1 **MEMORANDUM**

2 The Public Advocates Office at the California Public Utilities Commission (“Cal
3 Advocates”) examined application material, data request responses, and other
4 information presented by California American Water Company (“Cal Am”) in
5 Application (“A.”) 22-07-001 to provide the California Public Utilities Commission
6 (“Commission” or “CPUC”) with recommendations in the interests of ratepayers for safe
7 and reliable service at the lowest cost. Mr. Courtney Sorensen is Cal Advocates’ project
8 lead for this proceeding. This Report is prepared by Mr. Justin Menda. Mr. Mukunda
9 Dawadi is the oversight supervisor. Ms. Angela Wuerth and Ms. Emily Fisher are the
10 legal counsel.

11 Although every effort was made to comprehensively review, analyze, and provide
12 the Commission with recommendations on each ratemaking and policy aspect presented
13 in the Application, the absence from Cal Advocates’ testimony of any particular issue
14 connotes neither agreement nor disagreement of the underlying request, methodology, or
15 policy position related to that issue.

1 **CHAPTER 1 PLANT – SACRAMENTO**

2 **I. INTRODUCTION**

3 Cal Am’s Sacramento District is comprised of the following water systems:
4 Antelope, Arden, Dunnigan, Isleton, Lincoln Oaks, Meadowbrook, Parkway, Suburban
5 Rosemont, Security Park, Walnut Grove, West Placer, Fruitridge Vista (“Fruitridge”),
6 and Hillview.¹ The Sacramento District is supplied through a combination of
7 groundwater wells and purchased water.²

8 Cal Am has actively pursued acquisition of other water systems to incorporate into
9 its existing districts, including the Sacramento District. Cal Am acquired the Fruitridge
10 and the Hillview systems in 2020.³ Cal Am filed an application (A.22-03-002) in 2022 to
11 acquire Bass Lake Water Company.⁴ Approximately 25% and 18% of Cal Am’s total
12 annual proposed project budgets for the Sacramento District in 2024 and 2025
13 respectively are related to recent and pending acquisitions of other water systems.⁵

14 Cal Advocates reviewed Cal Am’s testimony, application, work-papers, minimum
15 data requirements, Comprehensive Planning Study (“CPS”), Condition Based
16 Assessment of Buried Infrastructure, cost estimates, and responses to Cal Advocates’

¹ Application (A.)22-07-001, *Direct Testimony of Garry Hofer* (Hofer Direct Testimony) at 3:17-20. A Proposed Decision issued in A.22-03-002 on February 17, 2023, which, if adopted by the Commission, authorizes Cal Am’s purchase of Bass Lake Water Company assets.

² Hofer Direct Testimony at 6-7.

³ Hofer Direct Testimony at 3-4.

⁴ Hofer Direct Testimony at 67.

⁵ Cal Advocates Report on Plant for Northern and Central Divisions, and Tank Painting, Chapter 1, (Cal Advocates Northern and Central Division Plant and Tank Painting) Attachment 1-2, *Capital Budget Details – Sacramento District*. Cal Am requests approximately \$10,281,588 in 2024 and \$8,152,939 in 2025 for direct project cost additions (including recurring project budget) related to recently acquired systems or pending system acquisition. This results in approximately 25% of Cal Am’s total annual proposed project budgets in 2024 ($\$10,281,588 \div \$40,832,021 \approx 25\%$) and 18% of Cal Am’s total annual proposed project budgets in 2025 ($\$8,152,939 \div \$44,352,213 \approx 18\%$). The aforementioned direct project cost additions include projects from the Dunnigan, Dunnigan Wastewater, Geyserville, Meadowbrook, Fruitridge, Hillview, and Bass Lake systems.

1 data requests. In addition, Cal Advocates conducted a field investigation of the
2 Sacramento District’s water systems on November 3-4, 2022. This chapter presents the
3 recommendations the Commission should adopt for the proposed Plant in Service for Cal
4 Am’s Sacramento District.

5 **II. SUMMARY OF RECOMMENDATIONS**

6 The Commission should adjust Cal Am’s requested budgets for individual
7 proposed projects in the Sacramento District, as follows:

- 8 • The Commission should reduce the annual budget for the Hillview Tank
9 Rehab Program (I15-670004) to \$185,067 (from \$471,960) for capitalized
10 tank improvements and include \$24,797 annually for tank painting
11 improvements.⁶
- 12 • The Commission should reduce the annual budget for the Hillview Tank
13 Replacement Program (I15-670005) to \$327,319 (from \$1,096,640) since
14 only one tank requires replacement, and only allow funding for tank
15 maintenance for the remaining nine tanks.⁷
- 16 • The Commission should reject funding for the Fruitridge Well Replacement
17 and Installation Program (I15-6600006) because it is not necessary.⁸ There
18 is sufficient supply capacity in the Fruitridge system without the wells Cal
19 Am proposes to replace.
- 20 • The Commission should reduce the main replacement budget in the
21 Fruitridge system (I15-660002) to \$3,595,120 in 2023, \$3,706,569 in 2024,
22 and \$3,818,507 in 2025 based on the Cal Am’s recommended main
23 replacement rate.⁹
- 24 • The Commission should reduce the annual budget to \$394,677 in 2024 and
25 \$406,596 in 2025 for the Service Saddle Replacement Program (I15-
26 660002). This reduction is appropriate because it is necessary to reduce

⁶ The tank painting costs are taken from the tank inspection reports.

⁷ In addition, the Commission should also allow \$294,807 annually for tank painting costs mentioned in the tank inspection reports. The tank maintenance costs are taken from the tank inspection reports.

⁸ Cal Am requests \$1,288,000 in 2024 and \$2,760,000 in 2025.

⁹ Cal Am Engineering Workpaper, Tab 109 at 1-4. Cal Am requests \$7,360,000 in 2023, \$6,523,720 in 2024, and \$5,658,000 in 2025.

- 1 both the number of saddle services replaced annually and unit replacement
2 costs.¹⁰
- 3 • The Commission should reduce the annual budget from for the Well
4 Installation and Replacement Program (I15-600113) to \$7,912,000 in 2024
5 and \$8,912,000 in 2025 because it is not necessary to replace four wells.¹¹
 - 6 • The Commission should reduce the Malaga Well Replacement and 1,2,3-
7 Trichloropropane (“1,2,3-TCP”) (I15-600110) budget to \$2,322,445
8 because the project is partially funded by a settlement.¹²
 - 9 • The Commission should reject the Wittkop 2 Water Treatment Plant (I15-
10 600108) since the manganese concentration at the well is under the
11 secondary maximum contaminant level (“SMCL”).¹³
 - 12 • The Commission should deny the annual budget of \$1,104,000 for the
13 Standby Generator Improvement Program (I15-600115) and the 2023
14 budget of \$690,000 for the Public Safety Power Shutoffs (“PSPS”)
15 Generator Improvements (I15-670001) consistent with Cal Advocates’
16 recommendation regarding generators.¹⁴
 - 17 • The Commission should reduce the annual main replacement program (I15-
18 600111) budget to \$2,064,617 based on Cal Am’s historical spending on
19 the main replacement program.¹⁵
 - 20 • The Commission should remove the cost of unnecessary standby
21 generators, redundant contingencies, and redundant overhead by reducing
22 the proposed budget for the Coarsegold Iron and Manganese Water
23 Treatment Plant (“WTP”) (I15-670002) to \$2,920,000 and the Goldside
24 Iron and Manganese WTP (I15-670003) to \$1,236,250.¹⁶

¹⁰ Cal Am requests \$1,472,000 in 2024 and \$2,024,000 in 2025.

¹¹ Cal Am requests \$11,868,000 in 2024 and \$12,466,000 in 2025.

¹² Cal Am requests a total direct project cost of \$5,980,000.

¹³ Cal Am requests \$184,000 in 2024 and \$3,484,040 in 2025.

¹⁴ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

¹⁵ Cal Am requests an annual budget of \$4,600,000.

¹⁶ Cal Am requests a direct project budget of \$3,680,000 for both the Coarsegold Iron and Manganese WTP projects.

1 Recommendations on plant additions also reflect Cal Advocates’
2 recommendations on project contingency and previously funded projects that are
3 expected to be completed in 2024 or later. The Commission should not allow Cal Am to
4 include in rates incomplete projects that have been previously included in rates until the
5 projects are actually completed, in service, and providing benefits to ratepayers. Cal Am
6 may seek recovery of the project costs when it files its next general rate case application
7 (in 2025).

8 Attachment 1-2 presents Cal Advocates’ project-specific adjustments.¹⁷ These
9 adjustments reduce the revenue requirement by approximately \$3,230,112 in 2024 and
10 \$3,294,097 in 2025.¹⁸ The Commission should adopt the capital budget summary
11 presented in Table 1-1 below.

¹⁷ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Attachment 1-2, *Capital Budget Details – Sacramento District*.

¹⁸ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Attachment 1-11, *Sacramento District – Revenue Requirement Calculation* (showing the revenue requirement calculation).

Table 1-1: Capital Budget Summary – Sacramento District¹⁹

Sacramento (\$000)	2024	2025	Annual Average
Public Advocates Office Recommendation	\$ 26,993.46	\$ 27,639.84	\$ 27,316.65
Cal Am's Proposed	\$ 40,832.02	\$ 44,352.21	\$ 42,592.12
Cal Am> Public Advocates Office	\$ 13,838.56	\$ 16,712.37	\$ 15,275.47
Public Advocates Office as % of Cal Am	66%	62%	64%

1 **III. ANALYSIS**

2 Unless otherwise stated, the project costs listed and discussed below are direct
 3 project costs. The direct project costs are the cost of the project without add-on costs
 4 (e.g. overhead).

5 **A. Proposed Projects**

6 **1. Hillview Tank Projects (I15-670004 and I15-670005)**
 7

8 The Commission should reduce Cal Am’s proposed annual budget for the
 9 Hillview Tank Rehabilitation Program (I15-670004) to \$185,067 (from \$471,960)²⁰ due
 10 to separating \$24,797 in annual tank painting costs from the capital budget and removing
 11 contingency. The Commission should also reduce Cal Am’s proposed annual budget for
 12 the Hillview Tank Replacement Program (I15-670005) to \$327,319 (from \$1,096,640)²¹
 13 since only the Vista Heights Tank 2 requires replacement. It is appropriate only to allow

¹⁹ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

²⁰ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

²¹ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am requests to replace ten tanks in 2024-2029.

1 tank maintenance costs for the remaining nine tanks.²² In addition, the Commission
2 should add \$294,807 annually for tank painting budgets associated with these remaining
3 nine tanks under the Hillview Tank Replacement Program.²³

4 Cal Am calculates its proposed annual tank program budgets by dividing the
5 individual tank costs over a six-year period (2024-2029).²⁴ Cal Am plans on replacing
6 tanks in Hillview that were installed prior to 2017.²⁵ Cal Am conducted tank inspections
7 for the tanks in Hillview in 2021.²⁶ These tank inspection reports provide a list of
8 recommended improvements (both capitalized and deferred improvements).²⁷ For the
9 Hillview Tank Replacement Program, the tank inspection reports only justify the

²² The recommended annual budget of \$327,319 only includes capitalized tank improvement costs related to the nine tanks.

²³ The annual tank painting costs of \$24,797 for the Hillview Tank Rehabilitation Program and \$294,807 for the Hillview Tank Replacement Program would be treated as additional deferred program maintenance costs in Cal Am’s RO model (Cal Am RO model file “ALL_CH04_O&M_WP_Def Prog Maint,” tab: “REC”). The tank painting costs are taken from the tank inspection reports.

²⁴ Cal Am Engineering Workpaper, Tab 117 at 1-22 to 1-23. Cal Am Engineering Workpaper, Tab 118 at 1-25 to 1-26.

²⁵ Crooks Direct Testimony at 230:20-21. Cal Am Engineering Workpaper, Tab 118 at 1-25 to 1-26 shows that the proposed budget for the Hillview Tank Replacement Program is to replace ten tanks. The number of tanks was taken from the Cal Am Engineering Workpaper, Tab 118 since this is the number of tanks Cal Am used in calculating the annual project budget.

²⁶ A.22-07-001, *Direct Testimony of Ian C. Crooks* (Crooks Direct Testimony) at 229:11.

²⁷ Cal Am Response to Public Advocates Office Data Request JMI-004 (Hillview Tanks), JMI-004 Q1 Attachments 1 – Coarsegold 1 Evaluation Report Redacted at 16, 2 – Coarsegold 2 Evaluation Report Redacted at 17, 3 – Goldside Reservoir Evaluation Report Redacted at 9, 4 – Quail Meadows Tank Evaluation Report Redacted at 14, 6 – Vista Tank 2 Evaluation Report Redacted at 16, 7 – 420 Reservoir Evaluation Redacted at 16, 9 – 437 Reservoir Evaluation Report Redacted at 16, 10 – Site 9 Tank 1 Evaluation Report Redacted at 15, 11 – Site 9 Tank 2 Evaluation Report Redacted at 15, 12 – Site 10 Tank Evaluation Redacted at 16, 13 – SLWTP Tank 1 Evaluation Report Redacted at 16, 14 – SLWTP Tank 2 Evaluation Report Redacted at 16, 15 – SLWTP Backwash Tank Evaluation Report Redacted at 16, 16 – Courtney Tank #1 Evaluation Report Redacted at 16, 17 – Courtney Tank #2 Evaluation Report Redacted at 16, 18 – FRTP Tank #1 Evaluation Report Redacted at 16, 19 – FRTP Tank #2 Evaluation Report Redacted at 16, 20 – FRTP BWT Evaluation Report Redacted at 13, 21 – Raymond TP #1 Tank Evaluation Report Redacted at 16, 22 – Raymond TP #2 Evaluation Report Redacted at 15, 23 – Influent Blending Tank Evaluation Report Redacted at 9, 24 – Raymond TP Sludge Tank Evaluation Report Redacted at 10, and 25 – Raymond TP BTW Evaluation Report Redacted at 10.

1 replacement of Vista Heights Tank 2 as a more economical option than repairs.²⁸ Since
2 only one tank warrants replacement, funding for only one tank should be allowed for the
3 Hillview Tank Replacement Program. For the remaining nine tanks in the Hillview Tank
4 Replacement Program, only funding should be allowed for tank improvements.

5 The tank painting costs associated with the tanks in the Hillview Tank
6 Rehabilitation Program and the remaining nine tanks in the Hillview Tank Replacement
7 Program²⁹ should be separated from their respective capital budgets and treated as
8 deferred program maintenance costs, consistent with how Cal Am handles tank painting
9 costs.³⁰

10 The improvements costs for the tanks in the Hillview Tank Rehabilitation Program
11 and the remaining nine tanks in the Hillview Tank Replacement Program are artificially
12 inflated with contingency costs.³¹ Cal Advocates removed the contingency line-item

²⁸ Cal Am Response to Public Advocates Office Data Request JMI-004 (Hillview Tanks), JMI-004 Q1 Attachments 1 – Coarsegold 1 Evaluation Report Redacted at 16, 2 – Coarsegold 2 Evaluation Report Redacted at 17, 3 – Goldside Reservoir Evaluation Report Redacted at 9, 4 – Quail Meadows Tank Evaluation Report Redacted at 14, 6 – Vista Tank 2 Evaluation Report Redacted at 16, 7 – 420 Reservoir Evaluation Redacted at 16, 9 – 437 Reservoir Evaluation Report Redacted at 16, 10 – Site 9 Tank 1 Evaluation Report Redacted at 15, 11 – Site 9 Tank 2 Evaluation Report Redacted at 15, 12 – Site 10 Tank Evaluation Redacted at 16.

