(Filed September 26, 2024)

**REPORT OF SOUTHERN CALIFORNIA GAS COMPANY
(U 904 G) ON VIRTUAL SB 1221 INFORMATION SESSION**

Pursuant to Ordering Paragraph (OP) 5 of Decision (D.) 25-12-042, Southern California Gas Company (SoCalGas) hereby submits its report on the virtual Senate Bill (SB) 1221 information session that occurred on March 5, 2026. On December 23, 2025, the California Public Utilities Commission (CPUC or Commission) issued D.25-12-042 designating initial priority neighborhood decarbonization zones pursuant to Public Utilities Code Section 662(a). The Decision directed the gas utilities to host and record one virtual SB 1221 information session to hear comments in support or opposition to the designation of zones and solicit feedback on SB 1221 diversity and equity considerations.¹

Additionally, OP 5 of D.25-12-042 directed gas utilities to file and serve a report by April 1, 2026, with the following reporting requirements:

- (1) which tribal representatives, representatives from Load Serving Entities, and community organizations received the fact sheet;
- (2) an attestation that the fact sheet was provided to a Director of Planning, Community Development, Housing, or similar department in every city and county in their service territory where the Gas Corporation identified a foreseeable pipeline replacement project;

¹ D.25-12-042 at OP 4.

- (3) any and all community organizations and local governments that expressed interest in participating in Senate Bill 1221's decarbonization opportunities;
- (4) any and all feedback the Gas Corporations received regarding Senate Bill 1221's diversity and equity considerations;
- (5) the date, time, and link to a recording of the virtual information session;
- (6) documentation that the information session was properly noticed;
- (7) the Gas Corporation's proposal for continuing community outreach efforts beyond April 1, 2026; and
- (8) the Gas Corporation's recommendation for census tracts to be included in the decarbonization zone update.

Pursuant to these Commission directives, SoCalGas submits its virtual SB 1221 information session report as Attachment A hereto.

Respectfully submitted,

By: Edward L. Hsu
ESWARD L. HSU

Southern California Gas Company's (SoCalGas) Virtual Senate Bill (SB) 1221

Information Session Report

On December 23, 2025, the California Public Utilities Commission (CPUC or Commission) issued D.25-12-042 designating initial priority neighborhood decarbonization zones pursuant to Public Utilities Code Section 662(a). The Decision directed the gas utilities to host and record one virtual SB 1221 information session to hear comments in support or opposition to the designation of zones and solicit feedback on SB 1221 diversity and equity considerations.² Additionally, OP 5 of D.25-12-042 directed gas utilities to file and serve this report by April 1, 2026.

On March 5, 2026, SoCalGas hosted a two-hour virtual Information Session to receive public comments regarding the Priority Neighborhood Decarbonization Zones and the SB1221 Program. During the session, 38 members of the public offered comments. Of the total 38 comments, 29 members of the public opposed the implementation of SB1221 and 4 supported decarbonization zones and pilots. 5 members of the public voiced neutral opinion often citing their overall support of clean energy sources and their benefits, while voicing the importance of understanding the costs to not only implement pilots, but also customer bill impacts. Several neutral commenters highlighted the benefits of retaining diverse energy sources and cautioned that abandoning existing infrastructure would lead to ratepayer cost burdens. Overall, commenters shared the opinion that there is not enough information at this time regarding the benefit both to the public and California's energy infrastructure as a whole to definitively weigh in on the program.

² D.25-12-042 at Ordering Paragraph 4.

Additionally, commenters raised concerns regarding electric grid reliability, system resiliency, and the preservation of customer energy choice, emphasizing that these considerations should remain central to any neighborhood decarbonization pilot implemented pursuant to Senate Bill 1221. Numerous speakers expressed skepticism that the existing electric grid could reliably support the expanded electrical load from neighborhood electrification given recurring experiences with heat related strain, wildfire related Public Safety Power Shutoffs, localized outages, and growing demand from electric vehicles and data centers. Commenters also highlighted the resiliency benefits of the gas system, noting its ability to provide uninterrupted heating, cooking, and hot water during electric outages and extreme weather events. Many cautioned that eliminating gas services could reduce overall energy system resilience, particularly for medically vulnerable customers and communities experiencing frequent outages. Participants further underscored the importance of maintaining customer choice and fuel diversity, arguing that access to both gas and electric service provides an essential hedge against reliability risks, cost volatility, and unforeseen system disruptions. Overall, the public input reflected a strong concern that overreliance on a single energy source could increase exposure to reliability risks and reduce customers' ability to manage energy needs safely, affordably, and resiliently.

Leading up to the Information Session and thereafter, SoCalGas received nearly 130 emails about SB1221 and the priority neighborhood decarbonization zones. Five emails voiced support of SB1221, nearly 60 voiced opposition and 65 individuals were neutral in nature. Many of the neutral emails requested more information about the program, some of which specifically requested logistical support in accessing the SB 1221 maps to determine if they would be impacted.

The remainder of this report addresses each item outlined in OP 5 of D.25-12-042.

1. Which tribal representatives, representatives from Load Serving Entities, and community organizations received the fact sheet;

SoCalGas conducted outreach to tribal communities, Load Serving Entities, and community organizations including distribution of the information sheet and noticing of the virtual information session. A list of those contacted is attached hereto as Attachment 1.

2. An attestation that the fact sheet was provided to a Director of Planning, Community Development, Housing, or similar department in every city and county in their service territory where the Gas Corporation identified a foreseeable pipeline replacement project;

An attestation that the fact sheet was provided as directed is attached hereto as Attachment 2.

