Percent of Power Plants in use on Local Transmission on a Peak Summer Day	A
The Percent of Total System Throughput that are Power Plants	B
A x B = C -> Backbone to Local Transmission Reduction Factor	C = A*B

One a peak day, about 70% of SCG's total power-plant gas usage flows through LT pipes. Since power plants altogether make up about 30% of system demand, that implies that 70% of that 30%, or 20% of the entire system's throughput should be reloaded to LT instead of BB. This is because a percentage of BB assets provide the same function as an LT.

Attachment D: Applicants Chapter 2 Workpapers, excerpt.

SoCalGas uses 65° Fahrenheit to calculate the number of HDDs. One heating degree day is accumulated for each degree that the daily average is below 65° Fahrenheit. To arrive at the HDD figure for each temperature zone, SoCalGas uses the simple average of the weather station HDDs in that temperature zone. To arrive at the system average HDDs figure for its entire service area, SoCalGas weights the HDD figure for each zone using the proportion of gas customers within each temperature zone based on year 2024 customer counts. These weights have been used in calculating the data shown from January 2005 to December 2024.

Daily weather temperatures are from the National Climatic Data Center or from preliminary data that SoCalGas captures each day for various individual weather stations as well as for its system average values of HDD. Annual and monthly HDDs for the entire service area from 2005 to 2024 are listed in Table 2, below.

An area of 0.0286 under one tail of the T-Distribution translates to 2.025 standard deviations above an average-year based on a t-statistic with 19 degrees of freedom. Using the standard deviation calculated as described earlier, which is 111.7 HDD, these equations yield values of about 1,465 HDD for a “1-in-35” cold year and 1,387 HDDs for a “1-in-10” cold year. (An area of 0.1000 under one tail of the T-Distribution translates to 1.328 standard deviations above an average-year based on a t-statistic with 19 degrees of freedom.) For example, the “1-in-35” cold-year HDD is calculated as follows:

$$(3) \quad \text{Cold-year HDD} = 1,465, \text{ which equals approximately } 1,239 \text{ average-year HDDs} + 2.025 * 111.7$$

Table 4 shows monthly HDD figures for “1-in-35” cold year, “1-in-10” cold year and, average year temperature designs. The monthly average-temperature-year HDDs are calculated from weighted monthly HDDs from 2005 to 2024, as shown as the bottom of Table 2, above. For example, the average-year December value of 274.3 HDD equals the simple average of the twenty December HDD figures from 2005 to 2024. SoCalGas calculates the cold--temperature-year monthly HDD values using the same distribution of average-year HDDs. For example, 22.14 percent (274.3 / 1239) of average-temperature-year HDDs occurred in December, so the estimated number of HDDs during December for a 1-in-35 cold-year is equal to 1,465 HDDs multiplied by 22.1 percent, or 324.3 HDDs.

BACKBONE TRANSPORTATION SERVICE

Sheet 1

APPLICABILITY

Applicable to firm and interruptible Backbone Transportation Service to Utility's transmission system. Service under this Schedule is available to any creditworthy party. All eligible participants are collectively referred to herein as "customers" unless otherwise specified.

Backbone Transportation Service rights to Utility's transmission system neither guarantee nor imply firm service on Utility's local transmission/distribution system; such service is defined by the end-use customers' applicable Utility transportation service agreement.

TERRITORY

Applicable throughout the service territory.

RECEIPT POINTS

Receipt Points available for service under this schedule are as follows:

<u>Transmission Zone</u>	<u>Total Transmission Zone Firm Access (MMcfd)</u>	<u>Specific Points of Access (MMcfd)*</u>	
Southern	1210	EPN Ehrenberg - 1210 TGN Otay Mesa - 400 NBP Blythe - 600

BILLING CALCULATION

Monthly Reservation Charge:

The Monthly Reservation Charge is payable each month regardless of the quantity of gas scheduled during the billing period. The Reservation Charge for each billing period shall be calculated using the applicable reservation rate and the DCQ as specified in Customer's Backbone Transportation Service Contract (BTSC).

Monthly Reservation Charge = Applicable Reservation Rate * DCQ * number of days in the billing period (or, if less than one month, number of days in term of contract).

Monthly Volumetric Charge:

The Monthly Volumetric Charge for each billing period shall be calculated using the applicable volumetric rate multiplied by the scheduled quantities on the Customer's BTSC.

Monthly Volumetric Charge = Applicable Volumetric Rate * Quantities of Gas Scheduled during the billing period.

In-Kind Energy Charges:

Customers transporting gas over the backbone transmission system shall deliver each day for each billing period at the receipt point an additional in-kind quantity of natural gas equal to a percent of the total quantity delivered at the receipt point. The quantity received by the Utility at the receipt point shall equal the quantity delivered by the Utility to the delivery point divided by (1 - x) where x is the decimal equivalent of the backbone transmission system in-kind fuel factor percentage.