²⁹ For some of the remaining nine tanks, most of the recommended improvement costs are routine tank maintenance related to tank painting. Cal Am Response to Public Advocates Office Data Request JMI-004 (Hillview Tanks), JMI-004 Q1 Attachments 7 – 420 Reservoir Evaluation Redacted at 16, 9 – 437 Reservoir Evaluation Report Redacted at 16, 10 – Site 9 Tank 1 Evaluation Report Redacted at 15, 11 – Site 9 Tank 2 Evaluation Report Redacted at 15. Tank painting costs represent approximately 74.4%, 83.2%, 49.8%, 51.7%, of the total improvement costs for the 420 Reservoir, 437 Reservoir, Site 9 Tanks 1 and 2, respectively.

³⁰ Crooks Direct Testimony at 259:15-17. Cal Am amortizes tank painting costs over a ten-year period. Cal Am treats tank painting costs as deferred program maintenance costs in their RO model (Cal Am RO model file “ALL_CH04_O&M_WP_Def Prog Maint,” tab: “REC”).

³¹ Cal Am Response to Public Advocates Office Data Request JMI-004 (Hillview Tanks), JMI-004 Q1 Attachments 1 – Coarsegold 1 Evaluation Report Redacted at 16, 2 – Coarsegold 2 Evaluation Report Redacted at 17, 3 – Goldside Reservoir Evaluation Report Redacted at 9, 4 – Quail Meadows Tank Evaluation Report Redacted at 14, 6 – Vista Tank 2 Evaluation Report Redacted at 16, 7 – 420 Reservoir Evaluation Redacted at 16, 9 – 437 Reservoir Evaluation Report Redacted at 16, 10 – Site 9 Tank 1 Evaluation Report Redacted at 15, 11 – Site 9 Tank 2 Evaluation Report Redacted at 15, 12 – Site 10 Tank Evaluation Redacted at 16. The inspection reports show a total contingency items budget of

1 from the project costs (which the tank inspection reports refer to as “contingency items”),
2 ³² consistent with Cal Advocates’ recommendation regarding project contingency.”³³

3 Based on the above adjustments to Cal Am’s proposed budget for the
4 Hillview Tank Rehabilitation Program, the Commission should approve an annual project
5 budget of \$185,067, plus a tank painting budget of \$24,797 annually for tanks associated
6 with the Hillview Tank Rehabilitation Program.³⁴ The Commission should also
7 authorize an annual budget of \$327,319, plus a tank painting budget of \$294,807 for the
8 Hillview Tank Replacement Program.³⁵

9 **2. Fruitridge Vista Well Replacement and Installation**
10 **Program (I15-660006)**

11 The Commission should reject Cal Am’s request of \$1,288,000 in 2024 and
12 \$2,760,000 in 2025³⁶ to replace three wells in the Fruitridge Vista system³⁷ because

\$188,000 among the nine tanks that has been included in the improvement costs.

³² Cal Am Response to Public Advocates Office Data Request JMI-004 (Hillview Tanks), JMI-004 Q1 Attachments 1 – Coarsegold 1 Evaluation Report Redacted at 16, 2 – Coarsegold 2 Evaluation Report Redacted at 17, 3 – Goldside Reservoir Evaluation Report Redacted at 9, 4 – Quail Meadows Tank Evaluation Report Redacted at 14, 7 – 420 Reservoir Evaluation Redacted at 16, 9 – 437 Reservoir Evaluation Report Redacted at 16, 10 – Site 9 Tank 1 Evaluation Report Redacted at 15, 11 – Site 9 Tank 2 Evaluation Report Redacted at 15, 12 – Site 10 Tank Evaluation Redacted at 16, 13 – SLWTP Tank 1 Evaluation Report Redacted at 16, 14 – SLWTP Tank 2 Evaluation Report Redacted at 16, 15 – SLWTP Backwash Tank Evaluation Report Redacted at 16, 16 – Courtney Tank #1 Evaluation Report Redacted at 16, 17 – Courtney Tank #2 Evaluation Report Redacted at 16, 18 – FRTP Tank #1 Evaluation Report Redacted at 16, 19 – FRTP Tank #2 Evaluation Report Redacted at 16, 20 – FRTP BWT Evaluation Report Redacted at 13, 21 – Raymond TP #1 Tank Evaluation Report Redacted at 16, 22 – Raymond TP #2 Evaluation Report Redacted at 15, 23 – Influent Blending Tank Evaluation Report Redacted at 9, 24 – Raymond TP Sludge Tank Evaluation Report Redacted at 10, and 25 – Raymond TP BTW Evaluation Report Redacted at 10.

³³ Cal Advocates Report, Report on Capital Contingency Factors, Southern Division, Special Request 4, and Extra Ordinary Early Retirements, Chapter 1.

³⁴ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Attachment 1-3, I15-670004 – *Direct Project Cost* (showing the revised direct project cost calculation).

³⁵ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Attachment 1-4, I15-670005 – *Direct Project Cost* (showing the revised direct project cost calculation).

³⁶ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

1 replacement is not necessary. There is sufficient supply capacity in the system without
2 the wells Cal Am proposes to replace.

3 The Fruitridge system consists of 12 active groundwater wells with a total well
4 capacity of 6,270 gallons per minute (“gpm”).³⁷ In addition to the active groundwater
5 wells, Cal Am has two interconnections with the City of Sacramento with a combined
6 supply capacity of 2,250 gpm, two emergency interties with the City of Sacramento, and
7 an intertie with Cal Am’s Parkway system.³⁸ Cal Am requests to replace Wells 3, 7, and
8 9.⁴⁰ These three wells have a combined capacity of approximately 1,850 gpm.⁴¹ The
9 total well system capacity would be 5,170 gpm if these three wells were removed.⁴²

10 State regulations for drinking water standards (“California Waterworks
11 Standards,” or “Waterworks Standards”) state that public water systems shall have the
12 capacity to meet the system’s maximum day demand (“MDD”).⁴³ The Waterworks
13 Standards also state that systems with 1,000 or more service connections must be able to
14 meet four hours of peak hour demand (“PHD”) with source capacity, storage capacity,
15 and/or emergency source connections.⁴⁴

³⁷ Cal Am Engineering Workpaper, Tab 113 at 4.

³⁸ Cal Am Engineering Workpaper, Redacted Tab 169 at 3-2.

³⁹ State Water Resources Control Board’s Division of Drinking Water (“DDW”) 2021 Fruitridge Vista Compliance Inspection Report (March 29, 2021) (2021 DDW Fruitridge Report) at 10-11. The emergency intertie capacity was not included in the calculation shown in Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Attachment 1-5, *Fruitridge Well Capacity Calculation*.

⁴⁰ Cal Am Engineering Workpaper, Tab 113 at 4.

⁴¹ Cal Am Engineering Workpaper, Redacted Tab 169, at 3-2. Well 9 is currently inactive (Redacted Tab 169 at 3-5). The total capacity of 6,270 gpm already excludes the capacity from Well 9. Well 9 has a capacity of 750 gpm.

⁴² The total well capacity excluding the capacity from Wells 3, 7, 9 and the largest remaining well is 4,270 gpm. (5,170 gpm – 900 gpm = 4,270 gpm).

⁴³ 22 California Code of Regulations (“CCR”) Section 64554 (a) (1).

⁴⁴ 22 CCR Section 64554 (a) (2). Cal Am Engineering Workpaper, Redacted Tab 169 at vii. Cal Am states that the Fruitridge system has approximately 4,892 service connections.

1 Cal Am projects the 2026 MDD and 2026 PHD to be 4.04 MG and 4.1MG,
2 respectively.⁴⁵

3 The Fruitridge system has sufficient capacity to meet both the MDD and four
4 hours of PHD, even without the wells Cal Am proposes to replace and the highest
5 capacity remaining well.⁴⁶ Therefore, the capacity from the replacement wells is not
6 needed and the Commission should reject Cal Am’s request.

7 **3. Fruitridge Vista Water Main Replacement (I15-**
8 **660002)**

9 The Commission should reduce the main replacement budget in the Fruitridge
10 system to \$3,595,120 in 2023, \$3,706,569 in 2024 and \$3,818,507 in 2025⁴⁷ based on Cal
11 Am’s recommended main replacement rate of two percent.⁴⁸

12 Cal Am requests to spend approximately \$26,901,720 in years 2022-2025 to
13 replace existing mains in the Fruitridge system.⁴⁹ Cal Am allocated its entire adopted
14 2019 rate case budget for the overall Sacramento Main Replacement Program (I15-
15 600097) (“2019 GRC Sacramento Main Replacement”) to fund the Fruitridge Vista
16 Water Main Replacement (“FVW Main Replacement”) up to the TY 2024 rate case
17 cycle.⁵⁰ The amount Cal Am planned to spend on water main replacement in 2022
18 exceeded the adopted 2021-2022 budget for 2019 GRC Sacramento Main Replacement

⁴⁵ Cal Am Engineering Workpaper, Redacted Tab 169 at 3-8.

⁴⁶ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Attachment 1-5, *Fruitridge Well Capacity Calculation*.

⁴⁷ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am requests \$7,360,000 in 2023, \$6,523,720 in 2024, and \$5,658,000 in 2025.

⁴⁸ Cal Am Engineering Workpaper, Tab 109 at 1-4.

⁴⁹ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

⁵⁰ Crooks Direct Testimony at 122:4-5. Cal Am first introduced the Fruitridge Vista Water Main Replacement Program in this rate case after the Commission adopted the 2021 and 2022 budget for the 2019 GRC Sacramento Main Replacement.

1 by approximately 24%.⁵¹ Similarly, the amount Cal Am now forecasts for 2023 to
2 replace mains in Sacramento exceeds Cal Am’s original 2023 forecast to replace mains in
3 Sacramento by approximately 148%.⁵² Cal Am’s request exceeds its recommended main
4 replacement rate of two percent per year (approximately 6,550 linear feet annually).⁵³

5 Cal Am presents the two percent annual replacement rate as the most cost-
6 effective solution to address mains that are identified with the greatest risk of failure.⁵⁴
7 At Cal Am’s recommended replacement rate, this equates to approximately \$3,211,000 in
8 2021 dollars.⁵⁵ Therefore, the Commission should authorize an annual FVW Main
9 Replacement budget of \$3,211,000 escalated to the appropriate years, or \$3,595,120,
10 \$3,706,569, and \$3,818,507 for 2023-2025, respectively.⁵⁶

11 4. Service Saddle Replacement Program (I15-600116)

12 The Commission should reduce Cal Am’s proposed budget to replace existing
13 service saddles to \$394,677 in 2024 and \$406,596 in 2025,⁵⁷ due to reducing both the
14 number of service saddles replaced annually and unit replacement costs.⁵⁸

⁵¹ Cal Am plans on spending approximately \$7,360,000 in 2022. The adopted 2021-2022 budget for the 2019 GRC Sacramento Main Replacement is approximately \$5,933,400. $(\$7,360,000 - \$5,933,400) \div \$5,933,400 = 24\%$.

⁵² Cal Am requested an annual budget of \$2,966,700 in the 2019 rate case (A.19-07-004) for the 2019 GRC Sacramento Main Replacement. Cal Am plans on spending approximately \$7,360,000 in 2023 for FVW Main Replacement. $(\$7,360,000 - \$2,966,700) \div \$2,966,700 = 148\%$.

⁵³ Cal Am Engineering Workpaper, Tab 109.

⁵⁴ Cal Am Engineering Workpaper, Tab 109 at 1-4.

⁵⁵ Cal Am Engineering Workpaper, Tab 109 at 1-4.

⁵⁶ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Attachment 1-6, I15-660002 – Direct Project Cost (showing the revised direct project cost calculation).

⁵⁷ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am requests \$1,472,000 in 2024 and \$2,024,000 in 2025.

⁵⁸ Service saddles are used to make service line connection from the water main.

1 Cal Am requests to replace approximately 1,400 (or an average of 233 annually)
2 service saddles in the 2021-2026 period.⁵⁹ However, this number is not consistent with
3 Cal Am’s historical replacement rate. Cal Am states that approximately 1,447 saddle
4 service leaks occurred in the 2006-2018 period.⁶⁰ Cal Am repaired or replaced 758
5 saddle services during the 2019-2021 period.⁶¹ Even if the saddle services that were
6 replaced in 2019-2021 were included in historical number of saddle services repaired or
7 replaced, the average annual historical number only increases to approximately 147. Cal
8 Am’s historical replacement rate is a better representation of the number of service
9 saddles Cal Am normally replaces versus Cal Am’s proposed replacement rate. The
10 number of saddle services repaired or replaced should be modified to reflect the revised
11 number of saddle services Cal Am has historically repaired or replaced.

12 Cal Am estimates an average saddle service replacement unit cost of
13 approximately \$6,240.⁶² This unit cost is based on opinion of probable construction cost
14 (“OPCC”).⁶³ However, this proposed higher unit cost does not reflect what Cal Am has
15 historically spent on repairs or replacement. Over the past three years (2019-2021), Cal
16 Am spent an average of \$2,326 per saddle service (in 2021 dollars).⁶⁴ It is more
17 appropriate to base the unit cost on what Cal Am spends on saddle service replacements.
18 Based on the average replacement rate and the historical unit cost that reflects what Cal
19 Am spends (escalated to the appropriate year), the Commission should only allow
20 \$394,677 in 2024 and \$406,596 in 2025 for the Service Saddle Replacement Program.

⁵⁹ Cal Am Engineering Workpaper, Redacted Tab 100 at 1-34.

⁶⁰ Cal Am Engineering Workpaper, Redacted Tab 100 at 1-31.

⁶¹ Cal Am Response to Public Advocates Office Data Request JMI-014 (Service Saddles – Sacramento).

⁶² Cal Am Engineering Workpaper, Redacted Tab 100 at 1-34. This unit cost includes all construction soft costs (e.g., permitting).

⁶³ Cal Am Engineering Workpaper, Redacted Tab 161 at pdf p. 1256. The OPPCs were prepared by Stantec Consulting Services, Inc.

⁶⁴ Cal Am Response to Public Advocates Office Data Request JMI-014 (Service Saddles – Sacramento).

1 **5. Well Installation and Replacement Program (I15-**
2 **600113)**

3 The Commission should reduce Cal Am’s budget to replace four wells per year to
4 \$7,912,000 in 2024 and \$8,912,000 in 2025⁶⁵ since replacing two wells in Fruitridge and
5 two wells in Antelope are not necessary.

6 Cal Am completed a 2021 Well Replacement Plan for the existing wells in the
7 Northern Division.⁶⁶ The Well Replacement Plan lists the wells to be replaced during the
8 2024-2026 period, which includes wells in the Fruitridge, Antelope, Walnut Grove,
9 Geyserville, Meadowbrook, Suburban Rosemont, and Lincoln Oak systems.⁶⁷ In this rate
10 case, Cal Am requests a separate well replacement project for the Fruitridge system under
11 the Fruitridge Vista Well Replacement and Installation Program (I15-660006). The well
12 replacement plan is intended for the entire Northern Division, which includes wells in the
13 Fruitridge system. The Fruitridge Vista Well Replacement and Installation Program
14 already accounts for the wells being replaced in the Fruitridge system and therefore the
15 Fruitridge wells do not need to be included in the Sacramento Well Installation and
16 Replacement Program. More importantly, there is sufficient supply capacity in the
17 Fruitridge system without the wells.⁶⁸

18 The Antelope system has 17 wells with a combined capacity of 14,403 gpm.⁶⁹
19 Cal Am has two interconnections with the Sacramento Suburban Water District with a

⁶⁵ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am requests \$11,868,000 in 2024 and \$12,466,000 in 2025.

