**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA**

Application of Southern California Gas Company (U 904 G) for Authority, Among Other Things, to Update its Gas Revenue Requirement and Base Rates Effective on January 1, 2028

Application No. 26-06-____
(Filed June 15, 2026)

**TEST YEAR 2028 GENERAL RATE CASE APPLICATION OF
SOUTHERN CALIFORNIA GAS COMPANY**

Southern California Gas Company (SoCalGas or the Company) respectfully requests authority to update its Test Year 2028 (TY 2028) gas revenue requirement and base rates, effective January 1, 2028, and to implement a post-test year (PTY) ratemaking mechanism for the remaining years (*i.e.*, 2029, 2030, and 2031) of this four-year General Rate Case (GRC) cycle.

As detailed below, SoCalGas is proposing a TY 2028 GRC total revenue requirement of \$5.1 billion, which reflects a \$485 million or 10.5% increase over the estimated 2027 revenue requirement. Notably, a 10.5% requested increase is the lowest request in over a decade, despite insurance, labor, and many other operating costs rising. SoCalGas recognizes that customers are facing increasing cost pressures and has taken significant steps to reduce operating costs and mitigate future cost increases. This application reflects those efforts while continuing to allow SoCalGas to deliver safe and reliable service.

As explained in the Policy testimony (Exhibit (Ex.) SCG-01), SoCalGas's application is anchored on three fundamentals (1) limit requests to what is necessary and reasonable to deliver natural gas safely, reliably, and affordably to 21 million consumers, and to maintain compliance with regulatory requirements, (2) demonstrate disciplined cost management for all proposed activities, and (3) apply lessons learned from prior rate cases—including reduced reliance on regulatory accounts, improved organization of testimony and workpapers, and inclusion of clear, data-driven analyses to support the CPUC's review. Timely approval of SoCalGas's TY 2028

request (and proposed PTY ratemaking mechanism) will allow SoCalGas to recover the reasonable costs of its gas operations, facilities, infrastructure, and other functions necessary to provide utility services to its customers.

In this Application, SoCalGas (1) summarizes the relief it requests in this Application and identifies several of the key areas and activities the Company is focusing on in this GRC; (2) summarizes the rate impacts, SoCalGas's proposed PTY ratemaking mechanism, and additional accounting measures SoCalGas is proposing to address affordability; (3) lists the exhibits SoCalGas is submitting in support of this Application; (4) summarizes its regulatory accounts proposals; and (5) provides information necessary to comply with the statutory and procedural requirements associated with this Application, including a recommended procedural schedule based on the California Public Utilities Commission (Commission or CPUC) Rate Case Plan.¹ In addition, attached to the Application are the affordability metrics required pursuant to Decision (D.) 22-08-023, and the new graphs required by D.25-12-044.

SoCalGas files this Application concurrently with San Diego Gas & Electric Company's (SDG&E) GRC filing and will request consolidation of the proceedings initiated by these filings at the earliest possible opportunity, consistent with past practice and to promote administrative efficiency.

I. OVERVIEW OF TY 2028 GRC

SoCalGas seeks to revise its authorized revenue requirement, effective January 1, 2028, to recover the reasonable costs of SoCalGas's gas operations, facilities, and infrastructure, and other functions necessary to provide utility services to its customers. This request is limited and focused on essential work that is required by law or necessary to mitigate known risks, including risks to public and worker safety, risks to system reliability, and risks of technology failure. At its core, SoCalGas's application reflects the baseline cost of continuing to provide safe, reliable and affordable service—not expansion beyond essential service obligations.

¹ See Decision (D.) 20-01-002, *Decision Modifying the Commission's Rate Case Plan for Energy Utilities* (January 22, 2020).

In nearly all of the past 30 years, average annual bills for SoCalGas customers have been among the lowest nationwide.² As a percent of wallet share, SoCalGas bills on average represent 0.6% of the median income – the best among peer utilities in the United States.³ As addressed further in Policy Testimony, to further enhance affordability while improving safety, system resiliency, and customer service, SoCalGas has been dedicated to modernizing its business over the 2024 rate case cycle, including in the following areas:

- Workforce Optimization
- Continuous Improvement Processes
- Technology Adoption
- Enhanced Procurement Capabilities

Safety and compliance remain focuses of SoCalGas’s GRC. SoCalGas has an obligation to serve and must act proactively to mitigate the risk of avoidable, catastrophic incidents through investments that maintain system integrity in compliance with applicable regulations, improve employee and contractor safety, and mitigate the risk of harm by third-parties outside of SoCalGas’s direct control. SoCalGas has examined the specific changes expected to occur over the term of this GRC and proposes corresponding investments in, among other things:

- **Targeted Infrastructure Investments.** Risk-informed investments in SoCalGas’s infrastructure—including needs identified through the Company’s integrity management programs, pipeline safety programs, and compliance obligations—support public safety and system reliability both short and long term. These activities include the inspection, repair, replacement, and modernization of pipelines. For this GRC cycle, SoCalGas also plans integrity

² As compared to peer gas corporations. See American Gas Association (AGA), *Annual Report of Volumes, Revenues, and Sales Consumers by Company (1997-2024)*, available at: <https://www.aga.org/research-policy/resource-library/annual-report-of-volumes-revenues-and-customers-by-company-2002-2020/>. SoCalGas ranked 9th or better for 27 out of 28 years compared to a peer group of 50 largest U.S. gas corporations by number of residential consumers.

