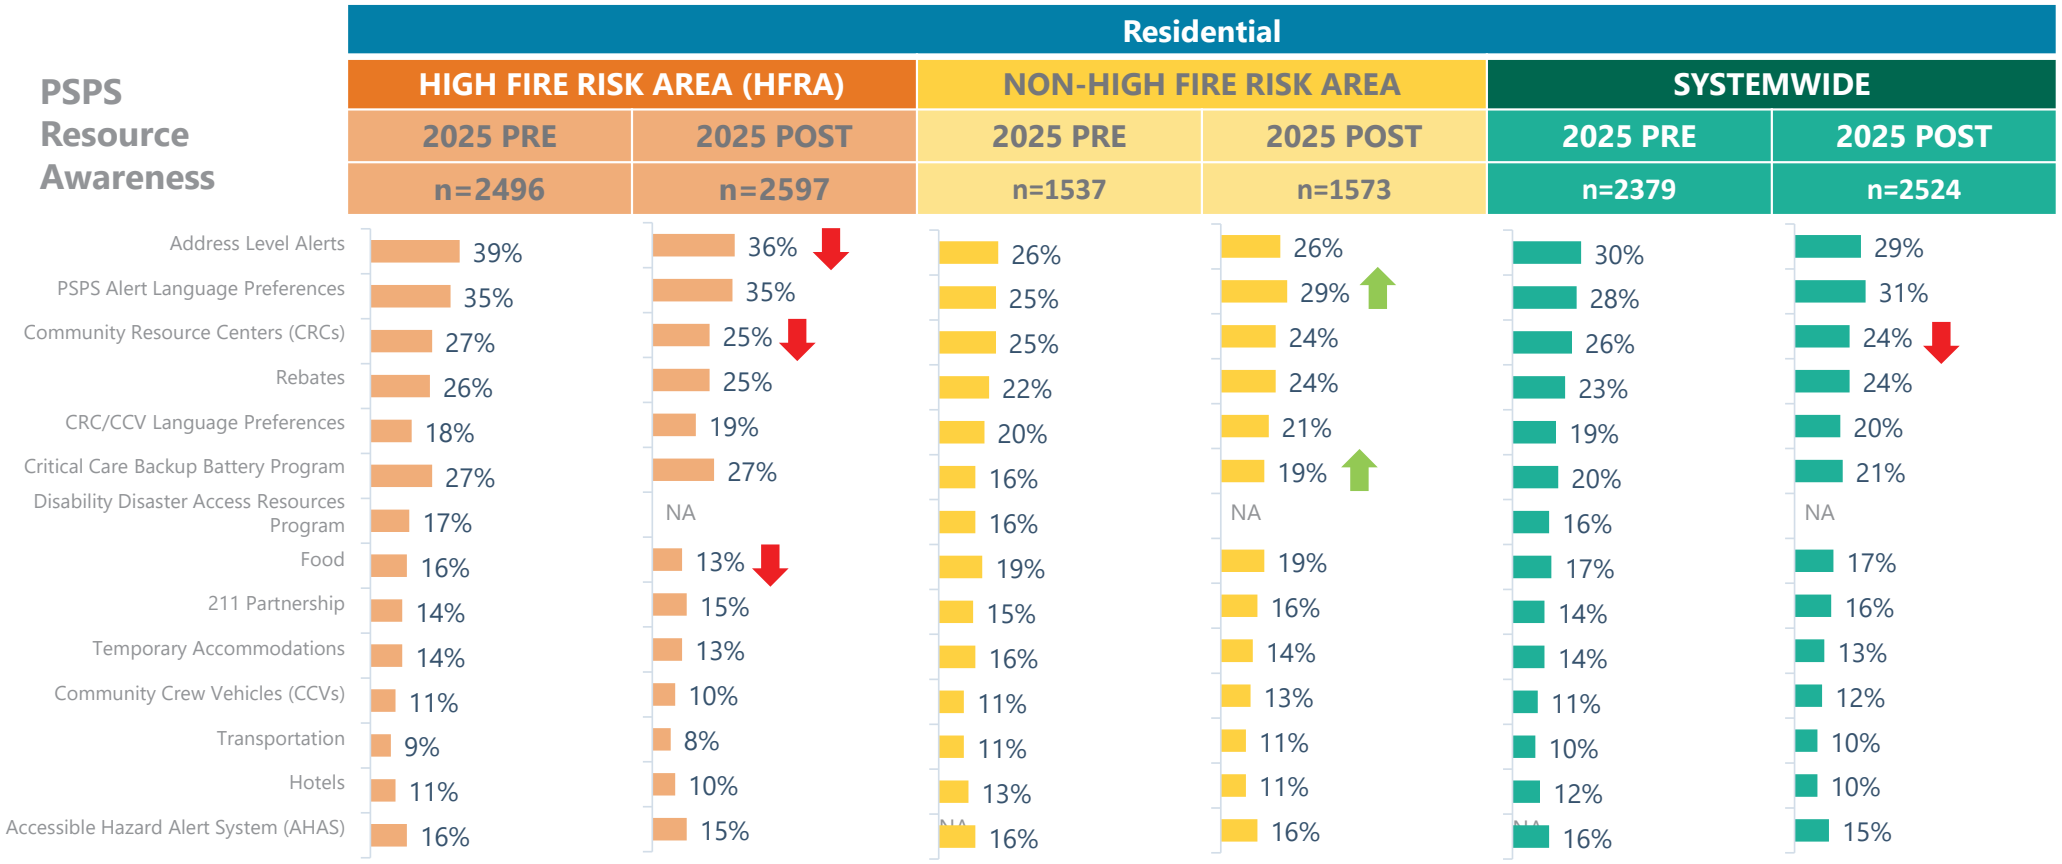
Usefulness of Source - Top 10 (Top 2 Box)



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q19A. [SAW COMMUNICATIONS] On a 1 to 5 scale where 1 is not at all useful and 5 is extremely useful, how useful was the PSPS information from ...?

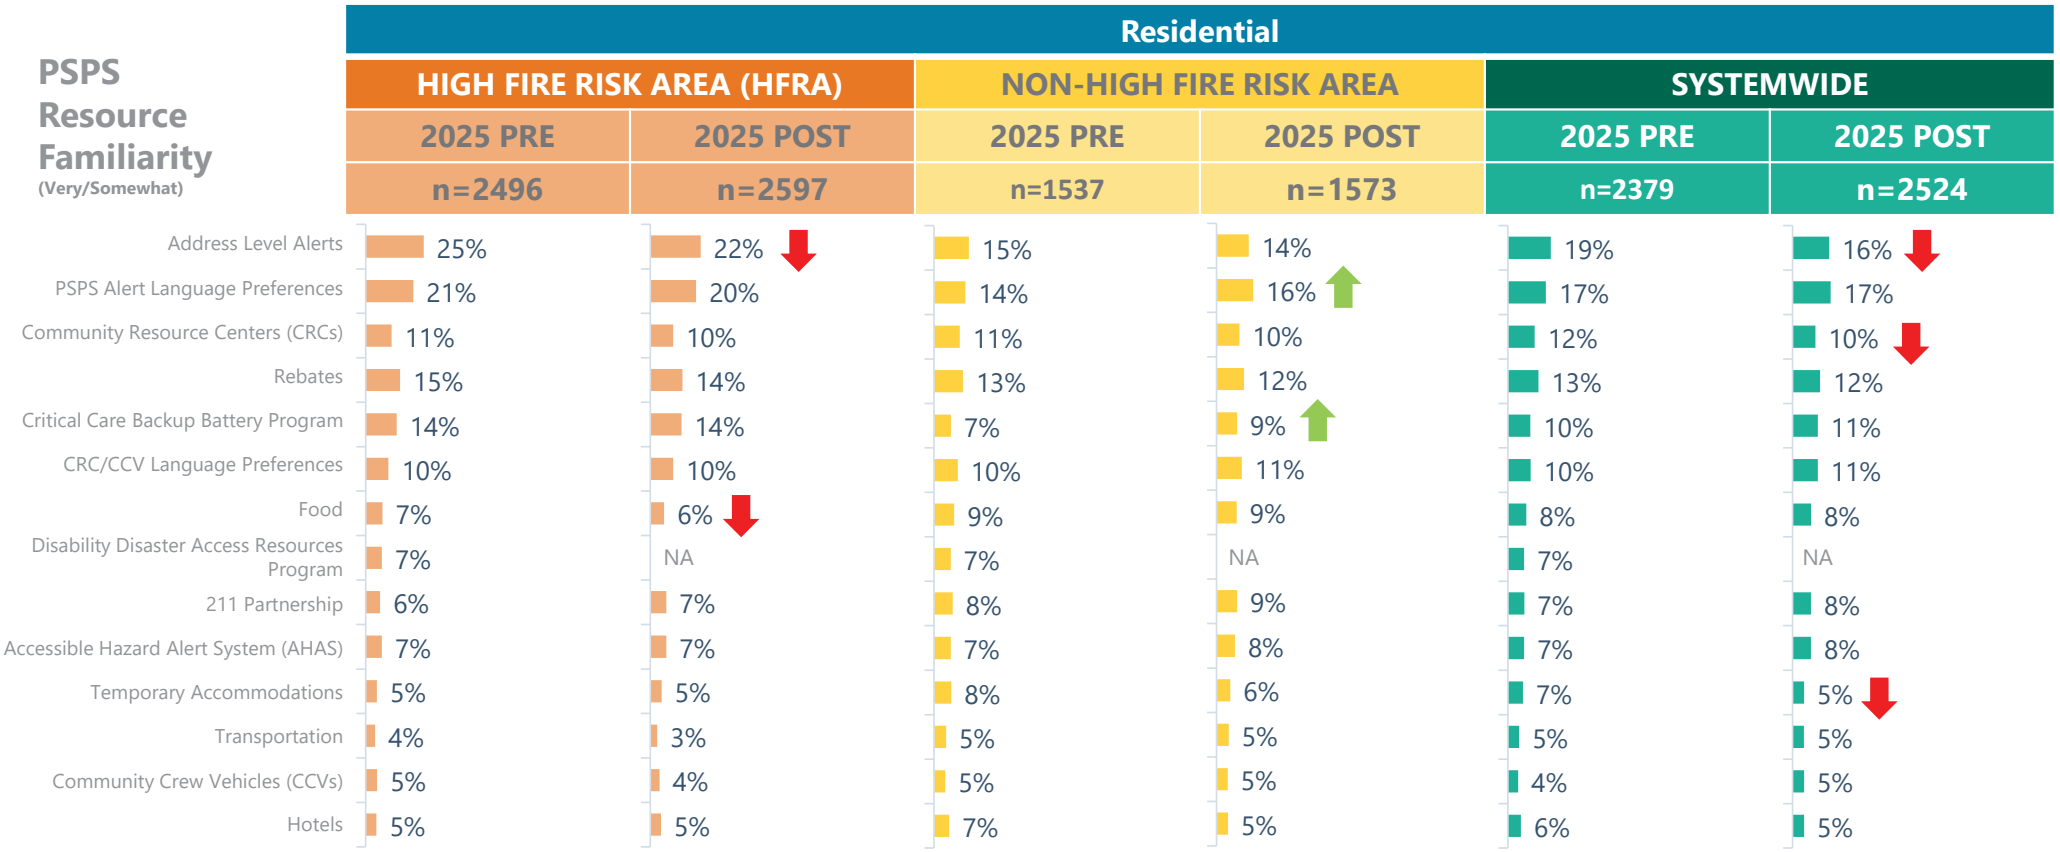
Among all resources, "Address Level Alerts" and "Language Preferences" have the highest level of awareness across all customers. "Community Resource Centers" saw a significant drop Systemwide, pre-season to post-season.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

QN1: SCE supports a number of resources that are available to the public during a Public Safety Power Shutoff (PSPS). Before today, which of the following resources have you heard of?

"Address Level Alerts" and PSPS "Alert Language Preferences" remained the resource with the highest level of familiarity among residents Systemwide, with the former seeing a significant decrease pre-season to post-season (19% to 16%).

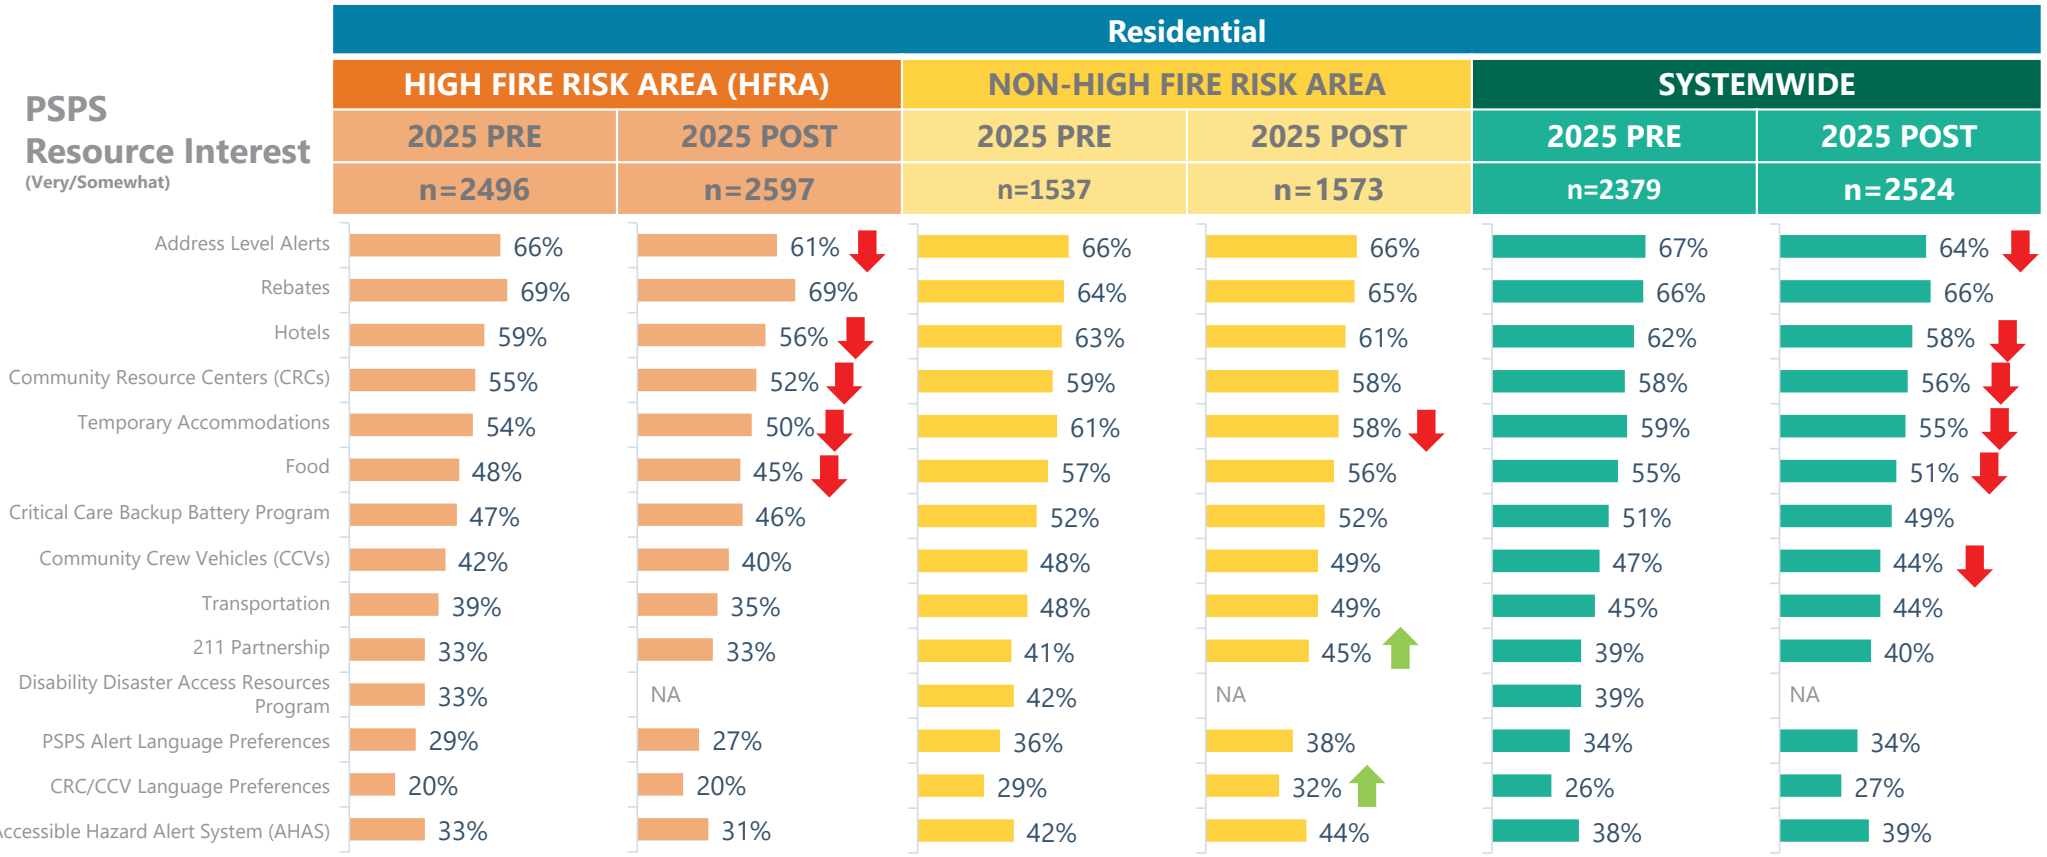


Note: The question scale changed in 2025. Statistical testing to prior waves has been suppressed.

indicate a significant increase/decrease between Pre waves at the 95% confidence level.

QN2: For each of the following resources, please tell us if you are Very Familiar, Somewhat Familiar, or Not Very Familiar with that resource?

"Address Level Alerts" and "Rebates" were the resources that received the most interest from residents Systemwide, however, pre-season to post-season we saw significant decreases Systemwide among many of the resources.

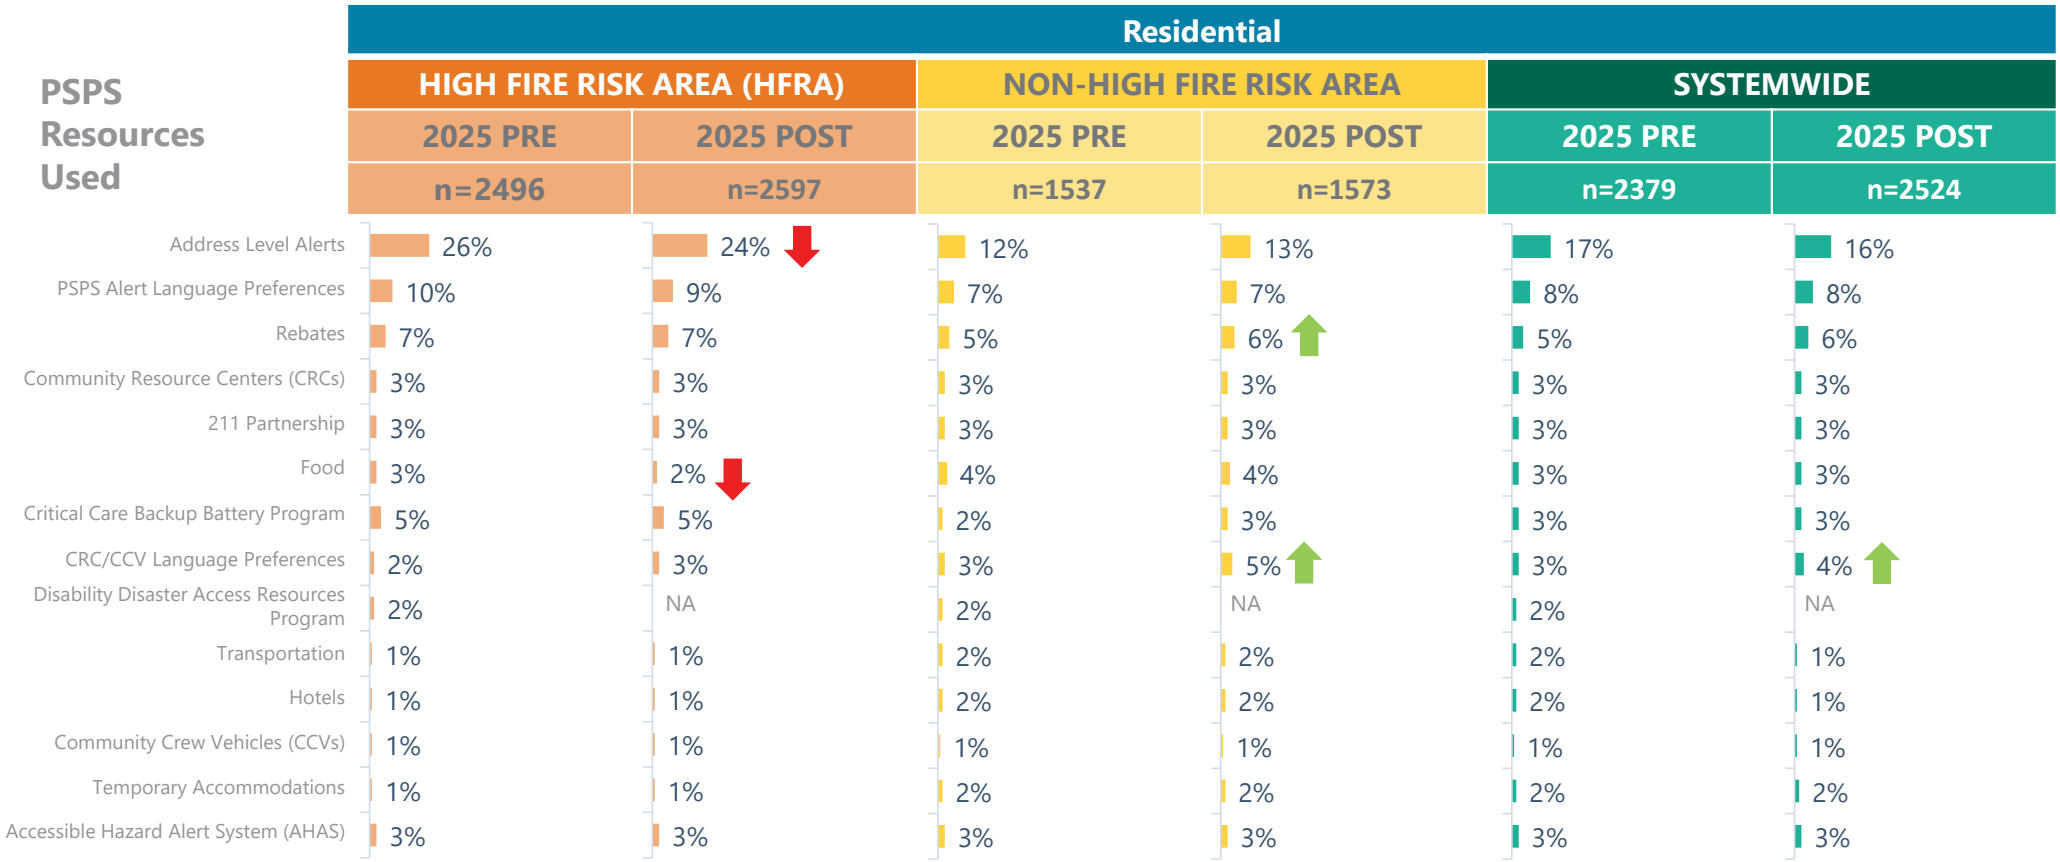


Note: The question scale changed in 2025. Statistical testing to prior waves has been suppressed.

indicate a significant increase/decrease between Pre waves at the 95% confidence level.

QN3: For each resource, please rate how interested you would be in using it during a Public Safety Power Shutoff?