⁶⁶ Crooks Direct Testimony at 223. The Well Replacement Plan was prepared by Brown and Caldwell. See Cal Am Response to Public Advocates Office Data Request JMI-005 (Well Studies – Northern and Central), Attachment JMI 05 Q001 Attachment 1 – 2022 Northern Division Well Replacement Plan.

⁶⁷ Cal Am Response to Public Advocates Office Data Request JMI-005 (Well Studies – Northern and Central), Attachment JMI 05 Q001 Attachment 1 – 2022 Northern Division Well Replacement Plan at 4-9.

⁶⁸ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Section III.A.2.

⁶⁹ Engineering Workpaper, Redacted Tab 161 at 4-31.

1 combined supply capacity of 5,288 gpm, and two emergency interties.⁷⁰ Cal Am plans to
2 replace the Colonnade and Eagle Ridge Wells during this rate case cycle.⁷¹ These wells
3 have a combined capacity of approximately 2,158 gpm.⁷² Antelope’s total well system
4 capacity would be 12,245 gpm if the Colonnade and Eagle Ridge Wells were removed.

5 Cal Am projects the 2030 MDD and 2030 PHD to be 9.83 MG and 14.74 MG,
6 respectively.⁷³ The Antelope system has sufficient capacity in both the MDD and PHD
7 planning scenarios, even without the wells Cal Am proposes to replace, and without
8 capacity from the largest remaining well.⁷⁴ Therefore, the capacity from the wells is not
9 needed.

10 Cal Advocates excluded from the project budget the cost of the two wells in
11 Fruitridge and the Colonnade and Eagle Ridge Wells in Antelope. Cal Advocates
12 reduced Cal Am’s proposed budget proportionally by one-third since four of the twelve
13 proposed wells in this rate case cycle were removed. Therefore, the Commission should
14 only allow \$7,912,000 in 2024 and \$8,310,667 in 2025 for the Well Installation and
15 Replacement Program in Sacramento.

16 **6. Malaga Well Replacement and 1,2,3-**
17 **Trichloropropane (1,2,3-TCP) Treatment (I15-**
18 **600110)**

19 The Commission should reduce the proposed budget to replace the existing
20 Malaga Well to \$2,322,445⁷⁵ due to the well project being partially funded by a

⁷⁰ Cal Am Engineering Workpaper, Redacted Tab 161 at 4-37.

⁷¹ Cal Am Response to Public Advocates Office Data Request JMI-005 (Well Studies – Northern and Central), Attachment JMI 05 Q001 Attachment 1 – 2022 Northern Division Well Replacement Plan at 4-9.

⁷² Cal Am Engineering Workpaper, Redacted Tab 161 at 4-31.

⁷³ Cal Am Engineering Workpaper, Redacted Tab 161 at 4-39.

⁷⁴ The largest remaining well has a capacity of 1,511 gpm. The total well capacity excluding the capacity from the Colonnade and Eagle Ridge Wells and the largest remaining well is 10,734 gpm. (12,245 gpm - 1,511 gpm = 10,734 gpm) (or 15.46 MGD).

⁷⁵ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am

1 settlement. Cal Am states that it received \$3,657,558⁷⁶ to replace the existing Malaga
2 Well (including any necessary treatment) as part of the settlement of a lawsuit over 1,2,3-
3 TCP contamination of the existing well.⁷⁷ However, Cal Am’s RO model does not
4 incorporate the contribution related to the settlement.⁷⁸ Cal Am states that the settlement
5 contribution for the Malaga Well was inadvertently excluded from the RO model and the
6 RO Model should be adjusted to include the \$3,657,558 contribution for the Malaga Well
7 Replacement and 123-TCP Treatment project.⁷⁹ The Commission should include the
8 contribution of \$3,657,558 that is designated specifically to replace the well (including
9 any necessary treatment facilities) in the RO model to offset the project costs.⁸⁰

10 7. Wittkop 2 Water Treatment Plant (I15-600108)

11 The Commission should reject Cal Am’s request of \$3,668,040 in 2024-2025 for
12 manganese treatment at Wittkop Well 2⁸¹ since the manganese concentration at Wittkop
13 2 is under the SMCL.

14 The SMCL for manganese is 0.05 milligrams per liter (“mg/L”).⁸² Compliance
15 with the SMCL is based on a four-quarter average.⁸³ While Cal Am may have mentioned

requests \$460,000 in 2022, \$4,968,000 in 2023, and \$552,000 in 2024.

⁷⁶ Cal Am Response to Public Advocates Office Data Request JMI-017 (Malaga Well – Sacramento).

⁷⁷ Crooks Direct Testimony at 219.

⁷⁸ Cal Am RO model file “ALL_CH09_RB_WP_CIAC&CAC,” tab: “IP Projects Funded by OT.”

⁷⁹ Cal Am Response to Public Advocates Office Data Request JMI-017 (Malaga Well – Sacramento).

⁸⁰ The net direct project cost is approximately \$2,322,445 (\$5,980,000 - \$3,657,558 = \$2,322,445).

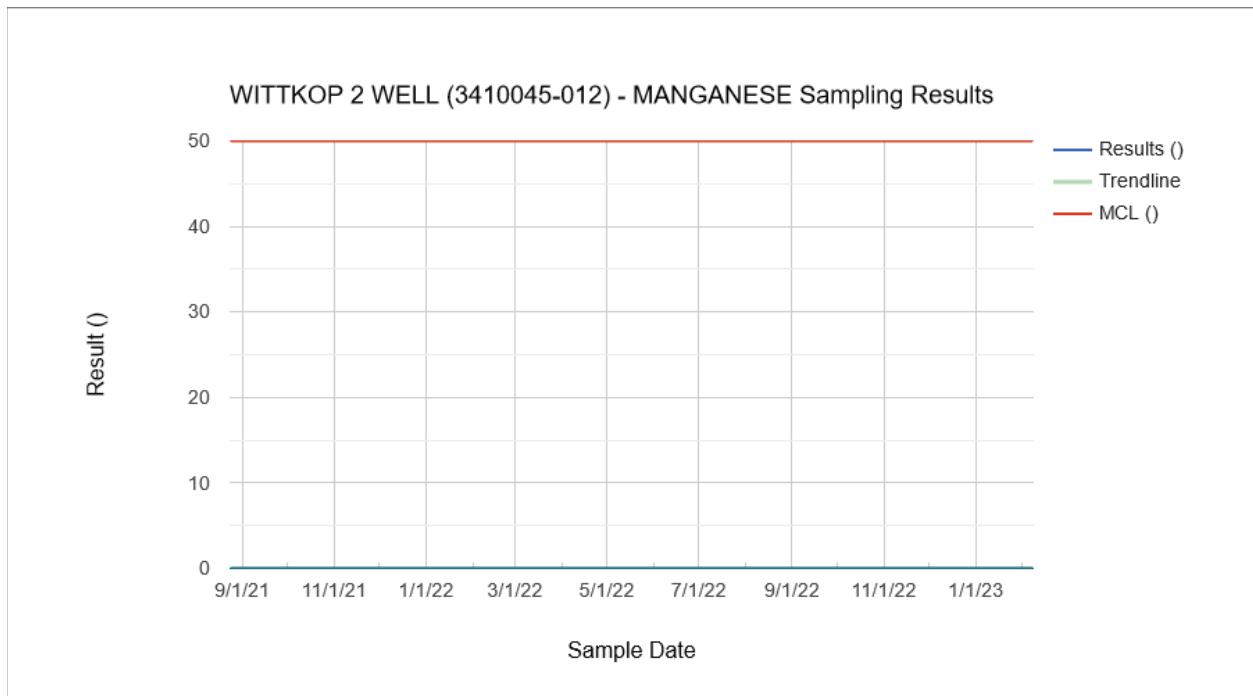

⁸¹ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am requests \$184,000 in 2024 and \$3,484,040 in 2025.

⁸² The SWRCB DDW Manganese in Drinking Water. Referenced at:
https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/Manganese.html. Date accessed
April 6, 2023.

⁸³ 22 CCR § 64449.c.1.

1 water quality issues regarding manganese in the first quarter of 2021,⁸⁴ the manganese
2 concentrations have been non-detect since.⁸⁵ Table 1-2 shows the manganese
3 concentration since the second quarter of 2021.

Table 1-2: Manganese Concentration – Wittkop Well 2⁸⁶

4 As shown in Table 1-2 above, the manganese level is non-detect. Since the
5 manganese level has been consistently below the SMCL, the proposed treatment is not
6 necessary. Therefore, the Commission should reject Cal Am’s request.

⁸⁴ Crooks Direct Testimony at 217-218.

⁸⁵ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Attachment 1-8, *Wittkop 2 Well – Manganese Sampling Results*.

⁸⁶ SDWIS Cal Am – Arden (3410045) Manganese Sampling Results from 1/1/2012 to 04/01/2023. Refer to: <https://sdwis.waterboards.ca.gov/PDWW> Date accessed April 6, 2022.

1 **8. Sacramento Generator Projects (I15-600115 and**
2 **I15-670001)**

3 The Commission should deny Cal Am’s requested annual budget of \$1,104,000⁸⁷
4 for the Standby Generator Improvement Program (I15-600115) (“Sacramento Standby
5 Generator Program”) and the 2023 budget of \$690,000 for the PSPS Generator
6 Improvements (I15-670001) (“Hillview PSPS Generator Program”), consistent with Cal
7 Advocates’ recommendation regarding generators.⁸⁸

8 Cal Am requests to install 13 generators during this rate case cycle for the
9 Sacramento Standby Generator Program.⁸⁹ Cal Am requests to install generators in the
10 Meadowbrook, Isleton, Suburban Rosemont, Security, Park, Geyserville, and Hillview
11 systems in the Sacramento District.⁹⁰ Cal Am plans on installing generators at sites listed
12 in the Emergency Power Study.⁹¹ Cal Am plans on installing generators at sites listed in
13 its Emergency Power Study in the Hillview systems for the Hillview PSPS Generator
14 Program.⁹²

15 Cal Am should fulfill its obligations under the adopted settlement agreement from
16 the previous GRC and complete a portable generator planning study to identify more
17 affordable alternatives to installing stationary generators at its facilities.⁹³ The terms of
18 the adopted settlement agreement should be adhered to and not ignored.

⁸⁷ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

⁸⁸ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

⁸⁹ Cal Am Engineering Workpaper, Tab 99 at 1-2.

⁹⁰ Cal Am Engineering Workpaper, Tab 99 at 1-2.

⁹¹ Crooks Direct Testimony at 225.

⁹² Crooks Direct Testimony at 155-156.

⁹³ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

1 However, if the Commission authorizes Cal Am’s proposed budget for the
2 Sacramento Standby Generator Program and the 2023 budget for the Hillview PSPS
3 Generator Program, then the cost of seven generators should be removed due to the
4 overlapping project scopes of these two generator programs and the fact that a generator
5 already exists at one of the installation sites Cal Am identifies for the Sacramento
6 Standby Generator Program.

7 The project scope of the Hillview PSPS Generator Program overlaps with a
8 portion of Cal Am’s request for its districtwide Sacramento Standby Generator Program.
9 Six of the 13 proposed standby generators under Sacramento Standby Generator Program
10 are for sites in the Hillview systems.⁹⁴ If the Commission authorizes Cal Am’s request
11 for the Hillview PSPS Generator Program in 2023, then the Commission should remove
12 the cost of six generators related to the Hillview systems from the Sacramento Standby
13 Generator Program Standby Program because the Hillview PSPS Program already
14 includes these costs.

15 One of the project candidates for the Sacramento Standby Generator Program is
16 the Isleton Well 3-A.⁹⁵ Cal Am’s Statewide Emergency Power Study Report states that
17 the Isleton Well 3-A is located at the water treatment plant and the generator operates
18 both the well and the treatment plant.⁹⁶ If the Commission adopts the Sacramento
19 Standby Program, then the cost of one generator should be removed because Well 3-A
20 already has backup power.⁹⁷

⁹⁴ Cal Am Engineering Workpaper, Tab 99 at 1-2.

⁹⁵ Cal Am Engineering Workpaper, Tab 99 at 1.

⁹⁶ Cal Am Response to Public Advocates Office Data Request JMI-011, Attachment JMI-11 Q001 Attachment 01 – Emergency Power Study Redacted at 11.

⁹⁷ Cal Am Response to Public Advocates Office Data Request JMI-011 (DR JMI-001 Followup), Attachment JMI-11 Q001 Attachment 01 – Emergency Power Study Redacted at 11.

1 **9. Main Replacement Program (I15-600111)**

2 The Commission should reduce the proposed annual main replacement budget to
3 \$2,064,617⁹⁸ due to the historical amount Cal Am has spent on the program.

4 Cal Am’s proposed annual budget makes little sense given the amount Cal Am
5 normally spends on main replacement. Cal Am has spent approximately \$6,193,850 for
6 the main replacement program for 2018-2020 (under I15-600072) or approximately
7 \$2,064,617 per year.⁹⁹ The amount Cal Am spent for the main replacement budget
8 during the 2019 rate case cycle (under I15-600097) was not considered since that budget
9 was spent on a recently acquired system. Cal Am states that it has dedicated the entire
10 main replacement budget for Sacramento during the 2019 rate case cycle (under I15-
11 600097) to fund a newly created Fruitridge Vista Water Main Replacement project solely
12 for the Fruitridge system (under I15-660002).¹⁰⁰ The projects completed under the
13 Fruitridge Vista Water Main Replacement project were not considered in determining the
14 annual amount of main replaced in Sacramento because it is already accounted for in a
15 separate project. Therefore, the Commission should only allow \$2,064,617 annually for
16 the Main Replacement Program in Sacramento.

17 **10. Hillview Iron & Manganese WTP Projects (I15-
18 670002 and I15-670003)**

19 The Commission should reduce Cal Am’s proposed budget for the iron and
20 manganese WTP in the Coarsegold system (I15-670002) to \$2,920,000¹⁰¹ and in the
21 Goldside system (I15-670003) to \$1,236,250.¹⁰² These reductions are appropriate

⁹⁸ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am requests an annual budget of \$4,600,000.

⁹⁹ Crooks Direct Testimony at 41. $\$6,193,850 \div 3 \text{ years} \approx \$2,064,617$.

¹⁰⁰ Crooks Direct Testimony at 122.

¹⁰¹ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am requests a direct project budget of \$3,680,000 for both the Coarsegold Iron and Manganese WTP projects.

¹⁰² Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

1 because Cal Advocates removed the costs related to the standby generator, redundant
2 contingency and redundant overhead.