³ AGA, Form EIA-857; U.S. Bureau of Labor Statistics (BLS); Federal Reserve Bank of St. Louis, Average residential natural gas bill divided by state’s median household income. U.S. Census Bureau, *American Community Survey Briefs: Household Income in States and Metropolitan Areas: 2024 (Report No. ACSBR-025)* (September 11, 2025), available at: <https://www.census.gov/library/publications/2025/acs/acsbr-025.html>; EIA, *Natural Gas Annual Respondent Query System* (EIA-176 Data through - 2024, re-released February 2026), available at: <https://www.eia.gov/naturalgas/annual/>.

investments on high priority, high pressure distribution pipelines. For distribution, programs like DIMP and leak abatement aim to prevent and fix leaks, while the locate-and-mark program helps avoid pipeline damage during excavation. Compressor station modernization projects also support reliability and compliance.

- **Technology-Enabled Operations and Productivity Improvements.** Continued investment in IT, digital tools, and system modernization is needed to support SoCalGas operations, workforce productivity, and customer service. These investments include replacement of aging systems, communication and controls systems for grid and asset management, and customer applications. Examples are tools that support workforce planning and forecasting, scheduling and dispatch optimization, data analytics, and customer tools for self-services and billing.
- **Cybersecurity.** The significance and frequency of cyber threats facing utilities is escalating. To safeguard the gas system, SoCalGas employs a number of defenses, including perimeter and internal defenses, protection of sensitive data, security for operational technology systems, lifecycle management to address obsolescence risks, and advanced threat mitigation capabilities.
- **Insurance.** A significant driver of increased operating expense in this application is insurance, as rates for liability coverage have risen over the last rate case cycle driven by a more complex and costly litigation environment, and the need for wildfire coverage triggered by the 2025 Los Angeles wildfires and ensuing litigation. Coverage must be adequate to protect ratepayers.
- **Medical.** SoCalGas offers medical insurance coverage to employees but has experienced significant upward pressure in medical costs. Industry surveys indicate that medical cost trends will continue to exceed historical norms.
- **Efficient Field Process.** This rate case will support continued improvements in processes like leak management pursuant to SoCalGas's Natural Gas Leak Abatement Program, reducing the duration that non-hazardous leaks remain open, thereby lowering the long-term cost of managing leak inventory. Further, expanded consolidation and streamlining of required field activities will reduce

duplication and lower operating costs, with an approximate \$9.5 million annual labor cost avoidance.

II. SUMMARY OF TY 2028 GRC REQUEST AND RATE IMPACT

SoCalGas requests that the Commission authorize a \$5.1 billion revenue requirement, to be effective January 1, 2028. If approved, this revenue requirement would be an increase of \$485 million (or 10.5%) over the expected 2027 revenue requirement. If the 2028 revenue requirement identified above is approved by the Commission, an average non-CARE⁴ residential customer (using 35 therms per month) can expect a bill increase of \$5.67 per month (or 7.7%), as compared to expected 2027 rates.

SoCalGas proposes a PTY ratemaking mechanism to adjust its authorized revenue requirement in the post-test years (*i.e.*, 2029, 2030 and 2031) by applying separate attrition adjustments for operating and maintenance (O&M) expenses (including a separate attrition adjustment for medical expenses), capital-related costs, and external cost changes. Details of the proposed PTY ratemaking mechanism are provided in Section V below and in the Post-Test Year Ratemaking testimony (Ex. SCG-33). Using the proposed PTY mechanism for 2029, 2030, and 2031, SoCalGas’s proposal would result in the following attrition year revenue requirement increases:

Summary of PTY Revenue Requirement Request

(\$ in millions)	2029		2030		2031	
Revenue Requirement Increase	6.19%	\$315	5.77%	\$312	5.49%	\$314

III. THE GRC FRAMEWORK

A GRC is a proceeding through which a utility presents its anticipated costs for a future “test year,” and the Commission, after weighing the evidence, sets the revenue requirement for that test year and the rest of the GRC cycle. The purpose of a general rate case is “to address the costs of operating and maintaining the utility system[.]”⁵ Indeed, it is the “Commission’s Constitutional and statutory duty to review and approve rate increases.”⁶ In a GRC, “[t]he

⁴ California Alternate Rates for Energy Program.

⁵ CPUC, *What is a General Rate Case*, available at: <https://www.cpuc.ca.gov/generalratecase>.

⁶ D.16-08-003 at 13 (Finding of Fact (FOF) 4).

CPUC reviews detailed cost data for various areas of utility operations and approves a budget for the first year – called a test year – of the GRC cycle.”⁷ “Ratepayers are interested in reliable and safe utility service at the lowest possible rates. Investors ultimately are interested in earning maximum return on their capital. The role of the Commission in this process is to assure the interests of the ratepayers and utility are balanced by providing the utility with adequate and reasonable funding levels for both operating and capital costs.”⁸

“The purpose of a general rate case is to develop and adopt sound, informed estimates of the reasonable costs to be incurred[.]”⁹ As the Commission has explained: “Under general ratemaking principles, the Commission allows a utility [...] to file a general rate case application to recover in base rates a forecast of its operating costs to provide customers safe and reliable service. The Commission adopts a test year forecast based on the best information about expected future events and historical trends. By using a prospective forecast methodology [a utility] has an opportunity to recover its costs and earn a return (profit) on its investment in plant in service. [A utility] is expected to exercise discretion to expertly manage its operations during the test year and adapt as necessary to differences between the forecast and actual events.”¹⁰

Important in this is that utilities “forecast” what their costs will be in future years. “In California to develop rates that properly recover costs into the future a forecasted test period is used.”¹¹ As described in Appendix J, the Companies use a variety of forecasting methodologies. The forecast methodology is beneficial in that it is more likely to represent the anticipated costs of a utility, however, “[t]he disadvantage of a forecasted test period is that it may be difficult to forecast costs[.]”¹²

Not all costs in this GRC are forecast costs. Some costs included in a GRC are costs that have already been incurred and paid by the utility, and are presented for reasonableness review to determine whether the utility should recover such costs. Instead of explanations and supporting

⁷ CPUC, *What is a General Rate Case*, available at: <https://www.cpuc.ca.gov/generalratecase>.