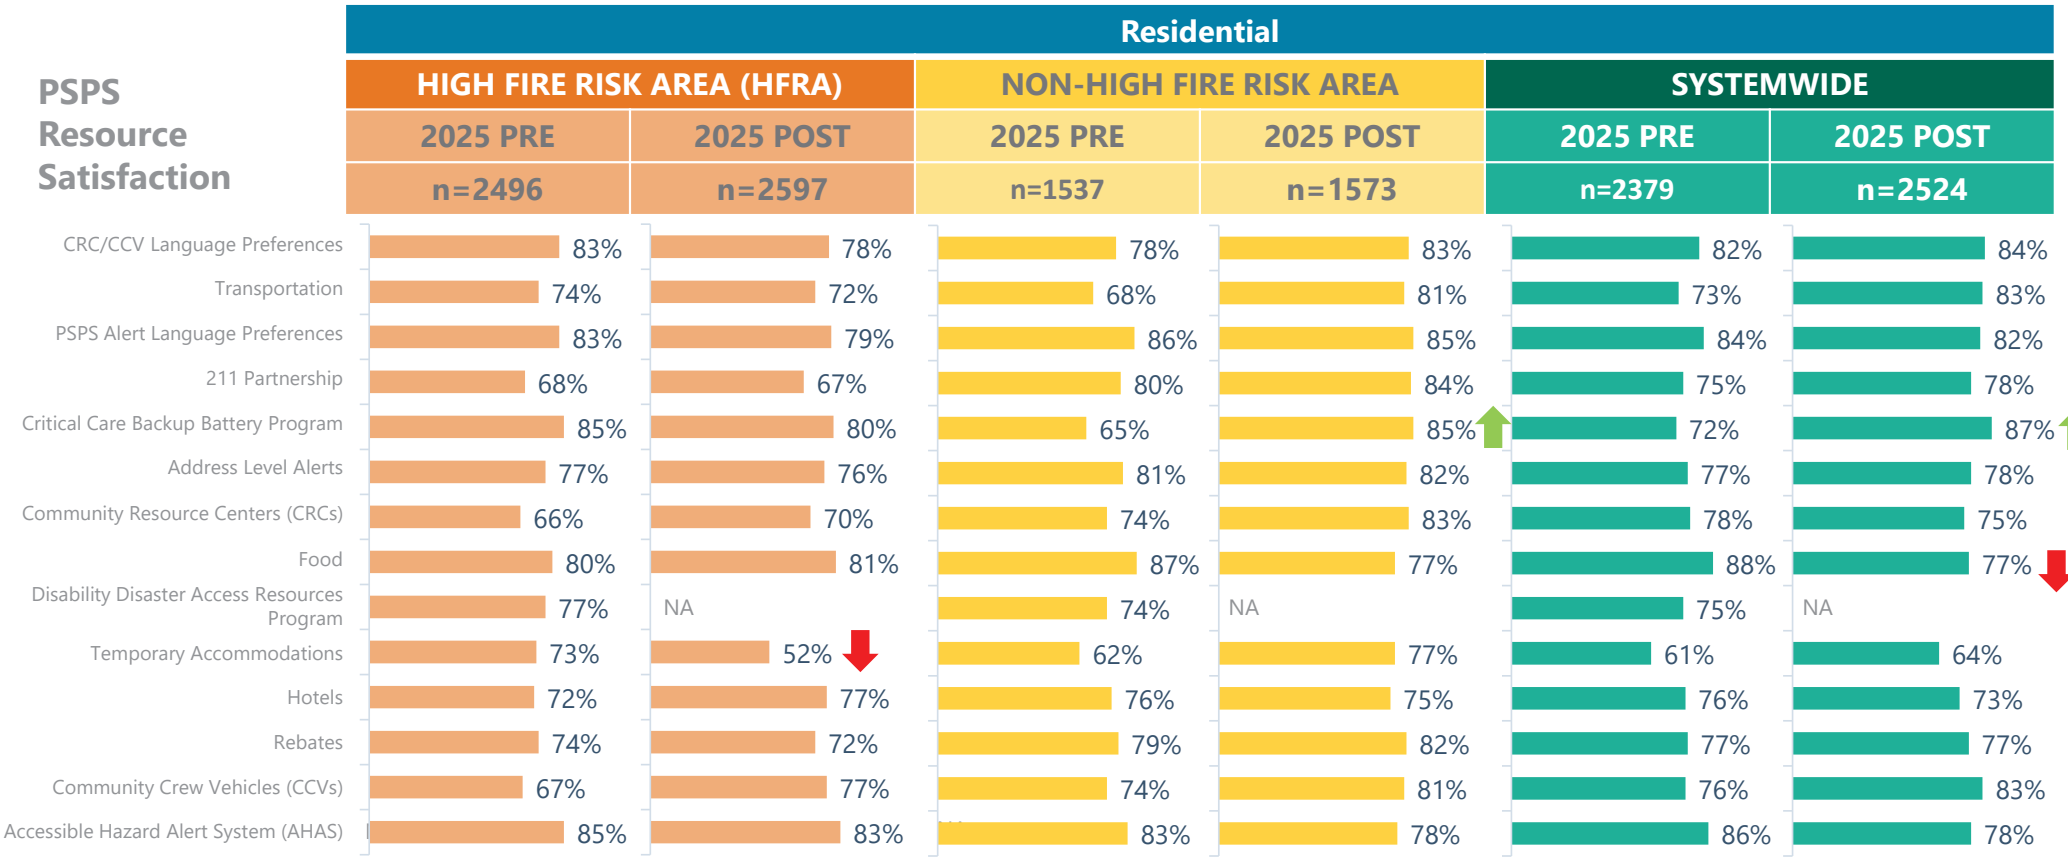
"Address Level Alerts" are the most utilized PSPS resource by a significant margin across all customer groups.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

QN4: Which, if any, of these resources have you used in the past?

Satisfaction levels among customers are generally high across the board but were highest for the "Critical Care Backup Battery Program" which saw a significant increase pre-season to post-season, Systemwide. Satisfaction for food resources declined significantly pre- to post-season.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

QN5: (IF USED) How satisfied were you with the following PSPS resources you have used in the past...?

Customers who recall seeing or hearing SCE advertising about PSPS and emergency preparedness stayed relatively flat from pre-season to post-season surveying. Residents in High Fire Risk Areas reported the highest recall of advertising.

	Residential					
	HIGH FIRE RISK AREA (HFRA)		NON-HIGH FIRE RISK AREA		SYSTEMWIDE

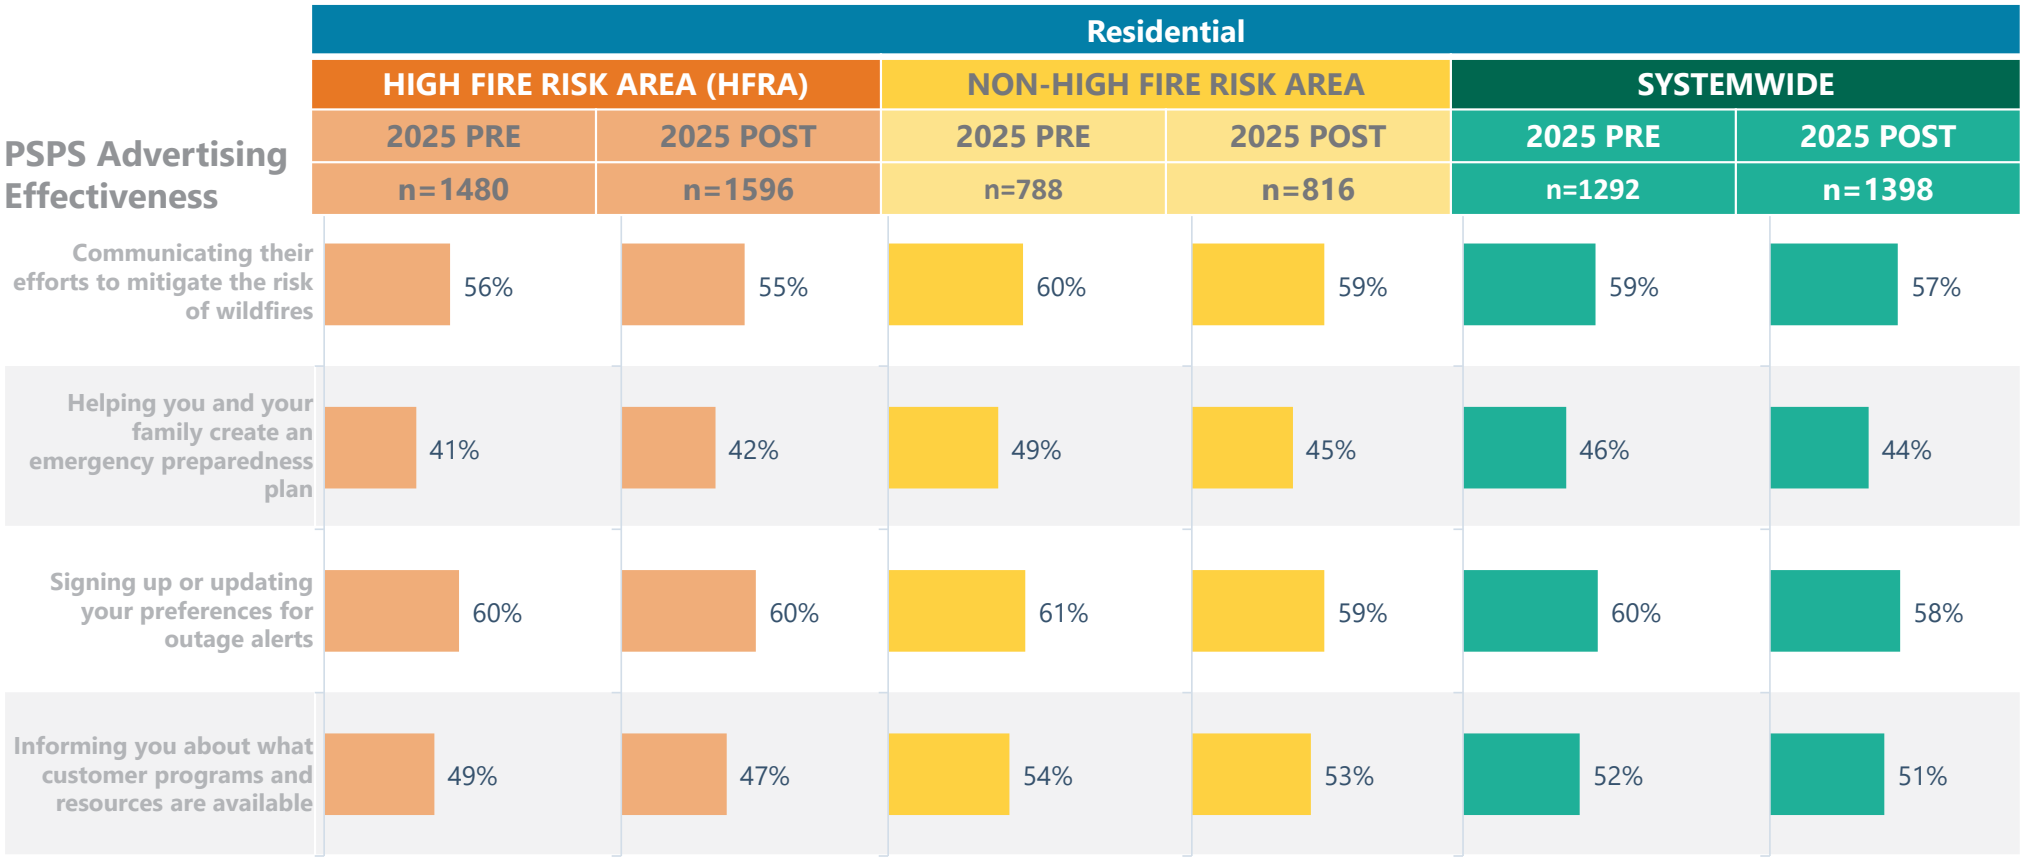
indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q24. "Have you ever seen or heard any advertising from Southern California Edison about Public Safety Power Shutoffs and being prepared for emergencies? This could be through television, radio, or on the internet."

SCE's advertising remained effective across its entire service area. Declines were observed across the board, but none of them were significant declines.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q25. "[IF YES] How effective has Southern California Edison's advertising been for…"

Detailed Findings

Prefer Communications in Another Language

Energy for What's Ahead®

SOUTHERN CALIFORNIA EDISON®

Customer awareness of PSPS and recall of SCE's wildfire communications have both declined from pre-wave to post-wave. Again, we believe this may be due to the wildfires in January of 2025.

Residential (Prefer Other Language)					
HIGH FIRE RISK AREA (HFRA)		NON-HIGH FIRE RISK AREA		SYSTEMWIDE	
2025 PRE	2025 POST	2025 PRE	2025 POST	2025 PRE	2025 POST

Q1. "In the past few months do you recall any communications of any type (i.e., mail, TV, radio, social media, etc.) from SCE about the threat of wildfires and how you can prepare for them?"
Q16. Public Safety Power Shutoff, or PSPS, is a precautionary safety measure where SCE may proactively turn off power lines when extreme fire danger conditions are forecasted, in order to reduce the risk of wildfires. Before today, had you ever heard of the Public Safety Power Shutoff program?

Opinion of SCE's PSPS program has significantly increased among residents in High Fire Risk Areas who prefer other languages, increasing from 64% to 83%, pre-season to post-season in 2025. Satisfaction, however, decline pre-season to post-season with these same HFRA customers (77% to 70%). We did not observe this same decline in the Non-HFRA customers, but instead saw a slight increase. Note that sample sizes are small which leads to some volatility.

Residential (Prefer Other Language)					
HIGH FIRE RISK AREA (HFRA)		NON-HIGH FIRE RISK AREA		SYSTEMWIDE

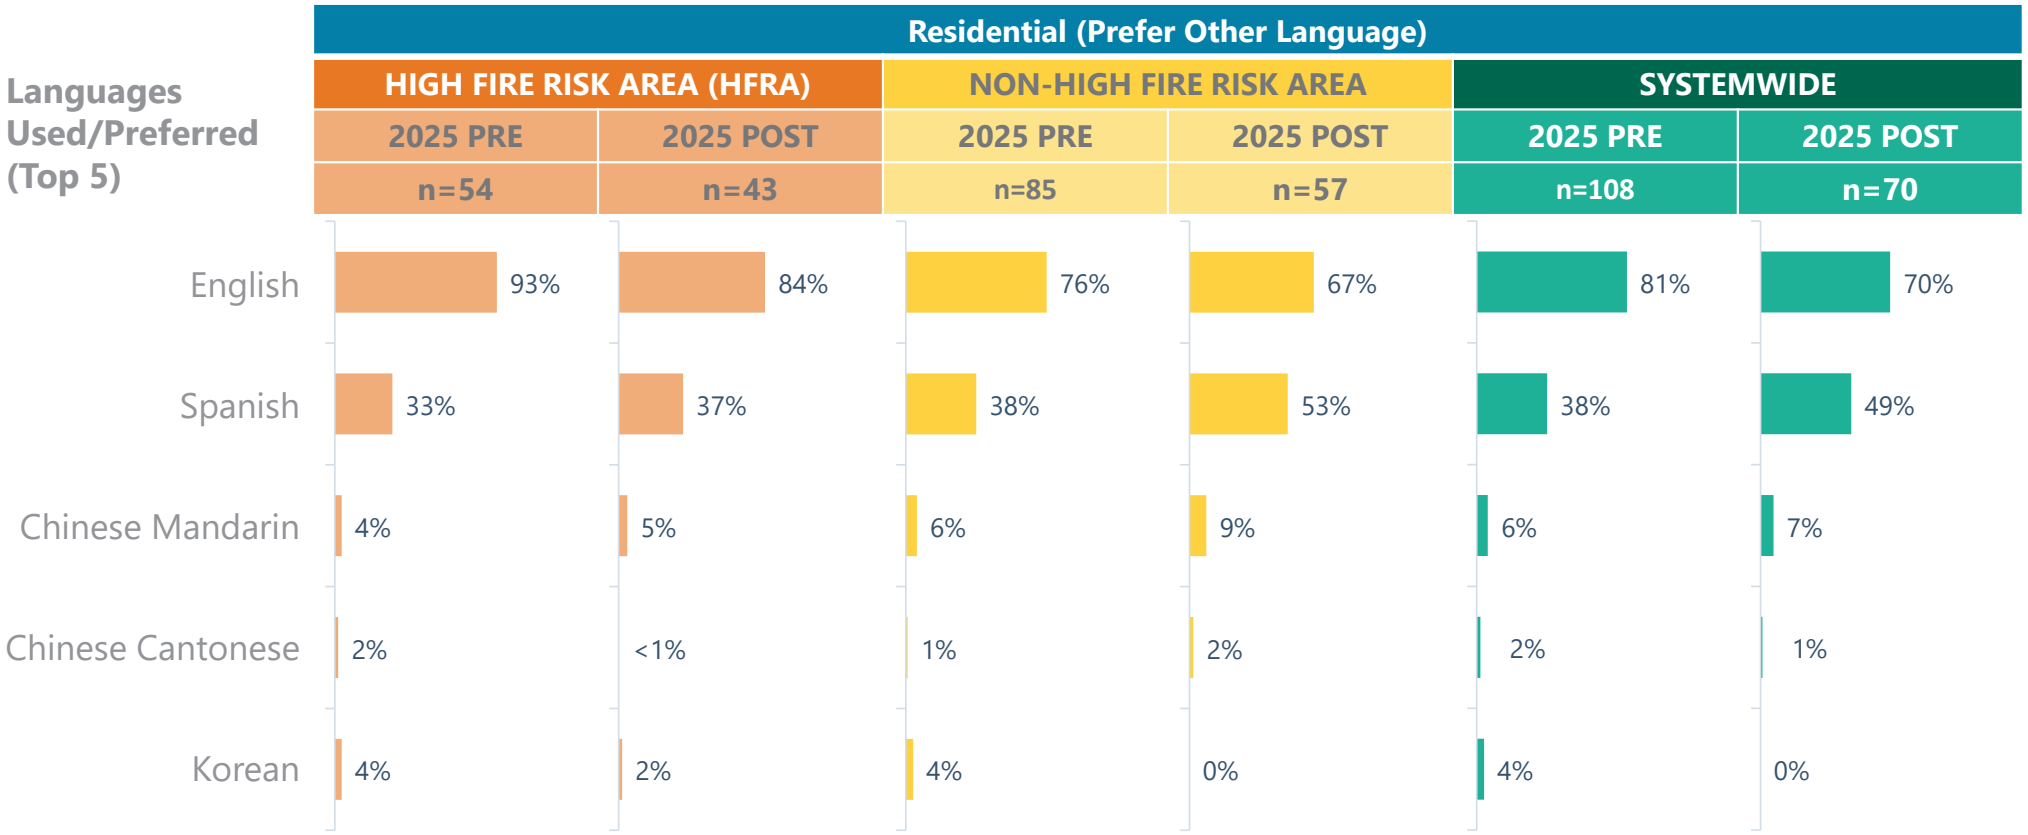
Q20. A Public Safety Power Shutoff event could last anywhere from 24-48 hours, or longer in some cases. How would you rate your level of preparedness for being without electricity for an extended period?

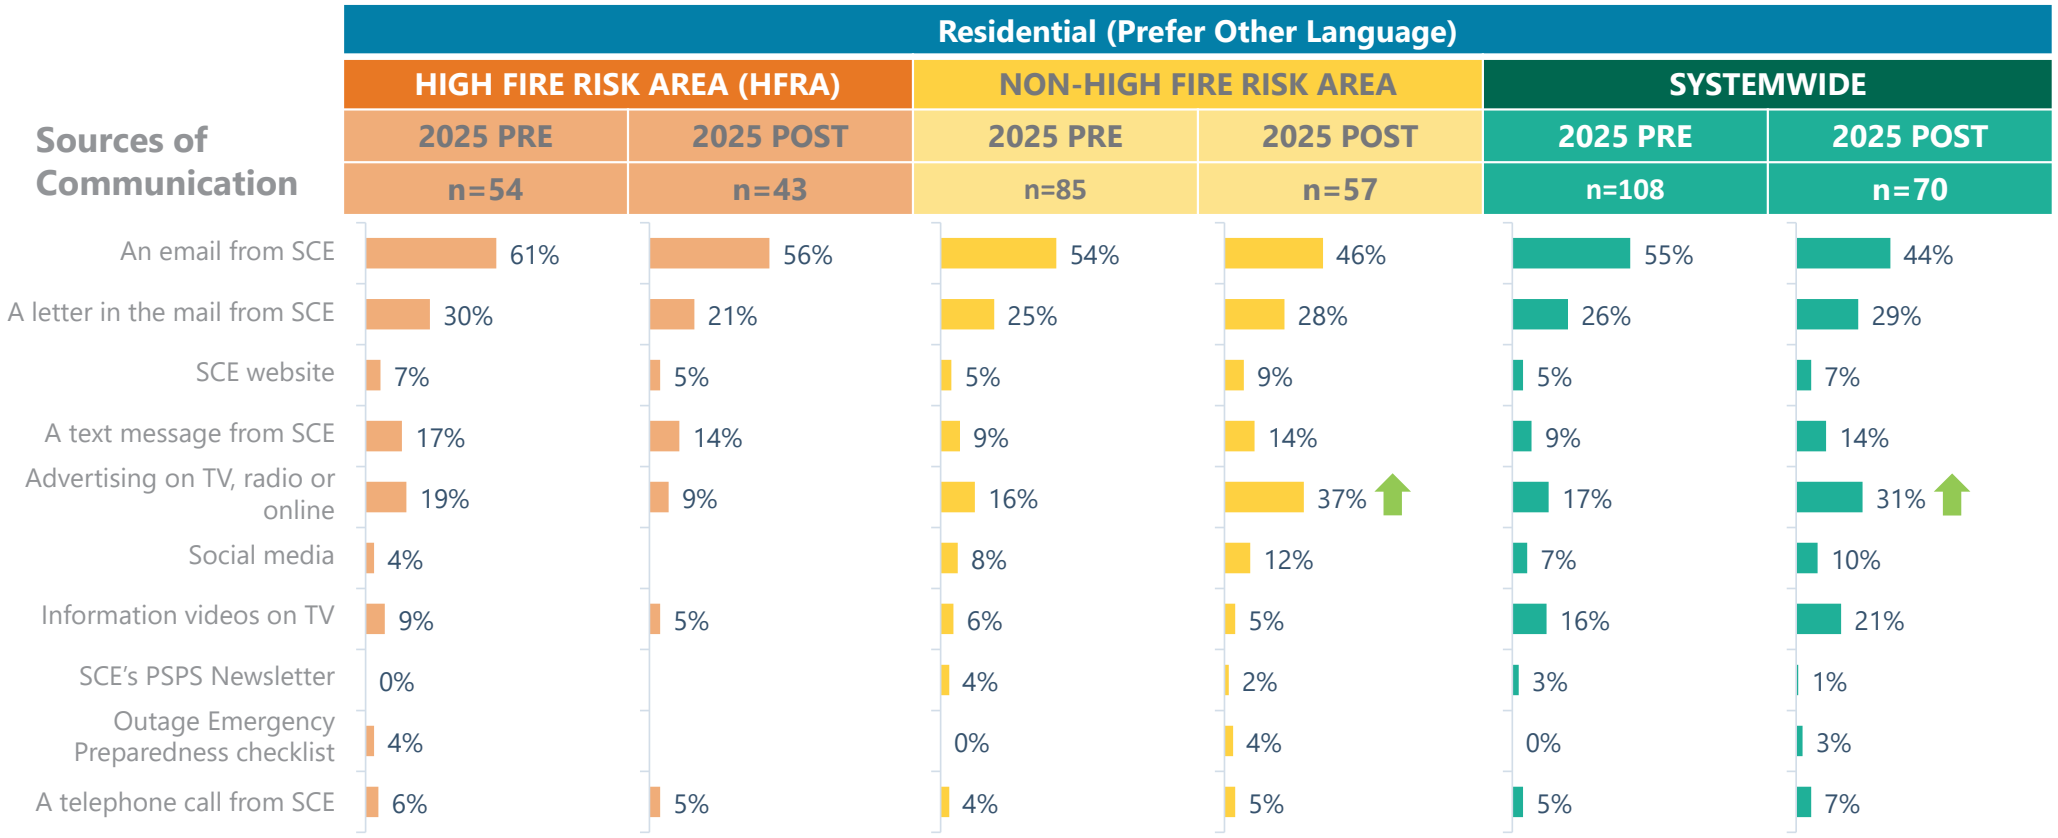
Among residents who recalled SCE communications, nearly all information was seen or heard in English & Spanish.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q5. [RECALL COMMUNICATION] In what language(s) was the wildfire safety and preparedness information that you recall seeing or hearing from SCE?

