

**PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA****SAFETY POLICY DIVISION**

**Item #12 (Rev.1)**  
**Resolution SPD-28**  
**January 16, 2025**

**R E S O L U T I O N**

**RESOLUTION SPD-28 Resolution Ratifying Action of the Office of  
Energy Infrastructure Safety on Bear Valley Electric Service's 2025  
Wildfire Mitigation Plan Update Pursuant to Public Utilities Code  
Section 8386.3(a).**

---

This Resolution ratifies the attached Decision (Appendix A hereto) of the Office of Energy Infrastructure Safety (Energy Safety) approving Bear Valley Electric Service's (BVES or electrical corporation) 2025 Wildfire Mitigation Plan (WMP) Update pursuant to Public Utilities Code (Pub. Util. Code) Section 8386.3(a).

This Resolution acts on the WMP submitted July 22, 2024,<sup>1</sup> pursuant to the Commission's obligations under Pub. Util. Code Section 8386.3(a). BVES's WMP responds to a list of 23 requirements set forth in Pub. Util. Code Section 8386(c). BVES submitted a comprehensive WMP in 2023 covering the three-year period 2023–2025. That WMP filing focused on measures the electrical corporation will take to reduce the risk of, and impact from, a catastrophic wildfire related to its electrical infrastructure and equipment. BVES's 2025 WMP Update provides information on BVES's progress over the past year as well as its 2024 and 2025 projections. In addition, the 2025 WMP Update responds to any additional requirements and metrics approved by the Commission in Resolutions SPD-26 and SPD-27 as well as the 2025 WMP Update Guidelines<sup>2</sup> adopted by Energy Safety.

Upon approval [of the 2025 WMP Update by Energy Safety,] the [C]ommission shall ratify the action of [Energy Safety].”

---

<sup>1</sup> Resubmitted July 22, 2024, following a Rejection and Order to Resubmit and subsequent errata request, discussed later in this resolution.

<sup>2</sup> Energy Safety's 2025 Wildfire Mitigation Plan Update Guidelines (adopted Jan. 2024, published Feb. 2024):  
<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true>.

**OUTCOME SUMMARY:**

- Ratifies the attached Decision of Energy Safety to approve the 2025 WMP Update of BVES.
- Does not approve costs attributable to WMPs, as Pub. Util. Code Section 8386.4(b) requires electrical corporations to seek and prove the legitimacy of all expenditures at a future time in their general rate cases (GRC) or other applications for cost recovery.
- Does not establish a defense to any enforcement action for a violation of a Commission decision, order, or rule.

**SAFETY CONSIDERATIONS:**

Mitigation of catastrophic wildfires in California is among the most important safety challenges the Commission-regulated electrical corporations face. Comprehensive WMPs are essential to safety because the WMPs articulate an electrical corporation's understanding of its utility-related wildfire risk and the proposed actions to reduce that risk and prevent catastrophic wildfires caused by utility infrastructure and equipment.

Utility-related catastrophic wildfire risk should be reduced over time by implementing measures such as vegetation management, system hardening (such as undergrounding power lines, covering conductors on overhead lines and removing or upgrading equipment most likely to cause fire ignition), making grid topology improvements (such as installation and operation of electrical equipment to sectionalize or island portions of the grid), improving asset inspection and maintenance, increasing situational awareness (such as cameras, weather stations, and use of data to predict areas of highest fire threat), improving community engagement and awareness, and other measures.

**ESTIMATED COST:**

- Costs are not considered in this Resolution, as Pub. Util. Code Section 8386.4(b) provides for Commission cost review in a utility GRC or separate application. Nothing in this Resolution should be construed as approval of the costs associated with the WMP mitigation efforts.
- For illustrative purposes, Table 1, below, contains BVES's actual costs for 2020–2022 and its projected costs for the implementation of wildfire mitigation efforts in its 2023–2025 WMP.

**Table 1: BVES's 2023-2025 WMP Costs<sup>3</sup>**

Costs by Year	Costs \$USD
Actual 2023 costs	\$ 28,208,014
Proposed 2024 costs	\$ 23,148,479
Proposed 2025 costs	\$ 38,763,075
Actual 2020–2022 WMP 3-year total costs	\$ 36,474,000
Difference between 2020-2022 Actual and 2023–2025 Actual/Proposed costs (+/-)	+\$ 53,645,568
Proposed 2023–2025 WMP 3-year total costs	\$ 90,119,568

## **DISCUSSION**

### **1. Summary**

This Resolution ratifies the attached Energy Safety Decision, issued on October 21, 2024, (Decision) approving the 2025 WMP Update submitted by BVES on July 22, 2024 (Appendix A hereto).<sup>4</sup> Pub. Util. Code Section 8386(c) requires that an electrical corporation's WMP contain 23 elements. Energy Safety's approval and the Commission's ratification do not relieve the electrical corporation from any otherwise applicable permitting, ratemaking, or other legal and regulatory obligations.

### **2. Background**

Since several catastrophic wildfires in the San Diego area in 2007, the equipment of electrical utilities the Commission regulates has been implicated in the most devastating wildfires in our state's history. The California Legislature enacted several measures requiring electrical corporations to submit, Energy Safety to review, approve, or otherwise act on, and the Commission to ratify, WMPs designed to reduce the risk of utility-related catastrophic wildfire. Catastrophic wildfires in 2017–2019 led the

<sup>3</sup> From DATA REQUEST SPD\_BVES\_2024\_002.

<sup>4</sup> BVES's 2025 WMP Update can be found at <https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57056&shareable=true>.

California Legislature to pass Senate Bill 901<sup>5</sup> in 2018 and its successor Assembly Bill (AB) 1054,<sup>6</sup> as well as AB 111 in 2019.<sup>7</sup>

AB 1054 requires Energy Safety to review and approve or deny electrical corporations' WMPs, with Commission ratification of any approval to follow thereafter. Energy Safety oversees electrical corporations' compliance with the WMP.<sup>8</sup> If Energy Safety determines an electrical corporation is not in compliance with its approved WMP, it may recommend that the Commission pursue an enforcement action against the electrical corporation for noncompliance with its approved plan.<sup>9</sup> The Commission may assess penalties on electrical corporations if they fail to substantially comply with their plans.<sup>10</sup>

### **3. 2025 WMP Update Evaluation Process**

The wildfire mitigation statute requires a three-year WMP and permits Energy Safety to require only a WMP update in the year following the three-year WMP period. Pursuant to Public Utilities Code Section 8386(b),

Each electrical corporation shall annually prepare and submit a wildfire mitigation plan to the Wildfire Safety Division for review and approval. In calendar year 2020, and thereafter, the plan shall cover at least a three-year period. The division shall establish a schedule for the submission of subsequent comprehensive wildfire mitigation plans, which may allow for the staggering of compliance periods for each electrical corporation. In its discretion, the division may allow the annual submissions to be updates to the last approved comprehensive wildfire mitigation plan; provided, that each electrical corporation shall submit a comprehensive wildfire mitigation plan at least once every three years.

On January 26, 2024, Energy Safety issued a schedule allowing electrical corporations to submit updates to their WMPs in 2024, after requiring a comprehensive WMP for the preceding three-year periods.

On April 4, 2024, BVES submitted its 2025 WMP Update. It provided an overview of the WMP in a public workshop on April 25, 2024. Comments to Energy Safety on the WMPs were due on May 7, 2024, and reply comments were due on May 21, 2024. Comments were provided by California Department of Fish and Wildlife and Public Advocates

<sup>5</sup> Stats. 2018, Ch. 626.

<sup>6</sup> Stats. 2019, Ch. 79.

<sup>7</sup> Stats. 2019, Ch. 81.

<sup>8</sup> Pub. Util. Code Section 8386.3(c).

<sup>9</sup> Pub. Util. Code Section 8389(g).

<sup>10</sup> Pub. Util. Code Section 8386.1.

Office at the California Public Utilities Commission and reply comments were provided by BVES. Energy Safety evaluated these comments, concurred with some, and in some instances made responsive changes to its Decision to incorporate stakeholder input.

On May 14, 2024, Energy Safety issued a Rejection and Order to Resubmit Notice requiring BVES to address critical issues and modify its 2025 WMP Update.<sup>11</sup> The Rejection Notice asked BVES to, remove unreportable changes, per the Guidelines, regarding its 2024 targets and 2024 expenditures, capture significant updates to risk models discussed in the 2025 WMP Update in a redline of its 2023–2025 Base WMP, and correct discrepancies observed between the 2025 WMP Update and the 2023–2025 Base WMP. BVES submitted the required response to the Rejection Notice on May 29, 2024. Comments were due on June 10, 2024, and reply comments were due on June 17, 2024. No comments were provided.

On July 15, 2024, Energy Safety released a Notice of Errata for BVES to correct substantive and non-substantive errors to its revised 2025 WMP Update. Required changes included updates to 2025 Targets or Target Completion Dates, Initiative Objectives, and Expenditure Change to match data request responses.<sup>12</sup> BVES submitted this final revision of the 2025 WMP Update following the Notice of Errata on July 22, 2024. Comments were due August 5, 2024. No comments were provided.

On August 29, 2024, Energy Safety published a draft Decision approving BVES's 2025 WMP Update for public comment.<sup>13</sup> Comments on the draft Decision were due on September 16, 2024, and reply comments were due on September 26, 2024. No Comments were provided.

On October 21, 2024, Energy Safety issued its final Decision approving BVES's WMP.<sup>14</sup> The Decision noted that BVES provided an update on the Radford line project which was

<sup>13</sup> Available on the 2023–2025 Wildfire Mitigation Plan (2023-2025-WMPs) docket log at: <https://efiling.energysafety.ca.gov/EFiling/DocketInformation.aspx?docketnumber=2023-2025-WMPs>.

<sup>14</sup> Available on the 2023–2025 Wildfire Mitigation Plan (2023-2025-WMPs) docket log at: <https://efiling.energysafety.ca.gov/EFiling/DocketInformation.aspx?docketnumber=2023-2025-WMPs>.

previously calculated as BVES's most risky circuit. The covered conductor project was held up by permitting delays which have since been resolved. Additionally, the Decision designated areas for continued improvement focusing on grid design, operations, and maintenance. These included the future use of risk modeling to prioritize covered conductor and other grid hardening projects as well as the inclusion of a timeline for covered conductor inspection.

#### **4. Notice**

In accordance with Pub. Util. Code Section 8386(d), notice of BVES's 2025 WMP Update was given by posting the WMP on Energy Safety's web page at [2025 Wildfire Mitigation Plan Updates | Office of Energy Infrastructure Safety \(ca.gov\)](https://efiling.energysafety.ca.gov/EFiling/DocketInformation.aspx?docketnumber=2023-2025-WMPs).<sup>15</sup>

#### **5. Energy Safety Approval of 2025 WMP Update**

The Public Utilities Code requires Energy Safety to review, request revision, and approve or deny a utility's WMP. Energy Safety approved the 2025 WMP Update for BVES pursuant to Public Utilities Code Section 8386.3 and submitted it to the Commission for ratification. According to Energy Safety's Decision, attached hereto as Appendix A, Energy Safety reviewed the WMP and considered input from the California Department of Forestry and Fire Protection and stakeholders, responses to data requests, and responses to ongoing reporting required in connection with previous WMP submissions and decisions. Energy Safety also applied a "maturity model" to test whether electrical corporations are improving or "maturing" in their response to catastrophic wildfire over time.

We take official notice that Energy Safety approved BVES's 2025 WMP Update in its final Decision on BVES's 2025 WMP Update on October 21, 2024, pursuant to Commission Rules of Practice and Procedure 13.10 and California Evidence Code Section 452(c). Parties may address the propriety of taking such notice in comments on this Draft Resolution.

#### **6. Ratification**

The Commission has reviewed BVES's 2025 WMP Update, Energy Safety's evaluation of BVES's 2025 WMP Update, the Decision issued by Energy Safety pursuant to Pub. Util. Code Section 8386.3, stakeholder comments served on Energy Safety's 2025 WMP Update docket, and other public input. Pursuant to Pub. Util. Code Section 8386.3(a), the Commission ratifies Energy Safety's action approving BVES's 2025 WMP Update.

---

<sup>15</sup> Available on the 2023–2025 Wildfire Mitigation Plan (2023-2025-WMPs) docket log at: <https://efiling.energysafety.ca.gov/EFiling/DocketInformation.aspx?docketnumber=2023-2025-WMPs>.

While the Commission is ratifying Energy Safety's action approving BVES's WMP Update, a CPUC decision approving a GRC may authorize a revenue requirement for wildfire risk mitigation programs and activities for a year covered by the WMP that differ from those approved in this WMP. If the wildfire risk mitigation programs and activities in a utility's approved WMP differ from those authorized in a GRC, the utility may need to file with Energy Safety an appropriate request to address differences in the approved WMP and approved GRC.

## 7. Wildfire Mitigation Costs

Pursuant to statute, an electrical corporation's costs associated with wildfire mitigation activities are not approved as part of its WMP; rather, costs are evaluated in each electrical corporation's GRC or other application for rate recovery.

The Commission will evaluate 2023–2025 wildfire mitigation costs in BVES's GRC or in a future application.

