

Decision 26-05-037

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Application of
SOUTHERN CALIFORNIA EDISON
COMPANY (U338E) for a Certificate of
Public Convenience and Necessity for the
Alberhill System Project.

Application 09-09-022

ORDER CORRECTING ERROR

The Commission has been informed of an obvious, inadvertent clerical error in Decision (D.) 26-03-019.

D.26-03-019 discusses the approval of minor changes to the Alberhill System Project (Alberhill project) in Section 10, Minor Project Refinements. The Commission’s Energy Division may approve minor project refinements so long as they do not result, without mitigation, in a new significant impact.¹ To reflect this discussion, Conclusion of Law 10 states:

The Commission’s Energy Division should be authorized to approve requests by SCE for minor project refinements that may be necessary, so long as the minor project refinements are located within the geographic boundary of the area and do not 1) result, without mitigation, in a new significant impact based on the criteria used in the Final EIR; 2) substantively conflict with any mitigation measures or applicable law or policy; and/or 3) trigger an additional discretionary permit requirement.

¹ D.26-03-019 at 54.

Currently, Ordering Paragraph 4 is clearly incorrect and inconsistent with the discussion and Conclusion of Law 6 because it would allow Energy Division approval of minor project refinements that do not result, “with mitigation,” in a new significant impact, as opposed to minor project refinements that do not result, “without mitigation,” in a new significant impact.

Therefore, Ordering Paragraph 4 should be modified as follows:

The Commission’s Energy Division may approve requests by Southern California Edison Company (SCE) for minor project refinements that may be necessary, so long as such minor project refinements are located within the geographic boundary of the study area, and do not result, without mitigation, in a new significant impact based on the criteria used in the Final EIR, conflict with any mitigation or applicable law or policy; and/or trigger additional discretionary permit requirement. SCE shall seek any other project refinements by filing a petition for modification of today’s decision.

Therefore, pursuant to Resolution A-4661,

IT IS ORDERED that D.26-03-019 is corrected as follows:

1. Ordering Paragraph 4 is revised to state:

The Commission’s Energy Division may approve requests by Southern California Edison Company (SCE) for minor project refinements that may be necessary, so long as such minor project refinements are located within the geographic boundary of the study area, and do not result, without mitigation, in a new significant impact based on the criteria used in the Final EIR, conflict with any mitigation or applicable law or policy; and/or trigger additional discretionary permit requirement. SCE shall seek any

other project refinements by filing a petition for modification of today's decision.

2. This order is effective today.

Dated May 15, 2026, at San Francisco, California.
