  

   



                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | I repc<br>has<br>repc<br>has<br>repc<br>has<br>repc<br>has<br>repc<br>has<br>repc<br>has<br>repc<br>has<br>repc<br>has<br>repc<br>has<br>repc<br>to<br>solution<br>1 quat<br>repc<br>to<br>1 quat<br>repc<br>to<br>1 quat<br>repc<br>to<br>1 quat<br>repc<br>to<br>1 quat<br>repc<br>to<br>1 quat<br>repc<br>to<br>1 quat<br>repc<br>to<br>1 quat<br>repc<br>to<br>1 quat<br>repc<br>to<br>1 for<br>0 for<br>1 quat<br>repc<br>to<br>1 for<br>0 for<br>1 quat<br>1 qua                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | fallen<br>fallen<br>ort.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Image: organization of the second                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | fallen<br>fallen<br>ort.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Image: Sharper sharpe                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | fallen<br>fallen<br>ort.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | I quar<br>mos<br>com<br>I quar<br>year<br>7 year<br>7 for<br>0 for<br>0 outled<br>3 perfe<br>4 cont<br>5 for<br>1 ket<br>7 cane<br>2 cm<br>1 quar<br>year<br>7 year<br>7 for<br>0 outled<br>3 perfe<br>4 cont<br>1 ket<br>1 cane<br>2 for<br>1 for<br>1 for<br>1 for<br>1 for<br>1 for<br>1 for<br>2 for<br>1 for<br>2 for<br>1 for<br>2 for           | fallen<br>fallen<br>ort.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | I repc<br>mos<br>mos<br>com<br>I quan<br>7.1 from<br>3.6 uted<br>3.1 Mar<br>0 for<br>0 for<br>1 expe<br>3 perfd<br>4 cont<br>5 form<br>1 ket<br>cane<br>2 refin<br>6 misti<br>8 har<br>7 cont<br>1 misti<br>8 har<br>9 cont<br>1                                                                                                                                                  | fallen<br>fallen<br>ort.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | I repc<br>mos<br>mos<br>com<br>I quan<br>7.1 from<br>3.6 uted<br>3.1 Mar<br>0 for<br>0 for<br>1 expe<br>3 perfd<br>4 cont<br>5 form<br>1 ket<br>cane<br>2 refin<br>6 misti<br>8 har<br>7 cont<br>1 misti<br>8 har<br>9 cont<br>1                                                                                                                                                  | fallen<br>fallen<br>ort. ## BUCKEYE PARTNERS, L.P. REPORTS THIRD QUARTER 2008 RESULTS AND INCREASES QUARTERLY DISTRIBUTION

Breinigsville, PA – October 28, 2008. . . Buckeye Partners, L.P. (NYSE:BPL) (the "Partnership") today reported its financial results for the third quarter of 2008. The Partnership's net income for the third quarter of 2008 was \$46.6 million, or \$0.79 per LP unit, compared with net income of \$36.4 million, or \$0.71 per LP unit, reported for the third quarter of 2007. The Partnership's EBITDA (as defined below) for the third quarter of 2008 was \$81.3 million, compared with EBITDA of \$60.6 million in the third quarter of 2007. Net income per LP unit in the third quarter of 2008 reflects an increase in the average number of LP units outstanding during the third quarter to 48.4 million from an average of 42.7 million LP units outstanding in the third quarter of 2007.

Revenue in the third quarter of 2008 was \$496.2 million compared with revenue in the third quarter of 2007 of \$125.7 million. Revenue in the third quarter of 2008 includes \$16.8 million generated by the Partnership's Natural Gas Storage segment, which consists of the natural gas storage facilities that were acquired in January 2008, and \$344.5 million generated by the Partnership's Energy Services segment consisting principally of the wholesale operations of Farm & Home Oil Company LLC, which were acquired in February 2008 and merged into the Partnership's Buckeye Energy Services LLC subsidiary on August 1, 2008. Operating income in the third quarter of 2008 was \$64.5 million compared with operating income of \$47.5 million in the third quarter of 2007. Operating income in the third quarter of 2008 includes \$8.9 million from the Natural Gas Storage segment and \$3.8 million from the Energy Services segment.