## 8. Conclusion

Consistent with Pub. Util. Code Section 8386.3(a), the Commission ratifies Energy Safety's Decision (Appendix A hereto) approving BVES's 2025 WMP Update.

## COMMENTS

Pub. Util. Code Section 311(g)(1) provides that resolutions must be served on all parties to a proceeding and subject to at least 30 days' public review. However, given that this Resolution ~~was~~<sup>is</sup> issued outside of a formal proceeding, interested stakeholders ~~did~~<sup>do</sup> not need party status in a Commission proceeding in order to submit comments. Comments ~~were~~<sup>are</sup> due 20 days from the mailing date of this Resolution. Replies ~~were~~<sup>will</sup> not ~~be~~ accepted.

This ~~draft~~ Resolution ~~was~~<sup>will be</sup> served on the service list of R.18-10-007 and the parties that submitted comments on the WMP to Energy Safety and placed on the Commission's agenda no earlier than 30 days from its mailing date. ~~No comments will be accepted.~~

Comments on the ~~draft~~ Resolution were due on January 2, 2025. No comments were received.

## FINDINGS

1. The Office of Energy Infrastructure Safety reviewed and approved Bear Valley Electric Service's 2025 Wildfire Mitigation Plan Update pursuant to Public Utilities Code Section 8386.3(a) (Appendix A hereto).

2. Public Utilities Code Section 8386.3(a) provides that “After approval [of the 2025 Wildfire Mitigation Plan by the Office of Energy Infrastructure Safety,] the [C]ommission shall ratify the action of [Energy Safety].”

**THEREFORE, IT IS ORDERED THAT:**

1. The Office of Energy Infrastructure Safety’s Decision approving Bear Valley Electric Service’s 2025 Wildfire Mitigation Plan Update is ratified.
2. Nothing in this Resolution should be construed as approval of the costs associated with the implementation of Bear Valley Electric Service’s 2025 Wildfire Mitigation Plan Update.
3. The Commission takes official notice that the Office of Energy Infrastructure Safety approved Bear Valley Electric Service’s 2025 Wildfire Mitigation Plan Update in its Decision on Bear Valley Electric Service’s 2025 Wildfire Mitigation Plan Update on October 21, 2024, pursuant to Commission Rules of Practice and Procedure 13.10 and California Evidence Code Section 452(c).
4. Nothing in this Resolution should be construed as a defense to any enforcement action for a violation of a Commission decision, order, or rule.

This Resolution is effective today.

I certify that the foregoing resolution was duly introduced, passed, and adopted at a conference of the Public Utilities Commission of the State of California held on January 16, 2025; the following Commissioners voting favorably thereon:

---

RACHEL PETERSON  
Executive Director

## **APPENDIX A**

### **OFFICE OF ENERGY INFRASTRUCTURE SAFETY DECISION**

October 21, 2024

To: Stakeholders for the Bear Valley Electric Service, Inc. 2025 Wildfire Mitigation Plan Update

Enclosed is the Decision of the Office of Energy Infrastructure Safety (Energy Safety), approving the Bear Valley Electric Service, Inc. (BVES) 2025 Wildfire Mitigation Plan (WMP) Update.

On August 27, 2024, Energy Safety published a draft of this Decision for public review and comment.<sup>1</sup> Opening comments on the draft Decision were due on September 16, 2024, and reply comments were due on September 26, 2024.

No stakeholder comments were received during either of these comment periods. Energy Safety made non-substantive changes to correct typographical errors in the text.

If BVES seeks to change its approved 2025 mitigation initiative targets, it must submit a change order request within 10 business days of Energy Safety's issuance of this Decision for BVES's 2025 WMP Update. See Section 12 of Energy Safety's 2023-2025 WMP Process and Evaluation Guidelines<sup>2</sup> for further instructions and criteria for submitting a change order request.

Sincerely,

Tony Marino  
Acting Deputy Director | Electrical Infrastructure Directorate  
Office of Energy Infrastructure Safety

# 1. Executive Summary

The Office of Energy Infrastructure Safety (Energy Safety) works to ensure electrical corporations take effective actions to reduce utility-related wildfire risk.

This Decision approves Bear Valley Electric Service, Inc.'s (BVES's) 2025 Wildfire Mitigation Plan (WMP) Update, resubmitted May 29, 2024, pursuant to a Rejection and Order to Resubmit, and revised July 22, 2024.

In rendering this Decision Energy Safety considered and, in some cases, incorporated comments from stakeholders and members of the public.

BVES provided a total of 50 reportable updates in its 2025 WMP Update. These include two updates to risk models; 17 changes to targets, objectives, and projected expenditures; 14 changes to 2025 quarterly inspection targets; two new programs, and 14 reports on progress required for areas for continued improvement and one interim update.

The above-listed updates encompass five initiative categories. These include risk methodology and assessment; wildfire mitigation strategy development; grid design, operations, and maintenance; vegetation management and inspections; and situational awareness and forecasting.

Energy Safety evaluated BVES's 2025 WMP Update and finds several strengths. For example, BVES continued to integrate new technologies to improve its risk methodology, vegetation management assessments, and situational awareness. These technologies, such as advancing risk mapping through the addition of fire potential index, with quantitative data, integrated into existing modeling software, aim to improve Public Safety Power Shutoff protocols as well as mitigation selection. Further, BVES reported notable progress on the Radford Line upgrades, by securing the necessary permits with the United States Forest Service thus progressing a wildfire mitigation project on its highest risk circuit and only asset in a designated Tier 3 high fire threat district.

BVES also has areas of its WMP that can be further developed and improved. Overall, BVES has 10 areas for continued improvement for which it is required to demonstrate progress in its 2026-2028 Base WMP submittal. These include reporting on covered conductor project prioritization, processes for quality checks, evaluations of efficiencies found in new programs, and transparency in risk trade-off in risk mitigation selection.

## 2. Introduction and Background

Bear Valley Electric Service, Inc. (BVES) submitted its 2023-2025 Wildfire Mitigation Plan (2023-2025 Base WMP) in 2023.<sup>1</sup> Energy Safety approved BVES's 2023-2025 Base WMP on November 6, 2023. On April 1, 2024, BVES submitted its 2025 Wildfire Mitigation Plan Update (2025 WMP Update). On July 22, 2024, BVES submitted its revised 2025 WMP Update<sup>2</sup> to its 2023-2025 Base WMP in accordance with Energy Safety's 2025 Wildfire Mitigation Plan Update Guidelines (2025 WMP Update Guidelines)<sup>3</sup> and Energy Safety's 2023-2025 Wildfire Mitigation Plan Process and Evaluation Guidelines (WMP Process Guidelines).<sup>4</sup>

On May 14, 2024, Energy Safety issued a Rejection and Order to Resubmit<sup>5</sup> for the BVES 2025 WMP Update and received the resubmitted 2025 WMP Update<sup>6</sup> on May 29, 2024.

Pursuant to Public Utilities Code section 8386.3(a), this Decision approves the BVES's 2025 WMP Update to its 2023-2025 Base WMP.

---

<sup>1</sup> In accordance with [Energy Safety's 2023-2025 Wildfire Mitigation Plan Technical Guidelines \(December 6, 2022\)](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=53286&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=53286&shareable=true, accessed April 9, 2024).

<sup>6</sup> BVES Resubmission (May 29, 2024) ([Bear Valley Electric Service 2025 Wildfire Mitigation Plan Update Revision 1](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56740&shareable=true), [Bear Valley Electric Service 2023-2025 Wildfire Mitigation Plan 2025 Revision 1 \[redlined\]](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56742&shareable=true), [Bear Valley Electric Service 2023-2025 Wildfire Mitigation Plan 2025 Revision 1 \[clean\]](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56741&shareable=true)) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56740&shareable=true, accessed July 1, 2024), (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56742&shareable=true, accessed July 1, 2024), (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56741&shareable=true, accessed July 1, 2024).

## 2.1 Consultation with California Department of Forestry and Fire Protection

The Office of the State Fire Marshal is part of the California Department of Forestry and Fire Protection (CAL FIRE). Public Utilities Code section 8386.3(a) requires Energy Safety to consult with the Office of the State Fire Marshal in reviewing electrical corporations' WMPs and WMP Updates. The Office of the State Fire Marshal provided consultation and input into Energy Safety's evaluation, but this Decision is an action of Energy Safety and not the Office of the State Fire Marshal or CAL FIRE.

## 2.2 Stakeholder Comments

Energy Safety invited stakeholders, including members of the public, to provide comments on the electrical corporations' 2025 WMP Updates and Revision Notices. Opening comments on BVES's 2025 WMP Update were due on May 7, 2024, and reply comments were due on May 17, 2024.

Energy Safety also accepted stakeholder comments on BVES's resubmitted 2025 WMP Update. Opening comments were due on the resubmitted 2025 WMP Update on June 10, 2024, and reply comments were due June 17, 2024.

Opening comments on BVES Notice on Errata were due on August 8, 2024.

See Appendix C for lists of stakeholders and members of the public who submitted comments, including a summary of comments Energy Safety concurred with and incorporated into its evaluation.

### 3. Energy Safety 2025 WMP Update Evaluation Process

Energy Safety issued the following guidelines for electrical corporations' 2025 WMP Updates:

- **2025 Wildfire Mitigation Plan Update Guidelines (January 2024)** (hereafter 2025 WMP Update Guidelines), which sets forth reportable updates and general instructions for each electrical corporation's 2025 WMP Update.
- **2023-2025 Wildfire Mitigation Plan Process and Evaluation Guidelines (Revised January 2024)** (hereafter WMP Process Guidelines), which outlines the process for Energy Safety's evaluation of WMPs, details the public participation process, and establishes submission requirements for the electrical corporations.
- **2023-2025 Electrical Corporation Wildfire Mitigation Maturity Model (Revised January 2024)** and **2023-2025 Electrical Corporation Wildfire Mitigation Maturity Survey (Revised February 2024)** (hereafter Maturity Model and Maturity Survey), which together provide a quantitative method for assessing electrical corporation wildfire risk mitigation capabilities and examining how electrical corporations continue to improve in key areas of their WMPs.<sup>7, 8</sup>

#### 3.1 Reportable Updates

Energy Safety's 2025 WMP Update Guidelines delineate the following five categories of updates that the electrical corporations are required to report:<sup>9</sup>

1. Updates to risk models
2. Updates to approved targets, objectives, and projected expenditures<sup>10</sup>
3. Quarterly inspection targets for 2025 for vegetation management and asset inspections

---

<sup>7</sup> [Energy Safety's 2023-2025 Electrical Corporation Wildfire Mitigation Maturity Model \(revised and adopted Jan. 2024, published Feb. 2024\) \(hereafter Maturity Model\)](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56256&shareable=true)

(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56256&shareable=true>, accessed May 6, 2024).

<sup>8</sup> [Energy Safety's 2023-2025 Electrical Corporation Wildfire Mitigation Maturity Survey \(adopted Jan. 2024, revised and published Feb. 2024\) \(hereafter Maturity Survey\)](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56306&shareable=true)

(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56306&shareable=true>, accessed May 6, 2024).

<sup>9</sup> [2025 WMP Update Guidelines](#), "Reportable Updates," p. 3

(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true>, accessed May 6, 2024).

<sup>10</sup> Energy Safety's WMP evaluation and decision on a WMP is not an approval of, or agreement with, costs listed in the WMP.

4. New or discontinued programs
5. Progress on areas for continued improvement

The 2025 WMP Update Guidelines direct electrical corporations that they may not include any updates in their 2025 WMP Update that do not fall under one of these categories.<sup>11</sup>

The 2025 WMP Update Guidelines further direct that if an electrical corporation does not have any updates that fall within any of the above categories, it must affirm that it has no reportable updates for 2025 and that the information provided in its 2023-2025 Base WMP is current and accurate.<sup>12</sup>

## 3.2 Maturity Model and Survey

Energy Safety used the Maturity Model<sup>13</sup> and the electrical corporations' 2023 and 2024 responses to the Maturity Survey<sup>14</sup> to assess the maturity of each electrical corporation's wildfire risk mitigation program.<sup>15</sup>

The Maturity Model consists of 37 individual capabilities describing the ability of electrical corporations to mitigate wildfire risk and Public Safety Power Shutoff (PSPS) risk within their service territory.<sup>16</sup> The 37 capabilities are aggregated into 7 categories.<sup>17</sup> Maturity levels range from 0 (below minimum requirements) to 4 (beyond best practice). For each electrical corporation, Energy Safety calculated maturity levels for each capability, each category, five

---

<sup>11</sup> [2025 WMP Update Guidelines](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true), p. 3 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true, accessed March 29, 2024).

<sup>12</sup> [2025 WMP Update Guidelines](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true), p. 3 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true, accessed March 29, 2024).

<sup>13</sup> [Maturity Model](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56256&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56256&shareable=true, accessed May 6, 2024).

<sup>14</sup> [Maturity Survey](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56306&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56306&shareable=true, accessed May 6, 2024).

<sup>15</sup> Energy Safety revised the 2023-2025 Electrical Corporation Wildfire Mitigation Maturity Model and Maturity Survey in January 2024. The revisions did not result in any changes to Maturity Survey questions, therefore the responses from 2024 are directly comparable to the responses from 2023. See the Maturity Survey issued by Energy Safety to the electrical corporations in 2023:

[Revised Final 2023 Electrical Corporation Wildfire Mitigation Maturity Survey \(April 24, 2023\)](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=53708&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=53708&shareable=true, accessed May 6, 2024)

<sup>16</sup> [Maturity Model](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56256&shareable=true), Section 1, "Introduction" (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56256&shareable=true, accessed April 9, 2024).

