- Q 1 Please state your name and business address.
- A 1 My name is Yumi Oum, and am currently working remotely as Pacific Gas and Electric Company (PG&E) transitions from its prior location at 245 Market Street, San Francisco, California to 300 Lakeside Drive, Oakland, California.
- Q 2 Briefly describe your responsibilities at PG&E.
- A 2 I am a Senior Manager in the Enterprise and Operational Risk Management organization and I oversee the Risk Analytics team.
- Q 3 Please summarize your educational and professional background.
- A 3 I received a Bachelor of Science degree and a Master of Science degree from the Korea Advanced Institute of Science and Technology in Industrial Engineering. I also received a Master of Science and a Ph.D. from the University of California, Berkeley in Industrial Engineering and Operations Research. My Ph.D. thesis was based on Managing Volumetric Risk in Energy Procurement. From 2006 to 2016 I was a quantitative analyst charged with building models for supporting energy procurement and risk hedging decisions incorporating short-term and long-term uncertainties in energy prices, load, generation from supply-side resources, and load reduction from demand-side resources. From 2017 to May 2019, I was the Manager of the Quantitative Analysis team in PG&E's Strategic Quantitative Analysis and Modeling group which developed financial, stochastic, optimization and forecasting models associated with energy and capacity markets, and developed resource valuations in uncertain energy markets. Starting in June 2019 I became the Sr. Manager of the Enterprise and Operational Risk Management Quantification (now Risk Analytics) team. To support PG&E's 2020 Risk Assessment Mitigation Phase and the 2023 General Rate Case, my team led the development of PG&E's Multi-Attribute Value Function (MAVF), designed and implemented PG&E's Python-based Enterprise Risk Model (ERM) to use that MAVF to compute baseline and (portfolio-based) mitigated risk scores for each of PG&E's Corporate Risk Register risk events, designed and implemented a stand-alone tool (RSE

1 Lite) to facilitate risk spend efficiency calculations across PG&E's portfolio of
2 mitigations and controls. I was an author of PG&E's Risk Assessment
3 Mitigation Phase Report pertaining to PG&E's MAVF and ERM. Both ERM
4 and RSE Lite also supported PG&E's risk analysis in the 2021 and 2022
5 Wildfire Mitigation Plans.

6 Q 4 What is the purpose of your testimony?

7 A 4 I am supporting the following opening testimony and workpapers in PG&E's
