Telecommunications, Inc. d/b/a PowerNet
Global Communications for Authority to Operate
as a Provider of Facilities Based Local Exchange
and Interexchange Telecommunications Services
within the State of California. (U-5673-C)
(U-6336-C)

Application 03-10-043
(Filed October 16, 2003)

O P I N I O N**I. Summary**

PNG Telecommunications, Inc., d/b/a PowerNet Global Communications, (Applicant) seeks a certificate of public convenience and necessity (CPCN) under Pub. Util. Code § 1001 for authority to provide limited facilities-based local exchange and interexchange telecommunications services. Applicant was previously authorized to resell local exchange and interexchange services. By this decision, we grant the requested authority subject to the terms and conditions set forth below.

II. Background

In prior decisions, we authorized the provision of competitive interexchange services by carriers meeting specified criteria. In addition, we authorized the provision of competitive local exchange service, by carriers meeting specified criteria, within the service territories of Pacific Bell Telephone Company (Pacific), Verizon California Inc. (Verizon), Roseville Telephone

Company (RTC), and Citizens Telecommunications Company of California, Inc. (CTC).

Applicant, an Ohio corporation, seeks authority to provide limited facilities-based interexchange services as a nondominant interexchange carrier (NDIEC), and limited facilities-based local exchange services as a competitive local carrier (CLC) throughout Pacific and Verizon's service territories.

Applicant's principal place of business is located at 100 Commercial Drive, Fairfield, Ohio 45014.

By Decision (D.) 96-09-071 (U-5673-C), and D.00-06-011 (U-6336-C), Applicant was authorized to resell interexchange and local exchange services, respectively.

III. Financial Qualifications

To be granted a CPCN, an applicant for authority to provide facilities-based and resold local exchange and/or interexchange services must demonstrate that it has a minimum of \$100,000 of cash or cash equivalent to meet the firm's start-up expenses.¹ An applicant must also demonstrate that it has sufficient additional resources to cover all deposits required by local exchange carriers (LECs) and/or interexchange carriers (IECs) in order to provide the proposed service.² Applicant provided audited financial statements that demonstrate that it has sufficient cash to satisfy the financial requirements.

¹ The financial requirement for CLCs is contained in D.95-12-056, Appendix C. The financial requirement for NDIECs is contained in D.91-10-041.

² The requirement for CLC applicants to demonstrate that they have additional financial resources to meet any deposits required by underlying LECs and/or IECs is set forth in D.95-12-056, Appendix C. For NDIECs, the requirement is found in D.93-05-010.

IV. Technical Qualifications

Applicants for NDIEC and CLC authority are required to make a reasonable showing of technical expertise in telecommunications or a related business. Applicant submitted biographical information on its management that demonstrates that it possesses sufficient experience and knowledge to operate as a telecommunications provider.

Applicant represents that no one associated with or employed by Applicant as an affiliate, officer, director, partner, or owner of more than 10% of Applicant was previously associated with any telecommunications carrier that filed for bankruptcy or went out of business, or was sanctioned by the Federal Communications Commission or any state regulatory agency for failure to comply with any regulatory statute, rule, or order, except as follows.

Applicant was fined \$50 in 2003 by the Delaware Secretary of State for late filing of an annual report in 2001.

Since December of 2002, the Federal Communications Commission (FCC) sustained nine slamming complaints (one customer each) against Applicant. Applicant represents that four of the complaints were associated with an acquisition of a customer base from another carrier. In those instances, the notices sent to the acquired customers did not specify the actual rates as required. The notices did, however, state that the rates would be equal to or lower than the previous rates. Of the remaining 5 complaints, Applicant states that one involved a transfer of a customer base where an acquired customer was incorrectly listed by the selling carrier as an active customer. As a result, the customer was switched without authorization. Three additional complaints involved instances where Applicant could not provide documentation that the customer authorized the change. In one of those cases, Applicant did have the

documentation, but could not produce it before the response was due. The last complaint involved a customer who requested service, but not long distance service. The customer's request was processed incorrectly resulting in a change of long distance provider. As a result, of the above complaints, Applicant says that it has corrected its internal procedures, and provided further guidance to its agents and employees.