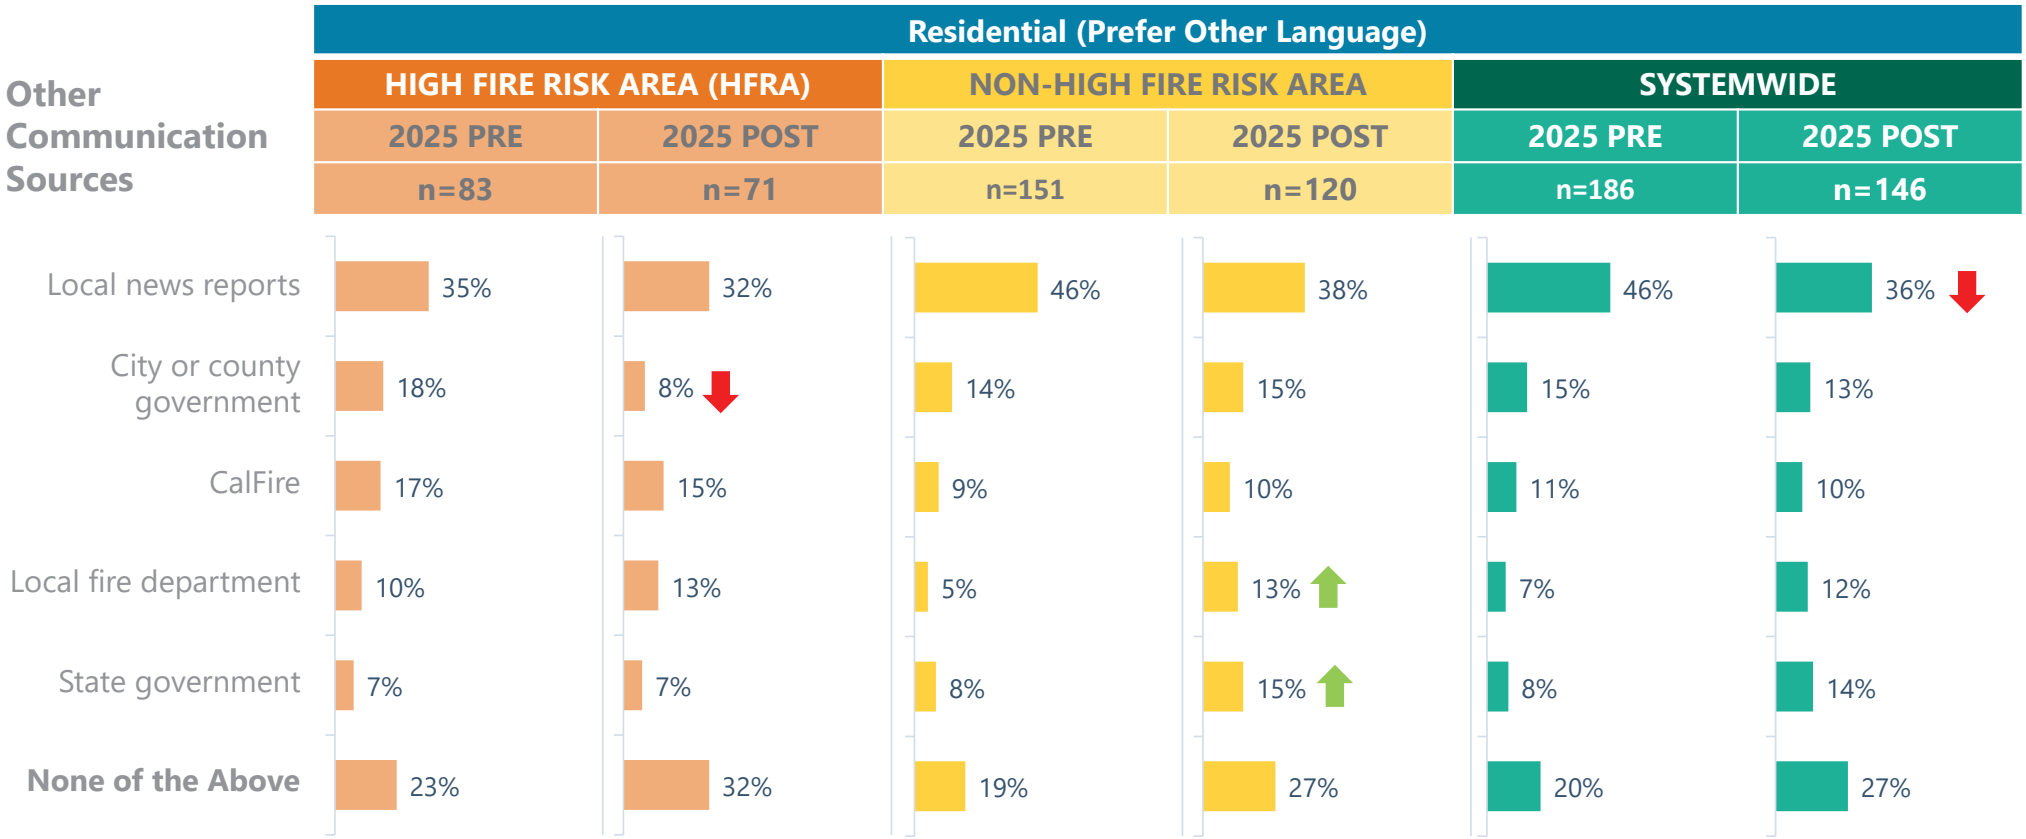
Email, mail from SCE, and advertising are the most cited sources where customers recall seeing or hearing communications about wildfire preparedness. Advertising showed an increase in recall among all residents from pre-season to post-season surveying.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q6. [RECALL COMMUNICATION] Where did you see or hear SCE's communications about wildfire season safety and preparedness?

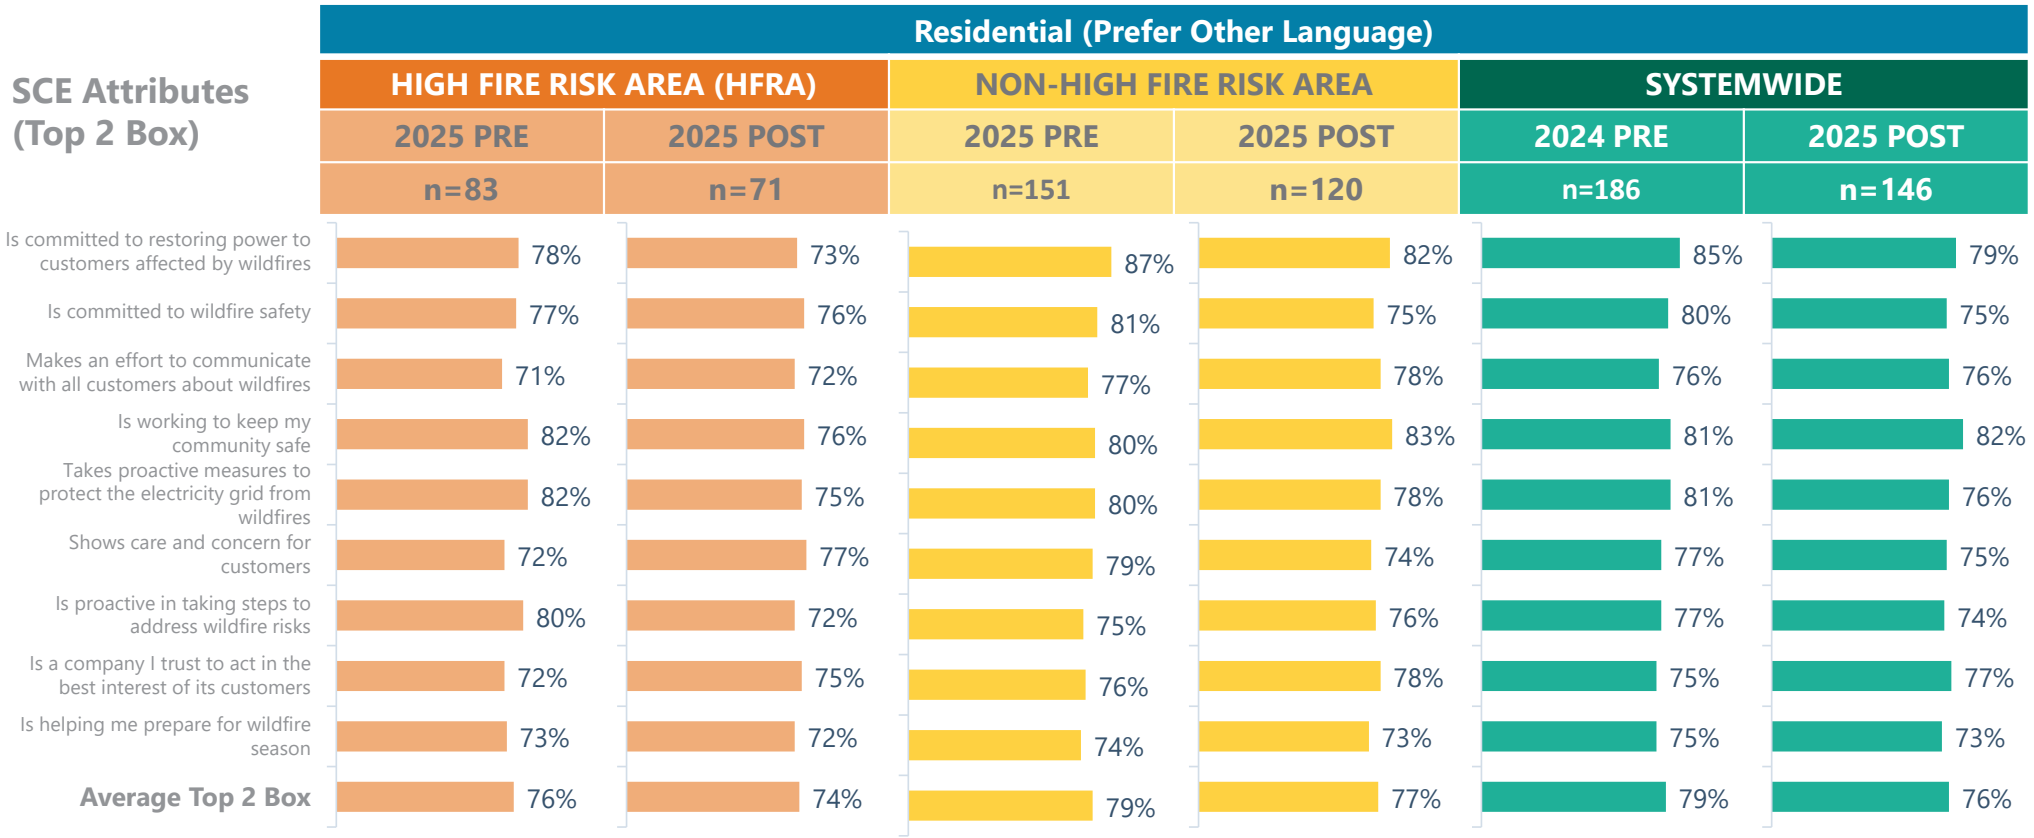
Local news reports are the most common non-SCE source for wildfire information, followed by city or county government and CalFire. The reliance on local news reports decreased significantly pre- to post-season Systemwide.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q10. Other than SCE's communications, what other sources have you used to obtain information about wildfire safety and preparedness?

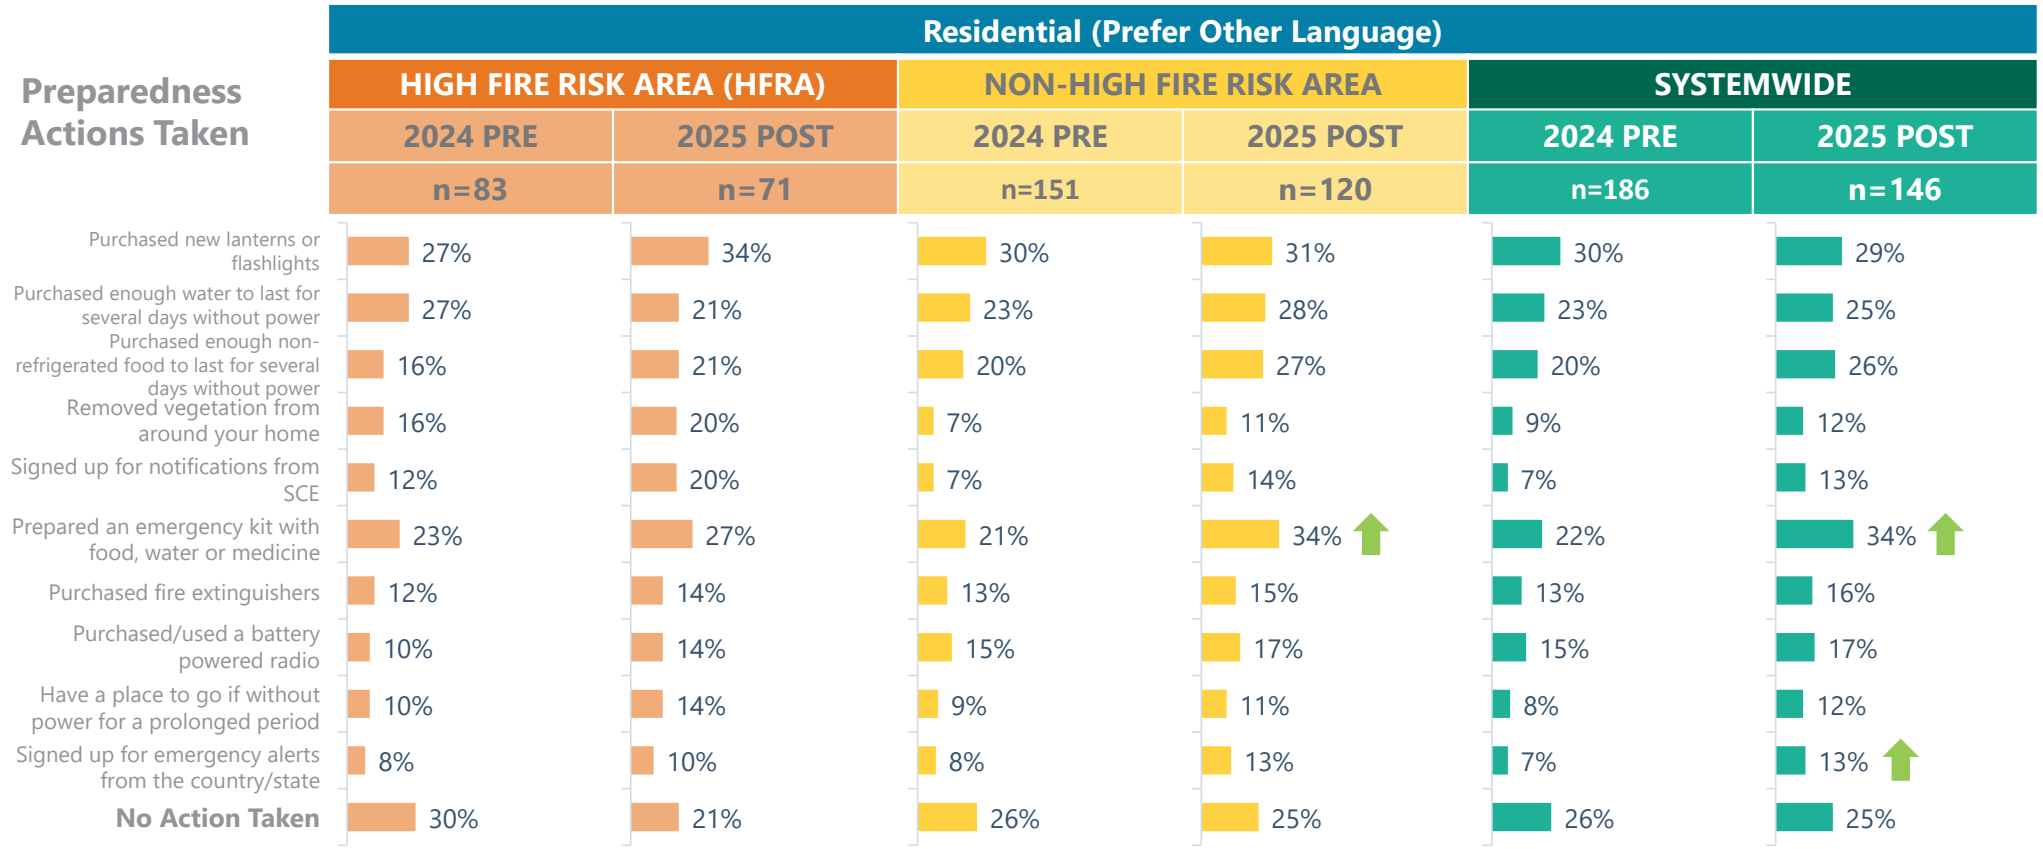
Customer perception of SCE mostly declined across nearly all attributes Systemwide between pre-season and post-season, however, none of these were statistically significant.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q14. Using a scale where 1 means completely disagree and 5 means completely agree, Please indicate how much you agree or disagree with the following statements about SCE. SCE…

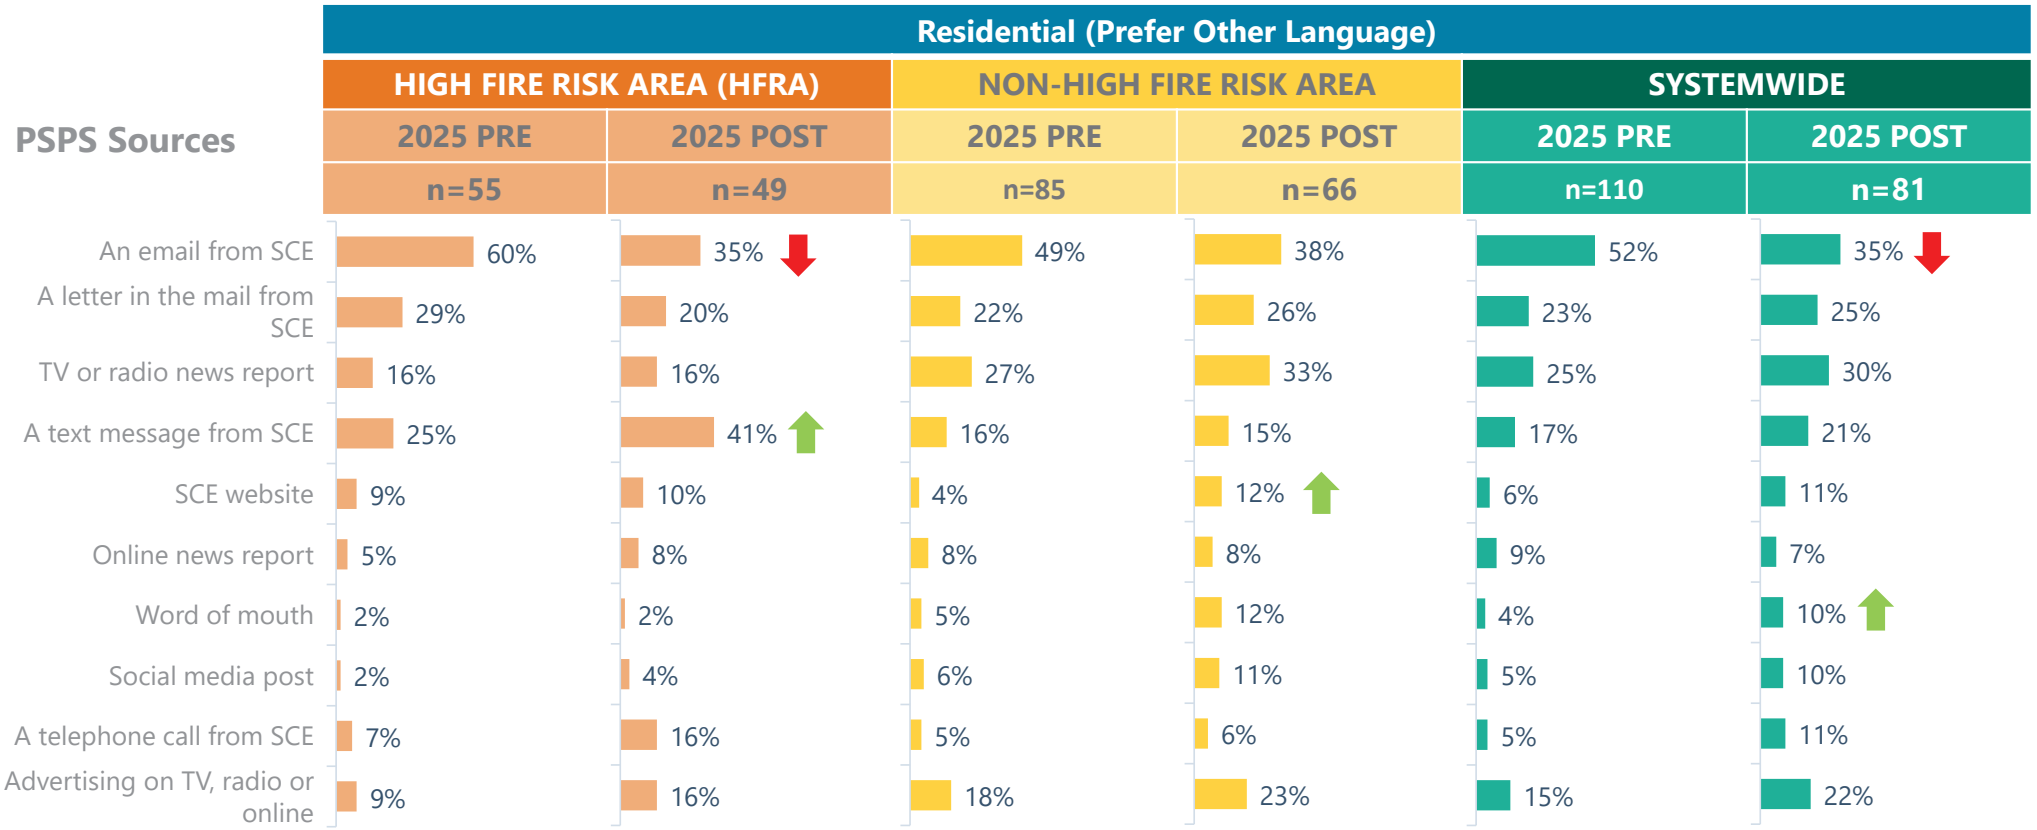
Preparing an emergency kit and purchasing lanterns or flashlights is the most common action taken by residents to prepare for a PSPS event in 2025, with the former having a significant increase Systemwide pre-season to post-season.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q21. What, if any, actions have you taken to prepare for a Public Safety Power Shutoff (PSPS) in 2025?

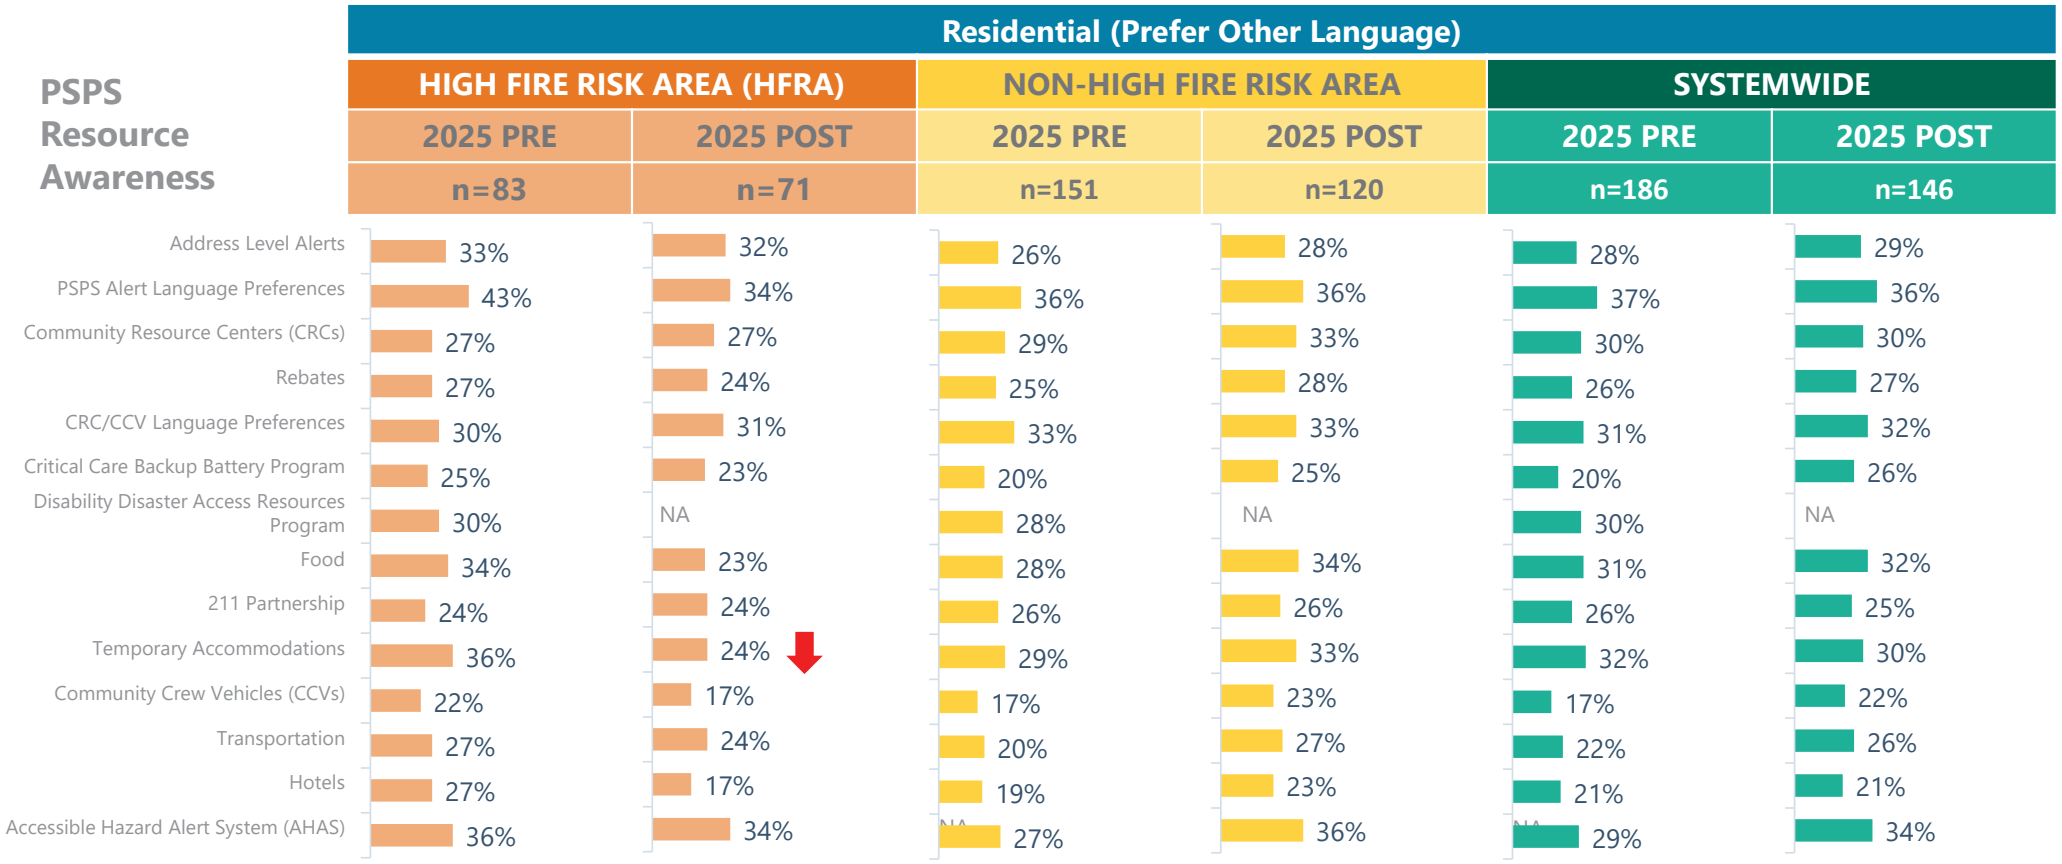
Email from SCE is the primary source through which customers in all areas have heard about Public Safety Power Shutoffs. Email, email decrease significantly Systemwide while word of mouth increased significantly. Again, note the small sample sizes leading to volatility.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q17. [RECALL PSPS] Where have you heard about Public Safety Power Shutoffs?

