Thanks
JS

On Jun 15, 2026, at 9:52 AM, Kari Gardner <Kari.Gardner@sce.com> wrote:

Dear Mr. Stewart,

Thank you for your follow-up and for providing additional information regarding your PowerClerk account. I understand your concern regarding how communications were distributed and appreciate the opportunity to clarify based on our most recent review.

Following your note, we completed an additional review of the PowerClerk record and confirmed that on December 15, 2025, you granted your contractor, SolarTech, access to your application. Subsequently, on January 6, 2026, the application was updated to a "Contractor Install," at which point SolarTech became the Applicant of Record.

Consistent with Rule 21 interconnection requirements, formal communications regarding program timelines, extension eligibility, and required actions are directed to the Applicant of Record listed in the system. As part of this process, extension guidance communications were issued to contractors, including SolarTech, on December 30, 2025, and follow-up reminders were issued prior to the April 14, 2026 deadline.

In addition, our records confirm that direct outreach was also made to you, including a confirmed conversation on March 30, 2026, advising of the final deadline to submit required documentation.

Based on this review, we did not identify any evidence of an SCE-related error in how communications were issued or how the application was managed. As such, the request for reinstatement under NEM 2.0 does not meet the criteria required under program rules.

Please feel free to reach out if you have any additional questions.
Sincerely,

Kari Gardner
Manager of Consumer Affairs
Southern California Edison

Subject: Re: (External):Re: (External):Fwd: Your Complaint Has Been Closed

Kari,

Thank you for getting back to me.

I believe the problem was that you claimed that you sent the notice back on December 30, 2025: Extension request guidelines, including the submission window of January 14 through March 13, 2026 to SolarTech. SolarTech was added to PowerClerk as being allowed access grants for this project. I have logged into PowerClerk and attached the screenshots showing that I'm the project owner applicant with the point of contact. The email in PowerClerk of the point of contact is joshua@sbrroofing.com. I have a ton of emails back and forth with DoNotReply@PowerClerk.com in regards to this project and notices. Ever since I have added SolarTech to the project, they also started getting the notices along with me. I have reached out to SolarTech and they claimed that they also did not receive the notice for the extension. Please check your notes. When you say that you sent the extension to the applicant of Record that you climbed was SolarTech, was wrong as the applicant is me with joshua@sbrroofing.com. I do find it interesting that the extension notice was apparently sent to

SolarTech and not to joshua@sbrroofing.com, but all other PowerClerk emails had us both listed. Unless the email did not come from PowerClerk?

I hope this clears of the confusion and you can find it in your heart to reinstate the NEM2.0 under the mistake that SCE made with PowerClerk.

Please see attached screenshots of PowerClerk showing my case.

Thank you,
Joshua Stewart

On Jun 8, 2026, at 6:08 AM, Kari Gardner <Kari.Gardner@sce.com> wrote:

Dear Mr. Stewart,

Thank you for your continued follow-up regarding your interconnection application and request for an extension under the NEM 2.0 program. I understand how important this project is to you, and I appreciate the opportunity to clarify the circumstances.

After a thorough review of your account and all related communications, I would like to provide additional context regarding the NEM 2.0 deadline, extension process, and how information was communicated.

First, for projects submitted through the interconnection process, all formal communications—including eligibility requirements, deadlines, and extension instructions—are provided to the Applicant of Record, which in this case was your contractor, SolarTech. As part of this process, SCE issued the following notices to contractors and installers:

- December 30, 2025: Extension request guidelines, including the submission window of January 14 through March 13, 2026
- January 13, 2026: Final reminder that all required documentation must be submitted by April 14, 2026 to remain eligible for NEM 2.0

Consistent with Rule 21 interconnection requirements, contractors are responsible for managing the application and communicating applicable requirements to their customers.

In addition to these contractor communications, our records show that SCE made direct outreach efforts to you. Most notably, on March 30, 2026, an Interconnection representative spoke with you and confirmed that the final deadline to submit required documents was April 14, 2026.

