CPUC REMINDS CONSUMERS OF NEW 350 AREA CODE COMING TO THE 209 AREA CODE REGION

SAN FRANCISCO, June 28, 2022 - The California Public Utilities Commission (CPUC) today reminded consumers that the new 350 area code will soon be available in the existing 209 area code region. Beginning November 28, 2022, customers in the 209 area code overlay region may be assigned a number in the new 350 area code when they request new service or an additional line.

With new telephone numbers in the 209 area code region in high demand, the CPUC in May 2022 approved adding a new 350 area code to overlay the existing 209 area code region. An area code overlay adds a second area code to the geographic region served by the existing area code. Therefore, the new 350 area code will serve the same geographic area currently served by the 209 area code.

The 209 area code serves all or portions of Alameda, Alpine, Amador, Calaveras, El Dorado, Fresno, Madera, Mariposa, Merced, Sacramento, San Joaquin, Stanislaus, and Tuolumne counties. It encompasses cities such as Angels Camp, Atwater, Ceres, Dos Palos, Escalon, Galt, Gustine, Hughson, Ione, Lathrop, Livingston, Lodi, Los Banos, Manteca, Merced, Modesto, Newman, Oakdale, Patterson, Plymouth, Ripon, Riverbank, Sonora, Stockton, Tracy, Turlock, and Waterford. The 209 area code also covers Yosemite National Park and Kirkwood Mountain Resort.

Customers in the 209 area code overlay region who request new service or an additional telephone line may be assigned a number in the new 350 area code starting on November 28, 2022. Customers receiving a 350 area code will be required to dial 1 + the area code and phone number for all local calls, just as customers with telephone numbers from the 209 area code do today.

Below are some key facts about the 209/350 area code overlay:
• Telephone numbers, including the current area code, will not change.
• The price of a call, coverage area, or other rates and services will not change due to the overlay.
• What is a local call now will remain a local call.
• Customers in the overlay region will continue to dial 1+10 digits for local calls within and between the overlay area codes, and 1+10 digits for long distance calls.
• Customers still can dial just three digits to reach 911, as well as 211, 311, 411, 511, 611, 711, or 811 if those are currently available in their community.

Customers should continue to identify their telephone number as a 10-digit number (3-digit area code + 7-digit telephone number), and include the area code when giving the number to friends, family, business associates, and others. Customers should ensure their websites, personal and business stationery and printed checks, advertising materials, contact information, and personal or pet ID tags include the area code.

Customers should ensure that all services, automatic dialing equipment, or other types of equipment recognize the new 350 area code as a valid area code and should continue to store or program telephone numbers as 10-digit numbers. Some examples include but are not limited to: stored telephone numbers in contact lists in wireless or cordless phones, PBXs, fax machines, Internet dial-up numbers, speed dialers, call forwarding settings, voicemail services, medical alert devices, safety alarm security systems and gates, ankle monitors, and/or other similar equipment.

For more information, please contact your local telephone service provider or visit www.cpuc.ca.gov/209areacode.

The CPUC regulates services and utilities, protects consumers, safeguards the environment, and assures Californians’ access to safe and reliable utility infrastructure and services. For more information on the CPUC, please visit www.cpuc.ca.gov.