3 Cal Am states that the construction cost for both the proposed Coarsegold Iron &
4 Manganese WTP (I15-670002) (“Coarsegold WTP”) and Goldside Iron-Manganese WTP
5 (I15-670003) (“Goldside WTP”) is \$3,064,000.¹⁰³ Cal Am provided a cost breakdown of
6 the construction costs for the Coarsegold WTP and Goldside WTP projects.¹⁰⁴ However,
7 the construction cost breakdown shows that the construction cost for the Goldside WTP
8 is \$1,481,000¹⁰⁵ which is less than the construction cost shown in Cal Am’s Engineering
9 Workpaper.¹⁰⁶

10 Cal Am requests \$115,000 in the Coarsegold WTP and \$150,000 in the Goldside
11 WTP to install standby generators at the proposed WTPs.¹⁰⁷ The Commission should
12 remove the cost of the standby generators from the construction costs of the proposed

¹⁰³ Cal Am Engineering Workpaper, Tab 115 at 2. Engineering Workpaper, Tab 116 at 3.

¹⁰⁴ Cal Am Response to Public Advocates Office Data Request JMI-021 (Coarsegold and Goldside WTP – Hillview), Attachment JMI-021 Q001 Attachment 1. Cal Am Response to Public Advocates Office Data Request JMI-021 (Coarsegold and Goldside WTP – Hillview), Attachment JMI-021 Q001 Attachment 2.

¹⁰⁵ Cal Am Response to Public Advocates Office Data Request JMI-021 (Coarsegold and Goldside WTP – Hillview), Attachment JMI-021 Q001 Attachment 2. The cost estimate in the attachment for the Goldside WTP shows a total construction cost of \$1,777,000 which includes \$296,000 for engineering, construction management and environmental costs. Cal Am already includes the engineering, construction management and environmental costs in the implementation costs which are calculated as 31% of the construction costs. The implementation costs for the Goldside WTP include funding for permitting, engineering, construction management, startup and special inspection, and overhead. This means that Cal Am already accounts for these costs in the direct project cost. Therefore, the \$296,000 shown in the cost estimate breakdown shown in attachment related to engineering, construction management and environmental costs were not considered.

¹⁰⁶ Cal Am Engineering Workpaper, Tab 116 at 3.

¹⁰⁷ Cal Am Response to Public Advocates Office Data Request JMI-021 (Coarsegold and Goldside WTP – Hillview), Attachment JMI-021 Q001 Attachment 1. Cal Am Response to Public Advocates Office Data Request JMI-021 (Coarsegold and Goldside WTP – Hillview), Attachment JMI-021 Q001 Attachment 2.

1 Coasegold and Goldside WTP projects consistent with Cal Advocates’ recommendation
2 regarding generators.¹⁰⁸

3 The construction cost estimates for both the proposed Coasegold and Goldside
4 WTP projects includes a project contingency of approximately 25% and 30%,
5 respectively.¹⁰⁹ Cal Am’s RO model already applies a project contingency of five
6 percent to the direct project cost of both projects.¹¹⁰ This means that Cal Am accounts
7 for project contingency twice in the total project costs. Therefore, the Commission
8 should remove the redundant contingency from the construction cost estimates. The
9 Commission should not allow any funding related to project contingency based on Cal
10 Advocates’ recommendation regarding project contingency.¹¹¹

11 The construction cost estimates for both the proposed Coasegold and Goldside
12 WTP projects includes a project overhead of approximately six percent.¹¹² Cal Am’s RO
13 model already applies a project overhead of \$205,129 and \$164,318 to the direct project
14 costs of the proposed Coasegold and Goldside WTP projects, respectively.¹¹³ This
15 means that Cal Am accounts for project overhead twice in the total project costs.

¹⁰⁸ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

¹⁰⁹ Cal Am Response to Public Advocates Office Data Request JMI-021 (Coasegold and Goldside WTP – Hillview), Attachment JMI-021 Q001 Attachment 1. Cal Am Response to Public Advocates Office Data Request JMI-021 (Coasegold and Goldside WTP – Hillview), Attachment JMI-021 Q001 Attachment 2.

¹¹⁰ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Contingency By Project WS-6.”

¹¹¹ Cal Advocates Report, Report on Capital Contingency Factors, Southern Division, Special Request 4, and Extra Ordinary Early Retirements, Chapter 1.

¹¹² Cal Am Engineering Workpaper, Tab 115 at 2. Cal Am Engineering Workpaper, Tab 116 at 3.

¹¹³ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Engineering OH By Project WS-7.” Cal Am’s estimated project overhead of \$205,129 and \$164,318 for the Coasegold and Goldside WTP projects, respectively that is shown in Cal Am’s RO model assumes the Commission adopts Cal Am’s plant request as proposed. Cal Am in their RO model calculates the individual project overhead based on a fixed total project overhead companywide which is distributed to the individual plant projects. The project overhead associated with the adopted total project costs for the Coasegold and Goldside WTP projects will be dependent on all the direct project budgets adopted by the Commission.

1 Therefore, the Commission should remove the redundant project overhead from the
2 construction cost estimates.

3 After incorporating these adjustments, the Commission should only allow a budget
4 of \$2,920,000 for the Coarsegold WTP and \$1,236,250 for the Goldside WTP.¹¹⁴

5 **B. Common Plant**

6 **1. Project Contingency**

7 Based on Cal Advocates’ recommendations regarding project contingency costs,
8 the Commission should not allow any funding related to project contingency.¹¹⁵
9 Attachment 1-10 shows the amount of proposed funding due to project contingency for
10 2024-2025.¹¹⁶

11 **2. Projects Previously Included Rates that Have Not**
12 **Provided a Benefit to Ratepayers**

13 As discussed in Chapter 6 of this report, projects previously funded in rates and
14 are now rescheduled to be completed in 2024 or later (when they were originally
15 supposed to be completed prior to 2024) should not be included in rates at this time.¹¹⁷
16 Specifically, the Suburban Rosemont Hydraulic Improvements project (I15-600103) in
17 the Sacramento District.¹¹⁸ If Cal Am is able to complete the Suburban Rosemont

¹¹⁴Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Attachment 1-9, *I15-670002 and I15-670003 – Direct Project Cost* (showing the revised direct project cost calculation).

¹¹⁵Cal Advocates Report, Report on Capital Contingency Factors, Southern Division, Special Request 4, and Extra Ordinary Early Retirements, Chapter 1.

¹¹⁶Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Attachment 1-10, *2024-2025 Funding Related to Project Contingency –Sacramento District*.

¹¹⁷Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting, Chapter 6.

¹¹⁸Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am alleges that the Suburban Rosemont Hydraulic Improvements project will be completed in 2024. The direct cost for the Suburban Rosemont Hydraulic Improvements project is \$138,000 in 2022, \$138,000 in 2023, and \$2,637,640 in 2024.

1 Hydraulic Improvements project by the revised completion date, Cal Am may seek
2 recovery of the project cost when it files its next rate case application in 2025. The
3 Commission should not allow any funding for the Suburban Rosemont Hydraulic
4 Improvements project in rates at this time.

5 **C. Revenue Requirement Impact Due to Cal Advocates’**
6 **Recommendations**

7 Cal Advocates’ recommended adjustments mentioned above would reduce
8 the revenue requirement by approximately \$3,230,112 in 2024 and \$3,294,097 in
9 2025 for the Sacramento District.¹¹⁹

10 **IV. CONCLUSION**

11 The Commission should reduce the annual direct project cost for the Hillview
12 Tank Rehabilitation Program (I15-670004) to \$185,067 (from \$471,960) annually due to
13 removing the contingency line items from the cost estimate, separating the tank painting
14 costs from the Hillview Tank Rehabilitation Program, and allowing \$24,797 annually for
15 tank painting associated with these tanks. The Commission should reduce the annual
16 direct project cost for the Hillview Tank Replacement Program (I15-670005) to \$327,319
17 (from \$1,096,640) since only one tank warrants replacement and only allow funding for
18 tank maintenance for the remaining nine tanks.¹²⁰ The Commission should reject Cal
19 Am’s request for the Fruitridge Well Replacement and Installation Program (I15-660006)
20 since there is sufficient supply capacity in the Fruitridge system.¹²¹ The Commission
21 should reduce the Fruitridge Vista Main Replacement budget to \$3,595,120 in 2023,

¹¹⁹ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 1, Attachment 1-11, *Sacramento District – Revenue Requirement Calculation* (showing the revenue requirement calculation)

¹²⁰ In addition, the Commission should also allow \$294,807 annually for tank painting projects associated with these nine tanks.

¹²¹ Cal Am requests \$1,288,000 in 2024 and \$2,760,000 in 2025.

1 \$3,706,569 in 2024 and \$3,818,507 in 2025 based on the recommended main
2 replacement rate in Cal Am’s Engineering Workpaper. ¹²² The Commission should
3 reduce the proposed Service Saddle Replacement Program (I15-600116) budget to
4 \$394,677 in 2024 and \$406,596 in 2025 due to reducing both the number of saddle
5 services replaced annually and unit replacement costs. ¹²³ The Commission should reduce
6 the Well Installation and Replacement (I15-600113) budget to \$7,912,000 in 2024 and
7 \$8,912,000 in 2025 to replace four wells annually since replacing two wells in Fruitridge
8 and two wells in Antelope are not necessary. ¹²⁴ The Commission should reduce the
9 Malaga Well Replacement and 1,2,3-TCP Treatment (I15-600110) budget to \$2,322,445
10 due to the well being funded by a settlement suit. ¹²⁵ The Commission should reject the
11 Wittkop 2 Water Treatment Plant (I15-600108) project since the manganese
12 concentration at the well is under the SMCL. ¹²⁶ The Commission should deny the annual
13 budget of \$1,104,000 for the Standby Generator Improvement Program (I15-600115) and
14 the 2023 budget of \$690,000 for the Public Safety Power Shutoffs Generator
15 Improvements (I15-670001) consistent with Cal Advocates’ recommendation regarding
16 generators. ¹²⁷ The Commission should reduce the annual main replacement program
17 (I15-600111) budget to \$2,064,617 based on what Cal Am has historically spent on the
18 main replacement program. ¹²⁸ The Commission should remove the cost of unnecessary
19 standby generators, redundant contingencies, and redundant overhead by reducing the

¹²² Cal Am Engineering Workpaper, Tab 109. Cal Am requests \$7,360,000 in 2023, \$6,523,720 in 2024, and \$5,658,000 in 2025.

¹²³ Cal Am requests \$1,472,000 in 2024 and \$2,024,000 in 2025.

¹²⁴ Cal Am requests \$11,868,000 in 2024 and \$12,466,000 in 2025.

¹²⁵ Cal Am requests a total direct project cost of \$5,980,000.

¹²⁶ Cal Am requests \$184,000 in 2024 and \$3,484,040 in 2025.

¹²⁷ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

¹²⁸ Cal Am requests an annual budget of \$4,600,000.

1 proposed budget for the Coarsegold Iron and Manganese WTP (I15-670002) to
2 \$2,920,000 and the Goldside Iron and Manganese WTP (I15-670003) to \$1,236,250.¹²⁹

3 The Commission should adopt Cal Advocates recommended budget including
4 common plant issues such as project contingency and projects approved in previous rate
5 cases but not expected to be completed in 2024 (or later).

¹²⁹ Cal Am requests a direct project budget of \$3,680,000 for both the Coarsegold Iron and Manganese WTP projects.

1 **CHAPTER 2 PLANT – LARKFIELD**

2 **I. INTRODUCTION**

3 Cal Am’s Larkfield District is supplied through a combination of groundwater
4 from four wells and purchased water from the Sonoma County Water Agency.¹³⁰ Cal
5 Advocates reviewed Cal Am’s testimony, application, work-papers, minimum data
6 requirements, CPS, Condition Based Assessment of Buried Infrastructure, cost estimates,
7 and responses to Cal Advocates’ data requests. Cal Advocates conducted a field
8 investigation of the Larkfield District’s water system on November 17, 2022. This
9 chapter presents the recommendations the Commission should adopt for the proposed
10 Plant in Service for Cal Am’s Larkfield District.

11 **II. SUMMARY OF RECOMMENDATIONS**

12 The Commission should adjust Cal Am’s request for individual proposed projects
13 in the Larkfield District, as follows:

- 14 • The Commission should reduce the proposed annual budget for the Well
15 Rehabilitation and Maintenance Program (I15-610028) to \$66,664 (from
16 \$138,000) based on the work that has already been completed in the 2021-
17 2022 period.
- 18 • The Commission should reduce the proposed annual budget for the
19 Larkfield Tank Rehabilitation and Seismic Upgrades (I15-610027) to
20 \$128,467 (from \$253,000) due to removing the portions of the project that
21 were already planned or completed and revising the capital tank
22 improvement costs.
- 23 • The Commission should deny Cal Am’s request of \$230,000 in 2024 for
24 the Standby Generator Improvement Program (I15-610029) consistent with
25 Cal Advocates’ recommendation regarding generators.¹³¹

¹³⁰ Hofer Direct Testimony at 7.

¹³¹ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

- 1 • The Commission should deny Cal Am’s request of \$690,000 in 2024 for
2 the WTP Treatment Upgrades project (I15-610030) since the proposed
3 modifications are not necessary.

4 Recommendations on plant additions also reflect Cal Advocates’
5 recommendations on project contingency and previously funded projects that are
6 expected to be completed in 2024 or later. The Commission should not allow Cal Am to
7 include in rates incomplete projects that have been previously included in rates but Cal
8 Am now rescheduled to be completed in 2024 or later. These projects should not be
9 included in rates until the projects are completed, in service, and providing benefits to
10 ratepayers. Cal Am may seek recovery of the project costs when it files its next general
11 rate case application (in 2025).

12 Attachment 2-1 presents Cal Advocates’ project-specific adjustments.¹³² These
13 adjustments reduce the revenue requirement by approximately \$298,244 in 2024 and
14 \$151,514 in 2025.¹³³ The Commission should adopt the capital budget summary
15 presented in Table 2-1 below.

¹³² Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 2, Attachment 2-1, *Capital Budget Details – Larkfield District*.

¹³³ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 2, Attachment 2-5, *Larkfield District – Revenue Requirement Calculation* (showing the revenue requirement calculation).

Table 2-1: Capital Budget Summary – Larkfield District¹³⁴

Larkfield (\$000)	2024	2025	Annual Average
Public Advocates Office Recommendation	\$ 1,747.19	\$ 1,762.02	\$ 1,754.61
Cal Am's Proposed	\$ 3,553.06	\$ 2,647.89	\$ 3,100.48
Cal Am > Public Advocates Office	\$ 1,805.87	\$ 885.87	\$ 1,345.87
Public Advocates Office as % of Cal Am	49%	67%	57%

1 **III. ANALYSIS**

2 Unless otherwise stated, the project costs listed and discussed below are direct
 3 project costs. The direct project costs are the cost of the project without add-on costs
 4 (e.g. overhead).

5 **A. Proposed Projects**

6 **1. Well Rehabilitation and Maintenance Program**
 7 **(I15-610028)**

8 The Commission should reduce the annual budget to \$66,664 (from
 9 \$138,000)¹³⁵ based on the work that has already been completed in the
 10 2021-2022 period for the Well Rehabilitation and Maintenance Program
 11 (I15-610028) (“Larkfield Well Rehab Program”). Cal Am’s Larkfield
 12 District includes four wells.¹³⁶ The proposed project scope for the
 13 Larkfield Well Rehab Program over two rate case cycles (2021-2026) for
 14 the Larkfield District consists of: 1) testing and rehabilitating the four wells

¹³⁴ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

¹³⁵ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

¹³⁶ Cal Am Engineering Workpaper, Redacted Tab 162 at pdf. p. 116.