Rate, percent reduction 0.223%

Any applicable volumetric charges shall be charged on scheduled volumes net of shrinkage.

SPECIAL CONDITIONS (Continued)

GENERAL (Continued)

10. The Utility will not sell incremental firm receipt point capacity following the announcement of an OFO for the flow day on which the OFO is called. Once an OFO has been called, the Utility will be limited to sales of incremental interruptible Backbone Transportation Service capacity for the flow day on which the OFO is called.
11. Customers may aggregate their firm Backbone Transportation Service capacity into one contract number for each receipt point for the purposes of nominations and scheduling. Only firm Backbone Transportation Service contracts under identical rate schedules may be aggregated. Aggregation of contracts must be done using the EBB.

NOMINATIONS AND BALANCING

1. Service under this rate schedule shall be subject to all applicable terms, conditions and obligations of Rule No. 23, Continuity of Service and Interruption of Delivery, Rule No. 30, Transportation of Customer-Owned Gas, and Rate Schedule No. G-IMB, Transportation Imbalance Service.
2. The Utility will schedule interruptible nominations up to all available Backbone Transportation Service capacity at each of its Receipt Points subject to Rule No. 30, Transportation of Customer-Owned Gas.
3. Unless otherwise indicated in a discounted contract, customers holding firm Backbone Transportation Service capacity will be able to nominate natural gas for delivery on an alternate "within-the-zone" firm basis from any specific Receipt Point within an applicable transmission zone. Unless otherwise indicated in a discounted contract, customers will also be able to nominate natural gas for delivery on an alternate "outside-the-zone" firm basis from any receipt point on the system. All such nominations will be scheduled in accordance with Rule No. 30, Transportation of Customer-Owned Gas.
4. A customer may opt to designate one and only one nominating agent in addition to itself at any one time to nominate on all BTSCs under a customer's RPMA. Customer must provide appropriate written authorization to the Utility of its intent to add or change a designated nominating agent via the Nomination and Trading Authorization Form (Form No. 9924). Such designation shall be subject to that nominating agent complying with applicable tariff and contractual provisions. Customer shall provide appropriate written notice to the Utility of its intent to terminate a nominating agent via the Termination of Nominating or Trading Agent Form (Form No. 9926).

SOUTHERN CALIFORNIA GAS COMPANY Revised CAL. P.U.C. SHEET NO. 62004-G
 LOS ANGELES, CALIFORNIA CANCELING Revised CAL. P.U.C. SHEET NO. 57362-G

PRELIMINARY STATEMENT - PART V - BALANCING ACCOUNTS Sheet 1
NONCORE STORAGE BALANCING ACCOUNT (NSBA)

1. Purpose

The NSBA is a balancing account. The purpose of this account is to balance the authorized embedded costs for unbundled storage service as authorized in SoCalGas’ 2024 Cost Allocation Proceeding (CAP) Decision (D.) 24-07-009. This account will be revised for any subsequent changes adopted in a cost allocation proceeding and the corresponding reservation revenues collected from customers who contract for storage service under the unbundled storage program, including any net revenues from any storage expansions undertaken that are allocated to the unbundled storage program. In addition, the net revenues from hub services collected under SoCalGas’ G-PAL (Operational Hub Services) tariff that was approved pursuant to D.07-12-019 are treated as unbundled storage revenues.

T
T

2. Applicability

See Disposition Section.

3. Rates

The balance in the NSBA will be included in gas transportation rates.

4. Accounting Procedures

The Utility shall maintain the NSBA by making entries at the end of the month, net of FF&U, as follows:

N

- a. A credit entry equal to 100% of the reservation and variable O&M charge revenues associated with the unbundled storage program and any net revenues from storage expansions undertaken during the settlement period that are allocated to the unbundled storage program;
- b. A credit entry equal to 100% of the net revenues from hub services provided under Schedule G-PAL;
- c. A debit entry equal to one-twelfth of the authorized embedded costs allocated to unbundled storage service;
- d. An adjustment to reflect storage costs consistent with the allocation of storage adopted in D.24-07-009 that are not currently reflected in current transportation rates and authorized storage margin as described in entry (c).

Attachment H: SoCalGas Preliminary Statement Part VI, Memorandum Account, Firm Access and Storage Rights Memorandum Account (“FASRMA”).