¹² *Id.*

testimony for why an ongoing or future cost should be approved based on a forecast, a reasonableness review looks at the actual costs incurred by the utility and determines whether they were reasonably incurred. In determining whether costs are reasonable, the Commission recognizes that “[t]here’s a range of outcomes that defines reasonableness, and it’s based on what the manager knew or should have known at the time that the decision was made.”¹³ It is therefore not a look back in hindsight of what an operator could have done differently with future information. Instead, the question is whether the utility “used industry best practices and that their actions were prudent. This is not a ‘perfection’ standard[.]”¹⁴ Thus, “the reasonable and prudent act is not limited to the optimum act, but includes a spectrum of possible acts consistent with the utility system need, the interest of the ratepayers, and the requirements of governmental agencies of competent jurisdiction.”¹⁵

The Commission has recognized that GRCs must be handled in a predictable and timely manner. It has specifically found that it is “an important result when [...] most notably the utilities’ investors and customers, can rely on the Commission to process GRCs in a manner that produces predictable results.”¹⁶ And, when it comes to administering GRCs in a timely fashion, the Commission noted in the Rate Case Plan decision, “our purpose in this decision is to revise the RCP plan and schedule so that, absent intervening circumstances, the Commission can predictably meet the expectations of the applicants and intervenors.”¹⁷

IV. TESTIMONY EXHIBITS & WORKPAPERS

Support for SoCalGas’s request is provided by the prepared direct testimonies from various witnesses sponsoring specific subjects pertaining to the Company’s operations, functions, and/or activities.¹⁸ The table below lists the exhibit number and subject matter.

¹³ D.05-01-054 at 14.

In addition to providing the TY 2028 forecast, SoCalGas’s testimony and workpapers now include the forecast for the PTYs (*i.e.*, 2029, 2030 and 2031) to demonstrate how the capital projects presented as part of the TY 2028 forecast will be funded in the PTYs. For those pieces of testimony that contain a Capital expenditure forecast, a new Capital Expenditures appendix is attached to the testimony to facilitate review of the capital forecasts for 2026 through 2031 based on corresponding in-service dates.

WORKPAPERS

Witnesses who have workpapers supporting their testimony will have those workpapers offered into the evidentiary record. Workpapers will be numbered the same as each witness’s testimony exhibit, but ending with “-WP” for O&M workpapers, “-CWP” for capital workpapers, “-WP-S” for supplemental workpapers, and “-RRWP” for reasonableness review workpapers. For example, O&M workpapers for SoCalGas’s Operations Support testimony will be marked and offered as Ex. SCG-12-WP, and the capital workpapers will be marked as Ex. SCG-12-CWP.

The Rate-Based Decision-Making Framework (RDF) Benefit Cost Ratio (BCR) workpapers and Data Templates will be made available via the SoCalGas and SDG&E Discovery Portal. The BCR workpapers and Data Templates correspond to each of the 2025 RAMP Risk Chapters as applicable.

V. SUMMARY OF THE POST-TEST YEAR RATEMAKING MECHANISM

As addressed in the Post-Test Year Ratemaking testimony (Ex. SCG-33), SoCalGas is proposing a two-part PTY ratemaking mechanism to adjust its authorized revenue requirement in the post-test years (2029, 2030, 2031) by applying one methodology for attrition adjustments for O&M expenses (including a separate attrition adjustment for medical expenses), and another

methodology for capital-related costs to reflect ongoing capital additions during the PTY period. This structure reflects the differing drivers of O&M and capital-related revenue requirements and supports transparency in the attrition process. The mechanism is designed to provide SoCalGas with sufficient revenues during the PTY period to continue providing safe and reliable service to its customers, while providing shareholders a reasonable opportunity to earn the Rate of Return (ROR) previously authorized by the Commission. In addition, SoCalGas proposes an earnings sharing mechanism that provides ratepayers a share of returns above SoCalGas's authorized ROR while providing shareholders with the incentive to continue to make productivity-enhancing investments.

As explained in more detail in the PTY Ratemaking testimony (Ex. SCG-28), SoCalGas's proposed PTY ratemaking mechanism is as follows:

- (1) Operations and Maintenance (O&M)-related revenue requirement:
 - General O&M test-year cost forecast (labor and non-labor) escalated by S&P Global Market Intelligence's utility cost escalation factors forecast, and
 - Medical costs forecast escalated by WTW's (formerly known as Willis Towers Watson) actuarial forecast.
- (2) Capital-related revenue requirement:
 - Test-year capital additions forecast escalated using S&P Global Market Intelligence's utility cost escalation factors.

SoCalGas's other PTY proposals include:

- (1) A four-year term (2028-2031) for this GRC cycle;
- (2) Continued use of annual PTY advice letter regulatory filings to update the authorized revenue requirements per the adopted two-part PTY ratemaking mechanism; and
- (3) An Earnings Sharing Mechanism that shares returns above or below authorized Rate of Return (ROR) with ratepayers and shareholders during the post-test years, within a defined range and subject to suspension as described below.

This proposal is designed to account for unique cost escalation issues associated with O&M expenses, such as the expected higher growth in medical costs as compared to other types

of O&M cost,¹⁹ as well as to account for appropriate recovery of capital costs associated with capital investments proposed for this GRC cycle that mitigate risk and improve the safety and reliability of SoCalGas utility infrastructure. This mechanism is designed to provide SoCalGas with sufficient funding during the PTY period to support safe and reliable operations, while promoting productivity and efficiencies during the next GRC cycle.