1 and 2) replacing the hydropneumatic tanks¹³⁷ Cal Am states that it has
2 completed rehabbing two wells in 2021-2022 (under the Larkfield Well
3 Rehab Program in the 2019 rate case (I15-610016 from A.19-07-004)).¹³⁸
4 Cal Am’s Engineering Workpaper Tab 7 (I15-610028) in this rate case
5 shows that the project scope and cost estimate for the 2021-2026 period has
6 not changed for the Larkfield Well Rehab Program.¹³⁹ Therefore, Cal
7 Advocates revised the proposed 2021-2026 project cost estimate to
8 \$337,991 by removing the cost of the two wells that were already
9 rehabilitated.¹⁴⁰ Cal Am plans on spending approximately \$138,000 in
10 2023 for the Larkfield Well Rehab Program.¹⁴¹ Therefore, Cal Advocates
11 calculated the budget for this rate case cycle by subtracting the 2023 budget
12 from the cost of the remaining project scope, approximately \$199,991 or
13 \$66,664 annually.¹⁴² Therefore, the Commission should only allow
14 \$66,664 annually for the Larkfield Well Rehab Program.¹⁴³

¹³⁷ Cal Am Engineering Workpaper, Tab 007 at 3.

¹³⁸ Crooks Direct Testimony at 133.

¹³⁹ Cal Am Engineering Workpaper, Tab 007 at 3. Cal Am Engineering Workpaper, Tab 007 discusses the Well Rehabilitation and Maintenance Program in this rate case (I15-610028) and the 2019 rate case (I15-610016).

¹⁴⁰ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 2, Attachment 2-2, *I15-610028 – Direct Project Cost* (showing the revised direct project cost calculation).

¹⁴¹ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

¹⁴² Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 2, Attachment 2-2, *I15-610028 – Direct Project Cost* (showing the revised direct project cost calculation).

¹⁴³ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 2, Attachment 2-2, *I15-610028 – Direct Project Cost* (showing the revised direct project cost calculation).

1 **2. Larkfield Tank Rehabilitation and Seismic**
2 **Upgrades (I15-610027)**

3 The Commission should reduce the proposed annual budget for tank
4 improvements to \$128,467 (from \$253,000)¹⁴⁴ due to removing the portions
5 of the project that were already planned or completed and revising the
6 capital tank improvement costs for the Larkfield Tank Rehabilitation and
7 Seismic Upgrades (I15-610027) (“Larkfield Tank Rehab Program”).

8 Cal Am’s Engineering Workpaper Tab 6 (I15-610027) lists the
9 components that comprise the proposed budget for the 2021-2026 period.¹⁴⁵
10 In the last rate case (under project code I15-610018 from A.19-07-004), Cal
11 Am completed the five-year anniversary tank maintenance inspections and
12 the tank seismic assessments for the five tanks.¹⁴⁶ Since these portions of
13 the project are already complete, they do not need to be factored into
14 calculating the budget for this rate case cycle.

15 The cost estimate shown in Cal Am’s Engineering Workpaper Tab 6
16 (I15-610027) shows the proposed tank improvement costs for Lower
17 Wikiup Tank 1 and North Wikiup Tank 2.¹⁴⁷ Tank Industry Consultants
18 (“TIC”) conducted a revised cost estimate for tank rehabilitation.¹⁴⁸ The
19 tank improvement costs were replaced to reflect the revised cost estimate.

20 After incorporating these adjustments, the total 2023-2026 budget
21 for items to address under the Larkfield Tank Rehab Program is

¹⁴⁴ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

¹⁴⁵ Cal Am Engineering Workpaper, Tab 6 at 1-15. Cal Am Engineering Workpaper, Tab 006 discusses the Larkfield Tank Rehabilitation and Seismic Upgrades in this rate case (I15-610027) and the 2019 rate case (I15-610018).

¹⁴⁶ Crooks Direct Testimony at 135.

¹⁴⁷ Cal Am Engineering Workpaper, Tab 6 at 1-15.

¹⁴⁸ Cal Am Response to Public Advocates Office Data Request JMI-007 (Larkfield Tanks), Attachment JMI-007 Q001 Attachment 6 – CA AW Larkfield District Revised Cost Estimates.

1 approximately \$615,400.¹⁴⁹ Cal Advocates calculated the 2024-2026 total
2 budget by subtracting what Cal Am plans on spending in 2023 from the
3 2023-2026 total budget.¹⁵⁰ This equates to approximately \$385,400 or
4 \$128,467 annually.¹⁵¹ The Commission should only allow an annual
5 budget of \$128,467 for I15-610027.¹⁵² In addition, any necessary tank
6 painting projects should not be handled through the Larkfield Tank Rehab
7 Program. These projects should be treated as deferred program
8 maintenance costs, consistent with how Cal Am handles tank painting
9 costs.¹⁵³

10 **3. Standby Generator Improvement Program (I15-**
11 **610029)**

12 Consistent with Cal Advocates' recommendation regarding
13 generators, the Commission should deny Cal Am's request of \$230,000 in
14 2024¹⁵⁴ to install generators.¹⁵⁵

15 Cal Am plans on installing generators at sites listed in the
16 Emergency Power Study.¹⁵⁶ Cal Am should fulfill its obligations from the

¹⁴⁹ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 2, Attachment 2-3, I15-610027 – Direct Project Cost (showing the revised direct project cost calculation).

¹⁵⁰ Cal Am plans on spending approximately \$230,000 in 2023 for the Tank Rehabilitation and Seismic Upgrades Program.

¹⁵¹ $\$385,400 \div 3 \text{ years} \approx \$128,467$.

¹⁵² Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 2, Attachment 2-3, I15-610027 – Direct Project Cost (showing the revised direct project cost calculation).

¹⁵³ Crooks Direct Testimony at 259:15-17. Cal Am amortizes tank painting costs over a ten-year period. Cal Am treats tank painting costs as deferred program maintenance costs in their RO model (Cal Am RO model file "ALL_CH04_O&M_WP_Def Prog Maint," tab: "REC"). Cal Am states that it plans on repainting the interior and exterior of Lower Wikiup Tank #1 in 2022.

¹⁵⁴ Cal Am RO model file "ALL_CH07_PLT_RO_Forecast," tab: "Total Direct CAPEX WS-5."

¹⁵⁵ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

1 previous GRC and complete a portable generator planning study to identify
2 more affordable alternatives to installing stationary generators at its
3 facilities.¹⁵⁷ The terms of the adopted settlement agreement should be
4 adhered to and not ignored.

5 **4. LRK-WTP Treatment Upgrades (I15-610030)**

6 The Commission should reject Cal Am’s request of \$690,000 in
7 2024¹⁵⁸ to modify the existing treatment system at the Larkfield WTP since
8 the proposed modifications are not necessary. Cal Am states that the inlet
9 and discharge piping for the three vessels is arranged in a manner that
10 requires the entire treatment system be taken offline to backwash the
11 vessels.¹⁵⁹ Cal Am requests funding to modify the existing treatment plant
12 configuration to allow one treatment vessel to undergo maintenance with
13 the remaining two treatment vessels in operation without having to take the
14 entire treatment system off-line.¹⁶⁰ DDW states that the filters are currently
15 operated on an alternating basis, with one offline at a time for backwashing
16 and rest.¹⁶¹ The current treatment plant configuration can already operate
17 in a manner to allow one treatment vessel to be taken offline while the other
18 two treatment vessels are in operation. Therefore, the proposed project in
19 not necessary and the Commission should reject Cal Am’s request.

¹⁵⁶ Crooks Direct Testimony at 240.

¹⁵⁷ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

¹⁵⁸ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

¹⁵⁹ Crooks Direct Testimony at 241.

¹⁶⁰ Crooks Direct Testimony at 241.

¹⁶¹ DDW California-American Larkfield- 2017 Inspection Report at 10.

1 **B. Common Plant**

2 **1. Project Contingency**

3 Based on Cal Advocates’ recommendations regarding project
4 contingency costs, the Commission should not allow any funding related to
5 project contingency.¹⁶² Attachment 2-4 shows the amount of proposed
6 funding due to project contingency for 2024-2025.¹⁶³

7 **2. Projects Previously Included in Rates that Have**
8 **Not Provided a Benefit to Ratepayers**

9 As discussed in Chapter 6 of this report, projects previously funded
10 in rates and are now rescheduled to be completed in 2024 or later (when
11 they were originally supposed to be completed prior to 2024) should not be
12 included in rates at this time.¹⁶⁴ Specifically, the Storage Tank at Water
13 Treatment Plant project (I15-610021) in the Larkfield District.¹⁶⁵ If Cal
14 Am is able to complete the Storage Tank at Water Treatment Plant project
15 by the revised completion date, Cal Am may seek recovery of the project
16 cost when it files its next general rate case application in 2025. The
17 Commission should not allow funding for the Storage Tank at Water
18 Treatment Plant project in rates at this time.

¹⁶² Cal Advocates Report, Report on Capital Contingency Factors, Southern Division, Special Request 4, and Extra Ordinary Early Retirements, Chapter 1.

¹⁶³ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 2, Attachment 2-4, *2024-2025 Funding Related to Project Contingency –Larkfield District*.

¹⁶⁴ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 6.

¹⁶⁵ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am alleges that the Storage Tank at Water Treatment Plant project will be completed in 2025. The direct cost for the Storage Tank at Water Treatment Plant project is \$184,000 in 2022, \$460,000 in 2023, \$690,000 in 2024, and \$690,000 in 2025.

1 **C. Revenue Requirement Impact Due to Cal Advocates’**
2 **Recommendations**

3 Cal Advocates’ recommended adjustments mentioned above would reduce the
4 revenue requirement by approximately \$298,244 in 2024 and \$151,514 in 2025 for the
5 Larkfield District.¹⁶⁶

6 **IV. CONCLUSION**

7 The Commission should reduce the annual budget for the Well Rehabilitation and
8 Maintenance Program (I15-610028) to \$66,664 (from \$138,000) based on the work that
9 has already been completed the 2021-2022 period. The Commission should reduce the
10 proposed annual budget for the Larkfield Tank Rehabilitation and Seismic Upgrades
11 (I15-610027) to \$128,467 (from \$253,000) due to removing the portions of the project
12 that were already planned or completed and revising the capital tank improvement costs.
13 The Commission should deny Cal Am’s request of \$ 230,000 in 2024 for the Standby
14 Generator Improvement Program (I15-610029) consistent with Cal Advocates’
15 recommendation regarding generators.¹⁶⁷ The Commission should deny Cal Am’s
16 request of \$690,000 in 2024 for the WTP Treatment Upgrades project (I15-610030) since
17 the proposed modifications are not necessary.

18 The Commission should adopt Cal Advocates recommended budget including
19 common plant issues such as project contingency and projects approved in previous rate
20 cases but not expected to be completed in 2024 (or later).

¹⁶⁶ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 2, Attachment 2-5, *Larkfield District – Revenue Requirement Calculation* (showing the revenue requirement calculation).

¹⁶⁷ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

1 **CHAPTER 3 PLANT – MONTEREY**

2 **I. INTRODUCTION**

3 Cal Am’s Monterey District is comprised of the following systems: Monterey
4 Main, Ryan Ranch, Hidden Hills, Bishop, Toro, Ambler Park, Ralph Lane, Chualar, and
5 Garrapata.¹⁶⁸ The Monterey District is supplied through a combination of surface water
6 from the Carmel River, shallow wells in Carmel Valley, wells in the Seaside Basin, and
7 wells along the Highway 68 corridor.¹⁶⁹ Cal Advocates reviewed Cal Am’s testimony,
8 application, work-papers, minimum data requirements, CPS, Condition Based
9 Assessment of Buried Infrastructure, cost estimates, and responses to Cal Advocates’
10 data requests. Cal Advocates conducted a field investigation of the Monterey District’s
11 water system on November 29-30, 2022. This chapter presents the recommendations the
12 Commission should adopt for the proposed Plant in Service for Cal Am’s Monterey
13 District.

14 **II. SUMMARY OF RECOMMENDATIONS**

15 The Commission should adjust Cal Am’s request for individual proposed projects
16 in the Monterey District as follows:

- 17 • The Commission should reduce the annual budget for the Tank
18 Rehabilitation Program (I15-400161) to \$199,833 annually (from
19 \$1,380,000) by: 1) removing the redundant tank painting costs; 2)
20 separating the tank inspection costs; and 3) removing the contingency costs.
- 21 • The Commission should reject funding for the Carmel Woods #1 and #2
22 Replacement project (I15-400130) since there is sufficient storage in the
23 Carmel Woods-Rio Vista pressure zone without these tanks.

¹⁶⁸ A.22-07-001, *Direct Testimony of Christopher Cook* (Cook Direct Testimony) at 4.

¹⁶⁹ Cook Direct Testimony at 4.

- 1 • The Commission should reduce the Tank Installation and Replacement
2 Program (I15-400165) to \$858,667 (from \$1,288,000) since one of the
3 tanks does not need to be replaced at this time.
- 4 • The Commission should deny funding for the Eardley-Forest Lake Above
5 Ground Transmission Main Replacement (I15-400153) and the Carmel
6 Valley Transmission Main Improvements (I15-400155) projects due to the
7 complexity and uncertainty of the scope of these projects. If Cal Am
8 decides to pursue the design and permitting of these projects, it may seek
9 recovery of the costs in a subsequent rate case after completing the
10 preliminary phase of the projects and clarifying the projects’ scope as well
11 as cost.
- 12 • The Commission should reduce the Supervisory Control and Data
13 Acquisition (“SCADA”) Program (I15-400160) to \$7,048 (from \$552,000)
14 in 2024 and deny any funding in 2025 due to the planned new and
15 replacement improvements scheduled for 2024-2025.
- 16 • The Commission should deny Cal Am’s annual budget of \$345,000 for the
17 Standby Generator Improvement Program (I15-400163) consistent with Cal
18 Advocates’ recommendations regarding generators.¹⁷⁰

19 Recommendations on plant additions also reflect Cal Advocates’
20 recommendations on project contingency and previously funded projects that are
21 expected to be completed in 2024 or later. The Commission should not allow Cal Am to
22 include in rates incomplete projects that have been previously included in rates but are
23 now rescheduled to be completed in 2024 or later. These projects should not be included
24 in rates until the projects are completed, in service, and providing benefits to ratepayers.
25 If Cal Am is able to complete these projects by the revised completion date, Cal Am may

¹⁷⁰ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

1 seek recovery of the project costs when it files its next general rate case application (in
 2 2025).

3 Attachment 3-1 presents Cal Advocates’ project-specific adjustments.¹⁷¹ These
 4 adjustments reduce the revenue requirement by approximately \$1,376,641 in 2024 and
 5 \$1,397,898 in 2025.¹⁷² The Commission should adopt the capital budget summary
 6 presented in Table 3-1 below.

Table 3-1: Capital Budget Summary – Monterey District¹⁷³

Monterey (\$000)	2024	2025	Annual Average
Public Advocates Office Recommendation	\$ 14,373.72	\$ 15,060.19	\$ 14,716.96
Cal Am's Proposed	\$ 22,025.17	\$ 23,132.69	\$ 22,578.93
Cal Am > Public Advocates Office	\$ 7,651.45	\$ 8,072.50	\$ 7,861.98
Public Advocates Office as % of Cal Am	65%	65%	65%

7 **III. ANALYSIS**

8 Except where otherwise stated, the project costs discussed in this section are direct
 9 project costs (i.e., costs of the project without add-on costs such as overhead).