<sup>17</sup> [Maturity Model](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56256&shareable=true), Section 3.1, "Capabilities and Categories" (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56256&shareable=true, accessed April 9, 2024).

cross-category themes, and the overall WMP, based on the electrical corporation's answers to Maturity Survey questions and the scoring system described in the Maturity Model.<sup>18</sup>

Appendix E summarizes BVES's 2024 Maturity Survey results and changes in BVES's maturity compared to its 2023 Maturity Survey results.

### 3.3 Areas for Continued Improvement

Energy Safety's Decisions on the 2023-2025 Base WMPs focused on each electrical corporation's strategies for reducing the risk of utility-related ignitions. In those Decisions, Energy Safety identified areas where the electrical corporation must continue to improve its wildfire mitigation capabilities in future plans. For some areas, the electrical corporation was required to report its progress in its 2025 WMP Update. Energy Safety discusses the results of its evaluation of the electrical corporation's progress in each of those areas in Sections 5 through 9 of this Decision.

### 3.4 Errata

Energy Safety requested BVES submit a new version of its 2025 WMP Update and revised 2023-2025 Base WMP incorporating corrections to non-substantive and substantive errata identified by Energy Safety. In response, BVES submitted corrected versions of its 2025 WMP Update and revised 2023-2025 Base WMP on July 22, 2024.<sup>19, 20</sup> The corrected versions fixed errors in the 2025 targets and objectives tables, provided justifications for projected expenditure changes, and resolved other copyediting errors.

Energy Safety considered BVES's corrected versions of its 2025 WMP Update and revised 2023-2025 Base WMP in its evaluation.

---

<sup>18</sup> [Maturity Model](#), Section 4, "Maturity Level Determination" (<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56256&shareable=true>, accessed April 9, 2024).

<sup>19</sup> [Notice on Errata for BVES 2025 WMP Update](#) (<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57028&shareable=true>, accessed July 23, 2024).

<sup>20</sup> BVES Submission: [BVES's 2025 WMP Update \(July 22, 2024\)](#), [BVES's 2023-2025 Base WMP \(redlined\) \(July 22, 2024\)](#), [BVES's 2023-2025 Base WMP \(clean\) \(July 22, 2024\)](#) (<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true>, accessed July 23, 2024), (<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57057&shareable=true> accessed, July 23, 2024), (<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57056&shareable=true> accessed, July 23, 2024).

### 3.5 Revision Notice

Public Utilities Code section 8386.3(a) states, “Before approval, [Energy Safety] may require modifications of the [WMP].” If Energy Safety requires modifications to a WMP, it does so by issuing a Revision Notice to an electrical corporation.<sup>21</sup>

Energy Safety did not issue BVES a Revision Notice for its 2025 WMP Update.

### 3.6 Decision

In its evaluation of an electrical corporation’s 2025 WMP Update, Energy Safety considers the information provided by the electrical corporation regarding its reportable updates and the associated justifications. Energy Safety’s approval of a 2025 WMP Update constitutes collective approval of the reported items in the electrical corporation’s 2025 WMP Update. The approval therefore authorizes the updates to the electrical corporation’s 2023-2025 Base WMP, as shown in the “Redlined 2023-2025 Base WMP” and “Clean Updated 2023-2025 Base WMP” provided as part of the electrical corporation’s 2025 WMP Update submission.<sup>22</sup>

Energy Safety recognizes that planning for wildfire risk is a maturing capability and expects that electrical corporations will continue to improve year over year. Therefore, Energy Safety’s Decision includes areas for continued improvement, identifying areas where the electrical corporation must continue to mature in its capabilities.

BVES’s reported updates reduce risk, increase efficiencies, and demonstrated a commitment to incorporating new technologies and continuing collaboration. Therefore, Energy Safety approves BVES’s 2025 WMP Update.

Energy Safety invited stakeholders, including members of the public, to provide comments on Energy Safety’s draft Decision for BVES’s 2025 WMP Update (published for comment on August 27, 2024). No stakeholders or members of the public provided comments, as noted in Appendix D.

(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56255&shareable=true>, accessed May 6, 2024).

<sup>22</sup> [2025 WMP Update Guidelines](#), pp. 3-4  
(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true>, accessed March 29, 2024).

## 4. BVES 2025 WMP Update

In accordance with the 2025 WMP Update Guidelines,<sup>23</sup> BVES provided the following for its 2025 WMP Update submission:

1. **2025 WMP Update:** A standalone 2025 WMP Update document that describes BVES's reportable updates, or confirmation of no updates to the approved 2023-2025 Base WMP.
2. **Redlined 2023-2025 Base WMP:** A redlined version of BVES's 2023-2025 Base WMP showing reportable updates to the approved 2023-2025 Base WMP.
3. **Clean Updated 2023-2025 Base WMP:** A clean, updated copy of BVES's 2023-2025 Base WMP (i.e., without any updates marked in redline) incorporating the reportable updates from BVES's 2025 WMP Update as demonstrated in the redlined version.

Specifically, in response to the five categories of reportable updates of the 2025 WMP Update Guidelines, BVES provided the required information for each category. Energy Safety discusses each reportable update under the relevant mitigation initiative in Sections 5 through 9 of this Decision.

---

<sup>23</sup> [2025 WMP Update Guidelines](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true, accessed May 6, 2024).

## 5. Overview of the Service Territory

In its 2025 WMP Update, BVES did not report any updates to the overview of the service territory section of its 2023-2025 Base WMP.

## 6. Risk Methodology and Assessment

In its 2025 WMP Update, BVES reported significant risk model updates, as discussed below.<sup>24</sup>

### 6.1 Risk Model Updates

BVES reported the following significant risk model updates:

- The development of two third-party modeling tools, which BVES is in the process of implementing. This includes updates to the following components of BVES's wildfire risk model:
  - Ignition likelihood (including equipment, vegetation, and contact-from-object)
  - Wildfire spread likelihood
  - Wildfire hazard intensity
  - Wildfire exposure potential
  - Wildfire vulnerability
  - PSPS exposure potential
  - PSPS vulnerability

BVES also stated it intends to implement a Fire Potential Index (FPI) model as part of its operational decision-making.

Energy Safety finds that these updates meet the reportable update criteria set forth in the 2025 WMP Update Guidelines.<sup>25</sup>

#### 6.1.1 Energy Safety Evaluation

As a result of these significant risk model updates, BVES's wildfire mitigation prioritization has not yet changed as BVES is still in the process of integrating and adopting these models and plans to do so by the third quarter of 2024.<sup>26</sup>

---

<sup>24</sup> [2025 WMP Update Guidelines](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true), Section 1, "Updates to Risk Models," p. 6 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true, accessed May 6, 2024).

<sup>25</sup> [2025 WMP Update Guidelines](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true), "Reportable Updates," p. 3 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true, accessed May 6, 2024).

<sup>26</sup> [BVES's 2023-2025 Base WMP \(redlined\)](#) (July 22, 2024), p. 71 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57057&shareable=true accessed, July 23, 2024).

Although not yet fully implemented, in response to these risk model updates, Energy Safety finds the updates could provide improvements for BVES's risk analysis. This includes integration of additional data when evaluating ignition likelihood, such as conductor characteristics, transformer condition, pole condition, and various vegetation characteristics.<sup>27</sup> Additionally, BVES's plan for integrating FPI potentially allows BVES to have greater clarity on variables impacting operational and PSPS decisions. This is due to added transparency on BVES's decision-making through its FPI and its various components.

### 6.1.2 Areas for Continued Improvement

Energy Safety has no new areas for continued improvement for BVES in the risk methodology and assessment section. In its 2026-2028 Base WMP, BVES must report its progress on any existing areas for continued improvement specified in Energy Safety's Decision on BVES's 2023-2025 Base WMP.<sup>28</sup>

## 6.2 2023 Areas for Continued Improvement

As required by Energy Safety's Decision on BVES's 2023-2025 Base WMP,<sup>29</sup> BVES reported its progress on three areas for continued improvement in the risk methodology and assessment section in its 2025 WMP Update.

### 6.2.1 BVES-23B-02.<sup>30</sup> PSPS and Wildfire Risk Trade-Off Transparency

In its Decision on BVES's 2023-2025 Base WMP, Energy Safety found that BVES did not provide enough transparency on how it balances the trade-offs between PSPS and wildfire risks when determining mitigation selection.<sup>31</sup> As a result, BVES was required to describe how it

---

<sup>27</sup> [BVES's 2023-2025 Base WMP \(redlined\)](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57057&shareable=true) (July 22, 2024), Appendix B, pp. 464-468 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57057&shareable=true accessed, July 23, 2024).

<sup>28</sup> Energy Safety's [Decision on Bear Valley Electric Service, Inc.'s 2023-2025 Wildfire Mitigation Plan](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023) (hereafter referred to as Decision on BVES's 2023-2025 Base WMP), pp. 73-81 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>29</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 73-75 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>30</sup> Energy Safety is instituting a new naming convention for its areas for continued improvement. Moving forward, areas for continued improvement identified in Energy Safety's evaluation of Base WMPs will be designated with a "B" and areas for continued improvement identified in Energy Safety's evaluation of WMP Updates will be designated with a "U." Accordingly, areas for continued improvement that were identified in Energy Safety's evaluation of 2023-2025 Base WMPs are retitled "23B" and new areas for continued improvement identified in Energy Safety's evaluation of 2025 Update WMPs herein are titled "25U."

<sup>31</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 73-74 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

prioritizes PSPS risks within its risk-based decisions, as well as how the rank order of its mitigation initiatives based on PSPS risk in comparison to wildfire risk.

In response, BVES stated wildfire risk as the main contributing factor for its risks and until recent new model inclusion it had limited availability to evaluate its PSPS risk.<sup>32</sup> This is partially due to BVES not having had a PSPS event at the time of evaluation of the 2025 WMP Update.

BVES further stated with the additional models that have PSPS risk evaluation capabilities and FPI, it plans to determine utility risk using a combination of wildfire risk and PSPS risk.<sup>33</sup> The models were still under evaluation for full integration and implementation at the time of submission, therefore BVES does not have concrete details on how PSPS risk affects overall risk.

### **6.2.1.1 Energy Safety Evaluation**

Given its dependence on new model implementation and further data tracking and analysis, BVES must continue to improve in this area and report how it has made additional progress in its 2026-2028 Base WMP.

Section 11 provides all areas for continued improvement for BVES, including the specific required progress that BVES must address in its 2026-2028 Base WMP.

## **6.2.2 BVES-23B-04. Cross-Utility Collaboration on Risk Model Development**

In its Decision on BVES's 2023-2025 Base WMP, Energy Safety found that BVES and other investor-owned utilities (IOUs)<sup>34</sup> must continue participating in the Energy Safety-led risk modeling working group, as established by the 2021 WMP Action Statements.<sup>35</sup>

---

<sup>32</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 13 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>33</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 13 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>34</sup> The IOUs include Pacific Gas and Electric Company (PG&E), Southern California Edison Company (SCE), San Diego Gas and Electric Company (SDG&E), Bear Valley Electric Service (BVES), Liberty Utilities (Liberty), and PacifiCorp.

<sup>35</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 74-75 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

In response, BVES discussed its continued participation in the risk modeling working group meetings. BVES noted that progress on this area for continued improvement resulted in reportable updates to its 2023-2025 Base WMP.<sup>36</sup>

### 6.2.2.1 Energy Safety Evaluation

BVES sufficiently responded to this area for continued improvement; no further reporting is required on this area for continued improvement in BVES's 2026-2028 Base WMP.

## 6.2.3 BVES-23B-05. Collaboration Between Vendor and Utility Risk Teams

In its Decision on BVES's 2023-2025 WMP, Energy Safety required BVES to demonstrate how it differentiates between activities completed by internal staff and vendor staff throughout risk modeling narratives in its 2025 WMP update.<sup>37</sup> This includes processes, procedures, methodologies, flow charts, schematics, and any explanations that describe collaboration with a risk modeling vendor. Additionally, BVES was asked to demonstrate how it identifies activities that require vendor discretion and state whether final approval from the BVES risk team is required, including any decisions such as mitigation selection. Energy Safety further asked BVES to indicate the source of the data, where a description of data is required, indicating whether the data are internally generated or vendor generated. If BVES could not indicate the source of the data, it must explain why.

In response, BVES provided clarification on its decision-making process. This includes describing how BVES provided asset information to two new third-party vendor models, along with local data such as Light Detecting and Ranging (LiDAR) inspection results and weather station parameters.<sup>38</sup> BVES stated that one of the models analyze fire risk, fire spread, and behavior.<sup>39</sup> A second model evaluates ignition risk, PSPS risk, and utility risk by integrating inputs from existing modeling programs, Wildfire Analyst Enterprise (WFA-E) and

---

<sup>36</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 15 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>37</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), p. 75 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 31, 2024).

<sup>38</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), pp. 15-16 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 31, 2024).