3. Any and all community organizations and local governments that expressed interest in participating in Senate Bill 1221's decarbonization opportunities;

As part of its outreach and virtual SB 1221 information session, SoCalGas received responses from community organizations and local governments who expressed interest in participating in SB1221 decarbonization opportunities. The responses are outlined below:

- The Mayor of the City of Monrovia responded to receiving notice of the virtual SB 1221 information session. City representatives expressed strong opposition to the concept and had concerns about whether the City was being considered for the program.
- The Planning Manager with the City of South Pasadena called into the virtual SB 1221 information session and expressed interest in working with the Utility, the need for City and Utility coordination, voiced concerns to ensure equitable access to energy is maintained throughout the implementation of SB 1221 pilots, and seeking clarity on what is required from the City to implement SB 1221. SoCalGas also received this request via email as well.
- A representative of the City of Santa Monica called into the virtual SB 1221 information session and stated the City was “supportive of concept,” and wanted to ensure adequate funding by the CPUC and SoCalGas and sought clarity on the stakeholder engagement process and how consent will be achieved.

- A representative from the Community Action Partnership of Orange County had comments around increased transparency.

SoCalGas received direct requests from the public to have the zones updated to include more neighborhoods. Specifically, SoCalGas received the following during the public comment period of the virtual Information Session:

- A resident from Altadena stated the recent wildfires in the community may present a unique opportunity to enact decarbonization efforts; encouraged the Commission to consider Altadena to become a PNDZ.
- A resident of Santa Barbara, California voiced his support of Santa Barbara being included in the PNDZs; however, expressed the need for the public to understand more about the execution of pilots and their costs.

SoCalGas provides a summary of comments received through the SB1221 Mailbox:

(SB1221Maps@semprautilities.com).

- Residents of Visalia, Santa Barbara, Goleta, Sylmar and Pomona, California, would like their neighborhood to be considered as a PNDZ.

4. Any and all feedback the Gas Corporations received regarding Senate Bill 1221's diversity and equity considerations.

SoCalGas provided a summary of comments received during the Information Session as well as the through the SB1221 Mailbox (SB1221Maps@semprautilities.com) as relating to diversity and equity considerations.

Overarchingly, both orally and via written comments, the public consistently emphasized the central role of affordability considerations in determining the viability and equity of proposed SB 1221 neighborhood decarbonization pilots. Commenters expressed concern that the potential costs associated with electrification— including electrical service upgrades, rewiring of older homes, appliance replacements, solar system modifications, and possible displacement during construction—may impose disproportionate burdens on certain customer segments. Speakers highlighted risks to low and moderate income households, seniors on fixed incomes, renters,

residents with older homes, and individuals with medical or disability related needs, noting that these customers often have limited financial capacity to absorb large upfront expenses or ongoing increases in electric bills. Multiple participants further observed that some affected customers may not qualify for existing assistance programs, raising concerns that decarbonization pilots could unintentionally exacerbate energy affordability challenges or housing instability.

Public comments also raised equity concerns among customers, particularly with respect to geographic targeting and the distribution of costs and benefits. Participants questioned whether it would be equitable for certain neighborhoods—often characterized as renter heavy, working class, or historically underserved—to face higher individual costs or reduced energy choice while broader system benefits may accrue over time to utilities or to customers outside pilot areas. Several commenters emphasized the need for clear cost protections, transparent funding mechanisms, accessible outreach, and explicit safeguards so that disadvantaged populations, customers with limited digital access or language barriers, and those with health-related energy needs are not adversely impacted. Overall, the feedback underscored that affordability, and equity will be paramount considerations in program design and implementation and should be addressed comprehensively to maintain public trust and avoid uneven impacts across customer groups.

Two emails were received in SoCalGas’s SB1221 mailbox prior to the session, specifically mentioning diversity and equity. The first email questioned what was being sought under the term “diversity and equity considerations.” The second email questioned the appropriateness of considering diversity, equity and inclusion (DEI) and strongly opposed SB 1221.

In addition, SoCalGas is also providing the written feedback received online during the virtual SB 1221 information session attached hereto as Attachment 3.

5. Date, time, and link to a recording of the virtual information session

SoCalGas's virtual information session was held on Thursday, March 5, 2026, from 1:00 p.m. to 3:20 p.m. (PST). The recording of the virtual information session is here:

<https://youtu.be/nTkFe2TKHK4>.

6. Documentation that the information session was properly noticed

The Commission's Public Advocates Office's (PAO) approval of the SoCalGas prepared notice occurred on February 9, 2026. Email and social media notices were sent on February 12, 2026, along with the SoCalGas webpage at www.socalgas.com being updated on this date as well. On February 24, 2026, the virtual SB 1221 information session information was posted to the SoCalGas webpage. Documentation of the following notices, such as proofs, are attached in Attachment 4.

- Notice in English, Spanish, Chinese, and Tagalog.
- Notice in emails to customers with email addresses available.
- Notice on social media platforms used by SoCalGas.
- Notice on website in prominent locations.
- Notice in all offices located in California where customers come into contact with a company customer service representative.
- Notice at all branch offices.
- Notice in applicable newspapers. PAO reviewed the list of newspaper publications in which the approved notice would be circulated on February 13, 2026.