#### Buckeye Partners – 2008 Third Quarter Earnings

#### Page 2

The Board of Directors of Buckeye GP LLC, the general partner of the Partnership, declared a regular quarterly partnership cash distribution of \$0.875 per LP unit, payable November 28, 2008 to unitholders of record on November 7, 2008. This cash distribution represents a quarterly increase in the distribution of \$0.0125 per LP unit to an indicated annualized cash distribution level of \$3.50 per LP unit. This is the 87th consecutive quarterly cash distribution paid by the Partnership.

Separately, the Partnership is pleased to announce that its subsidiary, Lodi Gas Storage, L.L.C. ("Lodi"), has successfully begun natural gas injection into an expansion of its natural gas storage reservoir known as Kirby Hills located near Suisun City, California. When fully operational, the expansion of the Kirby Hills storage facility, known as Kirby Hills Phase II will add an estimated 11 billion cubic feet ("Bcf") of natural gas storage capacity to Lodi's current storage capacity. With the Kirby Hills Phase II expansion, Lodi's aggregate storage capacity is expected to be approximately 33 Bcf, and its injection and withdrawal rates are expected to increase to 600 million cubic feet per day ("MMcfd") and 700 MMcfd, respectively. The Kirby Hills Phase II expansion project is expected to be fully operational in February 2009.

Forrest E. Wylie, Chairman and CEO, stated, "We are pleased to report solid financial results for Buckeye in the third quarter and year to date 2008. Buckeye's business fundamentals remain strong despite the turmoil in the economy generally and continued volatility in refined petroleum product prices. In the third quarter, our Pipeline Operations segment experienced a slight decline in operating income compared to the same period last year as revenue declines associated with a 4.6 percent reduction in pipeline volumes in the quarter were not fully offset by the positive impact of tariff rate increases and good cost control. Our Terminalling and Storage segment continued to produce favorable year on year results due primarily to increased ethanol blending and additive injection charges at our product terminals. In addition, we continue to be extremely pleased with the results of the Natural Gas Storage segment, as our natural gas storage operations in northern California performed in line with our expectations. We look forward to increased business opportunities in this segment resulting from our Kirby Hills Phase II expansion project. Finally, our Energy Services segment has stabilized as the rapid run-up in refined petroleum product prices and associated volatility abated somewhat

### **Cash Distributions**

One of the principal objectives of the Enbridge Partnership is to generate cash from operations in order to distribute available cash to the partners.

On or before 45 days after the end of each calendar quarter, 100% of available cash, as determined by the Board of Directors, is distributed to unitholders of record and to the General Partner.

#### Projected Cash Distribution Dates

	2009				
	Q1	Q2	Q3	Q4	
Payment Date	Feb 13	May 15	Aug 14	Nov 13	
Record Date	Feb 05	May 07	Aug 06	Nov 05	
Ex-Dividend Date	Feb 03	May 05	Aug 04	Nov 03	
Declaration Date	Jan 30	Apr 30	Jul 24	Oct 29	

All future dates are tentative and cash distributions are not made until approved by the Board of Directors of the General Partner.

To be entitled to a declared cash distribution, investors must have purchased units at least one business day in advance of the Ex-Dividend Date. Commencing on the Ex-Dividend Date, units trade without entitlement to the recently declared cash distribution.

Record Date is the date upon which an investor must be registered as a unitholder in order to receive a declared distribution. Declaration Date is the date upon which the Board of Directors declares a distribution.

#### **Cash Distributions by Date of Payment**

#### Kinder Morgan Expects to Distribute \$4.02 Per Unit for 2008

Represents 17% Growth Over 2007 Budgeted Distribution per Unit

HOUSTON, Nov. 26 /PRNewswire-FirstCall/ -- Kinder Morgan Energy Partners, L.P. (NYSE: KMP) today announced it expects to declare cash distributions of \$4.02 per unit for 2008. This projection includes contributions from assets currently owned by KMP and does not include any benefits from unidentified acquisitions.