<sup>39</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), pp. 15-16 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 31, 2024).

FPI.<sup>40</sup> This second model reportedly takes into account BVES asset conditions, customer locations, and types, including vulnerable customers.<sup>41</sup>

Relating to how BVES has internal approval or vendor discretion, BVES stated that its staff perform all risk modeling using vendor-supplied models and BVES inputs.<sup>42</sup> Further, mitigation selection and PSPS decisions are made by BVES personnel based on modeling information.<sup>43</sup> BVES runs daily models to assess wildfire and PSPS risk, and this information is shared with the BVES management team.<sup>44</sup>

BVES stated that two vendor companies for the new software technologies provided comprehensive training to its staff on model operation and understanding.<sup>45</sup> Lastly, BVES stated that progress on this area for continued improvement resulted in reportable updates to the 2023-2025 WMP.<sup>46</sup>

### 6.2.3.1 Energy Safety Evaluation

Given the additional clarity on how BVES works with its vendors to develop its risk analysis and modeling, BVES sufficiently responded to this area for continued improvement; no further reporting is required on this area for continued improvement in BVES's 2026-2028 Base WMP.

## 7. Wildfire Mitigation Strategy Development

In its 2025 WMP Update, BVES provided two total updates related to the wildfire mitigation strategy development section of its 2023-2025 Base WMP. The updates BVES provided related to this section included reporting progress on two areas for continued improvement.

### 7.1 2023 Areas for Continued Improvement

As required by Energy Safety's Decision on BVES's 2023-2025 Base WMP,<sup>47</sup> BVES reported its progress on two areas for continued improvement in the wildfire mitigation strategy development section in its 2025 WMP Update.

#### 7.1.1 BVES-23B-03. Cross-Utility Collaboration on Best Practices for Inclusion of Climate Change Forecasts in Consequence Modeling, Inclusion of Community Vulnerability in Consequence Modeling, and Utility Vegetation Management for Wildfire Safety

In its Decision on BVES 2023-2025 Base WMP, Energy Safety found that BVES did not make substantive efforts to collaborate with other IOUs<sup>48</sup> in the areas of climate change forecasts in consequence modeling, community vulnerability in consequence modeling, and utility vegetation management for wildfire safety.<sup>49</sup>

Accordingly, Energy Safety required BVES to participate in all Energy Safety-organized activities related to best practices for:<sup>50</sup>

- Inclusion of climate change forecasts in consequence modeling.
- Inclusion of community vulnerability in consequence modeling.

---

<sup>47</sup> [Decision on BVES 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 73-81 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>48</sup> The IOUs include Pacific Gas and Electric Company (PG&E), Southern California Edison Company (SCE), San Diego Gas and Electric Company (SDG&E), Bear Valley Electric Service (BVES), Liberty Utilities (Liberty), and PacifiCorp.

<sup>49</sup> [Decision on BVES 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), p. 32 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 22, 2024).

<sup>50</sup> [Decision on BVES 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), p. 74 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 22, 2024).

- Utility vegetation management for wildfire safety.

Energy Safety also required BVES to collaborate with the other IOUs on the above-mentioned best practices.<sup>51</sup> Energy Safety required BVES to provide a status update on any cross-utility collaboration on the topics listed above, including a list of any resulting updates to its WMP since its 2023-2025 Base WMP.<sup>52</sup>

BVES stated its continued participation in Energy Safety-sponsored scoping meetings and other relevant workshops as required, such as the Energy Safety-led risk modeling working group meetings.<sup>53</sup> BVES stated that it participated in bi-monthly Joint IOU meetings<sup>54</sup> hosted by PG&E, SDG&E, or SCE.<sup>55, 56</sup> The agenda included WMP topics such as areas for continued improvements and associated remedies, benchmarking, and change orders.<sup>57</sup>

### 7.1.1.1 Energy Safety Evaluation

The 2023 area for continued improvement directed all the IOUs to collaborate. The IOUs include SDG&E, PG&E, and SCE, but also include BVES, Liberty Utilities, and PacifiCorp. While BVES demonstrated the first step by participating in the meetings hosted by PG&E, SDG&E, and SCE, it should additionally document and report any WMP-related collaboration with Liberty and PacifiCorp. Accordingly, in its 2026-2028 Base WMP, BVES must document and report on its WMP-related collaboration efforts with Liberty and PacifiCorp where relevant and appropriate to each IOU's interests.

Energy Safety has modified the area for continued improvement to provide additional guidance for BVES. BVES must respond to this revised area for continued improvement in its 2026-2028 Base WMP.

---

<sup>51</sup> [Decision on BVES 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), p. 74 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 22, 2024).

<sup>52</sup> [Decision on BVES 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), p. 74 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 22, 2024).

<sup>54</sup> [BVES 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 14 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>55</sup> [Data Request OEIS-P-WMP 2024-BVES-004](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56843&shareable=true), Question 3 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56843&shareable=true, accessed July 8, 2024).

<sup>56</sup> [Data Request OEIS-P-WMP 2024-BVES-004](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56843&shareable=true), Question 3 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56843&shareable=true, accessed July 8, 2024).

<sup>57</sup> [Data Request OEIS-P-WMP 2024-BVES-004](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56843&shareable=true), Question 3 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56843&shareable=true, accessed July 8, 2024).

Section 11 provides all areas for continued improvement for BVES, including the specific required progress that BVES must address in its 2026-2028 Base WMP.

### 7.1.2 BVES-23B-06. Vendor Fire Risk Model Implementation Milestones and Dates

In its 2023-2025 Base WMP, BVES stated that it is adopting a new risk modeling platform. BVES's previous risk modeling relied on static fire threat maps<sup>58</sup> and modeling its risk at the circuit level.<sup>59</sup> BVES stated this new platform should be able to update fire threat maps more frequently<sup>60</sup> and enable a more granular risk modeling.<sup>61</sup> However, BVES did not include "a clearly defined schedule for this transition."<sup>62</sup> Accordingly, in its 2023 Decision Energy Safety required BVES to report in its 2025 Update how it expects its new vendor risk modeling software to improve its risk analysis, and provide a plan with milestones and dates for achieving those improvements.<sup>63</sup>

In its 2025 WMP Update, BVES explained both the modifications to its existing models and details on its transition to new models.<sup>64</sup> BVES stated that it used a third-party vendor risk model, Wildfire Risk Reduction Model (WRRM), in February 2023 to create a baseline map of BVES's service territory with no grid hardening implemented.<sup>65</sup> BVES then ran the model again in November 2023 to incorporate BVES grid hardening initiatives,<sup>66</sup> and included the

<sup>61</sup> [Decision on BVES 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), p. 3 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>62</sup> [Decision on BVES 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), p. 31 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>63</sup> [Decision on BVES 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), p. 75 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>64</sup> [BVES 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 16 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>65</sup> [BVES 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 16 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>66</sup> [BVES 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 16 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

updated maps as an attachment to its 2025 WMP Update.<sup>67</sup> BVES stated it will continue updating its model throughout the remainder of 2024.<sup>68</sup>

Additionally, BVES included the Energy Safety-requested timeline with milestones and dates for achieving improvements to its vendor risk modeling software. This timeline appears as Table 6-7 in BVES's 2025 WMP Update,<sup>69</sup> and includes dates through fiscal quarter 4 of 2024. BVES stated that it is currently on track to meet all targets listed in Table 6-7.<sup>70</sup>

#### **7.1.2.1 Energy Safety Evaluation**

BVES provided the requested explanation for its risk modeling software modifications and a timeline with milestones for improvements to its risk modeling software. BVES sufficiently responded to this area for continued improvement. No further reporting is required on this area for continued improvement in BVES's 2026-2028 Base WMP.

## **7.2 New or Discontinued Programs**

In its 2025 WMP Update, BVES did not report any new or discontinued programs related to the wildfire mitigation strategy development section of its 2023-2025 Base WMP.

## **7.3 Targets, Objectives, and Projected Expenditures**

In its 2025 WMP Update, BVES did not report any updates to approved targets, objectives, or projected expenditures related to the wildfire mitigation strategy development section of its 2023-2025 Base WMP.

---

<sup>67</sup> [BVES 2025 WMP Update](https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 16 (https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>68</sup> [BVES 2023-2025 Base WMP \(redlined\)](https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=57057&shareable=true) (July 22, 2024), Table 6-7, pp. 88-90 (https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=57057&shareable=true, accessed July 23, 2024).

<sup>69</sup> [BVES 2023-2025 Base WMP \(redlined\)](https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=57057&shareable=true) (July 22, 2024), Table 6-7, pp. 88-90 (https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=57057&shareable=true, accessed July 23, 2024).

<sup>70</sup> [Data Request OEIS-P-WMP 2024-BVES-005](https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=56871&shareable=true), Question 1 (https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=56871&shareable=true, accessed July 8, 2024).

## 8. Wildfire Mitigation Initiatives

This section provides Energy Safety's evaluation of BVES's reportable updates related to the following wildfire mitigation initiatives:

- Grid design, operations, and maintenance, including grid design and system hardening, asset inspections, equipment maintenance and repair, and grid operations and procedures
- Vegetation management and inspections
- Situational awareness and forecasting
- Emergency preparedness
- Community outreach and engagement

Energy Safety discusses its evaluation of BVES's reportable updates related to PSPS in Section 9. Energy Safety includes discussion of any reportable updates affecting BVES's process for continuous improvement in Section 10.

### 8.1 Grid Design, Operations, and Maintenance

In its 2025 WMP Update, BVES provided 24 total updates related to the grid design and system hardening section of its 2023-2025 Base WMP. The updates BVES provided related to this section included reporting required progress on seven areas for continued improvement, and reporting updates to six approved targets, four objectives, and seven projected expenditures.

#### 8.1.1 Grid Design and System Hardening

##### 8.1.1.1 2023 Areas for Continued Improvement

As required by Energy Safety's Decision on BVES's 2023-2025 Base WMP,<sup>71</sup> BVES reported its progress on four areas for continued improvement in the grid design and system hardening section in its 2025 WMP Update.

#### **BVES-23B-07. Risk Informed Prioritization of Grid Hardening Installation**

In its Decision on BVES's 2023-2025 WMP, Energy Safety required BVES to explain how it is focusing its covered conductor and other grid hardening projects in the areas of highest risk based on the most recent and available WRRM output in its 2026-2028 Base WMP.<sup>72</sup>

---

<sup>71</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>72</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 75-76 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 31, 2024).

BVES stated that it will provide an update on its progress for this area for continued improvement in its 2026-2028 Base WMP.<sup>73</sup>

### **BVES-23B-08. Covered Conductor Mitigation Selection**

In its Decision on BVES's 2023-2025 WMP, Energy Safety required BVES to demonstrate how it compares alternative initiatives, mitigations, and combinations of mitigations to covered conductor, and to provide the analyses used for such comparisons in its 2026-2028 Base WMP.<sup>74</sup>

BVES stated that it will provide an update on its progress for this area for continued improvement in its 2026-2028 Base WMP.<sup>75</sup>

### **BVES-23B-09. Radford Line Project**

In its Decision on BVES's 2023-2025 WMP, Energy Safety required BVES to provide a status update on the completion of the Radford line project in its 2025 Update.<sup>76</sup> This update required BVES to include how it planned to expedite construction after receiving a permit from the United States Forest Service (USFS) and provide a threshold date by which time the lack of a permit would delay completion of the project past 2023. If securing a permit from USFS continues to delay the project, BVES needed to provide an update on how it has been working with the USFS to expedite completion of the permit, including a description of all interactions BVES has had with USFS regarding permit issuance. Additionally, BVES was required to provide plans on how it will reduce impacts and delays for any similar hardening projects moving forward.

In response, BVES reported obtaining approval to proceed from the USFS on January 3, 2024.<sup>77</sup> The Radford line project commenced in May 2024, with an anticipated completion date by the end of 2024. BVES submitted a copy of its USFS Permit to Energy Safety.<sup>78</sup> Lastly,

<sup>73</sup> [BVES's 2025 WMP Update](#) (July 22, 2024), p. 17  
(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true>, accessed July 23, 2024).

<sup>74</sup> [Decision on BVES's 2023-2025 Base WMP](#) (November 6, 2023), p. 76  
(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true>, accessed July 31, 2024).

<sup>75</sup> [BVES's 2025 WMP Update](#) (July 22, 2024), p. 17  
(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true>, accessed July 23, 2024).

<sup>76</sup> [Decision on BVES's 2023-2025 Base WMP](#) (November 6, 2023), p. 76  
(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true>, accessed July 31, 2024).

<sup>77</sup> [BVES's 2025 WMP Update](#) (July 22, 2024), p. 18  
(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true>, accessed July 31, 2024).

<sup>78</sup> [BVES's 2025 WMP Update](#) (July 22, 2024), Attachment 2, pp. 1-12  
(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true>, accessed July 23, 2024).