Table 1: List of Newspaper Publications for Notice

Hanford Sentinel	Imperial Valley Press	L.A. Times
Orange County Register	Press Enterprise	San Bernardino County Sun
Santa Barbara Independent	The Fresno Bee	The Bakersfield Californian

7. Gas Corporation’s proposal for continuing community outreach efforts beyond April 1, 2026

SoCalGas plans to maintain the SB1221 mailbox for inquiries regarding implementation of pilot projects. Additionally, once information is available from the Commission regarding program design and development, pertinent information for the public can be posted to the SB1221 webpages as necessary and appropriate. A primary theme heard from the public and representatives from the virtual SB 1221 information session is that there is not enough public information about implementation available. As such, SoCalGas & SDG&E are open to outreach or information postings that will help the public, and especially potentially impacted communities, better understand the pilot program once details are available. The outreach approach should be measured, targeted, and efficient, and a proper funding recovery mechanism must be established to continue and expand these outreach activities. SoCalGas reiterates its recommendation that additional outreach before sufficient program design details are available is premature and may risk further frustration and/or confusion for customers and other stakeholders.

8. Gas Corporation’s recommendation for census tracts to be included in the decarbonization zone update.

SoCalGas suggests that future modifications to PNDZs will be more informed, both from a community input and project viability perspective, once the SB 1221 program design details

are established and understood; SoCalGas reserves the right to provide input on new zone recommendations at such time. Given that, SoCalGas has informed the Commission via this report the following PNDZ designation requests shared during the public comments section of our March 2026 Information Session.

**BEFORE THE PUBLIC UTILITIES
COMMISSION OF THE STATE OF CALIFORNIA**

DECLARATION OF GEOFFREY C. DANKER

I, Geoffrey C. Danker, declare as follows:

1. I am the Franchise, Fees and Policy Manager for Southern California Gas Company (SoCalGas). I am personally familiar with the facts and representations in this Declaration and, if called upon to testify, I could and would testify to the following based upon my personal knowledge and/or belief.

2. I hereby provide this Declaration pursuant to Ordering Paragraph 5 of Decision (D.) Decision 25-12-042, which directs SoCalGas to provide “an attestation that the fact sheet was provided to a Director of Planning, Community Development, Housing, or similar department in every city and county in their service territory where the Gas Corporation identified a foreseeable pipeline replacement project.”

3. I hereby attest that I provided the pertinent Senate Bill (SB) 1221 Information Sheet (attached hereto as Attachment A) to a Director of Planning, Community Development, Housing, or similar department, in every city and county in the service territory where SoCalGas identified a foreseeable pipeline replacement project based on the definition determined in the *Assigned Commissioner’s Ruling Issuing Senate Bill 1221 Mapping Directions to Utilities* dated April 4, 2025.

4. A list of the cities and counties to which SoCalGas provided the Information Sheet is attached hereto as Attachment B.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct to the best of my knowledge.

Executed this 27th day of March, 2026 at Los Angeles, California.

A handwritten signature in black ink, appearing to be 'G. Danker', with a long horizontal flourish extending to the right.

Geoffrey C. Danker

Franchise, Fees & Policy Manager

DECLARATION - ATTACHMENT A

SB 1221 Neighborhood Decarbonization Program Design

Upcoming Information Sessions and Program

The California Public Utilities Commission (CPUC) is seeking public input on what neighborhoods to define as “priority neighborhood decarbonization zones” (decarbonization zones), with a particular focus on equity. Decarbonization zones are geographic areas in which the CPUC may focus cost-effective building decarbonization programs. Gas utilities will host information sessions this spring, and public input from those sessions will inform the CPUC as it updates the zones later this year. The upcoming neighborhood decarbonization pilot program is likely to focus on cost-effective home electrification for selected neighborhoods located within these zones.

Background: Neighborhood Decarbonization Pilot Projects Directed by SB 1221

In Senate Bill (SB) 1221, adopted in 2024, the California Legislature recognized that natural gas use in residential buildings contributes to California’s greenhouse gas emissions. The Legislature also noted that cost-effective, zero-emission alternatives to pipeline replacement projects can reduce gas system costs, which are paid by gas customers. As such, SB 1221 authorizes the CPUC to approve up to 30 pilot projects that facilitate cost-effective decarbonization in priority neighborhood decarbonization zones, constituting up to 1 percent of each utility’s customers. The CPUC may only approve locations that receive consent from at least 67 percent of property owners with natural gas service in the project boundary area. Projects where all customers consent do not count towards the 30-project limit. If a project is successfully implemented, SB 1221 gives the CPUC authority to relieve the gas utility of its obligation to provide natural gas service to the project area.

Networked geothermal piping at Santa Rosa Junior College, an example technology that could be used for neighborhood decarbonization

Background: Priority Neighborhood Decarbonization Zones

Priority neighborhood decarbonization zones are geographic areas defined by the CPUC to target neighborhood decarbonization pilot projects in places where they will be most beneficial and cost-effective. Not all zones will receive decarbonization pilot projects, and decarbonization locations are expected to be much smaller than zones. Being in a zone can mean being prioritized for cost-effective projects to replace gas appliances.

To request a zone in your area, file a comment at <https://apps.cpuc.ca.gov/c/R2409012> that includes the 11-digit census tract numbers requested and the organization making the request. For more detailed directions, see <https://www.cpuc.ca.gov/industries-and-topics/natural-gas/sb-1221-implementation/consideration-for-a-neighborhood-decarbonization-zone>. The CPUC will take these requests into consideration when updating zones.

Zone Designation to Date and Requesting Zones

In December 2025, the CPUC designated initial zones by 2020 census tract using the following criteria:

- a local government or organization requested to participate, and also
- 10 percent or more of the gas distribution main pipelines in the area are expected to be replaced by the gas utility in the coming decade, reflecting the potential opportunity for cost savings.