Awareness of PSPS resources, such as "Address Level Alerts" and "Language Preferences", and "AHAS" are among the most known resources.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

QN1: SCE supports a number of resources that are available to the public during a Public Safety Power Shutoff (PSPS). Before today, which of the following resources have you heard of?

"AHAS" and PSPS "Alert Language Preferences" are the resources with the highest level of familiarity among residents systemwide.

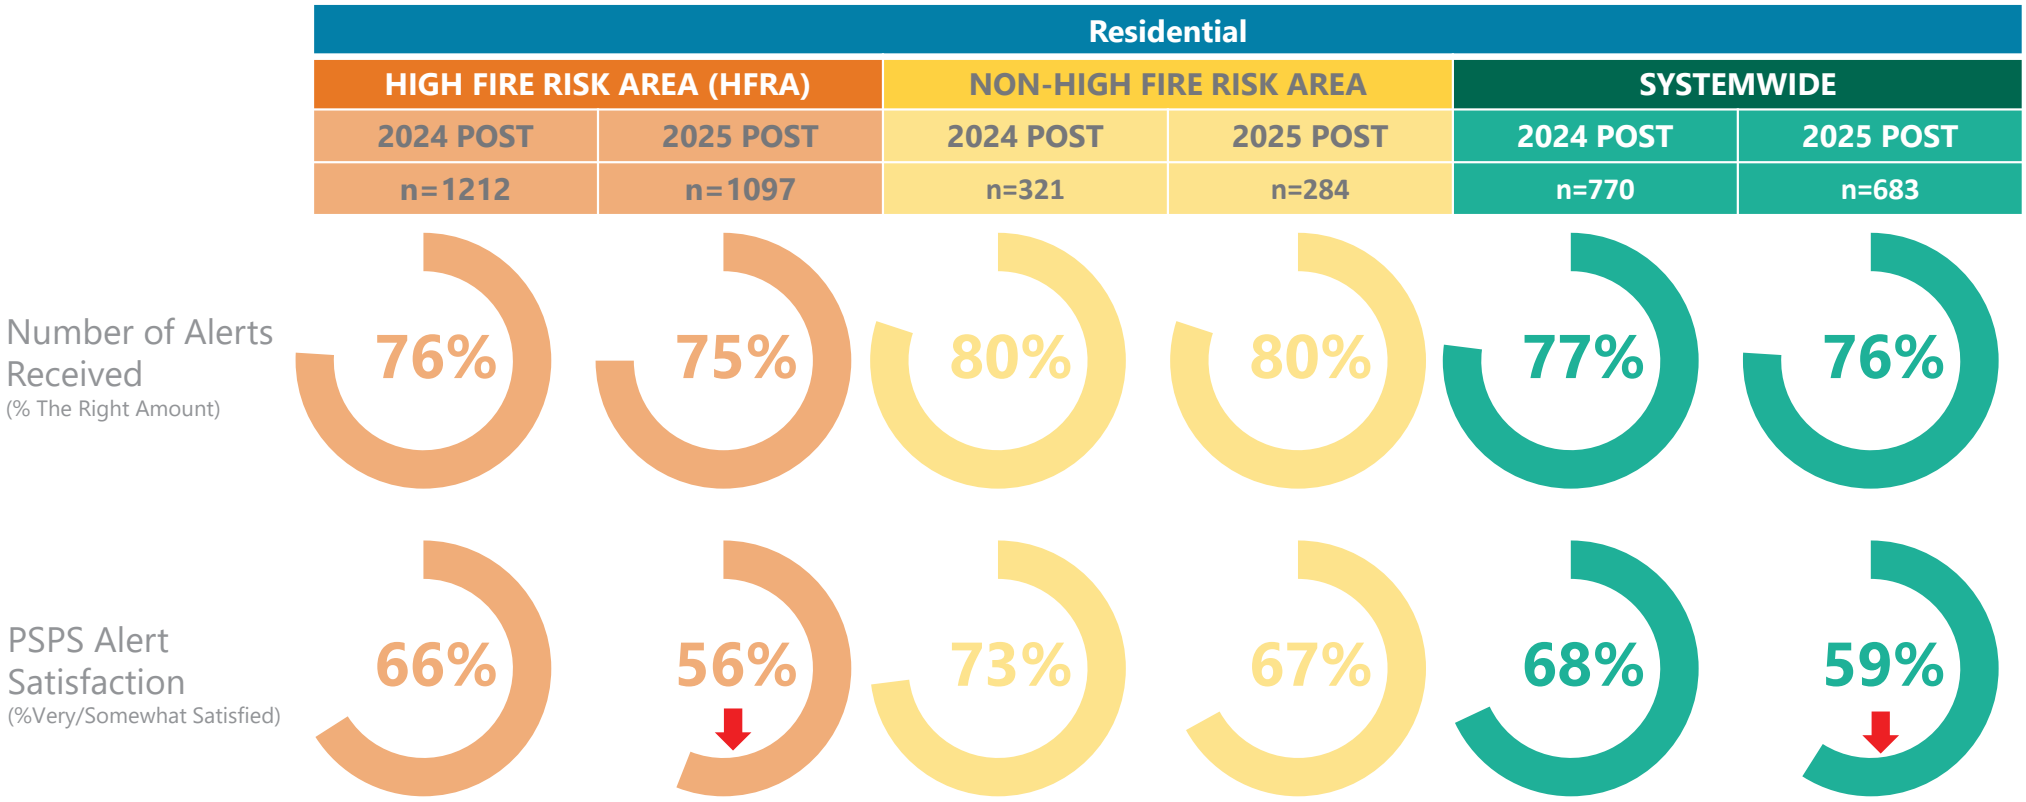
QPQ1 - Did you receive any Public Safety Power Shutoff (PSPS) alerts or notifications in the past few months?
QPQ2 – [RECEIVED ALERT] How many alerts did you receive?

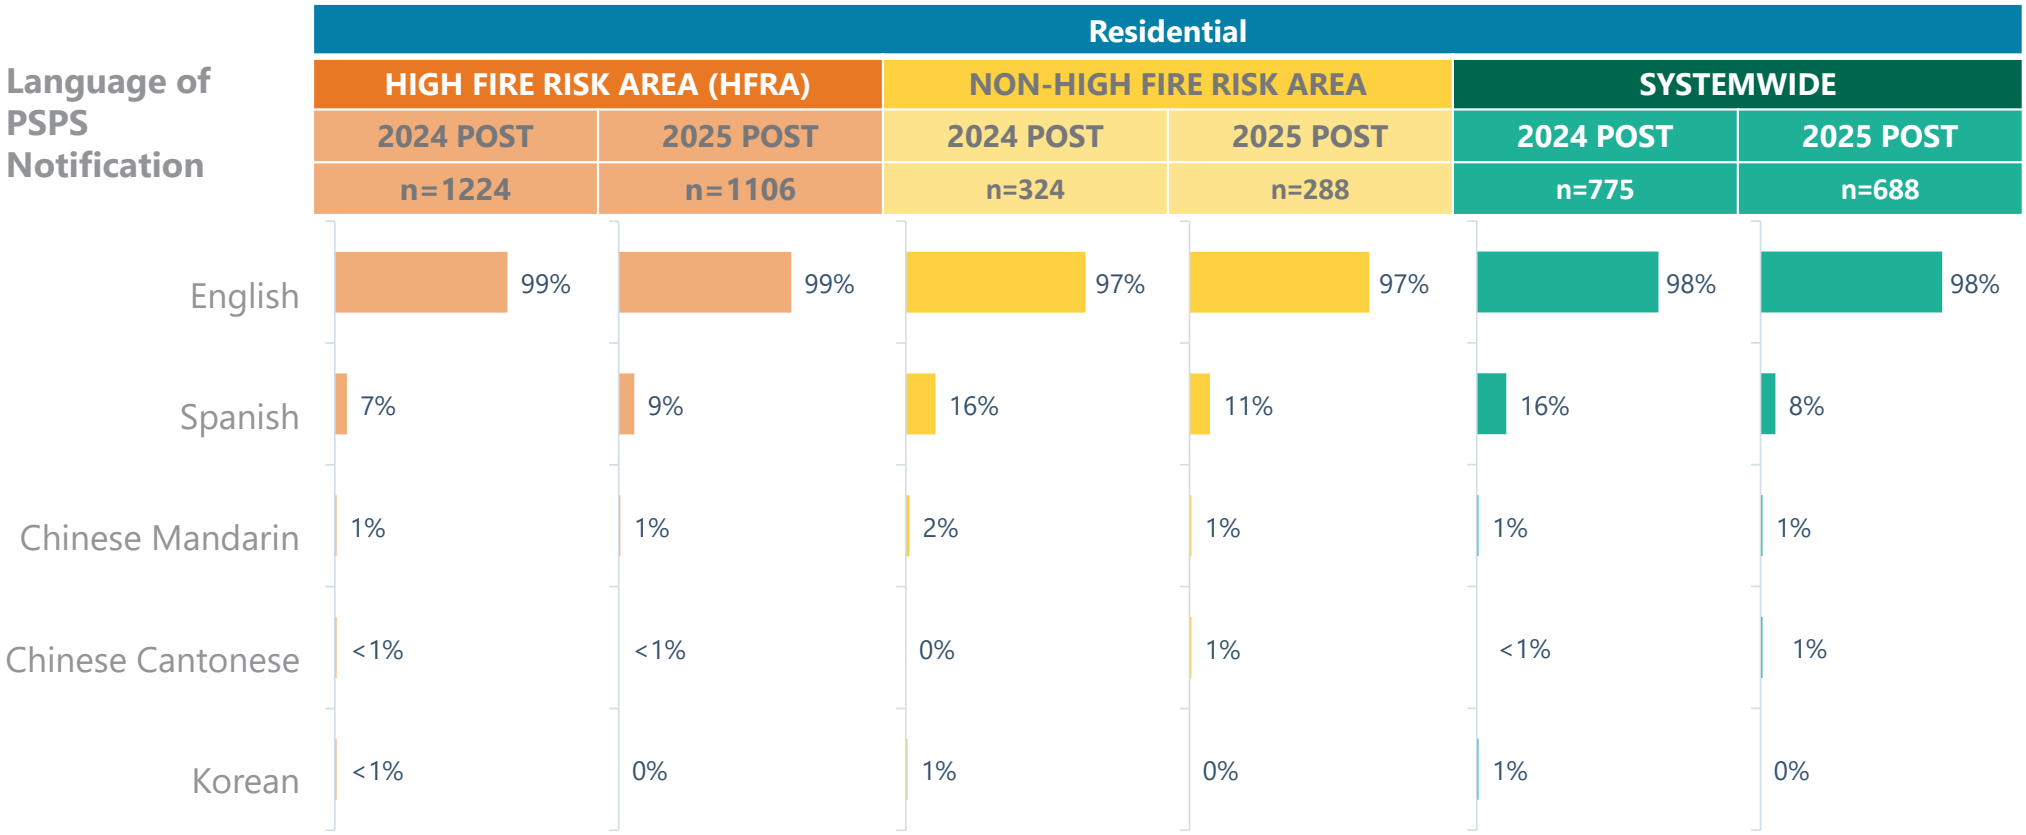
Satisfaction with SCE's wildfire preparedness efforts has significantly decreased among residents in High Fire Risk Areas, dropping from 66% in 2024 to 56% in 2025. Systemwide, the overall opinion of SCE's PSPS program also declined (68% to 59%).



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

QPQ2a - How do you feel about the number of alerts you received?
QPQ2b - How satisfied are you overall with the information provided in the alerts?

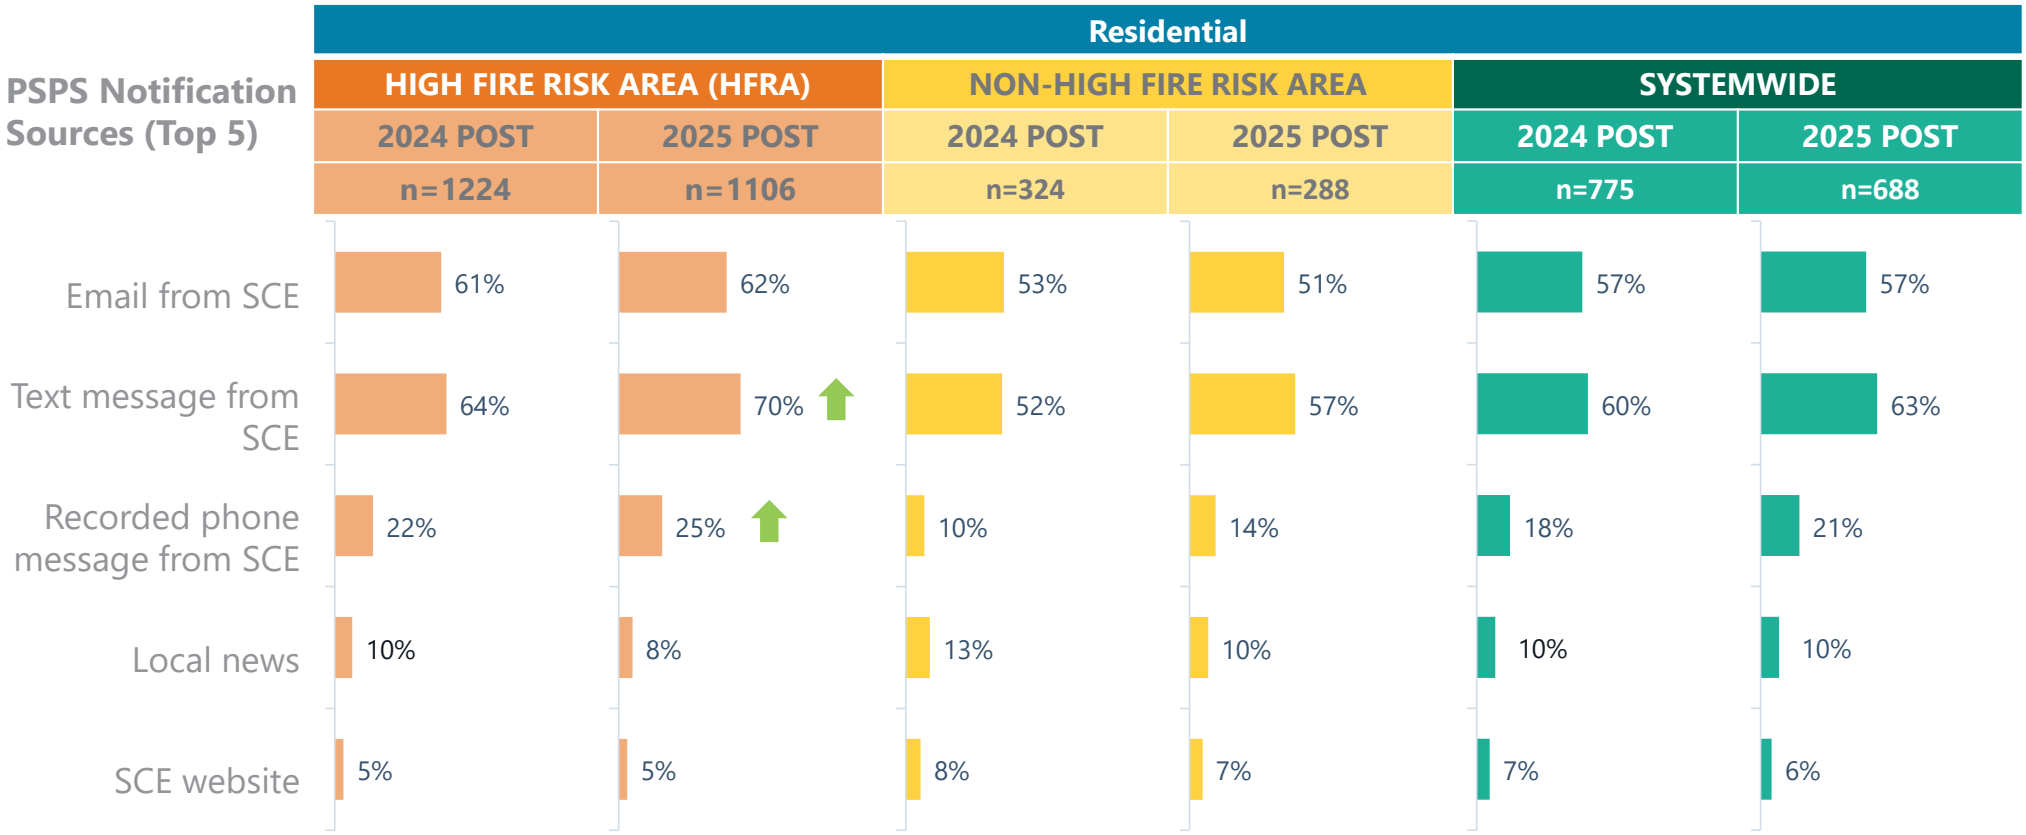
As reported by survey respondents, SCE delivered alerts in at least 12 non-English languages in 2025, with Spanish and Asian languages being the most prevalent.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

QPQ3 - [RECEIVED ALERT] In what language(s) was/were the Public Safety Power Shutoff notification(s)?

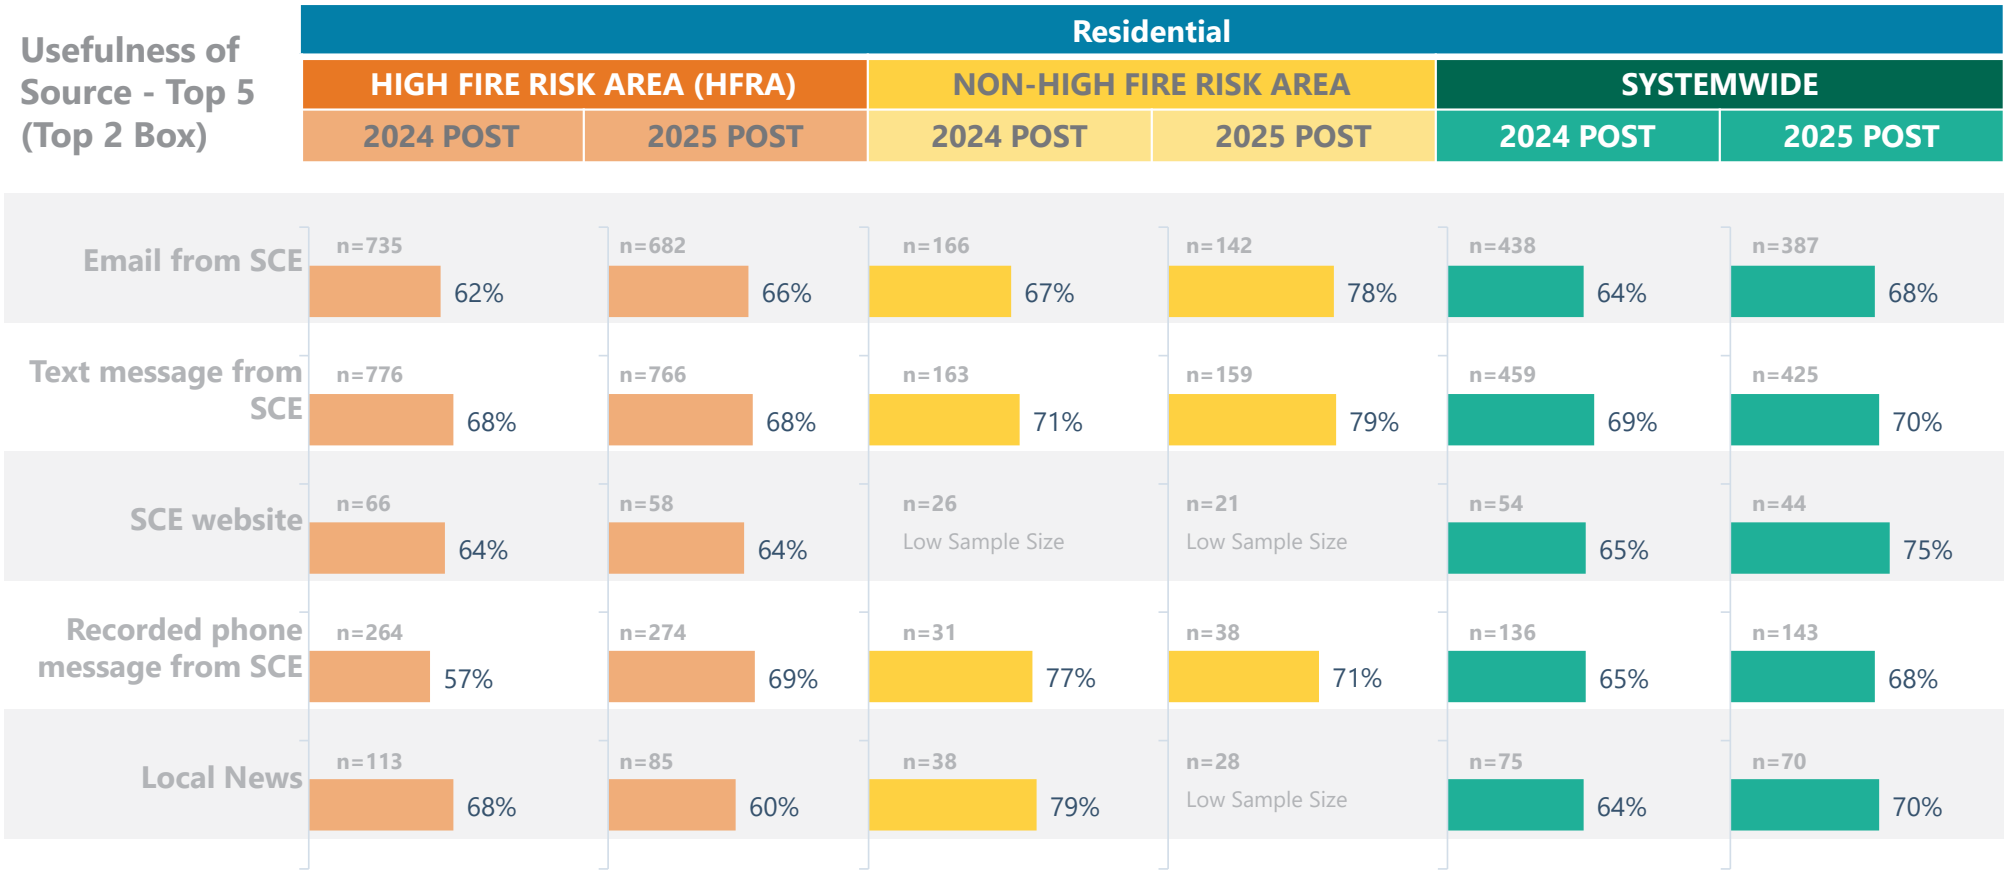
The top PSPS notifications were emails and texts from SCE.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

QPQ4 – [RECEIVED ALERT] How were you notified about the Public Safety Power Shutoff?