With respect to your extension request, it was received on March 27, 2026. While we understand your request was related to permitting delays, extension requests were required to be submitted by March 13, 2026 in accordance with the established program guidelines. Because your request was submitted after this deadline, it was not eligible for consideration.

Additionally, under Rule 21, extensions or reinstatements can only be granted in limited circumstances, such as when there is a documented SCE error that directly impacted the application. Based on our review, we did not identify any SCE-related error that contributed to the timing of your request or the project status.

We do understand your concerns regarding communication attempts and response times, and we recognize this can be frustrating—particularly when coordinating across multiple parties such as contractors and permitting agencies. However, SCE did make documented outreach attempts and successfully connected with you prior to the final program deadline.

At this time, we must apply the program rules consistently across all customers. As such, we are unable to grant an exception to reinstate the project under NEM 2.0.

While your project is no longer eligible for NEM 2.0, you may still proceed with interconnection under the current Solar Billing Plan, and our team would be happy to assist you and your contractor with next steps should you choose to move forward.

Thank you again for your time and for working with us through this process. Please let me know if you would like support in transitioning your project, or if you have any additional questions.

Sincerely,

Kari Gardner

Kari,

As you indicated in you letter. If I have any questions, you indicated that I can contact you directly. Is there a way that you can call met at 818-262-7473. I wanted to explain to you some of the concerns and problems that happened during the permit precess along with not getting a letter from SCE on a notice to extend the NEM 2.0 during a certain period. Had I received the letter we would not be in this situation.

Please call me at 818-262-7473 when you have a moment. I would appreciate that.

Thank You,
Joshua Stewart

Dear JOSHUA,

Southern California Edison has completed its investigation into your complaint.

You should have already spoken with or received an email from HENRY LAM,

who conducted a thorough review of your concerns, providing the results of their investigation. If your complaint was received in our office through the California Public Utilities Commission (CPUC), we will now submit the results of our investigation to them, and you can expect to hear from them directly regarding the outcome in the coming weeks.

If you have any additional questions or were not contacted during the course of the investigation, please don't hesitate to reach out to me directly. Thank you for allowing us the opportunity to address your concern.

Sincerely,

Kari Gardner
Manager of Consumer Affairs
Southern California Edison

Kari,

Checking back to see if you had a chance to receive my last response to your last email.

Please read my response bellow.

I'm going back through my emails and found this. I sent and email out to SCE, EDUARDO.ZUL@SCE.COM, & SolarBillingPlan@SCE.com, along with Solar Tech in regards to my project. In the letter SCE stated that I can contact SolarBillingPlan@sce.com and I did, with no response. This was within the time frame on the extension to which they never responded. I was at that time asking how to go about an extension not even knowing they offered one at the time because I never received a notice to be able to extend it. Again, we wouldn't be going back and forth if I had only known about the extension. I have done everything I could do as a SCE Customer but feel that the provider "SCE" has not provided the customer

with all the info to prevail.

I hope you can see that I'm now becoming the victim of the short fallings on SCE side and find it in you heart to agree.

Thanks
Joshua Stewart

EDUARDO.ZUL@SCE.COM

The SCE Engineer named below is conducting a technical review of your generation facility and may contact you if needed.

Engineer Name: Eduardo Jesus Zul
Engineer Email: EDUARDO.ZUL@SCE.COM

The information below is being provided for reference only. Detailed requirements for this specific project will be communicated to you directly by the SCE Engineer referenced above as needed. The intent of providing this information is to help facilitate an efficient technical review and avoid potential delays that may result from not addressing requirements that may be applicable to your project.

Please reference the Net Energy Metering Interconnection Handbook (sce.com) for applicable requirements.

For more information including NEM interconnection technical requirements please visit: www.sce.com/NEM.

In addition, please ensure that applicable requirements are met in the Electric Service Requirements and SCE Interconnection Handbook.