Initial zones were also capped at 25 tracts per county, except that census tracts with high CalEnviroScreen scores (reflecting disadvantaged communities)¹ were not subjected to the cap. This process resulted in 151 census tracts designated as initial zones statewide. The CPUC anticipates adding to or revising these zone designations by December 31, 2026, and may do so earlier.

Where to Find Maps and Related Information

Information related to the priority neighborhood decarbonization zones can be found at <https://www.cpuc.ca.gov/industries-and-topics/natural-gas/sb-1221-implementation> and includes: links to information sessions; guidance on how to request to be considered for a neighborhood decarbonization zone; links to each gas utility's map of its distribution system, including the initial zones; gas distribution replacement cost data, which may represent potential cost savings; and additional program updates from the CPUC.

Additional information related to the CPUC's Long-Term Gas Planning Rulemaking, which includes SB 1221 implementation, is posted at <https://www.cpuc.ca.gov/industries-and-topics/natural-gas/long-term-gas-planning-rulemaking>. This page includes proceeding documents from December 18 showing a list of the preliminary zones, a static statewide map, and the decision adopting the preliminary zones.

Spring 2026 Utility-Hosted Information Sessions

The CPUC has directed PG&E, SoCalGas, SDG&E, and Southwest Gas to each host and record one virtual SB 1221 information session for government representatives, community organizations, and members of the public in their service territory between January 15 and March 15, 2026. The purpose of these sessions is to hear comments related to the designation of decarbonization zones in specific areas and to solicit feedback on SB 1221's equity considerations. These considerations include the ability of homes and small businesses in the community to access heating and/or cooling, local environmental hazards, health considerations, and community barriers to decarbonization. Gas utilities will provide links to these sessions on their SB 1221 webpages and will record them and post the recordings to their webpages. Translation services will be provided as needed. Gas utilities will summarize the information sessions in a report due to the CPUC by April 1, 2026.

After These Information Sessions, What Happens Next?

The intent of the information sessions report is to inform revisions to the decarbonization zones. The CPUC will update the zones by December 31, 2026, and may do so earlier. By July 1, 2026, the CPUC will adopt the SB 1221 neighborhood decarbonization pilot program requirements, including a process for gas corporations to determine and submit pilot projects for approval. After the CPUC establishes the program requirements, gas utilities may propose potential pilot projects for approval.

For more information, contact gaspolicy@cpuc.ca.gov.

¹ CalEnviroScreen scores combine pollution and population data to show cumulative environmental pollution impacts by census tract. Data and maps are at California OEHHA, "Cal Enviro Screen 4.0," <https://oehha.ca.gov/calenviroscreen/report/calenviroscreen-40>.

SoCalGas SB1221 Priority Neighborhood Decarbonization Zone Information Session Q&A

Anonymous User (Guest)

I asked earlier what when is the comment period over?

I strongly advise everyone to contact there senator . I have been through 2 fires there is no way to communicate with first responders why can we put a man on the moon but not keep our lights on?

Organizer

You may also provide public comments directly to the CPUC regarding Neighborhood Decarbonization Pilot Program implementation under the “Public Comments” tab using the following link: [Public Comments - SB1221_PNDZ](#).

see less

M.L.

Have you ever cooked a tortilla on an electric stove top? Its terrible. No to electric.

👍 1

Anonymous User (Guest)

You never called on my raised hand, but skipped over me. Here are my comments:

1-If this pilot is mandated then select the new home developments. There are plenty.

2-Can we chose the replacement for gas, for example propane?

3- The reasoning is flawed. CR&R has renewable gas garbage trucks from their own renewable gas energy plant, but I have been charged \$25 per month for over 3 years form them to convert to electric truck, why????

4-when the I5 was widened a sound wall was not installed because they did not have 100% approval from the homeowners. How can you do this with only 67% approval?

Anonymous User (Guest)

I am opposed to this decarbonization plan and I am opposed to SB 1221. I do not want to convert my appliances to electric. The additional cost and burden will create an undue additional cost for me.

L.B.

Even with solar, I have a \$1000 settle up bill at the end of the year. That is after paying \$150 a month throughout the year.

L. in Lancaster

Anonymous User (Guest)

A. is 100% correct...

Anonymous User (Guest)

T.W. from Lake Forest, Orange Country. I strongly oppose this that we are going away from using Gas

R.D.

I am R.D. I voiced my comment. I live in Huntington Beach, Orange County.

L.B.

How will you be determining the 67%. Will it be a survey sent to homeowners, a phone call, etc.

Anonymous User (Guest)

More of a comment than a question. I am in Valley Village (Los Angeles SFV). I oppose SB 1221, for all of the opposition already vocalized. However, I would add that our electric bills are already rising because of the data centers taking up an ever-increasing amount of electricity, what we as residents are being forced to pay for with our constantly rising rates.

L.C.A.

My name is L.A.

I am a homeowner in Costa Mesa in Orange County

I fully oppose SB 1221

Natural gas is already low emission; I don't think it is necessary to go to zero decarbonization to have clean air. The electric grid in California is already overburdened, so adding more load to it is just foolishness.

My forced air heating, water heating, clothes dryer, and stove are all natural gas. My home also has only a 100amp electrical panel (like most houses in the neighborhood), which means that I would have to upgrade the panel to handle the new electrical loads if I replaced all of these appliances. My home was built in 1955, so the existing wiring does not meet the requirements of today's building code.