BVES stated that progress on this area for continued improvement did not result in a reportable update to the 2023-2025 WMP.<sup>79</sup>

### Energy Safety Evaluation

BVES obtained the USFS permit and reported the Radford Line Project will be completed by the end of 2024.<sup>80</sup> BVES did not provide any additional measures to expedite the project's progress as the permit was obtained in January 2024 and no construction delays or further USFS permits for this project were anticipated.<sup>81</sup> In terms of similar projects, BVES stated it may have future work that falls under a "Linear Infrastructure Utility Permit" which involves maintenance work.<sup>82</sup> To reduce potential delays on future projects, BVES stated it will plan for longer lead times to engage with and apply for USFS permits, building capacity for delays into timelines, potentially hiring a permitting consultant to facilitate the USFS permit process, as well as developing an on-going working relationship with USFS staff.<sup>83</sup>

Given the issuance of the USFS permit which resulted in BVES forecasting completion of the project by the end of 2024, and the BVES reported process improvements for obtaining permits, BVES sufficiently responded to this area for continued improvement; no further reporting is required on this area for continued improvement in BVES's 2026-2028 Base WMP.

### BVES-23B-10. Grid Hardening Pilots

In its Decision on BVES's 2023-2025 WMP, Energy Safety required BVES to explain its specific process for monitoring pilot programs being performed by IOUs in its 2025 Update. This explanation was required to include BVES's plan and criteria on how and when to decide which technologies to select, including the dates of meetings held where BVES conferred with IOUs on piloted technologies and specifics on which technologies were discussed. Additionally, BVES was to provide an update on its assessments of technologies being explored by IOUs, including specifics Distribution Fault Anticipation (DFA), Early Fault Detection (EFD), and Rapid Earth Fault Current Limiters (REFCL). The update should detail why and how BVES is moving forward with any such technologies, including an analysis of feasibility and barriers for implementation, and the risk mitigation benefits.

<sup>83</sup> Data Request OEIS-P-WMP\_2024-BVES-007, Question 1  
(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57114&shareable=true>, accessed August 1, 2024).

In response, BVES reported its participation in the WMP Joint IOU workshops, where discussions on new technologies such as DFA, EFD, and REFCL were held; BVES determined REFCL is applicable only to grounded systems, while BVES's 34KV sub-transmission is a delta system, rendering REFCL incompatible with the BVES grid.<sup>84</sup>

BVES stated that it initiated a pilot program to install an Online Diagnostic System, using continuous monitor sensors to provide actionable grid insights.<sup>85</sup> This system, similar to DFA and EFD, was installed on one circuit in 2022, expanded to two circuits in 2023, and is planned for installation on an additional circuit in 2024. The system is designed to detect irregularities due to potential hardware failures and identify objects such as vegetation contacting the lines, aiding BVES in preemptively addressing potential ignition sources.<sup>86</sup>

BVES stated that in 2023 it launched a second pilot program in partnership with Green Grid Inc., installing a camera system on poles to continuously monitor the pole and associated lines.<sup>87</sup> Cameras were installed on two different circuits.<sup>88</sup>

### Energy Safety Evaluation

While the new technologies being implemented by the other IOUs are not compatible with BVES's grid system, BVES did implement two pilot programs relating to grid hardening that will provide similar data to those being pursued by the other IOUs. As a result, BVES sufficiently responded to this area for continued improvement; no further reporting is required on this area for continued improvement in BVES's 2026-2028 Base WMP.

#### 8.1.1.2 New or Discontinued Programs

In its 2025 WMP Update, BVES did not report any new or discontinued programs related to grid design and system hardening section of its 2023-2025 Base WMP.

#### 8.1.1.3 Targets, Objectives, and Projected Expenditures

In its 2025 WMP Update, BVES reported updates to approved targets, objectives, and projected expenditures related to the grid design and system hardening section of its 2023-

2025 Base WMP. Energy Safety finds that these reportable updates meet the requirements set forth in the 2025 WMP Update Guidelines.

Specifically, BVES provided a decrease in its 2025 target for covered conductor installations from 12.9 to 5.1 miles as well as a decrease in its projected capital expenditure from \$4,655,694 to \$1,840,623.<sup>89</sup> BVES stated that in 2023 it surpassed its initial projection for covered conductor installations and that it plans to meet its target for covered conductor installation in 2024, and therefore provided a reduction to its covered conductor for 2025.<sup>90</sup>

BVES provided a decrease in its 2025 target for distribution pole replacements and reinforcements from 200 to 100 poles as well as a decrease in its projected capital expenditure from \$2,789,368 to \$788,838.<sup>91</sup> BVES stated that in 2023 it surpassed its initial projection for distribution pole replacements and reinforcements and that it plans to meet its target for this initiative in 2024, and therefore provided a reduction to its target for this initiative for 2025.<sup>92</sup>

BVES provided an increase in its projected capital expenditure for its energy storage and solar generating facility project (GD\_10) from \$0 to \$13,578,409.<sup>93</sup> BVES reported the project was not initially scheduled for completion until after 2025, but due to progression with the permitting process, is now possible for completion in 2025.<sup>94</sup>

BVES provided an increase in its projected capital expenditures for its Bear Valley Energy Storage Facility project (GD\_11) from \$0 to \$10,342,009.<sup>95</sup> BVES reported the project was not set for completion until after 2025, but now that permitting is initiated, the project will be completed in 2025.<sup>96</sup>

<sup>96</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 10 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 31, 2024).

BVES provided an increase in its projected capital expenditure for its Maltby Substation (GD\_22) from \$0 to \$1,777,479.<sup>97</sup> BVES reported that the substation was originally scheduled for completion in 2024, but due to delays in delivery of some of the substation equipment, has been rescheduled for 2025.<sup>98</sup>

BVES provided a decrease in its projected capital expenditure for its Lake Substation (GD\_23) from \$2,065,781 to \$0 as well as an updated objective completion date from 2025 to 2026.<sup>99</sup> BVES stated that its reprogramming of the substation initiatives is a result of work loading and planning constraints, with higher priority initiatives consuming more planning resources than initially projected. Additionally, BVES stated that its substation equipment delivery is delayed by 12 to 15 months due to supply chain issues.<sup>100</sup>

BVES provided a decrease in its projected capital expenditure for its Village Substation (GD\_24) from \$1,144,054 to \$0 as well as an updated objective completion date from 2025 to 2027.<sup>101</sup> BVES stated that its reprogramming of the substation initiatives is a result of work loading and planning constraints, with higher priority initiatives consuming more planning resources than initially projected. Additionally, BVES stated that its substation equipment delivery is delayed by 12 to 15 months due to supply chain issues.<sup>102</sup>

## Energy Safety Evaluation

BVES stated it reduced the covered conductor and pole replacement targets due to exceeding its targets set in 2023. In 2023, BVES set a covered conductor installation goal of 12.9 miles and stated that it completed 20.7 miles, 7.8 miles beyond its target.<sup>103</sup> Additionally, BVES set a pole replacement goal of 200 replacements and stated that it completed 309 in 2023, reportedly exceeding its goal by 109 replacements.<sup>104</sup> These accounts are equivalent to the

<sup>100</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 8 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>101</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), pp. 8-9 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>102</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 8 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>103</sup> [BVES's 2023 Q4 Quarterly Data Report \(QDR\)](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56262&shareable=true), Table 1, Row 11 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56262&shareable=true, accessed July 23, 2024).

<sup>104</sup> [BVES's 2023 Q4 Quarterly Data Report \(QDR\)](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56262&shareable=true), Table 1, Row 44 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56262&shareable=true, accessed July 23, 2024).

associated reductions provided by BVES for 2025, as BVES provided a reduction to its 2025 covered conductor target from 12.9 to 5.1, or by 7.8 miles, and its pole replacement targets from 200 to 100, or by 100 replacements. Therefore, provided BVES meets its 2024 and 2025 targets for these initiatives, the total amount of covered conductor miles installed and poles replaced or reinforced from 2023 through 2025 will remain greater than or equal to the 3-year totals of the targets initially approved in BVES's 2023-2025 Base WMP.

BVES provided additional information listing two microgrid projects with original completion dates expected beyond 2025; however, BVES revised the project timelines of the two microgrid projects to be completed by 2025 due to initiation of environmental review permitting taking less time than expected.<sup>105</sup> This adjusted timeline required BVES to change projected expenditures.<sup>106</sup>

For the Maltby substation project, BVES stated planned upgrades for 2024 will not be completed until 2025 due to delays in receiving necessary substation equipment.<sup>107</sup>

BVES also reported similar supply chain delays and resource constraints for the Lake and Village substation projects, resulting in decreased projected expenditure for 2025. Though these delays result in a decreased risk reduction for the 2023-2025 timeframe, BVES included updated completion dates and justification for why the projects cannot be completed by 2025.

### Areas for Continued Improvement

Energy Safety has no new areas for continued improvement for BVES in grid design and system hardening. In its 2026-2028 Base WMP, BVES must report its progress on any existing areas for continued improvement specified in Energy Safety's Decision on BVES's 2023-2025 Base WMP.<sup>108</sup>

---

<sup>105</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 10 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>108</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 73-81 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

## 8.1.2 Asset Inspections

### 8.1.2.1 2023 Areas for Continued Improvement

As required by Energy Safety's Decision on BVES's 2023-2025 Base WMP,<sup>109</sup> BVES reported its progress on three areas for continued improvement in the asset inspections section in its 2025 WMP Update.

#### **BVES-23B-11. Covered Conductor Inspections and Maintenance**

In its Decision on BVES's 2023-2025 Base WMP, Energy Safety required BVES to discuss how its inspection programs will address failure modes unique to covered conductor such as water intrusion, splice cover missing or damaged, and surface damage.<sup>110</sup>

In its response, BVES stated it discussed water intrusion with covered conductor manufacturers and is developing a strategy for addressing this issue.<sup>111</sup> BVES also stated that covered conductor manufacturers recommended inspections check for discoloration, bubbling and separation of outer coating, and abrasions that penetrate the covered conductor coating.<sup>112</sup> BVES stated it will update its inspection checklists to include these items.<sup>113</sup>

#### Energy Safety Evaluation

While BVES committed to updating its inspection checklists to include conditions specific to covered conductor surface damage and splice covers and developing a strategy to address water intrusion, it has not provided a timeline for completing these commitments. In its 2026-2028 Base WMP, BVES must provide a timeline for achieving both commitments. If BVES already completed both commitments at the time of its 2026-2028 Base WMP, it must provide its inspection checklists as attachments to its submission.

---

<sup>109</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 73-81 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>110</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), p. 77 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 31, 2024).

<sup>111</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 19-20 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>112</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 19-20 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>113</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 19-20 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

Energy Safety has modified the area for continued improvement to provide additional guidance for BVES. BVES must respond to this revised area for continued improvement in its 2026-2028 Base WMP.

Section 11 provides all areas for continued improvement for BVES, including the specific required progress that BVES must address in its 2026-2028 Base WMP.

### **BVES-23B-12. Distribution Detailed Inspection Frequency**

In its Decision on BVES's 2023-2025 Base WMP, Energy Safety required BVES to strive to adopt a risk-based approach to distribution detailed inspections.<sup>114</sup> BVES was required to outline a plan to update its inspections in higher risk areas, including an analysis to determine new inspection frequencies, a description of how higher risk areas were prioritized based on risk, updates to inspection checklists to account for assets posing greater wildfire risk, and a plan to obtain workforce if necessary to perform additional inspections.<sup>115</sup> BVES was required to provide information demonstrating its existing inspection programs adequately address risk if it elected not to issue a plan to shift to risk based inspections.<sup>116</sup>

In its response, BVES stated it will revise its detailed inspection program in its 2026-2028 base WMP to increase the frequency of inspections on its highest risk assets.<sup>117</sup> BVES stated all assets in its territory exhibit similar risk profiles, but circuit risk profiles will change as covered conductor is installed.<sup>118</sup> BVES stated it plans to increase inspection frequency on the highest risk bare wire assets.<sup>119</sup>

BVES stated in 2023, its unmanned aerial vehicle (UAV) photography inspection program identified one level 1 condition,<sup>120</sup> which BVES stated was immediately remediated, and no level 1 conditions were found during detailed, patrol, LiDAR, UAV thermography or third-party

---

<sup>114</sup> [Decision on BVES's 2023-2025 Base WMP](#) (November 6, 2023), pp. 77-78 (<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true>, accessed July 31, 2024).

<sup>115</sup> [Decision on BVES's 2023-2025 Base WMP](#) (November 6, 2023), p. 78 (<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true>, accessed July 31, 2024).

<sup>117</sup> [BVES's 2025 WMP Update](#) (July 22, 2024), pp. 20-22 (<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true>, accessed July 23, 2024).

<sup>118</sup> [BVES's 2025 WMP Update](#) (July 22, 2024), pp. 20-22 (<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true>, accessed July 23, 2024).

<sup>119</sup> [BVES's 2025 WMP Update](#) (July 22, 2024), pp. 20-22 (<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true>, accessed July 23, 2024).

<sup>120</sup> Level 1 (Condition): Immediate safety and/or reliability risk with high probability for significant impact. Take action immediately, either by fully repairing the condition, or by temporarily repairing and reclassifying the condition to a lower priority. [Go 95 Rule 18 \(ca.gov\)](#).

patrol inspections.<sup>121</sup> BVES stated the lack of level 1 findings identified by its detailed distribution inspection program suggest its current detailed inspection policy adequately addresses risk.

### Energy Safety Evaluation

BVES provided the required outline and information demonstrating adequacy of its inspection program to address risk. Given the only level 1 finding BVES identified in 2023 was the result of its UAV photography inspection program, which BVES is continuing, BVES sufficiently responded to this area for continued improvement; no further reporting is required on this area for continued improvement in BVES's 2026-2028 Base WMP.

