#### PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

**Communications Division Broadband, Policy and Analysis Branch** 

RESOLUTION T-17429 March 27, 2014

#### <u>RESOLUTION</u>

Resolution T- 17429 Approval of Funding for the Grant Application of Sunesys, LLC, (U-6991 -C), from the California Advanced Services Fund (CASF) in the Amount of \$7,352,164 for the Connected Central Coast Unserved and Underserved Broadband Project

#### I. Summary

This Resolution approves funding in the amount of \$7,352,164 from the California Advanced Services Fund (CASF) for the CASF grant application of Sunesys, LLC, (Sunesys) for its Connected Central Coast Unserved and Underserved Broadband Project (Sunesys Project). The Sunesys Project will build a 91.18 mile middle-mile backhaul network from Santa Cruz to Soledad, and extend high-speed internet service to 430 square miles covering Castroville and the California Highway 156 (CA156) corridor towards Prunedale, Chualar, Gonzalez, Soledad and Salinas in the Central Coast. The proposed network will pass through 68 unserved and 1,069 underserved census blocks. This middle-mile infrastructure has the potential to service a number of unserved and underserved adjacent census blocks.

### II. Background

On December 20, 2007, the California Public Utilities Commission (Commission) in Decision (D.) 07-12-054 established the CASF program as a two-year program to provide funds for the deployment of broadband infrastructure in unserved and underserved areas in California.

On September 25, 2010, Governor Schwarzenegger signed Senate Bill (SB) 1040<sup>1</sup> which codified the CASF program and expanded it to include three accounts: (1) the Infrastructure Grant Account, (2) the Consortia Grant Account, and (3) the Revolving Loan Account. The latter two accounts are intended to address the needs that were

<sup>&</sup>lt;sup>1</sup>Stats. 2010, c. 317, codified at Public Utilities (P.U.) Code § 281.

unmet under the original CASF program. Specifically, the purpose of the Revolving Loan Account is "to finance capital costs of broadband facilities not funded by a grant from the Broadband Infrastructure Grant Account." SB 1040 also expanded the CASF fund from \$100 million to \$225 million with the addition of \$100 million to the Infrastructure Grant Account, and allocation of \$10 million and \$15 million to the Consortia Grant Account and the Revolving Loan Account, respectively.<sup>3</sup>

On February 1, 2012, the Commission approved D.12-02-015 to implement new guidelines for the Infrastructure Grant and Revolving Loan Accounts. Key provisions of the Decision include:

- A maximum CASF grant award of 70 percent of project costs for unserved areas and 60 percent for underserved areas;
- A definition of an underserved area, "where broadband is available, but no wireline or wireless facilities-based provider offers service at advertised speeds of at least 6 mbps download and 1.5 mbps upload;" and
- A Revolving Loan Program to provide supplemental financing for projects also applying for CASF grant funding (up to 20% of projects costs, with a maximum of \$500,000), utilizing the same project and applicant eligibility requirements as the Infrastructure Grant Program.

Consequently, on May 10, 2012, the Commission approved Resolution T-17362 which established the application deadlines for the CASF Broadband Infrastructure Grant Account and the Revolving Loan Account as follows:

- October 1, 2012, for unserved areas;
- February 1, 2013, for underserved areas not previously funded by the CASF and hybrid projects that cover both unserved and underserved areas; and,
- A date to be determined for projects in underserved areas where the existing broadband infrastructure was partially funded by a CASF grant.

On February 1, 2013, Sunesys submitted an application for CASF funding in the unserved and underserved area of Central Coast, covering 91.18 mile route from Santa Cruz to Castroville and the CA156 corridor towards Prunedale, Chualar, Gonzalez, Soledad and Salinas.

<sup>&</sup>lt;sup>2</sup> P.U. Code § 281(e).

<sup>&</sup>lt;sup>3</sup> P.U. Code § 281(b)(1).

# III. Notice/Protests

Communications Division (CD) staff posted the proposed area project map, census block groups (CBGs) and zip codes lists by county for the Sunesys Project on the Commission's CASF website page under "Pending New CASF Applications to offer Broadband as of February 11, 2013." CD received two challenges from Comcast Phone of California, LLC, on behalf of its affiliates (Comcast) and Verizon California, Inc., (Verizon) as described below, to the proposed project areas.

#### IV. Discussion

This Resolution adopts CD's recommended CASF funding award of \$7,352,164 for the Connected Central Coast Broadband Project. This award represents 60% of the pro-rated and adjusted total project cost of \$12,253,606. Key project information and maps are shown on pages A-1 through A-5 of Appendix A and Appendix B.

### A. Project Overview

Sunesys has held a Certificate of Public Convenience and Necessity (CPCN) (U-6991-C) since 2006, and offers fiber optic network construction and dark fiber network infrastructure connectivity. Sunesys owns and operates fiber networks in major metropolitan markets in the United States and is licensed to do business in twelve states including California. In addition, Sunesys leases dark fiber and managed private network services to a number of anchor institutions in the K-12, higher education, healthcare, enterprise, and telecommunications carriers in major metropolitan areas across the country.