Residents found PSPS information uniformly helpful, generally increasing from 2024 to 2025.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

QP6A/B1. [ALL WHO USED THAT SOURCE IN ENGLISH] How useful was the information you received from SCE before the Public Safety Power Shutoff via...?

Three in ten (29%) HFRA customers and one in eleven (8%) Non-HFRA customers report having had their power shut off in the 2024 which significantly increased in 2025 (44% and 10%).

	Residential					
	HIGH FIRE RISK AREA (HFRA)		NON-HIGH FIRE RISK AREA		SYSTEMWIDE

Background and Research Methodology

Energy for What's Ahead®

SOUTHERN CALIFORNIA EDISON®

Background

- As mandated by CPUC Decision 20.03.004, starting in 2020, the California IOUs began conducting a two-wave survey (i.e., pre-PSPS season and post-PSPS season) on an annual basis.
- The objective of the survey is to assess the effectiveness of utility communications and outreach for wildfire safety/preparedness and PSPS activities.
- Each IOU determined its own methodology for optimizing the survey implementation and utilized their own preferred research partners.
- Core questions are asked by all three IOUs via their individual surveys, allowing some comparisons across IOUs, while each IOU also incorporates custom questions.
- Most of the pre-season questions are repeated in the post-season survey along with additional unique post-season questions.
- SCE administers the pre- and post-season surveys to residential and business customers across its service territory (i.e., systemwide) with a special focus on high fire risk areas (HRFAs).

Research Methodology – Target Location

- This research specifically targets customers who reside in High Fire Risk Areas (HFRAs).
- In addition to HFRAs, customers within the entire SCE service territory are also included.
  - For this research, this group of customers are referred to as "Systemwide".
- This means the HFRA base size (i.e., the total number of responses or completed surveys) is supplemented by the customers who reside in a HFRA from the Systemwide sample.
- Given this approach, the Systemwide base size will not equal the HFRA + non-HFRA base sizes.
- In 2025, customers affected by the Eaton fire were excluded from the research.

Research Methodology – Data Collection

- 4,033 residential customers took the 2025 pre-season survey between June 19th and August 8th .
  - Post-season data will be collected in Q4 2025 to meet CPUC testimony timing.

- Customers completed the pre-season survey via a self-administered web survey or an interviewer-administered telephone survey.
  - 70% of the surveys completed are web-based and 30% are telephone-based.

2025	Residential HFRA				Residential Systemwide			
Wave	Pre		Post		Pre		Post	
Mode	Online	Telephone	Online	Telephone	Online	Telephone	Online	Telephone
Completed Surveys	1,135	425			1,740	639		
Survey Length (in minutes)	17.0	21.3			16.2	21.1		

Research Methodology – Prevalent Languages

- In addition to English, the pre- and post-season surveys are offered to customers in the 20 prevalent languages spoken within SCE service territory:

English	Farsi	Korean	Vietnamese
Arabic	French	Punjabi	Hindi
Armenian	German	Russian	Hmong
Chinese - Cantonese	Japanese	Spanish	Portuguese
Chinese - Mandarin	Khmer	Tagalog	Thai

- Email invitations greeted potential respondents in all 20 languages with a jump link in the email to a web survey in that language.

- CATI phone center has staff proficient in the various languages, but all are not always available at the time of the interview. Upon encountering a language barrier, the interviewer attempts to identify the language and stores the record for re-contact later. If the language cannot be identified, a surname-based, pre-coded flag is used to assign the record for in-language re-contact.

Research Methodology – Prevalent Languages

Language of Interview	Residential Systemwide (Including HFRAs)		Residential HFRA (Not including Systemwide)

Executive Summary

Energy for What's Ahead®

SOUTHERN CALIFORNIA EDISON®

Executive Summary

SCE saw a mixed reaction to its wildfire safety efforts in 2025. While more people living in high fire risk areas (HFRAs) are aware of SCE's Public Safety Power Shutoff (PSPS) program and remember receiving communications about it, they are less satisfied with the utility's overall performance and outreach compared to the 2024 pre-wildfire season.

Increased Awareness

- Awareness of the PSPS program among HFRA residents jumped from 79% to 87% between the 2024 and 2025 pre-season surveys. Similarly, the recall of SCE's wildfire communications rose from 57% to 64%.

Consistent Communication Sources

- Email, mail, and the SCE website remain primary channels through which residents recall receiving information. Recall from digital channels like email, text messages, and social media saw significant growth.

PSPS Resource Utilization

- While awareness and use of PSPS support resources (like address-level alerts and rebates) increased significantly, familiarity with most of these programs declined.

Executive Summary

Overall opinion of SCE's wildfire preparedness has declined following the early 2025 fires.

Negative Perceptions

- Satisfaction with SCE's overall wildfire preparedness efforts fell 8 points, from 57% to 49%. Similarly, customer agreement with positive attributes about SCE, such as its commitment to safety and the community, declined significantly across all measured metrics.

Customers are hearing the PSPS messaging but are becoming increasingly dissatisfied with SCE's performance.

Key Findings

Among residents in High Fire Risk Areas (HFRA), awareness of Public Safety Power Shutoff (PSPS) significantly increased from 79% in the 2024 pre-season to 87% in the 2025 pre-season. Similarly, the recall of SCE's wildfire communications saw a significant rise from 57% to 64% over the same period.

↑↓ indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q1. "In the past few months do you recall any communications of any type (i.e., mail, TV, radio, social media, etc.) from SCE about the threat of wildfires and how you can prepare for them?"
Q16. Public Safety Power Shutoff, or PSPS, is a precautionary safety measure where SCE may proactively turn off power lines when extreme fire danger conditions are forecasted, in order to reduce the risk of wildfires. Before today, had you ever heard of the Public Safety Power Shutoff program?

In the 2025 pre-season survey, 47% of HFRA residents had a favorable opinion of SCE's PSPS program, unchanged since the 2024 pre-season. Satisfaction with SCE's overall wildfire preparedness efforts decreased to 49%, down 8 pts from the 2024 pre-season surveys.

Residential			
HIGH FIRE RISK AREA (HFRA)			
2024 PRE (A)	2024 POST	2025 PRE (B)	2025 POST

Opinion of SCE's PSPS Program	49%	49%	47%
Satisfaction with SCE's Wildfire Preparedness Efforts	57% B	57%	49%

indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q22. Overall, what is your opinion of SCE's Public Safety Power Shutoff program?
Q15. How satisfied are you with SCE's overall wildfire safety and preparedness efforts?

Between the 2024 and 2025 pre-seasons, self-reported preparedness for extended power outages among residents in High Fire-Risk Areas (HFRAs) remained consistent at 70%.

	Residential			
	HIGH FIRE RISK AREA (HFRA)

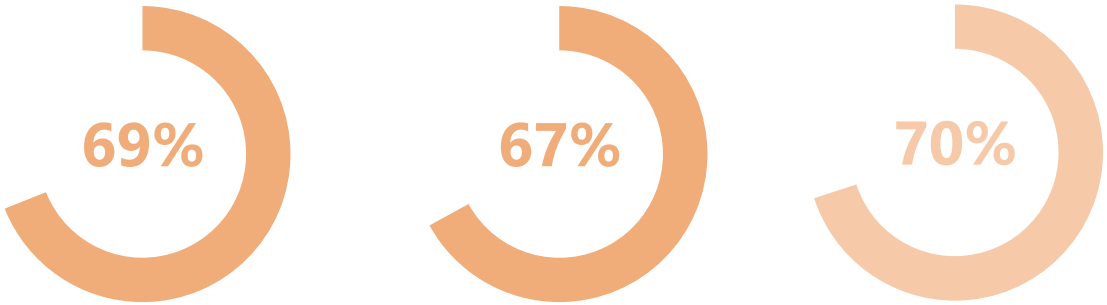
Completely / Somewhat Prepared	69%	67%	70%	



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q20. A Public Safety Power Shutoff event could last anywhere from 24-48 hours, or longer in some cases. How would you rate your level of preparedness for being without electricity for an extended period?

Among HFRA residents who recalled SCE communications, nearly all information was seen or heard in English & Spanish.

Languages Used/Preferred (Top 5)

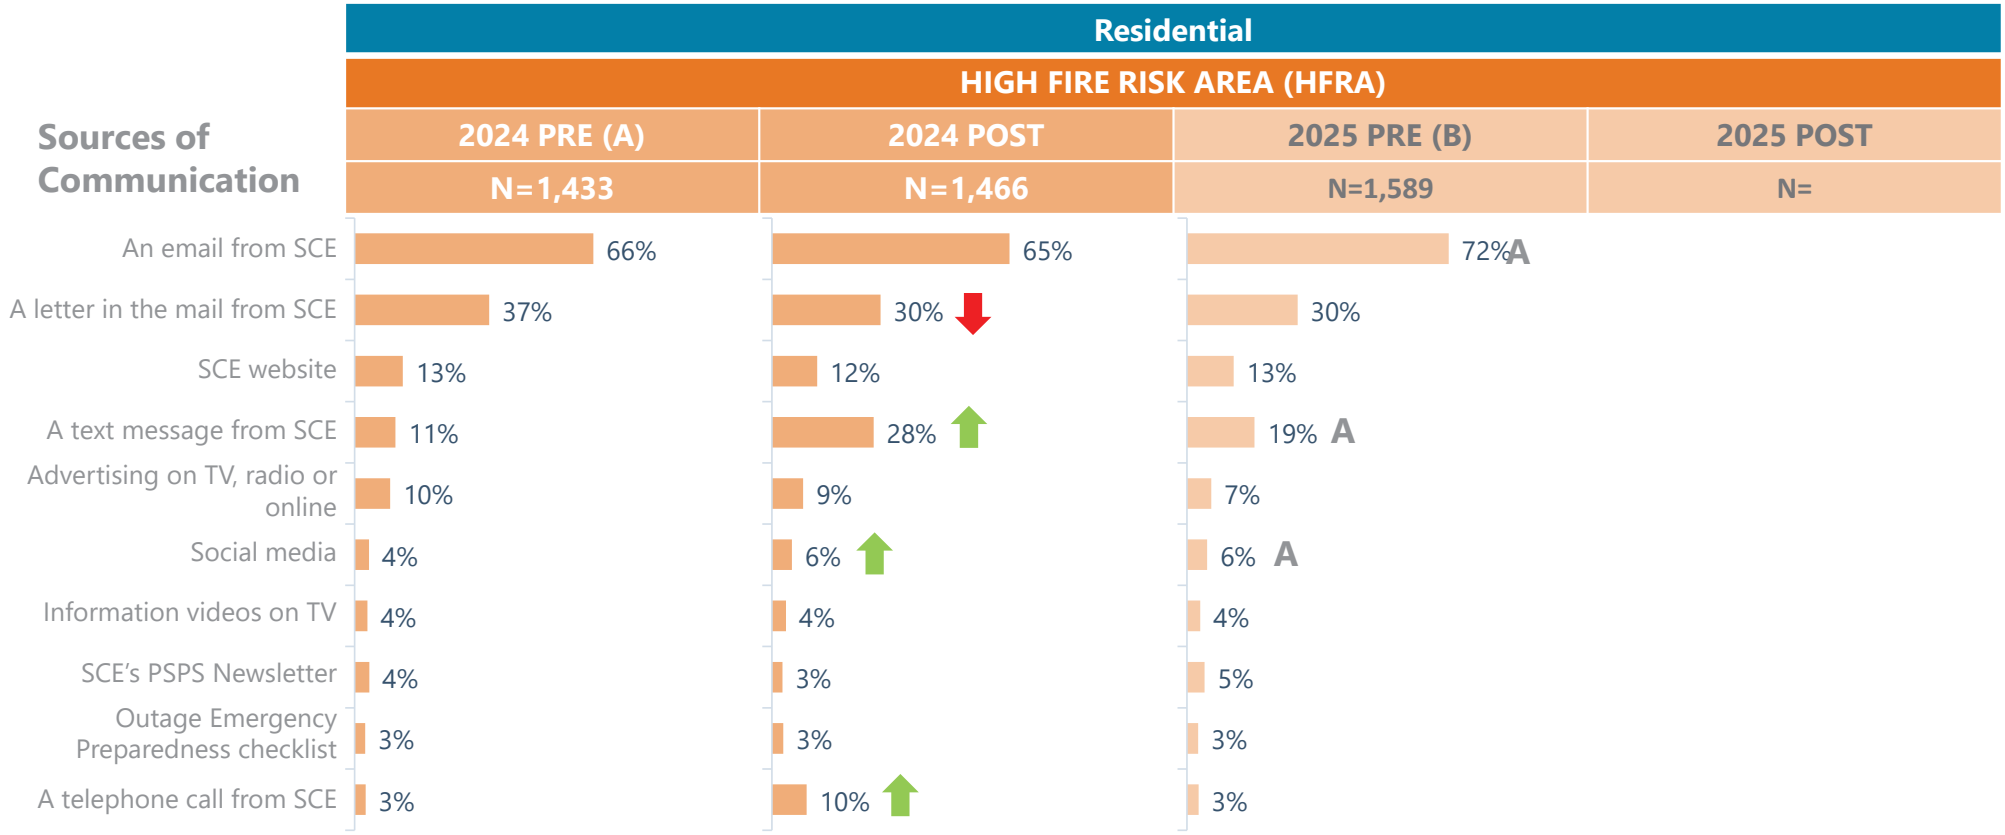
↑↓ indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q5. [RECALL COMMUNICATION] In what language(s) was the wildfire safety and preparedness information that you recall seeing or hearing from SCE?

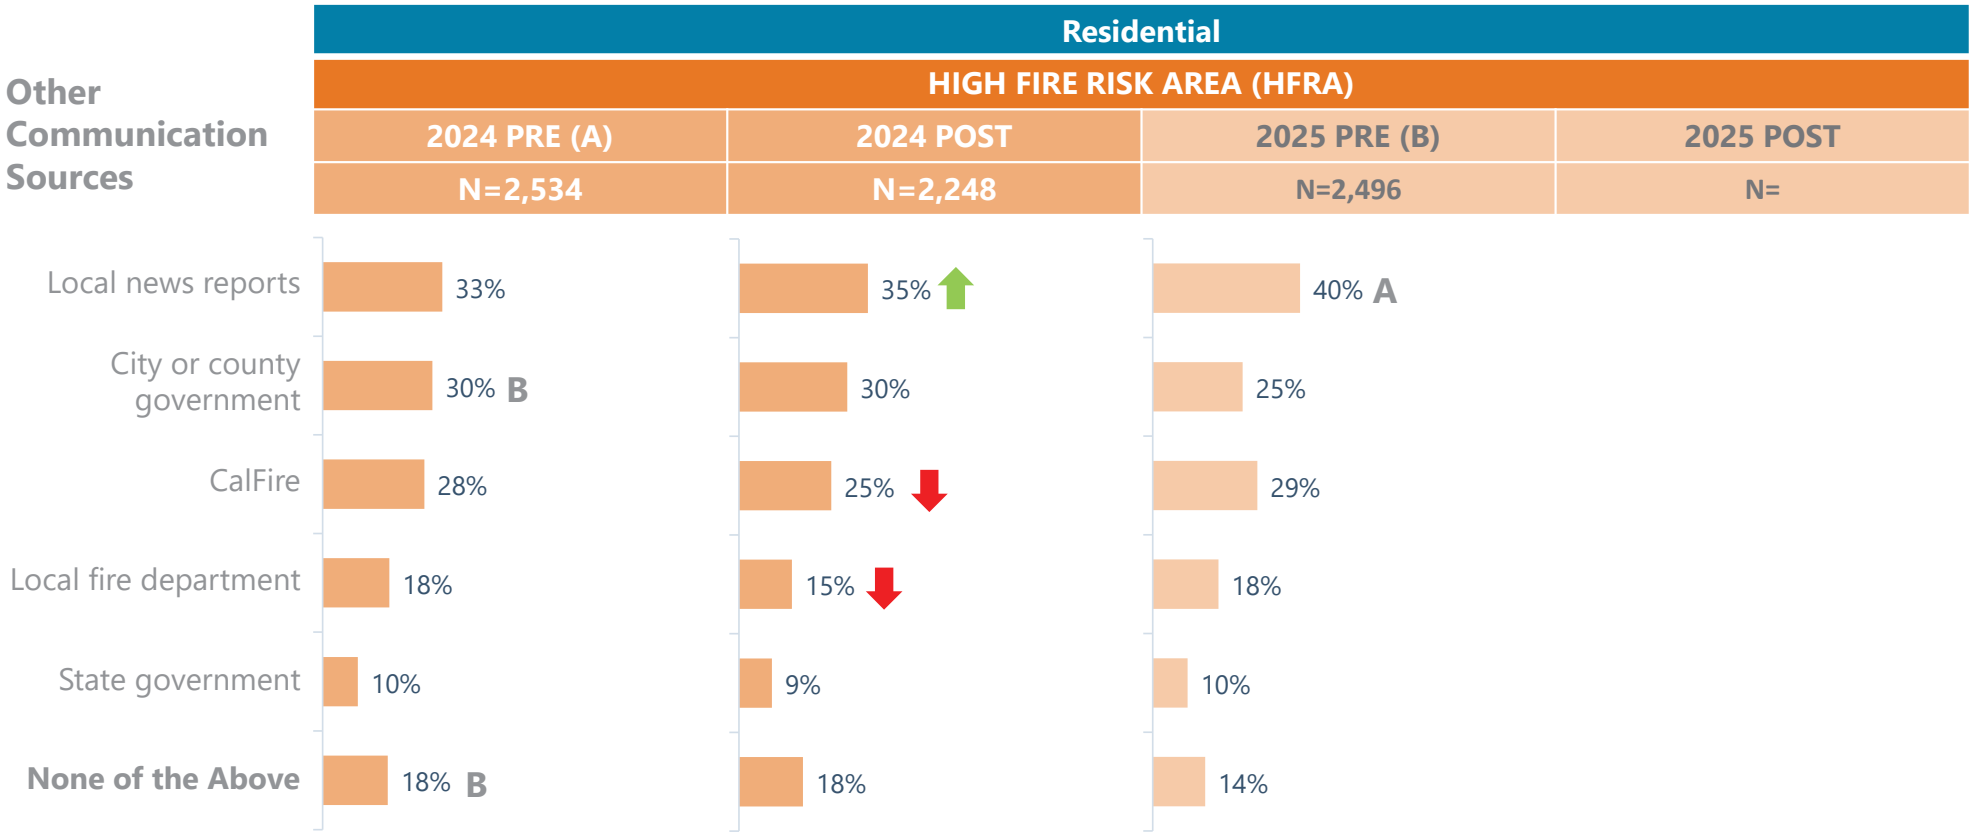
The primary ways HFRA residents recalled hearing about wildfire preparedness from SCE were through email, letters in the mail, texts from SCE, and the SCE website. Recall from email, text messages and social media all increased significantly between the 2024 and 2025 pre-season surveys.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q6. [RECALL COMMUNICATION] Where did you see or hear SCE's communications about wildfire season safety and preparedness?

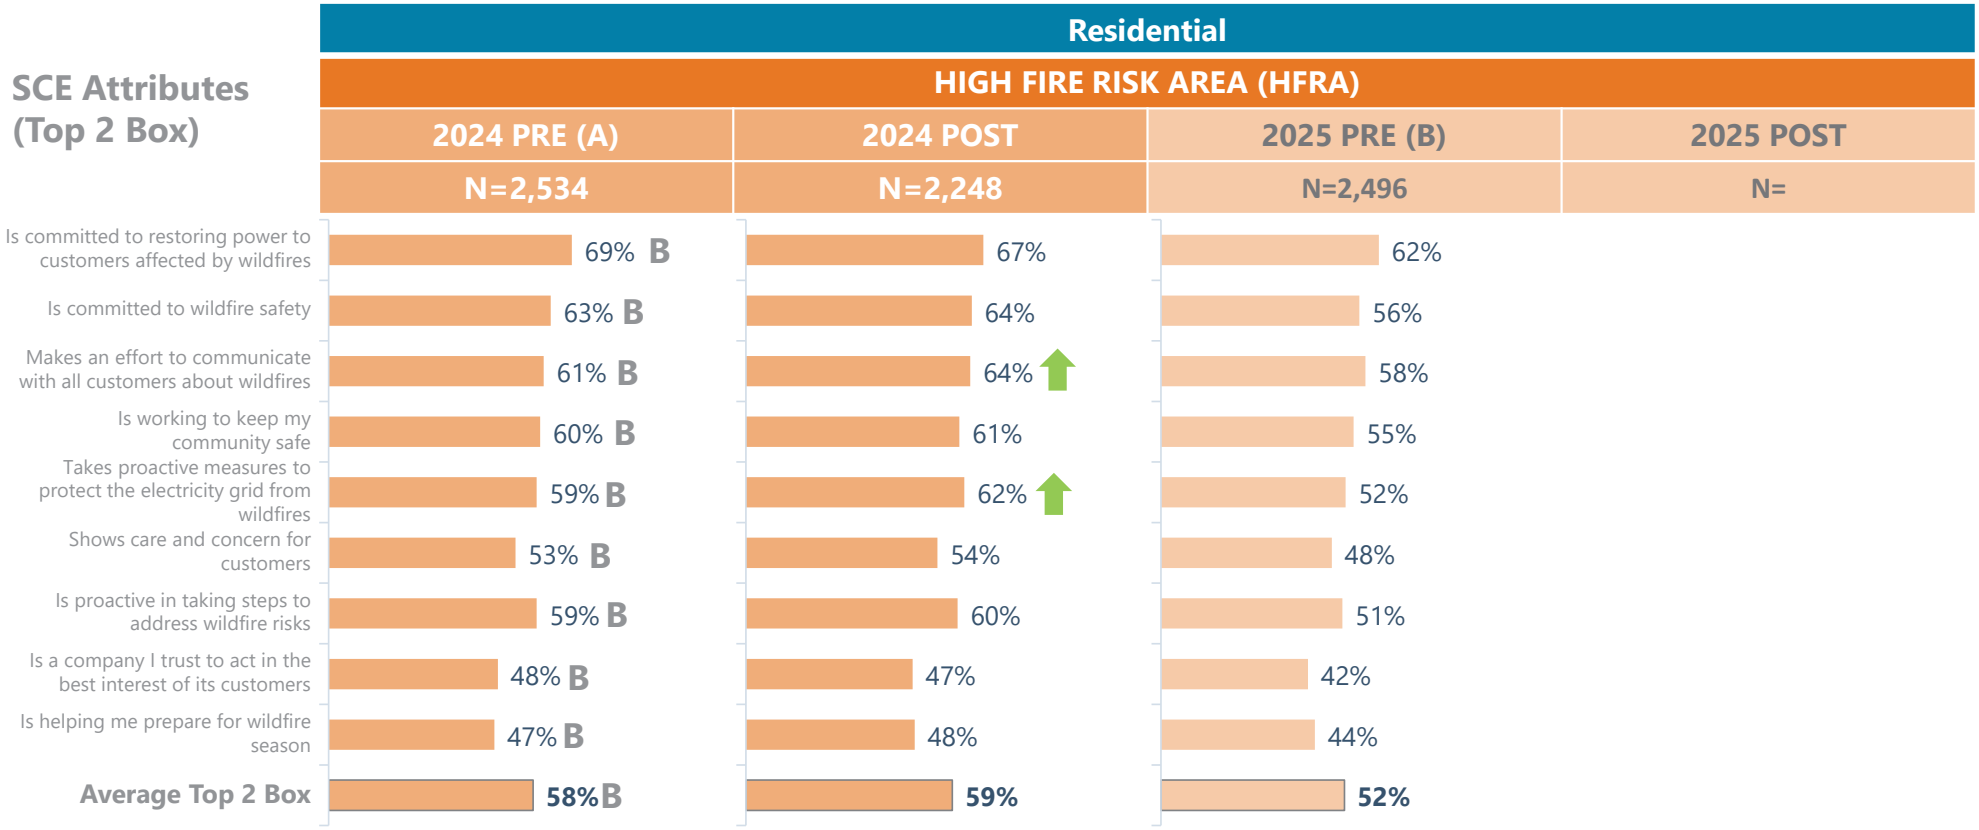
Other than SCE, HFRA residents most commonly received wildfire safety information from local news reports, their city or county government, and CalFire. The use of local news and government sources increased significantly from the 2024 to the 2025 pre-season survey.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q10. Other than SCE's communications, what other sources have you used to obtain information about wildfire safety and preparedness?