Applicant represents that it has over 350,000 customers nationwide, and that these were the first complaints determined adversely to it since it started service in 1992. Applicant also represents that it currently has 88,860 customers in California. A review of our records indicates that there have been few informal complaints to the Commission, and no formal complaints have been filed. Therefore, we do not find that the above information warrants a denial of the application. However, we caution Applicant that we expect full compliance with all applicable Commission decisions, orders and rules, as well as all applicable statutes.

V. Tariffs

Commission staff reviewed Applicant's draft tariffs for compliance with Commission rules and regulations. The deficiencies are noted in Attachment A to this decision. Applicant shall correct these deficiencies in its tariff compliance filing as a condition of our approval of its tariffs.

VI. California Environmental Quality Act (CEQA)

CEQA requires the Commission as the designated lead agency to assess the potential environmental impact of a project in order that adverse effects are avoided, alternatives are investigated, and environmental quality is restored or enhanced to the fullest extent possible. Applicant will not be constructing any

facilities, other than equipment to be installed in existing buildings or structures, for the purpose of providing interexchange or local exchange services.

Therefore, it can be seen with certainty that there is no possibility that granting this application will have an adverse effect upon the environment. Applicant must file for additional authority, and submit to any required CEQA review, before it can construct facilities other than equipment to be installed in existing buildings or structures.

VII. Request to File Under Seal

Applicant requests that the financial information filed with the application, and on November 17, 2003, be kept under seal. The financial information consists of financial statements, and a revolving bank note. Applicant represents that the information is proprietary and sensitive. The information, if revealed, would place Applicant at an unfair business disadvantage. We have granted similar requests in the past and will do so here.

VIII. Conclusion

We conclude that the application conforms to our rules for authority to provide competitive local exchange and interexchange telecommunications services. Accordingly, we shall approve the application subject to the terms and conditions set forth herein.

IX. Comments on Draft Decision

This is an uncontested matter, in which the decision grants the relief requested. Accordingly, pursuant to Pub. Util. Code Section 311(g)(2), the otherwise applicable 30-day period for public review and comment is being waived.

X. Categorization and Need for Hearings

In Resolution ALJ 176-3122 dated October 30, 2003, the Commission preliminarily categorized this application as ratesetting, and preliminarily determined that hearings were not necessary. No protests have been received. There is no apparent reason why the application should not be granted. Given these developments, a public hearing is not necessary, and it is not necessary to disturb the preliminary determinations.

XI. Assignment of Proceeding

Susan P. Kennedy is the Assigned Commissioner and Jeffrey P. O'Donnell is the assigned Administrative Law Judge in this proceeding.

Findings of Fact

1. Notice of the application appeared in the Daily Calendar on October 22, 2003.
2. No protests have been filed.
3. A hearing is not required.
4. In prior decisions, the Commission authorized competition in providing interexchange services for carriers meeting specified criteria.
5. In prior decisions, the Commission authorized competition, by carriers meeting specified criteria, in providing local exchange telecommunications services within the service territories of Pacific, Verizon, RTC, and CTC.
6. Applicant has a minimum of \$100,000 of cash or cash equivalent that is reasonably liquid and readily available to meet its start-up expenses.

10. Applicant will not be constructing facilities, other than equipment to be installed in existing buildings or structures.

11. Public disclosure of the financial information filed under seal would place Applicant at an unfair business disadvantage.

Conclusions of Law

1. Applicant has the financial ability to provide the proposed service.

2. Applicant has sufficient technical expertise to operate as a telecommunications carrier.

3. Public convenience and necessity require that Applicant's competitive local exchange and interexchange services be subject to the terms and conditions set forth herein.

4. Since Applicant will not be constructing any facilities, other than equipment to be installed in existing buildings or structures, it can be seen with certainty that there will be no significant effect on the environment.

5. The application should be granted to the extent set forth below.

6. Applicant, once granted a CPCN, should be subject to the applicable Commission rules, decisions, General Orders, and statutes that pertain to California public utilities.

7. Applicant's initial tariff filing should correct the deficiencies in its draft tariffs as indicated in Attachment A to this decision.

8. Applicant's request to file its financial information under seal should be granted for two years.