For New Construction, NEM-Aggregation, NEM-V-ST, MASH-VNM-ST/SOMAH-VNM Projects:
The new address must be unique (not already in use), match the permit address provided by the AHJ and ultimately, match the address to be requested for service with SCE. The unique service panel address in the AHJ permit must also match the address entered in the CPIS form, if applicable. If the address does not match, project delays may occur.

Mr. Stewart's email to the CPUC Consumer Affairs Branch, April 8, 2026, quoting SCE's denial of the extension request

From: Joshua Stewart <joshuaastewart@sbcglobal.net>
Sent: Wednesday, April 8, 2026 9:55 AM
To: consumer-affairs@cpuc.ca.gov <consumer-affairs@cpuc.ca.gov>
Cc: Net Metering <netmetering@solartechonline.com>
Subject: [External] NEM 2.0 with SCE

Dear CPUC,

I am asking for guidance or help with getting our Solar deadline extended with SCE to keep us under NEM 2.0.

I'm the owner of the project at 21603 Kyra Ct. Santa Clarita, Ca. 91390. I have been calling and leaving messages in regards to NST-473325. I have even emailed Customer.Generation@sce.com I'm asking to extend our deadline out for at least another month. If we could have two months that would be a blessing. We have experienced significant delays going through the permit precess. The City of Santa Clarita uses an outsourced agency (JAS Pacific) to go over the plans and review everything for the City of Santa Clarita. However, JAS Pacific does this for multiple City's and Counties in several states. They are taking longer then expected to get there work load done due to 2025 fires. This has prolonged us getting our final permits back so we can start construction. JAS Pacific web signs iswww://jaspacific.com so you can verify that they are who I say they are. That being said. The being said, I'm cuffed to how the City of Santa Clarita does there permitting. We started the permit process on 1-14-2026 and are within a week to a week a half to getting the permit pulled. I appreciate your support.

The Cause of the delay is due to City of Santa Clarita using an out side agency to do all there reviews of plans prior to pulling permits. That company JAS Pacific is the copy they outsource to. JAS Pacific is taking longer to get there findings back to the City of Santa Clarita for various reasons. The most common reason is due to the 2025 fires have created an infusion of more plans and permits to approve and go over then normal which has caused a delay. Again, we are only cuffed to the timely mater.

I have attached the supporting documents of the precess showing that Solar Tech, (The Installer) has been in works on getting the permit sense 1-14-26.

I sent this email out to Customer.Generation@sce.com back on 3-27-26. This is what they came back with. I have also attached the supporting email bellow stating this.

"Hi Joshua,
Thank you for your request regarding project NST- 473325.

After a thorough review, the request for extension for NST-473325 is **denied**.

The extension request cannot be considered because it was not submitted in accordance with the established guidelines and was received outside of the allowable submission window of January 14, 2026 through March 13, 2026.

Thank you,

SCE Customer Generation"

My problem with the response from SCE was that no one ever let the customer know that an extension was possible either through text, mail, or the Power Clerk portal that they use? Meanwhile I acutely did contact SCE during that time frame to ask for and extension not knowing that they offered it. By reaching out to the engineer: Eduardo Jesus Zul, Engineer Email: EDUARDO.ZUL@SCE.COM who is the direct contact for this project with SCE on two different occasions within the time frame of January 14, 2026 through March 13, 2026 deadline. To ask for an extension.

I have attached an email listed as “SCE Engineer Assigned. Pending Technical Review - NST-473325; 21603 Kyra Ct, Santa Clarita CA 91390” stating that Eduardo Jesus Zul, is the Engineer for SCE for this project.

I have also attached the email I sent to Eduardo Jesus Zul on 3-4-26 asking him to call me in regards to the ground mount system. He never did. I was wanting to find out about an extension at that time. Again that was within the time allowing for extensions between January 14, 2026 to March 13, 2026.