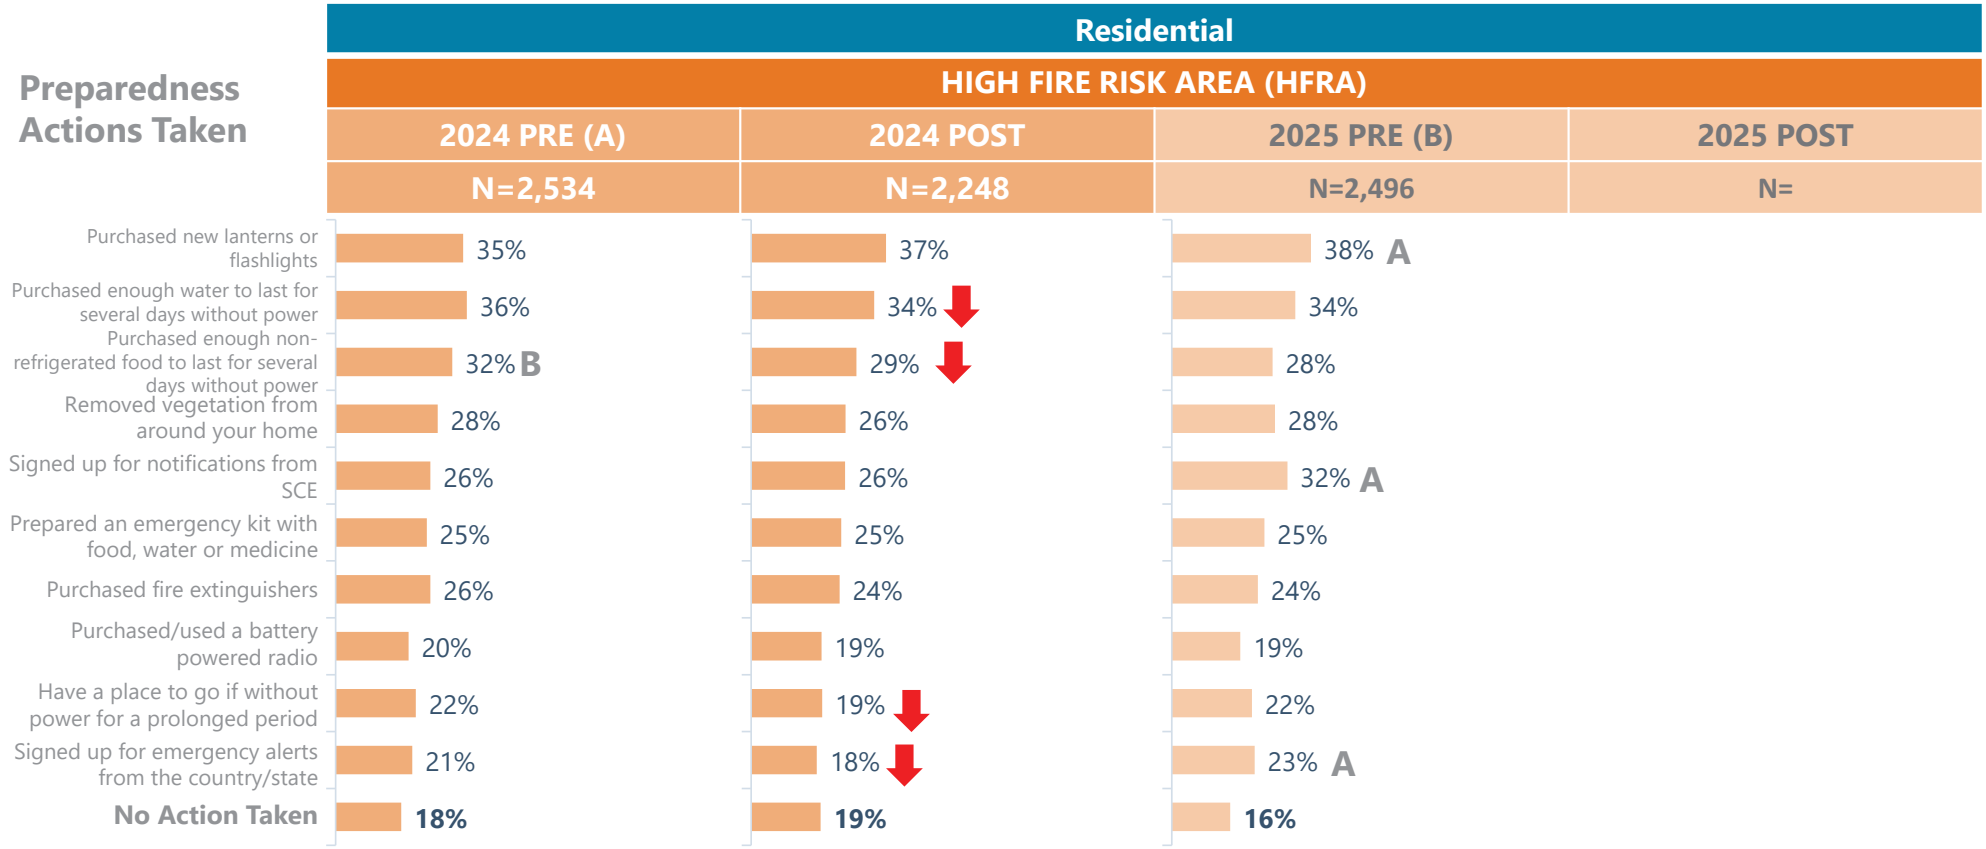
Customer agreement with SCE attributes, such as its commitment to safety and the community, declined significantly across all measured attributes between the 2024 and 2025 pre-season surveys. This indicates a negative shift in perception among HFRA residents regarding SCE's wildfire-related efforts.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q14. Using a scale where 1 means completely disagree and 5 means completely agree, Please indicate how much you agree or disagree with the following statements about SCE. SCE...

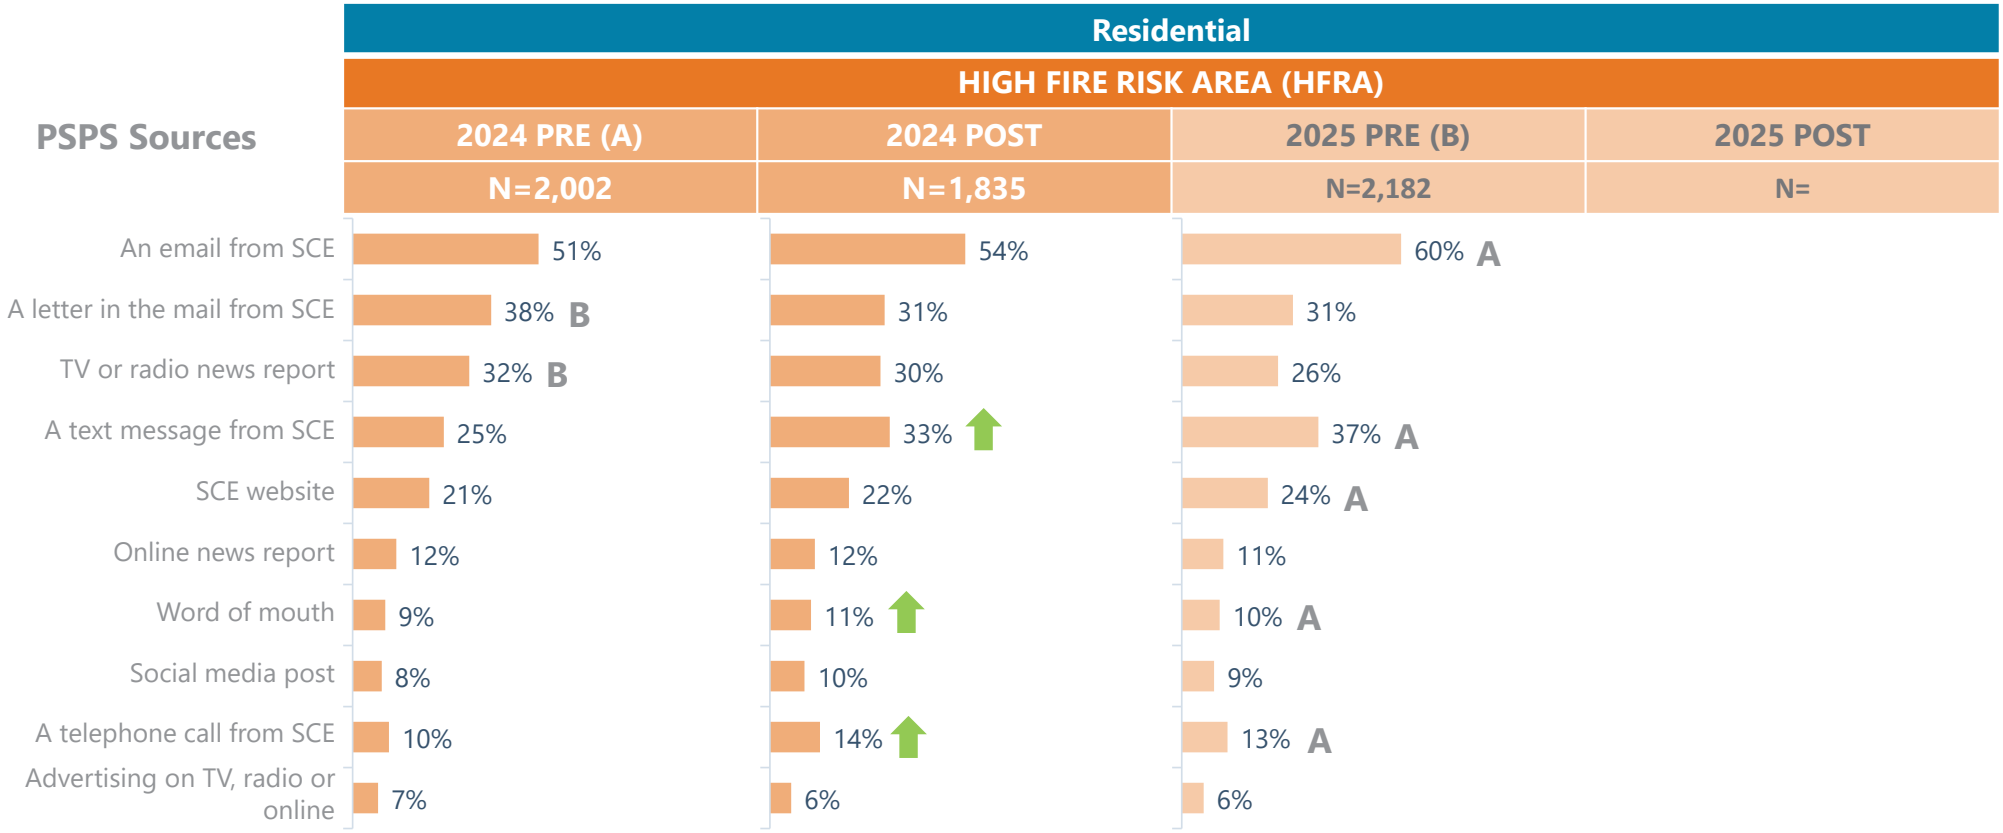
The most common preparedness actions taken by HFRA residents include purchasing flashlights, water, and non-perishable food. Significantly more residents signed up for SCE notifications as well as emergency alerts from the state.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q21. What, if any, actions have you taken to prepare for a Public Safety Power Shutoff (PSPS) in 2025?

HFRA residents most frequently heard about PSPS through emails from SCE, texts from SCE, TV or radio news reports, and letters from SCE. There were significant increases in awareness through SCE emails, text messages, and the SCE website.



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

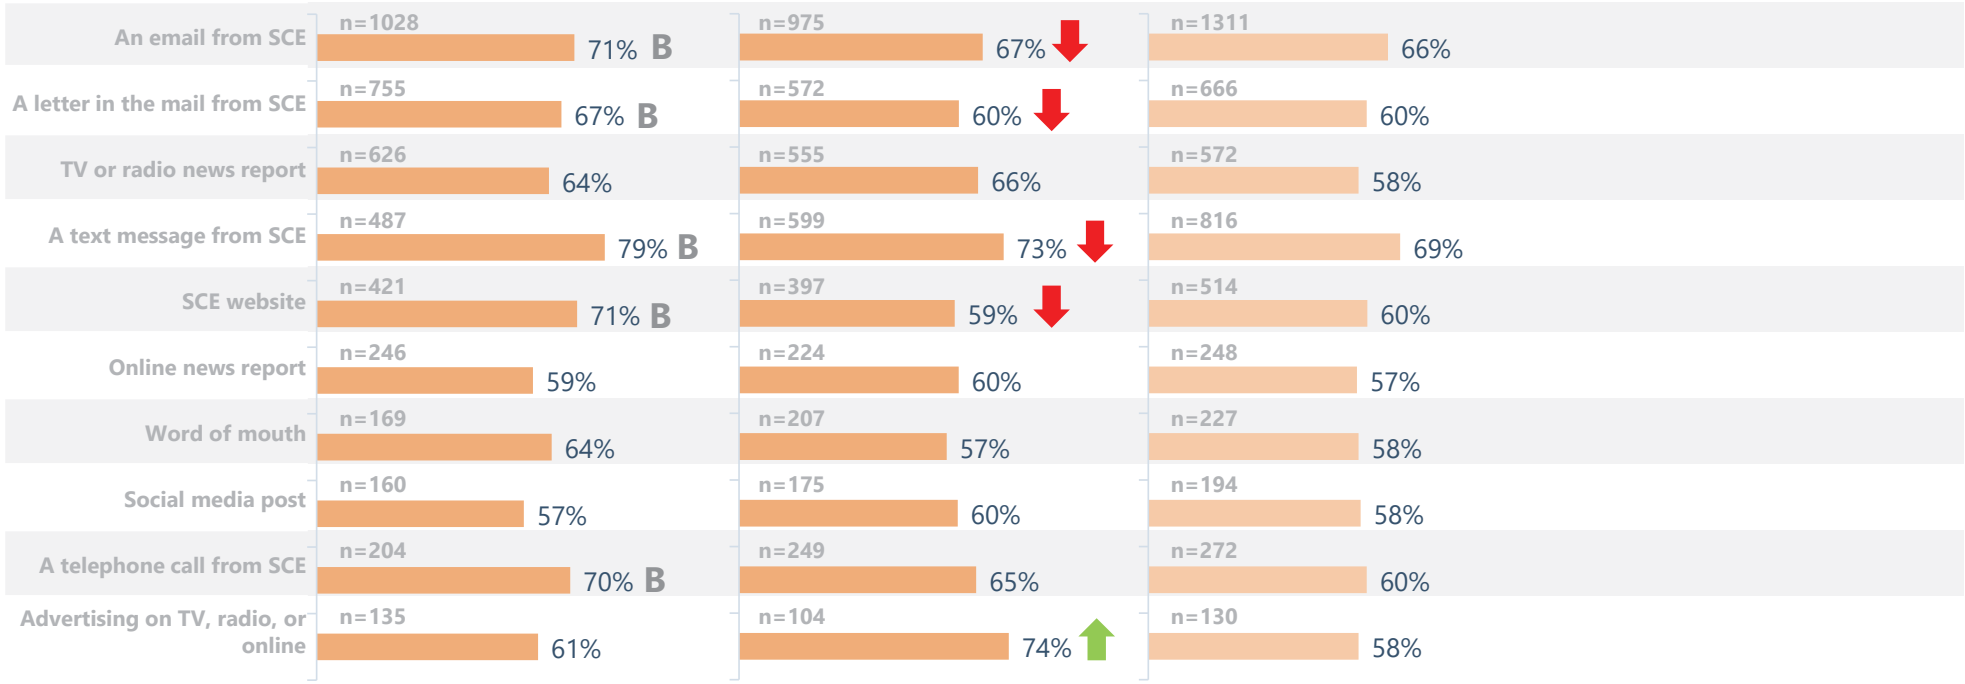
Q17. [RECALL PSPS] Where have you heard about Public Safety Power Shutoffs?

HFRA residents found PSPS information delivered via text / email from SCE to be the most useful. Usefulness dropped across the board compared to 2024 pre-season.

Usefulness of Source - Top 10 (Top 2 Box)

Residential

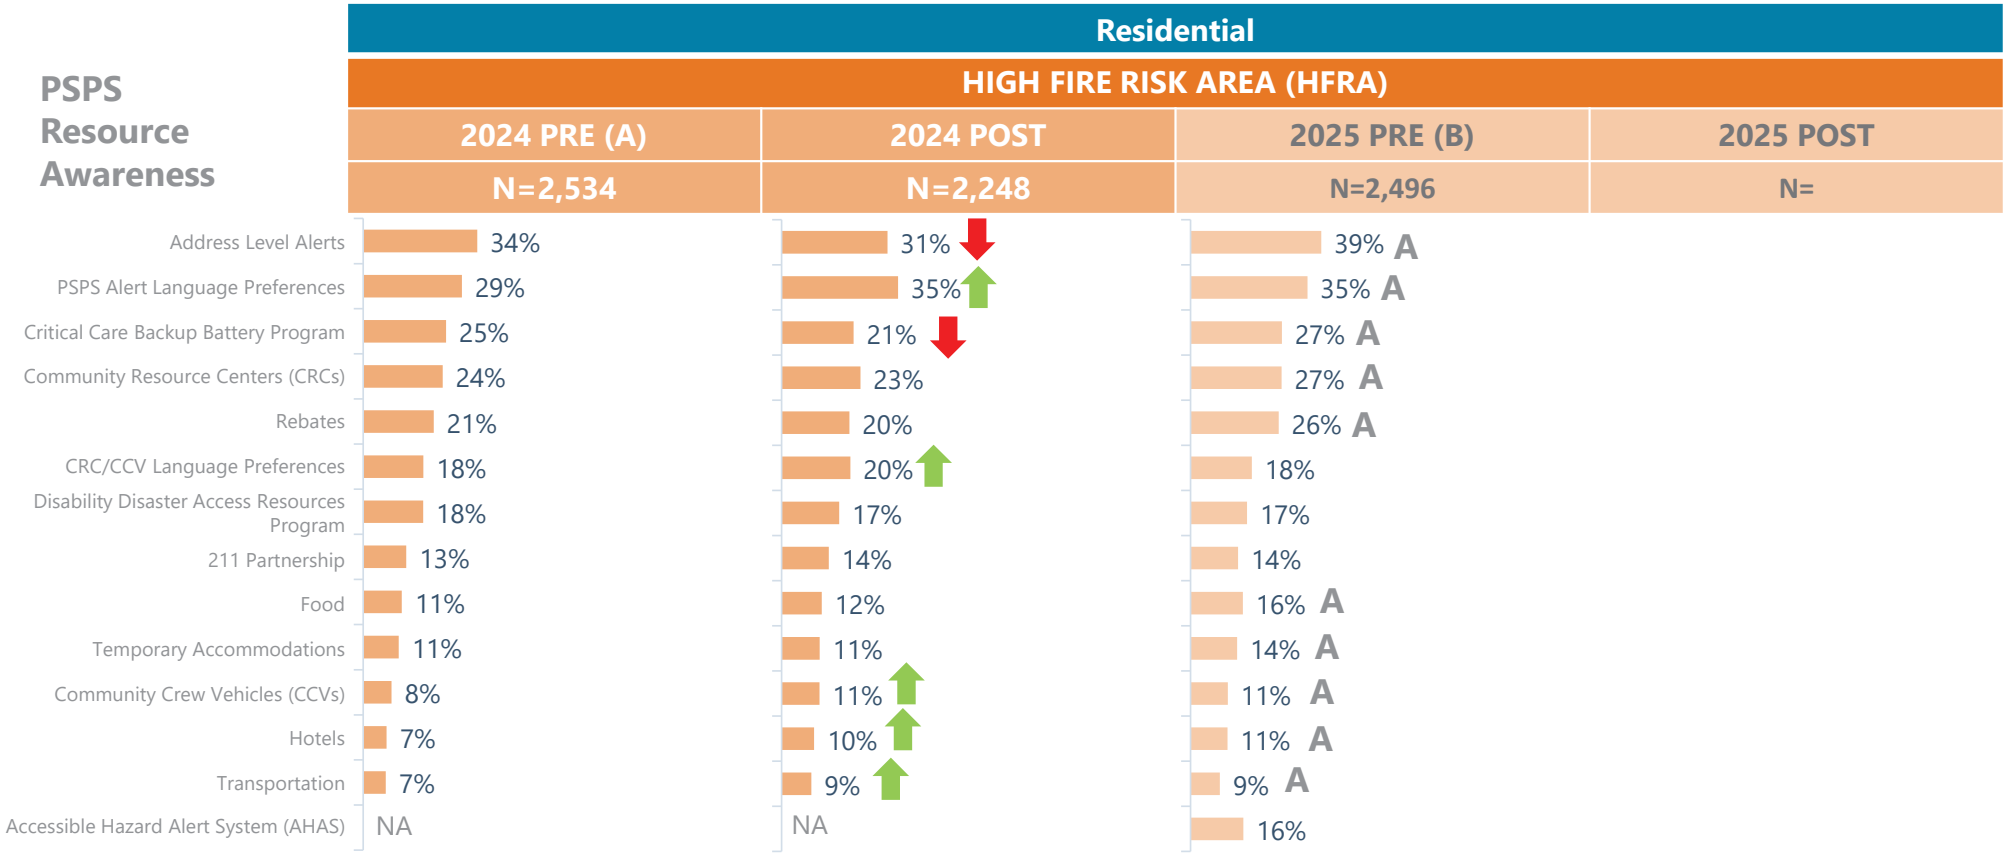
HIGH FIRE RISK AREA (HFRA)



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

Q19A. [SAW COMMUNICATIONS] On a 1 to 5 scale where 1 is not at all useful and 5 is extremely useful, how useful was the PSPS information from ...?

Awareness of PSPS support resources among HFRA residents grew significantly for nearly all programs between the 2024 and 2025 pre-seasons. "Address Level Alerts" was the most recognized resource, followed by "PSPS Alert Language Preferences" and the "Critical Care Backup Battery Program".



indicate a significant increase/decrease between Pre and Post at the 95% confidence level. Letters indicate significant difference between Pre waves.

QN1: SCE supports a number of resources that are available to the public during a Public Safety Power Shutoff (PSPS). Before today, which of the following resources have you heard of?

"Address Level Alerts" and PSPS "Alert Language Preferences" remained the resource with the highest level of familiarity among HFRA residents.

PSPS Resource Familiarity
(Very/Somewhat)

Residential			
HIGH FIRE RISK AREA (HFRA)			
2024 PRE (A)	2024 POST	2025 PRE (B)	2025 POST

Q22. Overall, what is your opinion of SCE's Public Safety Power Shutoff program?
Q15. How satisfied are you with SCE's overall wildfire safety and preparedness efforts?