SOUTHERN CALIFORNIA GAS COMPANY Revised CAL. P.U.C. SHEET NO. 49320-G
 LOS ANGELES, CALIFORNIA CANCELING Revised CAL. P.U.C. SHEET NO. 47343-G

PRELIMINARY STATEMENT - PART VI - MEMORANDUM ACCOUNT Sheet 1
FIRM ACCESS AND STORAGE RIGHTS MEMORANDUM ACCOUNT (FASRMA)

1. Purpose

The FASRMA is an interest bearing memorandum account that is recorded on SoCalGas' financial statements. The FASRMA shall record costs incurred by SoCalGas to implement a firm, tradable access and storage rights structure to provide customers with an opportunity to obtain firm access into the utility system at a specific receipt point and storage capacity throughout the year and off-system and pooling services. In addition, the FASRMA shall record the reasonable costs of establishing and maintaining new postings on the Electronic Bulletin Board (EBB), a new fifth nomination cycle, new optional enhanced balancing services, and system expansion studies (plus any related third-party review). Pursuant to Decision (D.) 13-05-010, SoCalGas' Test-Year 2012 General Rate Case, the costs associated with the completion of these projects listed above have been included in rate base for recovery. As a result, effective January 1, 2012, the FASRMA will no longer record these costs. Pursuant to D. 11-03-029, the FASRMA will record system modification costs in providing interruptible and firm Off-System Delivery (OSD) services and any related OSD revenues to recover these costs.

2. Applicability

See Disposition section.

3. Rates

The projected year-end FASRMA balance will be included in gas transportation rates.

4. Accounting Procedures

SoCalGas shall maintain the FASRMA by making entries to the account at the end of each month, net of FF&U, as follows:

- a. A debit entry to record incremental operating and maintenance (O&M) and capital-related costs (i.e., depreciation, return on investment, and related taxes) for system modification costs related to OSD services.
- b. A credit entry equal to OSD revenues to recover up to the maximum amount of system modification costs as described in entry a. Any excess OSD revenues are recorded to the Backbone Transmission Balancing Account (BTBA).
- c. An entry to amortize the previous year's balance, and
- d. An entry equal to the interest on the average balance in the account during the month, calculated in the manner described in the Preliminary Statement, Part I, J.

5. Disposition

In each annual October regulatory account balance update filing, SoCalGas will amortize the projected year-end balance (excluding transactions identified in entries a. and b.) effective January 1 of the following year. The projected year-end balance will be allocated on an Equal Cents Per Therm (ECPT) basis.

**APPLICATION OF SOUTHERN CALIFORNIA GAS COMPANY
& SAN DIEGO GAS & ELECTRIC COMPANY FOR AUTHORITY TO REVISE THEIR
NATURAL GAS RATES AND IMPLEMENT STORAGE PROPOSALS
IN THE 2027 COST ALLOCATION PROCEEDING (A.25-09-014)
DATA REQUEST SET 5 FROM SCGC DATED FEBRUARY 20, 2026
SOCALGAS RESPONSE DATED: MARCH 20, 2026 - PARTIAL**

Referring to the workpaper “2027 CAP Ch4 Fiola EG Forecast Workpapers 2027 CAP”:

Question 5.1.

Are the assumptions SoCalGas and SDG&E relied upon in modeling the EG gas usage completely consistent with the assumptions incorporated in the CPUC’s IRP 2023 PSP published in October 2023?

Response

The assumptions are consistent.

Question 5.3. - Corrected Response Below

Please identify the total generation and imports for each year, 2024-2030, assumed by the model used by SoCalGas and SDG&E.

Corrected Response

Applicants object to this request to the extent it is overbroad and vague and ambiguous. Subject to and without waiving the foregoing, Applicants provide the following response:

Applicants provide the table below based on the assumption the question refers to all the generation in California. Applicants do not have detailed generation data outside of our service territory; therefore, figures have not been validated.

Total CA In-State Generation

Year	Generation (GWh)
2026	203,557
2027	213,762
2028	226,195
2029	238,925
2030	251,475

Question 5.4. – Supplemental Response Below

Please identify the amount of natural gas generation (GWh) assumed for each year modeled, 2024-2030.

Supplemental Response

Applicants object to this request to the extent it is overbroad and vague and ambiguous. Subject to and without waiving the foregoing, Applicants provide the following response: Applicants provide the table below based on the assumption the question refers to all the gas-fired generation in California. Applicants do not have detailed generation data outside of our service territory; therefore, figures have not been validated.

Year	California Gas-Fired Generation (GWh)
2026	59,489
2027	64,678
2028	68,212
2029	69,752
2030	73,146

Attachment M: Applicants Response to SCGC-12

**APPLICATION OF SOUTHERN CALIFORNIA GAS COMPANY
& SAN DIEGO GAS & ELECTRIC COMPANY FOR AUTHORITY TO REVISE THEIR
NATURAL GAS RATES AND IMPLEMENT STORAGE PROPOSALS
IN THE 2027 COST ALLOCATION PROCEEDING (A.25-09-014)
DATA REQUEST SET 12 FROM SCGC DATED MARCH 31, 2026
SOCALGAS RESPONSE DATED: APRIL 14, 2026**

Question 12.1.