To comply with SB 1221, I would have to upgrade all of my appliances plus the electrical panel. An electrical panel change triggers a building code compliance issue where you are required to update ALL OF THE ELECTRICAL IN THE ENTIRE HOUSE to meet current building code requirements. That means I would have to rewire my entire house. I'll have to bust through every wall to upgrade the wiring to get all of the outlets grounded. The cost of upgrading to electric only is not just the cost of appliances, but also rewiring the entire house.

Total renovations costs would probably be on the order of \$100,000. I'm retired I can't afford those changes on a fixed income. I would have to sell my home, and who would want to buy it if the new buyer knew they were required to do those renovations? You will be driving people out

of California with all of these ridiculous rules. I'm suspicious that this program may be a deliberate land grab for developers to buy up older single family homes for a cheap price so they can profit at building higher density housing.

👍 2

M.J.

Posting this as I see that we are about to close this meeting before I get to speak.

M.J.

I live in Visalia, CA which is in the central SJV.

One of the previous persons asked what was next after the pilot program. Lets all be clear, they are talking about decommissioning natural gas, which means natural gas service will end indefinitely.

I want to voice my strong opposition to decommissioning natural gas. It is the most economical source of energy for a home.

If you consider the increase in EVs in the state and new AI data centers that are being built, both demand massive amounts of energy. Conserve energy signs in the summer.

I also don't believe the power grid can support this project. I live in the central valley where the summers are hot and we use lots of energy for our AC unit. Montly electric bills used to run close to \$1,000 per month.

I purchased a solar system that meets my annual needs. Which would need to be upgraded to meet the higher demand.

2 sources of energy will be import if the powergrid were ever to fail, (consider times of war).

Program shifts the burden to the home owner. IMO it is the utility company's responsibility to replace pipelines to continue services. Surely they can use some of the money they collect from users to replace the older pipelines

Even if the cost of transition were fully covered, I would still be against it, as the cost of electric rate would only go up due to supply and higher demand

This would also devalue my home relative to zones that are not forced to convert.

Propose that the CPUC seek zones that volunteer to do this. Local municipalities can vote to raise the money needed to do the transition.

S.H.

D. is spot on. Diversified energy sources provides energy resilience. Research shows that a diversified energy mix enhances energy security and resilience. Removing natural gas, diesel, and gasoline from California's energy mix and making it completely reliant on electricity will decrease energy resilience.

Anonymous User (Guest)

I am in total agreement with other commentators. This plan is ridiculous. Period. We can't afford it, and it shouldn't be forced upon us. We just had our gas lines replaced in our neighborhood two

summers ago. So while I doubt we are on the map for this, I am asking for those who are, please don't do this. Not a good idea, you will force even more people out of California.

Anonymous User (Guest)

I too echo all the feedback regarding financial burdens, concerns over grid reliability. This program seems to be running parallel to the state's fire hardening program. They need to be integrated. Areas cannot be subject to both programs. The costs for each of these CA initiatives will negatively impact a homeowner. If you require "new" construction or "upon sale" you will impact the real estate sector. If someone lives in these zones, their property becomes less desirability and would reduce a property's value. You are now eliminating a way for disadvantaged communities to financially help their children.

I'd also like to understand how these "listening" sessions are going to be incorporated to the leaders who needs to understand our concerns. I think it is also concerning that the chat feature wasn't available, that the representatives for this session remained "off camera" and doesn't engender transparency.

Finally for the small Mom and Pop landlord in the city of LA, this is crushing and we cannot afford it, not to mention the costly updates to large water heater that supplies the building, overall electrical upgrades to the main panel \$20k+ and sub panels \$5k+ per panel.

Will there be additional "listening" sessions for the public?

Will the recording also show the reactions as each speaker presented? That would be important to convey that this is clearly not welcomed nor wanted.

Anonymous User (Guest)

I own a modest home in West Covina for the past 30 yrs. I have gas appliances and do not want to change that due to cost and utility bills rising. I already made a substantial investment in Solar Panels and still have an electric bill because SCE never stops raising their rates. I have born the costs of replacing my gas pipes and appliances and never qualify for any subsidy, even it was offered! Now I'm retired on a fixed income and will not afford mandatory changes. I try to be conscious of energy uses and conservation. I got rid of grass to save water for this drought state with no state rebates. BUT COME ON!!!! This is unfair and I do not want this change!!!

Anonymous User (Guest)

Hi! I understand that SoCalGas is required by the state to host this meeting, and I appreciate the opportunity to comment. However, as a resident of the Fairfax-Melrose historical district, I strongly oppose the SB 1221 neighborhood decarbonization pilot programs.

My household relies on natural gas for cooking and heating because it is affordable, reliable, and works well for our daily needs. Being pushed toward an all-electric system would significantly

increase our costs and reduce our energy choices. Residents should not be forced to switch to more expensive energy options through pilot programs like this. I oppose this pilot program!

👍 1

L.B.

What happens if this is forced upon my neighborhood and I cannot afford the appliances and conversions. I would not qualify for a loan. I also would not be able to afford my electric bill.

Anonymous User (Guest)

Can you clarify if this pilot program is mandated by the CPUC?

👍 1 🙄 1

Organizer

SB1221 is a California Law that sets to establish a voluntary, pilot program. Throughout and upon completion of the pilot program (2030) the Commission will inform the Legislature about next steps.

🎉 1

Anonymous User (Guest)

Name: E,C,

Neighborhood City: Fairfax-Melrose Historical District, Los Angeles

I strongly oppose the SB 1221 neighborhood decarbonization pilot programs. Programs that allow utilities to eliminate natural gas service in entire neighborhoods threaten energy choice, reliability, and affordability for residents. Many families rely on natural gas for cooking, heating, and daily life, and forcing communities into electric-only systems could significantly increase household costs while placing additional strain on the electric grid.

