CPUC (SED) Data Request 10

Provide in table format the names and current contact information, if known, of all persons or entities employed by the Utility, from the year 2019 to present, who engaged with, enacted, performed, or worked on any activity that relates to any Initiative.

(a) If the activity involved a crew of persons, only provide the information for the foreman and/or crew supervisor and above.

(b) If the activity was performed by a third-party contractor, provide the contractor's name and contact information.

(c) Include in the table the employee's title and job description. Include the work performed by the employee as it relates to any Initiative.

1st Supplemental Response to CPUC (SED) Data Request 10

Further to the Company's response to CPUC SED Data Request 1.10 dated January 28, 2026, and pursuant to the Company's agreement to "provide the names of on-the-ground supervisors responsible for the work," including third-party-contractor-employed supervisors, the Company provides the following supplemental response:

Covered Conductor Initiative (5.3.3.3) and Pole Replacement and Reinforcement Initiative (5.3.3.6): Please refer to Attach CPUC SED 1.10 (1st Supp). – Covered Conductor and Poles. The construction company that completed each project and the construction company supervisor are listed in Columns T and U. Please refer to Attach SED 1.10 (1st Supp.) – Supporting Documents - CONF for the documents referenced in Attach CPUC SED 1.10 (1st Supp). – Covered Conductor and Poles.

Vegetation Management Initiatives (5.3.5.2, 5.3.5.3, 5.3.5.11. 5.3.5.12, 5.3.5.20, and 5.3.5.21): PacifiCorp's vegetation management work was overseen by PacifiCorp's foresters. In 2020, the following foresters were in charge of PacifiCorp's California territory:

- Lorelei Phillips, [redacted]
- Joshua Hooley, [redacted]
- Anna Aritola, [redacted]
- Alex Russell, [redacted]

For third-party contractors, please refer to Attach CPUC SED 1.10 (1st Supp). - Statistics_History_Report_-_for_Excel - CA_2020. Please note that the "year" column in the spreadsheet lists 2021 because one of PacifiCorp's internal data systems is based on fiscal year, not calendar year, and the fiscal year in this data system corresponds to the

prior calendar year (i.e., the spreadsheet lists 2021 as the year, but it refers to calendar year 2020).

Sheet 1, Column H includes the name of the foreman for each activity listed in the spreadsheet. Column E includes the work code for each activity. The following work codes correspond to the vegetation management initiatives identified in the Administrative Enforcement Order (AEO):

- DNT: Distribution Cycle Inspection (detailed inspection)
- FIN: Fire Inspection (patrol inspection)
- FMD: Fire Mitigation Distribution (incremental correction work associated with patrol inspections, done on circuits that were not otherwise scheduled for later detailed inspections)
- FPD: Fire Patrol Distribution (incremental correction work associated with patrol inspections, done on circuits that were scheduled for later detailed inspections)
- FMT: Fire Mitigation Transmission (incremental correction work associated with patrol inspections, done on transmission lines that were not otherwise scheduled for later detailed inspections that intersect HFTD)
- FPT: Fire Patrol Transmission
- DST: Distribution Cycle Maintenance (corrective work as a result of detailed inspections)
- DHS: Distribution Interim/Hot Spot Maintenance (mid-cycle corrective work as conducted as warranted)
- LRA: LRA pole clearing (radial pole clearing)
- TNT: Local Transmission Inspection (detailed inspection)
- THS: Local Transmission Hot Spot Maintenance (as a result of detailed inspection)
- MGI: Main Grid Transmission Inspection (detailed inspection)
- MHS: Main Grid Transmission Hot Spot Maintenance (as a result of detailed inspection)

Sheet 2, Column C includes the name of the third-party contracting company that completed the work.

Weather Stations (5.3.2.1): In 2020, PacifiCorp did not use a third-party contracting company to install weather stations. The following managers oversaw installation of PacifiCorp's weather stations:

- Kristy Kite, [redacted]
- Richard Harris, [redacted]