In California, Sunesys owns and operates over 1,800 miles of fiber optic cable where much of the network was built to serve the K-12 communities across the State through the Universal Services Administration Company's E-Rate program serving 60 school districts. Other customers include healthcare institutions such as the City of Hope and major telecommunications carriers.

In its application, Sunesys contends that the proposed Sunesys Project area, located in Santa Cruz and Monterey Counties, consists of mostly underserved and some unserved areas that currently do not have access to wireline broadband service at served speeds and where wireless broadband speeds are less than 6 Mbps download and 1.5 Mbps upload. The economy in the area is based on tourism in the coastal regions and agriculture in the Salinas Valley. According to Sunesys, the Salinas Valley is the center for Monterey County's 3.8 billion dollar agriculture industry. However, the region faces many challenges. There are pockets of populations in poverty in North Monterey County and down the Salinas Valley, where most of the population lives. When completed, the

Sunesys Project will provide broadband backhaul access at speeds of up to 100 Gigabits per second (Gbps) per fiber strand from the City of Santa Cruz to the first major fiber point-of-presence (PoP) in the Salinas Valley at Soledad, and will partner with regional Internet Service Providers (ISPs) who provide last mile service to these communities.

The CBGs impacted by the project are listed in Appendix B.

The Sunesys Project installation will connect existing fiber from Sunnyvale to Santa Cruz and subsequently to Soledad, creating a fully redundant fiber service to the region with connectivity to major fiber PoP(s) in Sunnyvale and Soledad. Local service providers throughout the Central Coast will be able to connect to the middle-mile network to offer broadband to the communities in the area at or exceeding the 6 Mbps down and 1.5 Mbps up standard set by the CPUC. In addition, Sunesys will provide service to anchor institutions within the project area at significantly higher speeds than the CPUC standard.

According to Sunesys, several local last-mile service providers and local institutions have expressed interest in the project. Sunesys expects that as bandwidth demands continue to increase, additional last-mile service providers will lease connections. To gain backhaul access to the network, Sunesys will work to establish partnerships with service providers and other entities such as Surfnet, a last mile internet service provider; Cruzio, an internet, last mile and data center provider; the California Telehealth Network, California's statewide broadband network dedicated to healthcare; and the Central Coast Broadband Consortium (CCBCs), which works with the public and private sectors on broadband policy, economic initiatives, infrastructure funding and deployment. Additionally, Sunesys will focus to secure anchor institutions to gain access to the network, including Hartnell College and California State University (CSU) Monterey Bay.

Surfnet and Cruzio are two ISPs and last-mile carriers that have planned to partner with Sunesys and serve the Sunesys Project area. Surfnet plans to extend last-mile service in the communities of Paradise Road and Monterey Dunes in Northern Monterey County and is seeking CASF funding for these projects in a related, but separate application.

The Sunesys Project will have the potential to enable last-mile providers to serve up to 11,124 households in the Central Coast. There is also potential for the network to extend affordable bandwidth beyond individual households to businesses already in the area or businesses looking to move into the area.

The Sunesys Project commits to a five-year pricing plan, three years beyond the required two-years, starting from the initial date of service under the following terms:

Description	Monthly Recurring Rate
Lease of fiber by ISPs	\$1,550 for each two strands of fiber along
	the route (based on \$8.50 per fiber mile
	per month)
1 Gbps - 4 Gbps	\$700 / month first gig; \$400/month each
	additional gig
5 Gbps - 9 Gbps	\$2,000 / month five gigs; \$300/month
	each additional gig
10 Gbps +	\$3,000 / month ten gigs; \$2,000/month
	each additional 10 gigs
Charges for Lateral	Negotiated with the customers and are
connection to the	based on infrastructure, any splicing,
Project	termination, or equipment required for
	additional Lateral connection to the
	network

Sunesys has letters of support from the following local service providers, institutions, and government and community agencies.

- California State Assembly Districts 29 and 30
- Central Coast Broadband Consortium
- The Corporation for Education Network Initiatives in California (CENIC)
- City of Santa Cruz
- City of Watsonville
- County of Santa Cruz
- Cruzio
- California State University Monterey Bay
- Wireless Education & Technology, CSU Monterey Bay
- California Telehealth Network
- Hartnell College
- Monterey County
- RedShift Internet Services
- Steinbeck Innovation Foundation
- Surfnet Communications

### B. Project Qualification

To qualify under the CASF program, the applicant is required to submit proof that the area is unserved or underserved by submitting shapefiles of the proposed project. CD reviews the submitted shapefiles by comparing them with United States 2010 Census data

and the California Broadband Availability Map, which contains broadband availability data as of June 30, 2012. Once CD determines that the area is eligible either as an unserved or underserved area, CD staff evaluates all other information submitted by the applicant to determine if the project meets the requirements as outlined in D.12-02-015. Other information CD reviews includes: proof of a CPCN from the Commission; descriptions of current and proposed broadband infrastructure; number of potential subscriber households and average incomes; project construction schedule; project budget; proposed pricing and commitment period for new subscribers; and financial viability of the applicant.

