Energy Safety's Recommended Additional WMP requirements

ATTACHMENT 2

2021 Review of Additional Requirements for Wildfire Mitigation Plans

Public Utilities Code (Pub. Util. Code) § 8389(d) requires the California Public Utilities Commission (Commission), after consultation with the Office of Energy Infrastructure Safety (Energy Safety),[1] to adopt and approve the following:

1. Performance metrics for electrical corporations.
2. Additional requirements for wildfire mitigation plans.
3. A wildfire mitigation plan compliance process.
4. A process for the division to conduct annual safety culture assessments for each electrical corporation.

This document constitutes Energy Safety's consultation regarding Pub. Util. Code § 8389(d)(2), additional requirements for wildfire mitigation plans (WMPs).

Energy Safety does not recommend any additional requirements for 2022 WMP filings.

[1] Pursuant to Public Utilities Code Section 326(b), on July 1, 2021, the WSD transitioned from the Commission into the Office of Energy Infrastructure Safety under the California Natural Resources Agency. Energy Safety "is the successor to" and "is vested with all of the duties, powers, and responsibilities of the Wildfire Safety Division" (Government Code Section 15475). WSD is used to describe the work of the Wildfire Safety Division prior to July 1, 2021. Energy Safety is used to describe the work of Energy Safety beginning on July 1, 2021. Any references to WSD action post July 1, 2021, or to Energy Safety action prior to July 1, 2021, are inadvertent and should be interpreted as the actions of WSD or Energy Safety as appropriate.