Using the proposed PTY mechanism for 2029, 2030, and 2031, SoCalGas’s proposal would result in the following attrition year revenue requirement increases:

Summary of PTY Revenue Requirement Request

(\$ in millions)	2029		2030		2031	
Revenue Requirement Increase	6.19%	\$315	5.77%	\$312	5.49%	\$314

VI. REGULATORY ACCOUNTS PROPOSALS

As part of this GRC Application, SoCalGas is seeking Commission approval to amortize balances in twelve regulatory accounts, close four accounts and three subaccounts, and modify six regulatory accounts. For regulatory account balances that are reviewed and approved for amortization into rates, balances as of December 31, 2027, will be incorporated into the adopted 2028 GRC rates.²⁰ Details regarding the specific account proposals are set forth in the Regulatory Accounts testimony (Ex. SCG-21).

VII. IMPLEMENTATION

This GRC Application will result in new rates, effective January 1, 2028. SoCalGas may seek authorization to establish a regulatory account or mechanism to record the difference between the current rates for gas service and the final rates adopted in this GRC. This regulatory account/mechanism would be effective on January 1, 2028. Similar relief has been granted in SoCalGas’s past GRCs and the GRCs of the other California investor-owned utilities.

¹⁹ Escalation is proposed to be applied to net medical expenses (*i.e.*, after reassignments to capital).

²⁰ For regulatory accounts presented for reasonableness review in the GRC, SoCalGas is seeking reasonableness review of expenditures through 2025. Revenue requirement associated with those approved expenditures through December 31, 2027, will be amortized into 2028 rates.

VIII. STATUTORY AND PROCEDURAL REQUIREMENTS

SoCalGas files this Application according to Pub. Util. Code §§ 451, 454, 491, 701, 728, 729, 740.4 and 795, the Commission's Rules of Practice and Procedure, and applicable prior Commission decisions, orders and resolutions.

In accordance with Rule 2.1(a) – (c) of the Commission's Rules of Practice and Procedure, SoCalGas provides the following information:

A. Rule 2.1(a) – Legal Name

Southern California Gas Company is a public utility corporation organized and existing under the laws of the State of California. SoCalGas's principal place of business and mailing address is 555 West Fifth Street, Los Angeles, California 90013.

B. Rule 2.1(b) – Correspondence

Correspondence or communications to SoCalGas regarding this Application should be addressed to:

Jamie K. York
8330 Century Park Court, CP31E
San Diego, CA 92123-1530
Telephone: (858) 654-1739
Email: jyork@semprautilities.com

A copy should also be sent to:

Elliott S. Henry
Southern California Gas Company
555 West 5th Street, Suite 1400
Los Angeles, CA 90013
Telephone: (213) 244-8234
Email: ehenry@socalgas.com

Data requests should be submitted via the SoCalGas and SDG&E Discovery Portal. Access to the Discovery Portal may be requested by submitting via email the following requestor information to SempraDiscovery@semprautilities.com:

- the proceeding name;
- the organization's name;
- the primary contact details (first/last name, email, phone, job title); and

- other participant’s details (first/last name, email, phone, job title) who will submit, receive or view data requests/responses and or view attachments in Discovery Portal.

Requestors should also specify whether access is needed to workpapers, data requests, or both.

C. Rule 2.1(c)

1. Proposed Category of Proceeding

In accordance with Rule 7.1, SoCalGas requests that this Application be categorized as ratesetting.

2. Issues to be Considered and Relevant Safety Considerations

The principal issues to be considered in this proceeding are as follows:

- Whether SoCalGas’s proposed TY 2028 revenue requirement is just and reasonable, and should be adopted by the Commission and reflected in rates;
- Whether SoCalGas’s proposed post-test year ratemaking mechanism is just and reasonable; and
- Whether SoCalGas’s regulatory accounts proposals are just and reasonable.

With respect to relevant safety considerations, the issues above will be considered within the context of the Commission’s risk-informed GRC framework. The focus on safety and risk mitigation and how RAMP was integrated into the GRC will be major components of this GRC proceeding.

3. Need for Hearings

Although SoCalGas has provided ample supporting testimony, analysis and documentation that provides the Commission with a sufficient record upon which to grant the relief requested, given the nature of this proceeding, it is likely some parties will request hearings. To the extent that evidentiary hearings may be required, SoCalGas requests that any schedule set forth by the Commission include a procedural mechanism by which the parties can specifically identify material issues of fact in dispute that warrant an evidentiary hearing. Indeed, the Commission may decline to set hearings where there are no material issues of fact in

dispute.²¹ As the Commission has stated “[d]ue process does not require a hearing that serves no useful purpose.”²² “Due process does not require a hearing merely to ‘sharpen the issues’ or ‘fully develop the facts’; rather, there must be disputed issues of *material* fact in order to merit a hearing.”²³ Similarly, pursuant to Rule 2.6 (b), any protest that requests evidentiary hearings “must state the facts the protestant would present at an evidentiary hearing to support its request for whole or partial denial of the application.”

4. Proposed Schedule

Pursuant to the GRC Application Filing Schedule, as modified by D.20-01-002, SoCalGas proposes the following schedule:

PROPOSED SCHEDULE

ACTION	DATE
Application Filed	June 15, 2026
Workshop on Application	June 25, 2026
Protests and Responses to Application Due	July 15, 2026
Replies to Protests/Replies	July 27, 2026
Prehearing Conference	July 30, 2026
Scoping Memo of Assigned Commissioner Issued	September 14, 2026
Public Participation Hearings	Mid November 2026 (if needed)
Intervenor Testimony Served	January 15, 2027

²¹ D.04-05-033 at 10-11; D.20-03-019 at 25 (“if a contesting party asserts that a hearing is required by law, the party must provide appropriate citation and specify the materially contested facts.”); Rule 12.3 (Hearing Where Contested-Settlements) (“If there are no material contested issues of fact, or if the contested issue is one of law, the Commission may decline to set hearing.”)

²² D.04-05-033 at 10.

²³ *Id.* at 11.