As an initial step in the review of Sunesys's application, CD checked the CBGs as submitted in the project application and corrected the CBGs to conform to the 12-digit format and the 2010 Census. Sunesys agreed with these adjustments. Additionally, CD checked the CBGs submitted in the project application to determine that the project was indeed unserved and underserved. In doing so, CD found broadband availability at served speeds by Satellite providers such as Hughes, Skycasters LLC, ViaSat Communications, and Starband. However, as determined in D.12-02-015, the Commission does not consider satellite broadband service in CASF project evaluation, unless the satellite project in an area was previously funded by the CASF.<sup>4</sup> CD also found through the California Interactive Broadband Map (map) that the majority of the project area shows as served by mobile broadband providers such as Verizon and T-Mobile. CD requested Sunesys to conduct mobile speed tests in the project area. Sunesys conducted Mobile testing in June and again in November 2013, and the results showed that for the most part, the project area is underserved as further discussed below.

Comcast challenged the proposed project area on April 4, 2013. CD staff determined through the California Interactive Broadband Map that Comcast is indeed providing broadband availability at served speeds in the northern section of the project area in Census Blocks (CBs) 060530106061111, 060530106061191, 060530106061208, 060530106061219. Sunesys agreed to remove these served areas from its proposal and submitted the revised project area on April 4, 2013.

On March 11, 2013, Verizon challenged the application stating that wireless carriers continue to build-out their 4G LTE networks. Verizon's challenge was very vague and did not contain information sufficient to determine if Verizon was challenging the entire project proposal or just a specific area of the project. On March 27, 2013, CD staff requested that Verizon clearly identify what areas of the project, by census block, it was challenging and to provide CD with the following information: number of subscribers by

\_

<sup>&</sup>lt;sup>4</sup> This determination was based on the limited speed capabilities of satellite services, the cost to the consumer, high latency, and unreliability known at the time of the decision. (D. 12-02-015 at 13-15.) Since that time, like other technologies, satellite services have improved.

census block and speed tier, speed tests with a description on how the speed tests were conducted and what tools were used, and the addresses of the locations where the speed tests were performed to help determine if in fact the area is served. Verizon did not provide a response or any further information on the challenge and therefore CD staff considers Verizon's challenge unsubstantiated. On April 2, 2013, CD staff e-mailed Verizon confirming that Verizon did not provide a response and informed Verizon that CD will continue to consider the majority of the project as eligible for CASF funding.

Additionally, CD staff determined that there are other areas in the project that are categorized as served. These areas include the segment from Santa Cruz to Watsonville, an estimated 27 miles, and the segment from Watsonville to north of Prunedale, an estimated 3 miles, that are served by wireline at speeds greater than 6 Mbps download and 1.5 Mbps upload. However, these particular segments are necessary to extend existing fiber from Sunnyvale to Soledad. Sunesys asserts that these segments are primarily built to benefit the areas south of Prunedale and expects a higher demand for wholesale access to be provided to last mile providers in these southern parts. In D.12-02-015, the Commission established guidance for funding middle-mile projects where broadband infrastructure may have to pass served areas to reach an unserved or underserved area.<sup>5</sup> In these instances, the Commission directed that applicants pro-rate the costs of such facilities and provide detailed explanation of the cost allocation. Accordingly, Sunesys prorated the costs associated with these two segments to reflect the expected benefits these facilities will provide to the unserved and underserved areas.<sup>6</sup>

CD staff, through the map, also determined that mobile broadband providers T-Mobile and Verizon Wireless service the Cities of Gonzales and Chualar. The map shows field tests performed by the Commission<sup>7</sup> in the project area with speeds measuring at served levels. Sunesys performed its own tests using CalSPEED<sup>8</sup> in the area and the results show the majority of the test points with speeds at served levels in both Gonzales and Chualar. Their tests confirmed the availability of service, and as a result the area is considered served. Therefore, the costs associated with this segment, an estimated three miles, are prorated to reflect the expected benefits of the build out to unserved and underserved areas.<sup>9</sup> Sunesys provided an updated proposed project budget with prorated costs to account for the fiber backhaul going through these served areas.

<sup>5</sup>D. 12-02-015, Appendix 1 Section III, at 3

<sup>&</sup>lt;sup>6</sup> Sunesys estimates that 85% of the costs for the Santa Cruz to Watsonville segment and 45% of the costs for the Watsonville to north Prunedale segment are for the benefit of the unserved and underserved areas of the project, respectively.

<sup>&</sup>lt;sup>7</sup> CD validates advertised speeds by conducting drive tests at 2,000 points within the State.

<sup>&</sup>lt;sup>8</sup> CalSPEED is the Commission's mobile application that is used to test mobile broadband speeds.

<sup>&</sup>lt;sup>9</sup> Sunesys estimates that 45% of the costs for this segment are for the benefit of unserved and undeserved areas of the project.