California residents should not be used as test cases for policies that may remove access to dependable energy infrastructure. Any transition of this magnitude must be voluntary, transparent, and protect consumers from higher costs and reduced energy reliability.

I urge the Commission to reject or significantly reconsider these pilot programs and prioritize policies that protect affordability, reliability, and consumer choice for all Californians.

👍 1

Anonymous User (Guest)

I echo all the feedback regarding financial burdens, concerns over grid reliability. This program seems to be running parallel to the state's fire hardening program. They need to be integrated.

Areas cannot be subject to both programs. The costs for each of these CA initiatives will negatively impact a homeowner. If you require "new" construction or "upon sale" you will impact the real estate sector. If someone lives in these zones, their property becomes less desirability and would reduce a property's value. You are now eliminating a way for disadvantaged communities to financially help their children. Plus, seniors who rely upon Reverse Mortgages to fund their remaining years, would have the value of their home and thus that income stream reduced.

👍 1

L.B.

My entire family will not be opting in for this program. We do not support this program. It will be too costly to homeowners. Also, the electrical grid in California cannot handle the demand currently. This would devastate our bills and the availability of electricity. We are all disabled and retired.

see less

Where is the link to oppose this publicly

Organizer

You may also provide public comments directly to the CPUC regarding Neighborhood Decarbonization Pilot Program implementation under the "Public Comments" tab using the following link: [Public Comments - SB1221_PNDZ](#).

🙄 1

Anonymous User (Guest)

I think the reason the folks are having trouble unmuting is because they are trying to do this near their name window, like zoom does. Please let them know in teams it is in a banner at the top.

C.S.

Forcing conversion at time of sale of the property will make it so that the property cannot be sold.

Anonymous User (Guest)

if the goal is for us to go electric, the state should be offering much stronger incentives for homeowners to install solar. When we have the power to generate our own clean energy, we'll be far more willing and excited to make the switch. How can we make that happen?

👍 2

Anonymous User (Guest)

I oppose to decarbonization in the city of South Gate. I own a triplex that was built in 1950. The existing electrical wiring and electrical box will absolutely not support changing all appliances to electric. My tenants are low income and will definitely not be able to afford their high electric bills.

Anonymous User (Guest)

I want to go on the record that I do NOT support the electrification program nor do I want this forces upon me.

👍 3

G.W.

Good comments from the gentleman concerned with reliance on a single source of energy. One point of clarification: While it is true that electric appliances are sometimes more efficient from the point of use, this does not consider the efficiency cost at the point of electricity generation, which is often from combustion of natural gas!

see less

👍 3

Anonymous User (Guest)

Natural gas = methane 80X more powerful a greenhouse gas than CO2 Explain how SoCalGas has a long term plan to decarbonize by 2045. Talk about induction stoves and heat pumps and how they are efficient. More consumer education! Communicate this plan in a way that is understandable by the average consumer.

👍 3 👍 1

G.W.

Electrification is not going to bring electricity rates down. It will double or triple them again just like wind and solar did.

👍 3 🗨️ 1

K.R.

Has So Cal Gas educated the legislature that gas is cleaner than electricity?

Anonymous User (Guest)

I'm a resident of Jefferson Park in Los Angeles, and while I agree that moving away from fossil fuels is necessary for our climate, forcing people to change isn't the right approach. If we want real community buy-in, the utility companies need to lead by example first.

Right now, we have utility yards in our neighborhood—like the massive one near the Crenshaw Metro stop—that are just industrial eyesores. They contribute to the heat island effect and look like relics of the past. Before asking us to change our homes, the utilities should modernize and 'green up' their own facilities. I want to see those asphalt lots turned into neighborhood-friendly hubs with actual greenery and trees to help capture carbon. Since these sites sit right next to our Metro lines, the utilities should be incentivizing their own employees to take transit with free passes rather than just taking up space with more parking.

Finally, if the goal is for us to go electric, the state should be offering much stronger incentives for homeowners to install solar. When we have the power to generate our own clean energy, we'll be far more willing and excited to make the switch. Let's focus on partnership and modernization, not just mandates.

C.S.

An estimate of \$30K to \$50K just to update the electrical wiring, not counting the cost of the equipment.

K.R.

Did the state or So Cal Gas consider that even if someone bought a home decades ago that is now considered a more affluent area, it doesn't mean they have the money today for increased and unnecessary expenditures? The state has no right to determine how we spend our money. So Cal Gas should tell the state your customers do not welcome this, and have no desire to be more dependent upon electricity.

Anonymous User (Guest)

Please do not force me to change from natural gas to electric. It s too expensive and subpar. We are in the Fairfax area of Los Angeles and do not want to be forced to change to electric. Also I want the state to respect my preferences to choose gas over electric for cooking and heating.
see less

👍 1

Anonymous User (Guest)

I have a rental triplex in South Gate. Extremely concerned that my low income tenants will be the “testers” on decarbonization . They will not be able to afford changing their stove, water heater, wall heater, clothes dryer. Electricity is a lot more expensive than gas. My tenants already pay high electric bills due to high temperatures in California, and adding all these electric equipment they won’t be able to afford their electric bills.

👍 1

Anonymous User (Guest)

Will there be a program to subsidize my electric bill which is consistently over \$300/month? With a gas pool heater, dryer and water heater my SCE bill if I had to convert would require over a third of my fixed income to afford.
see less

😊 1

G.W.