ACTION	DATE
Concurrent Rebuttal Testimony Served	March 1, 2027
Rule 13.9 Meet and Confer Deadline – Parties inform ALJ whether evidentiary hearings are necessary and identify specific disputed issues of material fact, witness list, and cross-examination estimates	March 11, 2027
2026 Recorded Expenditures Served by SDG&E and SoCalGas	March 22, 2027
Evidentiary Hearings	March 29 – April 9, 2027 (two weeks)
Update Testimony and Hearings (if necessary)	April 23, 2027
Opening Briefs	May 20, 2027
Reply Briefs	June 11, 2027
Status Conference, proceeding submitted for Commission Decision (Rule 13.14(a))	TBD
Proposed Decision Issued	December 1, 2027
Final Decision Adopted	January 2028
Effective Date of Final Decision	January 1, 2028

SoCalGas recommends that, consistent with past practice, the Commission consolidate this Application with SDG&E’s Application and that the Commission adopt the same procedural schedule for both utilities. This is reasonable because SoCalGas and SDG&E file their respective Applications at the same time and share common witnesses. SoCalGas and SDG&E intend to file a motion shortly after filing this Application requesting consolidation of the proceedings.

D. Rule 2.2 – Articles of Incorporation

A copy of SoCalGas’s Restated Articles of Incorporation as last amended, presently in effect, and certified by the California Secretary of State, was previously filed with the Commission on October 1, 1998, in connection with SoCalGas’s Application No. 98-10-012, and is incorporated herein by reference.

E. Rule 3.2 (a) – (d) – Authority to Change Rates²⁴

In accordance with Rule 3.2 (a) – (d) of the Commission’s Rules of Practice and Procedure, SoCalGas provides the following information.

1. Rule 3.2(a)(1) – Balance Sheet

SoCalGas’s balance sheet, income statement, and financial statement for the twelve-month period ending December 31, 2025, are included with this Application as Appendix A.

2. Rule 3.2(a)(2) – Statement of Effective Rates

A statement of SoCalGas’s presently effective gas rates can be viewed electronically on SoCalGas’s website. Appendix B to this Application provides the table of contents from SoCalGas’s tariffs on file with the Commission.

3. Rule 3.2(a)(3) – Statement of Proposed Rate Change

A statement of proposed rate change is attached as Appendix C. This is further discussed in the Gas Rates testimony (Ex. SCG-29), which is being served concurrently with this Application.

4. Rule 3.2(a)(4) – Description of Property and Equipment

A general description of SoCalGas’s property and equipment was previously filed with the Commission on May 3, 2004, in connection with SoCalGas’s Application 04-05-008, and is incorporated herein by reference. A statement of Original Cost and Depreciation Reserve for the twelve-month period ending December 31, 2025, is attached as Appendix D.

5. Rule 3.2(a)(5) and (6) – Summary of Earnings

A summary of SoCalGas’s earnings for the twelve-month period ending December 31, 2025, is included as Appendix E to this Application.

²⁴ Note, Rule 3.2(a)(9) is not applicable to this Application.

6. Rule 3.2(a)(7) – Statement Regarding Tax Depreciation

For financial statement purposes, depreciation of utility plant has been computed on a straight-line remaining life basis, at rates based on the estimated useful lives of plant properties. For federal income tax accrual purposes, SoCalGas generally computes depreciation using the straight-line method for tax property additions prior to 1954, and liberalized depreciation, which includes Class Life and Asset Depreciation Range Systems, on tax property additions after 1954 and prior to 1981. For financial reporting and rate-fixing purposes, “flow through accounting” has been adopted for such properties. For tax property additions in years 1981 through 1986, SoCalGas has computed its tax depreciation using the Accelerated Cost Recovery System. For years after 1986, SoCalGas has computed its tax depreciation using the Modified Accelerated Cost Recovery Systems and, since 1982, has normalized the effects of the depreciation differences in accordance with the Economic Recovery Tax Act of 1981 and the Tax Reform Act of 1986.

7. Rule 3.2(a)(8) – Proxy Statement

A copy of SoCalGas’s most recent proxy statement, dated April 14, 2026, was mailed to the Commission on April 27, 2026, and is incorporated herein by reference.

8. Rule 3.2(a)(10) – Statement Regarding Pass Through to Customers

This GRC Application will seek the Commission’s authorization to revise SoCalGas’s current base rate revenue requirement to recover its projected costs of its operations, as well as owning and operating its natural gas facilities and infrastructure, for the purpose of serving its customers. It is not only a pass through of costs.

9. Rule 3.2(b) – Notice to State, Cities, and Counties

In compliance with Rule 3.2(b) of the Commission’s Rules of Practice and Procedure, SoCalGas will, within 20 days after the filing this Application, mail a notice to the State of California and to the cities and counties in its service territory including those listed in Appendix F to this Application.

10. Rule 3.2(c) – Newspaper Publication

In compliance with Rule 3.2(c) of the Commission’s Rules of Practice and Procedure, SoCalGas will, within 20 days after the filing of this Application, publish in newspapers of general circulation in each county in its service territory notice of this Application.

11. Rule 3.2(d) – Bill Insert Notice

In compliance with Rule 3.2(d) of the Commission’s Rules of Practice and Procedure, SoCalGas will, within 45 days after the filing of this Application, provide notice of this Application to all of its customers along with the regular bills sent to those customers that will generally describe the proposed rate changes addressed in this Application.

