**Pacific Gas and Electric Company Electric Transmission
Interconnection Agreement for Google LLC**

[24254]

Res E-5455, Advice Letter 7785-E filed December 18, 2025 - Related matters.

PROPOSED OUTCOME:

- Approves, with modifications, an agreement to facilitate the energization of a new 250 megawatt data center load through transmission-level retail electric service for customer Google LLC.
- Modifies the energization-related capital advance and refund process, limiting annual refunds to the annual net revenues received from the customer plus an adjustment for the Income Tax Component of Contribution (ITCC).
- Requires special treatment of costs associated with broader transmission network upgrades, determined through a Tier 2 Advice Letter.
- Requires additional clarifications and reporting regarding the proposed binding cost cap for the portion of the project built by Google LLC, including separate calculation of the cost cap for refundable versus non-refundable costs, and a Tier 1 information-only Advice Letter filing when the cost cap is finalized.

SAFETY CONSIDERATIONS:

- There are no safety considerations associated with this resolution.

ESTIMATED COST:

- Facilitates the energization of a new customer including both the associated costs of energization and the expected future revenues from the customer. The customer pays some upfront costs to connect to the grid, and could then be refunded for these costs after sufficient revenue is generated. Limits refunds to the annual net revenue generated by the customer plus an adjustment for the ITCC and accounts for broader transmission network upgrades, reducing risks for ratepayers.

Ratification of Off-Agenda Approval to File Federal Communication Commission Comments and Reply Comments

[24397]

WC Docket No. 17-84, DC Docket No. 10-101 - Related matters.

On July 13, 2026 and July 27, 2026, the California Public Utilities Commission's (CPUC) Litigation Subcommittee gave Legal Division off-agenda authorization to file Opening Comments and Reply Comments responding to a Federal Communication Commission (FCC) Public Notice (FCC DA 26-579). Legal Division now requests CPUC ratification of the off-agenda authorizations. The FCC's Public Notice expressed concerns that some states' pole attachment regulations are ineffective or obsolete and proposed an FCC review process of state regulations. The CPUC's Comments state that the federal statute governing pole attachments preempts FCC authority once a state certifies that it regulates pole attachments. The Comments also discuss how the CPUC pole attachment regulations are often updated to address changing conditions, such as addressing wildfire conditions, a streamlined pole attachment process and the CPUC's requirements for statewide pole databases.

PROPOSED OUTCOME:

- Awards Small Business Utility Advocates (SBUA) \$65,340.13 for substantial contribution to Decision 25-12-044. The Decision affirms the requirement for the investor-owned energy utilities and Class A water utilities to continue to publicly release the Cost and Rate Trackers and eliminates the option to alternatively submit summaries, known as Quarterly Revenue Reports.
