[18602]

R.18-04-019

PROPOSED OUTCOME:

- Find that communities, referred to as Disadvantaged Vulnerable Communities (DVCs), require special attention when utilities make infrastructure, operational and service changes for climate adaptation, and consist of: The 25% highest scoring census tracts according to the California Communities Environmental Health Screening Tool (CalEnviroScreen), all California tribal lands, census tracts with median household incomes less than 60% of state median income, and census tracts that score in the highest 5% of Pollution Burden within CalEnviroScreen.
- Requires energy investor-owned utilities (collectively "IOUs") to lead community engagement with DVCs and develop plans as IOUs develop vulnerability assessments due to climate change.
- Directs IOUs to submit vulnerability assessments every 4 years according to their General Rate Case cycles that focus on climate risks to operations and service as well as assets; options for dealing with vulnerabilities; exposure to climate risk of facilities IOUs have third-party contracts with for power, capacity, or reliability; green and sustainable remedies; and how to promote equity in DVCs. The key time frame to be considered by the vulnerability assessments will be the next 20–30 years.
- This proceeding remains open.

SAFETY CONSIDERATIONS:

- Climate adaptation planning improves the safety and resiliency of energy utility operations and infrastructure over time.

ESTIMATED COST:

- Costs will be considered in General Rate Case or other proceedings.