Sunesys performed tests using CalSPEED on the remaining areas of Castroville, Moss Landing, Elkhorn and Prunedale. Specifically the map shows that T-Mobile serves the Castroville area. However, the tests performed by Sunesys on November 22, 2013 show actual speeds at underserved levels. Similarly in Moss Landing, the map shows that T-Mobile serves the area, but the majority of tests performed by Sunesys show actual speeds at underserved levels. The map also shows that mobile broadband providers Verizon, and in some parts, T-Mobile, serve the communities of Elkhorn and Prunedale, but the test results performed by Sunesys show otherwise. Moreover, the Commission's own mobile field test shows one test point in the area where Verizon's actual speeds are below served levels and T-Mobile's test shows "no service."

In the southernmost part of the Sunesys project, the city of Soledad shows as underserved by wireline and served by mobile broadband. However, CD has not been able to validate the maximum advertised mobile broadband speeds in the area. CD validates advertised speeds by conducting drive tests at 2,000 points within the state. There is one test point in Soledad, very close to Hwy 101, where actual speeds show less than 6 Mbps download/1.5 Mbps upload by the majority of mobile providers in the area: AT&T, Sprint, and Verizon. However, mobile provider T-Mobile shows actual speeds above 6 Mbps download/1.5 Mbps upload.¹¹¹ However, the T-Mobile 3rd round interpolated¹¹¹ average downstream speed in the area is estimated to be 4 Mbps downstream; below the served threshold. Additionally, Sunesys provided CD staff mobile test results that were performed in Soledad using a Verizon phone and the Commission's CalSPEED mobile test application that further confirms broadband availability at underserved speeds by Verizon Wireless and in some instances, at unserved speeds when the mobile tests were conducted indoors. CD staff therefore deemed the area as eligible for funding.

The original CASF funding requested by Sunesys was \$11,970,000, which is 90% of the total project cost of \$13,300,000. After adjusting and prorating the costs of the segments that go through served areas of Santa Cruz, Watsonville, Gonzales and Chualar, as discussed above, the project funding is reduced to \$7,352,164, representing a CASF grant equal to 60% of the pro-rated and adjusted total project cost of \$12,253,606.

Since Sunesys's submission of its CASF project application, Round 7 broadband data as of December 31, 2012, show maximum advertised mobile broadband availability from Verizon at speeds greater than 6 Mbps download and 1.5 Mbps upload in the proposed project area<sup>12</sup>. However, CD has not been able to validate the maximum advertised mobile

<sup>&</sup>lt;sup>10</sup> 3<sup>rd</sup> Round mobile field tests conducted in spring 2013.

<sup>&</sup>lt;sup>11</sup> CD inputs mobile test results into an interpolation model to predict speeds in an area.

<sup>&</sup>lt;sup>12</sup> On December 19, 2013, Round 8 broadband data as of June 30, 2013 became available in the CA Broadband Availability Map, after CD staff's completed its review and analysis of the numerous mobile tests conducted by the applicant in the project area in June and November 2013 and determination of eligible and not-eligible areas. Latest Commission mobile field tests show improvement of mobile speeds in the Elkhorn, Prunedale, Castroville and Soledad areas. However, the mobile test points vary by providers. Some mobile tests show some provides having mobile

broadband speeds in the area. CD validates advertised speeds by conducting drive tests at 2,000 points within the state. There are six test points in the eligible project area where actual speed test results during the fall 2012 mobile broadband drive test are more than 6 Mbps download and 1.5 Mbps upload. However, since the majority of test results conducted by Sunesys shows speeds less than 6 Mbps download or 1.5 Mbps upload in the area, it is unclear whether Verizon completely serves the project area. Additionally, as discussed above, Verizon did not provide a response or any further specific information when CD staff requested more details on the challenge in March 2013. For these reasons, CD staff considers the challenge unsubstantiated. Therefore, CD staff concludes that the remaining communities in the application are unserved or underserved at this time and eligible for CASF funding.

### C. Project Evaluation and Recommendation for Funding

CD evaluated the application with respect to the scoring criteria defined in D.12-02-015, Appendix 1, Section VIII (Scoring Criteria). The Scoring Criteria includes: (i) Funds Requested per Potential Customer, (ii) Speed, (iii) Financial Viability, (iv) Pricing, (v) Total Number of Households in the Proposed Area, (vi) Timeliness of Completion of Project, (vii) Guaranteed Pricing Period, and (viii) Low-Income Areas. In addition, five (5) bonus points are added to the score of an applicant that is able to submit local government and community endorsements or letters of support.

Staff recommends funding for this project because it has an above average overall score relative to other projects and will serve customers in unserved and underserved areas. The project scored high in the areas of funds requested per household, total number of households in the proposed area, speeds offered, pricing commitment, and strong community support. The estimated cost per household is \$661 with a total of 11,124 households in the project area; where an estimated 59 households are unserved. Additionally, Sunesys is offering maximum advertised speeds of 100 Gbps per second per fiber strand and a five year pricing commitment. The project encompasses many anchor institutions which may benefit from the deployment of high-speed Internet access in the area (See Appendix D).