¹⁷¹ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 3, Attachment 3-1, *Capital Budget Details – Monterey District*.

¹⁷² Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 3, Attachment 3-6, *Monterey District – Revenue Requirement Calculation* (showing the revenue requirement calculation).

¹⁷³ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

1 **A. Proposed Projects**

2 **1. Tank Rehabilitation Program (I15-400161)**

3 The Commission should reduce Cal Am’s proposed annual budget
4 for capitalized tank improvements to \$199,833(from \$1,380,000)¹⁷⁴ by 1)
5 removing the redundant tank painting costs; 2) separating the tank
6 inspection costs; and 3) removing the contingency costs.

7 Cal Am calculates the proposed annual budget by dividing the
8 proposed tank improvements over a three-year period (2024-2026).¹⁷⁵ The
9 tank inspections were conducted by TIC for these tanks in 2021.¹⁷⁶ These
10 tank inspection reports provide a list of recommended improvements (both
11 capitalized and tank painting improvements) for a five-year period¹⁷⁷ Cal
12 Am already requests funding for tank painting for the following tanks as
13 separate projects: Aguajito 2, Country Club Heights, Forest Lake 1, Upper
14 Middle Canyon, and Rio Vista Tanks 1-3.¹⁷⁸ Since Cal Am already
15 included these tank painting costs as separate projects, Cal Advocates
16 removed the tank painting costs from the Monterey Tank Rehabilitation
17 Program.¹⁷⁹ The tank inspection costs should be separated from the
18 Monterey Tank Rehabilitation Program capital budget and treated as

¹⁷⁴ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

¹⁷⁵ Cal Am Engineering Workpaper, Tab 073 at 4 (showing the proposed tank improvement budget on an individual tank basis).

¹⁷⁶ Cal Am Response to Public Advocates Office Data Request JMI-006 (Tank Maintenance).

¹⁷⁷ Cal Am Response to Public Advocates Office Data Request JMI-006 (Tank Maintenance).

¹⁷⁸ Cal Am RO model file “ALL_CH04_O&M_WP_Def Prog Maint,” tab: “REC.” While page 260 of Crooks Direct Testimony doesn’t list Ord Grove tank painting project, Cal Am factors the cost of painting Ord Grove tank in line 127 of the RO model file: “ALL_CH04_O&M_WP_Def Prog Maint,” tab: “REC.”

¹⁷⁹ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 5,

1 deferred program maintenance costs, consistent with how Cal Am handles
2 tank inspection costs.¹⁸⁰

3 The contingency costs were removed from the project costs,
4 including the line items the tank inspection report referenced as
5 contingency items, consistent with Cal Advocates' recommendations
6 regarding project contingency costs.¹⁸¹

7 Based on the above adjustments to Cal Am's proposed budget for
8 the Monterey Tank Rehabilitation Program, the Commission should reduce
9 the annual budget to \$199,833.¹⁸²

10 **2. Carmel Woods #1 and #2 Tank Replacement (I15-**
11 **400130)**

12 The Commission should deny the proposed budget of \$1,472,000 in
13 2023-2025¹⁸³ because the total storage volume for the existing two tanks
14 (Carmel Woods Tanks 1 and 2) is not necessary at this time to meet the
15 storage demands for the Carmel Woods-Rio Vista pressure zone.¹⁸⁴

¹⁸⁰ Crooks Direct Testimony at 259:15-17. Cal Am amortizes tank inspection costs over a five-year period. Cal Am treats tank inspection costs as deferred program maintenance costs in their RO model (Cal Am RO model file "ALL_CH04_O&M_WP_Def Prog Maint," tab: "REC").

¹⁸¹ Cal Advocates Report, Report on Capital Contingency Factors, Southern Division, Special Request 4, and Extra Ordinary Early Retirements, Chapter 1. Cal Am Response to Public Advocates Office Data Request JMI-006 (Tank Programs - Central), JMI-006 Q001 Attachment 1 Redacted at 19, Attachment 4 Redacted at 20, Attachment 7 Redacted at 19. In addition to the contingency items, the following line items were also removed: "roof support structure repair contingency" from Forest Lake 1, Ord Grove, and Rio Vista 2 and "contingency for repair of metal loss on bottom plate projection" from Rio Vista 2.

¹⁸² Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 3, Attachment 3-2, I15-400161 – Direct Project Cost (showing the revised direct project cost calculation).

¹⁸³ Cal Am RO model file "ALL_CH07_PLT_RO_Forecast," tab: "Total Direct CAPEX WS-5." Cal Am requests approximately \$184,000 in 2023, \$184,000 in 2024, and \$1,104,000 in 2025.

¹⁸⁴ Cal Am Engineering Workpaper, Redacted Tab 164, 2019 Monterey Comprehensive Planning Study at 5-25.

1 The Carmel Woods Tanks 1 and 2 serve the Carmel Woods-Rio
2 Vista pressure zone.¹⁸⁵ According to the 2019 Monterey CPS, the total
3 storage requirement is 315,000 gallons.¹⁸⁶ In addition, the 2019 Monterey
4 CPS states that the Carmel Woods-Rio Vista pressure zone has six storage
5 tanks with a total storage volume of 623,000 gallons.¹⁸⁷ Carmel Woods
6 Tanks 1 and 2 have a total storage volume of 100,000 gallons.¹⁸⁸ Without
7 the total storage volume of Carmel Woods Tanks 1 and 2 (523,000 gallons
8 without Carmel Woods 1 and 2), the revised storage volume would still be
9 able to meet the storage demand. Therefore, the storage volume from
10 Carmel Woods Tanks 1 and 2 are not needed at this time and the
11 Commission should deny Cal Am’s request.

12 **3. Tank Installation and Replacement Program (I15-**
13 **400165)**

14 The Commission should reduce Cal Am’s proposed annual budget to
15 replace three tanks to \$858,667 (from \$1,288,000)¹⁸⁹ since one of the tanks
16 does not need to be replaced at this time. Cal Am requests to replace the
17 Boyd Tank, Carola Tank #1, and Upper Paseo Privado Tank during this rate
18 case due to the existing conditions of the tanks.¹⁹⁰

¹⁸⁵ Cal Am Engineering Workpaper, Redacted Tab 164, 2019 Monterey Comprehensive Planning Study at 5-25.

¹⁸⁶ Cal Am Engineering Workpaper, Redacted Tab 164, 2019 Monterey Comprehensive Planning Study, at 5-32. The storage requirement is based on the required equalization volume (which is based on 20% MDD) and fire demand (1,500 gpm for two hours).

¹⁸⁷ Cal Am Engineering Workpaper, Redacted Tab 164, 2019 Monterey Comprehensive Planning Study at 5-25.

¹⁸⁸ Cal Am Engineering Workpaper, Redacted Tab 164, 2019 Monterey Comprehensive Planning Study at 5-25.

¹⁸⁹ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am requests an annual budget of \$1,288,000.

¹⁹⁰ Crooks Direct Testimony at 214.

1 In the 2016 rate case (A.16-07-002), the Commission approved
2 funding to replace the existing Carola Tank #1 (under the Replace Carola
3 #1 Tank project (I15-400113)).¹⁹¹ Cal Am determined that it was more
4 cost effective to retrofit the existing Carola Tank #1 rather than replacing
5 the tank.¹⁹² Cal Am completed retrofitting the tank in 2019.¹⁹³ Since 2019,
6 TIC conducted an inspection of Carola Tank #1 in 2021.¹⁹⁴ While the tank
7 inspection report noted a need for minor improvements,¹⁹⁵ it did not state
8 that the tank needs to be replaced at this time.¹⁹⁶ The report states that the
9 tank should be inspected again in 2025 to determine if any repairs or
10 improvements are necessary.¹⁹⁷

11 Cal Am estimates a replacement cost of \$1.4 million per tank over a
12 three-year period (2024-2026).¹⁹⁸ Removing the cost of one tank and
13 dividing the remaining cost of two tanks by a three-year period results in an
14 annual budget of \$858,667 for the tank replacements.¹⁹⁹ Therefore, the

¹⁹¹ A direct cost of \$661,206 in 2018 was approved for the Replace Carola #1 Tank project.

¹⁹² Crooks Direct Testimony (from A.19-07-004) at 128.

¹⁹³ Crooks Direct Testimony at 33.

¹⁹⁴ Cal Am Response to Public Advocates Office Data Request JMI-006 (Tank Programs – Central), Attachment JMI 06 Q002 Attachment 4.

¹⁹⁵ The inspection report noted removing the pine needles from the roof and cleaning and painting the interior shell bolt heads, column and flanged column connections.

¹⁹⁶ Cal Am Response to Public Advocates Office Data Request JMI-006 (Tank Programs – Central), Attachment JMI 06 Q002 Attachment 4 at 2.

¹⁹⁷ Cal Am Response to Public Advocates Office Data Request JMI-006 (Tank Programs – Central), Attachment JMI 06 Q002 Attachment 4 at 2.

¹⁹⁸ Cal Am Engineering Workpaper, Tab 077 at 2-3.

¹⁹⁹ $(\$1.4 \text{ million per tank} \times 2 \text{ tanks}) \div 3 \text{ years} \approx \$858,667.$

1 Commission should only allow \$858,667 annually for the Tank Installation
2 and Replacement Program.²⁰⁰

3 **4. Multi Rate Case Cycle Main Replacement Projects**

4 Cal Am requests two main replacement projects in the Monterey
5 District (the Eardley-Forest Lake Above Ground Transmission Main
6 Replacement (I15-400153) and the Carmel Valley Transmission Main
7 Improvements project (I15-400155)) that they acknowledge won't be
8 completed during this rate case cycle.²⁰¹ Cal Am requests funding for the
9 preliminary phase of these projects which include design, right of way
10 acquisition, and permitting.²⁰²

11 Cal Am acknowledges the project complexity of the projects due to
12 the extensive initial stage of the projects. The duration project design and
13 permitting process for these projects spans across the entire current rate
14 case cycle.²⁰³ The long design and permitting timeline suggest that the
15 project scope is underdeveloped, likely resulting in additional project costs
16 not already incorporated in the original project scope.

17 Cal Am in this rate case acknowledges that it has cancelled multiple
18 projects that were previously approved and funded into rates under the
19 assumption that the project would be completed and provide a benefit to

²⁰⁰ If Cal Am decides to replace Carola Tank#1 under the Monterey Tank Installation and Replacement Program (or another under project), then the Commission should remove the remaining cost Cal Am spent to rehabilitation the tank under the Replace Carola #1 Tank project since the existing Carola Tank#1 will no longer be in service.

²⁰¹ Cal Am expects Eardley-Forest Lake Above Ground Transmission Main Replacement project to be completed in 2027 and Carmel Valley Transmission Main Improvements project to be completed in 2029.

²⁰² Cal Am requests \$184,000 and \$460,000 in 2024-2025 for Eardley-Forest Lake Above Ground Transmission Main Replacement project and Carmel Valley Transmission Main Improvements project, respectively.

²⁰³ Crooks Direct Testimony at 200.

1 ratepayers. Table 3-2 shows some of the projects previously approved and
 2 funded into rates but Cal Am now acknowledges are cancelled.

Table 3-2: Projects Previously Funded in Rates that Have Provided No Ratepayer Benefit²⁰⁴

PID	Project Description	District	Estimated Project Completion Year				
			A.10-07-007	A.13-07-002	A.16-07-002	A.19-07-004	A.22-07-001
I15-500030	LA-Oswego Well Replacement and Treatment	Los Angeles	2013	2014	2018	2021	CANCELLED
I15-500032	Winston Well Redrill and Treatment	Los Angeles	2014	2014	2019	2022	CANCELLED
15-510028	Replace 1,400 Feet of 10-inch Main to Las Posas Tanks	Ventura	n/a	2016	2016	2020	CANCELLED
I15-600066	Suburban-Rosemont Route 50 Crossing	Sacramento	n/a	2016	2017	2020	CANCELLED

3 Cal Am states that the challenges related to the preliminary phase of
 4 the Carmel Valley Transmission Main Improvements project are expected
 5 to be substantial due to the extensive efforts to coordinate service
 6 connections, acquire easements and rights-of-way, obtain environmental
 7 permits, and design the new mains, service lines, and connections.²⁰⁵ Cal
 8 Am cancelled one of the previously approved projects (Replace 1,400 Feet
 9 of 10-inch Main to Las Posas Tanks (I15-510028)) due to Cal Am unable to
 10 obtain easements.²⁰⁶

11 Due to the complexities of these projects, it would be beneficial for
 12 ratepayers to be aware of what they will be potentially funding. Cal Am
 13 provides a preliminary cost for Eardley-Forest Lake Above Ground

²⁰⁴ Crooks Direct Testimony at 60-62, 83-84, 120-121.

²⁰⁵ Crooks Direct Testimony at 205.

²⁰⁶ Crooks Direct Testimony at 83-84.

1 Transmission Main Replacement at \$14,215,500²⁰⁷ Cal Am is not
2 confident in its preliminary cost estimate, which is reflected in the high
3 contingency assigned to the project related to the project complexity due to
4 the relatively congested corridor.²⁰⁸ Given the substantial financial impact
5 this project has on ratepayers, it is important that the most cost beneficial
6 project alternative to be determined prior to the ratepayers being financially
7 liable for this project by having the project costs embedded into rates.

8 Due to the uncertainty of the project scope, the Commission should
9 deny funding for design and permitting in this rate case cycle. Cal Am may
10 pursue the design and permitting phase of these projects and present them
11 in a future rate case. Once the preliminary phase is completed, there will be
12 more clarity on the project scope and cost. Cal Am, in a future rate case,
13 may request funding for the project, including all prudent design and
14 permitting costs. This will provide more transparency on the project costs
15 borne by the ratepayers.

16 **5. SCADA Maintenance and Improvements Program**
17 **(I15-400160)**

18 The Commission should reduce Cal Am’s request for SCADA
19 improvements to \$7,048 in 2024 and zero funding in 2025²⁰⁹ due to the
20 planned new and replacement improvements scheduled for 2024-2025.

21 Cal Am provided a 15-year plan (2022-2037) for SCADA
22 improvements in the Monterey District.²¹⁰ The fifteen-year plan provides

²⁰⁷ Cal Am Engineering Workpaper, Redacted Tab 164 at B-64.

²⁰⁸ Cal Am Engineering Workpaper, Redacted Tab 164 at B-64.

²⁰⁹ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.” Cal Am requests an annual budget of \$552,000.

²¹⁰ Cal Am Response to Public Advocates Office Data Request JMI-010 (SCADA Master Plan), Attachment JMI 10 Q001 Attachment 2.

1 an estimate cost for replacement and new installation improvements for
2 various SCADA equipment each year. The fifteen-year plan states that the
3 total new installation and replacement cost is \$7,048 in 2024 and \$0 in
4 2025.²¹¹ Attachment 3-3 summarizes the total replacement and new
5 installation costs for 2024 and 2025.²¹² Therefore, the Commission should
6 only allow \$7,048 in 2024 and no funding in 2025.

7 **6. Standby Generator Improvement Program (I15-**
8 **400163)**

9 The Commission should deny Cal Am’s annual budget of
10 \$345,000²¹³ to install seven generators, consistent with Cal Advocates’
11 recommendation regarding generators.²¹⁴

12 Cal Am plans on installing generators at sites listed in the CPS and
13 in the Emergency Power Study.²¹⁵ Cal Am should fulfill its obligations in
14 the adopted settlement from the previous GRC and complete a portable
15 generator planning study to identify more affordable alternatives to
16 installing stationary generators at its facilities.²¹⁶ The terms of the adopted
17 settlement agreement should be adhered to and not ignored.