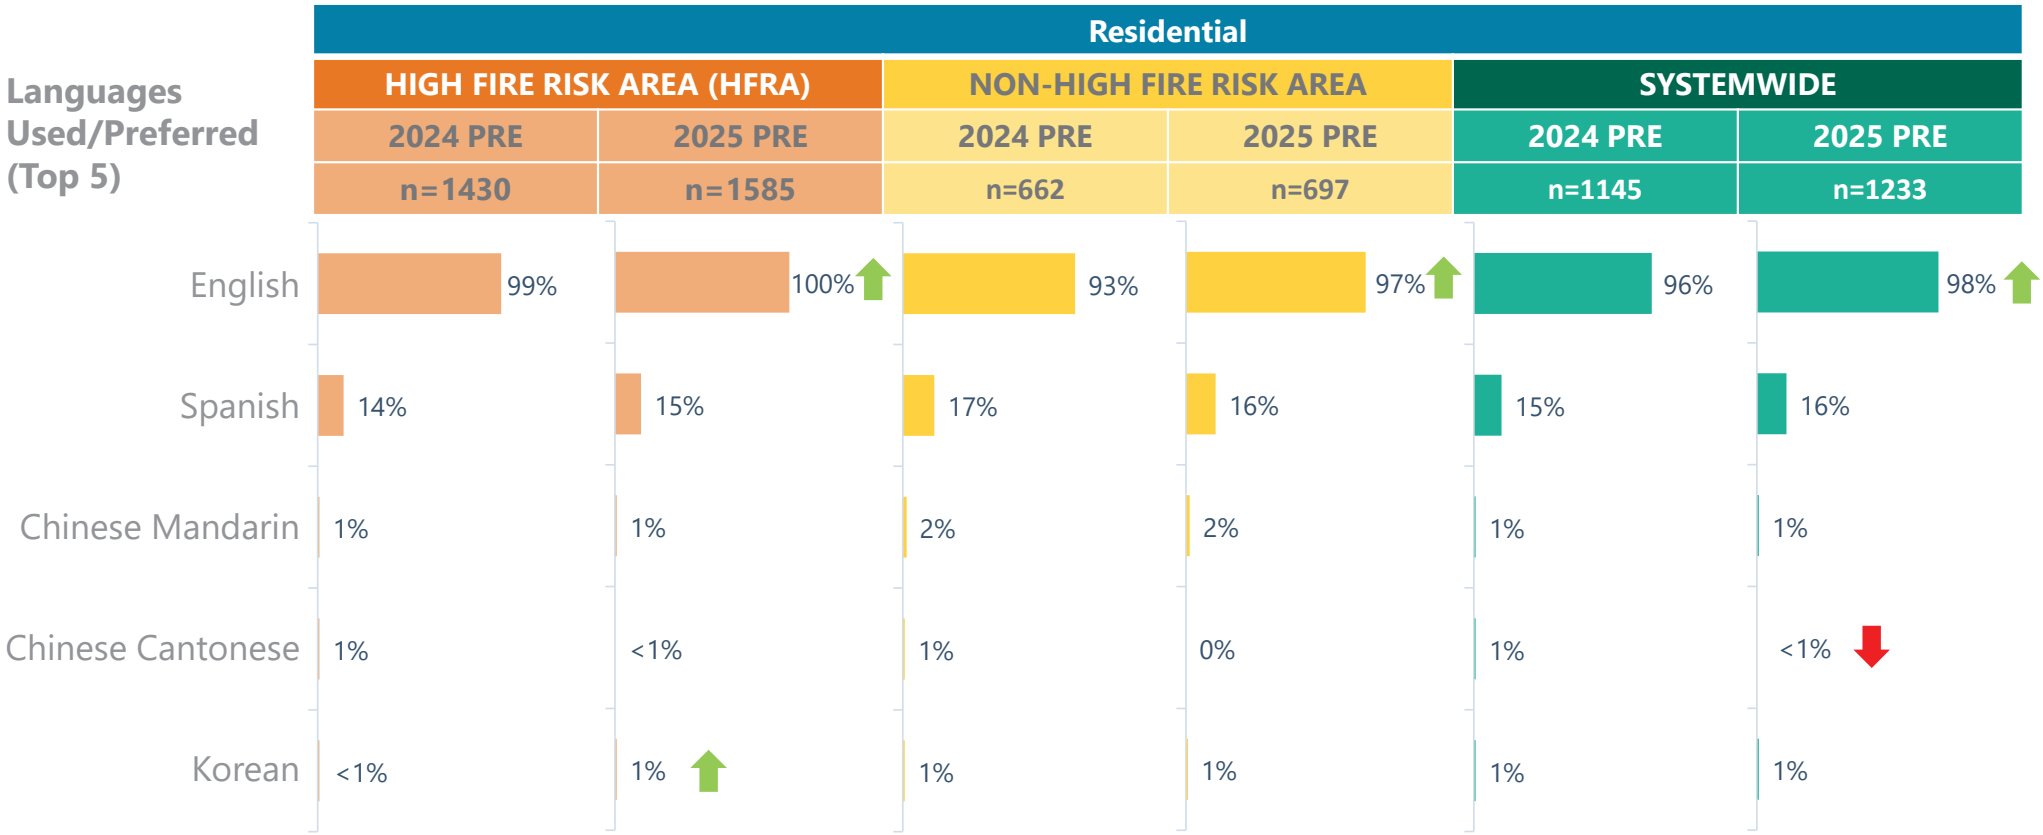
There has been a significant increase in self-reported preparedness for a prolonged power outage among Non-High Fire Risk areas from 2024 to 2025.

	Residential					
	HIGH FIRE RISK AREA (HFRA)		NON-HIGH FIRE RISK AREA		SYSTEMWIDE	
Personal Level of Preparedness:	2024 PRE	2025 PRE	2024 PRE	2025 PRE	2024 PRE	2025 PRE
	n=2534	n=2496	n=1648	n=1537	n=2509	n=2379
Completely / Somewhat Prepared	69%	70%	52%	60% ↑	58%	63% ↑

↑↓ indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q20. A Public Safety Power Shutoff event could last anywhere from 24-48 hours, or longer in some cases. How would you rate your level of preparedness for being without electricity for an extended period?

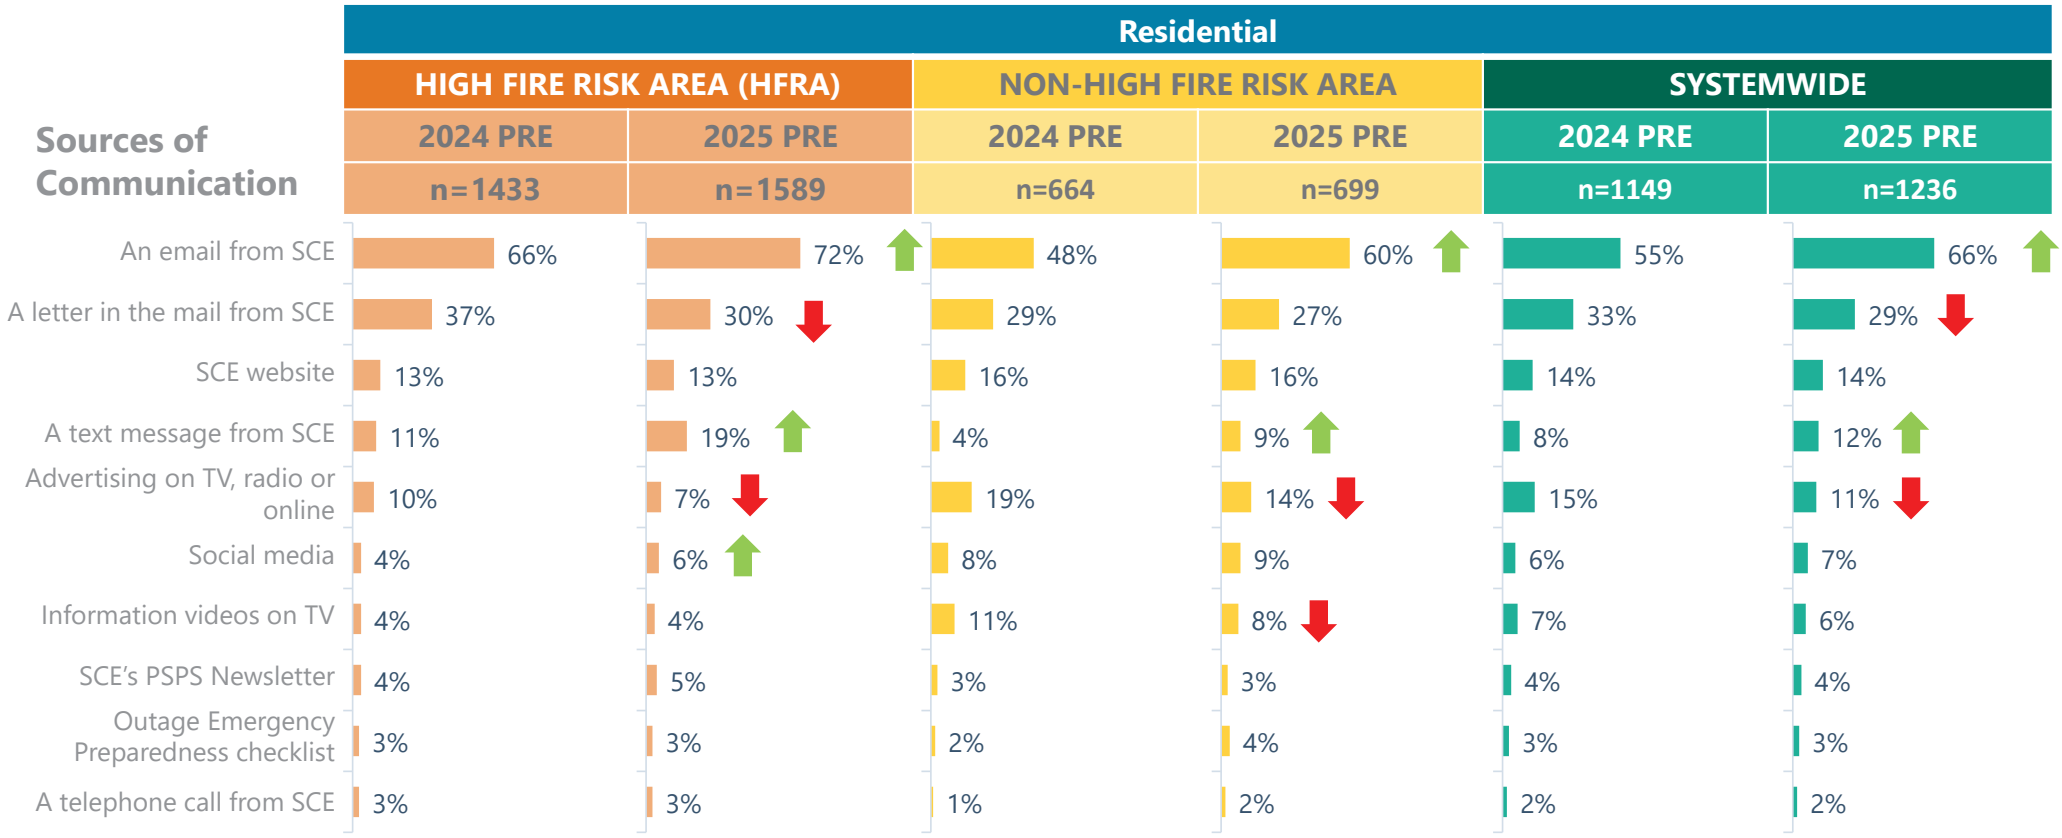
Among residents who recalled SCE communications, nearly all information was seen or heard in English & Spanish.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q5. [RECALL COMMUNICATION] In what language(s) was the wildfire safety and preparedness information that you recall seeing or hearing from SCE?

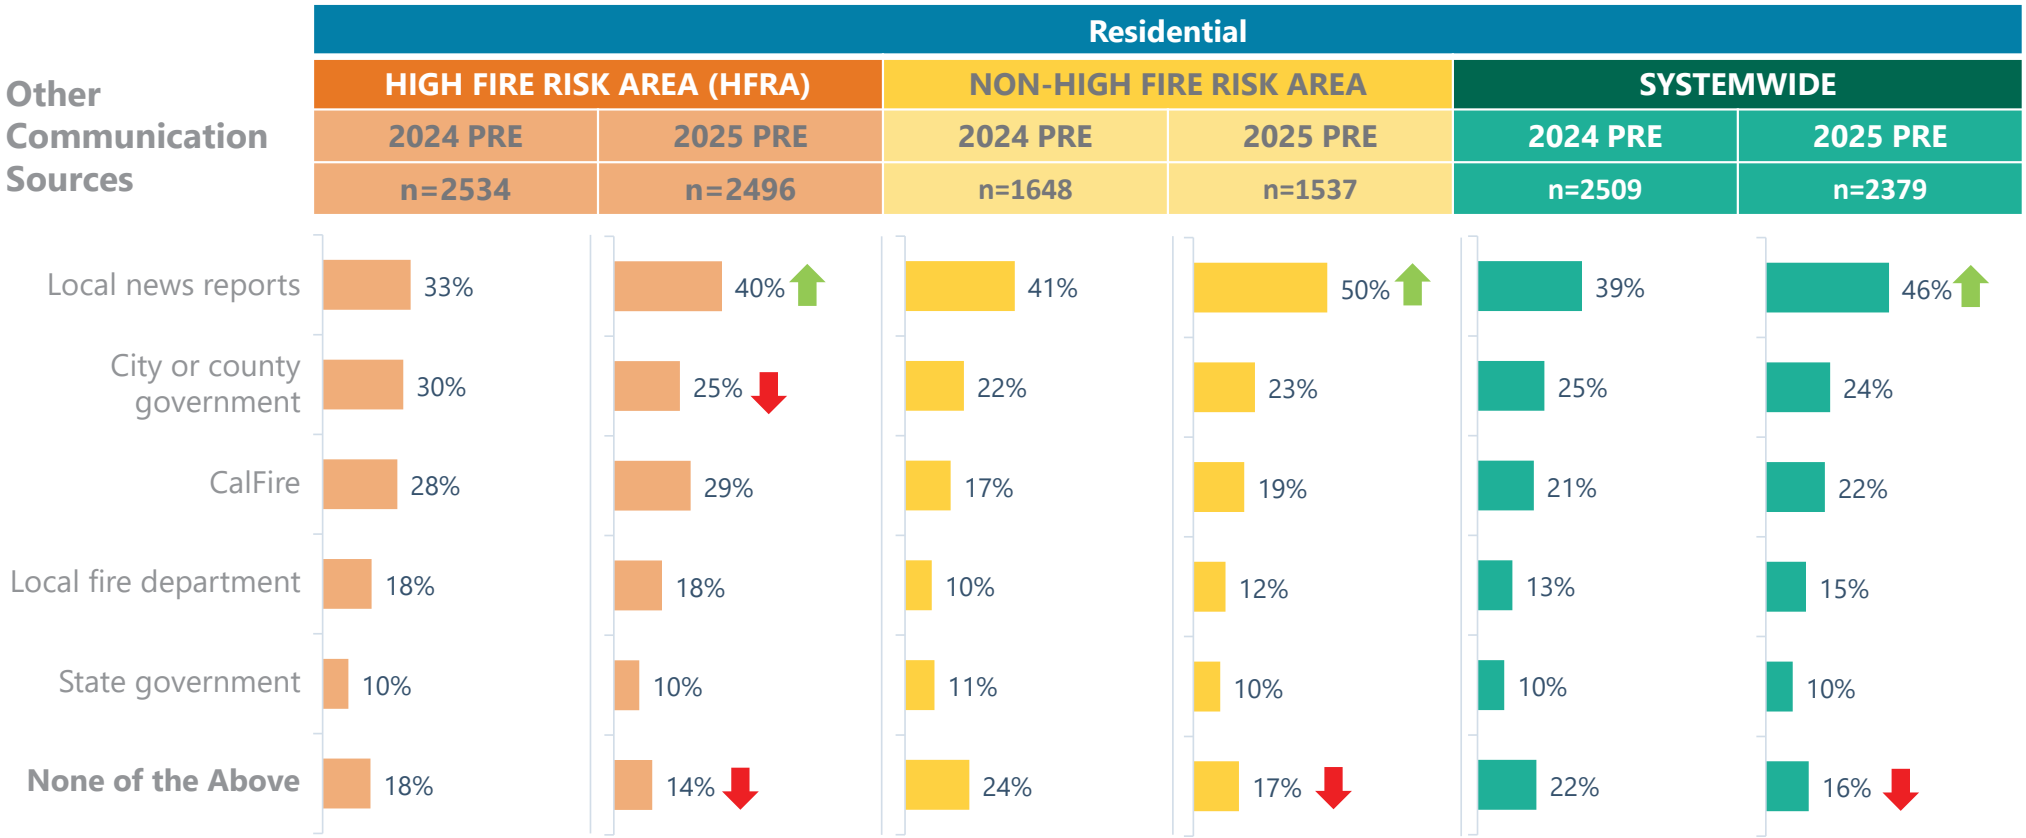
Email and mail from SCE are the most cited sources where customers recall seeing or hearing communications about wildfire preparedness. Email and text messages showed an increase in recall among all residents from 2024 to 2025.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q6. [RECALL COMMUNICATION] Where did you see or hear SCE's communications about wildfire season safety and preparedness?

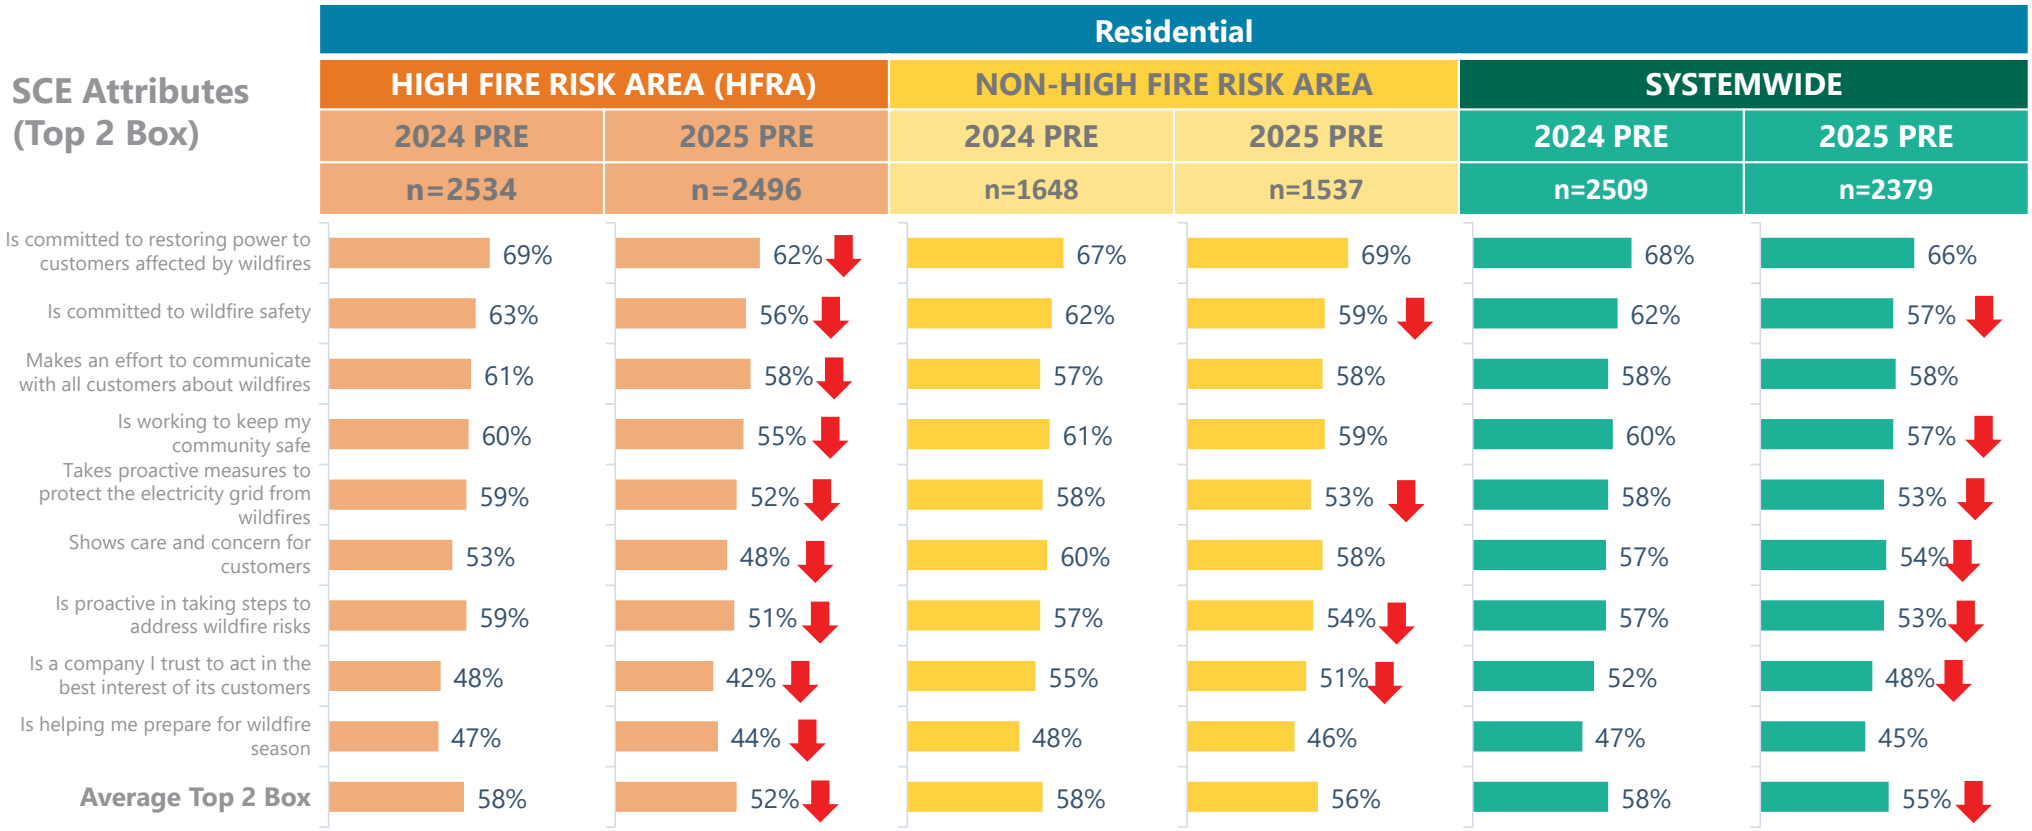
Local news reports are the most common non-SCE source for wildfire information, followed by city or county government and CalFire. The reliance on these external sources has remained relatively stable between 2024 and 2025 across all areas.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q10. Other than SCE's communications, what other sources have you used to obtain information about wildfire safety and preparedness?

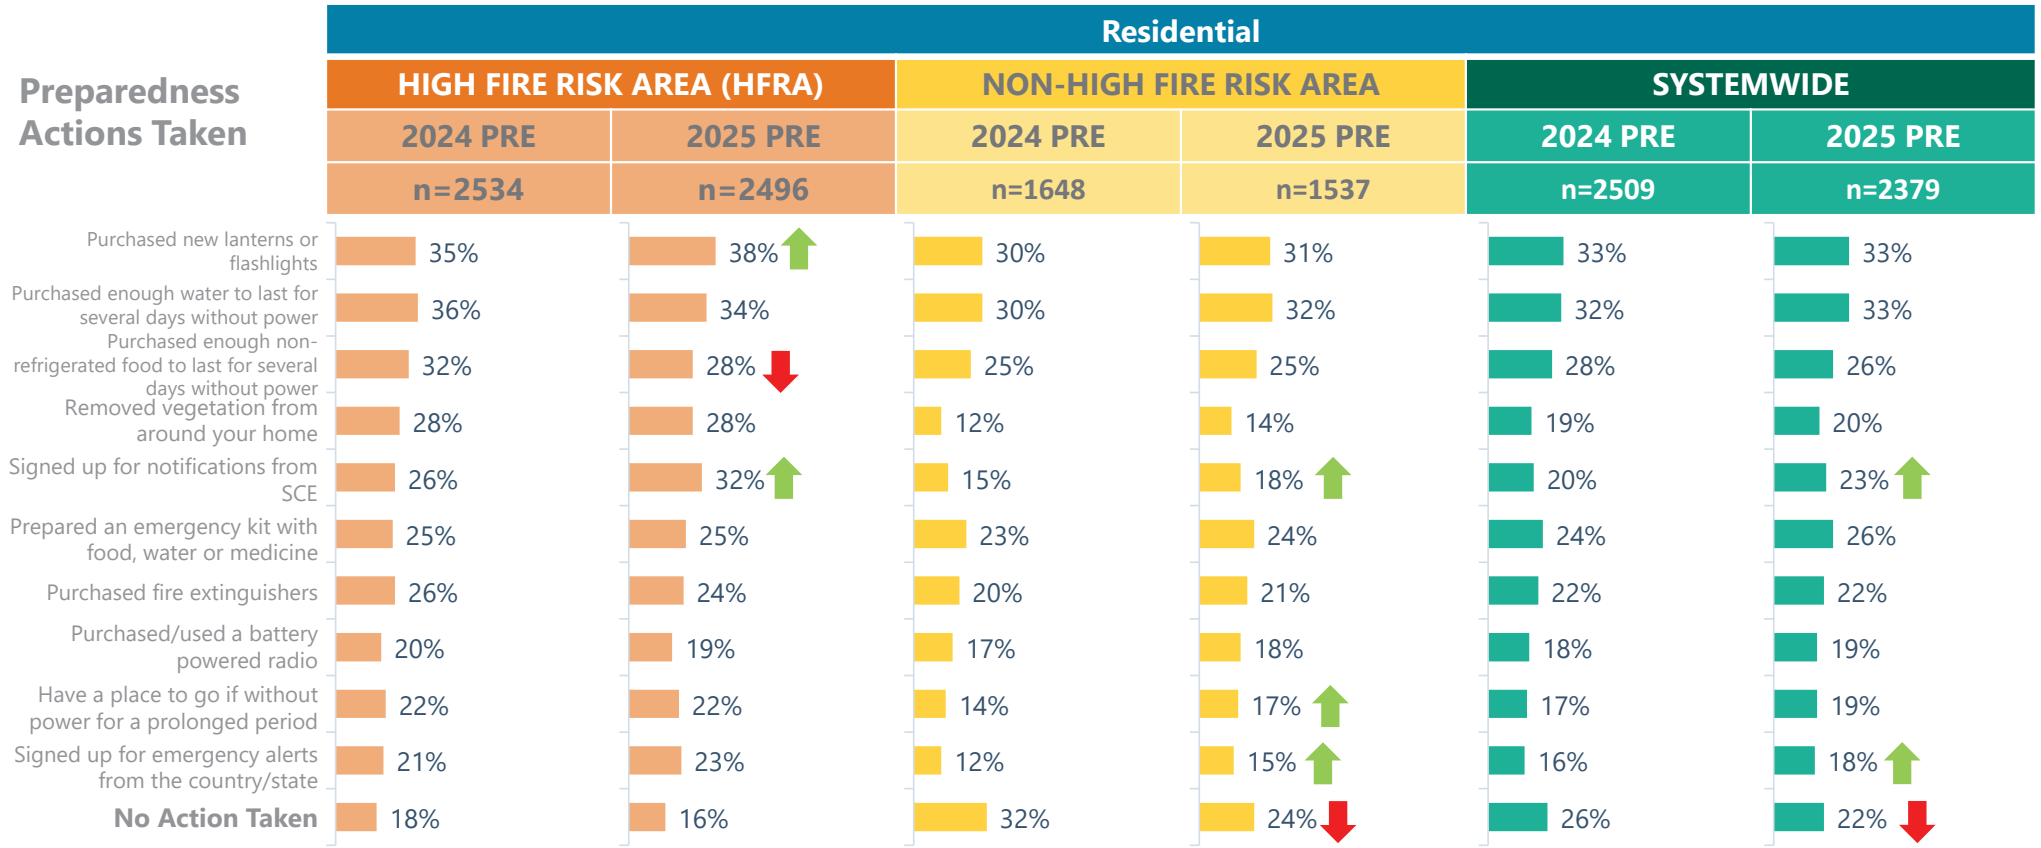
Customer perception of SCE has declined significantly across nearly all attributes Systemwide between 2024 and 2025.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q14. Using a scale where 1 means completely disagree and 5 means completely agree, Please indicate how much you agree or disagree with the following statements about SCE. SCE...