The Sunesys Project has letters of support from many government organizations and foundations that stress the need for closing the digital gap for communities in the project area pertaining to education, healthcare, public safety and agricultural. Specifically for agriculture, the Steinbeck Innovation Foundation is working to build the world's first agtech cluster through education and advanced research. Having sufficient broadband capabilities in the area is critical and important to support agriculture innovation(s). A

speeds at served levels but at other mobile test points in the surrounding area, those same providers show speeds at underserved levels.

number of support letters also indicate the importance of expansion of healthcare services via broadband. Since more seniors are choosing to spend their retirement in this rural and semi-rural area, delivery of healthcare via broadband without sufficient broadband backhaul will be difficult.

The Sunesys Project will serve unserved and underserved areas and meets CASF funding requirements with respect to the following factors:

- Speed the proposed speed offering of over 100 Gbps complies with the benchmark set by the Commission
- Service area is determined to be unserved and underserved and covers 430 square miles
- Matching Funds the applicant has certified that the matching funds will come from their capital budget; the submitted balance sheet, income and cash flow statements show that the applicant is financially viable and has the financial capability to match the funds
- Price commitment period- the applicant has committed to a pricing plan of five years which is three additional years to the standard CASF two year commitment
- Deployment schedule the project will be completed within 24 months, within the Commission's required construction timeline

Sunesys, in its application and at subsequent meetings with CD staff, has claimed that a 90% CASF funding is necessary to provide last mile providers reasonable wholesale prices that will enable these last mile providers to provide affordable retail services to end users. Sunesys claimed that if CASF funding were to be reduced to 60%, it will have to charge higher prices for access to the middle mile network, and this could in turn lead to retail monthly recurring prices of \$65 to over \$100 for end use subscribers. In an email dated August 13, 2013, CD staff requested Sunesys to provide additional information to further substantiate its claims and whether it has explored other sources of funding for the project. Sunesys responded that there are no other sources of funding besides the planned Sunesys match and that Sunesys had looked for other sources of funding, such as the United States Department of Agriculture (USDA) Rural Utilities Service (RUS) Community Connect program and local redevelopment funds. However, according to Sunesys, it did not qualify for any funds that were available. Sunesys also stated that there were no tribes within the project area and as a result it could not apply for Tribal funds. Additionally, the Sunesys Project does not qualify for the Federal Communications Commission (FCC) Connect America Fund since it is a middle-mile project.

In its September 9, 2013 response to CD's questions regarding the need for a higher percentage funding, Sunesys provided a table detailing the payback period at various

price points for 90% versus 60% CASF grant funding scenarios, assuming 15 entities subscribe for wholesale service (see Appendix C). As shown in the summary table below, with a 90% CASF grant, Sunesys is able to charge a price of \$8.50 per fiber mile per month with a payback period of less than 5 years. If the Commission reduced the CASF funding to 60%, Sunesys would have to charge four times the proposed pricing or \$34 per fiber mile per month in order to recoup its investment within the same payback period. Sunesys stated that for this project to be viable to the company, a payback period of less than 60 months must be achievable. At 60% CASF funding and pricing of \$8.50 per fiber mile per month, the projected payback period amounts to 19 years. Originally, Sunesys claimed that a payback period of longer than 5 years would not provide Sunesys with a sound business plan to achieve an appropriate payback on its invested capital. However, after pro-rating the cost of the segments transiting served areas, Sunesys agreed to a payback period of 8 years versus 5 years, assuming that CASF funding is at 83% of the initial total project cost of \$13,300,000.

Price per fiber mile per	60% funding Payback	90% funding	83% funding
month	Period (Months)	Payback Period	Payback Period
		(Months)	(Months)
\$8.50	228.8	57.2	97.7
\$11	176.8	-	-
\$34	57.2	-	-

Sunesys, in its September 9, 2013 response, also included a letter from Surfnet dated September 3, 2013, which stated that if Sunesys raises its rates for fiber mile from \$8.50 to \$11 per month, Surfnet will have to increase its end users' monthly recurring rates from \$65 to \$85. Surfnet contends that any increase above \$11 per month per fiber mile will likely push monthly recurring rates to \$100 or above, which is an unrealistic price that households within the project are less likely to pay. Based on the socioeconomic demographics in the project area, CD staff anticipates that an increase in monthly recurring prices may reduce subscribership in the area where there is a relatively high unemployment rate and where 16.1% of the population lives below poverty level in 2008 to 2012. If Sunesys were to charge \$34 per fiber mile per month, it is likely that Surfnet will not be able to pursue the project because it will have to increase the price to end users so high that the take rate will not make the project financially viable.

As a result of the additional information provided by Sunesys, CD staff understands Sunesys' position that a higher level of CASF funding is needed for its project to move forward. It proposes a five year wholesale pricing commitment to last-mile providers at \$8.50 per fiber mile per month. This proposed pricing represents a significant reduction

<sup>&</sup>lt;sup>13</sup> For unemployment rates see Monthly Labor Force Data for Cities and Census Designated Places: <a href="http://www.labormarketinfo.edd.ca.gov">http://www.labormarketinfo.edd.ca.gov</a>. Poverty level between 2008 to 2012 was 16.1% for Monterey County, but within the project area, it is mostly higher. (See <a href="http://quickfacts.census.gov/qfd/states/06/06053.html">http://quickfacts.census.gov/qfd/states/06/06053.html</a>

over the standard rates Sunesys charges in other markets that includes \$60 - \$65 fiber per mile per month on a three to five year contract. Further, given the lack of other available sources of funding for the project, as attested by Sunesys, a higher CASF funding of the total project costs is necessary in order to keep prices for access to the middle mile network at reasonable rates. However, CD staff is constrained by program requirements and recommends CASF funding at the maximum allowed for unserved and underserved areas as set forth in D.12-02-015. Sunesys has informed CD staff that it will not be willing to take on this project without CASF funding of at least 83% of the total project costs of \$13,300,000, because a smaller funding percentage on this project will take too long to receive a viable return on the invested capital.