### **BVES-23B-13. Asset Inspection QA/QC Program**

In its Decision on BVES's 2023-2025 Base WMP, Energy Safety required BVES to demonstrate progress toward implementing a comprehensive quality assurance and quality control (QA/QC) program for each of its asset inspection programs. BVES was required to create written procedures, standardized inspection forms, and written QA/QC procedures for each of its inspection programs.<sup>122</sup> BVES was also required to create a system for timestamping and filing photographs taken during inspections.<sup>123</sup> Additionally, BVES was required to provide inspection sample size, verification methods, pass rate targets, and actual pass rates.<sup>124</sup>

In its response, BVES stated written procedures are available for each of its asset inspections.<sup>125</sup> Additionally, BVES stated it created written QA/QC procedures for detailed, patrol, UAV thermography, UAV photography/video, LiDAR, intrusive pole, and substation inspections.<sup>126</sup> BVES stated that timestamped photographs related to inspections can be

<sup>126</sup> [BVES's 2025 WMP Update](#) (July 22, 2024), pp. 22-23  
(<https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true>, accessed July 23, 2024).

stored in one of three systems.<sup>127</sup> BVES did not provide the sample size, pass rate targets, or actual pass rates for its QA/QC activities.

### Energy Safety Evaluation

In its 2025 WMP Update, BVES provided written QA/QC procedures for each of its asset inspection types. Upon review of these procedures, Energy Safety found the BVES QA process does not require inspection audits or track inspection pass rates. The QA process does not establish minimum audit sample size or pass rate targets. In its 2026-2028 Base WMP, BVES must update its written QA process to include annual audits, specify audited sample size, require audits be performed by an individual other than the original inspector, and track audit pass rates.

Energy Safety has modified the area for continued improvement to provide additional guidance for BVES. BVES must respond to this revised area for continued improvement in its 2026-2028 Base WMP.

Section 11 provides all areas for continued improvement for BVES, including the specific required progress that BVES must address in its 2026-2028 Base WMP.

#### **8.1.2.2 New or Discontinued Programs**

In its 2025 WMP Update, BVES did not report any new or discontinued programs related to the Asset Inspection section of its 2023-2025 Base WMP.

#### **8.1.2.3 Targets, Objectives, and Projected Expenditures**

In its 2025 WMP Update, BVES provided quarterly targets (end of Q2 and end of Q3) for eight of its 2025 asset inspection programs, as required by the 2025 WMP Update Guidelines.<sup>128</sup>

### Energy Safety Evaluation

BVES's quarterly targets for its 2025 asset management inspections are consistent with quarterly targets for 2023 and 2024 and meet the requirements of the 2025 WMP Update Guidelines.

### Areas for Continued Improvement

Energy Safety has no new areas for continued improvement for BVES in asset inspections related to targets, objectives, and projected expenditures. In its 2026-2028 Base WMP, BVES

---

<sup>127</sup> [BVES's 2025 WMP Update](#) (July 22, 2024), pp. 22-23 (<https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true>, accessed July 23, 2024).

<sup>128</sup> [2025 WMP Update Guidelines](#), see Section 3 for Quarterly Inspection Targets for 2025 (<https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true>, accessed April 9, 2023).

must report its progress on any existing areas for continued improvement specified in Energy Safety's Decision on BVES's 2023-2025 Base WMP.<sup>129</sup>

### 8.1.3 Equipment Maintenance and Repair

#### 8.1.3.1 2023 Areas for Continued Improvement

As required by Energy Safety's Decision on BVES's 2023-2025 Base WMP,<sup>130</sup> BVES reported its progress on one area for continued improvement in the equipment maintenance and repair section in its 2025 WMP Update.

#### BVES-23B-14. Non-Exempt Surge Arrester Replacement

In its Decision on BVES's 2023-2025 Base WMP, Energy Safety required BVES to provide its plan to identify and replace non-exempt lightning/surge arresters.<sup>131</sup> BVES was required to report the number of lightning/surge arresters replaced in 2023, the target to replace in 2024, and the estimated completion date of the project.<sup>132</sup>

In its response, BVES stated it replaced 43 non-exempt arresters in 2023 and is targeting the replacement of 58 non-exempt arresters in 2024.<sup>133</sup> BVES stated that it plans to replace the remaining 173 non-exempt arresters by the end of 2026.<sup>134</sup>

#### Energy Safety Evaluation

Since BVES provided the required numbers, targets, and estimates related to non-exempt lightning/surge arresters, BVES sufficiently responded to this area for continued improvement; no further reporting is required on this area for continued improvement in BVES's 2026-2028 Base WMP.

<sup>134</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 23 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

### 8.1.3.2 New or Discontinued Programs

In its 2025 WMP Update, BVES did not report any new or discontinued programs related to the Equipment Maintenance and Repair section of its 2023-2025 Base WMP.

### 8.1.3.3 Targets, Objectives, and Projected Expenditures

In its 2025 WMP Update, BVES did not report any updates to approved targets, objectives, or projected expenditures related to the equipment maintenance and repair section of its 2023-2025 Base WMP.

## 8.1.4 Grid Operations and Procedures

### 8.1.4.1 2023 Areas for Continued Improvement

As required by Energy Safety's Decision on BVES's 2023-2025 Base WMP,<sup>135</sup> BVES reported its progress on one area for continued improvement in the grid operations and procedures section in its 2025 WMP Update.

### BVES-23B-15. Reliability Impacts of Fast Trip Settings

In its Decision on BVES's 2023-2025 Base WMP, Energy Safety required BVES to provide information on outages that occurred while fast trip settings were enabled.<sup>136</sup> BVES was required to report impacted circuits, impacted circuit segments, cause of outage, number of customers impacted, number of vulnerable customers impacted, outage duration, outage response time, and customer minutes of interruption.<sup>137</sup>

In its response, BVES clarified it uses manufacturer recommended fast trip settings that follow a traditional time-current curve.<sup>138</sup> BVES provided a table with the required outage information.<sup>139</sup> BVES stated it plans to contract a consultant in 2024 to evaluate the BVES

---

<sup>135</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 73-81 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>136</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 79-80 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 31, 2024).

<sup>137</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 79-80 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 31, 2024).

<sup>138</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), pp. 23-25 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>139</sup> [2025 WMP Update Attachment for BVES-23-15 BVES 2023: Outage Log](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56400&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56400&shareable=true, accessed July 3, 2024)

device setting policy and provide recommendations to reduce the likelihood of wildfire ignition.<sup>140</sup>

### Energy Safety Evaluation

Although BVES stated it plans to hire a consultant in 2024 to evaluate and provide recommendations related to its device settings, BVES does not commit to implementing or reporting on the recommendations. In its 2026-2028 Base WMP, BVES must provide a complete list of recommendations offered by the consultant, a timeline for the incorporation of each recommendation, and justification for any recommendations BVES does not plan to adopt.

Energy Safety has modified the area for continued improvement to provide additional guidance for BVES. BVES must respond to this revised area for continued improvement in its 2026-2028 Base WMP.

Section 11 provides all areas for continued improvement for BVES, including the specific required progress that BVES must address in its 2026-2028 Base WMP.

#### **8.1.4.2 New or Discontinued Programs**

In its 2025 WMP Update, BVES did not report any new or discontinued programs related to the grid operations and procedures section of its 2023-2025 Base WMP.

#### **8.1.4.3 Targets, Objectives, and Projected Expenditures**

In its 2025 WMP Update, BVES did not report any updates to approved targets, objectives, or projected expenditures related to the grid operations and procedures section of its 2023-2025 Base WMP.

## **8.2 Vegetation Management and Inspections**

In its 2025 WMP Update, BVES provided eight updates related to the vegetation management and inspections section of its 2023-2025 Base WMP. The updates BVES provided related to this section included reporting progress on one area for continued improvement, one new program, and quarterly targets for six 2025 vegetation management inspection programs.

---

<sup>140</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), pp. 23-25 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

## 8.2.1 2023 Areas for Continued Improvement

Energy Safety's Decision on BVES's 2023-2025 Base WMP<sup>141</sup> did not require BVES to report progress on any areas for continued improvement in the vegetation management and inspections section in its 2025 WMP Update. However, BVES reported intermediate progress on one area for continued improvement in its 2025 WMP Update.

### 8.2.1.1 BVES-23B-16. Vegetation Management Quality Control Personnel Qualifications.

In its Decision on BVES's 2023-2025 Base WMP, Energy Safety required BVES to present a plan in its 2026-2028 Base WMP to improve the utility vegetation management-related qualifications of its quality control (QC) check personnel.<sup>142</sup> In its 2025 WMP Update, BVES elected to provide intermediate progress towards meeting this area for continued improvement.<sup>143</sup> BVES reported that it now requires a certified arborist to conduct vegetation management QC checks.<sup>144</sup>

## Energy Safety Evaluation

Energy Safety appreciates BVES's elective interim update on this area for continued improvement. In accordance with the requirements of BVES-23B-16, BVES must also report its continued progress on this area for continued improvement in its 2026-2028 Base WMP.

Section 11 provides all areas for continued improvement for BVES, including the specific required progress that BVES must address in its 2026-2028 Base WMP.

## 8.2.2 New or Discontinued Programs

In its 2025 WMP Update, BVES reported creating one new program related to the vegetation management and inspections section of its 2023-2025 Base WMP. Energy Safety finds that this update meets the reportable update criteria set forth in the 2025 WMP Update Guidelines.

This new program is a satellite-based inspection of vegetation near electrical assets using a proprietary, third-party software platform. According to BVES, this software provides insights

---

<sup>141</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 73-81 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>142</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), p. 80 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>143</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 25 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>144</sup> [BVES's 2025 WMP Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 25 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

for annual planning including identification of possible grow-in and fall-in risks, tree health, and vegetation growth forecasting.

### 8.2.2.1 Energy Safety Evaluation

In response to BVES's reported new program, as summarized above, Energy Safety finds that this program may further reduce the risk of ignition from vegetation contact by identifying grow-in and fall-in risk that may not be identified through other inspection methods.

### 8.2.2.2 Areas for Continued Improvement

BVES must continue to improve in the following areas and report its progress in its 2026-2028 Base WMP.

## BVES-25U-05. Vegetation Management Remote Sensing Evaluation

This satellite-based inspection adds to BVES's vegetation inspection portfolio that already includes detailed inspections, two annual patrol inspections, an annual UAV HD Photograph/Videography,<sup>145</sup> and an annual LiDAR inspection. Notably, the satellite, UAV, and LiDAR inspections all assess possible grow-in risks through remote sensing.

BVES's use of this software platform is in its infancy, having conducted only one satellite-based inspection of its service territory using the software platform.<sup>146</sup> As BVES uses this software platform further and its satellite-based inspection matures, BVES should continue to consider resource use efficiency and effectiveness of its various remote sensing methods for vegetation management.

Section 11 provides all areas for continued improvement for BVES, including the specific required progress that BVES must address in its 2026-2028 Base WMP.

## 8.2.3 Targets, Objectives, and Projected Expenditures

In its 2025 WMP Update, BVES provided quarterly targets (end of Q2 and end of Q3) for its six 2025 vegetation management inspection programs, as required by the 2025 WMP Update Guidelines.<sup>147</sup>

---

<sup>145</sup> Unmanned Aerial Vehicle High-Definition Photograph/Videography

<sup>146</sup> [Data Request OEIS-P-WMP 2024-BVES-004](https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=56843&shareable=true), Question 1 (https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=56843&shareable=true, accessed July 2, 2024).

<sup>147</sup> [2025 WMP Update Guidelines](https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true), See Section 3 for Quarterly Inspection Targets for 2025 (https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=56254&shareable=true, accessed April 9, 2023).

### 8.2.3.1 Energy Safety Evaluation

BVES's quarterly targets for its 2025 vegetation management inspections are consistent with quarterly targets for 2023 and 2024 and meet the requirements of the 2025 WMP Update Guidelines.

### 8.2.3.2 Areas for Continued Improvement

Energy Safety has no new areas for continued improvement for BVES in vegetation management and inspections related to targets, objectives, and projected expenditures. In its 2026-2028 Base WMP, BVES must report its progress on any existing areas for continued improvement specified in Energy Safety's Decision on BVES's 2023-2025 Base WMP.<sup>148</sup>

## 8.3 Situational Awareness and Forecasting

In its 2025 WMP Update, BVES provided two total updates related to the situational awareness and forecasting section of its 2023-2025 Base WMP. The updates BVES provided related to this section included reporting required progress on two areas for continued improvement and one new program.

### 8.3.1 2023 Areas for Continued Improvement

As required by Energy Safety's Decision on BVES's 2023-2025 Base WMP,<sup>149</sup> BVES reported its progress on two areas for continued improvement in the situational awareness and forecasting section in its 2025 WMP Update.