²¹¹ Cal Am Response to Public Advocates Office Data Request JMI-010 (SCADA Master Plan), Attachment JMI 10 Q001 Attachment 2.

²¹² Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 3, Attachment 3-3, *I15-400160 – 2024-2025 SCADA New Installation and Replacement Costs*.

²¹³ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

²¹⁴ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

²¹⁵ Crooks Direct Testimony at 212.

²¹⁶ Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

1 **B. Common Plant**

2 **1. Project Contingency**

3 Based on Cal Advocates’ recommendation regarding project
4 contingency, the Commission should deny any funding related to project
5 contingency.²¹⁷ Attachment 3-4 shows the amount of proposed funding due
6 to project contingency for 2024-2025.²¹⁸

7 **2. Projects Previously Included in Rates that Have**
8 **Not Provided a Benefit to Ratepayers**

9 Attachment 3-5 identifies projects originally scheduled for
10 completion before 2024 but are now projected for completion in 2024 or
11 later.²¹⁹ The projects were previously funded in rates. However, the
12 Commission should not authorize continued inclusion of these projects in
13 rates.²²⁰ If Cal Am is able to complete these projects by the revised
14 completion date, Cal Am may seek recovery of the project costs when it
15 files its next general rate case application in 2025.

²¹⁷ Cal Advocates Report, Report on Capital Contingency Factors, Southern Division, Special Request 4, and Extra Ordinary Early Retirements, Chapter 1.

²¹⁸ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 3, Attachment 3-4, *2024-2025 Funding Related to Project Contingency –Monterey District*.

²¹⁹ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 3, Attachment 3-5, *Projects Previously Funded in Rates but not Providing a Benefit to Ratepayers until 2024 or Later – Monterey District*). These projects result in a total direct cost of \$2,840,500 in 2022, \$4,692,000 in 2023, \$4,646,000 in 2024, and \$4,140,000 in 2025.

²²⁰ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 6.

1 **C. Revenue Requirement Impact Due to Cal Advocates’**
2 **Recommendations**

3 Cal Advocates’ recommended adjustments mentioned above would reduce
4 the revenue requirement by approximately \$1,376,641 in 2024 and \$1,397,898 in
5 2025 for the Monterey District.²²¹

6 **IV. CONCLUSION**

7 The Commission should reduce the annual budget for the Tank Rehabilitation
8 Program (I15-400161) to \$199,833 (from \$1,380,000) during this rate case cycle by: 1)
9 removing the redundant tank painting costs; 2) separating the tank inspection costs; and
10 3) removing the contingency costs. The Commission should reject funding for the
11 Carmel Woods #1 and #2 Replacement project (I15-400130) since there is sufficient
12 storage in the Carmel Woods-Rio Vista pressure zone without these tanks. The
13 Commission should reduce the Tank Installation and Replacement Program (I15-400165)
14 to \$858,667 (from \$1,288,000) since one of the tanks does not need to be replaced at this
15 time. The Commission should deny funding for the Eardley-Forest Lake Above Ground
16 Transmission Main Replacement (I15-400153) and the Carmel Valley Transmission
17 Main Improvements (I15-400155) projects in this rate case due to the project complexity
18 and uncertainty of scope associated with these projects. If Cal Am decides to pursue the
19 design and permitting of the Eardley-Forest Lake Above Ground Transmission Main
20 Replacement and the Carmel Valley Transmission Main Improvements projects, they
21 may present it in a subsequent rate case after Cal Am completes the preliminary phase of
22 the projects and there is more clarity on the project scope and cost. Cal Am may request
23 funding for the Eardley-Forest Lake Above Ground Transmission Main Replacement and
24 the Carmel Valley Transmission Main Improvements projects in a future rate case,
25 including all prudent design and permitting costs. The Commission should reduce the

²²¹ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 3, Attachment 3-6, *Monterey District – Revenue Requirement Calculation* (showing the revenue requirement calculation).

1 SCADA Program (I15-400160) to \$7,048 (from \$552,000) in 2024 and allow no funding
2 in 2025 due to the planned new and replacement improvements scheduled for 2024-2025.
3 The Commission should deny Cal Am's annual budget of \$345,000 for the Standby
4 Generator Improvement Program (I15-400163) consistent with Cal Advocates'
5 recommendation regarding generators.²²²

6 The Commission should adopt Cal Advocates recommended budget to account for
7 common plant issues such as excessive project contingency costs and projects approved
8 in previous rate cases but not expected to be completed until 2024 (or later).

²²² Cal Advocates Report, Report on Depreciation, Earthquake, Customer Service, Wildfire, Water Quality, and Safety, Chapter 4.

1 **CHAPTER 4 MONTEREY WASTEWATER**

2 **I. INTRODUCTION**

3 The Monterey Wastewater district is comprised of the following wastewater
4 systems: Las Palmas, Indian Springs, Pasadera, Carmel Valley Ranch, Oak Hills,
5 Spreckels, White Oaks, and Village Greens.²²³ Cal Advocates conducted a field visit on
6 November 30, 2022. This chapter presents Cal Advocates’ analyses and
7 recommendations for Plant in Service for Cal Am’s Monterey Wastewater District. In
8 the 2024-2025 period, Cal Am requests funding for the recurring project budget in
9 Monterey Wastewater.²²⁴

10 **II. SUMMARY OF RECOMMENDATIONS**

11 The Commission should adopt \$393,112 in 2024 and \$484,566 in 2025 for plant
12 additions in Monterey Wastewater District. The Commission should reduce the recurring
13 project budget to \$87,369 (from \$380,000) in 2025 by reducing the vehicles recurring
14 project budget.

15 Attachment 4-1 presents Cal Advocates’ project-specific adjustments.²²⁵ This
16 adjustment reduces the revenue requirement by approximately \$55,309 in 2025.²²⁶ The
17 Commission should adopt the capital budget summary presented in Table 4-1 below.
18

²²³ Cooks Direct Testimony at 4.

²²⁴ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

²²⁵ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 4, Attachment 4-1, *Capital Budget Details – Monterey Wastewater District*.

²²⁶ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 4, Attachment 4-4, *Monterey Wastewater District – Revenue Requirement Calculation* (showing the revenue requirement calculation).

Table 4-1: Capital Budget Summary – Monterey Wastewater District²²⁷

Monterey WW (\$000)	2024	2025	Annual Average
Public Advocates Office Recommendation	\$ 393.11	\$ 484.57	\$ 438.84
Cal Am's Proposed	\$ 393.11	\$ 777.20	\$ 585.15
Cal Am > Public Advocates Office	\$ -	\$ 292.63	\$ 146.32
Public Advocates Office as % of Cal Am	100%	62%	75%

1 **III. ANALYSIS**

2 Unless otherwise stated, the project costs discussed below are direct project costs. The
 3 direct project costs are the cost of the project without add-on costs (e.g. overhead).

4 **A. Recurring Project Budget**

5 The Commission should reduce Cal Am’s proposed recurring project
 6 budget for vehicles to \$87,369 in 2025 (R1542O125)²²⁸ because only one vehicle
 7 warrants replacement.²²⁹ Cal Am only requests to replace one vehicle in 2025 at
 8 a cost of \$87,369.²³⁰ Cal Am is not requesting funding for any additional vehicles;
 9 only replacement of an existing vehicle in 2025.²³¹ Therefore, the Commission
 10 should only authorize funding for the replacement of one vehicle in Cal Am’s
 11 recurring project budget for vehicles.

²²⁷ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

²²⁸ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total Direct CAPEX WS-5.”

²²⁹ Cal Am Response to Public Advocates Office Data Request JMI-018 (Vehicles), CAW Response to Cal Adv JMI 18 Q001 Attachment 1.

²³⁰ Cal Am Response to Public Advocates Office Data Request JMI-018 (Vehicles), CAW Response to Cal Adv JMI 18 Q001 Attachment 1.

²³¹ Cal Am Response to Public Advocates Office Data Request JMI-018 (Vehicles).

1 **B. Revenue Requirement Impact Due to Cal Advocates’**
2 **Recommendations**

3 Cal Advocates’ recommended adjustments mentioned above would reduce
4 the revenue requirement by approximately \$55,309 in 2025 for the Monterey
5 Wastewater District.²³²

6 **IV. CONCLUSION**

7 The Commission should reduce the proposed recurring project budget for vehicles
8 to \$87,369 (from \$380,000) in 2025 (R1542O125) since only one vehicle warrants
9 replacement. The Commission should adopt Cal Advocates recommended budget.

²³² Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 4, Attachment 4-4, *Monterey Wastewater District – Revenue Requirement Calculation* (showing the revenue requirement calculation).

1 **CHAPTER 5 TANK PAINTING**

2 **I. INTRODUCTION**

3 Cal Am requests funding for deferred tank improvements, which consists of tank
4 painting and tank inspections. Cal Am amortizes the proposed project costs over a ten-
5 year period.²³³ Cal Am conducts an inspection of its tanks at least once every five
6 years.²³⁴ Cal Advocates reviewed the most recent tank inspection report to determine the
7 reasonableness of Cal Am’s request. Cal Am states that it has cancelled the Angeles
8 Mesa Tank painting project in the Los Angeles District since filing their application.²³⁵
9 This chapter presents the analysis and recommendations regarding Cal Am’s request for
10 tank painting in its districts.

11 **II. SUMMARY OF RECOMMENDATIONS**

12 The Commission should adopt a budget of \$3,879,867 in 2024 and \$1,432,585 in
13 2025 for deferred tank improvements due to one project being modified based on the
14 most recent tank inspection report. Attachment 5-1 presents Cal Advocates’ project-
15 specific adjustments.²³⁶

²³³ Cal Am RO model file “ALL_CH04_O&M_WP_Def Prog Maint,” tab: “REC.”

²³⁴ Cal Am RO model file “ALL_CH04_O&M_WP_Def Prog Maint,” tab: “REC.”

²³⁵ Cal Am Response to Public Advocates Office Data Request JMI-019 (JMI-003 Follow Up), CAW Response to Cal Adv JMI 19 Q001 Attachment 1. Cal Am cancelled the Angeles Mesa Tank painting project since the Los Angeles District Seismic study recommended cancelling this project.

²³⁶ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 5, Attachment 5-1, *Capital Budget Details – Deferred Tank Improvements*.

1 **III. ANALYSIS**

2 **A. Proposed Projects**

3 **1. Vintage Treatment Plant (“TP”) Finished Water**
4 **Tank Painting Interior and Exterior**

5 The Commission should reduce the proposed budget to \$831,000
6 (from \$1,281,000) in 2024²³⁷ to repaint both the exterior and interior of the
7 Vintage TP Finished Water Tank since only spot repairs should be done at
8 this time rather than repainting the entire tank exterior. TIC conducted an
9 inspection of the Vintage TP Finished Water Tank in 2019.²³⁸

10 According to the tank inspection report, the exterior coating appears
11 to be in good overall condition and was providing adequate protection from
12 corrosion to most of the underlying steel.²³⁹ TIC believes that the tank
13 exterior does not need to be repainted within the next five years from a
14 corrosion standpoint.²⁴⁰ The inspection report mentions spot cleaning and
15 topcoating the existing system as a viable option.²⁴¹ The inspection report
16 estimates \$306,000 for spot repairs,²⁴² which is a better option compared to
17 repainting the entire tank. Therefore, the Commission should only allow

²³⁷ Cal Am RO model file “ALL_CH04_O&M_WP_Def Prog Maint,” tab: “REC.”

²³⁸ Cal Am Response to Public Advocates Office Data Request JMI-019 (DR JMI-003 Follow up), Attachment JMI-019 Q002 Attachment 1 Redacted at 1. The inspection report refers to the tank as the “South Tank.”

²³⁹ Cal Am Response to Public Advocates Office Data Request JMI-019 (DR JMI-003 Follow up), Attachment JMI-019 Q002 Attachment 1 Redacted at 12.

²⁴⁰ Cal Am Response to Public Advocates Office Data Request JMI-019 (DR JMI-003 Follow up), Attachment JMI-019 Q001 Attachment 1 Redacted) at 12.

²⁴¹ Cal Am Response to Public Advocates Office Data Request JMI-019 (DR JMI-003 Follow up), Attachment JMI-019 Q002 Attachment 1 Redacted at 13.

²⁴² Spot Clean and Topcoat (\$206,000) + Containment (\$100,000) = \$306,000

1 \$831,000 for repainting the Vintage TP Finished Water Tank.²⁴³ TIC states
2 that the tank exterior should be reevaluated in three to five years to
3 determine a more precise recoating schedule.²⁴⁴ If the exterior tank merits
4 to be completely repainted after another tank inspection report is conducted,
5 then Cal Am can pursue repainting the entire tank exterior and present the
6 completed project cost in their next rate case with an updated inspection
7 report. Cal Am would be able to recover all prudent costs related to the
8 tank painting project.

9 **IV. CONCLUSION**

10 The Commission should adopt a budget of \$3,879,867 in 2024 in \$1,432,585 in
11 2025 for deferred tank improvements due to one project being modified based on the
12 most recent tank inspection report. The Commission should adopt Cal Advocates’
13 recommended budget.

²⁴³ Interior (\$525,000) + Exterior (\$306,000) = \$831,000.

²⁴⁴ Cal Am Response to Public Advocates Office Data Request JMI-019 (DR JMI-003 Follow up), Attachment JMI-019 Q002 Attachment 1 Redacted at 12.

1 **CHAPTER 6 PROJECTS PREVIOUSLY FUNDED IN RATES THAT**
2 **ARE NOT PROVIDING A BENEFIT TO RATEPAYERS**

3 **I. INTRODUCTION**

4 Project costs are forecasted in rates through rate base under the assumption that
5 the utility will place these projects in service as scheduled. However, Cal Am now states
6 that some projects that were previously authorized by the Commission have not been
7 completed. The project costs are embedded in rates under the assumption that these
8 projects would be in service and providing benefits to ratepayers. Ratepayers should only
9 be responsible for paying for projects in which they are receiving a benefit from. This
10 chapter discusses projects that were approved and included in rates in previous rate cases
11 but Cal Am now has rescheduled to be complete in this rate case cycle.

12 **II. SUMMARY OF RECOMMENDATIONS**

13 The Commission should not include project costs for projects previously approved
14 by the Commission where Cal Am anticipates completing in 2024 or later. These
15 projects should not be included in rates until the projects are completed, in service, and
16 providing benefits to ratepayers.²⁴⁵ Once Cal Am completes these projects, it can
17 propose to recover the costs in the next rate case.²⁴⁶ This will provide the Commission
18 the opportunity to review the actual costs of the project for reasonableness and prudence.

²⁴⁵ Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 6, Attachment 6-1, *Projects Previously Funded in Rates but not Providing a Benefit to Ratepayers until 2024 or Later*.

²⁴⁶ Cal Am should not be able to recover the recorded cost of projects until the projects are completed and placed into service.

1 **III. ANALYSIS**

2 Attachment 6-1 shows previously approved projects that Cal Am now expects to
3 be completed in 2024 (or later).²⁴⁷

4 According to Cal Am, the completion dates for the projects shown in Attachment
5 6-1 have been delayed due to the uncertainty of the projects.²⁴⁸ For some projects, the
6 project has spanned across multiple rate cases. Due to continuing uncertainty, it remains
7 speculative whether the projects will be completed by the revised completion date.