IX. ADDITIONAL DOCUMENTATION

The following is an index of the attached Appendices to this Application:

Appendix A: Balance Sheet, Income Statement, and Financial Statement;

Appendix B: Statement of Presently Effective Gas Rates;

Appendix C: Statement of Proposed Gas Rate Changes;

Appendix D: Statement of Original Cost and Depreciation Reserve;

Appendix E: Summary of Earnings;

Appendix F: State, Counties, and Cities List;

Appendix G: Service List;

Appendix H: Aliso Canyon Attestation;

Appendix I: Affordability Metrics Tables; and

Appendix J: General Rate Case (GRC) Development Overview: Historical and Forecast Presentation

X. SERVICE

This is a new Application. No service list has been established for this proceeding. Accordingly, SoCalGas will serve this Application, including its appendices, accompanying prepared direct testimony and related exhibits, on parties to the service lists for the consolidated 2024 GRC proceeding for SoCalGas and SDG&E A.22-05-015/016 (cons.) and the SoCalGas/SDG&E RAMP proceeding (A.25-05-010/013 (cons.)). A copy of these service lists is attached to this Application as Appendix G. Pursuant to the Rate Case Plan and requests, SoCalGas will send via mail two hard copies to Chief Administrative Law Judge (ALJ) Michelle Cooke and two hard copies to the California Public Advocates Office (Cal Advocates).²⁵ Under Commission Rule 1.10(e), service will be accomplished by providing a link to the published

²⁵ D.20-01-002, Appendix A.

documents located on SoCalGas's website at: <https://www.socalgas.com/Regulatory/a26-06-xxx-socalgas-2028-general-rate-case>.

XI. CONCLUSION

For all the foregoing reasons, SoCalGas respectfully requests that the Commission:

1. Consider this Application and grant all the relief requested herein;
2. Issue an Order authorizing SoCalGas to make such changes to its tariffs as are consistent with the relief requested herein; and
3. Grant such other and further relief as the Commission finds to be just and reasonable.

Respectfully submitted,

SOUTHERN CALIFORNIA GAS COMPANY

 RESOLUTION NO. E-5405

Appendix C

Statement of Proposed Gas Rates Changes

The table shown below illustrates the changes in rates that would result from CPUC approval of this application, compared to estimated 2027 rate levels.

If the request is approved, the average residential customer using 35 therms per month would see a bill increase of approximately \$5.67 per month.¹ The actual impact will vary based on usage, baseline territory, and other factors.

Rate Increase Being Requested by Customer Class

Customer Class ²	Total Rate Change (\$/therm)	Percentage Average Rate Change (%)
Residential	\$0.16267	7.7%
Core Commercial & Industrial	\$0.10203	6.3%
Total Core	\$0.13787	7.2%
Non-core Commercial & Industrial	\$0.00970	3.7%
EG	\$0.00280	2.5%
Retail Noncore Average	\$0.00580	2.7%
Wholesale	-\$0.00013	-0.2%
BTS (\$/dth/day)	\$0.15943	14.8%
System Total	\$0.08252	6.2%

If approved, SoCalGas will implement new revenues in gas rates beginning on January 1, 2028.

¹ The bill increase compares illustrative 2027 bills with those projected for 2028.

² The illustrative percentage increase compares 2027 bundled rate impacts with those projected for 2028. The commodity price reflected in these tables are a forecast of 2026 gas price per Advice Letter 6548-G-A.

Appendix H

Aliso Canyon Attestation

ALISO CANYON ATTESTATION

1. I am Senior Vice President – Chief Infrastructure Officer of Southern California Gas Company (SoCalGas). I am providing this attestation based upon the requirements of Ordering Paragraph 5 of California Public Utilities Commission (CPUC or Commission) Decision (D.) 23-09-022.
2. On December 23, 2015, the CPUC-Executive Director issued a letter to SoCalGas directing SoCalGas to provide information to the CPUC concerning costs associated with the uncontrolled release of natural gas from Well SS-25 at the Aliso Canyon Storage Field from October 23, 2015, through February 11, 2016 (the Incident).
3. Beginning in December 2015, SoCalGas has reported to the Commission the costs associated with the Incident in in the monthly Incident-related cost report submitted pursuant to the Executive Director’s December 23, 2015 (Directive Report).
4. On October 28, 2022, SoCalGas, the California Public Utilities Commission’s Safety and Enforcement Division (SED) and the Public Advocates Office at the California Public Utilities Commission (Cal Advocates) filed a Joint Motion for Adoption of Settlement Agreement in Investigation (I)19-06-016 seeking approval of the Settlement Agreement entered into by SoCalGas, SED, and Cal Advocates (Settlement Agreement).
5. On September 12, 2023, the Commission issued Decision (D.) 23-09-002 which approved the Settlement Agreement between SoCalGas, SED, and Cal Advocates resolving I.19-06-016.
6. Ordering Paragraph 5 of D.23-09-002 states that SoCalGas shall submit an attestation by a Vice President or higher company executive with every application requesting rate recovery attesting that it has not included any expenses or costs identified in the Settlement Agreement. This attestation requirement applies for five years from the date of the final issuance of D.23-09-002 (September 12, 2023).

7. I reviewed the costs requested in this Application and the most recent Directive Report. Based on my review of the costs, the Directive Report, and other diligence, I am informed and believe, and upon such information and belief, certify that SoCalGas has not included any expenses or costs identified in the Settlement Agreement adopted in D.23-09-002 in the attached Application being filed on June 15, 2026.

Executed on June 15, 2026, at Los Angeles, California.