#### 8.3.1.1 BVES-23B-17. Weather Station Maintenance and Calibration

In its Decision on SCE's 2023-2025 Base WMP, Energy Safety required that BVES continue to maintain and keep a log of all the annual maintenance and calibration for each weather station, including the station name, location, conducted maintenance, in compliance with BVES's Weather Station Calibration Checklist.<sup>150</sup> Energy Safety required that the document also include the length of time from initiation of a repair ticket to completion and the corrective maintenance performed to bring the station back into functioning condition.<sup>151</sup>

---

<sup>148</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 73-81 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>149</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 73-81, (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>150</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023) p. 80-81, (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>151</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023) p. 80-81, (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

Specifically, Energy Safety required BVES submit with its 2025 WMP Update documentation indicating the number of weather stations that received their annual calibration, and the number of stations that were unable to undergo annual maintenance and/or calibration due to factors such as remote location, weather conditions, customer refusals, environmental concerns, and safety issues.<sup>152</sup> Energy Safety required the documentation to include: station name and location, the reason that maintenance and/or calibration, the length of time since the maintenance and calibration, and the number of attempts made to complete the maintenance and calibration.<sup>153</sup>

BVES provided Energy Safety a log of its weather station maintenance for 2023 and 2024. BVES additionally stated it has a plan moving forward for periodic records reviews.<sup>154</sup>

### Energy Safety Evaluation

BVES provided the required documentation, therefore BVES sufficiently responded to this area for continued improvement; no further reporting is required on this area for continued improvement in BVES 2026-2028 Base WMP.

#### 8.3.1.2 BVES-23B-18. Fire Potential Index

BVES reported development and implementation of an FPI through a third-party vendor by the end of 2023. However, BVES's 2023-2025 Base WMP lacked specific details concerning the development, validation, or implementation of its future FPI.

Specifically, Energy Safety required BVES to submit with its 2025 WMP Update documentation that it: specify the inputs and the data sources used to calculate its FPI, describe the methodology and threshold values for varying fire potential levels, describe how the FPI will be used in its daily operations and how it plans to validate the predictions measuring against actual wildfire events, discuss any planned improvements or future updates on its FPI.<sup>155</sup>

BVES stated it introduced new third-party vendor risk modeling technology to incorporate FPI specified to its service territory parameters with descriptions of the data inputs,

---

<sup>152</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023) p. 81, (https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

<sup>153</sup> [BVES's 2025 WMP Update](https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 26 (https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>154</sup> [BVES's 2025 WMP Update](https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (July 22, 2024), p. 26 and Attachment 5: BVES-23-17 (https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed July 23, 2024).

<sup>155</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), p. 81 (https://efiling.energy.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

methodology, and validation in its 2023-2025 Base WMP (redlined).<sup>156</sup> BVES described threshold values and the integration of FPI into its decision making for various mitigation including PSPS.<sup>157</sup> Further, BVES stated it will continue evaluating its use and benefits of the model.<sup>158</sup>

### Energy Safety Evaluation

Since BVES provided required details regarding the development, integration, validation, and evaluation of FPI, BVES sufficiently responded to all areas for continued improvement; no further reporting is required on this area for continued improvement in BVES's 2026-2028 Base WMP.

### 8.3.2 New or Discontinued Programs

In its 2025 WMP Update, BVES reported creating one new program related to the situational awareness and forecasting section of its 2023-2025 Base WMP. Energy Safety finds that this update meets the reportable update criteria set forth in the 2025 WMP Update Guidelines.

BVES began a pilot program using the GreenGrid iSIU<sup>159</sup> System. The iSIU System operates as a camera-based infrastructure inspection and monitoring device automated to alert field personnel of potential hazards.<sup>160</sup> BVES stated it will provide a status report on the iSIU system in its 2026-2028 Base WMP.

#### 8.3.2.1 Energy Safety Evaluation

In response to BVES's reported new program, as summarized above, Energy Safety finds that this program may provide early warning of hazards events. Further, BVES stated this program is still in a pilot phase and committed to deciding on the expanding the program in 2026-2028 Base WMP.<sup>161</sup>

### **8.3.3 Targets, Objectives, and Projected Expenditures**

In its 2025 WMP Update, BVES did not report any updates to approved targets, objectives, or projected expenditures related to the situational awareness and forecasting section of its 2023-2025 Base WMP.

## **8.4 Emergency Preparedness**

In its 2025 WMP Update, BVES did not report any updates to the emergency preparedness section of its 2023-2025 Base WMP.

## **8.5 Community Outreach and Engagement**

In its 2025 WMP Update, BVES did not report any updates to the community outreach and engagement section of its 2023-2025 Base WMP.

## 9. Public Safety Power Shutoff

In its 2025 WMP Update, BVES did not report any updates to the Public Safety Power Shutoff section of its 2023-2025 Base WMP.

## 10. BVES Process for Continuous Improvement

BVES did not indicate any changes to the lessons learned or corrective action program sections of its 2023-2025 Base WMP.

# 11. Required Areas for Continued Improvement

Energy Safety's WMP evaluations focus on each electrical corporations' strategies for reducing the risk of utility-related ignitions. The list below comprises all BVES's areas for continued improvement and the required progress that BVES must address in its 2026-2028 Base WMP. This includes areas for continued improvement from Energy Safety's Decision on BVES's 2023-2025 Base WMP as well as new areas for continued improvement from Energy Safety's evaluation of BVES's 2025 WMP Update, as discussed in Sections 5 through 9 of this Decision.

## 11.1 Cross-Category

- **BVES-23B-01. Target Verification Methods**
  - Description: BVES lists "quantitative" for its targets' verification method. It is not clear from this word how BVES will provide to verify progress toward and achievement of the target.
  - Required Progress: In its 2026-2028 Base WMP, BVES must include all methods used to verify progress of year-to-year targets within the table. BVES must clearly articulate its verification methods that are effective for supporting progress on and achievement of each target.
  - Discussed in Section 8.1, "Grid Design, Operations, and Maintenance"; Section 8.2, "Vegetation Management and Inspections"; Section 8.3, "Situational Awareness and Forecasting"; Section 8.5, "Community Outreach and Engagement," of Energy Safety's Decision on BVES's 2023-2025 Base WMP.<sup>162</sup>

## 11.2 Risk Methodology and Assessment

- **BVES-23B-02. PSPS and Wildfire Risk Trade-Off Transparency**
  - Description: BVES does not provide adequate transparency regarding PSPS and wildfire risk trade-offs, or how it uses risk ranking and risk buy-down to determine risk mitigation selection.
  - Required Progress: In its 2026-2028 Update, BVES must describe:

---

<sup>162</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 73-74 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

- How it prioritizes PSPS risk in its risk-based decisions, including trade-offs between wildfire risk and PSPS risk.
- How the rank order of its planned mitigation initiatives compares to the rank order of mitigation initiatives ranked by risk buy-down estimate, along with an explanation for any instances where the order differs.
- Discussed in Section 6, “Risk Methodology and Assessment”.

## 11.3 Wildfire Mitigation Strategy Development

- **BVES-25U-01. (BVES-23-03) Cross-Utility Collaboration on Best Practices for Inclusion of Climate Change Forecasts in Consequence Modeling, Inclusion of Community Vulnerability in Consequence Modeling, and Utility Vegetation Management for Wildfire Safety**
  - Description: BVES participated in past Energy Safety-sponsored scoping meetings on these topics and began attending meetings hosted by PG&E, SDG&E, and SCE on other WMP-related topics. However, BVES has not reported on any WMP-related collaboration with Liberty Utilities and PacifiCorp in its 2025 WMP Update.
  - Required Progress: In its 2026-2028 Base WMP, BVES must continue collaborating with PG&E, SDG&E, and SCE. BVES must also document any WMP-related collaboration with Liberty and PacifiCorp. BVES must document how all its collaboration efforts with the IOUs impact WMP Initiatives in the 2026-2028 Base WMP.
  - BVES must also continue to participate in all Energy Safety Safety-organized activities related to best practices for:
    - Inclusion of climate change forecasts in consequence modeling.
    - Inclusion of community vulnerability in consequence modeling.
    - Utility vegetation management for wildfire safety.
  - Discussed in Section 7, “Wildfire Mitigation Strategy Development”.

## 11.4 Grid Design, Operations, and Maintenance

- **BVES-23B-07. Risk Informed Prioritization of Grid Hardening Installation**
  - Description: BVES’s current covered conductor scope does demonstrate proper decision-making considerations regarding project prioritization.
  - Required Progress: In its 2026-2028 Base WMP, BVES must:

- Explain how it is focusing its covered conductor and other grid hardening projects in the areas of highest risk based on the most recent and available WRRM output.
    - Adjust its targets as needed based on its analysis.
  - Discussed in Section 8.1.1, “Grid Design and System Hardening.”
- **BVES-23B-08. Covered Conductor Mitigation Selection**
  - Description: BVES’s current covered conductor scope does not demonstrate proper decision-making considerations regarding mitigation selection.
  - Required Progress: In its 2026-2028 Base WMP, BVES must:
    - Demonstrate how it compares alternative initiatives, mitigations, and combinations of mitigations to covered conductor, and provide the analyses used for such comparisons.
    - Adjust its targets as needed based on its analysis.
  - Discussed in Section 8.1.1, “Grid Design and System Hardening.”
- **BVES-25U-02. (BVES-23-11) Covered Conductor Inspections and Maintenance**
  - Description: In its 2025 WMP Update, BVES committed to updating its inspection checklists to include checks specific to covered conductor and developing a strategy to address water intrusion. BVES did not provide a timeline for completing these commitments.
  - Required Progress: In its 2026-2028 Base WMP, BVES must provide:
    - A timeline for including covered conductor surface damage checks in its inspection processes.
    - A timeline for developing a strategy to address water intrusion and including water intrusion checks in its inspection processes.

If BVES has reached the final milestone of both required timelines at the time of its 2026-2028 Base WMP submission, it must provide the inspection checklists as attachments to its WMP submission.
  - Discussed in Section 8.1.2, “Asset Inspections.”
- **BVES-25U-03. (BVES-23-13) Asset Inspection QA/QC Program**
  - Description: In Energy Safety’s decision on BVES’s 2023-2025 WMP Base Plan, Energy Safety required BVES to establish written QA/QC procedures for each of its inspection types. BVES established written QA procedures, but the QA procedures do not include inspection audits.

- Required Progress: In its 2026-2028 Base WMP, BVES must update its written QA procedures for each inspection type. The written process must:
  - Include annual audits.
  - Specify a statistically relevant sample size to audit.
  - Require audits be performed by a person/persons other than the original inspector.
  - Track audit pass rates.
- Discussed in Section 8.1.2, “Asset Inspections.”
- **BVES-25U-04. (BVES-23-15) Device Setting Improvement**
  - Description: In its 2025 Update, BVES stated it plans to engage a consultant to evaluate device settings and provide improvement recommendations. BVES did not commit to implementing or reporting on the recommendations.
  - Required Progress: In its 2026-2028 Base WMP, BVES must provide:
    - A complete list of recommendations provided by the consultant.
    - A timeline for the incorporation of each recommendation.
    - Justification for any recommendations BVES does not plan to adopt.
  - Discussed in Section 8.1.4, “Grid Operations and Procedures.”

## 11.5 Vegetation Management and Inspections

- **BVES-23B-16. Vegetation Management Quality Control Personnel Qualifications**
  - Description: In its response to BVES-22-16, Vegetation Management Quality Control Personnel Qualifications, BVES has not demonstrated that it has considered alternative staffing for its vegetation management quality control checks. BVES has not shown that it has properly identified trained and qualified personnel for its vegetation quality control checks.
  - Required Progress: In its 2026-2028 Base WMP, BVES must:
    - Present a plan to improve the utility vegetation management-related qualifications of its QC check personnel.
    - Explain and provide the decision-making process on its consideration of alternative staffing for its vegetation management QC checks, including consideration of employing or contracting with certified arborists or registered professional foresters to perform these checks.
  - Discussed in Section 8.2, “Vegetation Management and Inspections.”

- **BVES-25U-05. Vegetation Management Remote Sensing Evaluation**

- Description: As BVES's use of satellite-based inspection matures, BVES should continue to consider resource-use efficiency and effectiveness of its various remote sensing methods for vegetation management.
- Required Progress: In its 2026-2028 Base WMP, BVES must:
  - List the data outputs from its satellite and LiDAR inspections.
  - Describe how BVES will use those data outputs to improve vegetation management-related outcomes over the 2026-2028 WMP cycle.
  - Evaluate and compare the costs, benefits, and effectiveness of using:
    - Ground-based inspections.
    - LiDAR with ground-based inspections.
    - Satellite-based inspections with ground-based inspections.
    - LiDAR and satellite-based inspections with ground-based inspections.
- Discussed in Section 8.2, "Vegetation Management and Inspections."

## 12. Conclusion

BVES's 2025 WMP Update is approved.

Catastrophic wildfires remain a serious threat to the health and safety of Californians. Electrical corporations, including BVES, must continue to make progress toward reducing utility-related ignition risk.

Energy Safety expects BVES to effectively implement its wildfire mitigation activities to reduce the risk of utility-related ignitions and the potential catastrophic consequences if an ignition occurs, as well as to reduce the scale, scope, and frequency of PSPS events.

BVES must meet the commitments in its WMP and fully address the areas for continued improvement identified within this Decision to ensure it meaningfully reduces utility-related ignition and PSPS risk within its service territory over the plan cycle.

