(4) The issues to be considered are

(Example: The utility should refund the overbilled amount of \$78.00):

The Commission is requested to find that Southern California Edison is required to provide public utility service to a 157-acre former landfill site which is currently being redeveloped by the Carson Reclamation Authority ("CRA") pursuant to its obligation to serve. The site was originally closed in 1965. CRA's development of the site includes complete environmental remediation in compliance with all Department of Toxic Substances Control, CalRecycle, and California Regional Water Quality Board regulations. Despite the environmental remediation, SCE has denied CRA's initial request that it provide public utility service to future occupants of the site due to apparent concerns regarding potential migration of methane at the site (it is not clear what degree of remediation SCE assumed in identifying these concerns). However, utility grade standards have been adopted and are already being followed in California to address the concerns that have been outlined by SCE.
