DER Payments

(PUBLIC VERSION)

Southern California Edison Company's ("SCE") DER Payment Report

August 15, 2026

Subject:

Data on payments made to contracted deferral projects and all spending on contingency plans for each deferral opportunity.

Background:

Regulatory Background

As set forth in Ordering Paragraph 50 of R.14-08-013, Administrative Law Judge's Ruling Modifying the Distribution Investment Deferral Framework – Filing and Process Requirements, May 11, 2020 (the "May 2020 DIDF Reform Ruling"):

> With each GNA/DDOR filing, the IOUs shall append or separately provide to Energy Division a report organized by deferral opportunity that contains itemized data on any payments made to contracted deferral projects and all spending on contingency plans for each deferral opportunity. The reporting shall include any modifications or additional details required by Energy Division. The reporting shall include all candidate deferral projects launched in a DIDF RFO since 2018 and will continue to cover this timeframe unless modified by Energy Division. Additional reporting guidelines apply on GRC filing years pursuant to D.18-02-004, Ordering Paragraph 2.dd.

SCE submits this report with the 2026 GNA & DUPR Narrative filing.

SCE's DER Deferral Contracts Currently Receiving Payments

SCE has made payments on two contracted DER deferral projects, "Acorn I" and "Wildcat I." [1] Both of these projects resulted from the 2018 Integrated Distributed Energy Resources (IDER) Incentive Pilot Solicitation. Specifically, Acorn I was contracted to defer the Newbury traditional wires project and Wildcat I was contracted to defer the Eisenhower traditional wires project. [2]

---

[1] SCE also signed contracts for two other Acorn projects which were subsequently terminated prior to construction.

[2] For both Acorn and Wildcat, after the contracts were signed, subsequent distribution planning process ("DPP") cycles determined that due to a change in the load forecast, the traditional projects they were deferring were no longer needed. SCE's contract still gives SCE the right to have the units dispatched for the purpose of distribution reliability. To the extent that they can serve a distribution deferral in the future, SCE has the ability to use them for that purpose. While these projects do not currently provide a distribution service, they continue to provide resource adequacy ("RA").

Information Provided in This Report

For each of the contracts noted above, SCE provides data on payments made to contracted deferral projects and all spending on contingency plans for each deferral opportunity, as required by the May 2020 DIDF Reform Ruling.