With respect to the workpaper Errata-SCG Rate Design Model_Public at tab "Rates":

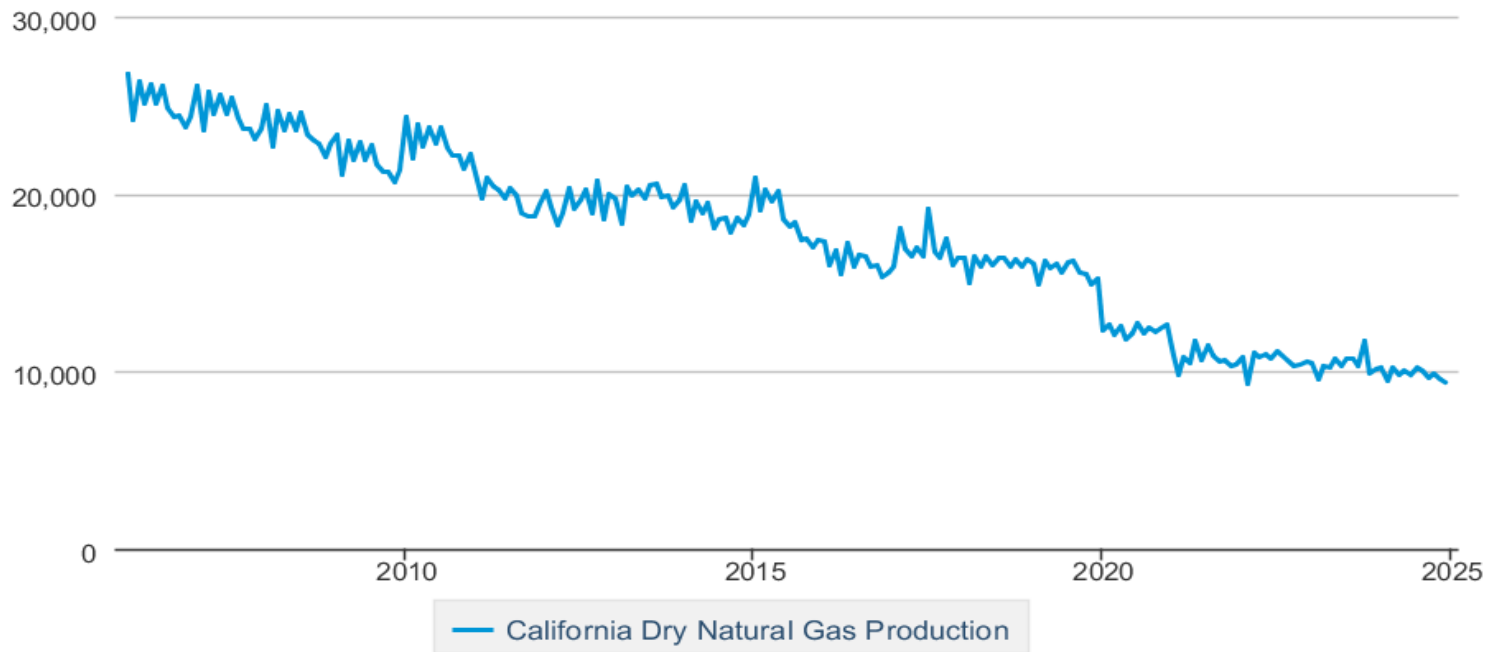

- 12.1.1 The formula for the Core EG allocation of Balancing Account costs at row 619 refers to a pro rata share of Core C&I costs at row 609. The formula at row 609 explicitly excludes CFCA costs. Why are the CFCA costs excluded from the allocation to Core EG?
- 12.1.2 Please provide the authorization that Applicants are relying upon in excluding any allocation of CFCA costs from the Core EG rate. In providing this authorization, please cite to specific language of each Commission decision or other written materials that has allowed the Applicants to calculate the Core EG rate in the manner described in the previous question.

Response

- 12.1.1 Per Chapter 11 (Witness: G. Lenart) of A.18-07-024, page 5 footnote 5, "The CFCA is not included because there will not be an over-or-under collection. This is due to there being no costs allocated to this new rate class." To clarify, this applies both when the CFCA is under-collected, as well as when the CFCA is over-collected.
- 12.1.2 The Core EG rate proposal in A.18-07-024 was uncontested and was ultimately approved in D.20-02-045 (p. 62). "Applicants are authorized to implement this new tariff via the Tier 2 advice letter required to implement other requirements of this decision."