## Glossary of Terms

Term	Definition
<b>AFN</b>	Access and functional needs
<b>BVES</b>	Bear Valley Electric Service
<b>CAISO</b>	California Independent System Operator
<b>Cal Advocates</b>	The Public Advocates Office at the California Public Utilities Commission
<b>CAL FIRE</b>	California Department of Forestry and Fire Protection
<b>Cal OES</b>	California Governor's Office of Emergency Services
<b>CAP</b>	Corrective action program
<b>CBO</b>	Community-based organization
<b>CDFW</b>	California Department of Fish and Wildlife
<b>CEC</b>	California Energy Commission
<b>CEJA</b>	California Environmental Justice Alliance
<b>CNRA</b>	California Natural Resources Agency
<b>CPUC</b>	California Public Utilities Commission
<b>D.</b>	Prefix to a proceeding number designating a CPUC decision
<b>DR</b>	Data request
<b>DWR</b>	California Department of Water Resources
<b>EBMUD</b>	East Bay Municipal Utility District
<b>EFD</b>	Early fault detection

Term	Definition
<b>EPUC</b>	Energy Producers and Users Coalition
<b>EVM</b>	Enhanced vegetation management
<b>FERC</b>	Federal Energy Regulatory Commission
<b>FPI</b>	Fire potential index
<b>FWI</b>	Fire weather index
<b>GFN</b>	Ground-fault neutralizers
<b>GIS</b>	Geographic information systems
<b>GO</b>	General order
<b>GPI</b>	Green Power Institute
<b>GRC</b>	General rate case
<b>HD</b>	High definition
<b>HFRA</b>	High Fire Risk Area
<b>HFTD</b>	High fire threat district
<b>HWT or Horizon West</b>	Horizon West Transmission
<b>I.</b>	Prefix to a proceeding number designating a CPUC Order Instituting Investigation (OII)
<b>ICS</b>	Incident command system or structure
<b>IOU</b>	Investor-owned utility
<b>IR</b>	Infrared
<b>ISA</b>	International Society of Arboriculture
<b>ITO</b>	Independent transmission operator
<b>kV</b>	Kilovolt

Term	Definition
<b>Liberty</b>	Liberty Utilities
<b>LiDAR</b>	Light detection and ranging
<b>Maturity Model</b>	Electrical Corporation Wildfire Mitigation Maturity Model
<b>Maturity Survey</b>	Electrical Corporation Wildfire Mitigation Maturity Survey
<b>MAVF</b>	Multi-attribute value function
<b>MBL</b>	Medical Baseline
<b>MGRA</b>	Mussey Grade Road Alliance
<b>ML</b>	Machine learning
<b>NDVI</b>	Normalized difference vegetation index
<b>NERC</b>	North American Electric Reliability Corporation
<b>NFDRS</b>	National Fire Danger Rating System
<b>NOD</b>	Notice of defect
<b>NOV</b>	Notice of violation
<b>OCM</b>	Overhead circuit miles
<b>OEIS or Energy Safety</b>	Office of Energy Infrastructure Safety
<b>PG&amp;E</b>	Pacific Gas and Electric Company
<b>PoF</b>	Probability of failure
<b>PoI</b>	Probability of ignition
<b>PRC</b>	Public Resources Code
<b>PSPS</b>	Public Safety Power Shutoff

Term	Definition
<b>Pub. Util. Code or PU Code</b>	Public Utilities Code
<b>QA</b>	Quality assurance
<b>QC</b>	Quality control
<b>QDR</b>	Quarterly Data Report
<b>R.</b>	Prefix to a proceeding number designating a CPUC rulemaking
<b>RAMP</b>	Risk Assessment and Mitigation Phase
<b>RCRC</b>	Rural County Representatives of California
<b>REFCL</b>	Rapid earth fault current limiter
<b>RFW</b>	Red Flag Warning
<b>RSE</b>	Risk-spend efficiency
<b>SAWTI</b>	Santa Ana Wildfire Threat Index
<b>SCADA</b>	Supervisory control and data acquisition
<b>SCE</b>	Southern California Edison Company
<b>SDG&amp;E</b>	San Diego Gas & Electric Company
<b>S-MAP</b>	Safety Model Assessment Proceeding, now the Risk-Based Decision-Making Framework Proceeding

<b>TBC</b>	Trans Bay Cable
<b>TURN</b>	The Utility Reform Network
<b>USFS</b>	United States Forest Service
<b>VM</b>	Vegetation management

Term	Definition
<b>VRI</b>	Vegetation risk index
<b>WMP</b>	Wildfire Mitigation Plan
<b>WRRM</b>	Wildfire Risk Reduction Model
<b>WSAB</b>	Wildfire Safety Advisory Board
<b>WUI</b>	Wildland-urban interface

## Appendix B.

# Status of 2023 Areas for Continued Improvement

Energy Safety's 2023 Decision<sup>1</sup> for BVES identified areas for continued improvement and associated required progress. Areas for continued improvement are where BVES must continue to improve its wildfire mitigation capabilities. As part of the 2025 WMP Update evaluation process, Energy Safety reviewed the progress reported by BVES on areas for continued improvement that Energy Safety required progress on by the 2025 WMP Update. Energy Safety is not satisfied that BVES has made sufficient progress in all the identified areas for continued improvement.

BVES's 2023 areas for continued improvement that Energy Safety required progress on by the 2025 WMP Update are listed in Table A-1. The status column indicates whether each has been fully addressed. If not, the column notes where to find more information in this Decision.

---

<sup>1</sup> [Decision on BVES's 2023-2025 Base WMP](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true) (November 6, 2023), pp. 73-75 (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=55945&shareable=true, accessed July 12, 2024).

Table A-1. BVES 2023 Areas for Continued Improvement

ID	Title	Status
<b>BVES-23B-02</b> <b>(BVES-23-02)</b>	PSPS and Wildfire Risk Trade-Off Transparency	BVES sufficiently addressed the required progress thus far; Energy Safety will continue to monitor progress. For related areas for continued improvement, see Sections 6 and 11 of this Decision.
<b>BVES-25U-01</b> <b>(BVES-23-03)</b>	Cross-Utility Collaboration on Best Practices for Inclusion of Climate Change Forecasts in Consequence Modeling, Inclusion of Community Vulnerability in Consequence Modeling, and Utility Vegetation Management for Wildfire Safety	BVES did not sufficiently address the required progress. For related areas for continued improvement, see Sections 7 and 11 of this Decision.
<b>BVES-23B-04</b> <b>(BVES-23-04)</b>	Cross-Utility Collaboration on Risk Model Development	BVES sufficiently addressed the required progress.
<b>BVES-23B-05</b> <b>(BVES-23-05)</b>	Collaboration Between Vendor and Utility Risk Teams	BVES sufficiently addressed the required progress.
<b>BVES-23B-06</b> <b>(BVES-23-06)</b>	Vendor Fire Risk Model Implementation Milestones and Dates	BVES sufficiently addressed the required progress.
<b>BVES-23B-09</b> <b>(BVES-23-09)</b>	Radford Line Project	BVES sufficiently addressed the required progress.
<b>BVES-23B-10</b> <b>(BVES-23-10)</b>	Grid Hardening Pilots	BVES sufficiently addressed the required progress.

ID	Title	Status
<b>BVES-25U-02 (BVES-23-11)</b>	Covered Conductor Inspections and Maintenance	BVES did not sufficiently address the required progress. For related areas for continued improvement, see Sections 8.1.3 and 11 of this Decision.
<b>BVES-23B-12 (BVES-23-12)</b>	Distribution Detailed Inspection Frequency	BVES sufficiently addressed the required progress.
<b>BVES-25U-03 (BVES-23-13)</b>	Asset Inspection QA/QC Program	BVES did not sufficiently address the required progress. For related areas for continued improvement, see Sections 8.1.6 and 11 of this Decision.
<b>BVES-23B-14 (BVES-23-14)</b>	Non-Exempt Surge Arrester Replacement	BVES sufficiently addressed the required progress.
<b>BVES-25U-04 (BVES-23-15)</b>	Device Setting Improvement (Reliability Impacts of Fast Trip Settings)	BVES did not sufficiently address the required progress. For related areas for continued improvement, see Sections 8.1.8 and 11 of this Decision.
<b>BVES-23B-17 (BVES-23-17)</b>	Weather Station Maintenance and Calibration	BVES sufficiently addressed the required progress.
<b>BVES-23B-18 (BVES-23-18)</b>	Fire Potential Index	BVES sufficiently addressed the required progress.

## Appendix C.

# Stakeholder Comments on the 2025 WMP Updates

Energy Safety invited stakeholders, including members of the public, to provide comments on the electrical corporations' 2025 WMP Updates. Opening comments on Group 1 WMPs were due on May 7, 2024, and reply comments were due on May 21, 2024.<sup>2</sup> Energy also invited stakeholders to provide comments on BVES's resubmitted 2025 WMP Updates (Revision 1 and Revision 2)<sup>3,4</sup> as a result of Energy Safety's Rejection and Order to Resubmit<sup>5</sup> as well as Energy Safety's Notice on Errata.<sup>6</sup> Opening comments following the Rejection and Order to Resubmit were due June 10, 2024, and reply comments were due June 17, 2024. Comments following the Notice on Errata were due August 5, 2024. Energy Safety did not receive any comments on BVES's resubmitted 2025 WMP Updates (Revisions 1 and 2). The following individuals and

---

<sup>2</sup> The reply comment period for Group 1 electrical corporations' 2025 WMP Updates was extended from May 17, 2024, to May 21, 2024. See Energy Safety's [Deadline Extension for 2025 Wildfire Mitigation Plan Update Reply Comments \(May 2024\)](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56689&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56689&shareable=true, accessed June 11, 2024).

<sup>4</sup> [BVES's 2025 WMP Update, Revision 2](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57055&shareable=true, accessed August 6, 2024); [BVES's Redlined 2023-2025 Base WMP, Revision 2](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57057&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57057&shareable=true, accessed August 6, 2024); [BVES's Clean Updated 2023-2025 Base WMP, Revision 2](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57056&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57056&shareable=true, accessed August 6, 2024).

<sup>5</sup> Energy Safety [Rejection and Order to Resubmit for Bear Valley Electric Service, Inc. 2025 Wildfire Mitigation Plan Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56676&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56676&shareable=true, accessed July 30, 2024).

<sup>6</sup> Energy Safety [Notice on Errata for Bear Valley Electric Service, Inc. 2025 Wildfire Mitigation Plan Update](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57028&shareable=true) (https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=57028&shareable=true, accessed July 30, 2024).

organizations submitted comments on BVES's initial 2025 WMP Update submission (R0) that Energy Safety considered in this Decision:

- California Department of Fish and Wildlife (CDFW)
- The Public Advocates Office at the California Public Utilities Commission (Cal Advocates)

Comments received on the 2023-2025 WMPs can be viewed in the 2023-2025 Wildfire Mitigation Plan (2023-2025-WMPs) docket log.

Energy Safety concurred with and incorporated the following stakeholder comments into Energy Safety's findings on BVES's 2025 WMP Update:

- Cal Advocates commented that Energy Safety require BVES to:
  - Implement a more thorough quality control program for asset inspections.
  - Develop a program of fast-trip settings.
  - Update its PSPS procedures to include thresholds based on its new fire potential index (FPI).

## **Appendix D.**

# **Stakeholder Comments on the Draft Decision**

Energy Safety invited stakeholders including members of the public to provide comments on Energy Safety's draft Decision for BVES's 2025 WMP Update, published on August 27, 2024. Opening comments on the draft Decision were due on September 16, 2024, and reply comments were due on September 26, 2024.

Energy Safety did not receive any comments on the draft Decision for BVES's 2025 WMP Update.

## Appendix E.

# Maturity Survey Results

Energy Safety's 2023-2025 Electrical Corporation Wildfire Mitigation Maturity Model<sup>7</sup> (Maturity Model) and Electrical Corporation Wildfire Mitigation Maturity Survey<sup>8</sup> (Maturity Survey) together provided a quantitative method to assess the maturity of each electrical corporation's wildfire risk mitigation program.

The Maturity Model consists of 37 individual capabilities describing the ability of electrical corporations to mitigate wildfire risk within their service territory. The 37 capabilities are aggregated into seven categories. The seven mitigation categories are:

- A. Risk Assessment and Mitigation Selection
- B. Situational Awareness and Forecasting
- C. Grid Design, Inspections, and Maintenance
- D. Vegetation Management and Inspections
- E. Grid Operations and Protocols
- F. Emergency Preparedness
- G. Community Outreach and Engagement

Maturity levels range from 0 (below minimum requirements) to 4 (beyond best practice). Electrical corporations' responses to the Maturity Survey, listed by mitigation category, are depicted in the figures and tables below.

Figure A-1 displays BVES's 2024 response to the Maturity Survey across mitigation categories showing minimum and average values. Figure A-2 compares BVES's 2024 response to the Maturity Survey to its 2023 response to the Maturity Survey, depicting values that increased, decreased, or had no change (indicated by "NC").

---

<sup>7</sup> [Energy Safety's 2023-2025 Electrical Corporation Wildfire Mitigation Maturity Model \(revised and adopted Jan. 2024, published Feb. 2024\)](https://efiling.energysafety.ca.gov/eFiling/Getfile.aspx?fileid=56256&shareable=true)