CD staff finds that funding the Sunesys Project is for the public benefit and aligns with CASF's goal to encourage the deployment of high-quality advanced information and communications technologies to all Californians to promote economic growth, job creation, and substantial social benefits. This project will benefit emergency services and a number of anchor institutions in the K-12, higher education, healthcare, enterprise, agricultural sector and telecommunications carriers. Based on its review, CD determined that the Sunesys Project grant application qualifies for funding as an unserved and underserved area. The social benefits of this project extend to agricultural areas and low income communities and can benefit numerous first responders, schools and community anchor institutions.

### D. Safety Impact

This project will improve connectivity to the surrounding areas and many anchor institutions. Sunesys will provide a robust middle-mile network to local ISPs, which will in return, enable them to offer affordable and reliable services to anchor institutions, emergency first responders and other public agencies. The high speed Internet connections will facilitate the transmission of data and communications amongst first responders and the public. There are many community anchor institutions in the project area such as the sheriff's office, fire department, schools, library, and ambulance services that will potentially benefit from the project. For a complete list of these anchor institutions, please see tables 1 thru 3, in Appendix D.

According to Sunesys, this project will build a middle-mile that is important to the migration to Next Generation (NG) 9-1-1 as well as the functioning of the emergency first responders. It will provide a pathway to the Internet for Santa Cruz and Monterey Counties. This path will be an option for all local ISPs to provide redundancy on services they provide to customers in the proposed service area.

The Sunesys Project could prove to be of critical value during natural disasters because it includes areas with high flood hazards and high earthquake occurrences and it is important to have reliable systems in place when and if a disaster strike.

### V. Compliance Requirements

Sunesys should comply with all the guidelines, requirements, and conditions associated with the granting of CASF funds as specified in D.12-02-015. Such compliance includes, but is not limited to:

### A. California Environmental Quality Act (CEQA)

The Sunesys Project is subject to the California Environmental Quality Act (CEQA) review. The Commission must complete CEQA review prior to disbursing CASF funds for construction activities.

Prior to any construction activity, the carrier is required to seek further authority from the Commission for such activity by filing a Proponent's Environmental Assessment (PEA) pursuant to Commission Rule of Practice and Procedure 2.4, and must undergo an environmental review pursuant to the California Environmental Quality Act (CEQA). (California Public Resources Code § 21000, et seq.) Carriers should contact the Supervisor of the Commission's Energy Division CEQA Unit well in advance of a contemplated filing to (a) consult with staff regarding the process of developing and filing a PEA; (b) provide for cost recovery per Rule of Practice and Procedure 2.5; and (c) enter into a Memorandum of Understanding to allow the Energy Division to initiate the retention of an environmental contractor to perform the environmental review.

Carriers may file a completed CEQA review conducted by another agency acting as the Lead Agency pursuant to CEQA; carriers should make every effort to ensure that the Commission's CEQA Unit is aware of and included in the CEQA process if it is conducted by another agency acting as the CEQA Lead Agency. Carriers should contact the Supervisor of the Commission's Energy Division CEQA Unit well in advance of a contemplated filing to consult with staff regarding the applicability of another agency's CEQA review.

### B. Deployment Schedule

The Commission expects Sunesys to complete the project in 24 months from the start date. If the applicant is unable to complete the proposed project within the 24-month timeframe identified in its application, Sunesys must notify CD's Director as soon as it becomes aware of this prospect. The Commission may reduce payment for failure to notify CD's

Director and timely complete the project. In D.12-02-015, the Commission required complete build-out of a CASF-funded project within 24 months from approval of the application.

### C. Execution and Performance

CD staff and the CASF grant recipient shall determine a project start date after the CASF grant recipient has obtained all approvals. Should the recipient or contractor fail to commence work at the agreed upon time, the Commission, upon five (5) days written notice to the CASF recipient, reserves the right to terminate the award.

In the event that the CASF recipient fails to complete the project, in accordance with the terms of approval granted by the Commission, the CASF recipient must reimburse some or all of the CASF funds that it has received.

The CASF grant recipient must complete all performance under the award on or before the termination date of the award.

#### D. Performance Bond

The Commission requires a Performance Bond if the applicant certifies that the percentage of the total project costs it is providing comes from their capital budget and is not obtained from outside financing. A performance bond will be required from Sunesys if the project's matching funds do not come from its capital budget.

#### E. Price Commitment Period

The minimum required price commitment period for broadband service to all households within the project area is two years. Sunesys guarantees the price of service offered in the project area for five years.