8 According to Cal Am, the projects shown in Attachment 6-1 will not be completed until
9 Cal Am submits its application for the next rate cycle.²⁴⁹

10 In addition, it is also uncertain whether Cal Am will even complete these projects.
11 Cal Am also states some of the projects that were approved by the Commission and
12 included in rates in prior GRCs (under the assumption that they would be completed)
13 were ultimately cancelled. Table 6-1 shows a list of previously approved projects that
14 Cal Am has cancelled.

I15-600088	Sacramento	Sacramento District Water Quality Monitoring Program	n/a	n/a	n/a	n/a	2019	\$ 468,275	n/a	Cancelled

1 For the projects shown in Table 6-1 above, the Commission approved these
2 projects and the project costs were embedded in rates under the assumption that
3 these projects would be completed and provide a benefit to ratepayers. However,
4 these projects were never completed, but the ratepayers were still ultimately on the
5 hook for funding something that they ultimately received no benefit from. For
6 these reasons mentioned above, the Commission should remove the projects costs
7 associated with the projects in Attachment 6-1 from rates in this rate case until the
8 projects are completed, in service, and providing benefits to ratepayers. Once Cal
9 Am complete these projects, it can propose to recover the costs in the next rate
10 case cycle.²⁵¹ This will provide the Commission the opportunity to review the

²⁵⁰ Crooks Direct Testimony at 60-62, 83-84, 120. Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total CAPEX WS-5 (from A.16-07-002 and A.19-07-004).” A.16-07-002, *Direct Testimony of F. Mark Schubert* (Schubert Direct Testimony) at 37. Cal Am RO model file “RB 100 thru 105-2013 Statewide GRC-Los Angeles,” tab: “SCEP Summary” (from A.13-07-002). Cal Am RO model file “RB 100 thru 105-2013 Statewide GRC-Ventura,” tab: “SCEP Summary” (from A.13-07-002). Cal Am RO model file “RB 100 thru 105-2013 Statewide GRC-Ventura,” tab: “SCEP Summary” (from A.13-07-002). Cal Am RO model file “RB 100 thru 105-2013 Statewide GRC-Sacramento,” tab: “SCEP Summary” (from A.13-07-002). Cal Am also identified the Sacramento District Water Quality Monitoring Program (I15-600088) as a cancelled project. Cal Am states that the Sacramento District Water Quality Monitoring Program was no longer necessary due to since the project scope was already handled through the recurring project budget.

²⁵¹ Cal Am should not be able to recover the recorded cost of projects until the projects are completed and placed into service.

1 actual costs of the project for reasonableness and prudence. The Commission
2 should not include funding for the projects listed in Attachment 6-1 in this rate
3 case.

4 **IV. CONCLUSION**

5 The Commission should remove the projects costs associated with the projects in
6 Attachment 6-1 from rates in this rate case until the projects are completed, in service,
7 and providing benefits to ratepayers.²⁵² Once Cal Am completes these projects, it can
8 propose to recover the costs in the next rate case cycle. This will provide the
9 Commission the opportunity to review the actual costs of the project for reasonableness
10 and prudence.

²⁵² Cal Advocates Report, Report on Northern and Central Division Plant and Tank Painting Chapter 6, Attachment 6-1, *Projects Previously Funded in Rates but not Providing a Benefit to Ratepayers until 2024 or Later*.

1 **CHAPTER 7 2026 PLANT ADDITIONS**

2 **I. INTRODUCTION**

3 In this rate case, Cal Am proposes plant additions for the 2024-2026 period.
4 Both D.04-06-018 and D.07-05-062 (the “Rate Case Plan” and the “Revised Rate Case
5 Plan,” respectively) clearly state that all rate base items, including capital additions, are
6 subject to two test years and an attrition year.²⁵³ This chapter discusses the treatment of
7 plant addition in 2026 which occurs during the attrition year.

8 **II. SUMMARY OF RECOMMENDATIONS**

9 The Commission should follow its own guidelines in the Revised Rate Case Plan
10 for calculating rate base additions in the attrition year and not authorize any specific plant
11 improvement projects after 2025 in this rate case.

12 **III. ANALYSIS**

13 Cal Am is proposing plant additions in 2024-2026 for this rate case cycle. Since
14 the year 2026 falls outside of the two test years of this rate case, Cal Advocates did not
15 forecast 2026 plant additions or take a position on the prudence or the reasonableness of
16 projects scheduled for completion in 2026 (or after 2025). The year 2026 is not a
17 forecasted test year and the Commission should avoid giving the perception of endorsing
18 another test year.²⁵⁴

²⁵³ D.07-05-062 states at A-19 “All rate base items, including capital additions and depreciation, shall not be escalated but rather shall be subject to two test years and an attrition year, consistent with D.04-06-018.”

According to D.04-06-018, the attrition allowance methodology estimates the rate base additions for the third year of the rate case cycle (2026 in this rate case cycle) based on the difference between the first and second test year rate base.

²⁵⁴ According to D.04-06-018, the attrition allowance methodology estimates the rate base additions for the third year of the rate case cycle (2026 in this rate case cycle) based on the difference between the first and second test year rate base.

1 The Revised Rate Case Plan provides a calculation methodology for rate base
2 additions in the attrition year, stating: “The attrition allowance methodology provides for
3 rate base additions in year 3 by adding the difference between test year 1 and test year 2
4 rate base to test year 2 rate base.”²⁵⁵ In addition, Cal Am does not forecast proposed
5 2026 plant expenditures in its workpapers.²⁵⁶

6 Therefore, the Commission should follow its own guidelines for calculating rate
7 base additions in the attrition year. The Commission should not authorize any specific
8 plant improvement projects after 2025 in this rate case, as Cal Am requests.

9 **IV. CONCLUSION**

10 The Commission should follow its own guidelines in the Revised Rate Case Plan
11 for calculating rate base additions in the attrition year and not authorize any specific plant
12 improvement projects after 2025 in this rate case, as Cal Am requests.

²⁵⁵ D.04-06-018 at A-19.

Attachment 1-1: Qualifications of Witness

QUALIFICATIONS AND PREPARED TESTIMONY
OF
JUSTIN MENDA

Q.1 Please state your name and address.

A.1 My name is Justin Menda and my business address is 505 Van Ness Ave, San Francisco, California 94102.

Q.2 By whom are you employed and what is your job title?

A.2 I am a Utilities Engineer in the Water Branch of the Cal Advocates of California Public Utilities Commission.

Q.3 Please describe your educational and professional experience.

A.3 I received a Bachelor of Science Degree and Master of Science Degree in Civil Engineering from the University of California Irvine.

I have been employed by the Cal Advocates since June 2012. Since that time, I prepared testimony on capital investment in several GRCs: California Water Service Company's 2012, 2015, 2018 and 2021 GRCs; California-American Water's 2013, 2016, and 2019 GRCs; San Jose Water Company's 2015 GRC; and Golden State Water Company's 2017 and 2020 GRC.

Q.4 What is your area of responsibility in this proceeding?

A.4 I am responsible for the preparation of testimony regarding proposed plant projects in the Northern and Central Divisions, tanking painting, projects previously funded in rates but are not providing a benefit to ratepayers, and 2026 plant additions.

Q.5 Does that complete your prepared testimony?

A.5 Yes, it does.

**Attachment 1-7: Cal Am Response to
Public Advocates Office Data Request
JMI-017 (Malaga Well – Sacramento)**

California-American Water Company

APPLICATION NO. A.22-07-001
DATA REQUEST RESPONSE

Response Provided By: Mark Hernandez
Title: Capital Program Senior Administrator
Address: California American Water
4701 Beloit Dr
Sacramento CA 95838
Cal Adv Request: A2207001 CAL ADV DATA REQUEST # JMI-17
Company Number: Cal ADV JMI 17 Q001.a
Date Received: October 19, 2022
Date Response Due: November 2, 2022
Subject Area: Malaga Well

DATA REQUEST:

1. Regarding the Malaga Well Replacement and TCP Treatment project (project code I15-600110), the Direct Testimony of Ian C. Crooks at p. 219:9-11 states that Cal Am settled a lawsuit in 2021 pertaining to the 1,2,3-TCP contamination of the Malaga Well, and the settlement provides "funding to either provide treatment for the Malaga Well or construct a new well with treatment."

- a. Please indicate, in dollar amount and percent of total project costs, what portion of the costs of the well replacement and treatment is being funded by the 2021 settlement.

CAL-AM'S RESPONSE

California American Water incorporates its General Objections as if each is stated fully here. California American Water further objects to the extent this request calls for any legal conclusions. Subject to, but without waiving, these objections, California American Water responds: \$3,657,555.28, the entire settlement, or 51% of Project I15-600110's total estimated cost.

California-American Water Company

APPLICATION NO. A.22-07-001
DATA REQUEST RESPONSE

Response Provided By: Mark Hernandez
Title: Capital Program Senior Administrator
Address: California American Water
4701 Beloit Drive
Sacramento, CA 95838
Cal Adv Request: A2207001 CAL ADV DATA REQUEST # JMI-17
Company Number: Cal ADV JMI 17 Q001.b
Date Received: October 19, 2022
Date Response Due: November 2, 2022
Subject Area: Malaga Well

DATA REQUEST:

1. Regarding the Malaga Well Replacement and TCP Treatment project (project code I15-600110), the Direct Testimony of Ian C. Crooks at p. 219:9-11 states that Cal Am settled a lawsuit in 2021 pertaining to the 1,2,3-TCP contamination of the Malaga Well, and the settlement provides “funding to either provide treatment for the Malaga Well or construct a new well with treatment.”

- a. Please clarify (both specific workpaper and tab) where the Malaga Well settlement contributions related to I15-600110 are recorded in the RO model.

CAL-AM’S RESPONSE

Settlement contributions for the Malaga Well were identified California American Water’s Engineering Department for inclusion in the SCEP but were inadvertently not included in the RO Model. The RO Model should be adjusted to reflect a contribution of \$3,657,558 for project code I15-600110.

Showing 1 to 10 of 10 entries Previous Next

RL – Reporting Level means the level to which the laboratory reported the presence of an analyte. For radionuclides, Reporting Level is the MDA95.
 DLR – Detection Limit for purposes of Reporting (DLR) means the designated minimum level at or above which any analytical finding of a contaminant in drinking water resulting from monitoring required under Chapter 15 of Title 22 shall be reported to the State Board (California Code of Regulations Section § 64400.34)
 For additional definitions, please refer to our [data dictionary](#).

California-American Water Company

APPLICATION NO. A.22-07-001
DATA REQUEST RESPONSE

Response Provided By: Edward Simon
Title: Director Business Performance
Address: California American Water
655 W Broadway, Suite 1410
San Diego CA 92101

Cal Adv Request: A2207001 CAL ADV DATA REQUEST # JMI-18
Company Number: Cal ADV JMI 18 Q002
Date Received: October 21, 2022
Date Response Due: November 4, 2022
Subject Area: Vehicles

DATA REQUEST:

2. Please provide the following for each new vehicle that Cal Am is proposing to add in this GRC *not* due to replacement of existing vehicles, using the attached Excel file labeled "A2207001 Cal Advocates DR JMI-018 (Vehicles)," tab: "Q2-Additional Vehicles":

- a. District Name
- b. Year, make, model of proposed additional vehicle
- c. Proposed vehicle GVWR
- d. Primary use of proposed vehicle
- e. Proposed vehicle location (e.g., on-call vs. on location).4
- f. If vehicle will be on location, specify which location.
- g. Direct cost of proposed vehicle

CAL-AM'S RESPONSE

Cal Am is not proposing to add any new vehicles that are not due to replacement of existing vehicles in this GRC.

to be Completed in 2024 (or Later)^{341 342},**

³⁴¹ Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total CAPEX WS-5.” Cal Am RO model file “ALL_CH07_PLT_RO_Forecast,” tab: “Total CAPEX WS-5” (from A.16-07-002 and A.19-07-004). Cal Am RO model file “RB 100 thru 105-2013 Statewide GRC-Monterey Water,” tab: “SCEP Summary” (from A.13-07-002). Cal Am RO model file “RB 100 thru 105-2013 Statewide GRC-Los Angeles,” tab: “SCEP Summary” (from A.13-07-002). The project costs shown in Cal Am RO model files “RB 100 thru 105-2013 Statewide GRC-[District Name],” tab: “SCEP Summary” (from A.13-07-002) are total project costs. The direct project costs shown in the A.13-07-002 column was estimated by removing contingency and overhead costs from the total project costs. Engineering Workpaper, Tab 43 at 1. Engineering Workpaper, Tab 69 (from A.13-07-002) at 5. Engineering Workpaper, Tab 38 at 1. Engineering Workpaper, Tab 56 (from A.13-07-002) at 6. Engineering Workpaper, Tab 124 at 3. Engineering Workpaper, Tab 15 (from A.13-07-002) at 11. Engineering Workpaper, Tab 40 (from A.13-07-002) at 5. Engineering Workpaper, Tab 17 at 1. Engineering Workpaper, Tab 22 at 2. Schubert Direct Testimony at 107-108. Direct Testimony of F. Mark Schubert (from A.13-07-002) at 34. Cal Am RO model files “ALL_CH07_PLT_RO_Forecast” do not show the project costs in the attrition years. The direct project costs in the attrition year were estimated by multiplying the project cost during the attrition year (shown in the summary tables in Crooks Direct Testimony) by the ratio of the direct project cost shown in RO model in 2022 and project cost in 2022 (shown in the summary tables in Crooks Direct Testimony).

³⁴² In the 2016 rate case, Cal Am requested funding for design of the entire pipeline and construction for the first construction phase (30,096 feet) for the Silver Strand 16-inch diameter Transmission Main Replacement project (“Silver Strand Main”). Cal Am states that the total estimated cost for the design of the entire project and the construction of the first project phase is approximately \$14,632,000. In the 2016 rate case, Cal Am states that the total estimated cost for the entire pipeline is approximately \$23,300,000. In the 2019 rate case, Cal Am stated that it would complete the Silver Strand Main by 2024. In the 2022 rate case, Cal Am states that the Silver Strand Main would be completed by 2028. Cal Am states in this rate case that it plans on spending \$16.5 million to replace 16500 feet in 2023-2025 for the Silver Strand Main. In addition, Cal Am plans on spending \$21.15 million to replace 21,150 feet in 2026-2028 for the Silver Strand Main and does not specify whether the revised project cost is a direct or total project cost. Cal Am does not specify if the 2023-2028 project cost for the Silver Strand Main is direct or total cost. Cal Am states that the revised project cost for MRY-Interconnect RR, HH, Bishop project is \$7,602,601. Cal Am states that the revised project costs for the Rehabilitate/Redrill Longden Well project is \$4 million and does not specify whether the revised project cost is a direct or total project cost. Cal Am states that the revised project costs for the LA-Reconstruct Rosemead Operations Center is \$13.6 million. Cal Am states that the revised project costs for the MRY-Los Padres Dam NMFS MOA Requirements project (“Los Padres Dam NMFS”) is \$3.3 million. Cal Am does not specify whether the revised the project cost for the Los Padres Dam NMFS is a direct or total project cost. Cal Am only provides an updated total project cost of \$1,777,658 for LA-Duarte - Redrill Santa Fe Well project in A.13-07-002.