The use of geothermal power would just be another source of electricity. It requires even more capital expenditure for power plants than conventional power plants and will make our electric rates even higher. Not in favor.

👍 1 🗣️ 1

A.B.

Pilot programs can expand to mandatory how can you ensure this won't happen to the entire State of CA? It's a joke we are talking about replacing electricity when the grids cannot support it...

Anonymous User (Guest)

Classic Government. Wasting money and resources. Gas is better than electric from having 100% of the energy supply. It's gives them a monopoly and fewer options in an emergency.

👍 2 🗣️ 1

L.L.

Is this pilot program enforced or people have the option to opt in?

🗣️ 1

Organizer

SB1221 is a voluntary, pilot program.

👍 1 🤔 1

K.

Natural gas is abundant, clean and cheap. People really need to know the true impetus behind AB 1221. California citizens need to know actual facts. Please detail.

👍 1

G.W.

In addition to the first commenter's concerns about appliance replacement, switching from gas to electricity will bring more expensive energy bills. I currently pay about \$2 per therm for gas (equivalent to about 7 cents per kWh), and I pay SDG&E about 57 cents per kWh for electricity. This is typical of the legislation from our state senate, which is tone-deaf to the actual concerns of tax payers in the beautiful state that they are making unaffordable for those of us without their resources.

🤔 1

K.R.

This is an ill-conceived government mandate for the State to claim "climate justice!" So Cal Gas is convening us to discuss this, but will not answer questions so how is this a good use of time? I want to hear how it is socially to remove access to clean and cheap natural gas when the electrical grid cannot support our present needs for much of the year, let alone increased demands? I want to know how So Cal Gas will relay these objections to the State. Even if you can afford this, you shouldn't have the government making these decisions for you. We should let the market decide how consumers want to live.

🤔 1

Anonymous User (Guest)

You cannot unmute before the admin enables our audio so that may cause some confusion.

Anonymous User (Guest)

Does this affect commercial accts for Restaurants? It will kill their industry.

👍 2

S.K.

Will we be required to pay the costs of electrification or will the money come from the utility's avoided gas system costs?

Anonymous User (Guest)

Does "zero-emission alternatives" strictly mean electrical service?

Organizer

“Zero-emission alternatives” means methods of providing gas customers with suitable substitute energy service that does not require new investment in gas distribution lines, including, but not limited to, electrification of gas end uses and energy efficiency, thermal energy networks, and demand flexibility measures to alter energy needs.

Anonymous User (Guest)

I am in line to ask a question but cannot unmute. How do we do this?

Organizer

When we call on you, we will enable your mic

K.

How will a vote take place if 67% of a community needs to agree to this program?

Anonymous User (Guest)

Where's the map

Organizer

You may access the maps associated with SB 1221 on SoCalGas and SDG&E’s respective webpages below. The maps links are near the bottom of each webpage.

[SoCalGas SB1221 Webpage](#)

Organizer

Clarification: you will not be able to unmute your mic, until called upon

Anonymous User (Guest)

What will the outreach to the community look like when you are considering the neighborhood for this project? I think there should be several meetings plus emails to the customers in the area.

👍 1

Anonymous User (Guest)

Are you still accepting applications for new decarb pilot locations?

Organizer

You may provide public comments directly to the CPUC regarding Neighborhood Decarbonization Pilot Program implementation, including considerations for your neighborhood under the “Public Comments” tab using the following link: [Public Comments - SB1221_PNDZ](#).

F.F.

In the CPUC workshop, it was noted that projects which receive 100% consent of property

owners do not count toward the 30 project maximum. As part of today's workshop, will you discuss how those 100% consent projects will be managed by SCG?

👍 1

Organizer

The Pilot Program is in development and expected to be established by the California Public Utilities Commission (CPUC) on or before July 1, 2026. As a result, detailed information about program implementation is not currently available including customers to be impacted, cost effectiveness or customer consent considerations.

L.D.

How many customers are likely to be affected by any one project (just a ballpark would be helpful!)

SB1221maps@semprautilities.com at least five business days before the Information Session.

Background and Purpose

SB 1221 allows up to 30 pilot projects across California to help transition some neighborhoods from natural gas service to zero-emission alternatives. The CPUC is developing program rules in Rulemaking 24-09-012. The program is expected to be established on or before July 1, 2026.

One early step in the implementation of SB 1221 is the CPUC's designation of priority neighborhood decarbonization zones (decarbonization zones). These are geographic areas where the CPUC may authorize these pilot projects. The CPUC has issued initial decarbonization zones (see [Decision 25-12-042*](#)) but plans on updating the decarbonization zones by December 31, 2026, and is interested in additional public input to inform this update.

This virtual event will allow you to provide your opinion on which neighborhoods should be designated decarbonization zones for possible future projects. Your input on local environmental hazards, access to heating and cooling, health considerations, community barriers to decarbonization, and diversity and equity considerations is also sought.

You can also provide written public comments directly to the docket of [Rulemaking 24-09-012*](#).

Where Can I Get More Information?

Visit <https://www.socalgas.com/regulatory/SB1221Map> for details, including maps of initial priority neighborhood decarbonization zones. You can also view the CPUC

JOIN SOCALGAS'S VIRTUAL INFORMATION SESSION ON PILOT NEIGHBORHOOD DECARBONIZATION PROGRAMS

This virtual information session will be regarding Senate Bill (SB) 1221 and the California Public Utilities Commission's (CPUC) designation of priority neighborhoods for possible future pilot projects.