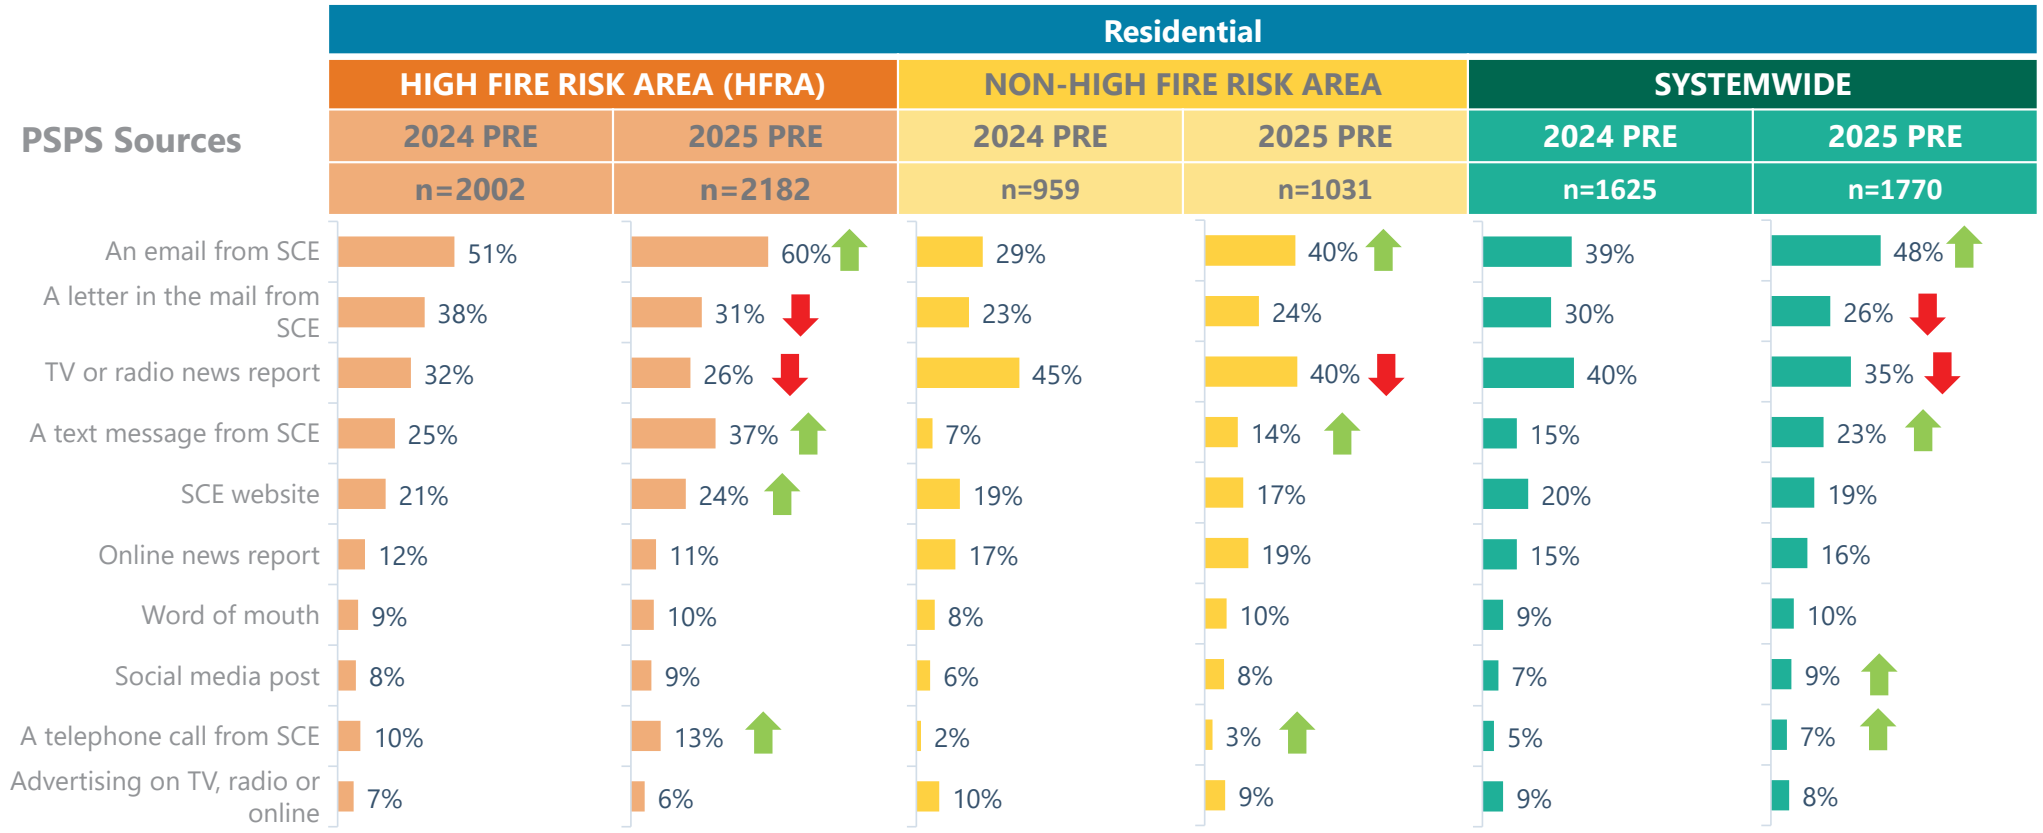
Increasingly more customers have taken action to prepare for power outages in 2025. Purchasing lanterns or flashlights is the most common action taken by residents to prepare for a PSPS event in 2025, followed by stocking up on water and non-perishable food. Signing up for SCE/State alerts saw a significant increase this year.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q21. What, if any, actions have you taken to prepare for a Public Safety Power Shutoff (PSPS) in 2025?

Email from SCE is the primary source through which customers in all areas have heard about Public Safety Power Shutoffs. Email, text messages and social media, saw an increase in recall between 2024 and 2025.

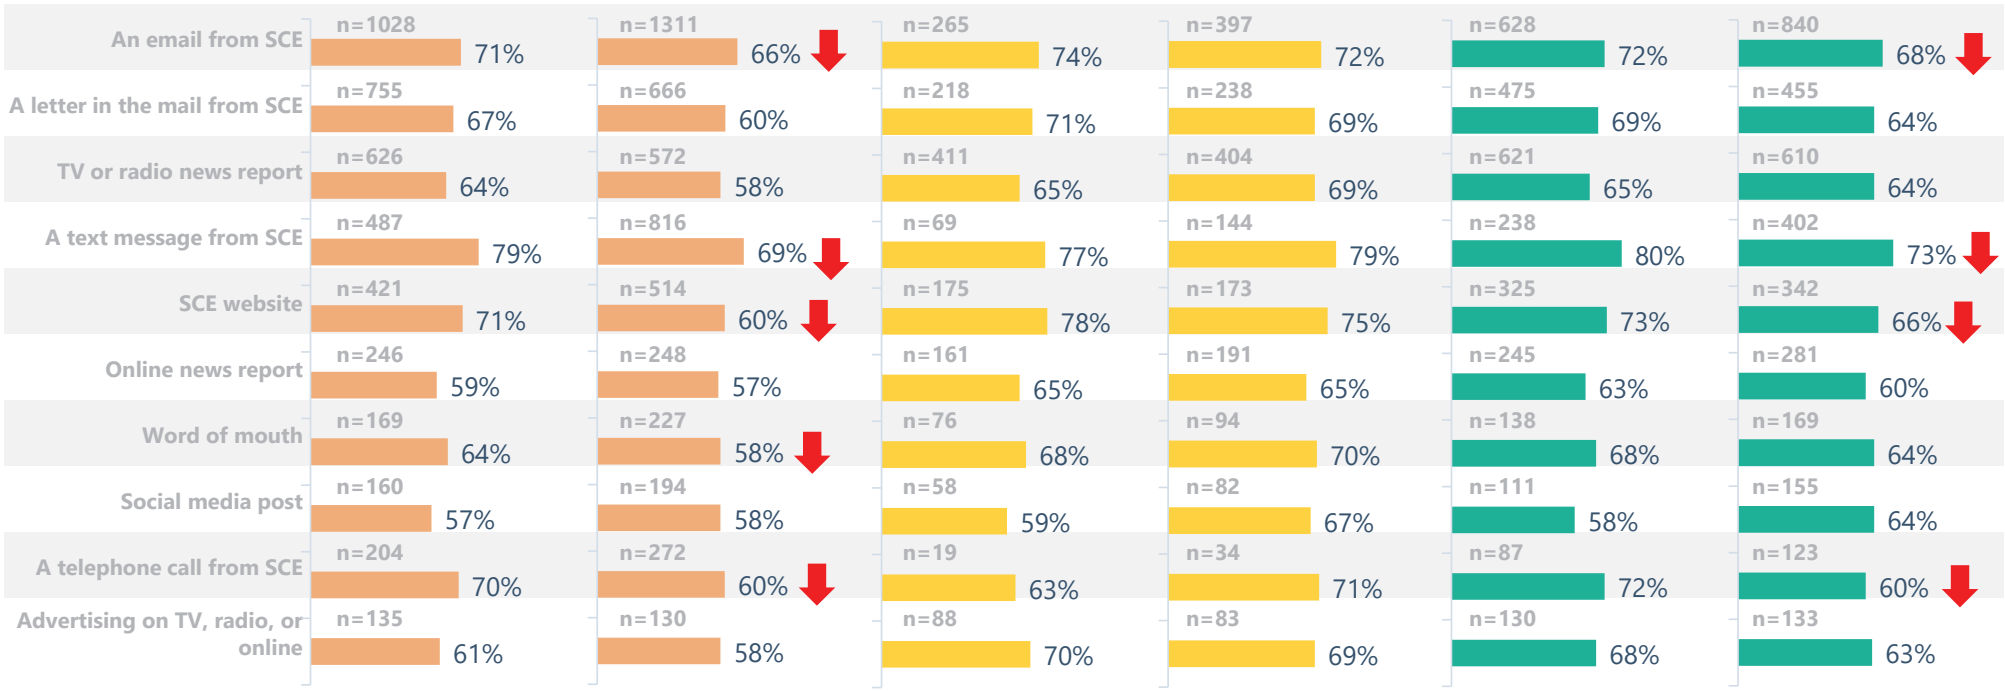


indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q17. [RECALL PSPS] Where have you heard about Public Safety Power Shutoffs?

Residents found PSPS information delivered via text / email from SCE to be the most useful. Usefulness dropped across the board compared to 2024 pre-season.

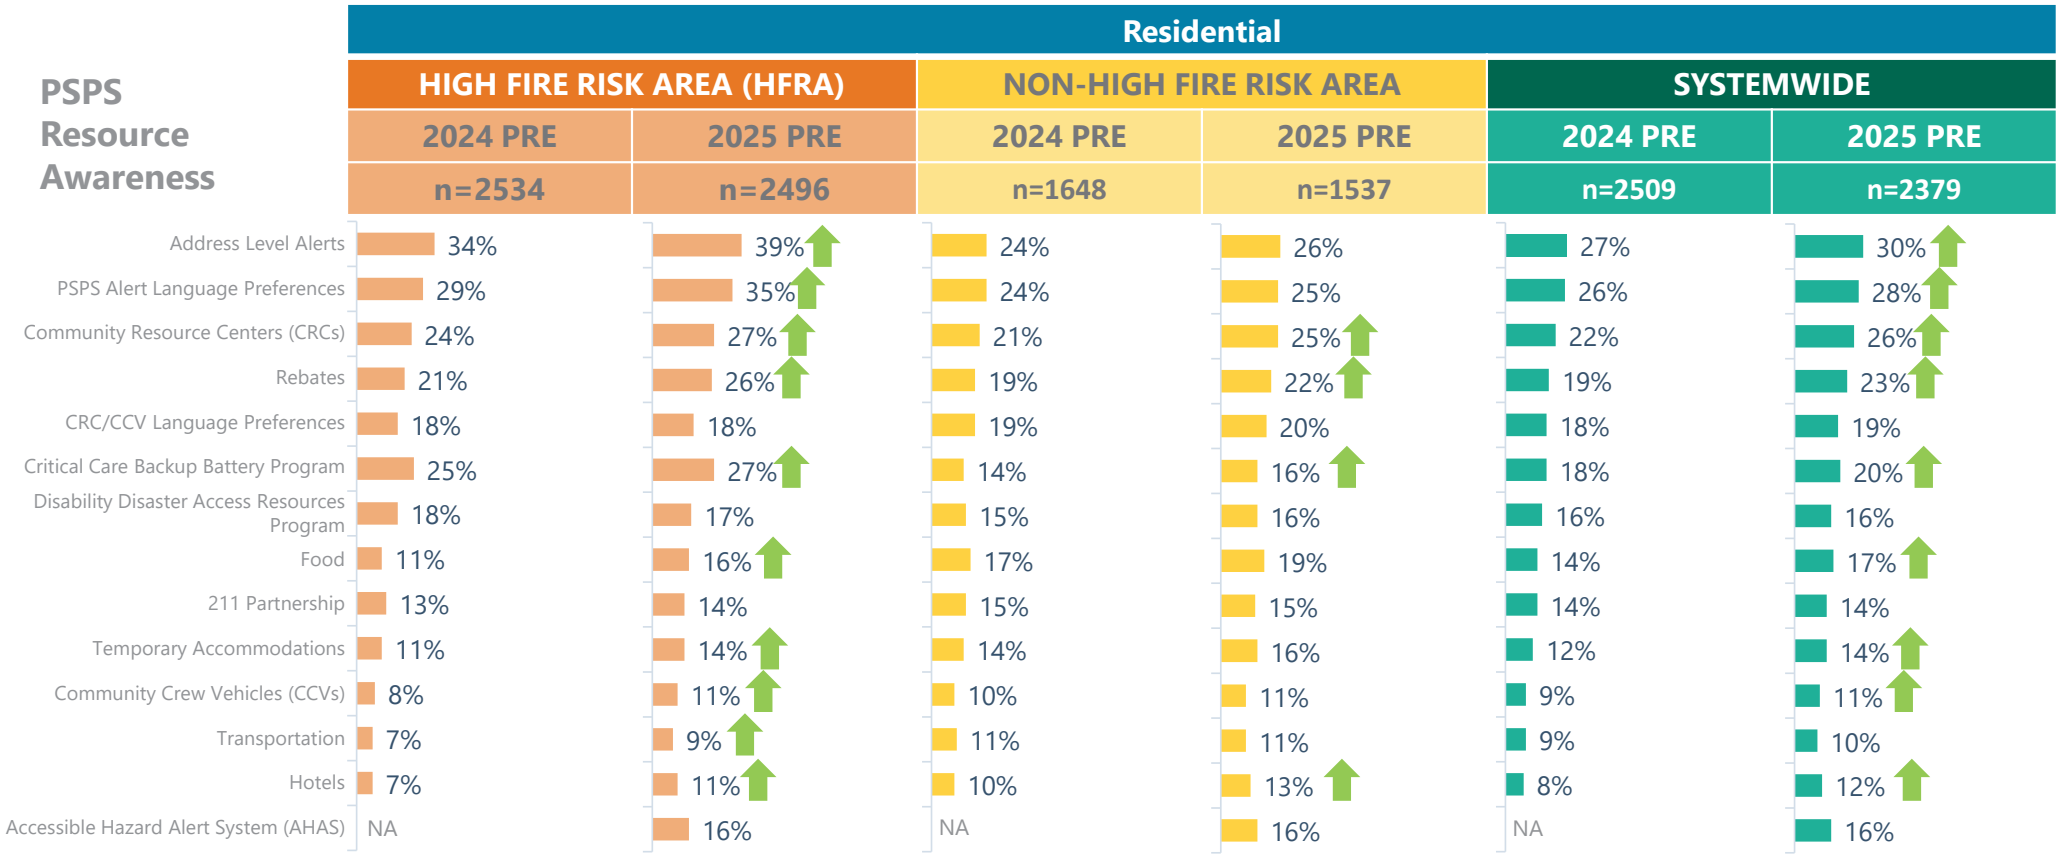
Usefulness of Source - Top 10 (Top 2 Box)



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q19A. [SAW COMMUNICATIONS] On a 1 to 5 scale where 1 is not at all useful and 5 is extremely useful, how useful was the PSPS information from ...?

Awareness of PSPS resources, such as "Address Level Alerts" and "Rebates", has increased significantly systemwide from 2024 to 2025. Among all resources, "Address Level Alerts" have the highest level of awareness across all customers.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

QN1: SCE supports a number of resources that are available to the public during a Public Safety Power Shutoff (PSPS). Before today, which of the following resources have you heard of?

"Address Level Alerts" and PSPS "Alert Language Preferences" remained the resource with the highest level of familiarity among residents systemwide.

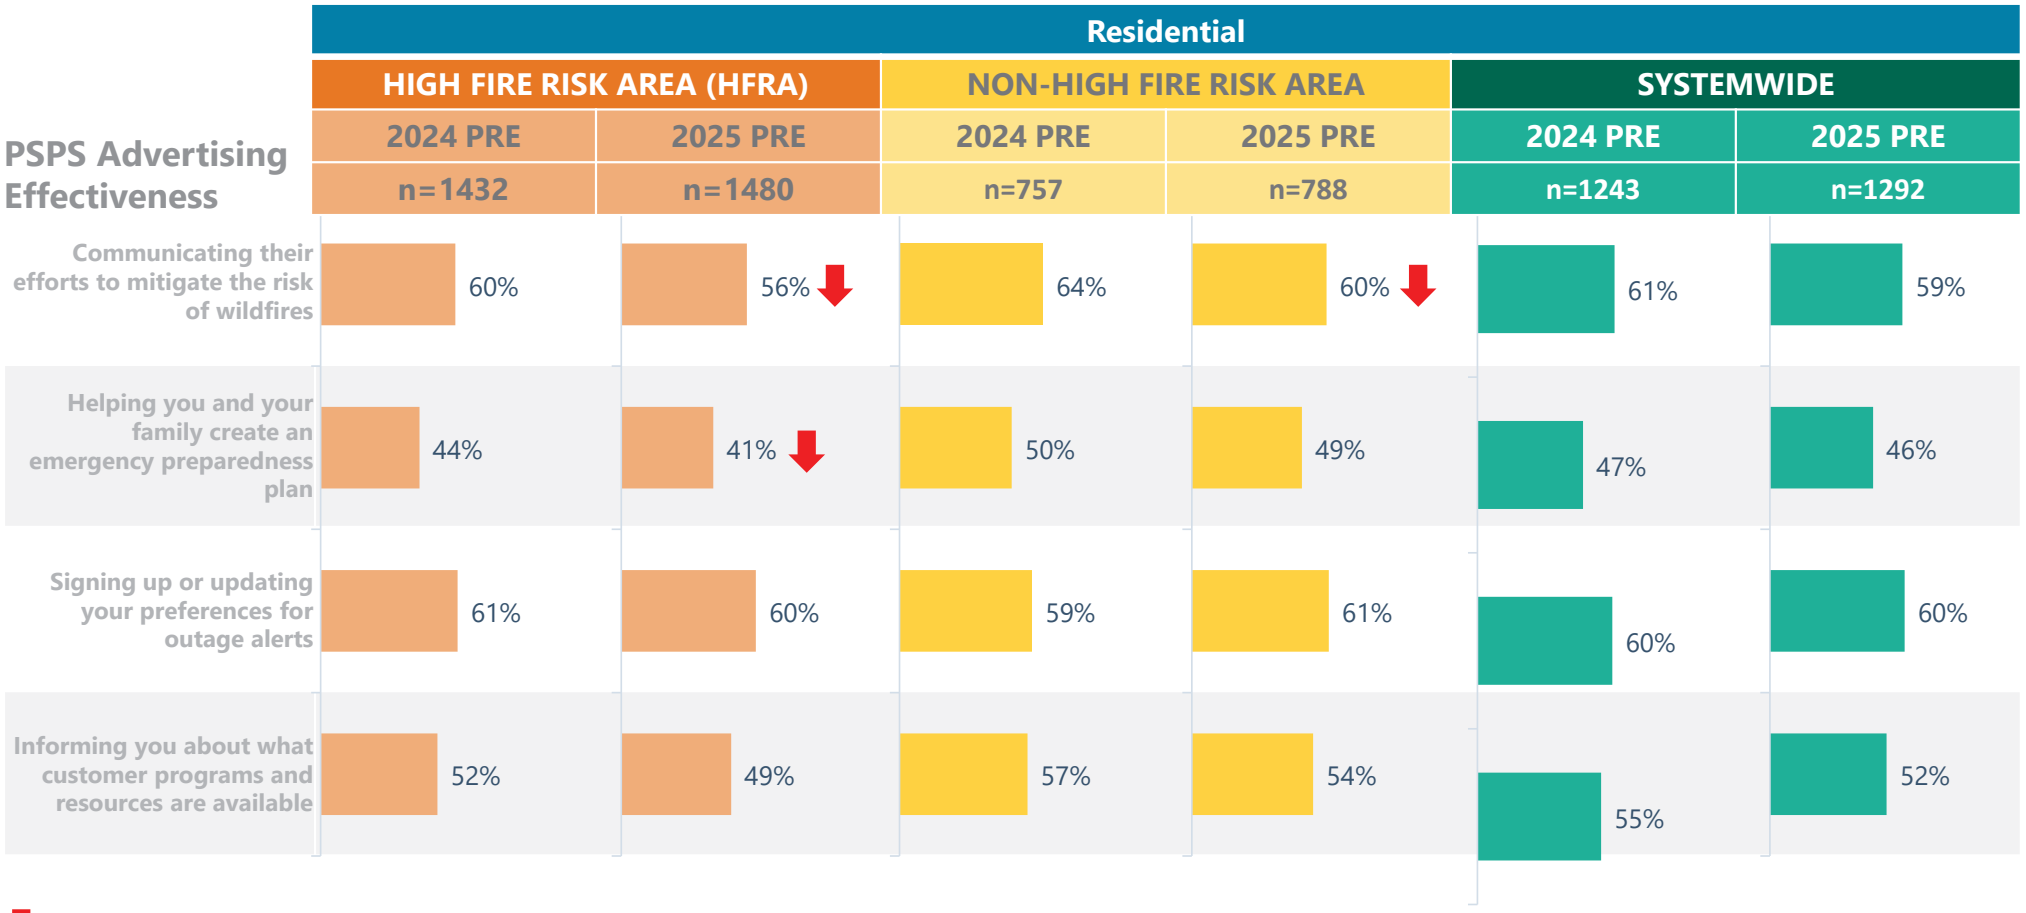
Q24. "Have you ever seen or heard any advertising from Southern California Edison about Public Safety Power Shutoffs and being prepared for emergencies? This could be through television, radio, or on the internet."

While SCE's advertising remained effective across its entire service area, its impact declined among residents in High Fire Risk Areas (HFRA) when it came to communicating wildfire risk mitigation efforts and helping them create emergency preparedness plans.



indicate a significant increase/decrease between Pre waves at the 95% confidence level.

Q25. "[IF YES] How effective has Southern California Edison's advertising been for…"

Appendix

Access and Functional Needs (AFN) Profile

Energy for What's Ahead®

SOUTHERN CALIFORNIA EDISON®

The presence of seniors (age 65 or older) in households within High Fire Risk Areas has seen a significant decrease, dropping from 46% in 2024 to 40% in 2025. While the percentage of households with children under 18 increased.