### F. Project Audit

The Commission has the right to conduct any necessary audit, verification, and discovery during project implementation and construction to ensure that CASF funds are spent in accordance with Commission approval.

The recipient's invoices will be subject to a financial audit by the Commission at any time within three (3) years of completion of the work.

### G. Providing Voice Service

If the grantee is providing voice service in the project area, it must meet the Federal Communications Commission (FCC) standards for E-911 service and utilize battery backup Power. However, Sunesys will not be providing voice service.

### H. Reporting

Grantees must submit quarterly progress reports on the status of the project irrespective of whether grantees request reimbursement or payment. Before full payment of the project, the CASF recipient must submit a project completion report. Progress reports shall use both the schedule for deployment; major construction milestones and costs submitted in the proposals, indicate the actual date of completion of each task/milestone as well as problems and issues encountered, and the actions taken to resolve these problems and issues during project implementation and construction; and identify future risks to the project. Recipients shall also include test results on the download speed and upload speed per CBG and per ZIP Code basis in the final completion report. Recipients must certify that each progress report is true and correct under penalty of perjury.

#### I. Submission of Form 477

The FCC currently requires broadband providers to submit Form 477 biannually and include speed data. While there is an imperfect match between the current reporting areas for the Form 477 and CASF, Form 477 information will be useful in documenting CASF deployment for the specific new service area(s) of the carrier. CASF recipients shall submit a copy of their Form 477 data directly to the Commission, under General Order 66-C, when they submit this data to the FCC for a five year period after completion of the project.<sup>14</sup>

### VI. Payments to CASF Recipients

Submission of invoices from and payments to Sunesys shall be made in accordance with Section XI of Appendix 1 of D.12-02-015 and according to the guidelines and supporting documentation required in that decision.

Payment to Sunesys shall essentially follow the process adopted for funds created under P. U. Code § 270. The following table describes the timeline for processing CASF payments.

Event	Payment Cycle 1	Payment Cycle 2	
Event	(Day/Month)	(Day/Month)	

<sup>&</sup>lt;sup>14</sup> Approval of the California Advanced Services Fund (CASF) Application Requirements and Scoring Criteria for Awarding CASF Funds (2008) Cal. P.U.C. Res. No. T-17143 at 4.

Invoices due from Sunesys to CD	5 <sup>th</sup> of Month 1	20 <sup>th</sup> of Month 1
Payment letters from CD to Administrative Services <sup>15</sup>	On 19 <sup>th</sup> of Month 1	On 4 <sup>th</sup> of Month 2
Invoices submitted from Administrative Services to State Controller's Office (SCO) for payments	20 <sup>th</sup> through 26 <sup>th</sup> of Month 1	5 <sup>th</sup> through 13 <sup>th</sup> of Month 2

Sunesys may submit its invoices under Payment Cycle 1 or 2.

If any date in this payment schedule falls on a weekend or holiday, that date will be advanced to the next business day but the remaining dates in the payment schedule will remain unchanged. The State Controller's Office (SCO) requires 14 to 21 days to issue payment from the day that requests are received by SCO.

#### VII. Comments on Draft Resolution

In compliance with P.U. Code § 311(g), a notice letter was emailed on February 4, 2014, informing all applicants filing for CASF funding and parties on the service list of R.06-06-028 and the CASF distribution list of the availability of the draft of this Resolution for public comments at the Commission's website http://www.cpuc.ca.gov/PUC/documents/. This letter also informed parties that the final conformed Resolution adopted by the Commission will be posted and will be available at this same website.

<sup>&</sup>lt;sup>15</sup> The above schedule is contingent on the CASF recipient submitting clear, complete, and error-free invoices to CD. Additional time to process payments may be necessary if CD finds problems with the submitted invoices.

### VIII. Findings

- 1. On May 10, 2012, the Commission approved Resolution T-17362 which established the application deadlines for the CASF Broadband Infrastructure Grant Account and the Revolving Loan Account as follows: October 1, 2012, for unserved areas; February 1, 2013, for underserved areas not previously funded by the CASF and hybrid projects that cover both unserved and underserved areas; and, a date to be determined for projects in underserved areas where the existing broadband infrastructure was partially funded by a CASF grant.
- 2. Sunesys filed an application for CASF funding for its Connected Central Coast Project on February 1, 2013. The Sunesys Project will build a 91.18 mile middle-mile backhaul network from Santa Cruz to Soledad and extend high-speed internet service to 430 square miles covering Castroville and the CA156 corridor towards Prunedale, Chualar, Gonzalez, Soledad and Salinas in Central Coast. The proposed network will pass through 1,232 unserved and 445 underserved census blocks. This backhaul has the potential to service a number of unserved and underserved adjacent census blocks.
- 3. This expansion will have the potential to enable last mile providers to bring high speed Internet access to 11,124 households in the Central Coast area. The CBGs impacted by the project are specified in Appendix B.
- 4. CD posted the map, CBGs and zip codes lists by county for the Sunesys Project on the Commission's CASF website page under "Pending New CASF Applications to Offer Broadband as of February 11, 2013." CD received challenges from Comcast and Verizon to the proposed project areas. Verizon asserted that it provides Internet service in this area at served speeds. However, Verizon did not respond to CD staff inquiries to validate its challenge, and neither CD staff's mobile drive tests nor the interpolation model based on these tests validated Verizon's maximum advertised speed in the updated project area; therefore CD staff considers the challenge unsubstantiated.
- 5. CD reviewed and analyzed data submitted for the Sunesys Project CASF grant application to determine the project's eligibility for CASF funding. This data includes, but is not limited to: proof of a CPCN from the Commission; descriptions of current and proposed broadband infrastructure; geographic information system (GIS) formatted shapefiles mapping the subject areas; assertion that the area is unserved and underserved; number of potential subscriber households and average incomes; project construction schedule; project budget; proposed pricing and commitment period for new subscribers; and financial viability of the applicant.