This information session will be recorded and made available on SoCalGas's website to allow access for those who are unable to attend the live event.¹

Date: March 5, 2026, (virtual only)

Time: 1:00 PM – 3:00 PM

Webcast-Teams Meeting:

<https://teams.microsoft.com/meet/23517043270654?p=o2Cn3mAbC-zebL2v0GX>

Meeting ID: 235 170 432 706 54

Passcode: HC6w3UJ2

Phone number: +1 (858) 284-1506

Phone Conference ID: 344 915 21#

Note: If you need a language interpreter, please contact SoCalGas at SB-1221maps@semprautilities.com at least five business days before the Information Session.

Background and Purpose

SB 1221 allows up to 30 pilot projects across California to help transition some neighborhoods from natural gas service to zero-emission alternatives. The CPUC is developing program rules in Rulemaking 24-09-012. The program is expected to be established on or before July 1, 2026.

One early step in the implementation of SB 1221 is the CPUC's designation of priority neighborhood decarbonization zones (decarbonization zones).

These are geographic areas where the CPUC may authorize these pilot projects.

The CPUC has issued initial decarbonization zones (see Decision 25-12-042) but plans on updating the decarbonization zones by December 31, 2026, and is interested in additional public input to inform this update.

This virtual event will allow you to provide your opinion on which neighborhoods should be designated decarbonization zones for possible future projects.

Your input on local environmental hazards, access to heating and cooling, health considerations, community barriers to decarbonization, and diversity and equity considerations is also sought.

You can also provide written public comments directly to the docket of Rulemaking 24-09-012.

Where Can I Get More Information?

Visit <https://www.socalgas.com/regulatory/SB1221Map> for details, including maps of initial priority neighborhood decarbonization zones. You can also view the CPUC Webpage for SB 1221 Implementation² for additional information, updates, and official documents, including a fact sheet.

Please reference Rulemaking 24-09-012 in any communication with the CPUC.

For Questions

If you have questions about this virtual information session, please contact SoCalGas at SB1221maps@semprautilities.com.

NEIGHBORHOOD DECARBONIZATION
PROGRAMS**

This virtual information session will be regarding Senate Bill (SB) 1221 and the California Public Utilities Commission's (CPUC) designation of priority neighborhoods for possible future pilot projects. This information session will be recorded and made available on SoCalGas's website to allow access for those who are unable to attend the live event.1

Date: March 5, 2026, (virtual only)

Time: 1:00 PM – 3:00 PM

Webcast-Teams Meeting:

<https://teams.microsoft.com/join/23517043270654?p=o2Cn3mAbC-zebL2v0GX>

Meeting ID: 235 170 432 706 54

Passcode: HC6w3UJ2

Phone number: +1 (858) 284-1506

Phone Conference ID: 344 915 21#

Note: If you need a language interpreter, please contact SoCalGas at SB-1221maps@semprautilities.com at least five business days before the Information Session.

Background and Purpose

SB 1221 allows up to 30 pilot projects across California to help transition some neighborhoods from natural gas service to zero-emission alternatives. The CPUC is developing program rules in Rulemaking 24-09-012. The program is expected to be established on or before July 1, 2026.

One early step in the implementation of SB 1221 is the CPUC's designation of priority neighborhood decarbonization zones (decarbonization zones).

These are geographic areas where the CPUC may authorize these pilot projects. The CPUC has issued initial decarbonization zones (see Decision 25-12-042) but plans on updating the decarbonization zones by December 31, 2026, and is interested in additional public input to inform this update.

This virtual event will allow you to provide your opinion on which neighborhoods should be designated decarbonization zones for possible future projects.

Your input on local environmental hazards, access to heating and cooling, health considerations, community barriers to decarbonization, and diversity and equity considerations is also sought.

You can also provide written public comments directly to the docket of Rulemaking 24-09-012.

Where Can I Get More Information?

Visit <https://www.socalgas.com/regulatory/SB1221Map> for details, including maps of initial priority neighborhood decarbonization zones. You can also view the CPUC Webpage for SB 1221 Implementation2 for additional information, updates, and official documents, including a fact sheet.

Please reference Rulemaking 24-09-012 in any communication with the CPUC.

Note: If you need a language interpreter, please contact SoCalGas at SB1221maps@semprautilities.com at least five business days before the Information Session.

Background and Purpose

SB 1221 allows up to 30 pilot projects across California to help transition some neighborhoods from natural gas service to zero-emission alternatives. The CPUC is developing program rules in Rulemaking 24-09-

012. The program is expected to be established on or before July 1, 2026.

One early step in the implementation of SB 1221 is the CPUC's designation of priority neighborhood decarbonization zones (decarbonization zones).

These are geographic areas where the CPUC may authorize these pilot projects.

The CPUC has issued initial decarbonization zones (see Decision 25-12-042) but plans on updating the decarbonization zones by December 31, 2026, and is interested in additional public input to inform this update.

This virtual event will allow you to provide your opinion on which neighborhoods should be designated decarbonization zones for possible future projects.

Your input on local environmental hazards, access to heating and cooling, health considerations, community barriers to decarbonization, and diversity and equity considerations is also sought.

You can also provide written public comments directly to the docket of Rulemaking 24-09-012.

Where Can I Get More Information?

Visit <https://www.socalgas.com/regulatory/SB1221Map> for details, including maps of initial priority neighborhood decarbonization zones. You can also view the CPUC Webpage for SB 1221 Implementation2 for additional information, updates, and official documents, including a fact sheet.

Please reference Rulemaking 24-09-012 in any communication with the CPUC.