Neil Navin
Senior Vice President – Chief Infrastructure
Officer
Southern California Gas Company

Affordability Metrics Table

**SOUTHERN CALIFORNIA GAS COMPANY
TY 2028 GRC PHASE 1 APPLICATION
GAS AFFORDABILITY REQUIREMENTS**

PER D.25-12-044

APPENDIX I

	Incremental Change in Affordability Ratio for 20th Percentile Households (AR20)		Incremental Change in Time for Households Earning Minimum Wage (HM)	Incremental Change in AR20 in Areas of Affordability Concern
			County of Los Angeles	
Lowest - Highest Affordability Impact by Climate Zone	Year	CARE/Non-CARE	CARE/Non-CARE	CARE/Non-CARE
	2028	2.3% to 3.9%/2.2% to 3.8%	0.07 to 0.12 hours/0.09 to 0.14 hours	0.0% to 7.5%/0.0% to 8.4%
	2029	1.9% to 3.5%/1.8% to 3.4%	0.01 to 0.03 hours/0.02 to 0.03 hours	0.0% to 9.2%/0.0 to 4.4%
	2030	1.7% to 3.2%/1.6% to 3.1%	0.02 to 0.03 hours/0.02 to 0.03 hours	0.0% to 4.0%/0.0 to 4.8%
	2031	-3.3% to 0.8%/-3.3% to -0.9%	-0.03 to -0.01 hours/-0.03 to -0.01 hours	-0.5% to 0.5%/-0.6% to 0.5%

Summary:

The following AR impacts are the results of SoCalGas's application proposal for years 2028-2031. The AR20 impacts of SoCalGas's most disadvantaged customers who are not enrolled in any low-income program range from -0.6% to 8.4%. For customers that are enrolled in a low-income program such as CARE, the AR20 is in the range of -0.5% to 9.2%. For households enrolled in CARE earning minimum wage at the County of Los Angeles level, the gas essential use bill impact ranges from -0.03 to 0.12 hours for CARE and -0.03 to 0.14 hours for non-CARE households.

Note

1) All Affordability Ratio Results herein generated using the CPUC's 2024 Affordability Ratio (AR) Calculator (<https://www.cpuc.ca.gov/industries-and-topics/electrical-energy/affordability/2023-and-2024-affordability-ratios>)

General Rate Case (GRC) Development Overview Historical and Forecast Presentation

General Rate Case (GRC) Development Overview: Historical and Forecast Presentation

The Test Year (TY) 2028 General Rate Case (GRC) presentation of Southern California Gas Company (SoCalGas) and San Diego Gas & Electric Company (SDG&E) (collectively, the Companies) is designed to meet the requirements of the Rate Case Plan. The purpose of this primer is to provide an overview of how the Companies developed their test year forecasts, which drive the TY revenue requirement request. It describes the cost-related processes used for gathering underlying costs, historical analysis, and the forecasting process. This overview does not describe the process to calculate revenue requirement, post-test year ratemaking, or reasonableness reviews.

Historical Presentation

In the TY 2028 GRC, the Companies are providing five years of historical costs (broken down by labor and non-labor) and Full-Time Equivalents (FTE)¹ leading up to and including the base year (2025) in compliance with the Rate Case Plan² (this historical data includes years 2021 to 2025). SoCalGas and SDG&E present this historical information for capital and operations and maintenance (O&M) projects and activities in their capital workpapers (CWP) and O&M workpapers (WP). All costs presented in the GRC are in thousands and in base year (2025) constant dollars, which allows for easy comparison of costs across each year.

In accordance with D.08-07-046, the Companies organize and present their costs organizationally by workpaper.³ Workpapers consist of one or more O&M cost centers or capital budget codes. Cost centers generally group expenses based on similar activities being performed, while budget codes represent capital activities based on the underlying investment. These capital budget codes may reflect either discrete projects or on-going programs (often referred to as “blanket” projects) that often span multiple years. Both cost centers and budget

¹ An FTE (Full-Time Equivalent) is a calculation of labor based on hours worked, used to standardize staffing and activity levels.

² Decision (D.) 07-07-004, Appendix A at A-31.

³ D.08-07-046 at 9-11.

codes contain labor, non-labor, and non-standard escalation costs (NSE). Labor refers to the Companies' internal labor costs. Non-labor includes contractor labor costs, materials, and services. These cost centers and budget codes are then used as building blocks for the GRC presentation.

SoCalGas and SDG&E present costs in direct dollars. This means the costs, both recorded and forecasted, are shown in workpapers without overheads and loaders. The overheads and loaders are presented as their own workpapers in various witness areas (such as Gas Distribution, Electric Distribution, and Compensation and Benefits). In addition to reflecting direct costs, the Companies also present costs in the GRC where they are first incurred. For capital projects, costs are gathered by budget code and included in testimony and workpapers at the primary company assigned. The process of loading and allocating costs occurs in the Results of Operations (RO) model when calculating each company's revenue requirement.

O&M costs have the following classifications: non-shared services (NSS), utility shared services (USS), and Corporate Shared Service (CSS). Non-shared services are activities that are performed by one utility solely for its own benefit. All costs are borne by that single utility. USS costs, on the other hand, may be incurred by one utility but they benefit both. In the GRC presentation, USS costs are presented in the utility incurring the cost but are then allocated either by a specific dollar amount or a percentage. CSS represents a utility department that shares costs to more affiliates than just the other utility. For purposes of the GRC, the utility treats costs for services received from Corporate Center as NSS costs. The "splits" are factored into the RO model calculation so that the company's revenue requirement is appropriately reflected.

SoCalGas and SDG&E's general ledger includes all accounting entries regardless of regulatory framework. When preparing their respective GRC, the Companies migrate the raw accounting data into their General Rate Case Integrated Database (GRID) system, an internally developed database, where the costs are further organized for the GRC presentation.

Once costs are migrated into the GRID system, they go through a number of transformations. The first is through automated programming steps which include:

1. **Witness Area Assignments** – This step sets the 2028 regulatory framework and assigns ownership of cost centers and budget codes to each witness area and workpaper.