KMP Chairman and CEO Richard D. Kinder said, "We expect to grow our distribution per unit about 17 percent in 2008 relative to our 2007 budget of \$3.44. As we stated previously, we anticipate actual distributions per unit for 2007 will come in above budget. Our business units in 2008 are projected to deliver approximately \$2.6 billion in distributable cash flow, which is an increase of about \$500 million over their 2007 performance." Additionally, the 2008 budget includes an excess of distributable cash flow over distributions of approximately \$15 million.

"We are very excited to begin to deliver back to our KMP unitholders and KMR shareholders the value being created through our large expansion capital program," Kinder said. "Our expected robust growth in 2008 will be fueled by the addition of Rockies Express-West, higher hedge prices on our crude production and anticipated strong performance from our other assets." Kinder noted the CO2 segment is expected to produce incremental distributable cash flow of approximately \$200 million in 2008, but that growth will be driven by higher hedge prices rather than an expected increase in volumes. Budgeted production volumes for the SACROC Unit in 2008 are slightly below the volumes being realized in 2007.

"Our capital expansion program will continue to be significant in 2008, as we expect to invest about \$2.1 billion in expansion capital expenditures (including equity contributions to the Rockies Express and Midcontinent Express pipeline projects) which will drive growth in 2009 and beyond," Kinder said.

The company remains committed to transparency and a detailed budget for KMP will be discussed during the company's annual analyst meeting Jan. 24, 2008, in Houston, and will be published on the company's web site, http://www.kindermorgan.com. The 2008 budget will be the standard by which KMP measures its performance next year and will be a target for determining employee bonuses.

Kinder Morgan Management, LLC

Kinder Morgan Management, LLC (NYSE: KMR) expects to declare cash distributions of \$4.02 per share for 2008. The distribution to KMR shareholders will be paid in the form of additional KMR shares. The distribution is calculated by dividing the cash distribution to KMP unitholders by KMR's average closing price for the 10 trading days prior to KMR's ex-dividend date.

Kinder Morgan Energy Partners, L.P. (NYSE: KMP) is a leading pipeline transportation and energy storage company in North America. KMP owns an interest in or operates more than 24,000 miles of pipelines and 150 terminals. Its pipelines transport natural gas, gasoline, crude oil, CO2 and other products, and its terminals store petroleum products and chemicals and handle bulk materials like coal and petroleum coke. KMP is also the leading provider of CO2 for enhanced oil recovery projects in North America. One of the largest publicly traded pipeline limited partnerships in America, KMP has an enterprise value of approximately \$20 billion. The general partner of KMP is owned by Knight Inc. (formerly Kinder Morgan, Inc.), a private company.

The non-generally accepted accounting principles financial measures of distributable cash flow or distributable cash flow per unit, are presented in this news release. For KMP overall, we define distributable cash flow to be limited partners' pretax income before DD&A less cash taxes paid and sustaining capital expenditures for KMP, plus DD&A less sustaining capital expenditures for Rockies Express, our equity method investee. For our segments we define distributable cash flow as segment net income (which is before corporate costs of G&A and interest) plus DD&A less sustaining capital expenditures. The components of the difference between overall KMP distributable cash flow and segment distributable cash flow are cash versus book taxes, DD&A and sustaining capital expenditures on Rockies Express, G&A, interest, minority interest and the general partner's interest. The amounts included in the calculation of this measure are computed in accordance with generally accepted accounting principles (GAAP), with the exception of "sustaining capital expenditures," which is not a defined term under GAAP. Consistent with the partnership agreement of Kinder Morgan Energy Partners, L.P., sustaining or maintenance capital expenditures are defined as capital expenditures (as defined by GAAP) which do not increase the capacity of an asset. We routinely calculate and communicate these measures to investors. We believe that continuing to provide this information results in consistency in our financial reporting. In addition, we believe that these measures are useful to investors because they enhance the investors' overall understanding of our current financial performance and our prospects for future performance. Specifically, we believe that these measures provide investors an enhanced perspective on the operating performance of our assets and the cash that our businesses are generating.