To sum it up, I signed a contract with Solar Tech on 10-15-25 and have we have been waiting for the permit for 4 months which is delayed due to the 2025 fire disaster in Altadena and Pacific Palisades Ca. This projects have impacted the Building & Safety precess and time frame with all the applications to rebuild. On top of that I have emailed or called either Customer.Generation@sce.com, EDUARDO.ZUL@SCE.COM, SCE-NEM Successor Tariff Phone: 866-600-6290. When I call, some times I will receive a call back about 10 days later. Under a few occasions they never called back. When I email Customer.Generation@sce.com, they would get back in about 10 days if at all. When I emailed Eduardo.sul@sce.com, He never got back on two occasions.

If you can guide me to any help on keeping this project going under NEM 2.0 or help with getting me to the person at SCE that I can talk to. That would be greatly appreciated. NEM 3.0 does not make financial sense for me.

If you should have any questions. Please call me at 818-262-7473

Thank You,

Joshua Stewart

SCE PowerClerk notice of June 22, 2026, request to SCE of June 24, 2026, and SCE reply of June 26, 2026

Outlook

RE: (External):Fw: [External] ACTION REQUIRED: Additional Information Needed - NST-473325

From Customer Generation <Customer.Generation@sce.com>
Date Fri 6/26/2026 1:01 PM
To Net Metering <netmetering@solartechonline.com>
Cc Net Metering <netmetering@solartechonline.com>

Hi,

Thank you for contacting **Customer Generation**.

The project is allotted five (5) business days to upload the Final Inspection (FI) starting from the date the updated communication was sent (06/22/2026), as below. If no additional documents are received within this timeframe, the application will be withdrawn without further opportunity to obtain Permission to Operate (PTO) on 06/30/2026.

Regards,
SCE Customer Generation

Hi SCE Team,

Kindly see the forwarded email below. May we request confirmation of the deadline for submitting the final inspection card?

Thank you and looking forward to your response.
Warm regards,

Ross Torres | Interconnection Specialist

ADDITIONAL INFORMATION REQUIRED

Joshua A Stewart
21603 Kyra Ct
Santa Clarita, CA 91390

Before we can finalize your Net Energy Metering (NEM) 2.0 application and grant your Permission to Operate (PTO), our team needs additional documentation.

Please complete the final requirements in the NEM Online Application System. Locate “Submit Final NEM Documents” and upload the requested documents listed below:

ADDITIONAL DOCUMENTS REQUIRED

Document Type	Attachment	Deficiency (if applicable)
Interconnection Agreement*:	JOSHUA STEWART-NEM_Agreement_(Form_16-344)_More_than_10kW (1) (1).pdf 1/6/2026 10:42:18 AM	
Final Inspection*:		This project is pending the Final Inspection from the Authority Having Jurisdiction. Please upload this document in Power Clerk.
Other Attachment(s):**	**NEM-ST:**	

*** Blank 'Issue Identified' indicates no correction needed.**

**** Other attachments may be required, depending on the program type selected in the application.**

Please refer to the NEM 2.0 Online Application System for the most recent status of your project. If you have any questions about your application, please direct them to your contractor or the application owner.

Thanks for being a partner in our shared energy future,

APPLICATION WITHDRAWN

Joshua A Stewart
21603 Kyra Ct
Santa Clarita, CA 91390

Your Net Energy Metering (NEM) 2.0 application has been withdrawn either due to unresolved issues or at the request of the application owner. The application is closed as of the date of this notice.
If you believe your application was withdrawn in error, you can contact us at 866-600-6290.
Please Note: In accordance with the NEM application fee policy you acknowledged prior to making payment, no refunds of the application fee are available for withdrawn applications.

Want to Reapply?

Effective April 15, 2023, NEM 2.0 is officially closed to all new applications. You are welcome to submit a new application for interconnection through the Solar Billing Plan (SBP) here.
For more information about the Solar Billing Plan, please visit:

- Residential Customers: sce.com/solarbillingplan
- Business Customers: sce.com/solarbillingplanbusiness

For any additional questions regarding this notice, please contact us via email at Customer.Generation@sce.com.

Best regards,