2. **Exclusions** – This step removes any costs that are not recoverable in the GRC. Some examples include disallowed costs, shareholder funded activities, costs requested in other filings, and projects with separate applications.
3. **Re-mapping** – This automated step moves costs based on a specific accounting attribute between budget codes or cost centers to align the witness area.
4. **Categories** – This step allows witness areas the option to organize workpapers into like groupings for presentation purposes. For example, the Operations Support witness area at SoCalGas has three categories within its capital workpapers for Facilities, Inventory and Logistics, and Fleet.
5. **Vacation and Sick and Escalation** – Finally, a company-wide vacation and sick factor as well as escalation (to bring costs into constant base year dollars) are calculated and added to historical costs as required by the Rate Case Plan.⁴

These costs are thereafter referred to as “recorded” costs. After the data processing takes place, manual analysis is performed to review and research costs. Each witness area analyzes their actual costs to include only applicable GRC costs within the correct witness area and workpapers. If a witness area, for example, identifies a cost that does not belong in the GRC application, a manual adjustment is entered to remove those costs. Manual adjustments are also performed for costs that need to be transferred between workpapers and/or witness areas. Common adjustments include removal of executive officer compensation subject to Senate Bill 901, Catastrophic Event Memorandum Account (CEMA) costs, and other non-GRC costs, as well as adjusting expenses recorded correctly in SAP but requiring realignment for GRC purposes (for example, re-organizations may result in prior year costs needing to be moved to a different cost center where the costs are now being incurred or will be incurred in the future). The final costs presented in the workpapers are labeled as “adjusted-recorded” costs. Once the historical years are fully reviewed, witness areas then create their GRC forecasts.

Test Year Forecasting Methods

Witness areas develop GRC forecasts for O&M expenses and capital expenditures using the GRID database system described above. Witness areas forecast the TY 2028 for O&M and

⁴ D.07-07-004.

capital and years 2026 through 2031 for capital.⁵ To develop forecasts, witnesses may use historical data available at the time (*i.e.*, through the 2025 base year) to inform their GRC request. More specifically, generally accepted forecast methodologies are utilized to reflect future funding needs. These generally accepted forecasting methods include 2025 base-year, historical averages (3-year, 4-year, 5-year), linear trends (3-year, 4-year, 5-year), or zero-based (a method that does not rely on history and rather bases the forecast on other information).

Typically, historical averages are used when costs fluctuate over time to smooth the ups and downs of recorded data. Linear trends may be used when there is a pattern of growth or decrease over time. Base-year may be selected when costs are steady, there is inadequate historical data, or to recognize the most recent financial data is the preferred starting point for forecasting the future. For example, if an activity is relatively new, does not have many years of historical data, or if the historical data is not representative of future expectations, a base year forecast methodology may be most appropriate. Lastly, a zero-based forecasting method may be used when historical information is not relevant or where there is detailed information available that is more indicative of future needs. All zero-based forecast workpapers include supplemental workpapers which include the underlying forecast assumptions and calculations. Zero-based methods can include:

- An arithmetic method such as unit cost multiplied by expected volume;
- Referencing a Request for Proposal response, an invoice, or other reference document;
- Use of subject matter expertise;
- Reference to a like-kind project or activity performed elsewhere; and
- Reference to a similar project or work done in the past and updated for current conditions.

The various underlying forecast methodologies are applied depending on the facts and circumstances of the various projects and programs. In the various workpapers accompanying both O&M and capital forecasts, witnesses show which forecast methodology was chosen and provide additional description of why the chosen methodology was determined to be most appropriate to the circumstance.

⁵ 2029-2031 forecasts are illustrative and are not included in any revenue requirement calculation.

In addition to forecasting costs, witness areas will forecast the in-service date of each capital workpaper. If a capital workpaper represents on-going or “blanket” projects that are routine in nature, then the in-service date is denoted as not applicable in the workpapers. For those projects, the RO model places the capital spending in-service and incorporates the asset in ratebase based on historical analysis.

These same forecasting practices have been utilized to support SoCalGas’s and SDG&E’s last several respective GRC requests and have resulted in the Companies’ forecasts being adopted by the Commission in prior GRC proceedings.

Similar to how witness areas review and analyze the historical data and make historical adjustments, witnesses have an opportunity to make additional adjustments to their forecasts. These are referred to as forecast adjustments. Forecast adjustments may be made to incorporate incremental needs of the business. Examples include additional FTEs that may be forecasted or incremental funding proposed for a project. All adjustments, historical and forecast, are described in the workpapers.

For shared services, witness areas also forecast the percentage allocation being retained by a given company and those being allocated to other Sempra companies. The percentages and an explanation of the methodology is provided in workpapers.

Risk Assessment Mitigation Plan (RAMP) Cost Mapping

After a witness area finalizes its workpaper forecasting, a RAMP analysis is performed to identify which GRC forecasts include RAMP costs and where it was originally included in the RAMP filing. This analysis and mapping is done in the GRID system so that a set of workpapers can be created for each testimony that includes a RAMP forecast. Each witness area also includes both RAMP work units and dollars to the appropriate RAMP control or mitigation. These work papers can be found as appendices to each witness chapter.

Finalization

Once all the costs are forecasted and finalized in GRID, the system produces workpapers as portable-document-files (PDFs) as well as testimony tables to be placed in testimony. Data is then exported to the RO model to calculate the test-year revenue requirement request for both SDG&E and SoCalGas.

This test year revenue requirement request includes O&M direct costs from GRID, capital-related costs (depreciation, taxes, and return), escalation from 2025 base year constant dollars to 2028 dollars,⁶ the impact of shared service billings, and other downstream revenue requirement components.

The Test Year revenue requirement calculated in the RO model is then used as the starting point for the Companies' revenue requirement requests for years 2029-2031. The post-test year (PTY) mechanism is a separate revenue requirement model that calculates the 2029-2031 PTY request. The 2028-2031 revenue requirements are then used to estimate the rate and bill impacts of the proposed requests.

⁶ Certain costs are identified as Non-Standard Escalation (NSE) items. These items contain their own escalation provisions (for example, by contract) and thus are not escalated in the RO model using the standard and requested escalation factors. Some examples of non-labor items subject to NSE include fuel, leases, and postage expenses.
