PUC TO HOLD PUBLIC MEETINGS ON 714 AREA CODE CHANGE

SAN FRANCISCO, January 3, 2007 -- The California Public Utilities Commission (PUC), recognizing that there may soon be a shortage of available telephone numbers in the 714 area code, will hold public meetings to inform the public and to hear comments about area code change alternatives. The 714 area code is used by cities such as Anaheim, Fullerton, Huntington Beach, Orange, Santa Ana, and Yorba Linda. The scheduled public meetings are:

Wednesday, January 17, 2007

1:30 p.m. - 3:30 p.m.: Local Jurisdiction Meeting for elected and appointed officials
7 p.m. - 9 p.m.: Public Participation Meeting
Anaheim City Hall, East Council Chambers
200 S. Anaheim Blvd., Anaheim

Thursday, January 18, 2007

7 p.m. - 9 p.m.: Public Participation Meeting
City of Orange Council Chambers
300 E. Chapman Ave., Orange

Thursday, January 25, 2007

7 p.m. - 9 p.m.: Public Participation Meeting
City Of Huntington Beach Council Chambers
2000 Main St., Huntington Beach

The North American Numbering Plan Administration (NANPA), which holds overall responsibility for the neutral administration of numbering resources, has determined that whole prefixes are running out in the existing 714 area code. The prefix is the first three digits of the seven digit number and they are assigned to telecommunications exchanges. Exchanges are replenished with more prefixes as the supply of phone numbers decrease. However, once an area code runs low on its supply of whole unused prefixes, a new area code must be added to increase the supply of

numbers. The new 657 area code will be added to the 714 area code to provide more telephone numbers.

PUC staff and NANPA are holding public meetings to explain the area code change options that the telecommunications industry selected for the 714 area code (Split Alternative #4, Split Alternative #6, and Overlay: see maps at <http://www.cpuc.ca.gov/714areacode>). They will also ask for the public's preference as to which area code option should be implemented. Lastly, they will discuss the status of numbering resources in the 714 area code.

The PUC welcomes consumer participation and comments, which will help the PUC determine the area code change option to implement for the 714 area code. If consumers cannot attend the public meetings, preferences on the area code change option and comments can be made on the Commission's website at <http://www.cpuc.ca.gov/714areacode>. Written comments can also be submitted to the Commission's Public Advisor's Office at 320 W. 4th Street, Suite 500, Los Angeles, CA 90013 or via e-mail to public.advisor.la@cpuc.ca.gov.

If specialized accommodations are needed in order to attend the meetings, such as sign language interpreters, please contact the Commission's Public Advisor's Office five business days in advance of the meeting toll free at 866-849-8390 or toll free TTY at 866-836-7825.

Area Code Split and Overlay

Traditionally, area codes have been split to provide more prefixes for the telecommunications industry and its customers, creating smaller geographic areas. Area code splits create new area codes by splitting a geographical region in multiple ways. Only one area code is assigned to a particular geographical region.

An area code overlay is a form of area code change that adds an area code(s) to the same geographic region as the existing area code. Therefore, multiple area codes co-exist within the same geographic region.

If an area code overlay is chosen for the 714 region, consumers with 714 telephone numbers will retain their current telephone number(s) and area code. Consumers who would like new or additional telephone numbers or telecommunications services may be given telephone numbers with the new 657 area code.

More information about the 714 area code change is available at <http://www.cpuc.ca.gov/714areacode>.
