**Pacific Gas and Electric Company Electric Transmission
Interconnection Agreement for Google LLC**

[24254]

Res E-5455, Advice Letter 7785-E filed December 18, 2025 - Related matters.

PROPOSED OUTCOME:

- Approves, with modifications, an agreement to facilitate the energization of a new 250 megawatt data center load through transmission-level retail electric service for customer Google LLC.
- Modifies the energization-related capital advance and refund process, limiting annual refunds to the annual net revenues received from the customer plus an adjustment for the Income Tax Component of Contribution (ITCC).
- Requires special treatment of costs associated with broader transmission network upgrades, determined through a Tier 2 Advice Letter.
- Requires additional clarifications and reporting regarding the proposed binding cost cap for the portion of the project built by Google LLC, including separate calculation of the cost cap for refundable versus non-refundable costs, and a Tier 1 information-only Advice Letter filing when the cost cap is finalized.

SAFETY CONSIDERATIONS:

- There are no safety considerations associated with this resolution.

ESTIMATED COST:

- Facilitates the energization of a new customer including both the associated costs of energization and the expected future revenues from the customer. The customer pays some upfront costs to connect to the grid, and could then be refunded for these costs after sufficient revenue is generated. Limits refunds to the annual net revenue generated by the customer plus an adjustment for the ITCC and accounts for broader transmission network upgrades, reducing risks for ratepayers.

**Emergency Disaster Relief and Program Updates for
California LifeLine Participants**

[24421]

R.25-11-005

Order Instituting Rulemaking to Update the California LifeLine Program.

PROPOSED OUTCOME:

- Adopts a permanent disaster relief program for participants of the California LifeLine program.
- Makes program changes and provides guidance regarding program implementation following federal revocation of California's ability to make federal LifeLine eligibility determinations.
- Updates General Order 153-A.

SAFETY CONSIDERATIONS:

- Protects participant access to affordable essential communications services following certain declarations of a state of emergency.

ESTIMATED COST:

- The cost estimate is dependent on the frequency and locations of qualifying declared emergencies, which are unknown at this time. During the Covid-19 pandemic, in Decision 20-05-043, the California Public Utilities Commission waived the same California LifeLine provisions that would be waived during qualifying emergencies pursuant to this decision. The cost estimate for extending the waivers through June 30, 2020, via that decision was approximately \$10 million.

- Directs SCE Company to implement the Commission's fire-safety regulations in new areas of the High Fire-Threat District no later than January 1, 2027.
- Closes the proceeding.

SAFETY CONSIDERATIONS:

ESTIMATED COST:

- Some incremental costs may result from implementation of the Commission's fire-safety regulations; cost recovery for any such costs is consistent with Decision 17-12-024.