- 6. CD reviewed the submitted shapefiles which mapped the proposed broadband deployment using United States 2010, Census data and the California Broadband Availability Map, which contains broadband availability data as of June 30, 2012. This helped to verify the existence or non-existence of broadband service areas and broadband speeds, where available.
- 7. Based on its review, CD determined that the project qualifies for funding under D.12-02-015 and recommends Commission approval of CASF funding for the Sunesys Project.
- 8. CD staff revised and reduced the CASF funding to \$7,352,164 for the Sunesys Project after pro-rating the costs associated with the middle-mile segments that transit served areas of Santa Cruz, Watsonville, Gonzales, and Chualar. This revised amount represents 60% of the pro-rated and adjusted total project cost of \$12,253,606.
- 9. Sunesys has stated that a higher level of CASF funding is needed for the project to move forward. However, CD staff is constrained by program requirements and recommends CASF funding at the maximum allowed for unserved and underserved areas as set forth in D.12-02-015.
- 10. At 60% CASF funding and at the proposed wholesale price of \$8.50 per fiber mile per month it would take Sunesys 19 years to realize its return on investment. To make the project financially viable in a 5 year period, Sunesys has estimated that it will need to charge last mile providers a higher wholesale price of at minimum \$34 per fiber mile per month.
- 11. A higher wholesale price above the \$8.50 per fiber mile per month will negatively impact existing CASF last-mile project proposals in the area from ISP Surfnet that proposes to bring broadband service to 398 households in Monterey County.
- 12. Sunesys is required to post a performance bond if all the project's matching funds do not come from its existing capital budget.
- 13. Sunesys is required to comply with all guidelines, requirements, and conditions associated with the granting of CASF funds as specified in D.12-02-015 and must submit the FCC Form 477, as specified in Resolution T-17143.
- 14. Sunesys proposes to conduct all work in 24 months.
- 15. This project is subject to the California Environmental Quality Act (CEQA) review and must abide by the requirements set forth in the CEQA Section of this Resolution.

- 16. A notice letter was emailed on February 4, 2014, informing all applicants filing for CASF funding, parties on the service list of R.06-06-028, and the CASF distribution list of the availability of the draft of this Resolution for public comments at the Commission's website http://www.cpuc.ca.gov/PUC/documents/. This letter also informed parties that the final conformed Resolution adopted by the Commission will be posted and available at this same website.
- 17. The Commission finds CD's recommendation to fund the Sunesys Project as summarized in Appendix A to be reasonable and consistent with Commission orders and, therefore, adopts such recommendation.

### THEREFORE, IT IS ORDERED that:

- 1. The Commission shall award from the CASF to Sunesys up to \$7,352,164 for the Sunesys LCC unserved and underserved area broadband project as described herein and summarized in Appendix A of this Resolution.
- 2. The program fund payment of up to \$7,352,164 for this unserved and underserved project shall be paid out of the CASF fund in accordance with the guidelines adopted in D.12-02-015 and in accordance with the compliance of avoidance measures described in this Resolution.
- 3. Payments to the CASF recipient shall be in accordance with Section XI of Appendix 1 of D.12-02-015 and in accordance with the process defined in the "Payments to CASF Recipients" section of this Resolution.
- 4. Sunesys shall post a performance bond if the project's matching funds do not come from its capital budget.
- 5. The CASF fund recipient, Sunesys, shall comply with all guidelines, requirements and conditions associated with the CASF funds award as specified in D.12-02-015 and must submit the FCC Form 477, as specified in Resolution T-17143.

This Resolution is effective today.

I hereby certify that this Resolution was adopted by the Public Utilities Commission at its regular meeting on March 13, 2014. The following Commissioners approved it:

PAUL CLANON Executive Director

## APPENDIX A Resolution T- 17429 Sunesys, Inc. Project Key Information

Project Name	Sunesys, Inc., Project			
This project will build a 91.18 mile middle-mile backhaul network from Santa Cruz to Soledad, and extend high-speed internet service to 430 square miles covering portions of the Central Coast between Salinas an Soledad in Santa Cruz and Monterey Counties. The proposed network will pass through 1,232 unserved and 445 underserved census blocks. Additionally, we believe this backhaul has the potential to service a number of unserved and underserved adjacent census blocks.				
Project Size (in square miles)		430		
Download / upload speed (in Mbps)		100 Gbps
